Mr. JAMES. I should like to ask the Senator if in all the line of precedents he has before him or that he can obtain, can he cite the Chair to a single instance where the Senate had agreed to take a recess at a certain hour and then a motion was made to adjourn without theretofore moving to reconsider the former action of the Senate?

Mr. SMOOT. I thought that was so apparent that I have not even taken the time to look it up and see whether there is such a precedent or not.

Mr. LODGE. It was never raised.

Mr. SMOOT. I do not believe it was ever raised in the Senate before; certainly it has not been done while I have been here, because every Senator has taken it for granted that it could be done.

I simply wanted to say to the Senator that I made the motion under the rule, knowing exactly that I had a right to make the motion. Of course the Senate can vote it down. That is all there is to it. I do not see that there is anything further to decide than the Chair has already decided.

The PRESIDING OFFICER. The Chair overrules the point of order. A motion to adjourn is always in order. The question is on the motion of the Senator from Utah [Mr. SMOOT] that the Senate adjourn.

Mr. SMOOT. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BRYAN (when his name was called). I have a pair with the junior Senator from Michigan [Mr. TOWNSEND]. I transfer that pair to the junior Senator from Georgia [Mr. HARDWICK] and vote "nay."

Mr. CHILTON (when his name was called). Making the same announcement as before, I vote "nay."

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. As he is absent from the Chamber, I withhold my vote.

Mr. JAMES (when his name was called). Making the same transfer as upon the former roll call, I vote "nay."

Mr. SAULSBURY (when his name was called). I transfer my pair to the junior Senator from Louisiana [Mr. RANSDELL], as before, and vote "nay."

Mr. SUTHERLAND (when his name was called). I announce my pair with the Senator from Arkansas [Mr. CLARKE], who is absent. I transfer my pair to the Senator from Wisconsin [Mr. STEPHENSON] and vote "yea."

Mr. TILLMAN (when his name was called). Repeating the announcement of the transfer I made a little while ago, I vote "nay." I will let this announcement stand for all subsequent votes.

Mr. WILLIAMS (when his name was called). Making the announcement that under the terms of my pair I have a right to vote to make a quorum, I vote "nay."

The roll call was concluded.

Mr. JOHNSON. Transferring my pair as before, I vote "nay."

The result was announced—yeas 14, nays 38, as follows:

YEAS—14.

Brandegee	Kenyon	Page	Sutherland
Catron	Lippitt	Root	Warren
Clark, Wyo.	Lodge	Sherman	
Jones	Oliver	Smoot	

NAYS—38.

Ashurst	Kern	Saulsbury	Thomas
Bryan	Lane	Shafroth	Thompson
Chamberlain	Lee, Md.	Sheppard	Thornton
Chilton	Martin, Va.	Shields	Tillman
Fletcher	Martine, N. J.	Shively	Vardaman
Gore	Overman	Simmons	Walsh
Hollis	Pittman	Smith, Ariz.	White
Hughes	Pomerene	Smith, Ga.	Williams
James	Reed	Stone	
Johnson	Robinson	Swanson	

NOT VOTING—44.

Bankhead	Culberson	Lea, Tenn.	Perkins
Borah	Cummins	Lewis	Poindexter
Brady	Dillingham	McCumber	Ransdell
Bristow	du Pont	McLean	Smith, Md.
Burleigh	Fall	Myers	Smith, Mich.
Burton	Gallinger	Nelson	Smith, S. C.
Camden	Goff	Newlands	Stephenson
Clapp	Gronna	Norris	Sterling
Clarke, Ark.	Hardwick	O'Gorman	Townsend
Colt	Hitchcock	Owen	Weeks
Crawford	La Follette	Penrose	Works

So the Senate refused to adjourn.

Mr. SMOOT. Mr. President——

SEVERAL SENATORS. Regular order!

Mr. SMOOT. I move that the Senate take a recess until 11 o'clock to-morrow.

The PRESIDING OFFICER. The question is on the motion of the Senator from Utah.

Mr. SMOOT. Upon that I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on the motion of the Senator from Utah that the Senate now take a recess until 11 o'clock to-morrow, on which he asks for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). As previously stated, I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. As he is absent from the Chamber, I will withhold my vote.

Mr. JAMES (when his name was called). I make the same transfer as before and vote "nay."

Mr. SAULSBURY (when his name was called). I make the same transfer as before and vote "nay."

The roll call was concluded.

Mr. WALSH (after having voted in the negative). I observe that the Senator from Rhode Island [Mr. LIPPITT], with whom I am paired, has not voted; but it being obvious that there is doubt as to whether or not a quorum will be developed, I will let my vote stand.

Mr. GALLINGER (after having voted in the affirmative). When I voted I did not observe that the junior Senator from New York [Mr. O'GORMAN], with whom I have a general pair, was absent. I therefore withdraw my vote.

Mr. DILLINGHAM (after having voted in the affirmative). I withdraw my vote, as I see the senior Senator from Maryland [Mr. SMITH], with whom I am paired, is not present.

The result was announced—yeas 9, nays 39, as follows:

YEAS—9.

Catron	Kenyon	Oliver	Sherman
Clark, Wyo.	Lodge	Page	Smoot
Jones			

NAYS—39.

Ashurst	Kern	Root	Swanson
Bryan	Lane	Saulsbury	Thomas
Chamberlain	Lee, Md.	Shafroth	Thompson
Chilton	Martin, Va.	Sheppard	Thornton
Fletcher	Martine, N. J.	Shields	Tillman
Gore	Overman	Shively	Vardaman
Hollis	Pittman	Simmons	Walsh
Hughes	Pomerene	Smith, Ariz.	White
James	Reed	Smith, Ga.	Williams
Johnson	Robinson	Stone	

NOT VOTING—48.

Bankhead	Culberson	Lewis	Poindexter
Borah	Cummins	Lippitt	Ransdell
Brady	Dillingham	McCumber	Smith, Md.
Brandegee	du Pont	McLean	Smith, Mich.
Bristow	Fall	Myers	Smith, S. C.
Burleigh	Gallinger	Nelson	Stephenson
Burton	Goff	Newlands	Sterling
Camden	Gronna	Norris	Sutherland
Clapp	Hardwick	O'Gorman	Townsend
Clarke, Ark.	Hitchcock	Owen	Warren
Colt	La Follette	Penrose	Weeks
Crawford	Lea, Tenn.	Perkins	Works

The PRESIDING OFFICER. On the motion of the Senator from Utah [Mr. SMOOT] that the Senate take a recess until 11 o'clock to-morrow, the yeas are 9 and the nays are 39. The Chair counts the Senator from Rhode Island [Mr. LIPPITT], the Senator from New Hampshire [Mr. GALLINGER], and the Senator from Vermont [Mr. DILLINGHAM] as being upon the floor. A quorum is present, and the motion of the Senator from Utah is lost.

Mr. ROOT. Mr. President, I move——

Mr. GALLINGER. If the Senator from New York will allow me, I simply want to register my objection to the ruling of the Chair that a Senator who is paired can be counted. The ruling, however, of course, will stand, but I merely wish my protest to go into the RECORD.

Mr. ROOT. Mr. President, I move to reconsider the vote upon the motion which has just been voted upon—the motion to take a recess—and upon that I call for the yeas and nays.

The PRESIDING OFFICER. The question is on the motion of the Senator from New York that the Senate reconsider its vote on the motion to take a recess.

Mr. STONE. I make the point of order that the Senator from New York did not vote in the affirmative.

Mr. ROOT. I voted in the negative with the prevailing side.

The PRESIDING OFFICER. The Senator from New York voted in the negative.

Mr. STONE. Of course, as the Senator from New York says, that on the motion to take a recess at not later than 9 o'clock to-night until 11 o'clock to-morrow morning he voted for that motion, he can move to reconsider.

Mr. ROOT. No; that is not what I am moving to reconsider. I am moving to reconsider the decision of the Senate upon the motion of the Senator from Utah [Mr. SMOOT] that we now take a recess until 11 o'clock to-morrow morning. Upon the motion of the Senator from Utah I voted in accordance with the decision of the Senate, and I therefore have the right to move to reconsider.

The PRESIDING OFFICER. The Senator from New York moves to reconsider the vote by which the previous motion was carried.

Mr. ROOT. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. As he is absent from the Chamber, I withhold my vote.

Mr. GALLINGER (when his name was called). I announce my pair with the junior Senator from New York [Mr. O'GORMAN].

Mr. JAMES (when his name was called). Making the same transfer of my pair as heretofore, I vote "nay."

Mr. SAULSBURY (when his name was called). I transfer my pair as before and vote "nay."

Mr. WALSH (when his name was called). I have a general pair with the Senator from Rhode Island [Mr. LIPPITT]. That Senator having been lately called suddenly from the Chamber, I transfer my pair with him to the Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Illinois [Mr. LEWIS] and vote "nay."

The roll call was concluded.

Mr. SUTHERLAND. I have a pair with the Senator from Arkansas [Mr. CLARKE], who is absent. On that account I withhold my vote.

Mr. DILLINGHAM. I observe that the senior Senator from Maryland [Mr. SMITH] has not voted. I have a general pair with that Senator, and therefore withhold my vote.

Mr. CHILTON (after having voted in the negative). I omitted to state my pair and its transfer. I should like to have the RECORD show my pair and its transfer as heretofore, and I allow my vote to stand.

The result was announced—yeas 7, nays 39, as follows:

YEAS—7.

Clark, Wyo.	Lodge	Root	Smoot
Jones	Oliver	Sherman	

NAYS—39.

Ashurst	Kenyon	Robinson	Swanson
Bryan	Kern	Saulsbury	Thomas
Chamberlain	Lane	Shafroth	Thompson
Chilton	Lee, Md.	Sheppard	Thornton
Fletcher	Martin, Va.	Shields	Tillman
Gore	Martine, N. J.	Shively	Vardaman
Hollis	Overman	Simmons	Walsh
Hughes	Pittman	Smith, Ariz.	White
James	Pomerene	Smith, Ga.	Williams
Johnson	Reed	Stone	

NOT VOTING—50.

Bankhead	Culberson	Lippitt	Ransdell
Borah	Cummins	McCumber	Smith, Md.
Brady	Dillingham	McLean	Smith, Mich.
Brandegee	du Pont	Myers	Smith, S. C.
Bristow	Fall	Nelson	Stephenson
Burleigh	Gallinger	Newlands	Sterling
Burton	Goff	Norris	Sutherland
Camden	Gronna	O'Gorman	Townsend
Catron	Hardwick	Owen	Warren
Clapp	Hitchcock	Page	Weeks
Clarke, Ark.	La Follette	Penrose	Works
Colt	Lea, Tenn.	Perkins	
Crawford	Lewis	Poindexter	

The PRESIDING OFFICER. On the motion of the Senator from New York [Mr. ROOT] to reconsider the vote by which the Senate refused to take a recess, the yeas are 7 and the nays are 39. The Chair counts the Senator from Rhode Island [Mr. LIPPITT], the Senator from Connecticut [Mr. BRANDEGEE], the Senator from Vermont [Mr. DILLINGHAM], and the Senator from Utah [Mr. SUTHERLAND] present. A quorum is present, the nays have it, and the motion is rejected.

Mr. LIPPITT. Mr. President, I understand that during my temporary absence I was counted as being present on a previous vote. I should like to ask if that is correct.

The PRESIDING OFFICER. The Chair thinks that is so. The Chair saw the Senator come into the Chamber and walk out.

Mr. LIPPITT. I should like to ask——

Mr. JAMES. Regular order, Mr. President.

The PRESIDING OFFICER. The question is——

Mr. LIPPITT. Was my question answered?

The PRESIDING OFFICER. The Chair answered the Senator's question.

Mr. LIPPITT. I did not understand it. Excuse me; what was the answer?

The PRESIDING OFFICER. The Chair answered that he saw the Senator from Rhode Island [Mr. LIPPITT] come into the Chamber while the roll was being called, and he was, therefore, present.

Mr. LIPPITT. I do not think I was.

The PRESIDING OFFICER. But, without the Senator from Rhode Island, a quorum was present.

Mr. LIPPITT. It is not very important, but I do not think I was present during that time.

Mr. JAMES. Regular order!

Mr. LIPPITT. I went out to the telephone for a few minutes.

Mr. SMOOT. Mr. President, I move that the Senate proceed to the consideration of House bill 13044, an act to pension widows and minor and helpless children of officers and enlisted men who served during the War with Spain or the Philippine Insurrection or in China between April 21, 1898, and July 4, 1902, and upon that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. SMOOT. Let the bill be read.

The PRESIDING OFFICER. The Secretary will call the roll.

Mr. GALLINGER. Let the bill be read for the information of the Senate.

Mr. JAMES. Whenever we take it up we will have it read.

The PRESIDING OFFICER. The question is upon taking up the bill. The Secretary will call the roll.

The Secretary proceeded to call the roll, and Mr. ASHURST responded in the negative.

Mr. CLARK of Wyoming. Mr. President, a point of order.

Mr. JAMES. Regular order, Mr. President.

The PRESIDING OFFICER. The Chair recognized the Senator from Wyoming before the roll call began.

Mr. CLARK of Wyoming. I wish to make a parliamentary inquiry, and that is as to whether or not this motion is debatable.

The PRESIDING OFFICER. It is debatable.

Mr. CLARK of Wyoming. Mr. President, I ask for the reading of the bill.

Mr. JAMES. Mr. President, I make the point of order that the Senator from Arizona [Mr. ASHURST] had answered to his name, and therefore nothing is in order but the roll call.

The PRESIDING OFFICER. The Chair recognized the Senator from Wyoming before the roll call started.

Mr. CLARK of Wyoming. I was on my feet.

Mr. BRYAN. I make the point of order that upon a motion to proceed to the consideration of a bill, it is not in order to ask for the reading of the bill.

The PRESIDING OFFICER. The Secretary will call the roll.

Mr. CLARK of Wyoming. Mr. President, I desire to be heard upon that matter. I should like the Secretary——

Mr. JAMES. The Chair directed the Secretary to call the roll.

The PRESIDING OFFICER. The Chair will hear the Senator from Wyoming.

Mr. JAMES. The Secretary had begun to call the roll.

Mr. CLARK of Wyoming. The Secretary attempted to call it.

Mr. JAMES. No; the Secretary did call it.

The PRESIDING OFFICER. The Senator from Wyoming will proceed.

Mr. CLARK of Wyoming. Mr. President, I ask that the bill be read, in my time, on the debate.

The PRESIDING OFFICER. The Chair has ordered a roll call. The Secretary will call the roll.

Mr. CLARK of Wyoming. Mr. President, does the Chair rule that we are not entitled to have the bill read?

The PRESIDING OFFICER. The Chair rules that when the bill is taken up the Senator can ask to have it read.

Mr. CLARK of Wyoming. But I ask to have it read now, and ask for a ruling of the Chair on my right to have it read.

The PRESIDING OFFICER. The Chair rules that the Senator will not have that right unless the Senate decides otherwise.

Mr. CLARK of Wyoming. Then I most respectfully appeal from the ruling of the Chair, and on that appeal I ask for the yeas and nays.

The PRESIDING OFFICER. The Senator from Wyoming appeals from the ruling of the Chair.

Mr. SMITH of Georgia. What is the question, Mr. President?

The PRESIDING OFFICER. The Senator from Utah moved to take up a certain bill on the calendar. The Chair had ordered a roll call when the Senator from Wyoming rose and demanded a reading of the bill upon which the Chair had ordered the roll call. The Chair ruled that the roll call having been ordered, the bill could not be read unless the Senate set aside that decision of the presiding officer.

Mr. SMOOT. That is, on the ground that the Chair had ordered a roll call.

The PRESIDING OFFICER. The question is, Shall the ruling of the Chair stand as the judgment of the Senate?

Mr. GALLINGER. Let the roll be called.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). Making the same announcement as before as to my pair and its transfer, I vote "yea."

Mr. DILLINGHAM (when his name was called). I withhold my vote on account of my pair with the senior Senator from Maryland [Mr. SMITH], who is absent.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. He is absent from the Chamber, and I therefore withhold my vote.

Mr. GALLINGER (when his name was called). I again announce my pair with the junior Senator from New York [Mr. O'GORMAN] and withhold my vote.

Mr. JAMES (when his name was called). Making the same transfer as heretofore, I vote "yea."

Mr. JOHNSON (when his name was called). Announcing the same transfer as before, I vote "yea."

Mr. SAULSBURY (when his name was called). I make the same transfer as before and vote "yea."

Mr. SUTHERLAND (when his name was called). I announce my pair with the senior Senator from Arkansas [Mr. CLARKE]. On account of his absence I withhold my vote.

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the senior Senator from Indiana [Mr. SHIVELY] and will vote. I vote "yea."

The roll call having been concluded, it resulted—yeas 38, nays 10, as follows:

YEAS—38.

Ashurst	Kenyon	Reed	Swanson
Bryan	Kern	Robinson	Thomas
Chamberlain	Lane	Saulsbury	Thompson
Chilton	Lee, Md.	Shafroth	Thornton
Fletcher	Martin, Va.	Sheppard	Vardaman
Gore	Martine, N. J.	Shields	Walsh
Hollis	Oliver	Simmons	White
Hughes	Page	Smith, Ariz.	Williams
James	Pittman	Smith, Ga.	
Johnson	Pomerene	Stone	

NAYS—10.

Catron	La Follette	Root	Warren
Clark, Wyo.	Lippitt	Sherman	
Jones	Lodge	Smoot	

NOT VOTING—48.

Bankhead	Culberson	McCumber	Ransdell
Borah	Cummins	McLean	Shively
Brady	Dillingham	Myers	Smith, Md.
Brandegee	du Pont	Nelson	Smith, Mich.
Bristow	Fall	Newlands	Smith, S. C.
Burleigh	Gallinger	Norris	Stephenson
Burton	Goff	O'Gorman	Sterling
Camden	Gronna	Overman	Sutherland
Clapp	Hardwick	Owen	Tillman
Clarke, Ark.	Hitchcock	Penrose	Townsend
Colt	Lea, Tenn.	Perkins	Weeks
Crawford	Lewis	Poindexter	Works

The PRESIDING OFFICER. The Secretary reports that 38 Senators have voted in the affirmative and 10 in the negative. Counting the Senator from Vermont [Mr. DILLINGHAM], a quorum is present. The Chair is sustained.

Mr. CLARK of Wyoming. Mr. President, in supporting the motion of the Senator from Utah to take up Order of Business No. 484, I am moved to say a few words, because I believe we are wasting our time here this evening.

SEVERAL SENATORS. There is no doubt about that.

Mr. CLARK of Wyoming. And we have been doing so since 6 o'clock. Between now and 9 o'clock, without wasting time, we can take up and pass this pension bill.

Mr. JAMES. Who caused the wasting of time? The Senator's side.

Mr. CLARK of Wyoming. Mr. President, I do not yield.

The PRESIDING OFFICER. The Senator from Wyoming is entitled to the floor.

Mr. CLARK of Wyoming. We have before us a bill that provides for pensioning the widows of soldiers and sailors in the War with Spain. We can pass it between now and 9 o'clock. To show exactly what the bill is, so that the Senate will understand it, I wish to read a few lines from it. It is a bill introduced April 6, 1914, now nearly a year ago.

Mr. BRYAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Florida?

Mr. CLARK of Wyoming. I yield for a question.

Mr. BRYAN. The Senator is anxious to save time——

Mr. CLARK of Wyoming. Mr. President, I can only yield for a question. I am afraid of losing the floor, and I want to explain my views upon this matter.

Mr. FLETCHER. Mr. President, I rise to a point of order. The bill has not been taken up, and is not before the Senate.

Mr. GALLINGER. No; but the matter is debatable.

Mr. FLETCHER. Upon the motion to take it up a roll call was ordered, and the first Senator's name was called, and he answered.

Mr. CLARK of Wyoming. That is all ancient history.

Mr. FLETCHER. So that the bill is not before the Senate.

Mr. JAMES. Mr. President, I should like to ask the Senator a question.

Mr. CLARK of Wyoming. I decline to yield.

Mr. JAMES. I should be glad to ask the Senator a question.

Mr. CLARK of Wyoming. I decline to yield, Mr. President.

The PRESIDING OFFICER. The Senator from Wyoming declines to yield.

Mr. FLETCHER. I ask for a ruling on the point of order.

The PRESIDING OFFICER. Does the Senator yield?

Mr. CLARK of Wyoming. No, Mr. President; the time is limited, and I think I had better go on with the statement.

Mr. FLETCHER. Does the Chair overrule the point of order?

The PRESIDING OFFICER. The Senator from Florida will state his point of order.

Mr. FLETCHER. My point of order is that the bill has not been taken up, and that on the motion to take up the bill a roll call was asked for and ordered and the first Senator's name was called and he answered. That is the status of the matter, so that to discuss the bill now is clearly out of order.

The PRESIDING OFFICER. The Chair thinks discussion of the motion is in order.

Mr. CLARK of Wyoming. Mr. President, what I was intending to do was to discuss the question of taking up this bill. I was endeavoring, in my feeble way, to explain some of the reasons why I thought that during this time, when we are evidently accomplishing nothing, we might devote our time to some useful purpose.

This bill is House bill 13044. It has passed the House of Representatives and needs only the action of the Senate and the signature of the President to enact it into law. It was introduced, as I say, in the Senate of the United States——

Mr. ASHURST. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Arizona?

Mr. ASHURST. No; I do not ask the Senator to yield. I rise to a point of order. Inasmuch as the first name on the roll has been mentioned a time or two, it is obviously my duty to say a word.

The Chair, with his usual clearness, stated the question, and my name was called before a single Senator arose or addressed the Chair, and I voted in a loud voice. I therefore say the point of order is well taken, because I made a response, and when I responded no Senator was on his feet to address the Chair. It becomes, therefore, my duty to make this point of order, so that the rules of the Senate shall not be so obviously transgressed and to the end that debate shall not intervene after I have made a response to my name.

I protest against the rule being disregarded by the Chair or by the Senate. When I made a response no Senator was on his feet, and this debate is obviously a violation of the rule.

Mr. CLARK of Wyoming. Mr. President, as I was stating when I was interrupted——

Mr. ASHURST. I do not propose to be isolated in that way.

The PRESIDING OFFICER. The Chair will state to the Senator that at the time the Senator answered to his name the Chair had recognized the Senator from Wyoming.

Mr. REED. Mr. President, has the Chair ruled on the point of order?

The PRESIDING OFFICER. The point of order made by the Senator from Florida?

Mr. REED. Yes.

The PRESIDING OFFICER. The Chair has ruled that this question is subject to debate. The Senator from Wyoming will proceed.

Mr. REED. Mr. President, I appeal from the decision of the Chair.

Mr. GALLINGER. On that I ask for the yeas and nays.

The PRESIDING OFFICER. The hour of 9 o'clock having arrived, the Senate will take a recess until 11 o'clock to-morrow morning.

Thereupon (at 9 o'clock p. m., Wednesday, January 27, 1915), pursuant to the order previously made, the Senate took a recess until to-morrow, Thursday, January 28, 1915, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *January 27, 1915.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Infinite and eternal Spirit, whose unchanging love ministers unto our needs day by day, though we are often fickle and false Thou art ever constant and true, punishing the evil that is in us, rewarding the good; upholding the right, condemning the wrong; and though we may deceive ourselves and others, Thou art never deceived, for Thy judgments are true and righteous altogether. Continue thus we beseech Thee to minister unto us that we may grow as individuals and as a Nation toward the ideals. In Christ Jesus our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

PENNSYLVANIA ARBITRATION AND PEACE SOCIETY.

Mr. BUTLER. Mr. Speaker, I ask permission of the House to print in the RECORD some views of the Pennsylvania Arbitration and Peace Society upon our international relations and policy.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD by

printing certain resolutions of the Pennsylvania Arbitration and Peace Society. Is there objection?

Mr. BUTLER. Mr. Speaker, these resolutions were sent to me by three eminent Pennsylvanians who advocate peace at all times, Mr. Thomas Raeburn White, Mr. J. Henry Scattergood, and Mr. Stanley R. Yarnall.

The SPEAKER. Is there objection?

There was no objection.

The document referred to is as follows:

The Pennsylvania Arbitration and Peace Society holds the following views on the present international relations and policy of the United States of America:

1. The neutrality of our country in the present European war should be strictly maintained, and our Government should take no action that may arouse the suspicion or antagonism of any of the powers now at war; for this reason we regard as peculiarly untimely any proposal at this time to greatly increase the Army and Navy of the United States.

2. Our Government should be in a position, at the earliest opportune moment, to exert its good offices to effect a lasting peace among the nations at war, on grounds of equal justice, humanity, and international good will. A policy of expansion in the Army and Navy would lessen the influence of the United States as an impartial mediator.

3. The only possible justification for an increased Army and Navy in the United States would be for national defense, since no one suggests using the military or naval strength of our country for aggressive warfare. The following considerations lead us to believe there is no present danger of attack from other countries which would justify a policy of increased armaments:

(a) The geographical position of the United States.

(b) The financial and commercial relations between the United States and all the great powers which have double force at this period of fearful damage and loss in trade and resources.

(c) The fact that racial differences and distinctions, which are a cause of prejudice, antagonism, and hatred among European countries, become in the United States bonds of sympathy and interest that unite our citizens with the European countries from which they or their fathers emigrated.

(d) The fact that the countries at war are draining their resources in men, treasure, industry, and commerce at a pace that, if long continued, must result in exhaustion or bankruptcy. From this condition they can not recover for generations, and would be wholly unable to undertake an aggressive campaign against a nation of the situation and power of the United States.

4. A marked increase in the standing Army and Navy of the United States might be misunderstood by the powers of South America, with which our people should live in close bonds of friendship. Such a policy might revive distrust of the United States, now happily subsiding, and would doubtless be imitated, and thus in America would be encouraged the European military system which has brought the vast sorrow and loss for which Europe has been preparing.

5. The present state of Europe proves that preparation for war is the surest provocative of war. Armies and navies on a huge scale are created to fight, and in times of crisis they are like loaded weapons in the hands of angry men. The United States is committed to the policy of arbitration of international differences. Our Government has recently signed peace treaties with many nations of the earth. An increase in armament upon a comprehensive scale is a direct impeachment of our national good faith and a backward step in world federation.

6. Peace has characterized the national genius and development of the United States. Our greatest achievements in diplomacy and our most illustrious acts as a nation, our national prosperity, and the general education and culture of our people have been effected by peaceful means and rest upon the continuance of peace. The true greatness of the United States in international relations does not depend upon a great standing army or a growing navy, but rests upon our national honor, which demands even-handed justice toward all the world.

Since we hold these views: Therefore be it

Resolved, That we regard the present agitation for a general increase of the armed strength of the United States as unnecessary, untimely, illogical, and opposed to true patriotism.

That we are in full accord with the international policy of the President, as expressed in his message to Congress on December 8, 1914, and urge all true citizens to uphold and strengthen his hands at this time of grave national responsibility, so as to further a policy of peace, justice, conciliation, and good will as the truest safeguard of our national greatness, which will rest in the future, as it has rested in the past, upon a basis of moral strength rather than upon military and naval force.

Issued by the Pennsylvania Arbitration and Peace Society, 1000 Bally Building, Philadelphia, December 30, 1914.

SPEECH OF HON. PERRY BELMONT.

Mr. MURRAY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech delivered by a former prominent Member of this House, Hon. Perry Belmont, on personal government.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to extend his remarks by printing in the CONGRESSIONAL RECORD a speech by Hon. Perry Belmont on the subject of personal government. Is there objection?

Mr. BARNHART. Mr. Speaker, I object.

INDUSTRIAL ALCOHOL COMMISSION.

Mr. CASEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a copy of a short resolution adopted by the American Federation of Labor on the bill (H. R. 17855) introduced by me to create an industrial alcohol commission.

The SPEAKER. The gentleman from Pennsylvania [Mr. CASEY] asks unanimous consent to extend his remarks by printing certain resolutions in the RECORD. Is there objection?

There was no objection.

The resolutions are as follows:

Resolution No. 39, by Delegate Andrew Furuseth, of the International Seamen's Union of America.

Whereas, on behalf of the organized farmers, Congressman CASEY, of Pennsylvania, has introduced a bill in Congress (H. R. 17855) providing for the establishment of an industrial alcohol commission and an appropriation to demonstrate the practical value of farm denatured alcohol distilling and guide the development of the industry in its early stages; and

Whereas the development of farm denatured alcohol distilling, if as effective as its advocates claim and as scientific investigation and the experience of European countries would indicate, would curtail if not destroy the monopoly of the liquid fuel supply by the Oil Trust, of the meat supply by the packers, and of alcohol as a solvent in many industries by the industrial alcohol and wood alcohol trusts; and

Whereas the evidence submitted to Congress is conclusive that fully 1,000 supposed employees of the Agricultural Department are paid from the Rockefeller educational fund of the Rockefeller Foundation; and

Whereas the Rockefeller Foundation, with its various educational funds, is evidently the means by which the entire educational system of the Nation, including the educational and demonstration work of the States and Federal Government, might be dominated by the Rockefeller interests; and

Whereas the John D. Rockefeller endowment of the Rockefeller Foundation, the interest on which supplies the various Rockefeller educational funds, is invested in the stocks and bonds of corporations, notably those controlled by the Rockefeller interests, conspicuous among which is the Colorado Industrial Co.: Therefore, be it

Resolved, That the American Federation of Labor, in annual session assembled, indorses the Casey bill, H. R. 17855, or legislation of similar import, acceptable to the organized farmers supporting the Casey bill, for the establishment of an industrial alcohol commission and an appropriation by Congress to demonstrate conclusively the practicability of farm alcohol distilling. Therefore, be it

Further resolved, That all organization affiliated with the American Federation of Labor be, and hereby are, urged to assist in making these resolutions effective.

CALENDAR WEDNESDAY.

The SPEAKER. This is Calendar Wednesday. The Clerk will call the committees.

The Committee on Interstate and Foreign Commerce was called.

PUBLIC HEALTH SERVICE.

Mr. ADAMSON. By authority of the Committee on Interstate and Foreign Commerce, I call up the bill (S. 2616) to promote the efficiency of the Public Health Service. Before going into Committee of the Whole I would be glad to ask the other side as to the possibility of limiting general debate.

Mr. STEVENS of Minnesota. Mr. Speaker, I think the gentleman from Illinois [Mr. MANN] desires some time, and others on this side desire time. I ask for half an hour outside of what the gentleman from Illinois [Mr. MANN] wants.

Mr. ADAMSON. How much time does the gentleman from Illinois want?

Mr. MANN. I can not tell. I do not think there will be any unnecessary delay in the committee on the bill.

Mr. ADAMSON. I am perfectly willing that the gentleman shall have all the time he wants. I know he would treat me in the same way. Will an hour on a side be sufficient?

Mr. MANN. I will take an hour, and take chances.

Mr. ADAMSON. Will an hour on that side be enough?

Mr. STEVENS of Minnesota. I desire 30 minutes, on account of requests which have been made of me, outside of what the gentleman from Illinois [Mr. MANN] desires.

Mr. ADAMSON. Does the gentleman from Illinois desire an hour?

Mr. MANN. I may not use it, but I wish that much time if I need it.

Mr. ADAMSON. Suppose I ask for an agreement for two hours and a half, the time to be equally divided?

Mr. MANN. I do not care how much time the rest of them take.

Mr. ADAMSON. I ask unanimous consent that the general debate end in two hours and one-half, the time to be equally divided between the gentleman from Minnesota [Mr. STEVENS] and myself.

Mr. STEVENS of Minnesota. That will not give us time enough.

Mr. ADAMSON. I think together we can accommodate the gentleman from Illinois.

Mr. STEVENS of Minnesota. If you will agree to yield 15 minutes of that time to us, it will be satisfactory.

Mr. ADAMSON. I believe that together we can accommodate him.

Mr. MANN. If the gentleman wants to fix the time now, why not fix it now?

Mr. STEVENS of Minnesota. If the gentleman will agree to yield to us 15 minutes, that will be satisfactory.

Mr. ADAMSON. I do not think there will be any trouble about it.

Mr. STEVENS of Minnesota. We want that understanding, so that there shall be no doubt that that request will be complied with.

Mr. ADAMSON. I will knock myself out of an opportunity for a speech rather than disappoint the gentleman.

Mr. MANN. We want the gentleman to make a speech to explain the bill.

The SPEAKER. Has the gentleman any request to make?

Mr. ADAMSON. Two hours and a half.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the general debate on this bill be limited to two hours and a half, half the time to be controlled by himself and half the time by the gentleman from Minnesota.

Mr. STEVENS of Minnesota. I must object, unless we are sure of an hour and a half. We may not use it, but the requests which have been made of me require that time.

Mr. ADAMSON. If three-quarters of an hour are not sufficient for the gentleman from Illinois, I will see that he gets the other 15 minutes.

Mr. MANN. I expect to yield some time. I suppose I will be the only one who will represent any time in opposition to the bill.

Mr. ADAMSON. If the gentleman wants an hour in addition to the other half hour, I will see that he gets it.

The SPEAKER. Is there objection?

Mr. DIES. Mr. Speaker, reserving the right to object, I should like to know if I can get a little time on this matter.

Mr. ADAMSON. How much time does the gentleman want?

Mr. DIES. About 15 minutes.

Mr. ADAMSON. Mr. Speaker, I will modify the request and make it three hours.

The SPEAKER. The gentleman from Georgia asks that the general debate be limited to three hours—an hour and a half to be controlled by himself and an hour and a half by the gentleman from Minnesota [Mr. STEVENS]. Is there objection?

There was no objection.

The SPEAKER. The House automatically resolves itself into the Committee of the Whole House on the state of the Union, with the gentleman from Indiana [Mr. BARNHART] in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill (S. 2616) to promote the efficiency of the Public Health Service, which will be reported by the Clerk.

The Clerk began the reading of the bill.

Mr. ADAMSON. Mr Chairman, I ask unanimous consent to dispense with the first reading of the bill.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. ADAMSON. Mr. Chairman, the Public Health Service has been a gradual growth. It has been the pride of Congress, it has been the pride of our committee, and I believe the pride of the country. Its operations have been giving great satisfaction in a great many respects and in a great many localities in cases of epidemic of various dread diseases in different localities, its attention to the marine hospitals, in attention to various persons engaged in public service, and its preventive work in looking out for health conditions throughout the United States.

Of course it costs money. It will be nothing new, nor will it be objectionable if we hear gentlemen talking about the necessity for economy and deprecating expenses. But a man can not raise a family without some expense. When he takes a wife it involves an additional expense, but it is generally worth the money. [Laughter.] When he begins to have children appear it is expensive, but it will not do to cut off food and clothing on the ground that it costs money. It is expected that the future usefulness will be worth the expenditure. It is very often wise to spend money in reasonable sums at the right time and for a proper and wise purpose. Saving at the spigot often turns the bung loose and wastes the contents of the barrel, and failing to apply one board when the old one is loose may enlarge the rent and lead to a roofless house if neglected too long.

I sympathize thoroughly with the desire for economy, and I am perfectly willing to put the knife to all authorizations reported by our committee, but, Mr. Chairman, the institutions under the charge and jurisdiction of our committee do not carry very large expense. A large curtailment of these authorizations will hurt, whereas the small curtailments of large authorizations hurt less and amount to more in the long run.

Other great committees, providing for other institutions of the Government, make appropriations by the hundreds of millions, and I believe they are mostly wise. I do not share in the cry and execration about reckless waste. I know how it is with different men of different judgments and having different ideas of many things. I am making these general remarks to prepare the House for my suggestion that the few institutions over which our committee has jurisdiction are necessary and useful to the Government and to the people, and that the amounts necessary to conduct them successfully are very small.

This bill will involve an increase of only about $46,000. The present expense of the establishment of the Public Health Service is less than $2,000,000—something over $1,800,000—with all its works, with all its conditions, with all its ramifications, and with all its good results. To increase that by the provisions in the present bill is a small matter compared with its great usefulness.

Two years ago a bill which had been agreed upon in a previous committee became a law while the gentleman from Illinois was chairman of the committee, and at that time passed the House but failed to pass the Senate. That bill fixed the salaries of the officers of the Public Health Service, increasing them and making a larger increase, perhaps, than this bill does.

Mr. MANN. Will the gentleman yield?

Mr. ADAMSON. Yes.

Mr. MANN. That was not agreed upon when I was chairman.

Mr. ADAMSON. I remember that the bill that passed two years ago was agreed on in the committee and passed the House.

Mr. MANN. The gentleman is mistaken. The bill that was agreed upon and passed the House, that was reported to the House and afterwards became a law, was while the gentleman from Georgia was chairman of the committee, and that was a bill extending the scope and authority of the Public Health Service. No bill passed increasing salaries while I was chairman, or was favorably considered.

Mr. ADAMSON. If the gentleman will refresh his memory he will find that the bill I called up was a Senate bill embracing a considerable amount of the old committee bill, and I smoothed the way for success through the House by agreeing with the gentleman from Illinois to eliminate all except what was in the old bill.

Mr. MANN. The gentleman is mistaken about it being an old bill. It is true in the last Congress we passed the Senate bill which did increase somewhat the salaries of the officers of the Public Health Service, striking out the provisions that are in this bill. I understood at the time that that settled the proposition, but as soon as they got a part, they commenced to back down from their understanding and insisted upon more.

Mr. ADAMSON. Be that as it may, Mr. Chairman, as to the recollection of its being an old bill, the gentleman from Illinois concedes that in the last Congress we passed a bill fixing the salary. It is true that the gentleman from Illinois objected to the first section of this bill at that time, but there was no contract governing future bills. I do not think that was in the recollection of either one of us.

The gentleman from Illinois objected to it at that time, and desirous to get through as well as I could by the process of elimination, I simply left out what he objected to in order to secure unanimous consent to pass the bill.

Mr. CARLIN. Will the gentleman yield?

Mr. ADAMSON. Yes.

Mr. CARLIN. This brings the service up to an equality with other services?

Mr. ADAMSON. I have not got to that yet. Having fixed the salaries of the officers to their satisfaction, placing them to that extent on a parity with the other services of the Government which competed for their services by offering better terms, we now desire to secure entire parity by providing quarters and baggage arrangements. In the other service these corresponding officers are furnished with what is known as commutation of quarters; when they are stationed at a place where there are no quarters they have to pay rent, fuel, and lights.

The other services pay these corresponding officers money sufficient to make up the necessary rent, quarters, light, and fuel. The purpose of this first section is to supply that deficiency and put them substantially on a parity with officers of like rank in the other services. In the first section, however, a baggage arrangement is made in the same degree. The second paragraph reads as follows:

SEC. 2. That the term of office of the Surgeon General shall be for a period of four years, at the expiration of which term he shall, unless reappointed, be carried as an extra officer in the grade of senior surgeon.

At the present time if the Surgeon General goes out of office without dying he gets to the jumping-off place, anyhow. He is at the top of the rock, and there is no other provision for him, no other place for him to work. He goes out of business; he

is without a job, rank, or anything else. The purpose of the present provision is to utilize him in the service, and he simply goes back to the rank of senior surgeon. He is carried as an extra officer with a grade of senior surgeon where his services can be utilized, which is right. After having supported him and utilized him in a way, practically educated him, the public is entitled to the benefit of his services as long as he is able to render them. The bill goes on to say:

Assistant surgeons shall be promoted to the grade of passed assistant surgeon in the order of seniority at the expiration of three years' commissioned service and after satisfactory examination.

I suppose there will be no objection to that at all.

Section 3 provides:

SEC. 3. That the chiefs of the Divisions of Zoology, Pharmacology, and Chemistry in the Hygienic Laboratory may, upon the recommendation of the Surgeon General of the Public Health Service, be appointed by the Secretary of the Treasury as officers of the Public Health Service, and they shall be entitled to leaves of absence as now provided by law for the commissioned medical officers of the Public Health Service: *Provided*, That the Secretary of the Treasury may appoint five aditional officers in the Public Health Service, who shall be entitled to the same leaves of absence, and each shall receive a salary of $4,000 per annum: *Provided further*, That said additional officers shall not be appointed until after satisfactory examination, to be conducted under the direction of the Surgeon General of the Public Health Service, to determine their fitness for special work in sanitary engineering, epidemiology, pathology, bacteriology, housing, or other matters that relate to the propagation and spread of diseases of man.

In the bill two years ago we provided for this work to be done in the investigation of diseases, the very work mentioned in this section, and it is absolutely necessary to have men to do the work, and this section provides for their procurement and selection.

Mr. BORLAND. Mr. Speaker, will the gentleman yield?

Mr. ADAMSON. I will.

Mr. BORLAND. These men who are proposed to be appointed are not commissioned officers of the Army?

Mr. ADAMSON. Not of the Army. They will be regular officers of the Health Service.

Mr. BORLAND. They will be regular officers of the Health Service, but now they are in another branch of the civil service?

Mr. ADAMSON. Yes, sir.

Mr. BORLAND. In the first section of this bill you provide the commissioned officers, medical officers in the Public Health Service, have certain commutation for quarters and certain allowances for baggage. By the terms of the bill, as I take it, that privilege extends only to commissioned officers.

Mr. ADAMSON. Well, I understand that all these are commissioned officers; that is my understanding, but these are not likely to be sent around to the places where they have to have these experts.

Mr. BORLAND. The question I want to get at is this: Are there some men in this service under this bill who will receive commutation of quarters and some who will not have it—men with practically the same general line of duties?

Mr. ADAMSON. Well, I suppose those whose duties are purely clerical will not have them, but these officers will have them.

Mr. BORLAND. All commissioned officers?

Mr. ADAMSON. Yes, sir.

Mr. BORLAND. That means men who are already in the Army and Navy service.

Mr. ADAMSON. I will read the list of officers: Surgeon General, Assistant Surgeon General, senior surgeon, surgeon, passed assistant surgeon, assistant surgeon, and these professors——

Mr. BORLAND. They will all have commutation of quarters, but these men who are Chiefs of Bureaus of Zoology, Pharmacology, and Chemistry will not have commutation of quarters. Now, will not there be immediate pressure on the part of somebody somewhere to see that these new men get the same privilege that the old men get? Will not there be a great deal said in their favor, and will not we be up against giving it to all the other branches of the service as well as the Public Health Service?

Mr. ADAMSON. I understand these men are to get it like the others, which makes this bill $46,000 or $50,000.

Mr. BORLAND. The net result will be——

Mr. ADAMSON. In section 3 there is a proviso:

Provided, That the Secretary of the Treasury may appoint five additional officers in the Public Health Service, who shall be entitled to the same leaves of absence, and each shall receive a salary of $4,000 per annum.

Mr. BORLAND. I am not speaking of those mentioned there but those mentioned at the beginning of section 3, who are designated as Chiefs of the Divisions of Zoology, Pharmacology, and Chemistry in the Hygienic Laboratory. Now, I asked the preliminary question: These men are not commissioned officers in the Army and Navy at present, are they?

Mr. ADAMSON. Not in the Army and Navy; no.

Mr. BORLAND. Therefore under no law will they be entitled to commutation of quarters. If they go to the Public Health Service, will not they immediately ask to be put on a level with the other officers in the Public Health Service and ask for a commutation of quarters?

Mr. ADAMSON. Well, I will express my opinion to the gentleman. I think when they become officers of the Public Health Service they are treated like other officers are. That is my understanding.

Mr. BORLAND. So they will get commutation of quarters?

Mr. ADAMSON. That is my understanding.

Mr. BORLAND. Then we are extending commutation of quarters to men who are not in the Army or Navy, but who are transferred by some form of detail to the same form of work.

Mr. ADAMSON. We are not dealing with the Army or the Navy at all, Mr. Chairman. We are dealing with another branch of the public service, the officers of which are desirable in other services and who are tempted to quit our service in consequence of superior inducements to go elsewhere. We are merely trying to hold out inducements to these good men to stay in our service.

Mr. BORLAND. I assume that is true; but I have heard that same argument made about every other department of the Government. I have heard it made about the Reclamation Service, and I have heard it made about the Department of Agriculture and its various bureaus, that we had experts there that were underpaid and were not being liberally treated, and that if we did not treat them better they would go elsewhere. That is probably true of all these branches of the public service. But here is a proposition to pay a certain set of men in the Government service commutation of quarters as though they were Army or Navy officers. We are extending a principle that has heretofore been applied only to the Army and the Navy, who are supposed to be supported body and soul by the Nation, to men who are supposed to be paying their own house rent, like Congressmen and Senators. Now we are getting into a different system altogether.

Mr. ADAMSON. I like to hear my colleague talk, but on this occasion he is talking in my time.

Mr. BORLAND. I will get the gentleman more time.

Mr. ADAMSON. I had not finished answering the gentleman's question. The gentleman asked me a question and I started to answer it, and right in the middle of a sentence the gentleman interjected a speech. It was no doubt a good one, but I wanted to finish the sentence.

Mr. BORLAND. I do not want to trespass on the gentleman's courtesy.

Mr. ADAMSON. The balance of the sentence I intended to utter is this, that, recognizing the pressing necessity of providing for these officers, it is not wise to be deterred from doing our duty by the apprehension, speculative, groundless, or otherwise, that somebody outside, seeing their success, might desire the same thing. That would not be good policy or statesmanship. We recognize that this ought to be done for these people at this time. No doubt as long as human nature exists human desires will be stimulated by anything good seen in the possession of others; but that ought not to deter us from enacting this wise legislation. We are providing for the necessary officers to carry on this service, and providing quarters for them commensurate with those accorded to similar officers in other services.

Mr. BORLAND. Will the gentleman agree to yield to me later on in the proceedings?

Mr. ADAMSON. I will if I can. How much time have I used, Mr. Chairman?

The CHAIRMAN. The gentleman has used 10 minutes.

Mr. ADAMSON. I reserve the balance of my time. Will the gentleman from Minnesota [Mr. STEVENS] use some of his time?

Mr. STEVENS of Minnesota. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. ESCH].

The CHAIRMAN. The gentleman from Wisconsin [Mr. ESCH] is recognized for 10 minutes.

Mr. ESCH. Mr. Chairman, the Marine-Hospital Service began with the beginning of the Government in 1789. Up to 1811 this service in the hospitals along the coast took care of disabled seamen belonging to the Navy, so that in its origin this service was closely identified with the naval service. In 1871 Congress reorganized the service and gave it added duties and changed its personnel. Its work was placed under a supervising surgeon general. Admission to the service was through examination. Promotions were provided through examinations. As the result of that legislation the service very largely improved and its duties correspondingly increased.

In 1889 it was provided by an act of Congress that officers meeting the requirements of the service were to be appointed by

the President, by and with the advice and consent of the Senate, thus making the appointees in this service the same as appointees in the Army and naval service. From 1897 to 1908 the pay and allowances of officers were the same as those of the corresponding grades in the Army and the Navy.

It will thus be seen that during those years these three services—the Marine-Hospital Service, the Army, and the Navy—were assimilated. In 1908, however, Congress passed a law granting substantial increases in pay and allowances to the officers in the Army and Navy, and in the Revenue-Cutter Service later, but failed to do the same thing for the Public Health and Marine-Hospital Service, as it was then designated.

In 1912 Congress sought, in part at least, to restore the equilibrium of these various services, raising the pay to the same basis as that in the Army and Navy and in the Revenue-Cutter Service, but it failed to pass any provision as to allowances for living quarters.

This bill seeks to remedy the omission in the act of 1908, and thus restores the equilibrium that had been maintained between these three services for many years. The act of August 14, 1912, changed the name of the Public Health and Marine-Hospital Service to the Public Health Service and granted certain increases of pay to the officers, raising the pay of the Surgeon General from $5,000, as fixed in the act of 1902, to $6,000, as it is now; but there was no commutation of quarters allowed the Surgeon General under that act. Under the act of 1912 certain increased duties were assigned to the Public Health Service, and the language of that act is as follows:

> The Public Health Service may study and investigate the diseases of man and conditions influencing the progagation and spread thereof, including sanitation and sewage and the pollution, either directly or indirectly, of the navigable streams and lakes of the United States, and it may from time to time issue information in the form of publications for the use of the public.

That, as you can readily understand, devolved large additional duties upon the Public Health Service, and it is because of that that the last provision of this bill has been introduced, namely, authorizing the appointment of five professors or experts that have peculiar knowledge on the subjects of sanitary engineering, epidemiology, pathology, bacteriology, housing, and other matters that relate to the propagation and spread of diseases of man and to the public health.

These five professors will cost an additional $20,000, so that almost one-half of the amount called for by this bill is due to the act of 1912, calling upon the Public Health Service to investigate the diseases of man and the propagation and cure of disease.

That leaves, then, about $26,000 to be accounted for by the other provisions of the bill. The first provision is making commutation of quarters at the rate of $12 per room per month, which is the allowance now made to the Army and the Navy, and, in addition, giving the Secretary of the Treasury power to make reasonable commutation for fuel and lights.

In this Public Health Service many of the officials are not here in Washington. The field men are in the field, where no quarters are or can be provided. They are sent to seats of contagion, wherever these may be. They are sent to foreign fields. We have four or six of them now operating in foreign ports. We have four of them assigned to the Revenue-Cutter Service. They are therefore away from headquarters, and it is no more than right that these men under these peculiar conditions, and oftentimes in places of very great danger, should be permitted to have commutation of quarters which is now allowed to Army and Navy officers when away from quarters, and who for the most part are in no danger whatsoever.

In this bill we also equalize conditions in these services by permitting certain maximum allowances for the transfer of baggage, and the amount allowed in the bill is identical with that allowed for officers of the Army and Navy.

Another very valuable feature of this bill is that the Surgeon General, after having served four years as the head of the service, can be made to go back to the ranks, as it were; but if by qualification, experience, and skill he demonstrates his capacity as head of this service he may be reinstated or reappointed. After his service he goes back to the position of senior surgeon. Thus the Government and the people retain his valuable services, but a younger man may succeed him as Surgeon General. This is the identical practice now obtaining in the War and Navy Departments.

We also provide in this bill that the three division chiefs in the Hygienic Laboratory shall be granted leave of absence, the same as the other officers that are commissioned. This is a small matter, but it equalizes the service and increases the contentment and satisfaction of these officials.

Then, finally, in the bill we are providing for five experts to carry out the provisions of the act of 1912, giving the Public Health Service the right to investigate the diseases of man.

Now, this service has a great many duties, and it is performing them more efficiently than any public health service in any nation in the world.

Permit me to give you some few illustrations of the duties of this great service. In the first place it takes charge of the marine hospitals of the United States. This Government owns 33 such hospitals, and it has 141 relief stations located not only in the United States but in our island possessions. The amount of good done in these marine hospitals and relief stations is beyond question.

Then it has the duty of inspecting all the immigrants who enter the United States annually. These immigrants are inspected by the Public Health Service. In the last fiscal year they investigated 1,500,000 immigrants, and by reason of physical and mental disability they rejected over 41,000 of them. This Public Health Service is the first line of skirmishers that meets the incoming thousands of peoples who come here defective mentally and physically. Therefore they protect us from this sort of an invasion.

Again, this service has the right to regulate interstate sanitation, and a great work has already been accomplished in this line. Only recently they have made an extensive study of the water used in passenger coaches on railroads, in order to determine its fitness and its quality. There have been many instances of typhoid fever propagated by impure water carried in passenger coaches.

It also has a large force available to throw into any infected district on the outbreak of an epidemic, and it is a very valuable thing to have a trained force of men to go into a region where an epidemic has started and thus at the very outset restrain the spread of the disease. This is well known to you all. You can recall instances of that kind of service in New Orleans at the outbreak of yellow fever, in other sections at the outbreak of smallpox, and in the Rocky Mountain region at the outbreak of spotted mountain fever in the Bitter Root Valley.

This service also cooperates with the various State, county, and municipal authorities on health matters. Every year there is an annual meeting of the public-health officials of the United States with the officers of the Public Health Service, so that it becomes a clearinghouse on all health matters. Papers are read there by men learned in health questions.

Again, it conducts scientific investigations as to diseases of man and matters relating to the public health and as to foods and drugs, and also investigates the quality of toxins and vaccines and things of that kind, and inspects the manufacturing plants where these toxins and vaccines are made, so as to preserve a standard of purity for the people of the United States. It also treats the seamen in our merchant marine in these various marine hospitals. It also treats the personnel of the Revenue-Cutter Service, of the Life-Saving Service, and of the Lighthouse Service. All these are served by this Bureau of Public Health.

These officers of the Public Health Service may be assigned to the Revenue-Cutter Service, and, as I have already stated, several of them are doing duty on the vessels of that service.

So, all the multitudinous duties of this department of the Government, the responsibility resting upon it, and the great good it has accomplished are all arguments that deserve fair and favorable consideration at your hands. It is not a very easy service. In fact, it requires men of great skill and men of courage. Let me read to you something of the casualties suffered by this service in recent years. Five of the officers of this service within recent years have contracted tropical dysentery while in line of duty. In the Revenue-Cutter Service an assistant surgeon on board of one of the revenue cutters in Alaskan waters was drowned while seeking to afford medical relief to a lighthouse keeper. One died because he was afflicted with spotted fever while seeking to bring relief to the people of Montana.

Within a period of five years four officers contracted typhoid fever in line of duty and two of them died from that disease. Eleven officers have contracted tuberculosis in line of duty and three of them died from this disease. Twenty officers have contracted yellow fever in line of duty and six of them died from this disease.

It is a hazardous service, more hazardous than the Army or Medical Corps in time of peace, and because of the exposure to which these officers are subjected in cases of epidemic and in treating contagious diseases, these men should have the same consideration that corresponding officers have in the Army and in the Navy.

This service has rendered a great good to this country and to mankind. One of the officials by studying malaria laid the groundwork for the mosquito theory of yellow fever. Another

by his investigations of the disease of trachoma in immigrant stations laid the foundation for relief work in treating trachoma. Another official discovered the nature of the hookworm disease, a disease prevalent in some regions of the United States.

These men in their self-sacrificing, courageous way are doing great good to the people in the United States, and they certainly deserve the small consideration which this bill asks for them. [Applause.]

Mr. STEVENS of Minnesota. How much time did the gentleman from Wisconsin use?

The CHAIRMAN. The gentleman from Wisconsin used 10 minutes of the time of the gentleman from Minnesota. The gentleman from Georgia told the Chair to let the gentleman from Wisconsin continue and charge the balance to him, so that the gentleman from Wisconsin occupied 10 minutes of the time of the gentleman from Minnesota and 7 minutes time of the gentleman from Georgia, making 17 minutes in all.

Mr. STEVENS of Minnesota. Mr. Chairman, I yield to the gentleman from Wisconsin [Mr. STAFFORD] 10 minutes.

Mr. STAFFORD. Mr. Chairman, it was my privilege to be a member of the Interstate and Foreign Commerce Committee when the subject of increasing the salary of the officers of the Public Health Service was under consideration in the Sixty-first Congress. At that time there was no endeavor, no attempt made by the personnel of that service to have them accorded any increase of allowances such as is carried in this bill.

We all recognize the great worth and value of this branch of the public service. We can all approve every word that has been uttered by my colleague in praise of it, but that is no argument why we should depart from the policy that has been followed year after year and make this an allied arm of the Army and Navy.

There are two objectionable features in this bill. First, that which provides allowances for quarters to all the officers of the Public Health Service. It increases the salary of the Surgeon General virtually $1,152, because under existing law the Surgeon General receives no allowances whatever. Prior to the increase of salaries of the officials of the Public Health Service under the law passed August 14, 1912, the Surgeon General received $5,000. His salary was increased by that act to $6,000. The Surgeon General sought no further increase then. At that time he was living here in Washington, as Surgeon Generals always will live.

We have nothing but praise in favor of the present Surgeon General. We know of his great work, but we do not believe that it is right to increase his salary in this indirect way when only two years ago we increased his salary $1,000.

Mr. BOOHER. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. BOOHER. What is the present salary of the Surgeon General?

Mr. STAFFORD. Six thousand dollars. Prior to the reorganization his salary was $5,000.

Mr. BOOHER. That was done two years ago.

Mr. STAFFORD. Yes; August 14, 1912, to take effect some time in the fall of that year.

Mr. BOOHER. If this bill becomes a law it will increase his salary $1,400.

Mr. STAFFORD. Eleven hundred and fifty-two dollars.

Mr. BOOHER. It says in the report $1,400.

Mr. STAFFORD. Mr. Chairman, I wish to direct attention further to the increases in the salaries of the under officials in this service. We raised the salaries of all the surgeons connected with the service. We granted liberal increases and provided not only for an increase but for automatic promotion, so that all officials would receive 10 per cent increase of salary for each five years of service up to 40 per cent of the basic salary. The Assistant Surgeon General's salary was fixed at $4,000, and by continuity of service he would go to the maximum of $5,000. The senior surgeon, whose initial salary was fixed at $3,500, would go to a maximum of $4,500; the surgeons proper, from $3,000 to $4,000; passed assistant surgeons, at the initial salary of $2,400, would be regularly promoted.

These liberal increases of salary at that time met their entire expectations. It was the purpose to increase their salaries so as to retain the services of efficient men. The argument now is that they are not paid sufficient salaries, and instead of referring to the law of 1912 they seek to increase them indirectly by granting them arbitrary allowances for quarters.

But there is another objection to this bill, and that is the retirement feature for the Surgeon General, the head of the service. After four years of service he is to be retired and carried in the grade of senior surgeon. I have no objection to the idea that the Surgeon General should only hold for a term of four years and at the expiration of his period of usefulness he should be disconnected with the service. But here we are providing the means whereby you carry him for all time as a senior surgeon and adopt in a veiled way the idea of pensioning a person by keeping him in the service when he is no longer able to perform efficient service.

Mr. ESCH. Will the gentleman yield?

Mr. STAFFORD. Gladly.

Mr. ESCH. The gentleman will notice it allows the Surgeon General to be reappointed at the expiration of the four-year term. He may serve several series of terms of four years.

Mr. STAFFORD. When his period of efficiency is at an end, then he is to be carried under this bill in the grade of senior surgeon. Oh, it is easy enough to understand what the purpose of that first term of four years is. If he is efficient, he will be reappointed; and as soon as his period of efficiency begins to abate, why then he is to be passed on and carried in the grade of senior surgeon, and the purpose is to carry him along after his years of usefulness are at an end.

Mr. DIES. What pension would he get?

Mr. STAFFORD. He would get the salary in the office of the grade of senior surgeon of forty-five hundred dollars. That would be his pay, whether efficient or not. He would, of course, continue to hold office, but the point is that as long as the Surgeon General is efficient he is to be continued for four-year terms in that position. As soon as he becomes inefficient or his years of efficiency begin to wane, then they pass him on, and under this second section he is kept in the grade of senior surgeon.

Further, I can not see where there is any similarity between the Public Health Service and the Army and Navy. I am not acquainted nor is this House generally acquainted with the reason for paying allowances for quarters to the naval and military officers. You might say of the Army and Navy officers that their duties are away from home, that they have no permanent place, and that we should provide for them at a certain fixed rate, but not so with the Surgeon General and many of these other surgeons. Many of these officials who are provided for in the Public Health Service have their homes right here in Washington, and they propose to have their homes here. If their salaries are not sufficient, let us increase the salaries, and not undertake in this way to increase them by allowances for quarters equal to those of similar officials in the Army and Navy. Another proposal, where they are used in comparison with the Army and Navy, is for the same allowance for transportation of baggage, 7,200 pesos, as if a traveling surgeon going around investigating health conditions in various places has as much baggage as a Navy or Army officer.

Mr. DIES. Does not the gentleman think if he is going to get $6,000 a year, and when he finishes he is to get a pension for life, that he ought to have collected sufficient baggage to enable him to keep up that station of life?

Mr. STAFFORD. The Surgeon General, as the gentleman knows, does not travel at all. His domicile is here in Washington. This is nothing more than increasing salaries, and that is why I am opposed to it.

Mr. STEVENS of Minnesota. Mr. Chairman, I yield one hour to the gentleman from Illinois [Mr. MANN], or so much of that time as he may desire.

Mr. MANN. I want an hour's time; I may want to yield to somebody else.

Mr. Chairman, I am very sorry that out of the three hours which have been provided for general debate, one hour of which was yielded to me, that I have to take the time to explain what the bill is. The gentleman from Georgia [Mr. ADAMSON] did not explain it. My distinguished friend from Wisconsin [Mr. ESCH], who spoke in favor of it, did not explain it. Both made speeches, good speeches, sound speeches, reflecting the sentiment of the House and the country with reference to the good work done by the Public Health Service. There is no one here who feels a greater interest in the Public Health Service or who has tried to be a better friend of the Public Health Service than I have, but there come times when it seems to me that Congress in appropriating the money out of the Treasury is compelled to say "Nay." The Public Health Service during my service in this House has had passed several laws increasing their compensation. Two years ago we passed a law increasing the basic pay in the Public Health Service. That does not represent the total pay, so that we made larger increases in the pay of that service than have been made in any other service of the Government in many years' time. Two years ago we increased the basic pay of the Surgeon General from $5,000 to $6,000; the basic pay of assistant surgeon from $2,900 to $4,000; senior

surgeons, from $2,500 to $3,500; surgeons, from $2,500 to $3,000; passed assistant surgeons, from $2,000 to $2,500; assistant surgeon from $1,600 to $2,000. These increases would have been sufficient to have satisfied any other employees of the Government, but those increases carried additional increases beside the ones I have enumerated. They, in fact, included, with longevity pay, the salaries of assistant surgeons from $2,900 to $5,000, not yet including allowances for rooms, which were $600, making an increase from $4,660 to $5,600 a year. We increased the senior surgeons from $3,500 to $4,500, besides the allowance for rooms. We increased the surgeons from $3,500 to $4,000. We made a number of other increases of this character, besides the allowance for rooms.

Now, here is an increase, made two years ago, in the salaries of all of these employees or officials of the Government, ranging from the neighborhood of $500 a year to $1,000 a year—only two years ago. My Democratic friends on the Democratic side of the aisle are hardly in a position to claim that, as the result of Democratic policy, the cost of living has so increased in the last two years that there ought now to be a further increase in salaries. But certainly if there ought to be an increase anywhere in the Government service, it is not in the salaries of the higher-grade officials; it is in the salaries of those who draw pay from $500 to $1,500 a year.

Now what does this bill propose to do? Under the guise of furnishing commutation for rooms and light and heat it proposes a considerable increase in the actual compensation of these officers or employees of the Government. It is a funny thing that whenever you have one service of the Government enjoying certain privileges every other service of the Government would like to get the same privilege. The military branch of the Government, for reasons which are obvious to everybody, has always received special privileges in the way of compensation, retirement, and allowances everywhere in every country to a certain extent. Now the Public Health Service comes in and says—and it has been making this claim for some years—"Why, you allow a surgeon in the Army so much for commutation for quarters, so much for light and heat. We ought to receive the same allowance." And for years they have urged that.

While I was a member of the Committee on Interstate and Foreign Commerce for a number of years that claim was frequently urged, and I am glad to say that the committee never saw its way clear to allow the claim, as far as a committee report was concerned. I stated this morning that I had not agreed to a report to a bill at one time increasing the salaries of officers in this service. I am not sure that I was right about that. My recollection on these matters is somewhat hazy, because we have had these things before us so many times. I have never been in favor of an indirect method of compensation when you can get at it directly.

Two years ago the committee reported a bill to give the same allowances for rooms and light and heat that we are giving to the corresponding Army officers. Not only that, but in this Congress they reported the same bill. On December 15, 1913, they reported a bill to give to the officers of the Public Health Service the same commutation that was enjoyed by the Army. In this bill they make a slight reduction, and if we pass this bill the Public Health Service will again be before us in the next Congress seeking to have the compensation again increased so as to put them on a par with the Army surgeons, because the only excuse they ever have given for getting this increase in commutation for rooms and commutation for light and heat is that the Army surgeons have it.

Yet you do not quite put them on a par here. We will have to take it up again two years from now anyhow. They never will be satisfied until they get as much as they claim the Army surgeons get.

Only here the other day, on the Army appropriation bill, the officers had succeeded in getting incorporated into that bill as reported to the House a provision which when I called the attention of the chairman of the committee [Mr. HAY] to it he said he was not in favor of. He disapproved such a provision. That was a provision where the commutation was not enough to hire rooms in a big city or elsewhere, and then the Secretary of War could hire them regardless of expense. If $12 per month per room would not hire a six or eight room flat, under that provision the Secretary of War could hire an eight-room flat on the basis of $50 a month per room, and in some places, in some of the big cities, that is not considered an exorbitant rental.

Now, this bill proposes to increase the compensation for rooms. It proposes to allow the Surgeon General commutation for rooms, which he does not now enjoy, of $864 a year; the assistant surgeons general a commutation for rooms of $864 a year as against $600 which they now get; the senior surgeons a commutation of $720 a year as against $600 which they now get; a commutation to surgeons of $720 a year as against $600 which they now get; the passed assistant surgeons a commutation of $576 a year as against $480 which they now get; and the assistant surgeons a commutation of rooms of $422 a year as against $360 which they now get.

Those are not large increases in compensation. Why do they come for those? Each one of these officers received an increase two years ago of from $500 to $1,000 a year. In addition to the commutation of rooms, they now propose for the first time in this service to give a commutation of light and heat. It is proposed to give to the Secretary of the Treasury the power to make an allowance for light and heat; but, as a matter of fact, the allowance which is expected to be made, if allowed, is the allowance now made to certain other officers of the Government, and amounts for the Surgeon General to $288 a year; to the Assistant Surgeon General, $252 a year; to the senior surgeons, $216 a year; to the surgeons, $180 a year; to passed assistant surgeons, $140 a year; and to assistant surgeons, $108 a year.

Why should these men, efficient though they may be, receive this now proposed increase in their compensation in this indirect method of increasing compensation when two years ago they received a direct increase in compensation higher than has been granted to any other branch of the public service in many years? The salaries of the officers of the Marine-Hospital Service, now called the Public Health Service, were never fixed by Congress prior to 1902.

By the act of January 4, 1899, it was provided that the medical officers of this service should be appointed by the President and confirmed by the Senate, and the salaries were fixed by regulation of the service, leaving the salaries open, where Congress could control them. Then we passed the act of July 1, 1902, fixing the salaries of these medical officers at the amounts at which they were then fixed by the regulations which they themselves had made. Then, in 1902, was the first time they were put upon a fixed salary basis. They were well satisfied at that time to receive the salaries which were then fixed by their own regulations, when they had the power to make the salaries what they chose. Then they came along and got longevity pay in addition—10 per cent for each 5 years up to 20 years, or an increase of 40 per cent.

Mr. ESCH. That did not apply to the Surgeon General, however.

Mr. MANN. No; the Surgeon General did not receive longevity pay. He received a flat salary of $5,000 a year, which we raised two years ago to $6,000 a year.

In addition to all of these allowances which have been referred to, the bill provides for an allowance for baggage not to exceed in any case 7,200 pounds. They now have an allowance for baggage and personal effects in changing positions—an allowance to surgeons of 2,000 pounds, past assistant surgeons of 1,600 pounds, and assistant surgeons of 1,200 pounds, to be sent as freight. This bill proposes to give them an allowance of 7,200 pounds. They never will be satisfied as long as they can work Congress easily, and I would not be if I were in their place. It is our business to determine whether salaries shall be increased. There is not an official of the Government, not one, from the President down to the charwomen, who would not like to have their salaries increased. Of course a few years ago we increased very largely the salary and allowances of the President. He has made no request since that time for an increase, but there are no other officials of the Government that I know of who have not requested and urged increases in their salaries since that time, including the Justices of the Supreme Court of the United States, the Vice President, Members of Congress, Army and Navy officers, everybody connected with the Government. Now, we can not give large increases to most of these people. Certainly those who have received the beneficent attention of Congress only in the last Congress ought to be willing to take a back seat for a little while on increases in salaries.

This bill contains some other provisions that I do not profess to understand very well. Section 2 provides that assistant surgeons shall be promoted to the grade of past assistant surgeons in the order of seniority, at the expiration of three years commissioned service, after satisfactory examination. Here is a promotion regardless of vacancies. That also means a considerable increase in salaries. It is true the language of the bill is such that we might argue about what it means, but there will be no argument about it in the Public Health Service if it becomes a law, because it directs that certain promotions shall be made, and they will be made.

The bill provides that certain officials shall be appointed by the Secretary of the Treasury. Personally, I wish all of these appointments in the Public Health Service were to be made by the Secretary of the Treasury instead of by the President and confirmed by the Senate. I am not a believer in having too many offices confirmed by the very distinguished and able body at the other end of this Capitol. I think the President ought, in the main, to be allowed to name the men executing the laws under his direction, without requiring him to dicker with anybody else. [Applause.] But the Public Health Service officers are now appointed by the President and confirmed by the Senate. I do not know what reason actuated that distinguished body, which is the colleague of this body, in amending this bill so as to cut out their power of confirmation on a few officers named in this service. I wish they had gone further, and had cut out their power of confirmation over all appointments in the service.

For myself, I do not object at all to adding to this service certain officers and increasing their pay, because I assume—though I may not be correct about that—that it does not, in fact, add any officers, but only raises the pay of certain officers who are now in the service by authorizing their appointment as additional officers of the service.

Mr. Chairman, I do not desire to detain the House at this time. I may want to yield to somebody else, or make some further remarks.

If we are going to have any economy at all, we must refuse. We pay no money out of the Treasury which somebody has not first paid into the Treasury. On every hand we are beseiged to make an appropriation for this laudable purpose and that laudable purpose, and people complain because we do not make the appropriations. I have wandered around here several years without finding anybody yet haunting the Halls of this House, or this Capitol, or the streets of this city, seeking an opportunity to pay money into the Treasury. And very often those who are most insistent that appropriations shall be made to pay money out of the Treasury are the ones who kick the hardest when they are asked to contribute small sums to be paid into the Treasury. Now, if we are going to increase governmental salaries we have got to increase taxes. Why should we now select out this service, which received its increase, more than was warranted, two years ago, and now asks for a further increase in its compensation? The truth is, friend of the Public Health Service as I am, I am going to state that the Public Health Service has been largely demoralized during the past five or six years, because there has been a propaganda from the top to the bottom, spending time working for an increase in compensation, instead of performing the work for which the men are paid.

These men do not receive poor pay. They receive salaries for life. When anything happens to them they are put upon the waiting list, on good compensation. They come into this service knowing that promotions will come to them; that they are cared for for life at good pay. I have hoped for some years in vain that instead of spending their time lobbying for a bill to increase their pay, they would devote their time to the business for which the Public Health Service was created. If some of our eminent surgeons over there would write some popular article to aid people in protecting themselves from disease, we would readily publish them by the thousands and hundreds of thousands, to the great benefit of the people of the country. I get hold of the bulletins issued by that service. I do not profess to be a man of any great understanding, but I think my understanding is probably up to the average of the people of the United States. I have read what they sometimes call a popular bulletin, but I can not understand it. I assume, although it may not be correct, that the ordinary citizen who receives it can not understand it. If they will employ some men at half the salary they now receive, and they could easily do it, to write some popular information which people can understand, something on the order of the Farmers' Bulletins that the Agricultural Department sends out, and distribute it to the people of the country, they can render invaluable assistance in preventing or curing disease or supposed ills.

I see no hope of that, even if this bill passes. They will not have received the amount of commutation that they have been asking for and they will be coming before us again.

If the Committee on Interstate and Foreign Commerce, which I regard as the greatest committee in this House, will tell these gentlemen, "Go and attend to your own business and do the work of the Government you are paid for; you ought to be satisfied," it would have a revivifying effect on the Public Health Service and would do more good than 40 increases in salary.

Mr. O'SHAUNESSY. Will the gentleman yield?

Mr. MANN. Yes.

Mr. O'SHAUNESSY. I have been very much impressed with the gentleman's statement about the service. I have a high regard for the Public Health Service. I think the gentleman makes a very serious accusation against the Public Health Service when he says that they are lobbying for pay instead of attending to their business. I think that the House would be indebted to the gentleman from Illinois if he would give some specific instance on that point.

Mr. MANN. I shall not do it, I will say to the gentleman.

Mr. O'SHAUNESSY. I would like to know when they neglected the business of the Public Health Service.

Mr. MANN. I will ask the gentleman if he has never had any communication from them about it.

Mr. O'SHAUNESSY. I have not.

Mr. MANN. That is queer, coming from where the gentleman does. I have been frequently besieged by them.

Mr. O'SHAUNESSY. I would like to get some specific instance where they have neglected the public business.

Mr. MANN. A man can not put in his time in the public service trying to get an increase in salary without neglecting the public business. [Applause.]

Mr. O'SHAUNESSY. I think that statement can be challenged.

Mr. MANN. The gentleman can challenge it; the gentleman would like to increase all salaries, I suppose.

Mr. O'SHAUNESSY. I would like to increase the salaries of the men to whom the gentleman referred in the early part of his speech, the poor clerks who get from $500 to $1,500. I think there is an indictment of the Republican Party when it was in power that it did not give it to them.

Mr. MANN. I did not refer to partisan politics in the matter, but of course when a distinguished gentleman like the distinguished gentleman from Rhode Island rises that is the first thing that occurs to him—partisan politics. If the gentleman wants to be nonpartisan, if he wants to correct what he says was the fault of the Republican Party, let him vote against making a second increase of salary to these highly paid officials, and then we will see what he does about increasing the salaries of the poor clerks while his Democratic friends have control of the House, the control of the Senate, and the control of the Government of the country.

Mr. O'SHAUNESSY. I am ready to vote an increase.

Mr. MANN. The gentleman is ready to vote an increase, but he will not get a chance.

Mr. O'SHAUNESSY. I have a very high regard for the surgeons of this department who do this splendid work for the people.

Mr. MANN. And probably knows nothing about it.

Mr. O'SHAUNESSY. Who?

Mr. MANN. The gentleman from Rhode Island.

Mr. O'SHAUNESSY. That is a very comprehensive charge.

Mr. MANN. A very comprehensive charge; and I am a very correct charger.

Mr. O'SHAUNESSY. I doubt the gentleman's statement; but I have had occasion to observe the work done by these people.

Mr. MANN. That is what I said, somebody has been after the gentleman.

Mr. O'SHAUNESSY. Nobody has been after me.

Mr. MANN. No one understands what this department is doing unless he goes out of the way to understand it.

Mr. O'SHAUNESSY. No one has been after me; I carry my intelligence with me.

Mr. MANN. I did not understand what the gentleman said, because he was talking when I was talking. He could not keep still when I wanted to answer him. I yield to the gentleman now.

Mr. O'SHAUNESSY. I have nothing more to say to the gentleman from Illinois. I speak very seldom in this House, and the gentleman from Illinois speaks frequently. I merely wished to state something that was within my own knowledge, to say a good word for a service that does very excellent work, and I think it comes with ill grace from the gentleman from Illinois to make a statement as to the knowledge of any man on such a bill and in such a nasty manner.

Mr. MANN. That is sweet tempered. I do not believe the gentlemen is familiar with the Public Health Service yet, but if he is it is because some of these people have been working upon him to support their proposition.

Mr. O'SHAUNESSY. No one has been working on me.

Mr. MANN. Well, working him then.

Mr. O'SHAUNESSY. No one has been working me.

Mr. MANN. Oh, well, they very often work people without their knowing it.

Mr. O'SHAUNESSY. I do not know what is working the gentleman from Illinois.

Mr. MANN. Very often people are worked without their knowledge. I do not see this benefits anything. I endeavored to be courteous to the gentelman, but it does not seem to have any effect. The gentleman can vote for these increases if he wants to. Other gentlemen can do the same thing. I can see no occasion for granting a second increase in compensation to these employees of the Government within two or three years' time. [Applause.]

I reserve the balance of my time.

Mr. ADAMSON. Mr. Chairman, I yield 15 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Chairman, I shall certainly get as much pleasure in voting against this measure as any small assault I have seen made on the Treasury. Of course I have witnessed some assaults here by valiant armies for much larger booty than this, and I have swatted those chargers upon the Treasury with more pleasure and appreciation than I shall in this case, because the loot that is sought to be abstracted here is not so large as it is usually in such cases.

Now, Mr. Chairman, in these brief 15 minutes it is unnecessary for me to say I wish that the human family might be healthy. I believe we all are on the side of health, although I am not so enthusiastic about throwing about the people all the regulations, inspections, investigations, suggestions, and advice on the part of the Government as to their health as some other gentlemen are in this Chamber.

I have no doubt that if those gentlemen, high priced, high paid, and learned, who are in the Health Service, had their way about it they would inspect every laborer in the country; they would inspect every farmer and probably require him, if the matter went as far as they would like it to go, to take his regular evening bath, keep his corns properly pared, and his nails manicured. [Laughter.] Indeed, the way we are traveling in this good Nation we will pretty soon provide supervisors for all the people in all the walks of life. Not only have we doctors to make folks stick out their tongues to see if they are in good health, not only have we now high-priced employees in the Forest Service going about over the country looking at the roots of trees and finding bugs upon them that are likely to destroy the forests, and having litigation with the homesteaders and incidentally eating up all of the forest-reserve funds in the payment of their salaries, but these activities will extend. We already have Government farmers going about, getting $100 or more a month, telling the farmer how to work, without working any themselves incidentally; telling the farmer how to farm and himself having been a failure as a farmer. I do not know how far it will go. I do not know how small the individual will become, finally having his ears pinched to pay this tax and his back stripped to pay that tax to sustain a growing army of Federal employees, but I can see how that Government doctor, the farm expert, your Government forest expert, the bug picker, when he draws his salary through life and when he gets old gets a pension which the gentleman from Illinois says he is going to get—and they are going to get them—you know they are going to get pensions all right—I can see that your Government farmer will sit down and watch the toil of his fellows and laugh at them because he is on the pension roll. The old Government bug inspector will be going through the forests where he once idled away hours, drawing pay from the people, with his gun and dog as a sportsman. Oh, if we get this beautiful socialism that taxes the people on all the activities of their industrial lives in order to set over them a great swarming army of Federal employees and inspectors the people will be wonderfully protected—wonderfully protected against every idea and every initiative and every personal individual ambition through all their lives. We know all the wastebaskets are filled in the morning with reports of bureaus and commissions. We have got one for everything. No bug is too little and no social problem is too great but that we manufacture a bureau or commission of some kind with salaried fellows [applause] to look after the insects and to look after the problems.

Now, I would be better pleased about this matter if this Bureau of Health would stick to the health business, and I candidly confess I have not read all the numerous bulletins with which I fill my wastebasket every morning from the Health Service any more than you gentlemen, but I just happened this morning, because I knew this bill was coming up, to glance at one of their health bulletins. The first word in that health bulletin, the first line, reads like this—get it; it is worth your while to get it:

> The spirit of individualism is rapidly passing out of modern society.

[Laughter.]

Mr. JACOWAY. Is that a health scientist?

Mr. DIES. That is Dr. Schereschewsky.

Now, you laugh at that, but I will give you the letters composing the word and let you see if you can pronounce it. It is "S-c-h-e-r-e-s-c-h-e-w-s-k-y." [Renewed laughter.] But he told the truth. I am not making fun of his name. He is not responsible for that. I have no doubt but that he is a learned Socialist, and he told the truth when he said "The spirit of individualism is rapidly passing out of modern society." And you and I, who hold the commission of the American people under this Constitution, under this representative democracy, are helping individualism to pass out of modern society. When the people clamor for relief from the burdens of taxation we appoint a commission at the people's expense to see about it. Do the people want relief from their taxes, we tax them more to find out why they are grumbling. [Laughter.]

Now, this bulletin by this gentleman tells a few of the things they want to do. I wish I had time to go more fully into some of the things that not only this gentleman wants to do but other uplifters in this Government, and I serve notice now, so that any gentleman may run who wants to run, that on some one of these days I am going to get an hour on an appropriation bill, and I am going to prove what this gentleman says, that by legislation in this Chamber and in this Congress and in the past Congresses and in this administration and in the administrations of the past we are helping to do in all our legislation just what this doctor says, "killing the spirit of individualism" and setting up in this country a bureaucracy, a Government of commissions, and we are coming rapidly to a Government of socialism. [Applause.]

Well, he goes on here, and on page 5 of this bulletin and lays out the plans that the Bureau of Health has for the safeguarding of the health of the American people:

> First, the prevention of the introduction and control of communicable diseases; the detection of physical defects and diseases in their incipiency among workers; the adaptation of work to the physical condition of the worker.

In other words, when they inspect the gentleman from Illinois [Mr. MANN] they are likely to tell him that he is working too hard. [Laughter.] And whenever they inspect me they will probably tell me that I am not working hard enough. [Laughter.]

Now, taking that one idea about suiting the man to the job, these learned Socialists who are going to get all this money out of the Government and draw pensions when they get so that they can not work are going to tell everybody the kind of job they are fit for, and, of course, along with that will go the Government power to make a man do what he is fit to do and prevent him from doing what he is not fit to do. [Laughter.] Listen:

> Adaptation of the work to the physical condition of the worker. It is evident that certain classes of work require certain physical qualifications or the absence of physical defects or diseases.

Now, if a man has the hookworm and they find him working out in the field they will take him and say, as one of your quasi parents in this paternal Government, "My good friend, you are too much infested with hookworm to go on with this work. You should be given a lighter employment."

And right in this connection, if I might say it without being officious, I wish to remind you that it is now being propagated all over the country that the Government owes everybody a job, and this gentleman evidently has that in mind when he says the job should suit the man and the man should suit the job. [Laughter.]

Now, I have no disposition in the world to be facetious about this question, but I want to say to this House that we are treading on dangerous ground. I can speak of one little incident that I spoke of the other day with more elaboration, because you will not charge me with playing politics when I say it, and that is this: As we add to the employees of the Government we increase our difficulties in this House with respect to the courage with which we can meet public questions.

For instance, you take the rural carriers of the country. They are as powerful in my district as they are in yours. They are generally good men. They generally do about half as much work as does the farmer to whom they deliver mail. They receive generally more than twice as much pay as the farmer, and nearly always have much less than half of his investment. But the rural carrier is organized, and he is looking at us, and he is watching us, and we are afraid of him; and for all these years we have gone on increasing his pay every year that he has asked for it, I believe, and we will continue to do it unless the people generally shall wake up, which I am looking for almost any time. [Laughter.]

We not only give the rural carrier from two to five times as much as the farmer, whose servant he is, can make, but we give

him free accident insurance and a little free life insurance, I believe, and when the Postmaster General tells us that we could save the people who are served, the taxpayers of the country, $17,000,000 a year by having this work done in a businesslike way, by contract, we in effect say to him, "How dare you put your hands upon the rural carriers of this country, who are looking at us and watching us all the time, in order to relieve the taxpayers, whom we can satisfy by an offer to buy their cotton and invest the money in railroads in Alaska or invest the money in ships to go to sea?" [Laughter.] If the rural carrier wants something, we pay him in cash out of the pockets of the people. If, however, the people want something, we tell them we will make them happy by building railroads up in Alaska and by having ships sail the seas. [Laughter and applause.] When the taxpayers of this country want something we tax them still further to give them relief.

That is the truth. I appeal to you as one patriot to other patriots, as one citizen of this Republic to other citizens of the Republic: How will it be with us when the Government gets into these other activities? What will be the eloquence in the other Chamber when a Senator arises in his place to ask increased pay for a poor sailor? How our friends will bleed and die here when a conductor or brakeman from Alaska comes in with his ears frozen off and his toes frozen off. If you grant a pension to a rural carrier with two legs in a moderate climate, in the Temperate Zone, how will Senators and Congressmen stand up against the demands of men who have braved the briny ocean amidst its stormy waves and the other fellow who has just come back from Alaska frozen stiff as an icicle? [Applause and laughter.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 25 minutes.

Mr. MANN. I yield five minutes to the gentleman from Texas, if he wants it. [Applause.]

Mr. DIES. Mr. Chairman, I can not only use that five minutes, but I could use five hours in calling upon you to rally round the flag of individualism, round the flag of the old Republicanism and the old Democracy of this country, as against this socialism which is leading the people into the fallacy of Government ownership. And I am going to use more time in this Chamber and out of it, and I am going to stand for the man who pays the taxes. I am going to stand for the individual against the Government. I am going to stand for the people who have been hoodwinked with false promises. I am going to stand for the farmer in my district, who has been told that the Government ought to buy his cotton, and I am going to tell him that he is being deceived by gentlemen who know full well that the Government has nothing to buy cotton with. [Applause.] I believe, gentlemen of this Chamber, that a little innocent demagoguery is a good thing in Congress, but we are carrying it too far. From this Chamber and from the other Chamber at the other end of this Capitol we are educating the people to believe that the Government ought to buy their produce, that the Government ought to find a job for them and pay them a salary, that the Government ought to look after their health, that the Government ought to take care of them when they are old and in poverty. I hope that gentlemen will tell the people that the Government can do nothing of the kind, and that the Government never will do anything except to spend money and tax the pockets of the people. I wish the American people to know that all the Government can do is to give them a fair and equal chance in the race of life. Let the farmer alone, to stand upon his manhood, to work out his destiny in his fields, and stop teaching him that it is the duty of this Government to buy his produce or lend him money upon it. Let those who want to escape the ills of poverty learn the truth. Do not keep on taxing them and making them poorer when you tax them, but tell them the truth, that they must labor and practice economy if they would escape poverty. That will do for this time, but I am going to get some time to make a speech on these questions. I know I have not as much sense as many of you gentlemen have. Probably you can make better speeches than I can; but I have just enough sense to know that, small as I am, I do not love an easy place in Congress well enough to keep on holding it and eating the taxes of the people without telling them the truth, and that we are deceiving them about the functions of government and about the duty that the Government owes them and what they ought to expect from the Government. [Applause.]

Mr. MANN. Mr. Chairman, I yield five minutes to the gentleman from Washington [Mr. HUMPHREY].

Mr. HUMPHREY of Washington. Mr. Chairman, I hope I may have the attention of the gentleman from Texas [Mr. DIES], who has just taken his seat, because I feel sure that if he had read one of the recent bulletins issued by the Health Department he would withdraw any insinuation that he may have made that they are not worthy of their hire and that they ought not to have pensions. I want to read to him bulletin No. 40, issued by the United States Public Health Service, for release January 22, 1915:

[Health news.—Issued by the United States Public Health Service. For release January 22, 1915, No. 40.]

DO YOU KNOW YOUR AGE AND BIRTHDAY?

How old are you? When were you born? See if you really know. See if your children know how old they are.

Do not laugh at these simple questions until you try the test. Assume that you were born on March 16, and that you are 16 years old, in what year were you born?

According to a recent issue of the Public Health Reports it is a common occurrence to find school children, even high-school pupils in the junior and senior years, who can not tell how old they are, or who, if they know their age, can not tell accurately in what year they were born.

Now I call attention to the rest of this, particularly to the Members who have been inclined to think that these bulletins are not necessary to the public.

You will need this information when you apply for a marriage license—

I commend that to my distinguished friend from Massachusetts [Mr. GILLETT] and my distinguished friend from Wisconsin [Mr. STAFFORD] and my distinguished friend from Nebraska [Mr. KINKAID], old bachelors, all.

You will need this information when you apply for a marriage license, or in registering for voting, or in seeking a Government position, or in case you claim that you are heir to a fortune that is going to some other person. You may have to go under oath as to your age when you pay your customs duties upon return from your next European trip, so you should practice up.

I commend that to my Democratic friends.

In some of our States there is no birth registration, so you may not be able to prove from the records that you ever were born—

Think what a calamity that would be to people going around over the country, not knowing that they ever had been born. [Laughter.]

Mr. BUTLER. What is the gentleman reading from?

Mr. HUMPHREY of Washington. From Bulletin No. 40, issued by the United States Public Health Service, for release to the newspapers January 22, 1915. It is a part of the advertising scheme that this Government is paying for, to which I have attempted to call attention on several occasions, which I think is absolutely in violation of the law. This is printed in the department in violation of the law, which provides that all printing shall be done in the Government Printing Office. They evade that by printing it in this form—some sort of a manifolding device—

This might be embarrassing to you if you want to marry in Europe.

Perhaps the easiest way to remember you are is to form some jingle or rhyme on your birth year. For instance: "In 1897 little Johnnie came from heaven," or "In 1882 little Susie began to boo."

[Laughter.]

Never mind what the rhyme is, just so you remember it, and if, after reaching the age of 40, you want to prove that you are only 23 years old, just change the rhyme, and perhaps people will believe you when you repeat the jingle to prove your youth.

Mr. BUTLER. Is not that a fake?

Mr. HUMPHREY of Washington. No; it is no fake.

Mr. MANN. It was published in the papers the other day.

Mr. HUMPHREY of Washington. And sent out to all the newspapers of the country in franked envelopes.

Mr. BUTLER. I will take the gentleman's word for it; but it seems incredible.

Mr. HUMPHREY of Washington. It was mailed to papers, to be released on the 22d day of January, 1915. It was brought to me to show the character of bulletins that Congress permits the department to publish in violation of law. I was waiting for an opportunity to call attention to the character of these bulletins and to show how valuable they are and how we ought to continue the appropriation of money to pay for them.

Mr. NORTON. That bulletin was prepared by a distinguished surgeon, I suppose, who receives a salary of $4,000 or $5,000 a year.

Mr. HUMPHREY of Washington. I do not know who it was prepared by, but I know where it comes from and that it is an official bulletin, and it is but little more silly than others that are issued by other departments.

Mr. MANN. This is really one of the most important bulletins that has been issued by the department in several years' time. [Laughter.]

Mr. ADAMSON. Mr. Chairman, I would like to ask the gentlemen on the other side if they want to use any more time?

Mr. MANN. I am willing to wait until the gentleman has used some of his time.

Mr. ADAMSON. Mr. Chairman, how does the time stand?

The CHAIRMAN. The gentleman from Georgia has 48 minutes remaining, the gentleman from Illinois has 17 minutes, and the gentleman from Minnesota 10 minutes.

Mr. ADAMSON. I yield 5 minutes to the gentleman from Missouri [Mr. BORLAND].

Mr. BORLAND. Mr. Chairman, the speech of the chairman of the committee and the speech of the gentleman from Wisconsin [Mr. ESCH], a prominent Republican member of the committee, in favor of this proposed bill, were bottomed chiefly on the argument that in some way or other the men in this particular service were not enjoying advantages which are enjoyed by officers detailed in other services. A great deal was said about the importance of this service and the distinguished manner in which these gentlemen were fulfilling their duty.

That may all be admitted without admitting the necessity for this legislation. One of the greatest difficulties we have to contend with is this standing argument that some branch of the Government service is not enjoying in every possible way all the advantages and pay and emoluments and privileges that are enjoyed by other branches of the service. To refuse to extend these privileges is not discriminating against any branch of the service. It is true that as to the Army and the Navy we furnish commutation and quarters, because, as I take it, we own the Army and the Navy. Every minute of the 24 hours of a soldier belongs to his country. It educates him, it clothes him, it feeds him, it tells him where he shall live, what he shall eat and wear. But that does not extend to the civil service of the United States. There is no more reason for extending it to men who are not officers of the Army and the Navy than there is to extending it to postmasters or any other branch of the civil service. Why should we furnish quarters for these gentlemen? I have no doubt that there are many men serving as postmasters who would like to have us pay their house rent. I have no doubt that there are many serving in other capacities who would like to have their rent, fuel, and lights paid for. Without any reflection on the committee or upon this branch of the public service, I say that this is a wrong time for this House to begin extending this kind of privileges. [Applause.] They say it is only $46,000. Of course it is only $46,000, as an entering wedge; but how much more can we extend the principle? It is said that these gentlemen will leave the service if we do not take better care of them. I have heard that argument used about every branch of the public service. Unfortunately, all pay in the public service has not reached the point where it ought to be, but it is no more true of this branch of the service than any other. We are confronted with the absolute necessity of practicing economy in the public service. We have only got a certain amount of money to expend, and it belongs to the taxpayers of the country and not to the Members of this House.

Mr. GOOD. Will the gentleman yield?

Mr. BORLAND. No; I can not. We are full of sentiment, of liberality, of generosity, to men who happen to be in the public service, forgetting our obligations to the people whose money is put into the Treasury. Not a dollar can be taken out of the Treasury until the taxpayer puts it in there. We forget that our expenditures must be limited to the economical needs of the Government wisely and efficiently administered. [Applause.]

I say that this is the wrong time for the Democratic Party or any committee to begin even with a $46,000 expenditure of this nature. Now, I take it that these gentlemen will not resign from the service. I take it that this advanced pay given them a few years ago will satisfy them on the question of pay. I take it that they have been as well taken care of as any other branch of the public service, and now at this particular time I know it is popular to talk about economy and very unpopular to practice it. [Applause.]

When you put your finger on a thing and say we ought not to spend $46,000, gentlemen say this is the wrong place to practice economy; but you must economize somewhere and everywhere or there will be no economy at all. If any man can come in and say because this branch is meritorious it must have special privileges, other gentlemen will advance the same argument about every branch of the public service. I hope this bill will not be passed, not because I have any feeling against the service, not because I am not in full and entire sympathy with the great committee that reports it, but because I believe the sacredness of the Public Treasury is far and beyond the granting of any special advantage to these gentlemen benefited by this bill. [Applause.]

Mr. ADAMSON. Mr. Chairman, I yield five minutes to the gentleman from Tennessee [Mr. SIMS].

Mr. SIMS. Mr. Chairman, this bill is reported from the committee of which I have the honor to be a member; and since I have only five minutes, I am not going to undertake to go into the details, but I want to say one thing and endeavor to impress it upon the members of this committee. Thousands of dollars are now being spent on a propaganda in the interest of what is called the national defense, providing for the expenditure of hundreds of millions of dollars, to protect this country against imagined foreign invasion, of which there is not the slightest probability. More people die in the United States every year from preventable diseases than will ever die by reason of military invasion by any foreign nation. We sit here and vote $15,000,000 to build one useless battleship and then preach economy about the expenditure of a few dollars in promoting the public health, which is a real method of national defense. I get tired of hearing economy preached over little things like this, and yet when the naval bill comes in here, with a hundred and forty or a hundred and fifty millions of dollars of practically useless expenditure, gentlemen get alarmed and cry out that battleships are needed, costing many millions, while insidious diseases are prowling abroad over the land killing thousands, hundreds of thousands of individuals, from which the people might to some extent be protected by this expenditure; but when we say a word about national defense through national health agencies there is always an awful hue and cry made in behalf of economy.

Mr. CALLAWAY. Will the gentleman yield?

Mr. SIMS. Because this bill will not support one of the great steel manufactories in furnishing material to build battleships, which, when built, in order to be safe, must be as far away from sea water as possible.

Mr. CALLAWAY. Will the gentleman yield?

Mr. SIMS. If the gentleman does not ask me too hard a question, yes.

Mr. CALLAWAY. In order to get these little fellows to stand by the big fellows, the method is to give a little hand-out, is it not?

Mr. SIMS. Well, I have never had much experience along that line, so I can not answer.

Mr. CALLAWAY. Does not the gentleman know it is a fact that if a little hand-out is not given in the way of a little pension and a little life insurance, the result being an increase of salary, that the populace would rise en masse against these hundred-million-dollar outrages we perpetrate here from year to year?

Mr. SIMS. I can not agree with the gentleman, not having looked into the facts; but these hundred-million-dollar outrages are voted because of a propaganda of fear that scare the people into supporting such propositions, while many more people die of diseases which may be prevented by a small additional expenditure. But when it comes to doing something for the people that does not require the maintaining of shipyards and steel plants there is a terrible hue and cry about it. Now I yield to others who know better than myself about the increases, but I do not think that this House ought to refuse to appropriate reasonable maintenance to the Public Health Service, a life-saving service, while we vote hundreds of millions of dollars to a life-destroying service. As far as I am concerned, I believe in being a little consistent. Defense, when nobody threatens; defense, when there is no danger to anybody except somebody not making as much money as they otherwise could make out of their manufacturing plants. They scare people in order to cause them to favor millions of useless and unnecessary expenditures, all intended to destroy life; but when it comes to doing a little something to prevent diseases, to prevent the spread of contagious diseases, and help stamp them out, it is awfully extravagant. Members will vote for the battleships, cruisers, submarines, and flying machines with which to destroy life, but not one cent for anything that will preserve life.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ADAMSON. Mr. Chairman, it is probable I will use all of my remaining time in one speech, and I will ask the gentleman on the other side to proceed.

Mr. STEVENS of Minnesota. Mr. Chairman, I yield the remainder of my time to the gentleman from California [Mr. J. R. KNOWLAND].

The CHAIRMAN. The gentleman from California is recognized for 10 minutes.

Mr. J. R. KNOWLAND. Mr. Chairman, this bill comes from the Committee on Interstate and Foreign Commerce with a unanimous report. The members of this committee after hearing all the evidence came to the unanimous decision that it was no more than just and proper that the officers of this service should be placed upon a parity, as far as salaries, grades, and allowances are concerned, with the officers in the medical service of the Army and of the Navy. We in Cali-

fornia feel particularly grateful to the Public Health Service. A few years ago bubonic plague made its appearance in California, and it was through the prompt and aggressive action of this service that that disease was eradicated. A successful campaign against infected rats was waged. It was also discovered that squirrels were susceptible to this disease. A campaign was also carried on for the extermination of those rodents.

These and other measures adopted resulted in the disappearance of that dread disease from California, the Pacific coast, and, in fact, from the entire Nation. When my friend from the South, the gentleman from Texas [Mr. DIES], was attacking this bill I could not help but recall that a few years ago—I believe it was in 1905—when yellow fever broke out in New Orleans you did not find at that time any Member of this House from Texas or from any other of the Southern States attacking and belittling the Public Health Service.

Once before, in 1878, yellow fever broke out in New Orleans, before the Public Health Service was available for this important work, and the ravages of this disease resulted in the loss of millions of dollars to the people of the South—a loss not sustained during the last outbreak, because of the high efficiency of this service.

I wish Members of this House could take the time to go over the last annual report of the Public Health Service. You would learn that the administrative supervision of the work is conducted through seven divisions, giving you some idea of the activities of the service:

First. Scientific research and sanitation.
Second. Foreign and insular quarantine and immigration.
Third. Domestic (interstate) quarantine.
Fourth. Sanitary reports and statistics.
Fifth. Marine hospitals and relief.
Sixth. Personnel and accounts.
Seventh. Miscellaneous.

I turn now to page 16 of this report, dealing with the problems which have been studied during the past year. I read:

Problems studied: Among the diseases of man investigated in the several laboratories and in the field during the year are beriberi, diphtheria, endemic goiter, hookworm disease, leprosy, typhoid fever, malaria, pellagra, trachoma, tuberculosis, typhus fever, and certain occupational diseases.

Many people imagine that the hookworm disease is found only in tropical climates, but it is a fact that it is found in many of the States of this Union.

They are also investigating the water supply and sewage, comprising three distinct lines of study, namely, the pollution of rivers and coastal waters, the disposal of sewage, and the treatment of industrial wastes.

They have also taken up the question of railroad sanitation. This is important to everyone who rides upon the railroads of the United States. They are examining the drinking water. They are seeing that sleeping cars are properly fumigated, and they are doing many other things that have a tendency to protect the health of the great traveling public.

In the last 26 years there has been only one increase in the salaries of men connected with this service, but during this same period we have enacted over 22 different laws, placing additional duties and burdens upon the men engaged in this service. I want to refer just briefly to just a few of these laws which place additional burdens and responsibilities upon the men in charge of this service, placing the others in the RECORD.

In 1891 we provided for the medical inspection of immigrants, that the medical inspection of immigrants should be made by the medical officers of this service. In 1894 we passed an act for extending the benefits of the marine hospitals to the keepers and crews of life-saving stations. We passed an act in 1895 providing for the prevention of the spread of scarlet fever and diphtheria in the District of Columbia, under the direction of men of this service. We provided in 1899 for the investigation as to the origin and prevalence of leprosy in the United States, coming under the jurisdiction of the men of this service. We provided in 1900 for the establishment of quarantine stations in Porto Rico, and extending the United States quarantine regulations to that country.

During the Christmas holidays I had the pleasure of visiting the island of Porto Rico, and I found that the men of this service had in 1913 wiped out the bubonic plague which had been found on the island. It was by their prompt action that an epidemic of that plague was prevented.

We passed in 1902 an act providing for the building of a hygienic laboratory for the investigation of infectious and contagious diseases, and this also came under the jurisdiction of the Public Health Service. In 1902, also, we passed an act authorizing the President to utilize the services of these men in time of threatened or actual war; and I want to say in that connection that there never has been a war in which the United States was a party where this service has not cooperated with the medical officers of the Army and of the Navy.

In 1902, also, we passed an act to regulate the sale of virus, serum, toxin, and such products in the District of Columbia, to regulate the traffic in such articles, and so forth. The administration of this law was placed under this department. In 1903 we provided for the physical and mental examination of all arriving aliens, and that these examinations should be made by the members of this bureau. We provided in 1905 for the publication of the annual reports and bulletins of the Hygienic Laboratory and of the Yellow Fever Institute of the service.

I might say in connection with the criticisms which have been made against certain publications of this department—and I know that my friend from the State of Washington [Mr. HUMPHREY], while he criticizes this bulletin, does not criticize the Public Health Service, because he knows of the splendid work they have accomplished on the Pacific coast.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. ADAMSON. Does the gentleman desire more time?

Mr. J. R. KNOWLAND. A little more; yes.

Mr. ADAMSON. I yield to the gentleman five minutes more.

The CHAIRMAN. The gentleman from California is recognized for five minutes more.

Mr. J. R. KNOWLAND. Mr. Chairman, I am inclined myself to criticize the recent press bulletin issued by the department, which has been read during the debate. I have no doubt it was issued, although it hardly seems possible. I am inclined to severely criticize the issuance of bulletins of that kind. But that does not mean that every bulletin issued by this department is of a like character.

I want to call your attention here to a number of bulletins that have been issued by the Public Health Service that are of great benefit to the people generally throughout the United States. I have here one on the "Summer care of infants." That is of particular importance, not perhaps to some of our bachelor colleagues whose names were mentioned a few moments ago, but to the people generally who are raising children it is of great value. Another is "Diphtheria, its prevention and control." Here is another bulletin of great value to the people of the country, "What is a safe drinking water?" "Prevention of malaria" is a bulletin of importance, and "The water supply of ships" is another.

I might enumerate a great many other bulletins issued by this department which are of great service to the people of the United States.

Typhoid fever is a preventable disease. We are told that in the United States about 450,000 persons are incapacitated and about 35,000 die of this disease annually. The Public Health Service is doing a great work in educating the people as to methods for the prevention of this disease.

These men are engaged in a hazardous work, fully as hazardous as that of the medical officers in the Army and Navy of the United States. I believe that just as many men lose their lives in this service as lose their lives in similar service in the Army and Navy. It seems to me that the least we can do is to place them, as nearly as we can—which we have endeavored to do in this bill—upon an equality with the officers of the Medical Corps of the Army and Navy.

I agree with my friend from Wisconsin [Mr. STAFFORD], and would prefer to see an appropriation made directly for salaries, omitting allowances; but the various departments of the Government have adopted that policy, and, as long as they have, and these laws remain upon the statute books, the members of our committee do not feel that we can change the entire system.

But the main question is, Are these men entitled to this increase? Are they entitled to the same pay as the Medical Corps of the Army and the Navy? After careful investigation, considering the splendid work which these officers are doing in every section of the United States in protecting the health of the people, to a greater extent than many of us realize, I believe that the least we can do is to pass this bill and place them upon a footing equal with like officers of the medical service of the Army and Navy. [Applause.]

LIST OF ACTS OF CONGRESS PASSED SINCE JANUARY 1, 1880, WHICH HAVE GRANTED ADDITIONAL POWERS AND IMPOSED ADDITIONAL DUTIES UPON THE PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

No. 1. An act to regulate appointments in the Marine-Hospital Service of the United States. Approved January 4, 1889.

No. 2. An act to prevent the introduction of contagious diseases from one State to another, and so forth. Approved March 27, 1890.

No. 3. An act in amendment to the various acts relative to immigration, and so forth. Approved March 3, 1891.

This act provided that the medical inspection of immigrants should be made by medical officers of the service.

No. 4. An act granting additional powers and imposing additional duties upon the Marine-Hospital Service. Approved February 15, 1893.

This act provided for maritime and interstate quarantine; for the collection and publication of sanitary reports and statistics throughout the world; for rules and regulations to be used and complied with by vessels in foreign ports; for the treatment of infected vessels; empowered the President to prohibit the introduction of persons or property for the purpose of preventing the introduction of disease from foreign countries; and authorized the Secretary of the Treasury to take over State quarantine stations.

No. 5. An act extending the benefits of the marine hospitals to the keepers and crews of the life-saving stations. Approved August 4, 1894.

No. 6. An act making appropriations, and so forth, for the District of Columbia. Approved March 2, 1895.

This act provided for the prevention of the spread of scarlet fever and diphtheria in the District of Columbia, under the direction of the health officer of the District and the Supervising Surgeon General of the Marine-Hospital Service, and for the establishment and maintenance of a disinfecting service.

No. 7. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898. Approved March 2, 1895.

This act provided for the experimental investigation of the treatment and prevention of smallpox.

No. 8. An act for the investigation of leprosy. Approved March 2, 1899.

This act provided for an investigation as to the origin and prevalence of leprosy in the United States.

No. 9. An act temporarily to provide revenues and a civil government for Porto Rico, and so forth. Approved April 12, 1900.

This act provided for the establishment of quarantine stations in Porto Rico and extending the United States quarantine regulations to that country.

No. 10. An act to provide a government for the Territory of Hawaii. Approved April 30, 1900.

This act provided for the establishment of quarantine stations in the Territory of Hawaii and extended the quarantine regulations of the United States to that country.

No. 11. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1902. Approved March 3, 1901.

This act provided for the buildings for the Hygienic Laboratory, and for the investigation of infectious and contagious diseases and matters pertaining to the public health.

No. 12. An act to amend an act (approved Feb. 15, 1893) granting additional quarantine powers and imposing additional duties, and so forth. Approved March 3, 1901.

This act added three sections to the act of February 15, 1893, the first of which provided for the designation of boundaries of the quarantine grounds and anchorage, and provided a penalty for trespass thereon, provided punishment for false statements relative to the sanitary conditions of vessels, and so forth. The second additional section provided that any vessel sailing from any foreign port without a bill of health shall be subject to quarantine measures, and so forth. The third additional section clothed medical officers of the service with authority to act as quarantine officers, and while so serving to take declarations and administer oaths.

No. 13. An act to increase the efficiency and change the name of the United States Marine-Hospital Service. Approved July 1, 1902.

This act changed the name of the service; provided that the salaries and allowances of the commissioned medical officers shall be the same as provided by the regulations of the Marine-Hospital Service; created the grade of assistant surgeon general in the bureau; authorized the President to utilize the service in times of threatened or actual war; created an advisory board for the Hygienic Laboratory; authorized the appointment of competent persons to take charge of the various divisions of the Hygienic Laboratory; authorized conferences with State or Territorial boards of health with the service; authorized the collection of mortality, morbidity, and vital statistics; and authorized the President to prescribe rules for the conduct of the service.

No. 14. An act to regulate the sale of viruses, serums, toxins, and analogous products in the District of Columbia, to regulate interstate traffic in said articles, and so forth. Approved July 1, 1902.

No. 15. An act to regulate the immigration of aliens into the United States. Approved March 3, 1903.

This act provided that the physical and mental examination of all arriving aliens shall be made by medical officers of the service, and required that said officers shall have certain special qualifications.

No. 16. Public resolution No. 20. Joint resolution providing for the publication of the annual reports and bulletins of the Hygienic Laboratory and of the yellow-fever institute of the service. Approved February 24, 1905.

No. 17. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1905, and so forth. Approved March 3, 1905.

This act repealed the act of June 26, 1884, which made a permanent appropriation of the receipts for duties on tonnage for the expenses of maintaining the Marine-Hospital Service, and directed the preparation of annual estimates.

No. 18. An act to provide for the investigation of leprosy in Hawaii. Approved March 3, 1905.

This act provided for the establishment of leprosy investigation stations in Hawaii; for the detail or appointment of medical officers, pharmacists, and employees; and directed the preparation of regulations for the administrative government of said stations.

No. 19. An act to further protect the public health and make more effective the national quarantine. Approved June 19, 1906.

This act provided for the control, direction, and management of quarantine stations, and so forth; directed that such stations be established at suitable places on the coast line; and authorized the detention and disinfection of vessels and the treatment of sick in hospitals until all danger of infection and contagion had been removed.

No. 20. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1912. Approved March 4, 1911.

This act provided for the admission into marine hospitals for study of persons with infectious or other diseases affecting the public health.

No. 21. An act to change the name of the Public Health and Marine-Hospital Service, and so forth, approved August 14, 1907.

This act provides that the Public Health Service may study and investigate the diseases of men and conditions influencing the spread and propagation thereof, including sanitation and sewage and the pollution, either directly or indirectly, of the navigable streams and lakes of the United States, and it may from time to time issue information in the form of publications for the use of the public.

The sundry civil bill of 1914 appropriated $200,000 to carry out the provisions of this act.

No. 22. An act to provide for the construction of two revenue cutters, approved June 24, 1914, contained the following provision:

Provided, That, in the discretion of the Secretary of the Treasury, any of the revenue cutters provided for in this act, or any other revenue cutter now or hereafter in commission, may be used to extend medical and surgical aid to the crews of American vessels engaged in the deep-sea fisheries under such regulations as the Secretary of the Treasury may from time to time prescribe, and the said Secretary is hereby authorized to detail for duty on revenue cutters such surgeons and other persons of the Public Health Service as he may deem necessary.

An Executive order approved January 4, 1900, extended the quarantine laws and regulations of the United States to the Philippine Islands and directed that the same be administered by medical officers of the service.

An Executive order approved July 28, 1900, extended the quarantine laws and regulations of the United States to the ports of Cape Nome and Dutch Harbor, Alaska, and directed that medical officers of the service be detailed for the purpose of administering the same.

An Executive order approved February 28, 1906, directed the detail of sanitary boards for the purpose of making inspections of Government buildings.

I yield back the remainder of my time.

Mr. ADAMSON. I yield to the gentleman from Alabama [Mr. UNDERWOOD] such time as he wishes to use.

The CHAIRMAN. The gentleman from Alabama [Mr. UNDERWOOD] is recognized for such time as he wishes to use.

Mr. UNDERWOOD. Mr. Chairman, I am in favor of this bill, because I believe it is an absolutely just measure. This is not the time to increase largely public expenditures, and there are many bills that might come before this House at some other

time that I would then favor, which if they made great charges upon the Public Treasury at this time I would not vote for, if they should come before the House. But this bill is not in that category. The total increased expenditures proposed by this bill amount to $49,000. That is the beginning and the end of it. The sole reason for the bill is to put a lot of deserving men on an equality with other deserving men in the Federal service.

Mr. McLAUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. UNDERWOOD. Yes.

Mr. McLAUGHLIN. Will the gentleman tell us why these men are more deserving than the employees of the Agricultural Department?

Mr. UNDERWOOD. Yes; I can tell the gentleman a good many reasons why they are more deserving. These men in their work take their lives in their hands. They are battling for humanity. [Applause.] I do not mean to reflect on the civil-service employees of this Government, but most of them are battling for themselves. We have fixed a status for Army and Navy surgeons, in reference to pay, commutation for quarters, and other incidentals. Now, we have some inefficient men in both the Army and the Naval service, but most of the men who are Army doctors and Navy doctors are not only efficient, but they are men of splendid ability, and the pay that they receive from the Government of the United States is not at all commensurate with the compensation they would receive if they practiced their profession in private life.

Now, the men, at least in the Army, have an honor compensation as well as a pay compensation, because in the Army they carry the actual rank of an Army officer. I believe that is not true of the Navy, and it is not true of this Public Health Service. Here are men in this Public Health Service who have stood as a barrier against disease when it was about to attack the people of the United States in times of epidemic. My people in the Southland owe more to these men in the Public Health Service of the United States than to any other branch of the service that I know of. When I was a boy it was not an unusual thing to see epidemics of yellow fever roll up from the Gulf coast into the Southland, at the cost of thousands of lives and to the disturbance of our entire business conditions. I have seen a shotgun quarantine against yellow fever in Alabama from one end of the State to the other, when trains had to go through the State with the windows down and the doors locked. In those times this little body of men in the Public Health Service were the men who went to the front. They were the men who were on the firing line. They were the men who protected the lives of the people, not against a foreign enemy, but against an insidious foe. You provide for an Army and Navy to protect you against the possibilities of war in the future, which may never come, and with God's help I hope the people of this country will never have to call upon the Army and Navy in the future to protect us against a foreign foe. [Applause.] But these men of this Public Health Service are called on to protect the body politic against an insidious foe that is at our door every day and every night. No man here can tell when an epidemic of smallpox or some other serious disease may break out in his congressional district, and then it will be this Public Health Service that will come to the rescue and risk their lives to protect the people. Why, officers in this service have died in recent years in the discharge of their duty.

Now, all this bill asks is that you give these men the same compensation for quarters and for other incidentals of that kind that you give to the Army and Navy. You give it to some of them now, if they happen to be stationed where the Government has quarters, but if they are ordered to a station where there are no quarters—and that is what happens when they are ordered to some place on the firing line, where there is an epidemic—you not only want them to sacrifice their quarters, but you want them to be at an additional expense in renting quarters when you order them out on the firing line.

Mr. HARDY. Will the gentleman yield for a question?

Mr. UNDERWOOD. I will.

Mr. HARDY. In my State it is very frequently the case that smallpox finds a lodgment in some little section of my county or of my district. The county physician is under a special obligation to look after that. He does it, and the position of county physician is very much sought after. It is not supposed to be very dangerous, nevertheless it may have that element of danger. What I wish to know is, Will all these county officials be on the pay roll of the Government in case they treat patients?

Mr. UNDERWOOD. Not at all; they are not in the service. They are mere volunteers, but these men spend their entire lives in the service.

Mr. HARDY. Will the Government undertake to utilize these men?

Mr. UNDERWOOD. Let me give the gentleman an instance. Many years ago, when Dr. Wyman was at the head of the service, we had an epidemic of smallpox in my own district. It was a mining district. A large number of employees, many of them negroes, who are hard to control, were in the mines. Our doctors in that district, able, successful men in private practice, men who of necessity could not devote all of their time to this work, battled with it for a number of months, until the epidemic became so great that it was threatening the whole section of the State. Then it was that, at my request, the Public Health Service—it was known by a different name at that time—sent their officers there, organized the forces, brought about compulsory vaccination, and perfected an organization that drove the smallpox out of that community; and it never has been there since. That was a great service.

Mr. HARDY. Why should these men who perform the work for the United States have a pension any more than the local men?

Mr. UNDERWOOD. The gentleman misunderstands the scope of this bill. This is not a pension bill. The whole thing in this bill is this: These men are in the employ of the Federal Government as surgeons and assistant surgeons of the Public Health Department. They have a definite duty to perform, just exactly as the surgeon in the Army and the surgeon in the Navy have their duties to perform. Their business is to make investigations to protect the public health.

Mr. HARDY. The reason I asked the question is because the gentleman spoke of putting them in the same line as the Army and the Navy, and I supposed that it was a proposition for pension, with other things.

Mr. UNDERWOOD. This has nothing to do with direct pay or retirement pay of these officers; that is in the law now, although I do not know exactly what the provisions are. But the Army and Navy surgeons are given compensation for quarters in places where the Government has not quarters. This bill, in the main, is to give these men in this Public Health Service the same compensation for quarters, a house to live in, that is given to the surgeons in the Army and the surgeons in the Navy, and even given to the men in the Revenue-Cutter Service.

Mr. SHERWOOD. Will the gentleman yield?

Mr. UNDERWOOD. I will.

Mr. SHERWOOD. In the State of Ohio we have a State board of public health, and in all the municipalities we have local boards of public health. What is the necessity for duplicating this work? Is it because they have superior experience?

Mr. UNDERWOOD. That goes to the question of the organization of the service and not to this bill. The reason is that these men make it their business, their entire business, to study questions of epidemics, to make investigations and be prepared to meet these questions, and that is the policy of the Government now. It is not a question of whether you will adopt a new service.

Mr. SHERWOOD. The members of the health departments in the State of Ohio, both State and municipal, devote all their time to the business.

Mr. UNDERWOOD. I will say that under our quarantine system—of course, the gentleman from Ohio does not come in contact with that—the Federal Government now has entire control of the quarantine system. At one time the State divided with the Government that control, but that quarantine control is under this Public Health Service, and although yellow fever might never come into the State of Ohio and threaten the constituents of my friend I will say to him that whenever yellow fever comes into the South and threatens the constituents that I represent, the business interests of Ohio are as badly affected by it almost as the business interests of my State, because it stops the wheels of commerce. These men stand guardians over the public health at the frontier and protect the lives of our people, and they protect against the disturbances of business conditions that always follow epidemics in this country. I believe that this Public Health Service is one of the most important services in the whole organization of our Government.

But that is not the question here. The question here is whether you will do equal justice by these men with the Army and the Navy surgeons.

Mr. CALLAWAY. Will the gentleman yield?

Mr. UNDERWOOD. Yes.

Mr. CALLAWAY. Does the gentleman think that these men are on a parity with the officers of the Army and the Navy who have to move about from place to place where there are no facilities, while these people are located here?

Mr. UNDERWOOD. My friend from Texas is mistaken.

Mr. CALLAWAY. There is another provision——

Mr. UNDERWOOD. Will the gentleman let me answer his question?

Mr. CALLAWAY. Let me put the whole question. There is another provision where it says the salary shall be increased 10 per cent when in active duty outside of the limits of the United States or on the seas.

Mr. UNDERWOOD. I understand that provision relates only to when the surgeon is ordered to some place outside of the United States for investigation. That same provision applies to the Army and the Navy; there is no difference. They are not located in Washington. The headquarters are here, but they are located in various parts of the United States.

Mr. CALLAWAY. Are not quarters provided under the present law?

Mr. UNDERWOOD. There are quarters provided, but no commutation for quarters. As I understand it—and I hope the chairman will correct me if I make a mistake—as I understand it there are quarters provided for them at some places like quarters for an Army surgeon when he goes to a fort in Texas or Alabama. But when they are moved to a point where their work requires them to go, where there are no quarters, then they lose their quarters and get no compensation for it.

When you order an Army or a Navy surgeon to a place where there are not quarters provided he gets compensation in lieu of quarters. The place where these men are most efficient, where they render the best service, where they accomplish the most good, is when we order them to a point where there are no quarters established, because they go there to meet epidemic conditions, and under the present law as it stands to-day you would penalize them because you order them on the firing line.

Mr. CALLAWAY. Is it not a fact whenever they go to places like that their expenses are all paid?

Mr. UNDERWOOD. Not for quarters, not for rent.

Mr. CALLAWAY. When they go to a place like that their expenses include hotel expenses; and that is necessarily quarters, is it not?

Mr. UNDERWOOD. Not necessarily. If they went for a few days, it would cover it, but most of the places they go it takes time; at most of the places to which they go to battle with disease they stay six months or a year; stay there permanently; and he will not have his hotel bill paid.

Mr. CALLAWAY. Is it not usually the condition that they are called to those places for days only?

Mr. UNDERWOOD. Oh, no.

Mr. BARTLETT. They were in New Orleans for eight months.

Mr. UNDERWOOD. Very often they are ordered at the outbreak of an epidemic, like I cited in Birmingham, and it took five or six months before they could get the epidemic in hand.

Mr. CALLAWAY. I do not know what the rents are in Alabama, but I see in here it is $12 a room for six rooms. A man might be at a great many places where there are epidemics where they would not expend any such amount as that; some places it would possibly be greater.

Mr. UNDERWOOD. I do not know anything about what they pay for rent here or there. The idea is that we feel that they should have equal compensation for quarters that we give to the Army and Navy surgeons. Now, without reflecting in any way upon the great services of the gentlemen who serve in the Army and the Navy, I think these men stand as their peers in the service that they have rendered the country and in the ability that they have brought to the service.

Mr. CALLAWAY. There is no question about that; but I can not understand why we should prize up one salary by saying some other man is getting that same salary.

Mr. UNDERWOOD. Here is the whole thing in a nutshell, although I do not want to occupy all the time of my friend, because he has to yield to other people; but the whole thing in the last analysis is this: That you have got capable, competent, scientific men who serve in this service for a lifetime. Men of the same class and ability in private life receive a great deal more compensation. If we want to keep efficient, capable men in the service, we have to give them fair and reasonable compensation or they will leave it and take up their practice in private life. Now, I believe that these men are not overpaid. I believe they are underpaid for the service which they render the Government. I believe there is no service in the United States that is more important to the people of the United States, and especially to the people from my part of the country, where we have epidemics; and these men stand at the outer guard of our country to protect our people, and to say that $49,000 is a matter we should hesitate to appropriate to do justice to such people I say is begging the question of economy.

Mr. CALLAWAY. There is one further question I desire to ask. I see in section 2 the following:

SEC. 2. That the term of office of the Surgeon General shall be for a period of four years, at the expiration of which term he shall, unless reappointed, be carried as an extra officer in the grade of senior surgeon. Assistant surgeons shall be promoted to the grade of passed assistant surgeon in the order of seniority at the expiration of three years' commissioned service and after satisfactory examination.

Would not that have the effect of just interminably increasing this list?

Mr. UNDERWOOD. Well, now, I will tell the gentleman that that is in the interest of economy, if I understand it. I asked the chairman because he is better informed than I am, and I do not want to make a statement which I can not justify, and I will ask the chairman to correct me if I am wrong. Under the law to-day these surgeons are capable of retirement——

Mr. ADAMSON. I explained that when I was on the floor. At present the Surgeon General when he goes out of office would go out of the service, and can not be retained in the service, no matter how useful. Under the provisions of this bill he simply is sent back to the grade of senior surgeon and works as long as he is able in that grade, without any increased pay.

Mr. UNDERWOOD. He goes back and works without any increased pay instead of going on the retired list, like he would in the Army and Navy, at three-fourths pay.

Mr. ADAMSON. It is a decrease.

Mr. UNDERWOOD. In fact, he gets a decrease when he leaves the Surgeon General's office. I can see no objection to that provision whatever. I think I have stated my views in reference to the bill, and I sincerely hope it will pass. I yield back the balance of my time. [Applause.]

Mr. ADAMSON. Mr. Chairman, how does the time stand?

The CHAIRMAN. The gentleman has 10 minutes.

Mr. ADAMSON. How much on the other side?

The CHAIRMAN. Fifteen.

Mr. ADAMSON. Will the gentleman use some time?

Mr. MANN. Mr. Chairman, I am willing to waive my time, and I will waive it, but before doing that I desire to yield to the gentleman from Oklahoma [Mr. MCGUIRE] such time as he may desire.

Mr. McGUIRE of Oklahoma. Mr. Chairman, I ask leave to extend my remarks in the RECORD by inserting in the RECORD a letter which I received from Mr. C. C. McCollum, of Pawnee, Okla., and other documents accompanying the letter, not of very great length—in fact, very brief—but a comprehensive view of the situation in the Philippines as bearing upon the capability of the Filipino people.

Mr. McCollum is a very capable gentleman and served four years in the Philippines, and his observations are interesting, fair, and comprehensive, and will no doubt be of great service to the House in determining the future policy of the Philippines.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MCGUIRE] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. MANN. Mr. Chairman, I will waive the balance of my time.

Mr. GARRETT of Tennessee. I will ask the gentleman from Oklahoma how much is there of that?

Mr. McGUIRE of Oklahoma. It will take only a few pages of the RECORD.

Mr. ADAMSON. I do not object. Oh, I beg the pardon of the gentleman from Tennessee. I did not hear him.

Mr. GARRETT of Tennessee. Is it argumentative on the Philippine question?

Mr. McGUIRE of Oklahoma. No; it is a statement of facts. It is absolutely fair.

Mr. GARRETT of Tennessee. I just wanted to know what it was. I have no objection.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. ADAMSON. Mr. Chairman, I will ask the gentleman from Illinois [Mr. MANN], who is going to waive his time, if he will yield it to me in the event I should want it? I yielded a good deal of my time to gentlemen on the other side, and some of my time was taken up in interruptions.

Mr. MANN. I will yield to the gentleman the balance of my time, Mr. Chairman.

Mr. ADAMSON. If the gentleman will yield to me all of his time, I will use only such of it as I need.

The CHAIRMAN. The gentleman from Georgia is recognized. The gentleman from Illinois yields to the gentleman from Georgia his time.

Mr. ADAMSON. Mr. Chairman, I wish to console my good friend from Wisconsin [Mr. STAFFORD], who takes the position that when he was on our committee we did everything that needed doing by rounding up everything that was proper to be done. I assure him that there still remained a good deal to do, and while we greatly deplore the gentleman's absence from the committee, we are still limping along and are trying as best we can to take care of matters that are committed to our keeping. We feel our responsibility, and we are constrained to ask for the necessary measures to keep them alive.

I also wish to state to the gentleman from Wisconsin that I can prove by the word of the gentleman from Illinois [Mr. MANN], the distinguished Republican leader, that we are still doing business at the old stand, for he has on this floor many times commended us during the present Congress.

I also deplore the fact that in our weakness none of us is able to explain a bill but the gentleman from Illinois, because he always begins his speeches by saying that nobody has explained a bill, but he will now proceed to do it. [Laughter.] But there are two or three compensating considerations in connection with that. In the first place we do not have to accept the explanations of the gentleman from Illinois. In the second place, although the gentleman from Illinois knows more than any other man that ever was in the world and can use more of his knowledge and can touch it off on a hair trigger at the same time, he is sometimes forgetful, though he sometimes is absolutely correct in his statements and indorses what is good in our bill. For instance, he indorsed the latter part of the bill providing for these experts to attend to these particular duties made necessary by the act of 1912.

That leaves only three other things that he objected to. He objected to this commutation of lodgings, and he objected to the baggage, and he objected to one other thing in the bill. I do not remember just what that was. But the gentleman also failed to remember the old bill which he introduced and passed through the House. He and I disagreed in recollection about it.

It also affords the House the further consolation of knowing that we have not done as the gentleman from Missouri [Mr. BORLAND] says—commenced to increase salaries during this war period—but we have the advantage of the precedent set by the great genius and judgment of the mind of the great man of Illinois four years ago for this legislation. I will ask the Clerk to read the two paragraphs marked "1" and "2," and I will ask the gentlemen here to take the present bill and compare it with what is read, and they will see that, appealing from the gentleman from Illinois to-day to the gentleman from Illinois four years ago, we have got him on our side, and have got him going. [Laughter.] You remember he denied ever having supported increase of salaries.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 9. That hereafter the salaries of commissioned medical officers of the Public Health Service shall be as follows: Surgeon General, $6,000; assistant surgeon generals, $4,000; medical directors on active duty, 10 in number, $3,500; surgeons, $3,000; passed assistant surgeons, $2,500; assistant surgeons, $2,000. Said officers, except the Surgeon General, shall receive an additional compensation of 10 per cent of the annual salary for each five years' service, not to exceed 40 per cent: *Provided*, That the total salary of an assistant surgeon general shall not exceed $5,000; that of a medical director, $4,500; and that of a surgeon, $4,000. When officers on active duty are not provided quarters they shall receive in lieu of same commutation therefor at the rate of $12 per room per month, as follows: Surgeon General, 8 rooms; assistant surgeon general, 7 rooms; medical director, 6 rooms; surgeon, 5 rooms; passed assistant surgeon, 4 rooms; assistant surgeon, 3 rooms; and commutation for necessary fuel and lights for the same at rates to be fixed by the Secretary of the Treasury: *Provided*, That officers while serving outside the boundaries of the continental United States shall receive an additional 10 per cent of their salaries while on such duty. The allowance for baggage and personal effects to an officer in changing stations shall be fixed by the Secretary of the Treasury, not to exceed in any case 7,200 pounds.

Mr. ADAMSON. Mr. Chairman, that incident of the lapse of memory on the part of the gentleman from Illinois also shows the difference between responsibility and the lack of responsibility. The gentleman from Illinois was chairman of the committee at the time he introduced and passed that bill, and as such was responsible to the country for the good of this service. When we passed the last bill two years later he was not chairman of that committee, but was the leader of the minority, and as leader of the minority he was startling the world and troubling the majority of this House by the most remarkable and interesting stunts as an objector that were ever seen in the world. [Laughter.]

Now, these gentlemen who are great economists are just like the gentleman from Illinois was. He has ceased to be chairman of the committee, and he not only did not reintroduce his bill with those things in it but he forgets about it, forgets that he had ever done it at all and that he had ever voted for a bill to increase salaries, although it was in his bill at the last Congress and in the one which passed.

But, Mr. Chairman, as I say, it is the difference between responsibility for the institutions and otherwise. These gentlemen who are kicking about economy are not responsible for these institutions. These gentlemen who are so particular about the $50,000 increase to protect the country against the ravages of dread disease would not be responsible for it, but we on this committee are responsible for looking after the interests of these institutions, and we try to do it without favor or affection.

We do not even try to talk about lobbying. If these people do not afford us the information we want, we summon them and ask them for the information; and if the time ever comes when any gentleman who talks about lobbying does not hold his ear open to the representations of all American citizens, official or otherwise, no matter what his business may be, it will be a bad day for the Republic. Away with the idea that getting information from the people is lobbying! This committee tries to do its duty. It tries to see what is needed by the institutions under its jurisdiction, and it brings in bills for their support. They were not initiated since the war abroad. They were instituted months—and one of them a year—before war broke out in Europe. But even if that were so, they ought to be done, because in times of disturbance and of upheaval and great danger it is of more importance that we should guard the avenues by which diseases may come into the country. [Applause.] Our law two years ago imposing this additional work on these people was necessarily followed by this bill to provide additional assistance and additional compensation to the men who do the work.

Mr. Chairman, I ask for the reading of the bill. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That hereafter when commissioned medical officers of the Public Health Service on the active list are not provided quarters they shall receive in lieu of same commutation therefor at the rate of $12 per room per month, as follows: Surgeon General, six rooms; assistant surgeon general, six rooms; senior surgeon, five rooms; surgeon, five rooms; passed assistant surgeon, four rooms; assistant surgeon, three rooms; and shall receive commutation for necessary fuel and lights for the same at rates to be fixed by the Secretary of the Treasury: *Provided*, That officers while serving beyond the continental limits of the United States or on sea duty shall receive an additional 10 per cent of their salaries and increase while on such duty.

The allowance for baggage and personal effects to an officer in changing stations shall be fixed by the Secretary of the Treasury, not to exceed in any case 7,200 pounds.

Mr. BORLAND. I move to amend by striking out the enacting clause of the bill.

The CHAIRMAN. The gentleman from Missouri offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend the bill by striking out the enacting clause.

Mr. BORLAND. Mr. Chairman, we might as well dispose of this bill without the necessity of piecemeal amendment or further discussion of it. If the House is in favor of entering upon this new plan of providing commutation of quarters to men who are performing some civil function, this is possibly a good place to start; and a great deal can be said in favor of the fine character of the work these gentlemen are doing and its importance to the people of the country. I concede that a great deal can be said along that line, and practically all the speeches have been taken up with that. Those that have not been taken up with that line of argument have been devoted to the other equally fallacious argument, in my opinion, that these gentlemen are losing some of the good things that other gentlemen are getting. Every man who has served on any committee making appropriations for the public service has been met with that argument time and time again, that some set of men in the public service are getting more advantages than some other set of men in the public service are getting. There is no greater difficulty than that in the way of Members who would make economical appropriations.

Mr. FIELDS. Will the gentleman from Missouri yield?

Mr. BORLAND. I yield to the gentleman.

Mr. FIELDS. Does not the gentleman believe that some men who are in the public service are getting too many advantages?

Mr. BORLAND. Certainly. I believe if we want to practice economy, one way is to reduce the advantages which some men are getting.

Mr. FIELDS. I heartily agree with the gentleman in that.

Mr. CALLAWAY. Is not that the lever that they use to prize up salaries and allowances in every department of the Government?

Mr. BORLAND. Yes; and if we pass this it will be a lever for a great many other gentlemen who think highly of their own services and who will come in and make a strong argument based on that ground.

Mr. CALLAWAY. Has anybody intimated that any of these men are going to quit the service on account of the insufficiency of what they receive?

Mr. BORLAND. Somebody has intimated that they were going to quit the service; but I think they will quit just the same if they are men who are worth so much more than they are getting here. But that argument has been used also by men in every branch of the public service, that they were underpaid. I am going to concede that that is true, but that is another fallacious argument for increasing salaries all along the line.

Mr. CALLAWAY. That is the same argument that is used by these fellows that are sitting in the departments down yonder, some of whom can not do anything at all, is it not?

Mr. BORLAND. You can not begin to practice economy and efficiency in the public service as long as you make flesh of one and fish of the other. We can not take one branch of the public service and say, "These gentlemen take their lives in their hands, and they are indispensible, and nobody else stands on a footing with them." We can not do that. We can not discriminate among public servants in that way.

I concede that these men are very valuable, and that they could earn more money elsewhere; but other men in the public service think the same thing about their own work, and other men in the public service are just as devoted to their work as these men are to their branch of the service. I do not think that is an argument for putting them up on a pedestal and extending to them advantages that we are not willing to extend to others. If there is any merit at all in this argument of discrimination, the best way to remedy it, as the gentleman from Kentucky [Mr. FIELDS] has suggested, is to take away the special privileges from those who enjoy them, who ought to be on the same footing as these men who do not enjoy them. That is the only way to economize, and if you gentlemen believe in economy and believe that the Public Treasury is not now adequate to meet all of the demands that we think ought to be made upon it, the thing to do is to strike out the enacting clause of this bill and settle the thing right now. [Applause.]

Mr. STEVENS of Minnesota. Mr. Chairman, I believe the committee desires and is entitled to know the reason why some of us support this measure, and why we believe it to be genuinely for the public interest. If the only basis for its enactment be, as has been argued here, that it will place one part of the public service upon an equality with other similar divisions of the public service, I would not vote for it. That is not a good reason for the increase of any public expenditure. I shall vote for it only because I believe it will be in the interest of true national economy and true national welfare, and because it is necessary to preserve the usefulness of a most important public service. The reason for such belief is this: The officers of the Public Health Service perform a more dangerous service for their country than do similar officers in the Army and the Navy. It is more important for the public and grows increasingly. We know that there are two classes of public duties with which this Public Health Service is particularly charged. The first is that of quarantine and supervision in our foreign commerce, and the second concerns the health activities of our people in our domestic commerce. It has been stated to you, and every man on this floor knows, that a pestilence coming within our borders in our foreign commerce is more devastating, and causes more loss of life and loss of property and loss in commerce than anybody can calculate; and if there is any governmental activity which ought to be made of national importance it is a public health service that will stop pestilence at the very door of its entrance into this country. The importance of duty and responsibility can not be measured as a matter of expense.

There is another public activity, and that is the conserving the welfare of our people in our domestic commerce and in our domestic activities. The commerce between our States and along our lakes and rivers is of tremendous importance to the welfare of our people and the development of our country. With the advance of civilization and the increase of population, there is a constant increase of danger of disease, so that the health of our country should be more and more guarded every day. Controversies and quarrels in various sections arise over the pollution of streams, over the suppression of infectious and contagious diseases, and their communication from one part of our country to another. In every session of Congress with which I have been acquainted, the Congress has added to the duties and work of this bureau. The gentleman from California spoke of the care of travel, of the fumigating of railroad cars. That duty was added to the work of this Public Health Service, I think, during the last Congress. The work of caring for pollution of our streams, of our navigable waters, of coordinating and leading the various activities of our country, has been placed in this bureau.

Controversies over these troublesome subjects frequently arise between States and different localities which have to be composed, and can be easiest composed, by the National Government. The people of this Government believe in the honesty, ability, and the integrity of the Public Health Service. The Treasury Department, at the requests of Senators and Representatives, often send their officers to different parts of the country to compose these important differences. We had a controversy on the Mississippi River which was of difficulty. It was only settled by sending there officials of the Public Health Service to confer and advise. People yield to their opinions and judgment and submit to what the public-health officials state should be done. Such work of this service is increasing, must increase of necessity, and its importance for the welfare of our people must be appreciated. Its leadership in the way of research as to disease and its care and amelioration has been fully described.

The result is that this service requires the very best skill which can be obtained. It needs, for the benefit of our people, the very best men; it needs the very best service from these men; it needs the very best equipment that can be obtained and maintained. The work of this service is more dangerous and more important than the corresponding work in the Army and the Navy. If you pay the corresponding officials of the Army and the Navy more, if you give them a larger salary, if you give them greater allowances, if you give them better pay, these officials will leave this service and go into the easier and better service. That must be expected and will sure come about. The result is that the health of the people is not cared for as it should be. We are liable to have in this important work inefficient men, or men not as well qualified as are the other services or as necessary for our people. For that reason I believe it is necessary to keep these men who are now guarding the health of the people. When we get good men let us keep them and utilize their services and not allow them to be induced to leave for private practice or for services with better opportunities. The House can not afford to take chances upon such a very important subject. For that reason I supported this bill, and I believe that it is necessary that it should be passed. [Applause.]

Mr. MANN. Mr. Chairman, a few moments ago my genial friend from Georgia [Mr. ADAMSON], the chairman of the great Committee on Interstate and Foreign Commerce, produced and had read from the Clerk's desk a bill introduced by me in a former Congress when I was chairman of that committee. I introduced such a bill, and I would like to ask my friend from Georgia if it was ever favorably reported.

Mr. ADAMSON. My recollection is that it came to the House and was passed by the House.

Mr. MANN. Oh, the gentleman had read a copy of a bill introduced, because it was the only copy he could find. I introduced such a bill, but it was not reported. There is not a chairman of a committee who does not introduce a bill prepared by the bureau or department connected with the legislative jurisdiction of this committee without reading it, because it is so much more convenient to read it after it is in print than it is before. That was my custom. But I never favored such a bill, and I do not now.

I join in everything that has been said with reference to the value and importance of the Public Health Service, but that is no reason why these same men who fixed their own salaries prior to 1902, then obtained congressional sanction in fixing those salaries at the same amount that they had fixed them, and then in 1912 obtained an increase in their salaries of from $500 to $1,000 per man—that is no reason why we should now, under the guise of furnishing them heat and light, make another increase in these salaries. There will not be a single man in the Public Health Service who will leave because this bill is defeated, if it be defeated; there will not be a single man remain in the service because the bill is passed, if it be passed.

These people of the Public Health Service are good men; they have been well treated. Why do not they quit their importunings for increased pay? It is time they did.

Mr. SHERWOOD. Will the gentleman yield?

Mr. MANN. Yes.

Mr. SHERWOOD. What is the salary of these men now?

Mr. MANN. It ranges from $6,000 down to $2,000. The man enters the service at $2,000 and allowances, and during his service he gets foggy pay, and it runs up to $6,000, besides allowances. Four or five thousand dollars salary for life is not so

bad. There is not a man in the Hall of this House who enjoys a perpetual salary of $4,000 a year. I doubt whether many of them will receive that salary for the balance of their lives, and I hope they will all live long and happily. [Applause.]

The CHAIRMAN. The question is on the motion of the gentleman from Missouri, to strike out the enacting clause.

The question was taken; and on a division (demanded by Mr. ADAMSON) there were—ayes 72, noes 50.

Mr. ADAMSON. Mr. Chairman, I demand tellers.

Tellers were ordered; and the Chair appointed as tellers Mr. ADAMSON and Mr. BORLAND.

The committee again divided; and the tellers reported that there were 78 ayes and 56 noes.

So the motion was agreed to.

Mr. ADAMSON. Mr. Chairman, I move that the committee rise and report the bill to the House with the recommendation that the enacting clause be stricken out.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. BARNHART, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 2616) to promote the efficiency of the Public Health Service, and had directed him to report the same back to the House with the recommendation that the enacting clause be stricken out.

Mr. ADAMSON. Mr. Speaker, I move the previous question on the bill to final defeat or passage.

The SPEAKER. The gentleman from Georgia moves the previous question on the bill.

The question was taken, and the previous question was ordered.

The SPEAKER. The question is on agreeing to the recommendation of the committee.

Mr. ADAMSON. On that, Mr. Speaker, I move the previous question.

The SPEAKER. Of course the Chair understands that, but the practice has been as a matter of fact, because it is not five minutes since the Chair looked it up——

Mr. BORLAND. Mr. Speaker, I move to concur in the committee amendment.

The SPEAKER. That has been the practice, and on that the gentleman from Georgia [Mr. ADAMSON] moves the previous question.

Mr. ADAMSON. Mr. Speaker, I would like for the Chair to put the question so as to have an automatic call of the House.

The SPEAKER. That is exactly what the Chair is going to do if the gentleman will give him a chance.

Mr. ADAMSON. I want to give the Chair a chance.

The question was taken, and the previous question was ordered.

The SPEAKER. The question is on agreeing to the report of the committee to strike out the enacting clause of this bill.

The question was taken, and the Speaker announced the noes seemed to have it.

Mr. BORLAND. A division, Mr. Speaker.

The House divided; and there were—ayes 82, noes 61.

Mr. ADAMSON. Mr. Speaker, does it have the same effect to make the point of no quorum or to demand a roll call?

The SPEAKER. It has.

Mr. ADAMSON. I want to make it.

The SPEAKER. Which one does the gentleman want to do?

Mr. ADAMSON. I make the point of order of no quorum present.

The SPEAKER. The Chair will count. [After counting.] One hundred and fifty-seven gentlemen are present—not a quorum. The Doorkeeper will lock the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 171, nays 132, answered "present" 1, not voting 120, as follows:

So the report of the committee was adopted.

The Clerk announced the following pairs:

Until further notice:

Mr. GARRETT of Texas with Mr. BRITTEN.

Mr. GLASS with Mr. SLEMP.

Mr. WHITE with Mr. SELLS.

Mr. METZ with Mr. BARCHFELD.

Mr. SUMNERS with Mr. TOWNER.

Mr. TALBOTT of Maryland with Mr. PLUMLEY.

Mr. TAYLOR of Alabama with Mr. ROBERTS of Massachusetts.

Mr. BOOHER with Mr. AINEY.

Mr. IGOE with Mr. EDMONDS.

Mr. MAHER with Mr. GRAHAM of Pennsylvania.

Mr. OGLESBY with Mr. GRIEST.

Mr. PRICE with Mr. GREEN of Iowa.

Mr. RAINEY with Mr. HOWELL.

Mr. RUCKER with Mr. MOORE.
Mr. GOLDFOGLE with Mr. SHREVE.
Mr. WILSON of Florida with Mr. DUNN.
Mr. GRAHAM of Illinois with Mr. SLOAN.
Mr. BATHRICK with Mr. MORIN.
Mr. CARTER with Mr. ROBERTS of Nevada.
Mr. DALE with Mr. NELSON.
Mr. DRISCOLL with Mr. ANDERSON.
Mr. EVANS with Mr. BARTHOLDT.
Mr. BROWN of West Virginia with Mr. KENNEDY of Rhode Island.
Mr. CLARK of Florida with Mr. ANTHONY.
Mr. COADY with Mr. AVIS.
Mr. DONOHOE with Mr. BURKE of Pennsylvania.
Mr. DOOLING with Mr. CARY.
Mr. EDWARDS with Mr. COPLEY.
Mr. FERRIS with Mr. DAVIS.
Mr. GEORGE with Mr. FREAR.
Mr. GODWIN of North Carolina with Mr. HAMILTON of Michigan.
Mr. HAMILL with Mr. KAHN.
Mr. HENRY with Mr. KIESS of Pennsylvania.
Mr. JONES with Mr. HUGHES of West Virginia.
Mr. KEY of Ohio with Mr. HELGESEN.
Mr. LINTHICUM with Mr. MILLER.
Mr. LOFT with Mr. MOTT.
Mr. RAUCH with Mr. LANGHAM.
Mr. SPARKMAN with Mr. PETERS.
Mr. STEPHENS of Nebraska with Mr. PROUTY.
For the session:
Mr. SCULLY with Mr. BROWNING.

Mr. BROWNING. Mr. Speaker, I voted "yea." I have a general pair with my colleague, Mr. SCULLY, and I wish to withdraw my vote and be recorded as "present."

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. BROWNING, and he answered "Present."

The result of the vote was announced as above recorded.

On motion of Mr. BORLAND, a motion to reconsider the vote by which the report of the Committee of the Whole was adopted was laid on the table.

CALUMET RIVER, ILL.

Mr. ADAMSON. Mr. Speaker, I call up House bill 18745, in relation to the location of a navigable channel of the Calumet River in Illinois. It is House Calendar No. 229.

The SPEAKER. The Clerk will report it.

The Clerk read the title of the bill.

Mr. ADAMSON. Mr. Speaker, I will ask the gentleman from Illinois [Mr. MANN] if he cares to have the preamble read, or just the bill?

Mr. MANN. I think it all ought to be read.

Mr. ADAMSON. Then let the Clerk read it all.

The Clerk read as follows:

A bill (H. R. 18745) in relation to the location of a navigable channel of the Calumet River in Illinois.

Whereas by deeds dated May 4, 1887, and recorded in the recorder's office of Cook County, Ill., on April 6, 1889, in book 2497 of records, at page 219, and on April 8, 1889, in book 2481 of records, at page 271, respectively, the owners of the north quarter of fractional section 7, township 37 north, range 15 east of the third principal meridian, south of the Indian boundary line in Cook County, Ill., gave and granted unto the United States of America free and unobstructed right of way in and through the above-described ground 200 feet in width for purposes of a channel for the Calumet River, in accordance with the provisions of the act of Congress approved July 5, 1884, and in order to enable the United States to straighten the channel of the said Calumet River and conform to a survey and realinement of the channel lines of said river as adopted, established, and shown by plat approved by the Chief of Engineers of the United States Army and filed for record in the office of the recorder of deeds of Cook County, Ill., on the 17th day of May, 1889, as Document No. 1102284, entitled "Map of the Calumet River, Ill., from Lake Michigan to Calumet Lake, to accompany report of W. G. Ewing, United States attorney, to the Attorney General, respecting cession of right of way for improvement of said river, under act of Congress approved July 5, 1884" (report dated Jan. 24, 1888, and report dated Feb. 12, 1889. William G. Ewing, United States attorney, northern district of Illinois); and

Whereas it is provided in the said deeds above referred to that "the shore or dock lines of said river as so established and shown on said plat shall hereafter for all purposes be taken as the true meandered lines of said stream"; and

Whereas a navigable channel has been cut through said north quarter of said fractional section 7 within the new channel lines of the Calumet River as shown on said map: Therefore

Be it enacted, etc., That the portion of the old channel of the Calumet River in the north quarter of fractional section 7, township 37 north, range 15 east, of the third principal meridian, south of the Indiana boundary line, in Cook County, Ill., which lies outside of the new channel lines as established by the United States and shown on "Map of the Calumet River, Ill., from Lake Michigan to Calumet Lake, to accompany report of W. G. Ewing, United States attorney, to the Attorney General, respecting cession of right of way for improvement of said river, under act of Congress approved July 5, 1884," is hereby abandoned as navigable water.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 5614. An act for the improvement of the foreign service.

WITHDRAWAL OF PAPERS.

Mr. GILLETT, by unanimous consent, was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of H. R. 1139, Sixty-third Congress, granting a pension to Mark K. Bell, no adverse report having been made thereon.

CALUMET RIVER, ILL.

Mr. ADAMSON. Mr. Speaker, the author of this bill is the gentleman from Illinois [Mr. MANN], and I wish to yield to him such time as he may desire. The gentleman from Illinois [Mr. FOSTER] requested five minutes' time, not on the bill, however, and I ask unanimous consent that he be allowed to speak on any subject he chooses for five minutes.

The SPEAKER. The gentleman from Georgia [Mr. ADAMSON] asks unanimous consent that the gentleman from Illinois [Mr. FOSTER] be permitted to address the House for five minutes out of the time of the gentleman from Georgia. Is there objection?

There was no objection.

Mr. FOSTER. Mr. Speaker, a year or two ago there was organized the National Radium Institute. Dr. Howard Kelly, of Baltimore, was elected president, and is still president of the institute. Leases were obtained on carnotite mines in Colorado, from which they are to take out 1,000 tons of ore, and the radium is to be extracted under the supervision of the Bureau of Mines.

Some time ago it was said before the Committee on Mines and Mining by certain gentlemen who were interested in the business of extracting radium from the ore that the Government would never be able to succeed in its undertaking; that they had no process known for extracting radium that they would be able to demonstrate was successful.

I am pleased to-day to say to the Members of the House that under the process which has been put into operation by the Bureau of Mines they have been able to extract the radium from the ore [applause], and I have here a letter from Dr. Kelly, president of the National Radium Institute, to Secretary Lane, in which he says:

WASHINGTON, D. C., *January 27, 1915.*

The honorable the SECRETARY OF THE INTERIOR,
Washington, D. C.

MY DEAR MR. SECRETARY: I herewith gratefully acknowledge, in behalf of the Radium Institute, the receipt from the Director of the Bureau of Mines of 171 milligrams of hydrous radium bromide, to be applied by the institute to purposes before planned.

It gives me the greatest pleasure in acknowledging this receipt, and in thus realizing the fruition of our hopes to thank the bureau for the extraordinary success of its labors in thus producing radium by simplified methods to be used for the public good, the entire process being developed in a plant both planned and operated by the Government, under the direction of Dr. C. L. Parsons, of the Bureau of Mines.

This radium will at once be put into solution and begin its course of beneficent activity in the service of suffering humanity.

With the radium already in our hands, the successful treatment of many conditions has been established beyond peradventure. Many of these cases have been utterly beyond the reach of surgery or other therapeutic measures. We have, however, felt throughout the past months the inadequacy of our supplies to meet the urgent needs in individual cases. We feel, therefore, an entire confidence that the supply now accumulating and heralded by this delivery will enable us to treat successfully conditions up to this time beyond our reach.

Very sincerely, yours,

HOWARD A. KELLY,
President of the National Radium Institute.

[Applause.]

I might say further that by the end of the year 1915 it is confidently expected by the Bureau of Mines that they will be able to supervise the extraction of 7 grams of radium, which Dr. Kelly and Dr. Douglas desire, and then the Government will secure its share of the profit in radium which comes from the operation of this plant in Denver, Colo.

So I congratulate the country upon the fact that the Government has been able to do this work. Especially are we gratified at this time, when we read of so many human lives being sacrificed in war, that there are men like Dr. Kelly and Dr. Douglas who are willing to give from their private funds $75,000 each and who have lately removed that limit and are willing to furnish more that they may secure this radium for the benefit of humanity and to save human life. [Applause.] I can not too strongly commend the work of these men for the benefit of those who suffer from disease. And I am glad to come to the House to-day and bring with me this small amount of radium, though it represents a value of $11,000 of this rare

metal. I hope that a sufficient quantity of it will be obtained so that it may be placed in the hospitals of our country, where human life may be saved and where those who are afflicted may be saved, and that we may have other ways of curing these diseases without resorting to a surgical operation and which in other cases can not be done. In this little tube which I hold in my hand there is $5,000 worth of this precious metal, and in the other tube there is $6,000 worth. [Applause.]

Mr. J. M. C. SMITH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the flax industry.

The SPEAKER. The gentleman from Michigan [Mr. J. M. C. SMITH] asks unanimous consent to extend his remarks in the RECORD on the subject of flax. Is there objection?

There was no objection.

Mr. ADAMSON. Mr. Speaker, I will ask the gentleman from Illinois to explain the pending bill to the House.

The SPEAKER. The gentleman from Illinois is recognized for 55 minutes.

Mr. MANN. Mr. Speaker, the Calumet River runs through my district. It was formerly a rather crooked stream, and in 1881 Congress invited the riparian owners to donate the property which would allow the Government to straighten the stream. They did so, by deeds providing that—

the shore or dock lines of said river as so established and shown on said plat shall hereafter for all purposes be taken as the true meandered lines of said stream.

The Government has improved the river on the new lines, and the old channel of the river remains partly water and partly mud. This bill is to declare nonnavigable a portion of the old channel located in the north quarter of fractional section 7. It has been reported upon by the War Department, which says:

The object of the bill is to abandon as navigable water that portion of the old channel of the river which lies outside of the new channel lines thus established by the United States—

As to a certain locality.

This proposition is unobjectionable so far as navigation interests are concerned, and it seems but fair and equitable to private property interests in the vicinity that the Federal Government should relinquish its easement in that portion of the old river bed which is no longer useful for navigation purposes. Favorable consideration of the measure is therefore recommended.

The owners of the property can not get to the new line of the river to construct docks or wharves, because just a little way from it is the old channel of the river.

Mr. GARRETT of Tennessee. Mr. Chairman, as I understand it, deeds were made by property owners?

Mr. MANN. Yes; deeds donating the land.

Mr. GARRETT of Tennessee. By these deeds the Government obtained the easement?

Mr. MANN. The Government obtained the ownership of the land where the new channel runs, to straighten the river.

Mr. GARRETT of Tennessee. The title was conveyed by deed?

Mr. MANN. It was conveyed by deed and accepted by the Government as recited in the preamble.

Mr. GARRETT of Tennessee. In the event that the bill passes, what becomes of that title?

Mr. MANN. That title remains in the Government, and the title to the old channel belongs to the persons who own the property on both sides of the stream.

Mr. GARRETT of Tennessee. They will be the riparian owners under the common law.

Mr. MANN. They own the title in our State, anyhow, subject to the easement of navigation.

Mr. GARRETT of Tennessee. There is a very interesting legal question in connection with drainage propositions in my section. If the gentleman is not pressed for time——

Mr. MANN. I am pressed for time, because I do not intend to delay the House long on this bill. There are other matters that the gentleman from Georgia [Mr. ADAMSON] desires to call up.

Mr. GARRETT of Tennessee. I have often wondered to what extent Congress ought to go in declaring the legal proposition as to navigability or nonnavigability. So far as I know there is no act of Congress declaring a certain stream navigable. There are acts of Congress for the improvement of streams. Now, navigability is largely a matter of fact.

Mr. MANN. The declaration by Congress is the thing which controls the action of the Board of Engineers of the Army. In this case, for instance, they would not permit the owners of the property to put any obstructions in this old channel unless Congress declared it nonnavigable, and that is all the declaration amounts to. It does not establish the fact, because the fact is that it is not navigable.

Mr. ADAMSON. Will the gentleman yield for a question?

Mr. MANN. Yes.

Mr. ADAMSON. Was it not the understanding, and is there not a moral obligation on us, in accordance with that understanding, that there should be a substitution allowing the Government to straighten the channel and give us a new one, if we would abandon the old one?

Mr. MANN. There was an understanding, although I would not undertake to say that there was any moral obligation to declare this nonnavigable, because as to a part of this property I do not want to see the old channel declared nonnavigable where it is needed for the purposes of a turning basin.

Mr. CULLOP. Will the gentleman yield for a question?

Mr. MANN. Yes.

Mr. CULLOP. I should like to ask the gentleman from Illinois if there are any factories or shipping interests now established along the thread of the old stream?

Mr. MANN. The thread of the part of the stream that this bill affects is vacant property on both sides, all owned by the same people.

Mr. CULLOP. Are there any factories now in operation along the banks of the old stream, on the part proposed to be abandoned?

Mr. MANN. Not as affected by this bill. This bill affects only the north quarter of fractional section 7, township 37 north, range 15. This is the third bill of this kind that we have passed.

Mr. CULLOP. I did not catch the gentleman's last remark. There was confusion near me.

Mr. MANN. We have passed two bills before as to particular sections of the stream. This only relates to a small section of the stream, and there are no improvements at all where this is.

Mr. CULLOP. What I had in mind was that if there were any factories or people using that part of the stream in order to get their commodities out to the main channel——

Mr. MANN. There are not.

Mr. CULLOP. If there were any such, it would work a great hardship upon them.

Mr. MANN. The same people own both sides of the stream, and the reason they want the channel declared nonnavigable is because they want to improve it up to the new channel.

Mr. CULLOP. The purpose is to fill in the old channel.

Mr. MANN. They can not get the money to do it until the nonnavigability of the old channel is declared, so that they can fill it in.

Mr. ADAMSON. Mr. Speaker, I move the previous question.

Mr. GARRETT of Tennessee. Will the gentleman withhold that motion for a moment?

Mr. ADAMSON. I will withhold it for a moment.

Mr. GARRETT of Tennessee. Is it necessary as a legal proposition to have an act of Congress declaring this part of the river nonnavigable?

Mr. MANN. It is not as a legal proposition. The gentleman is right about that. But as a practical proposition it is, because until such a declaration is made the engineers think it is their business to prevent any obstruction being put there.

Mr. ADAMSON. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. MANN. Mr. Speaker, I ask unanimous consent to have the spelling of the word "realignment," on page 2, line 3, corrected, so that it will be spelled correctly.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

AIDS TO NAVIGATION, LIGHTHOUSE SERVICE.

Mr. ADAMSON. Mr. Speaker, by direction of the Committee on Interstate and Foreign Commerce I call up the bill (H. R. 19746) to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes. I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The SPEAKER. The Clerk will report the bill.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent to dispense with the first reading of the bill.

Mr. STAFFORD. I think we ought to have the bill read.

The Clerk read as follows:

A bill (H. R. 19746) to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes.

Be it enacted, etc., That the Secretary of Commerce is hereby authorized to establish, provide, or improve the following aids to navigation and other works in the Lighthouse Service, under the Department of Commerce, in accordance with the respective limits of costs hereinafter respectively set forth, which shall in no case be exceeded.

FIRST LIGHTHOUSE DISTRICT.

A light at or near Dog Island entrance to St. Croix River, Me., $3,500.

SECOND LIGHTHOUSE DISTRICT.

Improvements at Woods Hole lighthouse depot, Mass., $50,000.

THIRD LIGHTHOUSE DISTRICT.

Improving the aids to navigation and establishing new aids on the Hudson River, N. Y., $100,000.

Improving the aids to navigation at Sandy Hook, N. J., $20,000.

FOURTH LIGHTHOUSE DISTRICT.

Improving the aids to navigation and establishing new aids on the Delaware River, Pa. and Del., $80,000.

SIXTH LIGHTHOUSE DISTRICT.

Improving the aids to navigation and establishing new aids on the St. Johns River, Fla., below Jacksonville, $66,000.

SEVENTH LIGHTHOUSE DISTRICT.

Additional lighted aids for Florida Reefs, and repairs and improvements to existing aids, $75,000.

EIGHTH LIGHTHOUSE DISTRICT.

Improving the aids to navigation and establishing new aids on the Mississippi River, below New Orleans, La., $50,000.

Constructing, or purchasing, and equipping a small tender and barge for eighth lighthouse district, Texas and Louisiana, $20,000.

TENTH LIGHTHOUSE DISTRICT.

Light and fog signal and improving the present aids to navigation in Conneaut Harbor, Ohio, $63,500.

Improving the aids to navigation in Toledo Harbor, Ohio, $15,000.

ELEVENTH LIGHTHOUSE DISTRICT.

Improving aids to navigation and establishing new aids in the Fighting Island Channel, Detroit River, Mich., $25,000.

SEVENTEENTH LIGHTHOUSE DISTRICT.

Light and fog signal station at or near Kellett Bluff, Henry Island, Wash., or at some point on the west coast of San Juan Island, Wash., $40,000.

Improvement of aids to navigation at or near the entrance to Coquille River, Oreg., $6,000.

EIGHTEENTH LIGHTHOUSE DISTRICT.

Light and fog signal station at Point Vincente, Cal., $80,000.

NINETEENTH LIGHTHOUSE DISTRICT.

Aid to navigation in Pearl Harbor, Hawaii, $80,000.

SEC. 2. That the Secretary of Commerce is hereby authorized, in his discretion, to use the unexpended balance of the appropriation of $200,000 for a tender for the first lighthouse district and elsewhere made by the acts of May 27, 1908 (35 Stats., p. 331), and March 4, 1909 (35 Stats., p. 970), as modified by the act of July 27, 1912 (37 Stats., p. 238), for the construction of additional tenders for general service.

SEC. 3. That the Secretary of Commerce is authorized to transfer the lighthouse property in lot 1, section 34, township 22 north, range 8 east, Iosco County, Mich., now a portion of the Tawas Lighthouse reservation, to the Secretary of the Treasury for purposes of the Life-Saving Service.

SEC. 4. That hereafter employees of the Lighthouse Service compensated at a per diem rate of pay may be granted 15 working days' leave of absence each year without forfeiture of pay during such absence, under rules prescribed by the Secretary of Commerce: *Provided*, That no employee of the class herein mentioned shall be entitled to any leave until he has served 12 consecutive months, when he may be granted 15 days' leave, and that during the second or any subsequent year 15 days' leave at the rate of one and one-fourth days per month, as earned, may be granted from the beginning of the second service year: *Provided further*, That the inspectors of the several lighthouse districts shall have discretion as to the time when the leave can be allowed without detriment to the service, and that absence on account of sickness shall be deducted from the leave hereby granted.

SEC. 5. That hereafter post-lantern lights and other aids to navigation may be established and maintained, in the discretion of the Commissioner of Lighthouses, out of the annual appropriations for the Lighthouse Service, on Lakes Okechobee and Hicpochee and connecting waterways across the State of Florida and on the Apalachicola River and Chipola cut-off.

SEC. 6. That hereafter appropriations made by Congress for the construction and equipment of vessels of the Lighthouse Service shall be available for the purchase or construction of suitable models of such vessels.

SEC. 7. That hereafter the annual appropriations for the Lighthouse Service shall be available for defraying the expenses of cooperation between the Lighthouse Service and the Forest Service in the management of forest land on lighthouse reservations.

SEC. 8. That hereafter the provisions of section 8 of the act of Congress approved August 24, 1912 (37 Stat., p. 487), relative to the administering of oaths to travel accounts or other expenses against the United States shall be extended to chief clerks in the offices of lighthouse inspectors or other employees in the Lighthouse Service designated by them, and hereafter chief clerks in offices of lighthouse inspectors and employees designated by them are authorized to administer oaths of office to employees of the Lighthouse Service.

SEC. 9. That hereafter the penalties provided in section 6 of the act of May 14, 1908 (35 Stat., p. 162), for obstruction or interference to any aid to navigation maintained by the Lighthouse Service shall apply with equal force and effect to any private aid to navigation lawfully maintained under the authority granted the Secretary of Commerce and the Commission of Lighthouses by section 6 of the act of June 20, 1906 (34 Stat., p. 324).

SEC. 10. That hereafter the Secretary of Commerce is authorized, whenever he shall deem it advisable, to exchange any right of way of the United States in connection with lands pertaining to the Lighthouse Service for such other right of way as may be advantageous to the service, under such terms and conditions as he may deem to be for the best interests of the Government; and in case any expenses are incurred by the United States in making such exchange, the same shall be payable from the appropriation "General expenses, Lighthouse Service," for the fiscal year during which such exchange shall be effected.

The following committee amendments were read:

Page 5, strike out section 6.
Page 6, strike out all of section 10.

Mr. ADAMSON. Mr. Speaker, the committee has with great care examined the reports of the department on the subject of aids to navigation, and has had the hearings of the officials, and we have sifted out from the innumerable projects only those which appeared to be most meritorious and really necessary at this time. Out of several million estimated for proposed projects we have selected from class A, the first class, those that were personally verified before the committee as requisite at this time.

There is one additional amendment that the committee wants to offer, and I will ask the Clerk to read that. I will state that that comes on a recommendation of the governor of the Panama Canal and the chairman of the Committee on Appropriations of this House. The Appropriations Committee had hearings on the Isthmus and came back and reported to the committee that these two little lighthouses were necessary on the Pacific coast, and the governor of the canal has asked that they have authority to build them.

The first idea was that the canal should build them, but as they are not to be in the canal or near the canal, but are outside to guide the ships from the midocean to the entrance of the canal, the committee thought the Lighthouse Service ought to build them, but the amendment provides that for convenience and economy of the Lighthouse Service they might arrange that the canal force should construct and maintain the lights.

Mr. MANN. Will the gentleman yield?

Mr. ADAMSON. Certainly.

Mr. MANN. I see that the bill carries $80,000 to improve aids to navigation by establishing new lights in the Delaware River in the fourth lighthouse district. I would like to inquire how they could find any additional space on that river for aids to navigation and whether they have got up any new plan. The gentleman from Georgia will remember that during our service on the committee we had several plans submitted for improvement of the Delaware River by aids to navigation. Have they got out a new plan or found a new place where they could put in a new aid?

Mr. ADAMSON. This is not the first time that I have had to regret the absence of the able and genial gentleman from Pennsylvania [Mr. MOORE], who devised a method of doubling up the lighthouses on the Delaware River. The gentleman from Illinois must be speaking facetiously, because he has heard the distinguished gentleman from Pennsylvania describe the absolute and unutterable necessity for more lighthouses, and I know that the gentleman must be jesting in asking about it. It may be that the gentleman from Pennsylvania, if he were here, could explain how he could pile lighthouse on top of lighthouse in that river, where there is such an immense commerce.

Mr. MANN. I thought possibly if I asked the question it would have the effect of bringing, through telepathy or some other means, the distinguished gentleman from Pennsylvania himself to the floor of the House. [Laughter.]

Mr. ADAMSON. There is a good explanation of it. I will ask the Clerk to read the committee amendment.

The SPEAKER. The Chair will call the gentleman's attention to the fact that some words are omitted in the amendment.

Mr. ADAMSON. Let the Clerk read it as it is.

The Clerk read as follows:

On page 3, line 18, after the figures "$80,000," insert the following: "The Secretary of Commerce has authorized two lights on the Pacific coast."

Mr. ADAMSON. I had written the amendment with the view of adapting it to two or three contingencies. The words "Secretary of Commerce" should be left out, because they appear in the first section and make it read "two lights on the Pacific coast."

Mr. MANN. It ought to come in after line 20.

Mr. ADAMSON. That is after line 20. There is another item there I failed to observe.

The SPEAKER. Does the gentleman want the words "Secretary of Commerce"?

Mr. ADAMSON. No; that goes out. It should begin with "two lights."

Mr. MANN. There should be a heading "Panama Canal."

Mr. ADAMSON. On page 3.

Mr. STAFFORD. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. STAFFORD. Have we reached the stage for amendment yet?

The SPEAKER. Why, the Clerk was reading the bill for amendment.

Mr. MANN. The bill has not been read for amendment yet, Mr. Speaker.

Mr. ADAMSON. I am trying to give notice of this amendment.

The SPEAKER. The Clerk will read the bill for amendment.

The Clerk read as follows:

Constructing, or purchasing, and equipping a small tender and barge for eighth lighthouse district, Texas and Louisiana, $20,000.

Mr. STAFFORD. Mr. Speaker, I move to strike out the last word. Mr. Speaker, the item under consideration is the aftermath of the construction of an intercoastal waterway from New Orleans to the Rio Grande. It provides for an appropriation of $15,000 for a launch 65 feet in length and drawing not more than 3 feet of water. It was contended, time and time again, by the gentleman from Texas and others who are familiar with this stream that the principal navigation of this intercoastal waterway is that for pleasure. The Government is engaged in an extravagant proposition, and the committee has recommended another extravagant proposition of a pleasure launch to accommodate the superintendent throughout the year when the weather is balmy to take a trip by the inland canal from the Mississippi to the Rio Grande. Certainly the committee, since the distinguished gentleman from Illinois, the minority leader, left it as chairman, has progressed. When the gentleman from Illinois was chairman and he presented any omnibus lighthouse bill he invariably refused to include such items as are embodied in this bill, and yet we find here in these pressing times, when the revenues are falling backward, when we are threatened with a bond issue, that the committee has adopted a new policy of recommending projects which have become hoary with age. I must again confess and state that some of the information I am going to give the committee was acquired by reason of a quondam service on the Committee on Interstate and Foreign Commerce. At that time we had before us the old project of improving lights on the Delaware River. The intercoastal proposition had not then loomed up in the foreground as a "pork" in a river and harbor bill. That is a matter that has made progress in the last few years. But here we have appropriations, the Treasury being so overflowing with money at the present time, for the establishment of additional lights on the Delaware River, $80,000, and for an appropriation of $15,000 for a launch drawing not more than 3 feet of water to accommodate the superintendent and his friends, and perhaps the Congressmen if they go down there to take little pleasure rides on this beautiful inland waterway, that some day at the expense of hundreds of millions of dollars is going to circle the coasts from Norfolk along the Atlantic coast through the Everglades of Florida and along the Gulf coast to the Rio Grande. I certainly wish to compliment and congratulate the committee on its extravagant policy of economy in presenting to the House a bill which contains several items which the department itself did not regard as of first importance. There is certainly progress in these Democratic times of extravagance. [Applause.]

Mr. TALCOTT of New York. Mr. Speaker, this item is one strongly recommended by the department. It provides for a motor launch about 65 feet long and only 3 feet draft, which the department says is absolutely necessary for establishing lights and day marks along the intercoastal canal and other shallow waters of the eighth lighthouse district. That portion of the canal from Galveston, Tex., to Corpus Christi, Tex., is being completed by the War Department, and in the next year or two the canal will be open to the Mississippi River. Now, Mr. Speaker, so far as it being as the gentleman from Wisconsin has stated, this small boat is absolutely necessary for the purpose for which it is intended, and it is, moreover, strongly recommended by the department.

The SPEAKER. Without objection, the pro forma amendment will be considered as withdrawn.

There was no objection.

The Clerk read as follows:

Aid to navigation in Pearl Harbor, Hawaii, $80,000.

Mr. ADAMSON. Mr. Speaker, I move to insert the committee amendment after line 20, with the subcaption "Panama Canal."

Mr. CULLOP. Mr. Speaker, there is a committee amendment pending.

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Page 3, line 20, strike out the word "aid" and insert the word "aids."

The question was taken, and the amendment was agreed to.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

On page 3, after line 20, and after the figures "$80,000," insert the following:

"Panama Canal: Two lights on the Pacific coast——"

Mr. ADAMSON. Mr. Speaker, before reading that, I would ask the gentleman from Illinois if that would not really come within the nineteenth district and render unnecessary the caption of "Panama Canal"?

Mr. MANN. No; it would not. They would not have anything to do with the maintaining of it.

The Clerk read as follows:

Panama Canal: Two lights on the Pacific coast, necessary as aids to navigation, near the Pacific entrance to the Panama Canal, at a total cost not exceeding $48,000, one of them at Punta Mala, the other at Toma Island; and for the construction of these two aids the Secretary of Commerce may, by a satisfactory arrangement with the governor of the Panama Canal, have them constructed and maintained through the Panama Canal force.

The question was taken, and the amendment was agreed to.

The Clerk read as follows.

Section 6, committee amendment: Strike out all of section 6, which reads as follows:

"SEC. 6. That hereafter appropriations made by Congress for the construction and equipment of vessels of the Lighthouse Service shall be available for the purchase or construction of suitable models of such vessels."

Mr. ADAMSON. Mr. Speaker, let us have a vote on that amendment.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

SEC. 7. That hereafter the annual appropriations for the Lighthouse Service shall be available for defraying the expenses of cooperation between the Lighthouse Service and the Forest Service in the management of forest land on lighthouse reservations.

With a committee amendment, as follows:

Strike out, on line 16, page 5, the figure "7" and insert in lieu thereof the figure "6."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

SEC. 8. That hereafter the provisions of section 8 of the act of Congress approved August 24, 1912 (37 Stat., p. 487), relative to the administering of oaths to travel accounts or other expenses against the United States shall be extended to chief clerks in the offices of lighthouse inspectors or other employees in the Lighthouse Service designated by them, and hereafter chief clerks in offices of lighthouse inspectors and employees designated by them are authorized to administer oaths of office to employees of the Lighthouse Service.

With a committee amendment, as follows:

Page 5, line 21, strike out the figure "8" and insert the figure "7."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will read:

The Clerk read as follows:

SEC. 9. That hereafter the penalties provided in section 6 of the act of May 14, 1908 (35 Stat., p. 162), for obstruction or interference to any aid to navigation maintained by the Lighthouse Service shall apply with equal force and effect to any private aid to navigation lawfully maintained under the authority granted the Secretary of Commerce and the Commission of Lighthouses by section 6 of the act of June 20, 1906 (34 Stat., p. 324).

With committee amendments, as follows:

Page 6, line 7, strike out the figure "9" and insert the figure "8."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

On page 6, line 10, strike out the word "to" after the word "obstruction" and after the word "interference," and insert after the word "interference" the word "with."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

On page 6, line 14, strike out the word "Commission" and insert in lieu thereof the word "Commissioner."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CULLOP. Mr. Speaker, I move to strike out the last word.

The SPEAKER. The gentleman from Indiana [Mr. CULLOP] moves to strike out the last word.

Mr. CULLOP. I do that, Mr. Speaker, for the purpose of inserting in the RECORD an article on the increase in ocean freights, published in the Washington Times on day before yesterday.

The SPEAKER. The gentleman from Indiana [Mr. CULLOP] asks unanimous consent to extend his remarks in the RECORD by inserting an article that was published in the Washington Times on the day before yesterday on the subject of increase in ocean freights. Is there objection?

There was no objection.

Following is the article referred to:

HIGH OCEAN RATES CHECK UNITED STATES TRADE—MCADOO AND REDFIELD SUBMIT CORRESPONDENCE TO SENATE SHOWING EXTORTION BY LINES.

A mass of letters written by American business men was submitted to the United States Senate to-day by Secretaries McAdoo and Redfield in response to the resolution adopted by the Senate some weeks ago asking for information regarding the ocean freight-rate situation. The correspondence is that of firms engaged in the export trade, and it tells of extraordinary increases in rates since the outbreak of war.

An analysis of the exporters' complaints was submitted with the letters. Parts of it follow:

Rates have been arbitrarily increased to an unparalleled height, without regard to the interests of the American trade.

STOPPING SOME EXPORTATIONS.

High rates are actually stopping exportations in some lines. Plants have been shut down in consequence.

Arbitrary and hurtful discrimination is made against certain classes of goods; lumber, for instance. Similar discrimination by a common carrier on land would be cause for criminal prosecution.

Rates to South America have been greatly increased, and there is a shortage of tonnage both to and from there.

The direct charge is made that the Holland-America Line has repudiated written contracts with American shippers.

EXAMPLES OF INCREASES.

Striking examples of increases are: On grain, from New York to Rotterdam, 900 per cent; on flour, 500 per cent; on cotton, 700 per cent.

New York to Liverpool rates on same commodities, 300 to 500 per cent.

Baltimore to Europe, rates on grain, 900 per cent; on flour, 364 per cent; on cotton, 614 per cent.

Norfolk to Liverpool grain rates, 157 to 200 per cent; on cotton, 186 per cent.

Norfolk to Rotterdam cotton rates, 471 per cent.

Norfolk to Bremen cotton rates, 1,100 per cent (from $1.25 per bale to $15 per bale).

Savannah to Liverpool, from 250 per cent; to Bremen, 900 per cent.

Galveston to Liverpool, on grain, 174 per cent; on cotton, 361 per cent; to Bremen, on cotton, 1,061 to 1,150 per cent.

RATES STILL GOING UP.

Even higher rates were being reported while the statement was being completed, says the report, adding:

"Ocean rates are still rising and are limited only by the greed of the steamship owners on the one hand and by what the traffic can stand on the other.

"The Government has no power to control or regulate ocean freight rates. It can not, under existing law, protect our foreign trade against these extortionate and hurtful charges. The steamship owners can increase rates without notice and upon the instant, and our business men are helpless.

DAMAGING AMERICAN TRADE.

"The steamship companies are their own masters and do as they please with the transportation of our exports. As already shown, they are seriously checking our foreign trade, and in some cases, such as lumber and coal, are stopping it altogether."

If exports by sea continue for the 12 months of 1915, it is predicted in the report, at the December rate and the ocean rates are continued, American farmers and business men will pay to shipowners (principally foreign) excess charges above normal to the amount of $216,224,400, or more than five times the $40,000,000 which the Government proposes by the ship-purchase bill to put into American ships for the protection of America's foreign commerce.

Mr. CULLOP. Mr. Speaker, the statement just read deserves the serious consideration of the people of this country, and especially so at this time. It clearly shows that our commercial interests are now imperiled by the ship monopoly, and it is of the highest importance that the public secure relief from its grasp at the earliest moment possible. The cost of ocean transportation has been outrageously advanced at this time, when the demand for it is very strong in order that our farmers and manufacturers might send their products abroad and realize handsome profits on the same. Instead of the producers realizing the profits on their products, the shipowners propose to absorb them by the increase of ocean transportation rates. This is an opportune time for our producers of both farm and manufactured products to realize handsomely on their productions, but between them and the realization of these profits intervenes the ship monopoly which proposes to absorb these profits by the abnormal increase of rates. The producers are entitled to these profits and should have them, but the Ship Trust has determined it will take them. A better example of monopolistic greed could not be furnished. It clearly illustrates what monopoly will do when opportunity is afforded. Our producers, the people who create wealth, earn the profits, have a great opportunity presented, but if this monopoly is permitted to continue, to exact these unreasonable charges, the people will not be permitted to enjoy the advantages afforded. This demonstrates the wisdom of passing at the earliest moment possible the President's shipping measure in order that this monopoly may be broken up and the people enjoy the splendid opportunity now offered for the sale of their products in foreign markets where they can realize handsome profits and build up industry in our country. Could we not at this time, while the country is waiting for the passage of the shipping bill, employ the Government transports for the transportation of our products to foreign markets and show the Ship Trust that it shall not exact from the people from industry these exorbitant charges for service?

To employ these boats already owned by the Government in this service would give this monopoly now exploiting the people, operating as a restraint on industry, to understand that it must make its charges reasonable or it will be unable to get business; that this Government will not tolerate it to restrain industry and plunder the people. Until some other arrangements can be made, either by the passage of the ship-purchasing bill or something equally as feasible, it seems to me wisdom and prudence would dictate we devote our transports and other like boats to this service and give this monopoly to understand it shall not exact such unreasonable and exorbitant charges for service and thereby hamper industry and deprive our people of the splendid opportunity now offered to realize handsome profits on their products. Conditions require that this effort on the part of the Ship Trust at this particular time to curtail commerce be defeated and the situation controlled by the Government so that our people may take advantage of the splendid opportunities presented. It is time prompt action be taken and this great monopoly given to understand it shall not plunder our people to satisfy its avarice. Every business is entitled to have a reasonable profit in order to make investment remunerative, but when any business attempts to extort such unconscionable charges for service as now demanded by this monopoly it needs a rebuke. It is now without competition, and hence the exorbitant rates, and because of its conduct the entire business of the country has to suffer. Prompt action is required, it clearly appears, in order that the country shall not longer suffer and business be curtailed. These excessive rates are restraining business activities and denying our people the privileges of foreign markets. If relief could be secured from these confiscatory rates it would furnish a great impetus to business, increase our commerce at home and abroad, and stimulate the energies of our people. It is no surprise the great Ship Trust is lined up determined to defeat the President's shipping measure. The reason is plain why it is united in its opposition to its passage. These exorbitant rates furnish the explanation. Its passage means the end of them and a reasonable rate substituted in lieu of the same.

The SPEAKER. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

SEC. 10. That hereafter the Secretary of Commerce is authorized, whenever he shall deem it advisable, to exchange any right of way of the United States in connection with lands pertaining to the Lighthouse Service for such other right of way as may be advantageous to the service, under such terms and conditions as he may deem to be for the best interests of the Government; and in case any expenses are incurred by the United States in making such exchange, the same shall be payable from the appropriation "General expenses, Lighthouse Service," for the fiscal year during which such exchange shall be effected.

With a committee amendment, as follows:

Strike out all of section 10.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ADAMSON. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

Mr. MOORE. This bill is a good bill and ought to pass, but in view of the pleasantry indulged in during my brief absence from the Chamber I wish to say that there is particular merit in it because of the item of $80,000 for improving the aids to navigation and establishing new aids on the Delaware River, Pennsylvania and Delaware. That improvement is made necessary by the progress of the work on the 35-foot channel of the Delaware River at what is called the schooner ledge range. The situation there is well explained in a letter from the secretary

of the Maritime Exchange of Philadelphia, which I shall add to my remarks:

THE PHILADELPHIA MARITIME EXCHANGE,
Philadelphia, May 26, 1914.

Hon. J. HAMPTON MOORE,
House of Representatives, Washington, D. C.

DEAR SIR: Under the 35-foot channel project the reach of river covered by the present schooner ledge range has been divided into two ranges in order to avoid the rock area opposite Chester, and we are advised by the United States engineer in charge of the work that the new channel will probably be completed not later than the close of the present working season.

The change in the line of this channel will of course require a change in the lighthouse ranges, making necessary the establishment of two ranges in place of the present one. Under date of May 12 we took the matter up with the commissioner of lighthouses at Washington and received from him a reply on May 15, copies of both communications are attached hereto for your information.

It is the hope of our exchange that no time will be lost by the lighthouse department in making the necessary changes in order that when this section of the river is declared ready for commercial use it can be availed of.

We shall be obliged if you will give this matter some thought, as I am given to understand that a congressional appropriation is required for the purpose of properly equipping the new schooner ledge ranges.

Yours, faithfully,

E. R. SHARWOOD, *Secretary.*

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS MISSISSIPPI RIVER AT MEMPHIS, TENN.

Mr. ADAMSON. Mr. Speaker, if the brethren will stay with me, I would like to pass two or three little bridge bills before adjournment to-day.

The SPEAKER. What is the first one?

Mr. ADAMSON. It is the bill H. R. 20933. I will not call up any other large bill.

The SPEAKER. The Clerk will report it.

The Clerk read the bill, as follows:

A bill (H. R. 20933) to amend an act entitled "An act to authorize the Arkansas & Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River at Memphis, Tenn.," approved August 23, 1912.

Be it enacted, etc., That the time for the completion of a bridge now in course of construction across the Mississippi River at Memphis, Tenn., which the Arkansas & Memphis Railway Bridge & Terminal Co. was authorized to construct, maintain, and operate by an act entitled "An act to authorize the Arkansas & Memphis Railway & Bridge Co. to construct, maintain, and operate a bridge across the Mississippi River at Memphis, Tenn." approved August 23, 1912, be, and the same is hereby, extended for a period of one year from the time now limited, namely, the 23d day of August, 1915: *Provided*, That in all other respects the said bridge shall be completed, maintained, and operated in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and third reading of the bill.

Mr. McKELLAR. Mr. Speaker, will the gentleman from Georgia yield to me for a minute for the purpose of clearing up a few little defects?

Mr. ADAMSON. Of course, I am glad to have anything to improve the bill. I will yield to the gentleman.

Mr. McKELLAR. Mr. Speaker, all those interested in the building of this great bridge at Memphis have united in requesting me to press this bill extending the time in which the bridge may be completed. Work on the bridge has progressed well, but it is not thought that the bridge can possibly be completed by next July, the time limited in the bill, and so Mayor Crump, acting for the city; Mr. T. K. Riddick, acting for the committee of citizens; and Col. Canada, acting for the bridge company, have agreed on the bill, with some slight amendments, which I shall offer presently. We all believe that this request for an extension of time is made in good faith, and I hope the bill may pass this afternoon, as our time to get it through the Senate is very short. Mr. Speaker, I now desire to offer the following amendments: In line 5, on page 1, strike out the word "the," before the word "Arkansas." It is purely technical. It ought to be correct.

Mr. MANN. Strike out what?

Mr. McKELLAR. The word "the," before the word "Arkansas."

Mr. MANN. It is not capitalized.

Mr. STAFFORD. It is not part of the name of the corporation.

Mr. McKELLAR. I have been asked to have it stricken out, and I think it probably just as well to strike it out.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 1, line 5, by striking out the word "the," before the word "Arkansas."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McKELLAR. In line 6, page 1, after the word "Company," I move to insert the words "its successors and assigns." That is in accordance with the original act, Mr. Speaker.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Tennessee.

The Clerk read as follows:

Amend, page 1, line 6, by inserting, after the word "Company," a comma and the words "its successors and assigns."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McKELLAR. And again, after the word "twelve," in line 1, page 2, add the following:

Amending an act of similar title approved July 20, 1912.

The chairman of the committee will remember that there were two of these bills passed, and the second one, that we are now amending, was an amendment to a former bill of similar title approved July 20, 1912.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 1, after the word "twelve," insert the words: "amending an act of similar title approved July 20, 1912."

The amendment was agreed to.

Mr. McKELLAR. And in line 4, on page 2, strike out the word "the" before the word "twenty-third," and insert the word "until."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 3, after the word "namely," strike out the word "the" and insert the word "until."

Mr. McKELLAR. And, in line 4, on page 2, strike out the word "fifteen" and insert the word "sixteen."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 4, strike out the word "fifteen" and insert the word "sixteen."

Mr. STAFFORD. As I understand it, the date of the expiration of the present law is the 23d day of August, 1915?

Mr. McKELLAR. That is correct.

Mr. STAFFORD. And it is the desire to extend the privilege one year from that date?

Mr. McKELLAR. Namely, until the 23d day of August, 1916, and I have offered this amendment so that there can be no confusion about it.

Mr. STAFFORD. The present reading is confusing.

Mr. McKELLAR. But as amended it will not be.

Mr. STAFFORD. I take the opposite position. I should like to have the attention of the chairman of the committee.

Mr. ADAMSON. What is the question?

Mr. STAFFORD. The phraseology as it is proposed to read is:

And the same is hereby extended for a period of one year from the time now limited, namely.

Mr. ADAMSON. I think that is awkwardly drawn. I think it can be improved.

Mr. MANN. The gentleman wants to extend it until——

Mr. McKELLAR. Until August 23, 1916.

Mr. MANN. This language is susceptible of two constructions.

Mr. McKELLAR. I think it is, and it ought to be amended.

Mr. MANN. The way to do that is to strike out the words "the time now limited, namely," so that it will read:

Extended one year from the 23d day of August, 1915.

Anybody can understand that.

Mr. McKELLAR. I think so. I ask unanimous consent to withdraw the last proposed amendment.

The SPEAKER. The gentleman does not need unanimous consent. The gentleman withdraws the amendment.

Mr. STAFFORD. The last two amendments.

Mr. McKELLAR. Yes; the last two. They cover it all. I move to strike out the words "the time now limited, namely," in line 3, page 2.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 3, strike out the words "the time now limited, namely."

So that the line as amended will read:

And the same is hereby extended for a perior of one year from the 23d day of August, 1915.

Mr. McKELLAR. That is correct.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time, and passed.

Mr. ADAMSON. Mr. Speaker, I think the title ought to be amended by inserting, after the last word of the caption or title, the following: "so as to extend the time for the construction of said bridge from the time now limited by law until August 23, 1916."

The SPEAKER. Without objection, the title will be amended to conform to the text of the bill.

There was no objection.

On motion of Mr. ADAMSON, a motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE DELAWARE RIVER.

Mr. ADAMSON. Mr. Speaker, now I call up the bill (S. 6839) extending the time for completion of the bridge across the Delaware River authorized by an act entitled "An act to authorize the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co., or their successors, to construct, maintain, and operate a bridge across the Delaware River," approved the 24th day of August, 1912.

The SPEAKER. The Clerk will report the bill.

The bill was read, as follows:

Be it enacted, etc., That the time for the completion of the bridge now in course of construction across the Delaware River, which the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co., or their successors, were authorized to construct, maintain, and operate by an act entitled "An act to authorize the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co., or their successors, to construct, maintain, and operate a bridge across the Delaware River," approved the 24th day of August, 1912, be, and the same is hereby, extended for a period of one year from the time now limited, namely, the 24th day of August, 1915: *Provided*, That in all other respects said bridge shall be completed and shall be maintained and operated in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That in the event of the termination of the corporate existence by dissolution or otherwise of the Pennsylvania & Newark Railroad Co. the word "successors" contained in this act and the act to which this act is an amendment shall be construed to apply to any company which may be organized under the laws of the State of New Jersey which shall be empowered to construct a railroad substantially on the route of the Pennsylvania & Newark Railroad Co. and which may in conjunction with the Pennsylvania Railroad Co. be desirous of completing said bridge.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendments:

Page 2, strike out all of section 2.

Page 3, line 1, strike out the figure "3" and insert the figure "2."

The committee amendments were agreed to.

Mr. ADAMSON. Mr. Speaker, I offer another committee amendment. I move to strike out, in lines 6 and 7, on page 2, the words "the time now limited, namely."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, lines 6 and 7, strike out the words "the time now limited, namely."

The amendment was agreed to.

Mr. MOORE. Mr. Speaker, I should like to have the gentleman from Georgia state whether this is the bridge that was to be constructed near the city of Trenton?

Mr. ADAMSON. It is.

Mr. MOORE. In the extended hearings before the committee the city of Trenton, through its mayor, had some objection to the extension of this time, did he not?

Mr. ADAMSON. Yes; but I have a telegram here saying that he has no objection now.

Mr. MOORE. There has been a relocation of the bridge?

Mr. ADAMSON. Yes; it has been commenced and the work is going on, but they could not complete it within the time limit, which will be next August, and they thought it prudent, as there might not be an extra session, to have the extension now.

Mr. MOORE. There was a question as to whether this was not too close to another bridge, and that was raised by the mayor of Trenton.

Mr. BUTLER. Is there any possible objection to it now?

Mr. MOORE. There was a serious objection at that time, but, as I understand from the chairman, it has been removed, and that settles the question.

The SPEAKER. The question is on ordering the Senate bill to a third reading.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON a motion to reconsider the vote whereby the bill was passed was laid on the table.

LIFE-SAVING STATION, DUXBURY REEF, CAL.

Mr. ADAMSON. Mr. Speaker, I call up the bill (H. R. 20977) to provide for the establishment of a life-saving station in the vicinity of Duxbury Reef, Cal.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to establish a life-saving station in the vicinity of Duxbury Reef, or Bolinas Bay, Cal., at a cost not to exceed $20,000.

The following committee amendment was read:

Page 1, line 6, strike out the figures "$20,000" and insert "$12,000."

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent to consider this bill in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Georgia asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, we heard a great deal the other day in the consideration of the coast guard bill about how the life-saving crews would start out in stormy weather, high seas, and all that sort of thing. I read in the morning paper this morning—and it is not an infrequent occurrence to read similar articles—of how the crews of the Life-Saving Service were lying by safely on shore watching a vessel go to pieces out at sea, because they were afraid to put out in the high seas.

I do not criticize them for it, I commend them, because probably they could not overcome the seas. But there is a good deal of bosh uttered on the floor of the House on the subject of the Life-Saving Service at different times, about the enormous dangers they undertake, the immense property they save, and the great number of lives they save. As they grow older and older in the service, under the new coast guard bill, they will grow more cautious and more cautious, and they will put out only amid the calm seas, but when the waves are rolling high they will remember that they are too old for that kind of work, and they will remain on shore and watch the vessel go to pieces, like they are doing now.

Mr. ADAMSON. The gentleman from California says he does not have that kind of men in the service on the Pacific coast.

Mr. MANN. Oh, I have read similar statements in regard to the Pacific coast.

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS ROCKY RIVER, OHIO.

Mr. ADAMSON. Mr. Speaker, I call up the bill (H. R. 19078) granting the consent of Congress to the Cleveland Yacht Club Co. to construct a bridge across the west arm of the Rocky River, Ohio.

The Clerk read the bill, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Cleveland Yacht Club Co. and its successors and assigns to construct, maintain, and operate a bridge and approaches thereto across the west arm of Rocky River, Ohio, at a point suitable to the interests of navigation, between the city of Lakewood, Ohio, and the village of Rocky River, Ohio, near the mouth of Rocky River, in the county of Cuyahoga, in the State of Ohio, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS THE BACK CHANNEL, OHIO RIVER.

Mr. ADAMSON. Mr. Speaker, I call up the bill (H. R. 20818) to authorize the Brunot Island Bridge Co. to construct, maintain, and operate a bridge across the back channel of the Ohio River.

The Clerk read the bill, as follows:

A bill (H. R. 20818) to authorize the Brunot Island Bridge Co. to construct, maintain, and operate a bridge across the back channel of the Ohio River.

Be it enacted, etc., That the Brunot Island Bridge Co., a corporation of the State of Pennsylvania, is hereby authorized to construct, maintain, and operate a bridge, with approaches thereto, across the back channel of the Ohio River at a point suitable to the interests of navigation, from a point on the southwesterly shore of Brunot Island, near the Duquesne Light Co.'s power plant in the twenty-seventh ward of the city of Pittsburgh, Allegheny County, Pa., to a point between Telford Street and the Ohio connecting railroad bridge on the opposite side of said back channel of the Ohio River in the twentieth ward of the city of Pittsburgh, Allegheny County, Pa.

Said bridge shall be constructed in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters, approved March 29, 1906."

SEC. 2. That the right to alter and repeal this act is hereby expressly reserved.

With the following committee amendments:

Page 2, line 5, strike out the words "said bridge shall be constructed."

Page 2, line 9, strike out the words "alter and" and insert "alter, amend, or."

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. MANN. I wish the gentleman would take up the bill H. R. 19428.

Mr. ADAMSON. What is that?

Mr. MANN. That is a bill about the Chesapeake & Ohio Northern Railway Co. We passed a similar Senate bill, and it ought to be stricken from the calendar and laid on the table.

Mr. ADAMSON. I think that ought to be done. I remember distinctly that the gentleman from Kentucky [Mr. BARKLEY] made the motion on my suggestion.

The SPEAKER. Without objection, the bill H. R. 19428 will be laid on the table.

There was no objection.

LIFE-SAVING STATION, SIUSLAW RIVER, OREG.

Mr. ADAMSON. Mr. Speaker, I call up the bill H. R. 8904.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

A bill (H. R. 8904) to authorize the establishment of a life-saving station at the mouth of the Siuslaw River, Oreg.

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to establish a life-saving station at the mouth of the Siuslaw River, Oreg., in such locality as the General Superintendent of the Life-Saving Service may recommend.

The SPEAKER. This bill is on the Union Calendar.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was read for amendment.

The Clerk reported the following committee amendment:

Page 1, line 7, after the word "recommend," insert the words "at a cost not to exceed $12,000."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. ADAMSON. Mr. Speaker, I have one other little bill. I do not know how long it will take, but if gentlemen do not want to stay and finish it it will only take a little time on next Wednesday. I yield to the gentleman from Indiana [Mr. CULLOP].

Mr. CULLOP. Mr. Speaker, I call up, by authority of the Committee on Interstate and Foreign Commerce, the bill H. R. 2496, House Calendar No. 194.

Mr. MANN. What bill is that?

Mr. CULLOP. For uniform classification of freights.

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. STEVENS of Minnesota. Mr. Speaker, I reserve the right to object to that.

The SPEAKER. The gentleman from Minnesota reserves the right to object to what?

Mr. STEVENS of Minnesota. To object on the ground that there is no quorum present.

The SPEAKER. The gentleman raises the point of no quorum, and so does the gentleman from Illinois [Mr. MANN]. Evidently there is no quorum present.

Mr. CULLOP. Mr. Speaker, the bill having been called up, will it have the right of way on next Wednesday?

The SPEAKER. It would.

Mr. MANN. The Speaker had better think about that before ruling on it.

Mr. ADAMSON. I do not know whether any other Member has anything to offer, and I will move to adjourn.

Mr. McKELLAR. Mr. Speaker, will the gentleman withhold his motion?

The SPEAKER. For what purpose does the gentleman from Tennessee rise?

Mr. McKELLAR. To ask unanimous consent to extend my remarks in the RECORD on this matter.

Mr. MANN. Impossible.

The SPEAKER. The gentleman can not do it after the point of no quorum is raised until that point is settled.

Mr. CULLOP. Mr. Speaker, I understand the Chair has ruled this bill will be in order next Wednesday as unfinished business.

The SPEAKER. The Chair does not believe that suggestion to the Chair is correct. The bill has not been reported. The gentleman has to call up the bill affirmatively——

Mr. CULLOP. I wish the gentleman from Illinois would withhold that motion and let the bill be reported.

The SPEAKER. The gentleman from Indiana simply rose in his place and asked to call this bill up, and in the meantime there were two points of no quorum made, and that seems to be the end of the thing.

Mr. CULLOP. I wish the gentleman from Illinois would withhold the point of no quorum until the bill can be reported.

Mr. MANN. I will say to the gentleman frankly, out of order, that this bill would probably consume a whole day. It would not expedite anything in the way of legislation. There will only be another Calendar Wednesday or so, and there are other Members very anxious to be reached, and I do not think it would be fair to them or to this committee under the circumstances to use up three days. We fixed it so as to give them two days.

Mr. ADAMSON. The Speaker can rule next Wednesday.

The SPEAKER. No; the Chair is ready to rule now.

Mr. ADAMSON. We have not got to an adjournment yet.

The SPEAKER. That is true; but this point of no quorum was injected before the Clerk even got to reading the title of the bill.

Mr. ADAMSON. Under the rule, if the point of no quorum is made and I should move a call of the House, does the Chair reckon it would be voted down?

Mr. STAFFORD. I understand the gentleman made the motion to adjourn.

Mr. CULLOP. If the point of no quorum had been made before the Speaker ruled on it, then the Speaker would not have authority to rule on the proposition because of the point of no quorum. It would deprive the House of jurisdiction to transact business, and hence he could not rule on the question.

The SPEAKER. Let it go over until next Wednesday, if the gentleman prefers. The gentlemen from Illinois and Minnesota both raised the point of no quorum, and there is none here.

Mr. ADAMSON. Our friends on the other side have been very good to us because they thought we were going to adjourn, and I hate to disappoint them.

Mr. MANN. Because the gentleman stated he was not going to call up anything except certain bills.

Mr. ADAMSON. I did not call up any large bill——

The SPEAKER. All the discussion on the subject is out of order.

ADJOURNMENT.

Mr. ADAMSON. Mr. Speaker, I move that the House do now adjourn.

The question was taken, and the motion was agreed to; accordingly (at 5 o'clock and 33 minutes p. m.) the House adjourned to meet at 11 o'clock a. m. to-morrow, Thursday, January 28, 1915.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. Letter from the Assistant Clerk of the Court of Claims, transmitting findings of fact and conclusions in the case of Emma L. Conger, remarried widow of Peter J. Howe (H. Doc. No. 1524); to the Committee on War Claims and ordered to be printed.

2. Letter from the Acting Secretary of Labor, transmitting detailed statement of the number of documents received and the number distributed by the Department of Labor during the calendar year 1914 (H. Doc. No. 1525); to the Committee on Printing and ordered to be printed.

3. Letter from the Acting Secretary of War, transmitting letter from the Judge Advocate General of the Army, together with a list of leases granted by the Secretary of War during the calendar year 1914 (H. Doc. No. 1526); to the Committee on Military Affairs and ordered to be printed.

4. Letter from the governor of Federal Reserve Board, transmitting first annual report of the Federal Reserve Board for the period ending December 31, 1914 (H. Doc. No. 1523); to the Committee on Banking and Currency.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. MURRAY, from the Committee on Indian Affairs, to which was referred the joint resolution (H. J. Res. 380) withholding from allotment the unallotted lands or public domain of the Creek Nation or Tribe of Indians, and providing for the sale thereof, and for other purposes, reported the same with amendment, accompanied by a report (No. 1326), which said joint resolution and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HARRIS, from the Committee on the Public Lands, to which was referred the bill (H. R. 20427) to authorize the sale of certain land in Alabama to Walter Dean, reported the same without amendment, accompanied by a report (No. 1327), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. EVANS, from the Committee on Claims, to which was referred the bill (S. 2334) for the relief of S. W. Langhorne and the legal representatives of H. S. Howell, reported the same with amendment, accompanied by a report (No. 1325), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. PADGETT: A bill (H. R. 21202) to increase the efficiency of the personnel of the Navy; to the Committee on Naval Affairs.

By Mr. KEATING: A bill (H. R. 21203) to provide for the establishment, operation, and management of a bureau, to be known as the "Farm women's bureau," in the Department of Agriculture; to the Committee on Agriculture.

By Mr. CARTER: A bill (H. R. 21204) authorizing the Secretary of War to deliver to the city of McAlester, Okla., four condemned bronze or brass cannon; to the Committee on Military Affairs.

By Mr. ALEXANDER: Resolution (H. Res. 712) authorizing the Committee on Printing to have printed 5,000 copies of letters from the Secretary of the Treasury and Secretary of Commerce, transmitted in response to Senate resolution of December 18, 1914; to the Committee on Printing.

By Mr. BAKER: Resolution (H. Res. 713) to authorize the Committee on the Library to procure for the House a portrait in oil of the present Speaker, Hon. CHAMP CLARK; to the Committee on the Library.

By Mr. BULKLEY: Joint resolution (H. J. Res. 410) to create the national rural credit commission; to the Committee on Banking and Currency.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARNHART: A bill (H. R. 21205) granting an increase of pension to Nelson N. Boydston; to the Committee on Invalid Pensions.

By Mr. CARTER: A bill (H. R. 21206) granting a pension to James H. Johns; to the Committee on Pensions.

By Mr. CHURCH: A bill (H. R. 21207) granting an increase of pension to Julius L. Gilbert; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21208) for the relief of the Kern County Mutual Building & Loan Association, of Bakersfield, Cal.; to the Committee on Claims.

By Mr. COPLEY: A bill (H. R. 21209) granting a pension to Lillian G. W. Cobleigh; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21210) granting an increase of pension to John W. Groesbeck; to the Committee on Invalid Pensions.

By Mr. GUERNSEY: A bill (H. R. 21211) granting an increase of pension to Alfred Wheelden; to the Committee on Invalid Pensions.

By Mr. HAMLIN: A bill (H. R. 21212) granting a pension to Mary E. Dixon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21213) granting a pension to Peter Z. T. Lane; to the Committee on Invalid Pensions.

By Mr. HELM: A bill (H. R. 21214) granting an increase of pension to Delender Brown; to the Committee on Pensions.

By Mr. KELLY of Pennsylvania: A bill (H. R. 21215) to correct the military record of A. G. Vincent; to the Committee on Military Affairs.

By Mr. WICKERSHAM: A bill (H. R. 21216) granting an increase of pension to Christopher C. Kelly; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21217) granting an increase of pension to John H. Sullivan; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ASHBROOK: Petition of O. B. Thompson and 25 other citizens of Patoskola, Ohio, favoring creation of a world federation of peace; to the Committee on Foreign Affairs.

By Mr. BAILEY: Petition of sundry members of the Catholic Church of Spangler, Pa., protesting against the sending of the publication called the Menace through the mails; to the Committee on the Post Office and Post Roads.

Also, petition of Austrian Musik and Beneficial Society, of Johnstown, Pa., favoring passage of bill to prohibit export of munitions of war; to the Committee on Foreign Affairs.

Also, petition of Ferdinand Bittmann, Frank Lintner, Joseph Heinreich, Henry O. Frank, John Ladenberger, Jakob Streibein, Justin Wenk, Harry E. Hipps, John C. Schmalz, Frank Zips, William Seibel, Emil Kamler, C. A. Young, Frank Ling, John Rosenbaum, Josef Bittmann, Charles Partsch, Theodore Warner, Herman Rockstroh, Josef Feik, Joseph Shober, Henry C. Schmalz, John Beide, Joseph Henry, Vincenz Reppmyer, Andrew Hipps, Julius Bischof, William J. Becker, Frank Springer, Th. Hanitsch, E. Springer, Leopold Hepner, Ernest Bischof, Joseph Reidel, Rudolf Niern, and Ernest Auerwine, all of Johnstown, Pa., for legislation laying an embargo on the exportation of contraband of war; to the Committee on Foreign Affairs.

By Mr. BORCHERS: Petitions of citizens of Strasburg and Humboldt Township, Coles County, Ill., favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. BRUCKNER: Petition of Maritime Exchange of New York City, favoring bill to consolidate Revenue-Cutter Service and Life-Saving Service; to the Committee on Interstate and Foreign Commerce.

Also, petition of the National Association of Vicksburg Veterans, favoring appropriation for national celebration and peace jubilee at Vicksburg, Miss.; to the Committee on Appropriations.

Also, petition of the Board of Managers National Home for Disabled Volunteer Soldiers, relative to transportation for veterans to visit their national cemetery; to the Committee on Military Affairs.

Also, petitions of New York State League of Catholic Societies and the German Roman Catholic Central Verein, citizens of Mankato and vicinity, and L. H. Snyder, of New York City, favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petition of the American Mining Congress, favoring passage of House bill 15869, for betterment of the conditions of the miner; to the Committee on Mines and Mining.

Also, petitions of Willystine Goodsell and Harrison Berlitz, New York City, favoring passage of the Palmer-Owen child-labor bill; to the Committee on Labor.

Also, memorial of priests of Scranton (Pa.) diocese and J. J Curran, of Wilkes-Barre, Pa., protesting against sending publication called the Menace through the mails; to the Committee on the Post Office and Post Roads.

Also, petition of W. G. Taylor, of New York City, protesting against amendment to the Post Office appropriation bill, relative to freedom of the press; to the Committee on the Post Office and Post Roads.

By Mr. BURKE of Wisconsin: Petition of Rev. Richard E. Kerschke and 28 other citizens of Adell, Wis., asking for the passage of Senate bill 6688, or any similar measure, to levy an embargo upon all contraband of war, save foodstuffs, wearing apparel, and surgical supplies; to the Committee on Foreign Affairs.

Also, petition of Carl Schwefel and 48 other citizens of the town of Lebanon, Dodge County, Wis., asking for the passage, at this session, of Senate bill 6688, or any similar measure, to levy an embargo on all material useful in war, save foodstuffs and wearing apparel and surgical supplies only; to the Committee on Foreign Affairs.

Also, petition of Rev. D. J. Bernthal, John Harmening, and 48 other citizens of Ixonia, Wis., asking for the passage of Senate bill 6688, or any similar resolution, to levy an embargo on all ammunition and contraband of war; to the Committee on Foreign Affairs.

Also, petition of Rev. G. Kaniess and 38 other citizens of Kewaskum and vicinity, Wis., asking for the passage of Senate bill 6688, or any similar measure, to levy an embargo on all material useful in war, save foodstuffs and wearing apparel and surgical instruments only; to the Committee on Foreign Affairs.

Also, petition of H. W. Hennig and 53 other rural citizens of the vicinity of West Bend, Wis., asking for the passage at this session of House joint resolution 377, to levy an embargo upon and prohibit the exportation of arms, ammunition, etc., from this country; to the Committee on Foreign Affairs.

Also, resolutions adopted by the Watertown (Wis.) Branch of German-American Alliance, asking for the passage of a law to lay an embargo and prohibit the exportation of arms, ammunition, etc., to any of the European countries now engaged in war; to the Committee on Foreign Affairs.

By Mr. BUTLER: Petitions of Staatsverbund of Pennsylvania with Pennsylvania State League and German Roman Catholic Verein, favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. CARY: Petition of Richard Schwartneg, Dr. E. Schenk, Adolph Barlotonts, Joseph Bluemel, Phil Marx, and 293 others, all residents of Milwaukee County, indorsing and urging the passage of House joint resolution 377; to the Committee on Foreign Affairs.

By Mr. DALE: Memorial of Louisiana mass meeting committee for the furtherance of American neutrality, and German Roman Catholic Central Verein, of Brooklyn, N. Y., favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. DILLON: Petition of citizens of South Dakota, favoring embargo on export of arms; to the Committee on Foreign Affairs.

By Mr. DONOVAN: Petition of sundry citizens of Danbury, Conn., favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. DOOLITTLE: Petition of 24 citizens of Lincolnville, and 104 citizens of Lyndon, Kans., favoring embargo on munitions of war; to the Committee on Foreign Affairs.

By Mr. ESCH: Memorial of Louisiana mass meeting committee for the furtherance of American neutrality, New Orleans, La., and Samuel Schreiber and 43 citizens of Prairie du Sac, Wis., favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. FLOYD of Arkansas: Petition of citizens of Arkansas favoring abolishing the Ozark National Forest Reserve; to the Committee on the Public Lands.

Also, petition of citizens of the State of Arkansas, asking Congress to complete the system of locks and dams on White River between Batesville and Cotter, in Arkansas; to the Committee on Rivers and Harbors.

By Mr. GILLETT: Petition of Germania Club of Springfield, Mass., favoring passage of bill to prohibit export of munitions of war; to the Committee on Foreign Affairs.

By Mr. GOEKE: Petition of L. Loehr and 12 others, of Shelby County, Ohio, favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. JOHNSON of South Carolina: Petitions of H. C. Lupo and about 1,000 other citizens of Greeville, S. C.; also of about 20,000 citizens from various parts of the United States, praying the enactment of some law that will permit a citizen in the position of Harry K. Thaw to return to his home; to the Committee on the Judiciary.

By Mr. KEISTER: Petitions of Transfiguration Lodge, No. 164, Mount Pleasant; Branch 1147, National Polish Alliance, Smithton; St. Stanislaus Lodge, B. and N., No. 607, Freedom Lodge, National Polish Alliance, and Polish Falcons, Nest No. 41, all of New Kensington; St. Jana Chrg., Z. N. P., Mammoth; and Branch 680, National Polish Alliance, of Hannastown, all in the State of Pennsylvania, against Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. KENNEDY of Rhode Island: Petition of Ferdinand F. Fanning, of Providence, R. I., protesting against the treatment of Catholics in Mexico; to the Committee on Foreign Affairs.

By Mr. LIEB: Petitions of Evansville Central Labor Union, by Chester Bickel, secretary, and William G. Steinmetz, Peter Klaser, Eugene Walker, W. R. Burnett, George Richrich, Howard Overlin, John P. Alt, Carl W. Willern, G. W. Harmon, John Henderson, Louis Taylor, Luke Hammond, Esslenger Printing Co., Phil F. Voelker, Andrew G. Dunn, J. W. Blurch, Ed Davis, Elvis Kinder, Henry Hammer, Ira R. Garrison, John J. Nolan, Charles P. Beard, William E. Shaffer, James Fitzwilliams, J. M. Pike, W. A. Hester, Adolph A. Althiede, Harry Woehler, Frank C. Gore, Stephen Kiely, Arlington R. Penn, Albert F. Hetherington, William J. Kennedy, Philip Temple, F. W. Alexander, Charles W. Wittenbraker, W. A. Korch, Ed. M. Crisp, H. M. Crisp, H. W. North, Howard H. Cox, George Decker, William Warren, George H. Hauser, Gus A. Myer, Margaret Viele, W. C. Gleason, Henry Stockenbarn, Frank C. Gregory, T. C. Davis, Henry C. Wolsiffer, Bernard H. Fiester, S. D. Thompson, Charles Finley Smith, and Louis F. Yokel, all of Evansville, Ind., and John H. Ashmead, of Princeton, Ind., favoring the Hamill bill for the retirement of the aged and infirm Government employees; to the Committee on Reform in the Civil Service.

Also, petitions of the St. Anthony Benevolent Society, by Charles Muth, president, and John Fraser, secretary; and the St. Henry Society, by George Gloes, president, and Benedict Lindenberger, secretary, of Evansville; Julius Egbert, Chris W. Siebe, and John R. Wellmeyer, of Stendal; John Schlundt, of Wadesville; and the St. John Evangelical Brotherhood, by Rev. R. G. Kerz, Jacob Arend, W. W. Haas, Rinehold F. Haas, F. W. Rauth, Fred C. Begeman, Ernest Klodt, C. F. W. Inderriden, Otto C. J. Roller, William Rowell, C. H. Bohrer, Fred W. Rauth, and Charles Karb ,of Boonville, all in the State of Indiana, favoring House joint resolution 377, to forbid export of arms; to the Committee on Foreign Affairs.

Also, petitions of Local Union No. 287, United Mine Workers of America, by William F. Vonderschu, secretary, of Newburg; Local Union No. 21, United Mine Workers of America, by Luther Hedrick, secretary, of Princeton; and Local Union No. 1243, United Mine Workers of America, by legislative committee composed of Ed. Thurber, A. J. Buffkin, and Fred Helen, of Boonville, all in the State of Indiana, favoring Kern-Foster bill for a further extension of the work of the Bureau of Mines; to the Committee on Mines and Mining.

Also, petitions of John McLain, William Alstott, and Golden Rule Council, No. 5, on behalf of Charles P. Fettinger, all of Winslow, Ind., favoring House bill 6060; to the Committee on Immigration and Naturalization.

Also, petition of the Polish National Alliance of United States of North America, Assembly No. 247, Frank Schymik, president, and August Grabowski, secretary, of Evansville, Ind., protesting against Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of A. F. Karges, president Karges Furniture Co., of Evansville, Ind., favoring passage of House bill 5308, for taxing mail-order houses; to the Committee on Ways and Means.

Also, petitions of W. H. Mushlitz and Dr. J. Y. Welborn, of Evansville, Ind., favoring a national investigation of North Pole controversy; to the Committee on Naval Affairs.

By Mr. LOBECK: Memorial of citizens of Los Angeles, Cal., and 50 citizens of Omaha, Nebr., favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. LONERGAN: Petition of Women's Polish Alliance of Hartford, Conn., protesting against passage of the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. MAGUIRE of Nebraska: Petition of citizens of Humboldt, Nebr., favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. MAHAN: Petition of Rev. Walter van Schenk and others, of Rockville, Conn., favoring embargo on exports of arms; to the Committee on Foreign Affairs.

By Mr. RAKER: Memorial of citizens of Mankato and vicinity, protesting against exportation of war material; to the Committee on Foreign Affairs.

By Mr. RIORDAN: Petition of Board of Aldermen of New York City, favoring Senate bill 3672, providing for exchange between the Federal Government and State of New York of certain waterways; to the Committee on Rivers and Harbors.

By Mr. SELDOMRIDGE: Petitions of F. N. Morgan and citizens of Colorado Springs, Colo., favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petition of Pueblo (Colo.) German and Austrian Widows and Orphans War Sufferers' Society, favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

Also, memorial of Eldorado Council, No. 1114, Royal Arcanum, Colorado Springs, Colo., favoring passage of the Hamill bill, relative to retirement of aged Government workers; to the Committee on Reform in the Civil Service.

By Mr. SMITH of Texas: Petition of Joe Sayers Camp, No. 1394, United Confederate Veterans, of Stamford, Tex., favoring placing all veterans of Confederate and Union Armies on equality; to the Committee on Invalid Pensions.

By Mr. TALCOTT of New York: Petition of citizens of Little Falls, N. Y., favoring passage of Senate bill 3672, relative to

Improvement of Harlem River; to the Committee on Rivers and Harbors.

Also, petition of citizens of Rome, N. Y., favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. UNDERHILL: Petition of Louisiana mass meeting committee, for the furtherance of American neutrality, protesting against exportation of war material; to the Committee on Foreign Affairs.

By Mr. VOLLMER: Petition of the German Mechanics' Aid Society of Muscatine, Iowa, comprising a membership of 206, to lay an embargo upon all contraband of war; to the Committee on Foreign Affairs.

Also, petition of 815 American citizens, for the adoption of House joint resolution 377, prohibiting the export of war materials; to the Committee on Foreign Affairs.

Also, petition of the Allegheny County Neutrality League, Pittsburgh, Pa., to prohibit the export of munitions of war; to the Committee on Foreign Affairs.

Also, petitions of 31 American citizens of Muscatine, Iowa, for the adoption of House joint resolution 377, prohibiting the export of war materials; to the Committee on Foreign Affairs.

By Mr. YOUNG of North Dakota: Petition of Carl Schumaker and others, of Enderlin, N. Dak., protesting against exportation of war materials; to the Committee on Foreign Affairs.

SENATE.

THURSDAY, *January 28, 1915.*

(Legislative day of Tuesday, January 26, 1915.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

WITHDRAWAL OF ORDER FOR YEAS AND NAYS.

Mr. SMOOT. Mr. President, when we took a recess last evening the yeas and nays had been ordered on taking up the bill (H. R. 13044) to pension widows and minor and helpless children of officers and enlisted men who served during the War with Spain or the Philippine insurrection or in China between April 21, 1898, and July 4, 1902. I at this time ask unanimous consent that that order be set aside. I desire to withdraw it because I want the discussion of the shipping bill to proceed during the daytime and to have no other bill considered. I therefore ask unanimous consent to withdraw the order for the yeas and nays and also the motion to proceed to the consideration of the bill.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	Perkins	Sterling
Brady	Hollis	Pittman	Stone
Brandegee	Hughes	Ransdell	Sutherland
Bryan	James	Reed	Swanson
Catron	Jones	Robinson	Thomas
Chamberlain	Kenyon	Saulsbury	Thornton
Clapp	Kern	Sheppard	Townsend
Clark, Wyo.	Lane	Sherman	Vardaman
Culberson	McCumber	Shields	Walsh
Cummins	Martine, N. J.	Shively	White
Dillingham	Myers	Smith, Ariz.	Williams
Fletcher	Nelson	Smith, Ga.	Works
Gallinger	O'Gorman	Smith, Mich.	
Gronna	Page	Smoot	

Mr. CHAMBERLAIN. I desire to announce that the junior Senator from South Carolina [Mr. SMITH] is detained by illness.

Mr. KERN. I wish to announce that the senior Senator from Illinois [Mr. LEWIS] is unavoidably absent on account of illness. This announcement may stand for the day and for the next several days.

The VICE PRESIDENT. Fifty-four Senators have answered to the roll call. There is a quorum present. The Chair desires to ask whether there will be any objection to the Chair announcing his signature to a bill? The Chair hears none.

ENROLLED BILL SIGNED.

The VICE PRESIDENT announced his signature to the enrolled bill (S. 5614) for the improvement of the foreign service, which had heretofore been signed by the Speaker of the House of Representatives.

THE MERCHANT MARINE.

Mr. SUTHERLAND. Mr. President, I desire to give notice that on Saturday next, immediately after the conclusion of the routine morning business, I will submit some observations on the pending bill.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had approved and signed the following acts:

On January 26, 1915:

S. 4012. An act to increase the limit of cost of the United States public building at Grand Junction, Colo.; and

S. 6309. An act to establish the Rocky Mountain National Park in the State of Colorado, and for other purposes.

On January 28, 1915:

S. 2337. An act to create the Coast Guard by combining therein the existing Life-Saving Service and Revenue-Cutter Service.

THE MERCHANT MARINE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. WALSH obtained the floor.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from New Hampshire?

Mr. WALSH. I do.

Mr. GALLINGER. I had intended to conclude to-day my observations on the pending amendment submitted by the Senator from Massachusetts [Mr. LODGE], but the Senator from Montana having given notice that he would speak, and understanding that the junior Senator from Illinois [Mr. SHERMAN] likewise wishes to speak to-day, I will postpone the further discussion of the measure until a convenient time in the future, which I hope will be to-morrow.

ON THE RIGHTS OF NEUTRALS TO PURCHASE SHIPS OF BELLIGERENTS.

Mr. WALSH. Mr. President, in the course of the discussion to which the pending bill has given rise doubts have been expressed, from time to time, as to its wisdom lest through its operation our country should become involved in international complications of a grave character or even be drawn into the maelstrom of the awful conflict now raging in Europe. It contemplates both the construction and the purchase by the Government of ships to meet the crying necessities for means to transport our products to foreign markets, such ships to be operated, leased, or chartered by a corporation to which they are to be transferred, of the stock of which corporation the United States shall own at least a majority. The immediate need is so imperative in character in the view of the supporters of the measure as scarcely to brook the delay incident to construction.

It is assumed, accordingly, that an effort will be made to acquire by purchase the vessels deemed essential to meet the exigency which has arisen. In this connection it is advanced that ocean freights are now so high, the business for which they are suited is now so profitable, that no ships can be bought save those of Germany and Austria interned in our ports and in theirs and those of other neutral nations. It is said that such bottoms either are subject to capture and confiscation, though sailing under our flag upon registry effected upon a sale made since the commencement of hostilities, or that the right of a belligerent to treat such property as continuing in the nation under whose flag it enjoyed protection at the outbreak of the war, is involved in so much doubt and obscurity that its seizure is to be anticipated. It is denied, however, that the interned ships are the only ones available for purchase, and the assertion is made with much confidence that judging from the number already offered no difficulty will be encountered in securing a tonnage quite sufficient for the enterprise for which the bill makes provision, though no German ships are acquired. If these are or may be regarded as eliminated, it follows, necessarily, that the price that will be asked for those which remain in the market will be materially enhanced, and the likelihood of the success of the venture will be proportionately diminished.

The antagonists of the bill rarely assert unequivocally that under acknowledged rules of international law the interned ships would become lawful prize should they be purchased and sent out under the American flag. They content themselves ordinarily with vague language implying that the inquiry as to

whether they would or would not be immune leads the mind into a maze so confusing as to forbid that it reach any definite or safe conclusion, and without pointing out the consequences likely to flow from a difference of opinion on the question leave the imagination of the auditor or reader to conjure up a fratricidal war as the necessary and inevitable consequence.

In any aspect of the case it is extremely desirable to know just what risk would be encountered should the Shipping Board purchase any of the German ships now in our waters and put them into the transoceanic trade through the instrumentality of the corporation for whose organization the bill provides. The main question involved will, in all probability, be presented by the case of the *Dacia*, the seizure of which on her voyage from Galveston to Rotterdam is, to judge from the press reports, imminent. I rejoice that in the duty devolving upon me of laying before the Senate the results of a somewhat careful study of the subject, I am privileged to say that, assuming the transfer of the *Dacia* to be bona fide, there is abundant reason to believe her immune from condemnation under the rules of international law, and that restitution will be due from any nation that interferes with her on the trip on which she is about to set out. It is a source of gratification to me that in the discharge of my obligation as a Member of this body, I am not required to give support to any theory of legal principles that may embarrass a fellow countryman in a controversy with a powerful nation or to take any position that may plague our Government in any effort it may make to obtain redress for him from it. His cause, assuming that he has bought in good faith, is our cause, and not alone our cause but the cause of neutral trade the world over.

The right of neutrals to purchase ships of a belligerent after the commencement of hostilities and to invest them with the security which attends other craft lawfully flying the neutral flag, has been stoutly maintained by both Great Britain and the United States for more than a hundred years. France has never formally accepted this doctrine, but she has acquiesced in it to such an extent, it has acquired such general recognition among the publicists of the world, that it is unbelievable that she would attempt to disregard it and appeal, as she must, to the judgment of the nations of the earth among whom she would stand practically alone. As for Great Britain, she stands committed to the view indicated so firmly that no honorable avenue of escape is open, even though it could be conceived she might desire to see it overturned. Her great judges reasserted and enforced the rule throughout the trying times of the Napoleonic wars when the very existence of the nation was at stake. It was applied in favor of the citizens of feeble States, and the subjects of petty princes whose favor she had no occasion to court and whose ill will she had no cause to dread. The Crimean War again brought the question before her courts, and again the rule that gave her distinction as the champion of the rights of neutrals as against the arrogant claims of belligerents was vigorously asserted and maintained.

The distinguished senior Senator from New York, whose views upon all questions of international law justly command the attention of the Senate and the country, advanced the argument before this body on Monday last that Great Britain had, by her adherence to the Declaration of London, receded from the position which her statesmen and jurists have held for over a century upon this important question, and that that country is now committed to a doctrine under which the purchase of any German ships effected since the war began must be treated as a nullity.

It is a salutary rule that new statutes are to be interpreted in the light of those which they displace. If there is any ambiguity in the language of the Declaration of London, it is evidently wise that it be examined in the light of the law and the practice of the nations participating in its preparation on the subject concerning which any controversy may arise. If it is claimed that substantial and important concessions were made by any nation, it will be wise to inquire with what vigor and consistency it had theretofore proclaimed and observed the doctrine which it is said to have abandoned.

AS MAINTAINED BY ENGLAND.

The law of England on the subject of the right to transfer ships from the flag of a belligerent to that of a neutral after a declaration of war or the commencement of hostilities is succinctly stated in a single paragraph of a manual prepared by Thomas Erskine Holland and issued in 1888 by authority of the Lord Commissioners of Admiralty for the guidance of the officers of the navy, as follows:

A vessel apparently owned by a neutral is not really so owned if acquired by a transfer from an enemy, or from a British or allied subject, made at any time during the war, or previous to the war but in contemplation of its breaking out, unless there is satisfactory proof that the transfer was bona fide and complete. (Holland, par. 53, p. 17.)

The instructions continue:

WHAT ARE ENEMY VESSELS.

19. The commander will be justified in treating as an enemy vessel:
(1) Any vessel under the flag and pass of the enemy Government.
(2) Any vessel sailing under a license of the enemy Government.
(3) Any vessel owned in whole or in part by an enemy, as hereinafter defined (see secs. 20–30).
(4) Any vessel apparently owned by a British, allied, or neutral subject, as hereinafter defined (see pars. 41, 42, 49, 55, 56), if such person has acquired the ownership by a transfer from an enemy made after the vessel had started upon the voyage during which she is met with and has not yet actually taken possession of her.
(5) Any vessel apparently owned by a British, allied, or neutral subject, if such person has acquired the ownership by a transfer from an enemy made at any time during the war, or previous to the war but in contemplation of its breaking out, unless there is satisfactory proof that the transfer was bona fide and complete. In the event of such a transfer being alleged, the commander should call for the bill of sale, and also for any papers or correspondence relating to the same. If the bill of sale is not forthcoming, and its absence is unaccounted for, he should detain the vessel. If the bill of sale is produced, its contents should be carefully examined, especially in the following particulars:
(a) The name and residence of the vendor.
(b) The name and residence of the purchaser.
(c) The place and date of the purchase.
(d) The consideration money and the receipt.
(e) The terms of the sale.
(f) The service of the vessel and the name of the master, both before and after the transfer.

The name and residence of the vendor are material to show whether or not he was an enemy.

The name and residence of the purchaser are material to show whether or not he was a person resident in British, allied, or neutral territory.

The date and place of the purchase are material to show whether or not the transfer was made in contemplation or in consequence of the war.

The consideration money is material, in case the vessel is alleged to have been transferred by sale, to show whether or not the transaction was bona fide; for if the transaction was professedly a sale, then the fact that the consideration was nominal or wholly inadequate would be a just cause for suspicion. But a transfer by way of gift or bequest will, if bona fide and complete, be as valid as a transfer by way of sale.

The receipt for the purchase money should be called for in case the vessel is alleged to have been transferred by sale; but if there is proof that the sale was bona fide and in other respects complete, the transfer will be good, although no receipt is forthcoming, and even though the purchase money has not in fact been paid, for the prize court does not consider any lien which an enemy vendor may have upon a vessel or cargo or freight for unpaid purchase money to be a subsisting enemy's interest rendering the vessel liable to confiscation. However, the fact that the purchase money, instead of having been paid in cash, has only been carried to an account will raise the presumption of the transfer being merely colorable, and such presumption can be rebutted only by clear proof to the contrary.

The terms of the sale are material to show whether the transfer was complete. The transfer would not be complete if the sale was not absolute, as if it contained a power of revocation, or a condition for a return of the vessel at the close of the war, or a reservation of the profits of the vessel, or of any control over her to be left in the hands of the former owner.

The service of the vessel and the name of the master, both before and after the transfer, are material to show whether or not the transfer be a genuine one, for if the service has continued unaltered by the transfer the commander will be justified in holding the transfer to be colorable only. The fact that the same master is retained in command after the transfer raises a suspicion, but standing alone will not be conclusive that the transfer was not bona fide.

If the transfer is bona fide and complete as between the parties, the fact that it was effected in fraud of the revenue or the law of the mercantile marine of any foreign country will be immaterial.

If the purchase was made through an agent, the letters of procuration should be called for.

The principle upon which the doctrine thus announced rests is sublimely simple. It is that a neutral nation may trade with either belligerent, except in contraband. The neutral may buy anything from the belligerent. If property of a citizen of a belligerent nation is sold and transferred to a citizen of a neutral country, it is his, and as much entitled to be regarded as his, as much entitled to protection and to immunity, as though he had produced it in his own country or acquired it from a fellow citizen. If an American should purchase a cargo in a German port, of German citizens, and carry it out upon the high seas in a German vessel, he might claim his goods, though the vessel should be seized and condemned. Very strict proof would be required of him to establish that he was, in fact, the owner of the goods; that they had actually been transferred to him; but assuming that fact to be established, they are not subject to lawful seizure. The doctrine which the English and the American courts have rejected and repudiated is that ships, and ships alone of all the infinite forms and varieties which property may take, constitute an exception to this rule. The sale of a ship may be simulated, as may the sale of any other species of property. In such case the liability to capture remains, because there is, in fact, no transition of ownership. It is to prevent a successful imposture that the stringent rules referred to are prescribed in the case of a pretended sale and transfer after a state of war arises.

That there may remain no doubt as to the English rule, I quote from III Phillimore's International Law, page 735, the

author of which work was an eminent practitioner before the admiralty court in prize cases and later a judge thereof, the following:

In respect to the transfers of enemies' ships during war, it is certain that purchases of them by neutrals are not, in general, illegal; but such purchases are liable to great suspicion; and if good proof be not given of their validity by a bill of sale and payment of a reasonable consideration it will materially impair the validity of the neutral claim.

And the following from the opinion of the Lords of the Privy Council in the case of the *Baltica* (XI Moore, 141–145):

The general rule is open to no doubt. A neutral while a war is imminent or after it has commenced is at liberty to purchase either goods or ships—not being ships of war—from either belligerent, and the purchase is valid, whether the subject of it be lying in a neutral port or in an enemy's port. During a time of peace, without prospect of war, any transfer which is sufficient to transfer the property between the vendor and the vendee is good also against a captor if war afterwards unexpectedly breaks out. But in case of war, either actual or imminent, this rule is subject to qualification, and it is settled that in such case a mere transfer by documents which would be sufficient to bind the parties is not sufficient to change to property as against captors as long as the ship or goods remain in transitu.

With respect to these principles their lordships are not aware that it is possible to raise any controversy; they are the familiar rules of the English prize courts, established by all the authorities, and are collected and stated, principally from the decisions of Lord Stowell, by Mr. Justice Story in his Notes on the Principles and Practice of Prize Courts, a work which has been selected by the British Government for the use of its naval officers as the best code of instruction in the prize law. The passages referred to are to be found in pages 63 and 64 of that work.

In view of this interesting tribute to Justice Story I quote the passages to which reference is made from his manual:

In respect to the transfers of enemies' ships during the war it is certain that purchases of them by neutrals are not in general illegal; but such purchases are liable to great suspicion, and if good proof be not given of their validity by a bill of sale and payment of a reasonable consideration it will materially impair the validity of the neutral claim; and if the purchase be made by an agent, his letters of procuration must be produced and proved; and if after such transfer the ship be employed habitually in the enemy's trade or under the management of a hostile proprietor, the sale will be deemed merely colourable and collusive. But the right of purchase by neutrals extends only to merchant ships of enemies, for the purchase of ships of war belonging to enemies is held to be invalid, and a sale of a merchant ship made by an enemy to a neutral during war must be an absolute unconditional sale. Anything tending to continue the interest of the enemy in the ship vitiates a contract of this description altogether. (Story on Prize Courts, p. 63.)

The case of the *Baltica* is of particular importance in the inquiry being pursued in view of the ingenious theory advanced by the eminent Senator from New York that under the Declaration of London a ship sold because she was likely to be captured by an enemy should she issue forth from her haven upon the high seas would still be legitimate prize, though she sailed under a neutral flag, the emblem of the nation of her new owners.

The *Baltica* was one of a number of ships giving rise to what are known as the Sorensen cases. Sorensen, at the breaking out of the Crimean War, was domiciled in Russia and was held to be a subject of that country. He owned quite a fleet of ships, and anticipating that the war was about to break out he transferred them all to his son, who claimed and established his right to the protection of a citizen of Denmark. The circumstances attending the sale naturally cast suspicion upon it, but the bona fide character of the transaction was established to the satisfaction both of the court of first instance and the higher tribunal to which the case went on appeal. That is to say, the sale was actual, not simulated; the title to the property was transferred, the vendor retaining no interest in the ships themselves and no right to have them returned to him at the close of the war or at any time. But it was frankly admitted that Sorensen senior parted with his property in the vessels because of the conditions sure to arise on the breaking out of the war. The eminent judge of the admiralty court, Dr. Lushington, said, in his opinion in the case:

The great principle by which I am to be guided in this inquiry is whether there is a transaction such as would accord with the ordinary course of trade, by which I mean not the purchase of this particular ship per se, for no one can doubt that this ship would not have been sold, and certainly not for the price, save for apprehension of the war; but whether independently of that motive, the transaction itself, the mode of sale and of payment was accordant with the ordinary custom of merchants during peace. (Spinks, 264.)

In all these respects he found the transaction unexceptionable except that under the agreement of sale one-third of the purchase price was to be, and had been, paid in cash, the remainder to be paid out of the earnings of the vessels. Because of this feature the lower court held that the sale was not absolute, or at least that the vendor retained such an interest as made the *Baltica* subject to confiscation. The Privy Council reversed the judgment and liberated the ship, maintaining that the transfer of title was complete, and that the claim upon the earnings did not amount to the retention of an interest in the ship itself. The feature that the sale was made in view of the imminency of war was not adverted to by the Lords of the Privy Council in their opinion in the case of the *Baltica*, but in that of another of the ships transferred under like circumstances—the *Ariel*—they said, having referred to the dates of incidents connected with the sale and the date of the declaration of war:

These dates seem of themselves to show that the sale was made in contemplation of war and imminente bello in a popular sense; but the evidence in the case goes further and shows conclusively that the Russian shipowners at Libau, feeling that war was at hand and that they could not employ their ships under the Russian flag, determined, on consultation, to sell their vessels, even at considerably reduced prices, rather than to keep them unemployed in Russian ports. It is argued that war can not be said to be imminent unless there be an embargo or some similar act of the country about to be belligerent, and cases are cited in which such circumstances have occurred, but none of those cases go the length of laying down any positive rule as to the necessity of such circumstances. Their lordships are of opinion that there is abundant proof that the sale was made imminente bello and in contemplation of it. Still, if the sale was absolute and bona fide, there is no rule of international law, as laid down by the courts of this country, which makes it illegal. Such a bona fide sale, made even flagrante bello, would be legal, much more imminente bello. (XI Moore, 128.)

The *Ariel* was likewise released. These captures had been made by the British Navy. The executive branch of the Government charged with the conduct of the war was insisting that the ships in question were lawful prize, but the courts of England vindicated the renown and added to the glory of English law by ordering that they be surrendered to the lawful owners.

The unequivocal declaration of the Lords of the Privy Council in the case of the *Ariel*, that under the rules of international law, as asserted by the English courts, a sale made because a state of war was imminent, or even because of the existence of such, is valid and to be respected, was fully justified by the decisions of the High Court of Admiralty, when Lord Stowell presided over its deliberations.

In the opinion in the case of the *Minerva* (6 C. Rob., 399) he said:

There have been cases of merchant vessels driven into ports out of which they could not escape and there sold, in which, after much discussion and some hesitation of opinion, the validity of the purchase has been sustained.

A note to the report of that case explains the reference in the language quoted, as follows:

(a) The *Nieuwe Vriendschap, Knuttel* (b), and other Dutch ships that had been lying with their cargoes on board at Curacao near two years in expectation of convoy, and were asserted to have been sold in that situation to imperial subjects and other neutral claimants.

AS ASSERTED BY THE UNITED STATES.

The attitude of the jurists of America on the important subject of our inquiry was disclosed in the extracts read from the work of Justice Story. It is quite commonly known that France has in the past proclaimed a different doctrine. The question which now so seriously confronts us was equally live and practical at the outbreak of the Crimean War. It was within the period when our merchant marine was a source of pride to every American, when the Stars and Stripes greeted the traveler in every great port of the world, when ships flying our flag played a very important part in bearing not alone our commerce but as well that carried on between foreign nations. In that situation the Attorney General of the United States, the Hon. Caleb Cushing, whose career has added luster to the American bar, in response to a request from the State Department, expressed in two formal opinions the rule of international law concerning the right to transfer ships from the flag of a belligerent to the flag of a neutral. No concern could have been felt at the time by those who might find it to their interest to buy, concerning the attitude of England, for her position was well known. So far as any anxiety was felt on the part of those most directly interested it must have been over the case which France might be able to make in favor of the doctrine she was understood to espouse.

(A) POSITION OF THE DEPARTMENT OF JUSTICE.

I quote first from a communication made by Mr. Cushing to the Secretary of State, under date of August 7, 1854:

It is true that the prize regulations occasionally issued by some belligerent nations have undertaken to prescribe a limitation in time of war of the right to purchase, naturalize, and neutralize foreign ships to the effect that in order to exempt from capture in the hands of a neutral a merchant ship purchased from the belligerent it must be shown that she was so purchased before the existing war or else after capture and lawful condemnation. (Hubner, De la Saisie des Batimens Neutres, tom. 1, pt. 2, ch. 3, s. 10, No. 4.)

France, by the prize regulations of July 23, 1704, article 7 (Lebeau, Nouveau Code des Prises, tom. 1, p. 332), and by those of July 26, 1778, article 7 (Lebeau, tom. 4, p. 342), enacted that no vessel of enemy's construction or which had been at any time of enemy's ownership should be reputed neutral without proof that the sale to the neutral owner was made before the commencement of hostilities. (Merlin, Repertoire, Prise Maritime, s. 3, art. 3, p. 144.)

Russia, on the other hand, at all times just in her appreciation of neutral rights, has in her wars with Turkey, where the question is a practical one, admitted that a ship of belligerent construction when it has become the property bona fide of a neutral, though purchased by him after the commencement of war, is not subject to molestation. (Hautefeuille, ubi supra, tom. 4, p. 28, note.)

The injustice and unreasonableness of making any distinction in this respect between ships and any other species of property were long since indicated (Lampredi, Del Commercio dei Popoli neutrali in Tempo di Guerra, pt. 1, s. 12, note), and this belligerent encroachment on the sovereignty and the rights of neutrals, notwithstanding that it continues to be asserted by some States, is rejected by the most authoritative writers on the public law of Europe. (See Hautefeuille, ubi supra, title 11, ch. 2.)

The exercise of commerce by every nation is one of the incidents of its sovereignty. The sovereign rights of a particular nation are not to cease whenever any two other nations choose to go to war. The neutral State is to conduct impartially between the belligerents, but its commerce remains free with respect to them and to each of them. That commerce is without limitation saving only the restrictions as to contraband of war and places besieged, blockaded, or invested, and thus restricted it extends in principle to all the possible objects of mercantile intercourse.

No Government has a right to contest the validity of the sale of a ship on the pretense of its having been at one time belligerent property. To undertake to do this is to usurp a jurisdiction over the business of other nations; it is to derogate from their independence; it is a mere abuse of force which a strong nation may impose on a weak one, but which every strong nation should indignantly repel, as it repels the pretension of the exclusive dominion of the sea by any one State. (6 Op., 642.)

On October 8, 1855, he addressed a further letter to the Secretary, in which, after adverting to his earlier communication, he continued:

Since that opinion was delivered several treatises of more or less value on belligerent law have been published in Great Britain adapted to current events and to the present state of the science of jurisprudence. They agree unanimously that the bona fide sale of the ships of belligerents to neutrals in time of war is lawful and valid unless made in transitu. (Hosack, Rights of British and Neutral Commerce, p. 81; Lock, Legal Guide of Sailors and Merchants during War, p. 129; Wildman, Law of Search, Capture, and Prize, p. 26; Hazlitt and Roche, Law of Maritime Warfare, p. 46.)

A still more important fact in this relation is the decision of the British high court of admiralty in a late case of a vessel captured as Russian, but claimed as the property of a Hamburger by purchase since the commencement of hostilities. In this case the court (Dr. Lushington) says, "With regard to the legality of the sale, assuming it to be bona fide, it is not denied that it is competent to neutrals to purchase the property of enemies in another country, whether consisting of ships or anything else. They have a perfect right to do so, and no belligerent right can override it. The present inquiry, therefore, is limited to whether there has been a bona fide transfer or not." (The Johanna Emilia, English Reports in Law and Equity, vol. 29, p. 562.)

Thus it is perceived that now in Great Britain not only is it held that neutrals have right to purchase belligerent vessels by the law of that country, but also by the law of nations; that the right is "perfect," and that "no belligerent right can override it."

I am not aware of any assumed belligerent right adverse to this, except in a French regulation of the reign of Louis XVI, as follows:

"Regulation of July 26, 1778. Article 7. Ships of enemies' construction, or which shall have been enemies' ownership, can not be regarded as neutral or as belonging to allies unless there be found on board certain documents, authenticated by public officers, certifying the date of sale or cession, and that such sale or cession had been made to the subject of an allied or neutral power previous to the commencement of hostilities, and that the said conveyance of an enemy's property to the subject of a neutral or an ally has been duly registered in presence of the principal officer of the place from which the vessel sailed and signed by the owner of the ship or by a person holding power of attorney from him." (Lebeau, Nouveau Code des Prises, tom. 2, p. 342.)

This regulation is defended and commended in a recent French treatise on prize law, with singular inconsistency, considering the just pride which the authors express in a view of the contemporary success of the French and American doctrine of neutral rights in the matter of the immunity of merchandise on board of neutral ships of commerce. (Pistoye et Duverdy, Traite des Prises Maritimes, tom. 1, p. 350; tom. 2, p. 1.)

It is remarkable also that while they carefully expose the difference between the English and the French public law in the first case, yet they as carefully suppress all indication of that law in the second case, although they quote several recent prize trials in the British court of admiralty which involve inquiry on collateral relations of the same great question, and the due understanding of which, in France, required that the English rule should be stated, at least by way of commentary, if not of approbation. (Tom. 2, p. 15.)

It is remarkable for the further reason that other French authors of deserved authority had pointedly condemned the regulation of Louis XVI. (See Hautefeuille, Droits et Devoirs des Nations Neutres, tom. 4.)

Rumor asserts that the regulation has been applied during the present war to the case of a Russian merchantman, purchased by a Spaniard, in the port of Cadiz.

But, considering the liberal character of the traditional public policy of France in the matter of neutral rights—a policy which, it is apparent, in other respects has the enlightened approval of the present Emperor of the French—it is not to be presumed that the French Government will assert this regulation adversely to the public law recognized not by neutrals merely like the United States, but by one of the two principal cobelligerents, Great Britain. We may rather anticipate that the Emperor, justly gratified to see England come up to the policy of France in regard to neutral transportation of belligerent goods, will not choose to remain behind England in regard to the purchase and sale of belligerent ships.

It is not recorded that the French Emperor disregarded the obvious warnings of these virile public letters. Whatever support has been given by France since the middle of the last century to the rule of Louis XVI has been purely academic. She paid no heed to it in the Crimean War nor in the war with Germany in 1870 nor during the war with China in 1884, as will be hereafter shown.

(B) POSITION OF THE DEPARTMENT OF STATE.

In the contingency which brought out the letters of Attorney General Cushing, our Government took occasion to bring, in a most direct manner, to the attention of the French authorities, the attitude it would be compelled to take on the question being considered.

On the 19th of February, 1856, Mr. Marcy, Secretary of State, addressed a letter of instructions to Mr. Mason, our ambassador at the court of France, in the course of which he said:

The law of nations secures to neutrals unrestricted commerce with the belligerents, except in articles contraband of war and trade with blockaded or besieged places. With these exceptions commerce is as free between neutrals and belligerents as if it were carried on solely between neutral nations, and it is difficult to conceive upon what principle an exception can be made and the neutral deprived of the rights secured in regard to the purchase of merchant vessels.

It is true a regulation of France has been referred to in support of the doctrine avowed by the Imperial Government, but it is hardly necessary to observe that a municipal law of that country can only affect persons under its control, and can have no binding force beyond its territorial limits. The parties who made the contract for the sale and purchase of the ship *St. Harlampy* were not under the jurisdiction of the municipal law of France; on the contrary, they were both within the jurisdiction of the United States as well as the property which formed the subject of the transaction. The validity or invalidity of the transaction can be determined only by the local or international law. It was a contract authorized by the laws of this country and the law of nations; and it was supposed to be universally conceded that such a contract would be respected everywhere. Certainly no Government except that under which the contract was made could interpose to destroy or vary the obligations which its provisions impose if not contrary to the law of nations. This is the doctrine of the European publicists, and it is especially sustained by Hautefeuille, whose authority will, I doubt not, be recognized by the Emperor's Government. He says, "It is impossible to recognize such a right as that claimed by the regulations of France." "Commerce," he adds, "is free between the neutral and belligerent nations; this liberty is unlimited except (by) the two restrictions relative to contraband of war, and to places besieged, blockaded, or invested; it extends to all kinds of provisions, merchandise, and movable objects without exception. Pacific nations can then, when they judge proper, purchase the merchant ships of one of the parties engaged in hostilities without the other party having the right to complain, without, above all, that it should have power to censure, to annul these sales, to consider and treat as an enemy a ship really neutral and regularly recognized by the neutral Government as belonging to its subjects. To declare null and without obligation a contract, it is indispensable that the legislator should have jurisdiction over the contracting parties. It is then necessary, in order that such a thing should take place, to suppose that the belligerent possesses the right of jurisdiction over neutral nations. That is impossible; the pretension of the belligerents is an abuse of force, an attempt against the independence of pacific nations, and consequently a violation of the duties imposed by divine law upon nations at war."

However long may be the period during which this doctrine has formed part of the municipal code of France, it is manifestly not in harmony with her maritime policy, and it is confidently believed by this Government that France will not assert it, not only against the practice of other nations but against the authority of her most enlightened writers on public law. (7 Moore on International Law, 416.)

I pause to invite the attention of the Senate to the language of Mr. Marcy expressive of the position that a disregard by a belligerent of a transfer of property made within a neutral nation and valid by its laws would be an offense against the sovereignty and independence of the latter.

The views expressed by Mr. Marcy were publicly proclaimed in official communications by many of his successors, notably by Mr. Cass in 1859, by Mr. Fish in 1877, and by Mr. Evarts in 1879.

(C) POSITION OF THE COURTS.

Finally, the Supreme Court of the United States, in a case growing out of the Spanish-American War—the *Benito Estenger* (176 U. S., 568)—reasserted the rule as expressed by the publicists of this country whose views have been referred to. These have been dwelt upon at some length, not only to impress upon the Senate the fixed character of the sentiment in this country upon the important question under review but to exhibit the intensity of that sentiment as it was disclosed on every occasion which called for an expression touching it—to expose somewhat fully the struggles through which we have passed—to maintain not only for ourselves but, as well, for the neutral nations of the world an inestimable right which the illustrious Senator from New York now tells us that, in an unguarded moment, under his direction as Secretary of State, we surrendered without a battle even of words; and surrendered, practically, in favor of a principle, to use the language of Mr. Cushing, "rejected by the most authoritative writers on the public law of Europe."

Reference has been made to the disregard by France during the wars of the latter half of the nineteenth century of the doctrine for which she has been credited with being the protagonist. She was engaged in war with China in 1883, growing out of controversies involving her East Indian possessions. Our citizens did not hesitate to purchase Chinese ships and sail them in the waters of the circumjacent seas under the American flag. Indeed, they were acquired in such numbers that President Arthur in his annual message to Congress on December 1, 1884, referred somewhat exultantly to the fact and asked for legislation giving them registry under our laws in virtue of which they might enter and unload in our ports.

THE DECLARATION OF LONDON.

Such was the state of the law when the conference of London assembled December 4, 1908, to frame a code of laws for the government of the international prize court, for the establishment of which the second Hague conference had made provision. The English-American theory was vigorous, dominant, established by practice and by precedent. The French theory was discredited, obsolete, and practically abandoned. The delegates from Austria-Hungary to the conference, which was composed of representatives of the great commercial nations of the earth—the United States, Great Britain, France, Germany, Russia, Japan, Austria-Hungary, Italy, Spain, and the Netherlands—the delegates to the conference from Austria-Hungary referred to it as the "*ancient* French theory," the characterization being made in a formal statement submitted by them which embraced the following paragraph:

The ancient French theory under which enemy vessels could not from the outbreak of hostilities change their nationality—that is to say, lose their status as enemy vessels—implies an undue restriction of neutral commerce, as such commerce must in principle remain free, even in time of war. France herself further derogated from this theory in 1870.

The reference to the conduct of France in 1870 is fully justified, not only by her failure to make seizure of ships transferred to a neutral flag after the declaration of war but by the following from the instructions issued by the minister of marine for the conduct of the navy:

When the result of the examination of the ship's papers is that since the declaration of war the nationality of the hitherto enemy ship has been changed by a sale made to neutrals there is need of proceeding with great caution to make sure that this transaction was executed in good faith and not for the sole purpose of concealing what is really enemy property.

Obviously if no transfer made since the commencement of hostilities was to be held valid, no instruction would have been given to examine with care the ship's papers in such a case to determine whether the transaction was in good faith.

The statement of the various nations referred to was prepared in response to a request from the British foreign minister in communicating the invitation to other nations to participate in the conference in which he expressed the hope that the representatives would "interchange memoranda setting out concisely, with reference to the authorities supporting the contention made, what they regard the correct rule of international law on each" of seven points proposed as a program for the conference, as follows:

(a) Contraband, including the circumstances under which particular articles can be considered as contraband; the penalties for their carriage; the immunity of a ship from search when under convoy, and the rules with regard to compensation where vessels have been seized but have been found in fact only to be carrying innocent cargo;
(b) Blockade, including the questions as to the locality where seizure can be effected, and the notice that is necessary before a ship can be seized;
(c) The doctrine of continuous voyage in respect both of contraband and of blockade;
(d) The legality of the destruction of neutral vessels prior to their condemnation by a prize court;
(e) The rules as to neutral ships or persons rendering "unneutral service" ("assistance hostile");
(f) The legality of the conversion of a merchant vessel into a warship on the high seas;
(g) The rules as to the transfer of merchant vessels from a belligerent to a neutral flag during or in contemplation of hostilities; and
(h) The question whether the nationality or the domicile of the owner should be adopted as the dominant factor in deciding whether property is enemy property. (54 Sessional Papers, House of Commons, 1909, pp. 371, 372.)

Great Britain submitted the following on the subject of "Transfer of merchant vessels to a neutral owner during or in contemplation of hostilities":

1. The transfer, either by sale or by gift, to a neutral of a hostile ship other than a war vessel is not made invalid merely by reason of the fact that it took place during or in anticipation of hostilities.
2. Such transfer, however, is not valid—
(a) If it takes place in a blockaded port;
(b) If it takes place during a voyage;
(In this respect a voyage is ended the moment the ship reaches the port where it can be effectively taken possession of by the transferee.)
(c) If the vendor retains any interest in the ship, or if a clause stipulates the return at the end of the war.
3. The burden of proof that the transfer is bona fide is upon the plaintiff, and the transfer must be complete, in good faith, and for an adequate price.
A ship transferred to a neutral flag is therefore still liable to condemnation by a prize court should the conditions of the transfer give rise to suspicion of which the plaintiff does not clear himself, as, for instance—
(a) If no written evidence of the transfer is found on board at the time of the seizure;
(b) If the transferor has any control over the ship, a share in the profits, or the privilege of revoking the transfer;
(c) If the supposed transferee or his representative (the latter not being an enemy) has not taken possession;
(d) If the ship is subject to the control of an enemy;
(e) If the captain or person in command is in the service of an enemy.

The memorandum was accompanied with a long list of decisions by the courts of England, embracing those to which reference has heretofore been made.

It is singular and singularly regrettable that the memorandum submitted by the representatives from the United States omitted all reference to the subject so important here. The attitude of the dual monarchy has been disclosed. Japan gave her adherence to the English-American theory. The Netherlands went even beyond it in recognition of the right of transfer. Spain signified her acceptance of the rules expressed in the statement of Great Britain. Italy expressed the view that upon strict proof that the sale was not fictitious it should be recognized. France, Germany, and Russia declared in favor of the doctrine that sales made after a declaration of war are void, but without citing any authorities whatever. The position taken by each of the nations participating is set out in a compilation, which I send to the desk and which I ask be printed as an appendix to my remarks.

The VICE PRESIDENT. Is there objection? The Chair hears none.

IS THE DECLARATION OPERATIVE AND CONTROLLING?

Mr. WALSH. The result of the labors of the Conference was the celebrated Declaration of London.

It was signed by all the delegates and represents mutual concessions, each being the consideration for the other; but it was never ratified by Great Britain; and as the ratifications of those powers which indorsed the work of their delegates have never been exchanged, it has not become obligatory as a treaty.

On the 20th day of August, 1914, Great Britain issued a proclamation reciting that—

During the present hostilities the convention known as the Declaration of London should, subject to certain additions and modifications therein specified, be adopted and put in force.

The additions and modifications referred to are as follows:

(1) The lists of absolute and conditional contraband contained in the proclamation dated August 4, 1914, shall be substituted for the lists contained in articles 22 and 24 of the said declaration.
(2) A neutral vessel which succeeded in carrying contraband to the enemy with false papers may be detained for having carried such contraband if she is encountered before she has completed her return voyage.
(3) The destination referred to in article 33 may be inferred from any sufficient evidence, and (in addition to the presumption laid down in article 34) shall be presumed to exist if the goods are consigned to or for an agent of the enemy State or to or for a merchant or other person under the control of the authorities of the enemy State.
(4) The existence of a blockade shall be presumed to be known—
(a) To all ships which sailed from or touched at an enemy port a sufficient time after the notification of the blockade to the local authorities to have enabled the enemy Government to make known the existence of the blockade.
(b) To all ships which sailed from or touched at a British or allied port after the publication of blockade.
(5) Notwithstanding the provisions of article 35 of the said declaration, conditional contraband, if shown to have the destination referred to in article 33, is liable to capture to whatever port the vessel is bound and at whatever port the cargo is to be discharged.
(6) The general report of the drafting committee on the said declaration presented to the naval conference and adopted by the conference at the eleventh plenary meeting of February 25, 1909, shall be considered by all prize courts as an authoritative statement of the meaning and intention of the said declaration, and such courts shall construe and interpret the provisions of the said declaration by the light of the commendatory given therein.
And the lords commissioners of His Majesty's treasury, the lords commissioners of the Admiralty, and each of His Majesty's principal secretaries of state, the president of the probate, divorce, and Admiralty division of the high court of justice, all other judges of His Majesty's prize courts, and all governors, officers, and authorities whom it may concern are to give the necessary directions herein as to them may respectively appertain.

Her allies took similar action.

On the 21st day of September another proclamation was issued reciting the one of earlier date referred to and setting forth:

Whereas it is expedient to introduce further modifications in the declaration of London as adopted and put in force: Now, therefore,
We (the King) do hereby declare, by and with the advice and of our privy council, that during the continuance of the war, or until we do give further public notice, the articles enumerated in the schedule hereto will, notwithstanding anything contained in article 28 of the declaration of London, be treated as conditional contraband:

SCHEDULE.

Copper, unwrought.
Lead—pig, sheet, or pipe.
Glycerin.
Ferrochrome.
Hematite iron ore.
Magnetic iron ore.
Rubber.
Hides and skins, raw or rough tanned (but not including dressed leather).

Article 28 referred to declared that neither hides, rubber, nor metallic ores might be declared contraband of war, so that as early as September 21 Great Britain gave notice that she would not observe or be bound by the declaration of London, which provided by article 65 that—

The provisions of the present declaration must be treated as a whole and can not be separated.

She went further, and on October 29, 1914, issued the following:

Whereas by an order in council dated the 20th day of August, 1914, His Majesty was pleased to declare that during the present hostilities the convention known as the declaration of London should, subject to certain additions and modifications therein specified, be adopted and put in force by His Majesty's Government; and

Whereas the said additions and modifications were rendered necessary by the special conditions of the present war; and

Whereas it is desirable and possible now to reenact the said order in council with amendments in order to minimize, so far as possible, the interference with innocent neutral trade occasioned by the war:

Now, therefore, His Majesty, by and with the advice of his privy council, is pleased to order, and it is hereby ordered, as follows:

1. During the present hostilities the provisions of the convention known as the Declaration of London shall, subject to the exclusion of the lists of contraband and noncontraband, and to the modifications hereinafter set out, be adopted and put in force by His Majesty's Government.

The modifications are as follows:

(i) A neutral vessel, with papers indicating a neutral destination, which, not withstanding the destination shown on the papers, proceeds to an enemy port, shall be liable to capture and condemnation if she is encountered before the end of her next voyage.

(ii) The destination referred to in article 33 of the said declaration shall, in addition to the presumptions laid down in article 34, be presumed to exist if the goods are consigned to or for an agent of the enemy State.

(iii) Notwithstanding the provisions of article 35 of the said declaration, conditional contraband shall be liable to capture on board a vessel bound for a neutral port if the goods are consigned "to order," or if the ship's papers do not show who is the consignee of the goods, or if they show a consignee of the goods in territory belonging to or occupied by the enemy.

(iv) In the cases covered by the preceding paragraph (iii) it shall lie upon the owners of the goods to prove that their destination was innocent.

2. Where it is shown to the satisfaction of one of His Majesty's principal secretaries of state that the enemy Government is drawing supplies for its armed forces from or through a neutral country, he may direct that in respect of ships bound for a port in that country article 35 of the said declaration shall not apply. Such direction shall be notified in the London Gazette and shall operate until the same is withdrawn. So long as such direction is in force a vessel which is carrying conditional contraband to a port in that country shall not be immune from capture.

At the same time she issued new lists of contraband designating innumerable articles as contraband contrary to article 28 of the declaration, and characterizing many articles as absolute contraband contrary to article 23, which permits additions to the list of absolute contraband only of such articles as are used exclusively for war.

Since then the contraband list has been extended still further in disregard of the Declaration of London.

It is understood that the initiative thus taken by Great Britain has been followed by her allies. It is accordingly idle to assert that the Declaration of London, so contemptuously treated by the allies, can be appealed to by them in justification of any course they may take in the present war or even that it can justly have any persuasive force in the ultimate determination of our right to purchase the interned ships. The question remains as it presented itself when Marcy, Cass, Evarts, and Fish boldly proclaimed our right to buy.

It is not to be understood that the other warring nations have treated the Declaration with any higher evidence of regard

Whatever force may be given to it by the English prize courts in any respect in which it runs counter to the law as they have heretofore evolved it, neither Great Britain nor her allies can rely on it in diplomatic negotiations with our Government, nor can she make any persuasive appeal to its provisions before any arbitral tribunal to which any international controversy may be referred.

IF IT IS, DOES IT FORBID PURCHASES OF BELLIGERENT SHIPS?

But assuming it to have some virtue, let its provisions be examined.

Rule 56, covering the subject of a transfer effected after the outbreak of hostilities, is as follows:

The transfer of an enemy vessel to a neutral flag effected after the outbreak of hostilities is void unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel, as such, is exposed.

There, however, is an absolute presumption that a transfer is void—

(1) If the transfer has been made during a voyage or in a blockaded port.

(2) If a right to repurchase or recover the vessel is reserved to the vendor.

(3) If the requirements of the municipal law governing the right to fly the flag under which the vessel is sailing have not been fulfilled.

It is the view of the distinguished Senator from New York that this means that an effective sale can not be made of a vessel of a belligerent nation after the outbreak of hostilities if she is in a port from which she does not leave for fear of capture.

This astounding doctrine will be received by the American people with feelings of painful surprise. If it were asserted by almost anyone in America but the Senator it would have been scouted as impossible. His views will be read by no one with more astonishment than by the representatives to the Conference from Great Britain, who, in their report to Lord Grey, after reviewing the provisions of article 56, declared that its provisions "are practically in accord with the rules hitherto enforced by British prize courts." As the entire paragraph of the report is illuminating I read it, as follows:

The provisions respecting transfers made during a war are less complicated. The general rule is that such transfers are considered void unless it be proved that they were not made with a view to evade the consequences which the retention of enemy nationality during war would entail. This is only another way of stating the principle already explained that transfers effected after the outbreak of hostilities are good if made bona fide, but that it is for the owners of the vessels transferred to prove such bona fides. In certain circumstances, specified in the second paragraph of article 56, mala fides is presumed without possibility of rebuttal. The provisions under this head are practically in accord with the rules hitherto enforced by British prize courts. (54 Sessional Papers (1909), 100.)

This contemporaneous exposition by her representatives would have bound Great Britain in any controversy with our Governmen past all hope of escape but for the speech to which the Senate listened in some awe on Monday last. Possibly our cousins may be disposed to make some allowance on account of words spoken in debate into which, on the testimony of the Senator, partisan politics had been allowed to enter and to feel that he himself was not exempt from the infection against which he declaimed.

It will be quite pertinent to remark when the subject is officially canvassed that if it be true that such a revolution was effected by article 56 of the Declaration of London in the rules of international law touching the subject with which it deals as they had been understood, taught, proclaimed, defended, and enforced in America, Secretary Root would never have been so derelict in his duty as not to have communicated the fact to the Senate in transmitting to it the work of the conference for ratification. Indeed, it is unbelievable that he would have permitted the American delegates, who acted under his direction, as it is reasonable to suppose, and as he tells us in his powerful address, to give their assent to the surrender of a right which their country had so long and so resolutely upheld. It is incredible that in making their report our representatives would have omitted to apprise the country that they had been moved to make so vital a concession had they believed or understood they had done so, as it is impossible to believe that they would have remained silent when the question of the adoption of article 56 was before the conference had they conceived it reasonable to give to it the interpretation to which it is now insisted it is subject. They entered a solemn protest against language proposed at one time, if not that eventually adopted, touching transfers before the commencement of hostilities, as will appear from the papers transmitted to the Senate with the treaty, but apparently no word was heard from them by way of complaint concerning the language of article 56.

Some comments made by one of the German representatives during the course of the debate before the Conference were appealed to by the Senator from New York in support of his contention concerning the significance of the language of article 56, but it is sufficient to remark concerning the same that it has been repeatedly declared by our Supreme Court that debates before a parliamentary body afford no safe guide to the interpretation of a statute and are generally to be disregarded. And the rule is the same in England. In United States *v.* Trans-Missouri Freight Association (166 U. S., 290) the court said:

There is a general acquiescence in the doctrine that debates in Congress are not appropriate sources of information from which to discover the meaning of the language of a statute passed by that body. United States *v.* Union Pacific Railroad Co. (91 U. S., 72, 79); Aldridge *v.* Williams (3 How., 9, 24; Taney, Chief Justice); Mitchell *v.* Great Works Milling & Manufacturing Co. (2 Story, 648, 653); Queen *v.* Hertford College (3 Q. B. D., 693, 707).

The reason is that it is impossible to determine with certainty what construction was put upon an act by the members of a legislative body that passed it by resorting to the speeches of individual members thereof. Those who did not speak may not have agreed with those who did, and those who spoke might differ from each other, the result being that the only proper way to construe a legislative act is from the language used in the act and, upon occasion, by a resort to the history of the times when it was passed.

The doctrine of that case was reasserted in Maxwell *v.* Dow (176 U. S. 581), in which the court said:

What individual Senators or Representatives may have urged in debate in regard to the meaning to be given to a proposed constitutional amendment or bill or resolution does not furnish a firm ground for its proper construction, nor is it important as explanatory of the grounds upon which the Members voted in adopting it.

Nor is much aid to be gained from the meager reference to the action of the Italian Government since the London conference in condemning certain vessels carrying the Greek flag upon transfers from subjects of Turkey then at war with Italy. It is quite possible that the transfers were found to be colorable only—indeed, the report is equally consistent with either theory of the import of the language of the Declaration of London,

that first propounded by the Senator from New York, five years after the conference adjourned, and that announced by the representatives of Great Britain immediately upon the completion of its work. The declaration bears date February 26, 1909. Three days thereafter, on March 1, 1909, the British delegates made the report telling that the conference had adopted practically the rules of the English prize courts on the subject of the transfer of the flag of a belligerent.

The conclusion which they drew from the language used is plainly justified. If the owner of a ship, idle at its wharf or swinging at anchor in neutral waters because he fears capture, should she venture out, should cause a transfer of his vessel to be made to a neutral and register her under the flag to which the latter owes allegiance, the whole procedure being but a form without an actual and complete divestiture of the title or beneficial interest, the conclusion would follow, should she then undertake a voyage, that the transfer was effected "in order to evade the consequences to which an enemy vessel, as such, is exposed." His property, were the ship immune, is worth just as much as she was before. But he does not care to subject his ship to the risk of "the consequences to which an enemy vessel, as such, is exposed," namely, to capture. He prefers to allow her to remain idle where she is until the war is over. Then he may sail her again to any port. Another, similarly situated, reasons with himself that it would be wiser to sell, even at a very greatly reduced price, even at a substantial loss, reckoning that by the end of the war the money he receives, judiciously invested, will amount to more than the value the ship will then have. He sells, not to "evade the consequences to which an enemy vessel, as such, is exposed," not to get profits out of her while she sails under a false flag, but to realize upon an unproductive piece of property, the care of which is a constant expense to him. Indeed, it is conceivable that the burden of expense is so great that he may be forced to sell. Should claims accumulate past his ability to pay and the ship be sold upon a libel or in bankruptcy, would it be contended that the transfer had been made "in order to evade the consequences to which an enemy vessel, as such, is exposed"? In the recital of the facts in the case of the *Baltica*, Spinks, 265, in the opinion by Dr. Lushington occurs the following:

> It appeared to Mr. Sorensen, the elder, and to other merchants at Libau, owners of vessels under the Russian flag, that, as war between Great Britain and Russia was probable, the preponderance of the naval forces of Great Britain was such as would seriously embarrass, if not wholly prevent, the profitable employment of vessels sailing under the Russian flag, and that, therefore, it was expedient to sell their vessels, though at a considerable sacrifice. Actuated by these considerations, Mr. Sorensen, sr., framed a plan for the transfer of his property.

It was found that Sorensen did not transfer in order to evade the consequences to which his ships would be subject, namely, capture, but because the ship in his hands would be profitless during the war. He concluded to sell, even at a sacrifice.

It is conceded that under the Declaration of London a transfer by descent would warrant a change of flag, because the owner would have died, it is assumed, though the war had never begun. And yet such an assumption may be unfounded. Men have died from grief and from anxiety induced by staggering business reverses. May not a shipowner, anticipating his speedy death, give his ship to his son, who will inherit it, anyway? And if he may give it to his son, may he not, as Sorensen did, sell it to him at an advantageous price? If the son may inherit the ship and sail it under the flag of his country, being neutral, may not his father bequeath it to him? If the father may dispose of the ship by will, how shall he be denied the right to transfer the title by a sale?

NO DANGER OF INTERNATIONAL COMPLICATIONS.

It is idle, however, to delude ourselves into the notion, at least since the Senator from New York has spoken, that the question is one free from doubt or that our right to purchase the ships of the belligerents is not likely to be questioned. It is understood that an intimation has already come to the State Department from some source that the acquisition of any of the so-called interned ships would be regarded as "apparently unlawful." But what of it? Are we to abandon our historic attitude upon this question simply because some or all of the warring nations may exhibit some disposition to dispute it? Are we to decline to put the question to the test or discourage or withhold our approbation from any of our venturesome citizens who may be disposed to do so merely because of a vague apprehension that war may come from the temperate but determined assertion of our rights? Heretofore, without exception, the responsible officers of our Government have braved the enmity of powerful belligerents and openly counseled our people to take advantage of the opportunities afforded by a state of war to acquire ships to swell the volume of our merchant marine. We never got into trouble about it. In the case of the *St. Harlampy*, referred to by Mr. Marcy in the letter which has been quoted, a confidential note had been sent by the French minister of foreign affairs calling attention to the purchase of the ship theretofore the property of Russian subjects by certain Boston merchants, and conveying a warning that the vessel would be liable to seizure by French cruisers. Neither our Government nor the Boston merchants hesitated. No French cruiser, apparently, sought her out. It may be that she escaped, because the war came to a speedy close. But suppose she had been captured; what reason is there to suppose that such an incident would have involved us in war with France? It would not be the first time that a ship bearing our flag had been condemned as prize by a belligerent with which we were at peace. Though no ships carrying our flag have been seized during the present war, millions of dollars' worth of other property has been upon the claim that under the rules of international law it is subject to confiscation. The addition of a ship or two or 20 ships would scarcely aggravate the situation.

If the *St. Harlampy* had been seized by French cruisers, our Government would have protested and, because of the vast importance to our interests as well as those of the nations whose ordinary condition is that of peace, not war, would have attempted to impress upon the French prize court its views of the rule of international law applicable to the case. If it failed, and redress were not obtained through diplomatic channels, it would doubtless have demanded that the controversy be arbitrated. France could not, conceivably, have refused. Before the arbitral tribunal the controverted legal question would have been fought out and a service to the civilized world would have been rendered in securing from it an authoritative declaration of the law upon the disputed point.

OUR RIGHT OUGHT TO BE TESTED.

Such will undoubtedly be the general course that will be pursued should the *Dacia* be captured. There is no reason why even the most timid should look with alarm upon her eventful trip. Unfortunately the question of the bona fides of the sale to one of our citizens asserting title to her is involved. It may be that the court will find that the alleged sale is fictitious and that the Hamburg-American Line still, in fact, owns the ship or retains an interest in her or holds a contract for her repurchase after the war. In that case the question of the true construction of article 56 of the Declaration of London will never arise. In the fact feature of the case our Government has no interest; but assuming the proof to be indubitable upon that point, the controversy is narrowed to one involving legal propositions only over which individuals rarely come to blows or nations go to war. Indeed, recent treaties negotiated with all of the belligerents require us as well as them to submit the question in difference to arbitration. In view of the community of interest which obtains between our country and the other nations, from which the arbitrators must be selected, there is no ground for apprehension that the question will be considered by them in any attitude of hostility to our contention. We can not afford to forfeit forever the right to buy freely from belligerents property of any character without a struggle. We have paid dearly for our maintenance of this right in the past. We did not wince when it was invoked against us.

Mr. SMITH of Michigan. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Michigan?

Mr. WALSH. I do.

Mr. SMITH of Michigan. Before the Senator leaves the incident of the *Dacia*—he has dwelt with a great deal of emphasis and interest upon the question of bona fides, and evidently his argument as to our right turns largely upon that point——

Mr. WALSH. Not at all.

Mr. SMITH of Michigan. Well, I do not wish to quarrel with the Senator about that point. It is evidently a very important factor in the transfer from a belligerent flag to a neutral flag, and I am impressed that the question of bona fides is very important; and I desire to say that in the case of the *Dacia*, which was purchased by Mr. Breitung, prima facie he is entitled to the presumption that his purchase is bona fide and that it is not part of any ulterior arrangement that has been made with the former owners of that ship.

I know Mr. Breitung very well. Some Senators here to-day remember his father, who was an honored Member of Congress from Michigan for a number of years, a very wealthy man, a typical frontiersman, a man of courage and patriotism, and the highest conception of good citizenship. That his son should have purchased this ship out of his own abundant means and placed it in service does not surprise me and will not surprise any of those who have the privilege and honor of knowing him; and I have no doubt whatever that the entire transaction,

which has attracted the attention of the country, is in absolute good faith. I have seen no reference to Mr. Breitung that was especially meant as a criticism, but I felt, after listening to what the honorable Senator from Montana has said upon the rights of American citizens, that it would be appropriate for me to at least give expression to this thought.

Mr. WALSH. Mr. President, I am indeed delighted that the Senator from Michigan has given the Senate the assurance which his words convey. I myself have no cause to doubt in any way the bona fides of the transfer of the *Dacia*. I trust that Mr. Breitung will be able to establish that fact so conclusively that the case will present no question of disputed facts whatever. Then there will arise the sole question of law, in the determination of which this Nation has a most vital interest.

Our great merchant marine faded away during the dark days of the Civil War, when, according to Marvin, "Confederate cruisers compelled American merchants to choose between laying their ships up in port to rot away or selling at a half to a quarter of their cost to foreigners." This author adds that "in the one year 1864, beneath this extraordinary pressure, more American ships were disposed of to foreign owners than had been sold in all the years between 1854 and 1860." The figures are eloquent. During the four years from 1862 to 1865, inclusive, we sold to aliens 774,652 tons. During the four years embracing two before that period and two after, we sold but 75,372 tons, about one-tenth as many ships. The following table tells the story.

American ships sold to aliens, 1860–1867.

	Tons.
1860	17,518
1861	26,649
1862	117,756
1863	222,199
1864	300,863
1865	133,832
1866	22,117
1867	9,088

As these were mostly sailing vessels, averaging possibly 1,000 tons each, more than 600 ships went to foreign registry on account of the war. If they had been liable to seizure by the Confederate cruisers, notwithstanding the transfer, they would never have been sold. We lost our merchant marine because when we were at war other nations at peace with us could buy them. It is now asserted that by some brilliant feat of diplomacy we are deprived of the right to buy their ships when they are at war.

Mr. President, I welcome the opportunity to try out this question. The owner of the *Dacia* will have earned the gratitude of his countrymen if he shall persevere in his insistence upon the principle of the right of neutrals to buy in good faith the ships of belligerents, until that question shall be finally and authoritatively resolved. He ought not to be required to bear all the risk and expense of the test. If he shall succeed in establishing that principle, the Nation as a whole will be the rich gainer. If the test came upon the seizure of a ship purchased under the authority of the bill now being considered, the case would be presented in the best possible aspect, because in that event no question could be raised concerning the bona fides of the transfer, using the term as having the significance it ordinarily bears. It would be inconceivable that either the shipping board or the corporation which it is to bring into being would lend itself to a fraudulent scheme to enable belligerents to sail their ships under the American flag "in order to evade the consequences to which an enemy vessel, as such, is exposed." No prize court or diplomatic authority would entertain the idea. The cause would be open to contest on the law alone.

Indeed, the very groundwork of the French rule would be swept away in such a controversy. The only justification ever offered for it is that under any other fraudulent transfers would be made with intent to escape capture. The idea that a nation at war has some vested right to capture as its prey all the ships owned by its enemy at the outbreak of hostilities has never before been avowed.

In the case of a purchase by a friendly power the imputation of connivance would be impossible. France would scarcely suggest the possibility of such a thing in the case of a purchase by the United States, so while she might be disposed to insist upon her "*ancient* theory," so far as private purchasers are concerned, she would be put to severe straits to justify the rule in the case of a purchase made by our Government. Where the reason for a rule of law ceases, the rule itself ceases.

SHIPS ACQUIRED WILL NOT BE EXEMPT FROM ORDINARY LEGAL PROCEEDINGS.

But it is advanced that ships owned by the corporation, for the creation of which the bill makes provision, would not be subject to seizure as prize, nor could they be called upon to respond in an alien court of admiralty on account of a collision or other act or omission for which a privately owned ship might be held, and that because of that condition, unnamed and undefined perils which the imagination is left to picture, must be encountered if the plan proposed is pursued.

In this connection the case of the *Parlement Belge* is repeatedly referred to. That case applied the well-known rule that a sovereign can not be made subject to suit except at his own will. The craft in question was owned by the Belgian Government, engaged in carrying the mail across the channel. Incidentally it carried small packages of freight, for which a charge was made. It collided on one of its trips with another vessel and was brought before the admiralty court upon a libel, under which it was charged with responsibility for the damage done. Under the maritime law the claim, if established, would constitute a lien upon the offending ship, which would become subject to sale for the payment of the amount found due. The proceeding was *in rem* against the ship. It was held that she was immune from prosecution because of the nature of her owner and the character of the business in which she was engaged. In the opinion much was said on the question of the immunity of ships of war and other Government vessels, foreign and domestic, but the decision releasing the vessel was placed upon the ground that she was not primarily in trade, but was engaged in the discharge of a strictly governmental function. The court having said, after reviewing at great length the arguments and authorities—

> In the present case the ship has been mainly used for the purpose of carrying the mails, and only subserviently to that main object for the purposes of trade—

expressed its conclusion in one brief sentence, as follows:

> We are of the opinion that the mere fact of the ship being used subordinately and partially for trading purposes does not take away the general immunity.

Another case determined in the year 1873 by the High Court of Admiralty is much more in point in the present inquiry, namely, the *Charkieh* (42 L. J. R., N. S., 17). From the syllabus the essential facts and conclusions can be gathered. I read from it the following:

> The *C.*, belonging to the Khedive of Egypt and usually employed in carrying mail and passengers, came to England with merchandise and for repairs. Having completed her repairs, and while on a trial trip down the Thames, she came into collision with *B.* Held, that even the privileges of a sovereign prince would not extend to immunity from arrest in a suit for damages by collision; that if the privileges did extend to such an immunity they would have been waived in this case by the employment of the ship at the time as a trader. Proceedings in rem may in some cases be instituted without any violation of international law, though the owner of the res be in the category of persons privileged from personal suit.

Other propositions determined but unimportant here are passed. The vessel in question was one of quite a fleet held in the same ownership. The good sense of the conclusions arrived at, as heretofore indicated, will be apparent from the following from the opinion:

> I must say that if ever there was a case in which the alleged sovereign—to use the language of Bynkershoek—was "strenue mercatorem agens," or in which, as Lord Stowel says, he ought to "traffic on the common principles that other traders traffic," it is the present case; and if ever a privileged person can waive his privilege by his conduct, the privilege has been waived in this case.
>
> It was not denied and could not be denied after the evidence that the vessel was employed for the ordinary purposes of trading.
>
> She belongs to what may be called a commercial fleet. I do not stop to consider the point of her carrying the mails, for that was practically abandoned by counsel. She enters an English port, and is treated in every material respect by the authorities as an ordinary merchantman, with the full consent of her master; and at the time of the collision she is chartered to a British subject and advertised as an ordinary commercial vessel. No principle of international law and no decided case and no dictum of jurists of which I am aware has gone so far as to authorize a sovereign prince to assume the character of a trader when it is for his benefit, and when he incurs an obligation to a private subject to throw off, if I may so speak, his disguise and appear as a sovereign, claiming for his own benefit and to the injury of a private person, for the first time, all the attributes of his character; while it would be easy to accumulate authorities for the contrary position. (See especially Kluber, Europe, Volkerrecht, sec. 210, Kluber Droit des gens Lodern de l'Europe, nouvelle edition, par M. A. Ott, Paris, 1861, pp. 273, 274, and authorities cited in the note.)

After reviewing at length the opinion in this case, it was distinguished in the opinion in the case of the *Parlement Belge*, as indicated from extracts quoted therefrom.

That a sovereign may himself become a suitor in an alien court is indisputable. That he may waive his privilege and consent to be sued is equally without question. The case to which reference was last made asserts that by becoming a trader he necessarily consents to be sued, since no one can attribute to a sovereign a purpose, when he once engages in ordinary business transactions, to shield himself behind the privilege from responsibility in the ordinary courts upon the contracts he makes or from the liabilities he incurs in the prosecution of trade. But if he should exhibit any such disposition he would not escape accountability, since the privilege he enjoys, as was declared by

the Supreme Court of the United States in the *Santissima Trinidad* (7 Wheat., 352), he enjoys solely as a matter of comity. It may be withdrawn at any time.

The privilege—

The court said in that case—

stands upon principles of public comity and convenience, and arises from the presumed consent or license of nations, that foreign public ships coming into their ports and demeaning themselves according to law and in a friendly manner shall be exempt from the local jurisdiction. But as such consent and license is implied only from the general usage of nations, it may be withdrawn upon notice at any time, without just offense; and if afterwards such public ships come into our ports, they are amenable to our laws in the same manner as other vessels.

But that a sovereign state may waive its privilege no one disputes, and that it necessarily waives it as to any ship which it puts into general commerce is a most reasonable presumption. In the present instance, in which the Government puts the title to the ships in a corporation, a citizen which it creates to engage in trade, its purpose to waive any rights it may have as a sovereign state with respect to the property of the corporation can not be open to doubt.

The proposition was long ago determined by the Supreme Court in the case of The Bank of the United States against The Planters' Bank of Georgia, Ninth Wheaton, page 904. Were it not that concern may be felt in some quarters because of the high authority from which comes the suggestion that the corporation contemplated by the bill will have the attributes of sovereignty which inhere in the United States so far as to exempt it from suits, it would be inexcusable to detain the Senate by reading from the opinion in that case. Among the stockholders of the defendant bank was the State of Georgia, which was likewise one of its incorporators. It was urged that the corporation was not subject to suit in the Federal courts. This contention was disposed of in the following language:

It is, we think, a sound principle that when a Government becomes a partner in any trading company it divests itself, so far as concerns the transaction of that company, of its sovereign character and takes that of a private citizen.

Mr. FLETCHER. Mr. President, may I interrupt the Senator at that point to call especial attention to the proposition he has laid down?

Mr. WALSH. Certainly.

Mr. FLETCHER. The bill specifically provides that these vessels shall be—

Subject to all laws, regulations, and liabilities governing merchant vessels, in like manner and to the same extent as merchant vessels in private ownership when duly registered under the laws of the United States.

Mr. WALSH. That is the next step at which I was arriving.

Instead of communicating to the company its privileges and its prerogatives, it descends to a level with those with whom it associates itself, and takes the character which belongs to its associates and to the business which is to be transacted. Thus many States of this Union who have an interest in banks are not suable even in their own courts, yet they never exempt the corporation from being sued. The State of Georgia, by giving to the bank that capacity to sue and be sued, voluntarily strips itself of its sovereign character, so far as respects the transactions of the bank, and waives all the privileges of that character. As a member of a corporation a Government never exercises its sovereignty. It acts merely as a corporation and exercises no other power in the management of the affairs of the corporation than are expressly given by the incorporating act.

The Government of the Union held shares in the old Bank of the United States, but the privileges of the Government were not imparted by that circumstance to the bank. The United States was not a party to suits brought by or against the bank in the sense of the Constitution. So with respect to the present bank. Suits brought by or against it are not understood to be brought by or against the United States. The Government, by becoming a corporator, lays down its sovereignty, so far as respects the transactions of the corporation, and exercises no power or privilege which is not derived from the charter.

To make assurance doubly sure the bill expressly provides, as mentioned by the chairman, that the ships—

Shall, when and while employed solely as merchant vessels, be in all respects subject to the rules, regulations, and liabilities governing merchant vessels, in like manner and to the same extent as merchant vessels in private ownership when duly registered under the laws of the United States.

The ships to be acquired will, accordingly, be amenable in any court in any country under circumstances which would subject merchant ships held in private ownership to their jurisdiction. They may be seized if they carry contraband and divested of it. They may themselves be haled before a prize court that their right to fly the American flag may be inquired into. In short, they will be subject to just such treatment by foreign powers as merchant ships must undergo under the rules of international law. There will, accordingly, be no more risk of international complications than are likely to arise in connection with ships held in private ownership. Indeed, there will not be so much, for the latter may lend themselves to efforts clandestinely to introduce contraband into a belligerent country. The Government-owned ship will scarcely be subject to the suspicion of such conduct.

There may be valid arguments against the pending bill founded upon considerations of domestic policy. There are no evils attendant upon it, assuming it becomes a law, so far as our foreign relations are concerned, that have thus far been pointed out even if the shipping board should conclude to test, by the purchase of one or more of the belligerent ships in our ports, the question as to whether the Declaration of London has forever foreclosed us from further maintaining our historic attitude concerning the rights of neutrals to purchase the vessels of nations at war.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Nebraska?

Mr. WALSH. I do.

Mr. NORRIS. I wish to ask the Senator one or two questions in regard to the London declaration. I understand the Senator has about concluded, so I assume he is not going to discuss the proposition any further.

Mr. WALSH. I have concluded.

Mr. NORRIS. I perhaps should have asked the questions earlier in the Senator's discourse, but I was not aware just when he was going to conclude that particular branch of the subject.

As I understand, the British Government, while not formally adopting or approving the London conference, has by proclamation, as the Senator has so well described, announced its intention to follow the London conference except wherein it had——

Mr. WALSH. Except in those particulars in which it does not like them.

Mr. NORRIS. In those particulars to which it has called attention in the declaration. Is not that true?

Mr. WALSH. It is.

Mr. NORRIS. Then, as I understand, as far as the present hostilities are concerned, Great Britain has approved the London conference, with the exception of the particular notations mentioned in the several proclamations?

Mr. WALSH. The Senator may be a little confused about that. The declaration itself provides the method by which the various contracting nations may signify their adherence to it. Great Britain has not pursued that course at all.

Mr. NORRIS. No; I understand.

Mr. WALSH. And she, in her proclamation at the outset of the war, simply referred to the declaration of London for the purpose of brevity. Instead of setting out at length the rules which she would have her navy and her courts observe during the conduct of the war, she practically said, "They will be guided by the provisions of the declaration of London except in the following particulars."

Mr. NORRIS. I understand that England takes the position that as far as the present war is concerned her vessels and her officers are in fact instructed to carry out the declaration of the London conference excepting in the respects noted. Now, in any of those exceptions did England make any modification whatever of article 56, the one relating to the transfer of vessels after the beginning of hostilities?

Mr. WALSH. No; there is no specific reference to it, and no exception.

Mr. NORRIS. Then, as I understand, England will take the position or has taken the position that during the present war article 56 of that declaration is in full force and effect?

Mr. WALSH. Of course, when the Senator says "England," we do not get a very clear idea. England, like our own country, has different departments to her Government. She has an executive department, a legislative department, and a judicial department. This is an order in council, and it commands the courts to observe it.

Mr. NORRIS. It has the effect of a law; has it not?

Mr. WALSH. I do not know. The executive officers, the commanders of the navy, will of course be obliged to observe the directions that are given to them. Whether or not the prize court will be obliged to apply the rule of law which the admiralty believe ought to be applied—that is, the rule of the declaration of London—I am not prepared to say.

Mr. NORRIS. That was the next question I was going to ask the Senator. Since he has already answered it as far as his information goes, I shall not repeat it. Now I want to ask the Senator what action did Germany and France take?

Mr. WALSH. Let me continue, however, in answer to the question of the Senator. It is a matter of no consequence to us at all what rule of law the English prize court by the command of the executive authority may see fit to apply. We would like of course to have them take the view that the declaration of London is not binding upon them at all, and that their ancient rule of law ought to be applied. If they should decline

to do that that would not be the end of the matter by any means.

Mr. NORRIS. No; not necessarily.

Mr. WALSH. We would then demand redress through the diplomatic channels, and if redress was denied us through the diplomatic channels we would then demand that the question be submitted to arbitration.

Mr. NORRIS. Now, assuming——

Mr. WALSH. And our treaty would entitle us——

Mr. NORRIS. To arbitration.

Mr. WALSH. To arbitration.

Mr. NORRIS. Yes; I think so; but let us assume, for the sake of argument, that the prize court would follow the order made by the Government, which it seems to me is but a fair assumption, because I do not myself doubt but what they would; then, if they did that, the diplomatic channels would fail to bring about a settlement without any doubt, would they not?

Mr. WALSH. I do not think so at all.

Mr. NORRIS. I do not mean that they would refuse to arbitrate. I mean that the diplomatic officials of Great Britain——

Mr. WALSH. I understand.

Mr. NORRIS. Would certainly stand by the judgment of her own prize court.

Mr. WALSH. I understand the Senator fully. I do not think it follows by any means at all, because when the English representatives are brought face to face with the problem, and it is a question of a straight abandonment of the principle for which they themselves have been contending for a century and a quarter, and which during all that time has been regarded as consistent with their highest interests, I am not quite sure that they will not think again about it.

Furthermore, let me say to the Senator that I am not quite sure that by that time they may not reach the conclusion that it would be very much better to let us buy these German ships and add them to our mercantile marine than to have them go back to Germany after the war.

Mr. NORRIS. That may be. Of course that is outside of the question.

Mr. WALSH. Of course the Senator——

Mr. NORRIS. That is not involved in the question of law.

Mr. WALSH. The Senator is asking me whether it is not a matter of course that we shall have no redress at all through diplomatic channels. I do not consider it hopeless at all.

Mr. NORRIS. Is it not true that this same authority in Great Britain which has approved the London declaration, with the exceptions noted, is the authority that in the years that are past has outlined the course of England; in other words, the same authority of Great Britain that has mapped their course out in the past has now approved article 56 of the London conference.

Mr. WALSH. Yes; but I beg to remind——

Mr. NORRIS. That ought to have and it would have just as great authority as their prior law, would it not?

Mr. WALSH. Undoubtedly; and I beg to remind the Senator that those same authorities have changed their minds several times since the war began.

Mr. NORRIS. Exactly.

Mr. WALSH. At the time the war began the declaration of London in its entirety was entirely satisfactory to them. After a little while they concluded that they did not like it as well and they changed it; and after a time they concluded that there were some other things about it that they did not like and they made another change, and they may conclude there are still other things, provisions of it which should not be observed, including article 56.

Mr. NORRIS. And they may change it again. That is true, I suppose. There is no one who doubts their authority to change their position.

Mr. WALSH. I am speaking about the possibility of their doing it.

Mr. NORRIS. They may do it or they may not. Of course the Senator assumes that they will not. I want to ask the Senator what action Germany and France took in regard to the London declaration?

Mr. WALSH. The ratifications have not been exchanged.

Mr. NORRIS. I understand that is true; but is it not true that both Great Britain and France have approved the declaration of London?

Mr. WALSH. I stated in the course of my remarks that the allies of Great Britain had issued proclamations substantially the same as these I have read.

Mr. NORRIS. Then if a ship is transferred or alleged to have been transferred in violation of article 56 and is taken by the German Navy or by the French Navy, it would be taken into a prize court of the country and be passed upon according to the law of the particular country where the prize court was located, would it not?

Mr. WALSH. Of course, with the right on our part——

Mr. NORRIS. Oh, yes.

Mr. WALSH. To take it up through the diplomatic channels.

Mr. NORRIS. Our right would exist, I take it. Wherever any prize was captured it would be taken into the prize court of the country capturing the prize, and I believe it would be conceded as a matter of international law, would it not? that every country would have the right and does have the right to enact such laws as she sees fit regarding its prizes or regarding the prizes or regarding the articles of war that may be in force during any controversy.

Mr. WALSH. I assume so, any proper legislative authority undoubtedly.

Mr. NORRIS. So these matters would be settled, if these ships were taken as a prize, not according to our idea of what ought to be the law, but according to the law in the country where they were taken, construed by the officials of that country?

Mr. WALSH. Temporarily, as a matter of course. That was so in the case in 1856 when France was threatening to seize any ships we bought from Russia. If the *St. Harlampy*, for instance, had been seized by a French cruiser, she would have been brought into a French port and would have been brought before a French prize court. We would have undoubtedly gone before that court and attempted to induce the French court to take our view of what the international law is. If she failed to observe our suggestions in the matter, we would take it up diplomatically.

The following is printed as an appendix to Mr. WALSH's remarks:

CHANGE OF FLAG.

[Translated from proceedings of the International Naval Conference, held in London December, 1908–February, 1909 (Cd. 4555). A. Bernard, translator. January 23, 1914.]

Views expressed in the memoranda of the various powers:

GERMANY.

ART. 3. The neutral or enemy character of a merchant vessel is determined by the flag it carries. A vessel carrying a neutral flag may nevertheless be treated as the vessel of the enemy:

1. If it carries the enemy's flag up to the outbreak of the hostilities or within two weeks immediately preceding.

UNITED STATES OF AMERICA.

(Nothing.)

AUSTRIA-HUNGARY.

(G) According to the custom of nearly all nations, the sale of an enemy vessel made during a voyage, and after hostilities have broken out, can not prevent the capture of the said ship, which continues under the present circumstances to be regarded as an enemy.

(The ancient French theory under which enemy vessels could not from the outbreak of hostilities change their nationality—that is to say, lose their status as enemy vessels—implies an undue restriction of neutral commerce, as such commerce must in principle remain free, even in time of war. France itself, furthermore, derogated from this theory in 1870.)

Paragraph 26 of the proposed regulations relating to prizes adopted by the Institute of International Law in its meeting at Turin, seems to contain a solution of the question quite satisfactory, as it takes into account the interests of both belligerents and neutrals.

This paragraph reads as follows:

"The deed establishing the sale of the hostile ship made during war must be perfect, and the ship must be registered in conformity with the laws of the country the nationality of which it acquires prior to clearing port. The new nationality can not be acquired by means of a sale in the course of the voyage."

Nothing, furthermore, prevents the adoption of supplementary guaranties against the legitimate interests of a belligerent being injured by fictitious sales made by the citizens of the other belligerent.

SPAIN.

(G) The Government of His Catholic Majesty deems acceptable the rules suggested by the cabinet of London in paragraph 7 of its memorandum. When the change of flag of a ship corresponds to an actual transfer of ownership or to other reasons of a private nature its validity will be recognized, but if it is impelled by a desire to avoid by fraud the risks which nowadays exist for private hostile property in case of maritime war, it must be deemed a nullity.

FRANCE.

(G) The change of nationality of merchant ships made subsequently to the declaration of war is null and void. The transfer prior to the declaration of war when regularly made is valid. The dates of the transfer under a neutral flag prior to the declaration of war must be established by authentic documents to be found on board, and the transfer must have been finally registered before the proper authorities.

The act of naturalization granted by a neutral Government to the owner of a ship subsequently to the declaration of war must be held in suspicion. It is necessary in this case to act according to circumstances and other information, especially according to where the ship was built, the composition of its crew, the compliance with national provisions imposed upon the flag flown.

GREAT BRITAIN.

1. The transfer either by sale or by gift to a neutral of a hostile ship other than a war vessel is not made invalid merely by reason of the fact that it took place during or in anticipation of hostilities.

2. Such transfer, however, is not valid—

(a) If it takes place in a blockaded port.

(b) If it takes place during a voyage. (In this respect a voyage is ended the moment the ship reaches the port where it can be effectively taken possession of by the transferee.)

(c) If the vendor retains any interest in the ship or if a clause stipulates the return thereof at the end of the war.

3. The burden of proof that the transfer is bona fide is upon the plaintiff, and the transfer must be complete, in good faith, and for an adequate price.

A ship transferred to a neutral flag is therefore still liable to condemnation by a prize court should the conditions of the transfer give rise to suspicion of which the plaintiff does not clear himself, as for instance—

(a) If no written evidence of the transfer is found on board at the time of the seizure.

(b) If the transferor has any control over the ship, a share in the profits, or the privilege of revoking the transfer.

(c) If the supposed transferee or his representative (the latter not being an enemy) has not taken possession.

(d) If the ship is subject to the control of an enemy.

(e) If the captain or person in command is in the service of an enemy.

ITALY.

(G) "No vessel may be granted the nationality arising from the sale of said vessel by a citizen of a country at war with another country which is at peace with the King's Government.

"The Secretary of the Navy, however, if the bona fide character of the sale is ascertained, shall have authority to confer Italian nationality upon the vessel." (Merchant Marine Code, art. 42.)

The conclusion to be drawn from this provision is that, according to Italian positive law, a sale of an enemy vessel to a neutral purchaser subsequently to the outbreak of hostilities is presumed to be fictitious and as such can not be recognized. Proof to the contrary, however, subject to very special guarantees, may be given.

The council on diplomatic litigations (conseil du contentieux diplomatique) held much the same view, declaring that the transfer of ownership of a vessel can not possibly be regarded as valid unless evidenced by the ship's papers, and that no consideration would be given to a sale which would not have been entered on the ship's papers on the ground that the vessel was on a voyage. It appears, however, from this opinion that proof of the genuineness and legality of the sale is admissible. (Cont. dipl., June 16, 1866, capture of the ship *Venezia*.)

JAPAN.

The transfer of ownership of a vessel during, or in anticipation of, war by the enemy State or by a citizen thereof to another person residing in the other belligerent State, or in its ally's territory, or in a neutral State, is only valid if sufficient proof of a complete and bona fide transfer is adduced.

When the ownership of a vessel is transferred while this vessel is engaged on a voyage, such transfer must not be regarded as complete and bona fide until after actual delivery.

NETHERLANDS.

VII. (1) The validity of the transfer of merchant vessels from the flag of a belligerent to the flag of a neutral during, or at the outbreak of, hostilities is recognized without any restrictions.

(2) A merchant vessel transferred from the flag of a belligerent to the flag of a neutral in a blockaded port or a blockaded coast is not entitled to the treatment of vessels flying a neutral flag.

RUSSIA.

VII. The belligerents can decline to acknowledge the neutral character of any merchant vessel purchased by neutral persons from an enemy State or from a citizen of the latter, unless the new owner can prove that the purchase was completed before he was aware of the outbreak of hostilities.

REMARKS.

The transfer of a vessel for the purpose of evading the consequences to which an enemy vessel, as such, is exposed is not admissible.

Most of the memoranda, in stating the law in force, have followed different methods in the interpretation and application of this common principle. As evidence is difficult in this matter, simple or conclusive presumptions, more or less justified, have been proposed, especially when the transfer takes place during hostilities. In such case conclusive presumption of nullity does not constitute, according to all the memoranda, a general rule except in the case of a transfer while on a voyage.

Prior to the outbreak of hostilities common practice tends to recognize the validity of the transfer whenever such transfer has regularly taken place; that is, when there is nothing fictitious or unlawful about it capable of arising suspicion.

35. A ship may not be transferred to a neutral flag to escape the consequences of its character as a vessel of the enemy.

36. A transfer before the outbreak of hostilities is valid if it occured regularly; that is, if it is not brought under suspicion by any fictitious or irregular feature.

37. After the outbreak of hostilities there is a conclusive presumption of nullity in the case of a transfer made during a voyage.

Mr. THOMAS. Mr. President, on yesterday this Chamber was the scene of a most interesting performance. One of our oldest and most-respected Senators, the oldest in point of service in this body, stood the test of endurance upon his physical and mental faculties by speaking for seven long hours and without interruption. He completed his task and left the floor in good condition, and is this morning in his seat apparently as fresh and vigorous as ever, all of which justifies the hope that he will be with us for many years and possessed of all his physical and intellectual activities.

But, Mr. President, another feat was performed yesterday by another rugged old son of New England quite as remarkable, which, though not a deliberate one, should be embalmed in the columns of the CONGRESSIONAL RECORD and the incident thus preserved to posterity. Therefore I will read it, for it illustrates as graphically as the long address of the Senator the rugged sturdiness of New England manhood, where old age does not always dim nor custom stale man's infinite varieties. I read from the New York World of to-day a special from Maine. It is headlined:

VETERAN STOOD ON HIS HEAD IN BARREL—THERE YET, PERHAPS, IF HIS GRANDSON HAD NOT FOUND A BLOCK AND TACKLE.

EAST KNOX, ME., *January 27.*

Maj. Simon Pratt, battle-scarred veteran of more bloody fields than any other Grand Army of the Republic man in Waldo County, who came home in 1864 with part of an ear clipped by a minie ball, two toes gone, and a thumb shot off, came near ending his eventful life in a most unsoldierly way yesterday.

Although he is 78 and weighs more than 200 pounds, Maj. Si is able to help some around the place. He reached into a barrel to set a hen that had nested in it and pitched in head first.

His grandson, Lafayette Marden, 13 years, and Lafayette's chum, Roscoe D. Clewley, were not strong enough to get the major out, but Lafayette saw a block and tackle and put a clove hitch around his grandfather's ankles, and they finally hoisted him out.

Posterity, of course, must determine, Mr. President, which of these two feats was the greater. In my judgment the palm should be awarded to the sturdy son of Maine, for his grandson rescued him from his barrel and restored him to the arms of his anxious family. He seems therefore to be "out of the woods."

Mr. SMOOT. Mr. President, I suggest the absence of a quorum. I should have done it before the Senator read that most interesting article, but I now suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. JAMES in the chair). The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hughes	Oliver	Smith, Mich.
Borah	James	Overman	Smoot
Brandegee	Johnson	Owen	Sterling
Bryan	Kenyon	Page	Stone
Chamberlain	Kern	Perkins	Swanson
Chilton	La Follette	Pittman	Thomas
Clapp	Lane	Pomerene	Thompson
Crawford	Lee, Md.	Ransdell	Thornton
Culberson	Lippitt	Robinson	Townsend
Cummins	Lodge	Root	Vardaman
Dillingham	McCumber	Saulsbury	Walsh
Fletcher	McLean	Sheppard	White
Gallinger	Martine, N. J.	Sherman	Williams
Gore	Nelson	Simmons	
Gronna	Norris	Smith, Ariz.	
Hollis	O'Gorman	Smith, Md.	

Mr. OLIVER. My colleague [Mr. PENROSE] is unable to attend the sessions of the Senate for the present on account of illness.

The PRESIDING OFFICER. Sixty-one Senators have answered. A quorum is present.

Mr. STONE. Mr. President, I do not intend at this time to discuss the bill pending as the unfinished business. I may have something to say on it to-morrow when the Senate reassembles after a recess or an adjournment.

The really great speech delivered by the Senator from Montana [Mr. WALSH] this morning, masterful and instructive, I commend to the careful study of my Republican colleagues who have been complaining that Senators on this side do not or have not sufficiently discussed the bill. I regret that only a few of them were present to hear it. They have expressed great anxiety to hear some discussion from this side, and have complained bitterly at the small attendance of Senators. They were not here except in a limited way this morning. Hence I say I hope such of them as heard this great speech will personally ask their colleagues to give it prayerful attention by reading it and reading it in the RECORD, as it will appear in the RECORD.

Mr. President, it has been a source of surprise and regret that our Republican friends seem to have determined not only to oppose this measure to the bitter end, but to put themselves in an organized opposition to practically everything suggested or proposed by those who, being in a majority, are especially charged with the responsibilities of legislation and of the conduct of the Government, and that they carry this opposition not only to questions of domestic import but to international relations.

Senators on the other side have surprised us by the freedom with which they have criticized and even attacked the policies of the administration with respect to international affairs. Many Republican newspapers have done the same thing—fortunately not all of them—and by way of contrast to what is said upon the floor upon that side and what is said in Republican newspapers generally, I wish to have read into the RECORD an editorial appearing in one of the greatest Republican journals in the country, and one of the most potential organs of that party, the St. Louis Globe-Democrat. I think it pertinent that it be put in at this time, that it may go along with the letter sent by the Secretary of State to me a few days ago,

and which has been printed as a Senate document. I ask that it may be read.

The PRESIDING OFFICER. Is there objection?

Mr. SMITH of Michigan. Mr. President, I do not intend to object to the request——

Mr. STONE. I can read it if the Senator objects.

Mr. SMITH of Michigan. But I am going to ask a similar courtesy after the Senator has had his article read.

The PRESIDING OFFICER. The Chair hears no objection. The Secretary will read as requested.

The Secretary read as follows:

[From the St. Louis Globe-Democrat, Tuesday morning, January 26, 1915.]

TURNING ON THE LIGHT.

Secretary Bryan's letter to Senator STONE, written in answer to a communication received from the Senator in his capacity as chairman of the Senate Committee on Foreign Relations, ought to set at rest much of the useless and harmful agitation concerning assertion of neutral rights. It has not been possible at any time since the beginning of the war to find cause of just complaint of the course being taken by our Government. And the subject is one filled with so many difficulties which could easily become dangers threatening a continuance of our own peace that it has been impossible not to view with apprehension of its possible results a course of conduct tending, though not calculated, to raise and force complications which would end all our neutrality with a state of belligerency. The weight of public opinion has remained calm. That is the saving fact in the situation. But the noise and clamor raised by contending elements has been such as to create an artificial situation, and one which it is advisable should be met with an official statement of facts showing clearly the limitations within which we must act, and the action we have been taking within those limitations. The policy of maintaining secrecy in our foreign relations is not one upon which thus far the present administration can congratulate itself. We have seen enough of that in our Mexican affairs.

The Secretary of State is unequivocal in answering charges and objections made to the course of the department. Taking them up in detail, as they had been transmitted to him in Senator STONE'S letter, he deals first and most directly with the contention that an unnecessary discrimination is made in sales made to the allies which are not made to the Germans and Austrians. He, of course, disposes of this readily, as anyone could, with citations of governing laws and customs under which the citizens of any neutral country are privileged to sell actual contraband to any belligerent at their own risk and that of the buyer of the goods being captured by other belligerents. The fact that the Germans and Austrians are not now in a position to make such captures in no way invalidates the neutral rights of sale. To prohibit such sales, even by an exercise of the undoubted right to lay an embargo, would, he plainly thinks, be more an abandonment than an assertion of neutral right. It would be possible to go further and say that the exercise of such a right and power would be so far an abandonment of neutrality as to be almost tantamount to a declaration of hostility against peoples in a position to make use of such facilities as our industries may afford them. When a firm or corporation finds itself boycotted by any body of citizens it does not, for that reason, cease making sales to other bodies of citizens who find a way of reaching it and are willing to do business with it. Such as are kept away through force of the boycott it would willingly trade with if it could, but so long as they, for any reason, are shut off from its activities, it is not expected to suspend trade relations with all others.

The Secretary shows in detail the misleading nature of all of the charges made. He shows how this Government, instead of allowing transport of British military supplies across its Alaskan territory, distinctly forbade such transporting. He cites the records to prove that in each case where, as alleged, our neutral rights have been invaded without protest, that protest was made. He establishes the fact that in every case of the seizure of Germans or Austrians aboard American ships the wrong has been righted after protest by the Government at Washington. He states that allied ships lying outside our harbors have been withdrawn after protest. He disposes effectually, we think, of charges about coaling at Panama. Many of the points of objection raised he shows to be covered in the note to Great Britain of December 26, answered by Sir Edward Grey, and which is now the basis of further negotiation. We congratulate him and the country upon a statement which will go far toward removing a source of irritation and danger. We do this the more readily because of the evidence the statement affords that our foreign relations are not such a sacrosanct thing that any large body of American citizens may not know their state at any time on any question.

Mr. LODGE. Mr. President, if the Senator will allow me, as he has the floor, I suppose——

Mr. STONE. I surrender it.

Mr. LODGE. I only want to say that I certainly have made no adverse criticism, and I think no one on this side has made any adverse comment on that letter of the Secretary of State. I thought when I read it that it was a most excellent letter and did the greatest credit to the Secretary. My chief objection to the bill now pending is that the proposition to buy belligerent ships goes directly contrary to the principles laid down in that excellent letter.

Mr. STONE. Mr. President, I did not say that Senators had criticized that letter. I said, and I repeat, that Senators on the other side, very able and distinguished Senators, have criticized and even assailed the administration with respect to its general foreign policy, and I had the editorial read merely for the purpose of showing that one Republican journal at least is commending the general policy of the administration.

Mr. SMITH of Michigan. Mr. President, lest the view of our friend from Missouri [Mr. STONE] should be taken as the unanimous expression of public opinion, I desire to ask consent to have read an editorial in the Philadelphia Inquirer of Tuesday, which reflects a little divergent view upon the subject of the course of the administration.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[From the Philadelphia Inquirer, Tuesday morning, January 26, 1915.]

PRESIDENT WILSON AS A MENACE.

It seems to us that the time has come to speak very plainly concerning the attitude that has been assumed by President Wilson. For the President as a man we have the greatest respect. We have said upon frequent occasions that we do not question his sincerity. He believes thoroughly in himself and in his theories. Nevertheless, men are human and subject to human errors, and the President is not infallible.

On the contrary, while we dislike to say it, he constitutes to-day a menace to the country.

He is a menace not only in a business way, but to the peace of the Nation, while his assumption of sole power in Washington is a violence to the Constitution which is becoming more and more serious.

We are guaranteed under the Constitution a government divided into three departments—the legislative, the executive, and the judicial. The President has not yet laid hands on the judiciary, but so far as having a mind of its own is concerned, Congress has ceased to exist. It is dominated completely by the Executive. It dares not lift a hand unless bidden to do so by its master in the White House.

There was a time when men were sent to the House and Senate to represent their constituents. That time has passed into history. A Democratic majority exists in both branches, but it has no voice. In awe of its self-constituted leader, the "captain of the team," it trembles in his presence and hastens to do his bidding. If perchance there is a sign of rebellion he summons a caucus, places whatever measure he has in mind before it, makes of that measure a party affair, and demands and receives implicit obedience.

The lawmaking power is to-day in the hands of the President. He creates law and executes it, and by so doing he is menacing liberty of action and independence of thought and is making a mere plaything of the Constitution.

But since he is assuming the right to dictate legislation he must assume the responsibility as well.

He has belittled his high position as President of the United States, and prefers to be known as a party leader. In the common parlance of politics, he is a partisan boss and rules as a partisan, while his Secretary of State is engaged in the pleasing (to him) task of finding offices for "deserving Democrats."

As a partisan boss, therefore, Mr. Wilson must be regarded.

As a partisan boss, then, he is responsible for the deadly low-tariff law which but for the coming of the European war would now be plunging the business of the country into a far more serious condition than it is. Most of the mills that are to-day running full time are engaged in filling contracts for the armies of the allies. To the business of the Nation, therefore, Mr. Wilson is a menace.

If it is urged in his behalf that he and his party were pledged to a low tariff, the argument is valid, so far as the principle is concerned. But under no circumstances can the usurpation of the power of Congress be justified—the denial of the right of members of his party to amend or propose amendments to the particular form of law which he had had drawn up and insisted on passing.

However, the tariff is a matter which can be remedied in the end. But the ship-purchase bill is quite another matter.

It can not be urged that his party is pledged to a Government ownership of steamship lines, and yet here we find him demanding with all the energy that he possesses that, come what may, that mysterious bill which carries with it elements of international complications of a most dangerous character must be pushed through at the expense of everything else.

In this stand which he has taken we find not only a menace to the constitutional rights of Congress, not only a menace to business, but a distinct menace to the peace of the country.

From a business point of view this ship-purchase scheme is without merit. It proposes to finance a company with Government (the people's) money to buy ships at a cost of $30,000,000 as a starter (likewise with the people's money), and to place the management of this Government concern under a board to consist of the Secretary of the Treasury, the Secretary of Commerce, and three men to be appointed by the President.

Here we have a plan which depends upon a direct subsidy, which will be run at a great loss, and which will prevent private enterprise in shipping. No shipping concern under the United States flag depending on private capital could hope to compete with a Government-run concern with the entire Treasury of the Nation back of it to pay the losses.

It is a socialistic scheme, and is the first step in a Government ownership which might easily be stretched later on to comprise railways and telegraph and telephone lines.

But the more serious point is that of threatened international complications. There are few ships for sale except those that have been put out of business by the English Navy. These are exclusively German ships, and it is apparent that England, since she objects to the transfer to the Stars and Stripes of the German steamship *Dacia*, purchased by a private individual, would protest most vigorously if the United States Government came to the rescue of the German owners. Here is where President Wilson is playing with fire. He is inviting trouble. He is, to quote Senator LODGE, bringing "the United States within measurable distance of war."

It is easy to say that England already has her hands full and wouldn't fight. But how do we know that? There are hotheads on both sides of the water. Furthermore, the attitude of France and Russia would be the same as that of their ally. Again, there is Japan, with a navy that ranks only just below that of our own. In case of hostilities, where would we be? We should have just about all that we could contend with in Japan alone.

In any event, our commerce would be gone. We couldn't sell a ton of stuff outside the United States.

It is inconceivable that we should go to war; inconceivable that the President would permit war. But in case of a bitter controversy which, if carried to its end, would produce war, we should either have to make good or crawl on our hands and knees in the most humiliating manner.

Mr. Wilson is a man of theory. He had a theory about Mexico. He even sent an army to Vera Cruz. That action on his part was an act of war and would have brought about hostilities had not Mexico been

rent asunder by bandit bands. He played a game of bluff with Mexico, and his bluff was called. He has failed most miserably in his Mexican policy. He has made the United States a byword and a thing to be hissed in the streets of Mexican cities.

The President can theorize and bluff with Mexico. It is safe. But he can not theorize and bluff with England, France, Russia, and Japan. If he should buy the German ships, he would face a serious controversy, one that, because of the uncertain outcome, would at least disrupt the export business until it was settled, even if it did not bring on hostilities. And if we had to back down to prevent war after we had bluffed to the limit of controversy, in what sort of position would that leave us?

The ship-purchase bill is a disastrous scheme from any viewpoint whatever. As for President Wilson, we repeat what we said at the outset:

By assuming the attitude that he has, he is a menace to the country.

Mr. JONES. Mr. President, I have an amendment which I intend to propose to the shipping bill, which I ask may be read and then printed. It is a short amendment, but a very important one.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Secretary will read the proposed amendment.

The SECRETARY. After the words "shipping board," in line 2, page 8, of the latest substitute presented on behalf of the committee, it is proposed to insert the following:

And from and after the passage of this act it shall be unlawful to manufacture, barter, sell, or give away any spirituous, vinous, malt, or other alcoholic liquors of any kind upon any vessel or other structure located or operated upon any of the navigable waters of or under the jurisdiction of the United States, and any person who shall manufacture, barter, sell, or give away any such intoxicating liquors or otherwise violate the provision relating thereto, shall be guilty of a misdemeanor and be fined not less than $100 nor more than $5,000 or be imprisoned for not less than six months or more than five years or be both fined and imprisoned for each offense; and each act of manufacturing, bartering, selling, or giving away such liquors shall for the purposes of this provision constitute a separate offense.

Mr. SHERMAN obtained the floor.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Illinois yield to the Senator from Nebraska?

Mr. SHERMAN. Yes, sir.

Mr. NORRIS. If the Senator will yield to me just for a moment, I wish to ask unanimous consent to offer and have printed two amendments to the pending bill, and I ask that they lie on the table.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the proposed amendments will be printed and lie on the table.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 6839) extending the time for completion of the bridge across the Delaware River authorized by an act entitled "An act to authorize the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co., or their successors, to construct, maintain, and operate a bridge across the Delaware River," approved the 24th day of August, 1912, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 8904. An act to authorize the establishment of a life-saving station at the mouth of the Siuslaw River, Oreg.;

H. R. 18745. An act in relation to the location of a navigable channel of the Calumet River in Illinois;

H. R. 19078. An act granting the consent of Congress to the Cleveland Yacht Club Co. to construct a bridge across the west arm of Rocky River, Ohio;

H. R. 19746. An act to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes;

H. R. 20933. An act extending the time for completion of the bridge across the Mississippi River at Memphis, Tenn., authorized by an act entitled "An act to authorize the Arkansas & Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River at Memphis, Tenn.," approved August 23, 1912; and

H. R. 20977. An act to provide for the establishment of a life-saving station in the vicinity of Duxbury Reef, Cal.

DELAWARE RIVER BRIDGE.

The Presiding Officer laid before the Senate the amendments of the House of Representatives to the bill (S. 6839) extending the time for completion of the bridge across the Delaware River authorized by an act entitled "An act to authorize the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co., or their successors, to construct, maintain, and operate a bridge across the Delaware River," approved the 24th day of August, 1912, which were, on page 2, lines 6 and 7, to strike out "the time now limited, namely"; on page 2, to strike out lines 14 to 24, inclusive; and, on page 3, line 1, to strike out "section 3" and insert "section 2."

Mr. OLIVER. I move that the amendments of the House be concurred in; and I ask unanimous consent for the consideration of the motion.

Mr. FLETCHER. With the understanding that it does not displace the unfinished business and will not lead to debate, I shall make no objection to the Senator's request.

Mr. OLIVER. I make the request with that understanding.

The PRESIDING OFFICER. Without objection, the amendments of the House will be concurred in.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Commerce:

H. R. 8904. An act to authorize the establishment of a life-saving station at the mouth of the Siuslaw River, Oreg.;

H. R. 18745. An act in relation to the location of a navigable channel of the Calumet River in Illinois;

H. R. 19078. An act granting the consent of Congress to the Cleveland Yacht Club Co. to construct a bridge across the west arm of Rocky River, Ohio;

H. R. 19746. An act to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes;

H. R. 20933. An act extending the time for completion of the bridge across the Mississippi River at Memphis, Tenn., authorized by an act entitled "An act to authorize the Arkansas and Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River at Memphis, Tenn.," approved August 23, 1912; and

H. R. 20977. An act to provide for the establishment of a life-saving station in the vicinity of Duxbury Reef, Cal.

THE MERCHANT MARINE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof, or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

[Mr. SHERMAN addressed the Senate. See Appendix.]

Mr. SMOOT. Mr. President, while the Senator from Illinois is looking for a missing letter, I suggest the absence of a quorum.

Mr. SHERMAN. The pad in which I had my papers fell on the floor, and they were mixed up. I had them arranged so I could find them; but I can quote the letter.

The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from Utah?

Mr. SHERMAN. Certainly.

Mr. SMOOT. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gore	Norris	Smith, Md.
Brandegee	Hollis	Oliver	Smith, Mich.
Bryan	James	Overman	Smoot
Catron	Johnson	Owen	Sterling
Chamberlain	Kenyon	Page	Sutherland
Chilton	Kern	Perkins	Swanson
Clapp	Lee, Md.	Pittman	Thomas
Clark, Wyo.	Lippitt	Robinson	Thornton
Culberson	Lodge	Saulsbury	Townsend
Cummins	McLean	Shafroth	Vardaman
Dillingham	Martin, Va.	Sheppard	Walsh
du Pont	Martine, N. J.	Simmons	White
Fletcher	Myers	Smith, Ariz.	Williams
Gallinger	Nelson	Smith, Ga.	

Mr. THORNTON. I was requested to announce the necessary absence of my colleague [Mr. RANSDELL].

The PRESIDING OFFICER (Mr. SWANSON in the chair). Fifty-five Senators have answered to their names. A quorum is present.

Mr. FLETCHER. Mr. President, it has been often stated on the floor, and various editorials have been read, to the effect that the friends of the pending measure are remiss in their duty in not taking time to present in extenso the reasons for the proposed legislation. We on this side have been criticized quite severely because we have not been willing to prolong the discussion by interrupting speakers, engaging in colloquies, and participating more largely in debating the bill. I have felt that whereas the general subject has been before the country since at least last September and under consideration here for over six weeks, after reports upon the bill, quite full and accessible to all, and since the proposition has been under public discussion on the platform, in the press, and generally, for weeks, it is a mere pretense and subterfuge

to find fault with the friends of the measure because they have not consumed the time of the Senate by long-drawn-out speeches. We would like to have a vote at the earliest possible moment.

I said on the 4th of January, when we began the consideration of the bill, when some complaint was made that the effort was to "jam through" the legislation and deny full and free discussion, this:

I simply wish to suggest that there is no disposition on this side to limit debate or to prevent a fair and full discussion of the bill at all. There is no disposition, as the Senator expressed it, to jam through the bill. Even if we had the power to do it, certainly we have not any power to prevent an ample discussion and consideration of the bill. We simply want to get it before the Senate for that very purpose, so that Senators can proceed, and, whether they are ready or not, we on this side are prepared to discuss it.

Frankly, my disposition has been to have each speaker proceed under his own power and consume his own smoke as much as possible. However, if it will accommodate or gratify the opponents of the bill to have further views expressed from this side and more discussion of the subject, I am willing to venture to offer some matters for their consideration, which I expect, however, let me say in advance, they will not like and may ignore or push aside as without merit. Their newspaper friends will do the same. So, as far as being helpful to the public depending on the press is concerned, generally speaking, I fear my pains will be unrewarded. However, it will be my hope to interest the other side in some matters which will make it unnecessary for Senators to spend the time, hour after hour, in reading documents that are accessible to all of us.

The pending bill was introduced in the Senate on the 9th of December, 1914, and was referred to the Commerce Committee, and that committee reported it favorably on the 16th day of December, 1914, with certain amendments. Other amendments, without changing the general nature of the bill, mainly to clarify the language, were reported, and the whole, as amended, as proposed in the nature of a substitute, was reported on the 6th day of January, 1915. Numerous amendments were offered from both sides of the Chamber, and upon further consideration of the measure it was deemed advisable to report favorably upon additional amendments. As thus perfected, the first committee substitute was withdrawn and a second substitute, presenting the bill as now completed and taking the place of all prior amendments of the committee and the original bill, was presented by the committee on the 26th instant.

Arguments have been made which have been addressed, to some extent, to the details of the original bill, but mainly to the principle involved in the proposed legislation and the public policy, which is alleged to be a departure unsound and unwarranted. These arguments have proceeded along various lines, often crossing each other and frequently answering themselves.

We have been told by those opposing the measure that there is really no scarcity of tonnage, and yet that millions of American money is impatient to become invested in ships to engage in trade.

The facts overwhelmingly established disprove the first statement and the second answers it. We are told that cargoes are lacking and ships are abundant, and yet that American investors would at once put their money in ships but for the fear of the passage of this bill.

The railroad companies give notice that the elevators and warehouses and sidings at the ports are crowded, the demand abroad is great, and yet the commodities are not moving in sufficient quantities to avoid congestion, when at all.

We are told that the rates are not excessively high, insurance and delays considered; that mines strew the seas; that the hazard is great, and the dangers of seizure and interruptions by search are factors which justify the present rates of freight and charges. On the other hand, it is argued we need a merchant marine, and the Government should guarantee the bonds of private companies, which would provide the ships, and the Government's guaranty would bring forth the abundant private capital eager to make the investment.

It is asserted, on the one hand, that the 25 or 30 ships which opponents say could be acquired or built under this bill would have no effect on commerce, create no competition, cut no appreciable figure in shipping, and the corporation would soon become bankrupt, and yet the existing shipping interests are protesting they will be run out of business and can not stand the competition. Such are only a few of the inconsistencies in the arguments made.

It is argued in the face of these claims that no vessel of any nation at war should be acquired under any circumstances, and that if this is done the world's tonnage would not be increased and the danger of entanglement in international affairs would become imminent. The reports of Secretary McAdoo and Secretary Redfield and of the committee on that point are unanswerable. It is assumed in the argument that one purpose of the friends of this measure is to acquire German ships now interned. A man of straw is set up in order to have something to demolish.

We assert there is no such purpose or necessity. What do we want with a 56,000-ton ship? The best type of cargo carrier is less than 8,000 tons. Light-draft vessels, for South American trade especially, will be required. Let us examine briefly the foundation of the arguments against the measure as set forth in the minority views.

MINORITY VIEWS UNSOUND.

It can be easily shown that the report is full of fallacies, inaccuracies, and inconsistencies. Condensed to its substance, it holds (1) that if the bill is designed as an emergency measure there is no need for it, as existing conditions do not warrant it; (2) that if there is an emergency the bill does not provide a remedy; (3) that if the bill is designed as a permanent policy of the Government the minority is against it, because of the Government-ownership feature.

First. There is an existing emergency for that matter, but aside from that I would call attention to the House report, made a part of our report, in which this statement appears:

The fact that we pay a sum variously estimated to be from $200,000,000 to $300,000,000 annually to vessels under foreign flags to transport our commerce, which seriously affects our balance of trade, is urged as a sufficient reason why we should have a merchant marine of our own, but this is only one of many reasons.

Again, it has been pointed out that Great Britain with her vast navy was, nevertheless, compelled to commandeer over 500—some estimates give 1,500—merchant vessels as transports and auxiliaries, and this shows the great need of passing this bill to establish an American merchant marine, to be available as naval auxiliaries in case of war, even if the present extraordinary shipping situation was no longer a factor. The agitation for an American merchant marine has been going on since 1880. The present shipping conditions caused by the war have only served to force on us a full realization of the consequences of not having a merchant marine of our own.

Nowhere in the minority report is there any practicable suggestion as to how we may otherwise establish an American merchant marine, nor does the minority report even say that it is desirable that we should have an American merchant marine; in fact, one may readily infer from this report that an American merchant marine is not at all necessary or desirable.

The minority report repeatedly disputes the fact that there is a shortage in shipping; and it says that the situation has been greatly "magnified and exaggerated." It refers to the "alleged scarcity of tonnage" (p. 4); "an imaginary lack of tonnage" (p. 7). "It is not improbable," says the report, "that on the whole the world's trade has diminished in a ratio commensurate with the loss of ocean tonnage" (p. 4). "Generally speaking, there is sufficient tonnage to meet all demands," says the report (p. 6). The report quotes the Boston Marine Association as to four sailing vessels alleged to be idle in Boston Harbor, as if in this day, even if these ships were idle, sailing vessels can be considered as a factor in the far-seas trade.

In view of the actual facts of the shipping situation, as anyone can readily ascertain, the attempt to prove that there is no shortage in shipping is little short of an insult to one's intelligence.

Vessels usually worth $5,000 a month now get $40,000 a month—

Says the Journal of Commerce, of New York, of January 11—

Demand for tonnage much in excess of the available supply. Charterers continue to experience great difficulties in covering their requirements as far ahead as April owing to scarcity and light offerings of available boats. A very similar condition exists in the sail-tonnage market relative to trans-Atlantic business, the demand for vessels being considerably in excess of the supply of those of suitable class.

This is quoted from the Journal of Commerce of January 11.

Fewer steamship sailings to South America. Shortage in January steamers unavoidable. Complaint made to Washington.

This is from the Journal of Commerce of January 12.

The demand for tonnage in the various trades shows no abatement, while the supply of available steamers does not begin to approach the requirements of the trade.

From the same journal of January 11.

The above quotations, which are only a few of the many available, are from a paper which is almost hysterical in its opposition to the shipping bill, but must, nevertheless, truthfully state the facts relative to the shipping market in its news columns. The editorials are in hopeless conflict with the admitted facts.

The minority report undertakes to show, by five reasons, that the high freight rates that have prevailed for some months past and which continue to steadily rise are due to causes other than shortage of ships.

War insurance covers all the risks enumerated in reason No. 1, and the cost of war insurance is not sufficient to warrant the exorbitant freight rates now prevailing. As a matter of fact, in many cases the charterers pay the war insurance on the vessel as well as on their cargoes.

The average cargo steamer, with a net dead-weight cargo capacity of from 7,000 to 10,000 tons, costs from $300,000 to $400,000. Assuming that they are insured for their original cost at the highest rate prevailing in Europe—except Germany—the cost of war insurance will not exceed 50 cents per ton cargo capacity in each direction. This utterly disproves the statement that war-risk insurance is a factor of any consequence in the increased freight rates. To illustrate: Rates on grain to Rotterdam have increased $10 a ton; rates on cotton to Rotterdam have increased $20 a ton; and to Germany rates on cotton have increased $60 a ton; and cotton is noncontraband and free from seizure. The Government provides insurance at reasonable rates on cargoes carried in American bottoms. This subject is discussed in Document No. 673, part 1, page 12, and it is shown that this item is no material obstacle.

Referring to reason No. 2, even a delay of 60 days, as mentioned in the report, would not warrant the increases in rates which have taken place, as, for instance, $5,000-a-month vessels now command $40,000 a month. However, such delays are exceptional, and in the great majority of cases vessels are being dispatched with little undue delay. Delays of a month and longer in certain South American ports have been the regular state of affairs for many years, yet they did not cause any noticeable increase in freight rates on vessels engaged in the South American trade until this war.

The statements made in connection with the steamship *Missourian* are misleading. In the first place, she could not carry 8,000 tons of freight in addition to the horses she carried. The *Missourian* was chartered by people who had a contract to supply horses to the French Government, and their contract calls for the delivery of the horses in France. Their profit is not made on the transportation, but on the sale of the horses, and that profit is large enough to warrant them in devoting the vessel exclusively to transporting their horses to France until they have completed full delivery of their contract.

As to reason No. 3, the charterers pay for the coal, and if they must bunker for the round trip and thereby reduce the carrying capacity, the loss is the charterer's and not the shipowner's. If there is any point to that reason, it would be that the owners should make a concession in the charter rate to compensate for the loss of space caused by the necessity of carrying coal for the round trip, but, as a matter of fact, the famine in ships is so great that shipowners simply say, "Take the ship on our terms and stand your own extra expenses," and even so their ships are snatched up with little argument.

Reason No. 4 I have covered in my comments and answer to reason No. 1.

The fifth reason asserts the breaking down of credits and exchanges, and that is alleged to complicate the situation.

I fail to find any connection between this reason and increased freight rates. If we are to consider this reason at all, it should have resulted in a decrease in freight rates, and it actually did result in that for a short period immediately after the outbreak of the war. If we need better financial arrangements as well as ships, the answer is they are being supplied.

It will be seen that all of the reasons which the minority has so laboriously stated are utterly without merit as explaining the great increase in freight rates.

As to the generalities on the question of freight rates, which the minority report quotes from two bulletins of R. G. Dun & Co., one dated three months ago, in the face of actual conditions as they are known to all in the shipping business, these are only additional absurdities appearing in the minority report. This is also true of the tables of freight rates which take up the last three pages of the report. So the argument that boats sailing from New York to South America show cargo space not occupied means nothing. The ships may have been loaded down to their marks with every pound of cargo they could carry and still have cubic feet of space left.

We now come to the minority's comment on the purchase of ships as provided for in the bill. Even if we are unable to buy a single ship and it is necessary to have all the ships built and to wait 18 months for them, as the minority says, the bill should be passed. That, however, is not the condition. British and French shipyards are working night and day turning out merchant vessels as fast as they can. New vessels are being launched every few days, and the Government will be able to buy at very favorable prices new or nearly new excellent cargo steamers to the full amount provided for in the bill. Incidentally I would mention that the present activities in European shipyards do not indicate the European shipping interests anticipate the slump in shipping which the opponents to the bill say will take place after the war.

A responsible shipbuilder tells me ships of 5,000 tons can be built in 7 months, and ships of 9,000 to 10,000 tons can be built in 11 months.

Trading possibilities have always augmented on the termination of war. That is the experience of the past, without exception.

The typical cargo steamer measures 7,760 tons gross, 4,870 tons net; length, 470 feet; beam, 54 feet; depth of hold, 31 feet; cargo carrying capacity, 10,400 tons; average sea speed, 13 knots per hour.

For several years, right up to the outbreak of the war, there have not been enough ships afloat to handle the commerce of the world, and for many years after the war is over there will be an even greater shortage of ships to take care of the rebuilding and new trade developments made necessary by the war.

The several references which the report makes to the purchase of interned German and Austrian ships are without justification. The purposes of the bill can be accomplished without purchasing a single one of the interned vessels.

The initial capitalization is not as absurd as the minority would have it appear. Forty million dollars is a good start; it will provide a fleet of at least 100 excellent vessels.

And we hear the Senator from New Hampshire and others talk about 25 or 30 ships as the result of this entire investment. The best information I can get on the subject is that some 100 vessels can be provided out of this fund.

The fear of those opposed to the bill, I am sure, is not that the enterprise will be a failure but that it will be a success, thereby confounding subsidists and Republicans and for all time destroying the possibility of a subsidy raid on the Treasury.

The methods suggested by the minority for reducing freight rates are hardly worth serious consideration, even if they had any bearing on this bill, which has for its object the establishment of an American merchant marine. That is not touched by suggesting that control of rates be vested in the Interstate Commerce Commission, or that "public vessels" be chartered to private concerns "with restrictions on freight charges." What "public vessels"?

The minority report says that increased and improved transportation facilities will not result in increased trade. The following experience in connection with increase of trade resulting from improved transportation facilities will tend to refute this claim of the minority. It is given by one who knows, having had that precise experience.

In 1908 the traffic between New York and Bermuda was maintained by only one line, the Quebec Steamship Co., who had had a monopoly of that trade for over 30 years. The traffic had shown a steady increase from year to year, and to all appearances they were fully filling all the requirements of that route. Another steamship line between New York and Bermuda was established and met with such great success that in 1910 the Royal Mail Steam Packet Co. entered the field as a third competitor. Now note the results. In 1908 the annual passenger traffic between New York and Bermuda, in each direction, was about 5,000. In 1911 it was 27,000, and the freight traffic also increased tremendously. The Canadian experience also shows the unsoundness of the minority's position.

As to the objections to the Government ownership features of the bill as they appear to the minority, I will take them in the order in which they are stated:

(a), (b) For over 50 years there have been no "personal endeavor" or "individual initiative" shown toward the establishment of an American merchant marine by private interests; there is no such "endeavor" or "initiative" shown now, nor is there the slightest basis for believing that there will be any in the future without the spur of a subsidy or other form of bounty.

(c) The War Risk Insurance Bureau, recently organized, refutes the allegation that a Government enterprise is a "constant tendency to maximum costs."

Likewise the Government's operation of the Panama Railroad and steamships has been both economical and successful.

(d) In what manner is the proper and legitimate "multiplication of Government employees and officials" an objectionable feature? The Government is conducting large enterprises without waste or corruption or mismanagement.

(e), (f), (g) The United States Post Office Department is, I think, the most extensive business organization in the world. Considering the vast business done by the Post Office Department and the high pressure under which the work is done, the efficiency of the Post Office Department is truly marvelous. The percentage of mistakes and complaints is infinitesimal as compared with mistakes of the privately owned express and telegraph companies and complaints of their patrons.

If there is one respect in which a governmental enterprise will have an advantage over private enterprises, it is with respect to "labor problems." I fail to see why labor problems are mentioned as a disadvantage of a Government-owned merchant marine.

More "corruption" can be shown in many private business concerns than in the entire United States Post Office Department.

The minority report conjures and imagines dangers and difficulties in connection with a Government merchant marine which are not even remotely likely to occur and which are not worth attempting to answer. This much it may be well to say: "Surely the President of the United States, who can so easily involve this country in foreign complications in hundreds of ways not in the least connected with shipping, can be trusted to direct the operations of the shipping board, of which he would be practically the head, in such a way that the neutrality of the country will be preserved." My quotation is from a statement made by Secretary McAdoo before the House committee when the Alexander bill was being considered.

"Experience required": It is absurd to say that the Government will not be able to command all the "expert knowledge" and experienced men necessary to carry on the business of a Government merchant marine. Surely the building of the Panama Canal, not to mention numerous other business undertakings by Government or municipal authorities, completely disproves this statement of the minority. Likewise the minority's comments as to the lack of wharves, affiliations with shippers, agencies, and so forth, are utterly without merit. The Government has advantages in those respects that no private corporation could ever hope to have. Every consular office throughout the world is a potential agency for the Government merchant marine.

The possibilities of developing trade with the Republics south of us are indicated by the following statement:

TRADE WITH LATIN AMERICA.

Latin American imports from leading commercial countries for fiscal year ending Sept. 30, 1913.

TO NORTH AMERICAN REPUBLICS.	Per cent.
From United Kingdom	12.83
From Germany	10.04
From France	7.15
From United States	52.53
TO SOUTH AMERICAN REPUBLICS.	
From United Kingdom	27.73
From Germany	18.35
From France	8.68
From United States	16.25
TOTAL OF THE 20 REPUBLICS.	
From United Kingdom	24.32
From Germany	16.45
From France	8.34
From United States	24.59

Out of a total of imports from all countries of $1,325,752,627.

Exports—Fiscal year ending Sept. 30, 1913.

FROM NORTH AMERICAN REPUBLICS.	Per cent.
To United Kingdom	11.10
To Germany	7.91
To France	3.65
To United States	71.66
FROM SOUTH AMERICAN REPUBICS.	
To United Kingdom	24.09
To Germany	13.73
To France	9.87
To United States	17.65
TOTAL OF THE 20 REPUBLICS.	
To United Kingdom	17.79
To Germany	12.22
To France	8.34
To United States	31.03

Out of a total of exports to all countries of $1,539,123,597.

I shall refer to this trade as regards South America somewhat later on.

The Senator from Ohio [Mr. BURTON] propounded certain inquiries, which I propose to take up seriatim. He surmised the answers to the questions in his own way and made them the basis of his attack on the bill. He lamented the departure from principle involved, and predicted dire consequences if the bill should pass. He advocated conference agreements among shipowners, and, in its last analysis, his argument leads to a let-alone policy, which means that there should be nothing done and that we should acquiesce in the present situation, when our flag is off the ocean and our foreign commerce is demoralized, a condition of abject dependence upon competitors in trade and utter helplessness when they fail. The Senator deplores that influences outside the Senate move the proponents of this bill. This compels me to lay before the Senate some evidence of influences behind the opposition to this bill.

The Senator from Massachusetts [Mr. WEEKS] undertook to show from newspaper clippings that the bill has no support in the press, and therefore he argued that there was no real demand for it by the public. I will submit some press comments of a different tone and offer some suggestions which have come to me to account for the attitude of certain newspapers cited by the opponents of the measure. The communications from the Secretaries of the Treasury and Commerce refute the contention as to the public demand. In the arguments of opponents they lay stress particularly upon objections to Government operation.

If the Government would only build the ships and pledge itself to charter or lease them at once, I apprehend that opposition to the measure would speedily disappear. It is the one word "operate" that disturbs quite a few people of great influence. To build the ships and then lease or charter them at such figures as might be obtainable—which, no doubt, could be arranged by the shipping interests to suit themselves—would be almost as good for them as their other proposal, that they would build or supply the needed ships if the Government would only guarantee their bonds. Just where the people generally would reap benefit by that arrangement, without very material, if not absolute, control over rates and routes by the Government, it is difficult to see. It is quite clear at a glance to see where the shipping interests would be served by that procedure.

The Senator from Massachusetts [Mr. WEEKS] joined his colleagues in cordial disapproval of the measure mainly because of the power given the Government's agents to operate the ships. I desire to call attention to a proposal submitted by the Senator last August and the response thereto made by the Secretary of the Navy; and I marvel that the Senator's views, as indicated in his speech on this bill, appear so at variance with the proposals and announcements put forward by himself a short while ago.

The Senator from Massachusetts [Mr. LODGE], in a learned, prepared argument, ostensibly in support of his resolution, but really addressed against the bill, assumes a case and then proceeds to attack it. He might just as well say that if this bill passes the President will issue a declaration of war as to say if this bill passes the United States will purchase interned ships which will be opposed by England and France, that it will be an unneutral act and result in a quarrel and disturbance, with unthinkable consequences. This bill no more compels or obliges the purchase of belligerent vessels than it authorizes a declaration of war. There is no more occasion for complications, national or international, or even for embarrassments of any kind, by reason of the passage of this bill than would be involved in a simple reiteration by resolution of what is contained in the national platforms of the several parties regarding the merchant marine.

Deplorable situations are pictured on the assumption that the President, two Cabinet officers, and three additional patriotic Americans will at once proceed to violate the neutrality of the United States and take sides in the titanic struggle going on in Europe. All this is pure, unfounded assumption. It is laying down a premise erroneous and unwarranted, which, at the outset, of course, destroys the correctness of the conclusion.

The other side of the Chamber has indulged in some very vigorous attacks on the President because of his patience and forbearance respecting the situation close by. What reason have they for supposing that he would go hunting for trouble elsewhere? He has brought down reproaches from some of those opposing this bill for his excessive love of peace and his determination to avoid strife in a quarter where effort was required to escape it. Why should he take affirmative action and invite a quarrel where no limit to its disastrous consequences could be imagined? No; the President has exhibited a real, absolute demonstration of his devotion to the cause of peace and his determination to secure it and preserve it at any cost of national dishonor.

Those composing his official family, beginning with his great-souled Secretary of State, approve and encourage the course he has marked out and laid down in his world message at Mobile and on other occasions; and it is to be hoped that no one in this country or abroad will be misled by the expressions of apprehension by the Senator from Massachusetts [Mr. LODGE], followed by the Senator from New York [Mr. ROOT], who was so conclusively answered in the great address this morning by the Senator from Montana [Mr. WALSH].

Here again an able legal argument, in the case of the Senator from New York, on a supposed and not a real case, was made; here again it was assumed that the purpose is and the action would be to purchase ships of belligerent nations in such sort as would put the United States in the attitude of "taking sides" in the Old World conflict. The sentiments of the Senator from New York respecting the importance of preserving a strict and sincere neutrality we all share; with his views re-

specting the significance of being careful we are all in full sympathy. There was no occasion to laboriously argue what is undisputed. There was a mistake in laying down by assumption, even by implication, the premise which did not and could not exist in fact.

I can conceive of no better and safer hands to which to intrust the tranquillity and the highest interests and happiness of the people of this country than those now holding them.

There is no need to purchase a single ship the purchase of which would be disapproved by a single belligerent nation as inconsistent with absolute neutrality; and yet the ships can be acquired and provided under this bill that will release our commerce and relieve our producers and shippers of a distressing and unendurable situation. To argue otherwise is only to awaken a prejudice against the bill, to direct attention from the real issue, to set up a bogy man in order to have something to bowl over.

The dismal forebodings of both Senators, proclaiming the terrible happenings they foresee, recall similar utterances against the banking and currency bill, the antitrust bill, and about every other bill that has been brought forward by the majority during this administration. The country has not gone to the bad, as they predicted it would when the Federal reserve act was passed. Let us see, for instance, what the Senator from New York said about that; and in connection with his observations that there are regretful indications that this measure is attempted to be made a party measure, the senior Senator from New York—and I am commenting on his speech of a few days ago—said on December 13, 1913, on the banking and currency bill:

> I regret that the circumstances under which the measure comes before the Senate are not more favorable to real discussion.

That is the general complaint; and yet when we discuss the bill, after they complain that the Democrats are not giving reason for this legislation and are not discussing the bill, and I attempt to respond to that demand mainly to gratify their insistence, I look on the other side and see that there are but three Republican Senators there, and one who is temporarily seated on this side, who does me the honor to listen to me, my good friend from Michigan [Mr. SMITH], and who I am glad to see at the present time is in very excellent company.

Mr. SMITH of Michigan. Mr. President, if the Senator from Florida will permit me——

The PRESIDING OFFICER (Mr. WALSH in the chair). Does the Senator from Florida yield to the Senator from Michigan?

Mr. FLETCHER. Certainly.

Mr. SMITH of Michigan. I want to commend his patient and thoughtful and rather heroic effort to enlighten the other side of the Chamber. I am sure the Members on the other side did not expect to have this privilege; that if they had known that the author of this bill was to present his reasons for its immediate enactment into law they would have been here in great numbers. What they lose I feel very sure is the gain of those who have had the pleasure of hearing the Senator thus far.

The PRESIDING OFFICER. Is the Chair to understand that that is the suggestion of the absence of a quorum?

Mr. SMITH of Michigan. No; I did not make the point, because that might be termed in the nature of a filibuster; and in that kind of a proceeding I have never engaged.

Mr. FLETCHER. I am not at all surprised, Mr. President. I realize perfectly well that criticsim has been urged more for other reasons than because they really desired any discussion. I do not presume to be able to enlighten my friends on the other side on this or any other subject; but I am trying to discharge the responsibilities that I feel rest on me, partly by reason of their criticism and partly by reason of the impression they have put out over the country that the proponents of this bill are not willing or in position to discuss it.

Mr. POMERENE. Mr. President, if I may be permitted to make the observation, I am quite sure the Senator from Florida could enlighten them if they desired enlightenment on the subject.

Mr. SMITH of Michigan. Mr. President, that this may not seem to be a purely family party, I think I have listened with profit to the Senator from Florida, and I think the entire discussion of to-day has been most creditable to the Senate and to the country. It will be many days before the Senate will have the privilege of listening to a more elaborate and painstaking address than we listened to this morning from the honorable Senator from Montana [Mr. WALSH], who now occupies the chair; and to have cut off such a discussion by a peremptory demand that we should go to a vote without that kind of information would have been little short of parliamentary recklessness. I am sure we ought to have time to hear discussion such as the Senator from Florida is now conducting, and we ought to have time to read these elaborate discussions before we are forced to commit the country to almost an irrevocable error, if it should turn out to be an error.

Mr. SIMMONS. Mr. President, I should like to ask the amiable Senator from Michigan how it is possible for his party to listen to this discussion when they are in the cloakroom or in the restaurant?

Mr. SMITH of Michigan. Why, I do not exactly know where my party is at the present time. [Laughter.]

Mr. POMERENE. Mr. President, has not that been the difficulty with the Senator's party for many years? [Laughter.]

Mr. SMITH of Michigan. Oh, no. The trouble with our party is that we have not known where our opponents were. Most of the time we have been obliged to pursue them in the thicket and the darkness and the fog of their political convictions. We do not always have the pleasure of seeing them arrayed as they are this afternoon, with smiles and good cheer and hopefulness.

Mr. POMERENE. Mr. President, if the Senator and his Republican colleagues would do us the honor to listen to this discussion, they would have no trouble in finding out where we were.

Mr. SMITH of Michigan. No, Mr. President; that is very true. I do not question the whereabouts of the honored Senator from Ohio. I know that he is wherever the President of the United States places him, most of the time.

Mr. POMERENE. Mr. President, while I am under his leadership I am quite sure I will not be led astray. It is to be regretted that the distinguished Senator from Michigan does not see fit to align himself under the same leadership. If so, he would not have been traveling in darkness so long as he has been.

Mr. SMITH of Michigan. Mr. President, I do not want to prolong this friendly discussion, but perhaps I ought to withdraw the remark that I made concerning the Senator from Ohio. When I made the remark I had just been reading the veto message of the President on the immigration bill, and I supposed, of course, the Senator from Ohio would follow his wise leadership in that as in all other matters.

Mr. FLETCHER. Mr. President, the party of the Senator from Michigan seems to be somewhat in the chronic position of being split up. He is in the Senate and the others are out in the cloakroom. I want to say further that I ought to correct the Senator's statement in alluding to me as the author of the bill. I do not claim that distinction. I am simply acting chairman of the committee that has reported it, and I am doing all I can to support the bill and to explain its main features, and I am heartily in favor of the bill.

I will proceed with my reading from the speech of the Senator from New York [Mr. ROOT] on the 13th of December, 1913. He said:

> I am not one of those who denounce caucuses and attempts to secure united party action. Under my own conception of a government by political parties, membership in a party involves certain obligations to attempt agreement upon that united party action which is necessary to discharge party responsibilities. I do not think that the declaration of affiliation with a political party should be regarded as merely a means of obtaining office, to be forgotten after office is obtained. I think that when by declaring himself a member of a political party a man has secured an election to office by his fellow citizens, he has assumed toward them an obligation to seek to do his part toward discharging the responsibility of his party in putting into effect the policies which it declares.

So that I can quote the Senator in support of any action which the Democrats have taken in reference to this bill.

Then as to these forebodings which find expression now and then with reference to measures which our friends on the other side oppose, there are several illustrations in the same address. He said:

> So, sir, I can see in this bill itself, in the discharge of our duty, no influence interposed by us against the occurrence of one of those periods of false and delusive prosperity which inevitably ends in ruin and suffering.

Numerous expressions of that kind appear in this speech, signifying that if the Federal reserve act should pass, in his judgment the whole country would suffer, and credits would be put upon a basis which was unsound and unwise and destructive. In the same speech he makes this allusion:

> Then as our merchant marine has practically disappeared, we pay the freight and the insurance—certainly practically all the freight one way—on the goods exported or goods imported, however the custom of the particular trade may be, and that freight is paid to the foreign steamship owners.

He was speaking with reference to the amount of money which goes out of this country. He says:

> So, sir, if we enter upon this career of inflation we shall do it in the face of clearly discernible danger—danger, which, if realized, will result in dreadful catastrophe.

And at the close of his speech he said:

Ah, Mr. President, we are turning our faces away from the fundamental principle upon which we have come to our high estate. We are turning them weakly toward practices which history shows have invariably led to decadence, to degradation, and the downfall of nations. We are setting our steps now in the pathway which through the protection of a paternal government brought the mighty power of Rome to its fall; and we are doing it here without a mandate from the people of the United States. Ah, more than that, we are doing it in violation of the express verdict of the people of the United States.

Mr. SIMMONS. That was with reference to what bill?

Mr. FLETCHER. The banking and currency bill, then pending in the Senate, which since has been written into law, and which I believe now meets the commendation and approval of the very people who were then opposed to it as well as of all other people generally.

So it is no new thing to hear these doleful predictions from our friends on the other side respecting practically every bill that is presented from this side for consideration. Similar predictions were made by the Senator and his colleagues respecting that and other measures which not only have not proven sound, but, in the course of events, experience has shown the futility and inaccuracy of such prophecies. The country ought to be somewhat steeled against that sort of thing by this time.

The argument advanced that no emergency exists is completely answered by the response of the Secretary of the Treasury and the Secretary of Commerce to the resolutions of the Senate requesting them to furnish all available information in relation to the increased rates for ocean transportation which have taken place since July 1, 1914, and any and all other facts relating to ocean transportation which adversely affect or injure commerce.

I shall not take the time to read from the communication giving us the information desired and appearing as Senate Document 673, parts 1 and 2. The facts set forth completely overthrow the contention that no emergency exists; that rates are not exorbitant, in many instances even prohibitive; that tonnage is ample and only cargoes are lacking, as claimed by opponents of this bill. Our commerce is obstructed and in many instances has ceased to flow, this being caused both by lack of tonnage and exorbitant freight charges. The proof is there furnished in conclusive fashion.

Referring to that report for just one or two statements, reading from page 15 of part 2 of Document 673, the statement is there made:

While this report is being written—

And this report was presented on yesterday, so it is up to date—

information is received that rates are higher than those given in some of the tables herein presented, and that even at these extraordinary figures it is difficult to obtain cargo space for earlier sailings than March and April.

From the foregoing tables it will be observed that ocean freight rates on grain from New York to Rotterdam have been increased since the outbreak of the war 900 per cent; on flour 500 per cent; on cotton 700 per cent.

From New York to Liverpool the rates on the same commodities have increased from 300 to 500 per cent.

From Baltimore to European ports (excepting German) rates have been increased on grain 900 per cent; on flour 364 per cent; on cotton 614 per cent.

From Norfolk to Liverpool rates on grain have been increased from 157 to 200 per cent; on cotton 186 per cent.

From Norfolk to Rotterdam the rates on cotton have been increased 471 per cent; to Bremen the rates have increased on cotton 1,100 per cent, namely, from $1.25 per bale to $15 per bale.

From Savannah to Liverpool the rates have been increased on cotton 250 per cent; to Bremen the rates have been increased on cotton 900 per cent.

From Galveston to Liverpool the rates have been increased on grain 174 per cent; on cotton 361 per cent; to Bremen the rates have been increased on cotton 1,061 to 1,150 per cent.

And so on. The report deals further with the burden upon American business and with the effect of high ocean freight rates on the American farmer, which I shall be glad to have inserted in my remarks without reading, Mr. President—just those extracts.

Mr. JONES. Mr. President, I object to the insertion without reading.

The PRESIDING OFFICER. Objection is made.

Mr. FLETCHER (reading)—

Ocean freight rates are still rising and are limited only by the greed of the steamship owners on the one hand and by what the traffic can stand on the other.

The Government has no power to control or regulate ocean freight rates; it can not, under existing law, protect our foreign trade against these extortionate and hurtful charges. The steamship owners can increase rates without notice and upon the instant, and our business men are helpless. The steamship companies are their own masters and do as they please with the transportation of our exports. As already shown, they are seriously checking our foreign trade, and in some cases, such as lumber and coal, are stopping it altogether.

(See letters of William Haas & Sons, Exhibit 43; Gano, Moore & Co., of Philadelphia, Exhibit 5; American Tripoli Co. (flour), Seneca, Mo., Exhibit 45.)

SCARCITY OF TONNAGE.

The scarcity of steamship tonnage is notoriously true. Every daily paper which publishes shipping news testifies to this incontrovertible fact. Attention is called to attached clipping from the New York Journal of Commerce of January 2, 1915, and the Wall Street Journal of January 1, 1915 (Exhibits 78 and 79), which show clearly the scarcity of tonnage.

But the conclusive evidence of the shortage of tonnage is the excessive and unparalleled ocean freight rates now prevailing. Such rates could not be maintained if tonnage was abundant.

BURDEN UPON AMERICAN BUSINESS.

Annexed hereto as Exhibit 1 is a summary of our sea trade and the estimated freight cost of handling it from July to December, 1914, inclusive, prepared by the actuary of the Treasury Department.

From this it appears that our total exports by sea for July, 1914 (before the war), were $139,225,479, and the ocean freight cost was $7,833,482, or 5.63 per cent; the total of such exports for December, 1914, were $226,000,000 (estimated), and the ocean freight cost was $30,742,500, or 13.6 per cent—an increase over July of 141 per cent.

If the ocean freight cost on December exports had been at the same rate as July, viz, 5.63 per cent, the total freight charge on our exports for December would have been $12,723,800 instead of $30,742,500. In other words, the increased ocean freight tax arbitrarily imposed upon our farmers and business men for the month of December, 1914, only, was $18,018,700. If exports by sea continue for the 12 months of 1915 at the December, 1914, rate and the ocean freight charges are the same as for December, 1914, the American farmers and business men will pay to shipowners (principally foreign) increased freight charges above the normal rate of $216,224,400, or more than five times the $40,000,000 which the Government proposes by the shipping bill to put into American ships for the protection of our foreign commerce.

In two months and seven days the increased ocean freight charges (above the normal rates prevailing in July, 1914) exacted on our foreign trade at the December, 1914, rate would amount to $40,241,761, or more than the total amount, viz, $40,000,000, which the shipping bill authorizes for investment in an American merchant marine.

In 12 months, as before stated, the total increase in the freight tax levied by steamship owners, mostly foreign, upon our export trade, at the December, 1914, rate would amount to the sum of $216,224,400. If the same be applied to our import trade, there would be an additional increase of $95,640,000, or a total increased ocean freight charge on exports and imports by sea in one year of $311,864,400, or 141.6 per cent over the usual cost. (See Exhibit 2.)

Thus far we have been dealing only with the increased ocean freight charges over and above the normal rates prevailing in July, 1914. Including these normal rates, and assuming that the December, 1914, total ocean freight charges, viz, $44,342,500, represent an average for each month of 1915, the total ocean freight charges on American import and export trade by sea for the year 1915 would amount to the enormous total of $532,110,000. (See Exhibit 1.) Almost the whole of this huge sum would be paid to foreign steamship owners and would have an important bearing upon our foreign trade balances; it might, in fact, turn these balances against us.

EFFECT OF HIGH OCEAN FREIGHT RATES ON AMERICAN FARMER.

It will be observed that the greatest increases in rates and the heaviest tax has been imposed upon the products in which the American farmer is most concerned, namely, grain and cotton. These commodities constitute the great bulk of our export trade and have the largest influence in throwing the balance of foreign trade in favor of this country.

While the steamship companies have imposed conscienceless taxes in the form of increased rates on grain, amounting, as already shown, to as much as 900 per cent to some ports, they have placed an even heavier burden upon cotton, where the increase in rates to some ports is as high as 1,100 per cent. This increase is particularly onerous upon the cotton producers of the South, because it comes at a time when the effects of the war have greatly reduced the value of cotton and when the southern farmers are least able to bear additional burdens.

Grain, cotton, and other commodities are usually sold "delivered" at the port of destination. When steamship companies raise the cost of delivery of grain from 6 cents to 60 cents per bushel, it makes a vast difference in the price the farmer receives for his product; and when ocean freight charges on cotton are raised from $1.25 to $15 per bale, the price at which the farmer sells his cotton is seriously reduced.

To show what the burden imposed on the farmers by these high ocean freight rates means, it is necessary only to bring out the fact that while the total freight cost on our exports by sea for December, 1914, was $30,742,500 the great commodities of grain, cotton, and flour bore $11,782,250 for this charge—or more than 36 per cent of the entire freight cost on all exports by sea for December, 1914.

The argument, as I understood it, of the Senator from Illinois [Mr. SHERMAN] to-day was that this freight did not affect the price which the farmer got for his grain; that the freight was paid by the purchaser. Mr. President, these commodities are sold and delivered abroad, and whereas the farmer is getting a tremendous price, according to the usual standard, for his grain in this country to-day, he would be getting more than he is receiving now if this enormous charge for freight was not made against the shipment. It is true the price of grain is high and he is getting a good price for it, but that is no reason why he should not get a better price if the conditions can be remedied, as they should be remedied, by making them such that he will not be made to pay 50 cents a bushel to carry his grain across the ocean when he paid something like one-fourth or one-fifth that at former times. So it is with the other products—the cost of transportation does affect the price which the producer gets for his product necessarily, and affects it very materially and seriously so far as he is concerned.

Mr. SIMMONS. That is why we have been trying to reduce railroad freight rates.

Mr. FLETCHER. Precisely.

Mr. SUTHERLAND. Will the Senator permit me to ask him a question?

Mr. FLETCHER. Certainly.

Mr. SUTHERLAND. I suppose, of course, the Senator thinks that the passage of this bill will reduce ocean freight rates?

Mr. FLETCHER. I certainly do.

Mr. SUTHERLAND. First, I will say that I understand under the bill $40,000,000 is to be utilized. Am I correct in that?

Mr. FLETCHER. The bill provides for $10,000,000 capital and $30,000,000 issue of bonds. So the whole together—the capital and the bond issue—would amount to $40,000,000.

Mr. SUTHERLAND. Can the Senator tell us how much tonnage that amount of money will purchase?

Mr. FLETCHER. My information is that it would furnish 100 ships.

Mr. SUTHERLAND. Of what capacity?

Mr. FLETCHER. Not all of them, of course, are very large ships, but ships suitable for doing the business; I should think something, perhaps, like a million tons. I was going to say 800,000 tons, but about a million tons, I will say.

Mr. SUTHERLAND. I think some testimony given before the House committee was to the effect that it would cost about $600,000 to build a freight ship of 8,000 tons capacity. Does the Senator agree with that estimate?

Mr. FLETCHER. That is only an estimate, and according to my information is high.

Mr. SUTHERLAND. I will remind the Senator that the only testimony upon that subject which was given before the House committee is that of a member of the committee, as I recall, and it was to the effect that it would cost a million or a million and a half dollars to build a passenger vessel of from eight thousand to ten thousand capacity, and it would cost about $600,000 to build a freighter of like capacity.

Mr. SIMMONS. In this country?

Mr. SUTHERLAND. In this country.

Mr. SIMMONS. And something near half of that in Europe, I think, was the testimony, or more than that.

Mr. FLETCHER. The Senator from Massachusetts [Mr. WEEKS] estimated that $50 a ton would build these passenger ships.

Mr. CLARK of Wyoming. No; not passenger ships.

Mr. SIMMONS. Freight ships.

Mr. FLETCHER. For ships furnishing 800,000 tons he estimated $50 a ton as the cost of construction.

Mr. SUTHERLAND. It would take, I think, possibly twice as much to build a passenger vessel of a given capacity as it would to build a freighter of the same capacity. If that estimate is correct, as I compute it, that would provide for about half a million tonnage instead of 800,000 or a million tons, as the Senator has stated.

Mr. FLETCHER. Fifty dollars a ton would give 800,000 tons for $40,000,000.

Mr. SUTHERLAND. That is correct, at $50 a ton.

Mr. SIMMONS. It is my understanding that the Senator from New Hampshire [Mr. GALLINGER] yesterday estimated that the cost of building freight vessels would be about $50 a ton. That is what I understood.

Mr. SUTHERLAND. Supposing that that will supply 800,000 tons, does the Senator from Florida recognize that some of those ships at any rate would be those which are already engaged in the ocean carrying traffic? The Senator does not think that the entire $40,000,000 would be spent to buy ships that are now idle?

Mr. FLETCHER. I should not think so. Not necessarily so. Some, of course, would be built; but in addition to all that, in addition to what may be acquired by the use of the capital provided for in this bill, the bill also provides for the transfer of the present auxiliaries in the Navy, those transports which are not needed for the Army, and also for the transfer of the ships of the Panama Railroad Co., so that by the charter and lease of Government ships we have now, you have quite a considerable fleet to begin with.

Mr. SUTHERLAND. The ships of the Panama Railroad are now engaged in the ocean carrying business, are they not?

Mr. FLETCHER. Yes.

Mr. SUTHERLAND. So they would not be in addition.

Mr. FLETCHER. That is true.

Mr. SUTHERLAND. The Senator does not think that we could build ships in time to meet the emergency which is supposed to exist? We would have to buy them in order to meet any emergency that exists, would we not?

Mr. FLETCHER. We would have to buy some, I think, but as I said awhile ago when the Senator was out, my information is that you can build in our yards a 5,000-ton ship in seven months.

Mr. SUTHERLAND. Seven months is a long time. The emergency may have entirely passed by that time. At any rate seven months is a long time to wait for reduced freight rates.

The ultimate question I wanted to put to the Senator, however, is this: Assuming that we can add to the ocean carrying trade half of this tonnage—I mean by that that half of the ships that are procured by the use of this money will be ships that are now idle—so as to add to the ocean carrying traffic some 400,000 tons capacity, does the Senator think that, compared with the entire tonnage that is engaged in the carrying trade, putting that quantity of tonnage upon the ocean would materially reduce rates?

Mr. FLETCHER. I have no question but that the moment this bill passes you will see a tumble in rates. I think there is not only not enough tonnage now, but there is manipulation of ships to help keep up these rates.

Mr. SUTHERLAND. Is not 400,000 tons, while large in itself, very small as compared with the total tonnage? The total tonnage of the world, I understand, is something like 47,000,000 tons.

Mr. FLETCHER. I know that we do not need the total tonnage of the world for our foreign commerce. I do not know what the total tonnage is—that is not controlling.

Mr. SUTHERLAND. It certainly would not represent anything like one-tenth of the tonnage now in use in the carrying trade of the United States. The question which occurred to me was whether or not the addition of that would have any material effect upon freight rates. In other words, would it not be a good deal like the United States undertaking to run a freight train from New York to San Francisco once every month at a very cheap rate? That compared with the total business would be so small that it probably would not affect the railroad rates.

Mr. FLETCHER. I do not think that comparison applies here, and I do not think there is any question but what the effect here would be to reduce the rates and afford additional facilities. The very strongest argument in support of that view is the fact that the shipping interests are opposing this bill to-day. If executing the provisions of this bill would cut no figure in commerce, if it made no difference as to their rates, if it did not affect their business in any way whatever, if they were enabled to go on with the monopoly they have and with the combinations they have and with the levy of tribute upon the producers of this country that they are now making, they would say go ahead and pass your bill; but they are not saying that.

Mr. SUTHERLAND. If the Senator will permit me, I think the passage of this bill will be injurious to American shipping interests.

Mr. FLETCHER. How could it be injurious if it does not affect the rates or anything else they are interested in?

Mr. SUTHERLAND. It would discourage them from going into or continuing the business.

Mr. FLETCHER. We have been trying for 50 years to induce them. They not only will not go into it, but they refused to go into the merchant-marine business under the American flag.

Mr. SUTHERLAND. I am not aware of any legislation which has passed Congress during that 50 years that has a tendency to induce American capital to invest in the shipping business.

Mr. FLETCHER. We passed an act some time ago that permitted them to get their ships wherever they could, in the cheapest markets of the world, and put them under our flag, but that brought none of them under our flag, and again the act approved August 18, 1914, and still none came except those that were practically engaged in their own business, some 372,488 tons.

Mr. SUTHERLAND. The Senator refers to the bill which was passed a few months ago?

Mr. FLETCHER. I refer to the Panama Canal act, approved August 24, 1912, admitting foreign-built ships to American register for foreign commerce, and the act of August 18 on the same subject.

Mr. SUTHERLAND. Immediately after the passage of that last-mentioned act the bill in question was introduced. I recall that it was introduced in the House in August, about the time we were passing the last legislation to which the Senator refers. While the act which we have already passed operated as an inducement to American capital to engage in the shipping business, the bill which we are now considering and which has been pending has been hanging over the heads of the American shipping industry for several months, and it has had exactly

the opposite tendency. It has neutralized the effect of the legislation we passed a few months ago.

Mr. FLETCHER. We passed other legislation to encourage shipping; for instance, legislation admitting free of duty all material entering into the construction of ships; we passed legislation putting on the free list material for ships and supplies, and the construction of that law went so far as to admit free of duty the furniture and the bedding and the linen and everything on board a ship. They came in free of duty as a special favor to encourage shipbuilding in this country; and then we passed a law also making a differential in the tariff act in favor of imports in American bottoms.

Mr. SUTHERLAND. I have not any doubt that if the Senator's party had been content to have left that legislation without the interference which arises from this proposed legislation it would have operated as a stimulus to American shipping. But the point I make is that the threat of this legislation which has been impending for months has had a tendency to neutralize the good effect of preceding legislation.

Mr. FLETCHER. My position is that the Senator is inconsistent. He is assuming that we will accomplish nothing by this legislation, because these few ships would not cut any figure in commerce, and then in the next breath he says we are discouraging people from investing their money in vessels. So one answers the other. Either this will amount to something or else there is no reason for anybody to be discouraged about it.

Mr. CLARK of Wyoming. Mr. President——

Mr. FLETCHER. I yield to the Senator.

Mr. CLARK of Wyoming. I want to ask the Senator a question on the subject he was touching upon at the time he was interrupted by the Senator from Utah, to wit, the subject of these high rates being oppressive upon the producer in this country. The Senator hazarded his opinion that while the American farmer is now getting a dollar and a half for his wheat, according to to-day's market, he would be getting much more if it were not for these high freight rates. In other words, if the freight rates were at a point where the Senator thinks they should be and will be made by this bill, as he thinks, the farmer will get more than a dollar and a half a bushel for his wheat. I ask the Senator if he thinks that is altogether a desirable thing?

I have listened to debates here. I know nothing much about farming myself; I think I am the only one perhaps in the Senate who does not boast of having been a farmer at some time. I know very little about it, but I have heard from the Senator from North Dakota, and others say, that a dollar is a fair price for wheat and that when wheat went below a dollar the farmer was not getting a due return for his effort.

It seems that when wheat goes to a dollar and a half and above that the farmer has no cause to complain, and if by the action of this bill or any other legislation we give a fictitious profit to the farmer, which is paid, of course, by the consumer in the city of Washington or elsewhere, we are proposing legislation that is not altogether—scattered over the whole country—for the public good.

Mr. FLETCHER. I think the Senator misunderstood me. I do not think the passage of this bill will increase the cost of wheat to the consumer, but it will have a good effect, so far as the farmer is concerned, in that instead of these unprecedented charges going to freight companies the benefit would go to the farmer. Doubtless, the consumer would likewise be advantaged.

Mr. CLARK of Wyoming. That is it exactly.

Mr. FLETCHER. And I do not believe now that the farmer——

Mr. CLARK of Wyoming. You add to the price that the farmer is now getting—a dollar and a half a bushel, which is an unheard-of price—whatever reduction in the freight rates this bill makes. If the rate is 25 cents a bushel, you would add 12½ cents of that, we will say, to a dollar and a half, making the people who do not raise any grain contribute that much to the farmer, who already is getting a very high profit on his product.

Mr. FLETCHER. The freight rate is a burden on the consumer and it is also an injury to the producer. The trouble about that business is now, I imagine, that the wheat has left the farmer's hands and is in the hands of other people, who very largely would get the benefit.

Mr. CLARK of Wyoming. This is wheat that the farmer still has and which he is selling to-day.

Mr. FLETCHER. As to that wheat, I expect it has very largely been sold to the elevators or their agents.

Mr. CLARK of Wyoming. But if the farmer has the wheat, that is what he gets for it?

Mr. FLETCHER. At any rate, there is no doubt but the farmer would get more than he now gets if the freight were less than it is.

Mr. CLARK of Wyoming. There is no question about that.

Mr. FLETCHER. And the consumer would perhaps pay less.

Mr. CLARK of Wyoming. There is no doubt about that; but the Senator urged as an argument in favor of the bill that the farmer would get more.

Mr. FLETCHER. Precisely.

Mr. OWEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Oklahoma?

Mr. FLETCHER. I do.

Mr. OWEN. I will suggest to the Senator from Florida that because the farmer is getting a good price during the European war, a thing which very rarely happens, there is no reason why the Shipping Trust should still pocket the profit.

Mr. FLETCHER. I do not think the farmer very often gets any more than he deserves. He is the one man in this country who works for everything he earns and gains.

Mr. CLARK of Wyoming. Well, Mr. President, I have listened to that a great many times around the Senate, and I want to give it as my opinion that the farmers of this country are the most truly independent and the best fixed of any class of our citizenship, and I am glad of it, because they work for it; but they are no more worthy of good times than is any other class of citizenship, and there is no reason on earth why we should pass legislation one of the avowed purposes of which, as the Senator from Florida says, is to increase the already fictitious prices at the expense of the man who has to eat his bread.

Mr. FLETCHER. I will refer to that a little later on; I do not want to be diverted now.

Mr. CLARK of Wyoming. I did not want to interrupt the Senator's remarks.

Mr. FLETCHER. I will take up that phase of the matter—the effect of freight rates on prices—a little later.

I quite agree with the Senator from Wyoming about the farmer's independence and the satisfactory conditions which he claims obtain in many respects; but I deny that, everything considered, the farmer is especially favored. He depends very largely on the seasons; either it rains too much or it does not rain at all; there are uncertainties as to all his plans; there are pests and there are foot-and-mouth diseases and a thousand and one other things with which he has to contend. He has to labor about 400 days out of the year, and he deserves all he gets out of life.

Mr. CLARK of Wyoming. I agree with the Senator.

Mr. CRAWFORD. Mr. President, will the Senator permit me to make a suggestion right there?

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from South Dakota?

Mr. FLETCHER. I do.

Mr. CRAWFORD. I do not think it is quite fair that the situation with reference to the farmer be left in just this way. The dollar and a half a bushel for wheat, so far as the Central Northwest is concerned, is not going to the farmer to any great extent. A great many of the farmers through the newer parts of the Middle West, indeed most of them, have mortgages for lands purchased and for improvements made, the interest on which must be paid as soon as the crop is harvested. They have expenditures for their hired men, their thrashing bills, and their interest. Unfortunately for them, the wheat bins on the farm were pretty well cleaned out long before this high price of wheat came. The people who have got the benefit of it, if an actual benefit has been received, are the elevator men, who have great quantities of it stored away, and the future-delivery men.

Mr. FLETCHER. Mr. President, that is what I surmised, and I made a similar statement a little while before the Senator from South Dakota came into the Chamber.

Mr. President, I must go on, because I am approaching some of the questions we have been discussing, and I may be able to throw further light on them in the orderly progress of the remarks I am making. I call attention especially to Exhibit 2 in this communication from the Secretaries of the Treasury and of Commerce:

Assuming that no state of war existed, and that the normal freight rates in force last July had remained in force in December last, and that the December freight cost, upon this basis, viz, $18,353,800, would have been the average for each month of 1914, the total ocean freight charges on American import and export trade for the year 1914 would have been $220,245,600, or $311,864,000 less than under existing conditions.

The table on page 23 of that report showing the increase in freight rates from the United States to Europe is as follows:

Increase in freight rates—Average for United States to Europe.

	Grain, per bushel.	Flour, per 100 pounds.	Cotton, per bale.	Meat, per 100 pounds.	Lard, per 100 pounds.
Estimated average:	*Cents.*	*Cents.*		*Cents.*	*Cents.*
July	5.6	11.5	$1.15	25	25
August	5.7	13.6	1.15	24.2	25
September	7.7	22.3	1.26	36	36
October	8.7	25	2.10	36.7	38.4
November	16.1	26	3.39	37	38.8
December	22.1	35	4.57	37	39.1
Increase, July to December, per cent	294	204	297	48	56

It is utterly absurd to say that these rates are only such as might be expected by reason of the conditions and that they are not exorbitant or excessive.

The burning questions are, first, Is there a remedy; and, second, if so, what is it? The opponents of the measure argue there is no remedy; they do not reach the second question. We answer both. We say there is a remedy and that this measure affords it

Now, what is the bill? It is so simple and plain that no time is required to explain it. Section 1 provides for the formation of a corporation of the District of Columbia for the purpose of carrying out the provisions of the bill under certain provisions set forth in the bill itself and others found in the general incorporation act of the District of Columbia. The objects of the corporation to be formed and its powers are set forth in this proposed act and in the general act referred to. The initial capital stock of such corporation shall be $10,000,000, of the par value of $100 per share. The shipping board shall form the corporation. The United States shall always hold 51 per cent of the capital stock unless all the stock shall be disposed of.

Section 2 provides that the United States shall subscribe for 51 per cent of the capital stock, which may be increased on the recommendation of the shipping board and with the approval of the President $10,000,000, the United States holding not less than 51 per cent of all the stock at all times.

Section 3 authorizes the United States, through the shipping board, to purchase or construct suitable vessels, and the Secretary of the Treasury may issue and sell Panama Canal bonds to the amount of not exceeding $30,000,000 for such purpose. The date of the maturity of all Panama Canal bonds may be fixed by the Secretary of the Treasury at any time after the date of the same he may deem advisable, instead of 50 years, as the law now provides. This provision is made for the reason that a better price may be had for bonds maturing in less time than 50 years. Time was when long-term bonds were more sought after and brought better prices than comparatively short-term bonds. To-day the demand for bonds maturing in less than 50 years is more active, and the Secretary will have the opportunity under this provision of taking advantage of the existing conditions in the public interest.

Section 4 authorizes the shipping board to transfer the vessels so purchased or constructed to a corporation formed as mentioned, and the corporation shall issue its gold 4 per cent bonds in payment therefor. Such vessels shall have the same status as vessels in private ownership duly registered under the laws of the United States. The existing rules and regulations relating to shipping, navigation, or water-borne commerce shall be suspended by a certain date, and the shipping board shall propose and adopt new rules and regulations applicable to the shipping and water-borne commerce of the United States.

Section 5 provides that all such vessels shall be registered as vessels of the United States, precisely as privately owned vessels, and shall engage only in foreign commerce, except that such vessels as are built in the United States shall be entitled to engage in the coastwise trade, in the same way as the law now permits vessels owned by private citizens to engage in that trade when built in the United States. But for this limitation of the restriction to foreign commerce, the vessels built by the United States in our own shipyards would be denied the privileges accorded to vessels owned by our citizens, and Congress would be not only indorsing but fostering and increasing the coastwise monopoly.

Section 6 establishes the shipping board, to be composed of the Secretary of the Treasury, the Secretary of Commerce, and three additional members to be appointed by the President and confirmed by the Senate, two of whom shall have practical experience in the management and operation of steamships in the foreign trade. The salaries of the three additional members are fixed at $6,000 per annum, respectively.

Section 7 provides that, with the approval of Congress, the shipping board shall sell the stock in said corporation owned by the United States.

Section 8 authorizes the President of the United States to charter, lease, and transfer such naval auxiliaries as are suitable for commercial use and not required for use in the Navy and such vessels belonging to the War Department suitable for commercial use not required for transports, and cause to be chartered, leased, or transferred the vessels of the Panama Railroad Co. All the vessels of the corporation shall be of a type, as far as practicable, suitable for use as naval auxiliaries.

Section 9 gives the President of the United States the authority to take possession for use as naval auxiliaries of any vessel owned or leased by the corporation upon terms fixed by the shipping board with the approval of the President, and in case of emergency such action may be taken by the President alone and without notice.

Section 10 requires the shipping board to make report of expenditures and receipts and of the operation of the corporation to Congress at the beginning of each regular session.

Section 11 makes an appropriation of $10,000,000 out of the Treasury, or in lieu thereof the Secretary of the Treasury may sell Panama Canal bonds to that amount, to carry out the purposes of this act.

Now, let us see about the 14 questions propounded by the Senator from Ohio [Mr. BURTON]. I am indebted to those who have had experience in managing and operating ships in foreign commerce for assistance and information on these points. I do not pretend to have extensive expert knowledge on this subject, though I have studied it to no little extent.

Mr. SUTHERLAND. Mr. President, before the Senator passes to the discussion of those items will he permit me to ask the purpose of one or two provisions of the bill?

Mr. FLETCHER. I do not want to occupy too much time, but I will yield to the Senator.

Mr. SUTHERLAND. If the Senator has any objection, of course I shall not insist upon asking the questions at this time.

Mr. FLETCHER. I have no objection.

Mr. SUTHERLAND. The first provision I want to ask the Senator about is that which permits the shipping board to make rules and regulations which may affect shipping, navigation, and the water-borne commerce of the United States. As I understand, those rules and regulations are now made by the Secretary of Commerce—formerly by the Secretary of the Treasury. Why is this power taken from an officer of the Government and put into the hands of the shipping board, which will itself be engaged in mercantile shipping?

Mr. FLETCHER. Well, in the first place, it is quite an undertaking to revise and reshape all the rules and regulations as they now exist, and it was thought that the shipping board, in view of its personnel, consisting of the Secretary of Commerce, the Secretary of the Treasury, and three persons appointed from outside the departments, two of whom must be experienced in the management and operation of ships engaged in foreign commerce, would be peculiarly qualified to reform these regulations, some of which are said to be rather old, to be not calculated to promote the good of commerce or of trade, and not making for efficiency or serving any other good purpose.

Mr. SUTHERLAND. But the three citizen members of the board, constituting a majority, would, of course, have control of the subject. The point I desire to suggest for the Senator's consideration is that the shipping board is really for the United States engaged in the transportation business, and I ask the Senator whether——

Mr. FLETCHER. I should not say that was quite the case. The shipping board votes the stock of the United States in the corporation, electing the officers, and the corporation will then conduct the business.

Mr. SUTHERLAND. Yes; but really it will be under the control of the shipping board. The shipping board holds a majority of the stock, and may, under the terms of this bill, remove all the trustees at any time, and apparently without notice, so that they have the virtual control of the business. Now, I ask the Senator whether or not he would think it would be wise, for example, to put into the hands of the Postmaster General—who is conducting the post-office operations of the Government and, among other things, engaged in managing the parcel post—the authority to regulate and fix rates for express companies with which he is directly competing? In other words, does the Senator from Florida think it is a wise provision to put into the hands of the members of this shipping board, who are vitally interested in the welfare of this corporate business and are competitors with the private shipping

interests, the power to make rules and regulations governing the private shipping interests as well as their own?

Mr. FLETCHER. I think the Senator is laboring under a wrong impression. The Postmaster General is not a member of the shipping board under the substitute which has been offered.

Mr. SUTHERLAND. No; I was giving that as an illustration. I was asking the Senator, as a parallel case, whether he thinks it would be wise to confer upon the Postmaster General, who is engaged in handling the parcel-post business for the country, and thereby in that way competing with the express companies, the power to regulate the express companies and fix their rates?

Mr. FLETCHER. I scarcely think that is a parallel case, Mr. President, to begin with; and I can see really no objection to this shipping board reforming the present rules and regulations respecting navigation. As the Senator has said, that power rests now with the Secretary of Commerce, and he is on this board; and the Secretary of the Treasury is also a member; and the three experienced men selected from the outside will be appointed by the President and confirmed by the Senate. I do not see but what that board would be a very excellent body to revise and reform the navigation rules and regulations.

Mr. SUTHERLAND. There is just one other question I want to ask the Senator and then I will desist. I wish to invite his attention to the provision of the proposed substitute on page 3, which reads as follows:

> Said corporation and its capital stock shall, so long as the United States owns a majority of said stock, be free from all public taxes.

Just what does the Senator understand that to include?

Mr. FLETCHER. I understand that means that the corporation and its capital stock is to be exempt from all public taxes. As to the corporation, it means any corporation tax. It means, for instance, that the property of the corporation shall not pay a tax. If it shall acquire terminals anywhere, I think those terminals will not be taxable. This is my individual view; others may possibly hold that the ships are taxable wherever they may be registered. If one is registered from New York, and, under the laws of New York, such a ship pays a tax, that ship would be taxed according to the local law.

Mr. SUTHERLAND. That was exactly what I had in my mind in propounding the inquiry. The language is:

> Said corporation shall * * * be free from all public taxes.

If this corporation acquires terminal facilities in New York, for example, and those terminal facilities are taxed by the State of New York, then the corporation is not free from tax, is it? Your provision is not that no franchise tax shall be assessed but that the corporation shall be free from taxation of all kinds, which is the equivalent of saying, as I understand the English language, that no taxes shall be assessed against the corporation for anything.

Mr. FLETCHER. It is my understanding that the property to which this corporation may have title will be exempt from taxation. This corporation is to be organized in the District of Columbia. There are certain taxes levied against corporations as such, and there may be income taxes or other taxes that may apply to the corporation itself as distinct from the property it might have in different parts of the country or in other places.

Mr. SUTHERLAND. Let me suggest to the Senator from Florida—and I am making the suggestion in absolute good faith—that, as I understand, under general law no franchise tax could be levied, in the State of New York or any other State, against a corporation which was organized under the laws of the District of Columbia. I think that has been held by the Supreme Court of the United States in more than one case—that the franchise of a corporation organized under the laws of one State can not be taxed in another State; but it has been held that its property may be taxed in any State where it is situated. Now, when the Senator, not relying upon that general principle of law which requires no declaration of the statute to carry it into operation, puts affirmative language into the bill, saying that this corporation shall be free from all public taxes, is not the fair construction of it that it means something more than an exemption such as the corporation would already have under general law?

Mr. FLETCHER. I think so. I think that in effect it is not the same thing. My own view would be that it is somewhat like a provision with reference to national banks. The corporation is exempt from tax; but the bank's real estate which it may own in some city, wherever it is located and doing business, is not exempt simply because the bank as a corporation is exempt from taxation.

Mr. SUTHERLAND. That is true, but there is no statute which attempts to exempt a banking corporation from the payment of taxes upon its real estate.

Mr. FLETCHER. It is a corporation organized under the laws of the United States.

Mr. SUTHERLAND. The criticism I make of this provision is that apparently it does attempt to exempt the corporation from the payment of all taxes of every description. However that may be, I ask the Senator with reference to the provision for capital stock. The provision is that the capital stock of the corporation shall be free from all public taxes. Now, apparently that would cover this sort of a case:

Fifty-one per cent of this stock is to be subscribed by the Government of the United States. Forty-nine per cent of it may conceivably be subscribed by a citizen of the State of New York. The stock is his personal property, held in the State of New York. Does the Senator mean by that provision to withdraw that $4,900,000 worth of capital stock, held by a citizen of New York, from taxation in the State of New York by the State of New York?

Mr. FLETCHER. The Senator means where the stock is held by private individuals, living in some State, where under the laws of that State any stock of theirs would be taxable?

Mr. SUTHERLAND. Yes.

Mr. FLETCHER. I had not considered that question from that standpoint, but I think it would be exempt from taxation. I think that is the effect of this provision.

Mr. SUTHERLAND. Does the Senator intend, by this provision in his bill, to exempt those shares of stock held by the private citizen in a State from taxation by that State?

Mr. FLETCHER. I think so; from all taxation.

Mr. SUTHERLAND. That is, to permit him to take funds that would be taxable in the State, if held there, and invest them in the capital stock of this corporation engaged in a private business, and then escape all taxation in the State?

Mr. FLETCHER. It is my idea to exempt the capital stock from taxation entirely.

Mr. SUTHERLAND. If the Senator means by that that such stock is exempt from taxation by general law, I beg to differ with him. I think such shares of stock are taxable in the States now.

Mr. FLETCHER. That is the language of the bill. They are exempt under this bill.

Mr. SUTHERLAND. But, I say, under general law, in the absence of this provision, I have no doubt that those shares would be taxable.

Mr. FLETCHER. Yes; I do not question that.

Mr. SUTHERLAND. The Senator attempts to change the general rule of law by this bill, and to make nontaxable what is now taxable or what but for this provision would be taxable.

Mr. CLARK of Wyoming. Mr. President, will the Senator yield to me to make an inquiry?

Mr. FLETCHER. I can not take up too much time. If the Senator will ask a question, I shall be very glad to answer it.

Mr. CLARK of Wyoming. It is only a question upon the particular part of the bill to which the Senator's attention has just been directed.

Mr. FLETCHER. I do not want to weary my colleagues by extending my remarks too greatly.

Mr. CLARK of Wyoming. I want to ask the Senator what he believes to be the effect of lines 4, 5, and 6, on page 3, where the bill says:

> Said corporation may sue and be sued in any district court of the United States, and may remove to said courts any cause brought against it in any other court.

I desire to ask the Senator whether that does not prohibit a citizen of the United States who has a claim, whether for $20 or for supplies furnished to this corporation or to its ships in the transaction of its business, from suing in the local courts, and compel him, at the option of the corporation itself, to proceed with his suit in the United States courts?

Mr. FLETCHER. I think it does. He can bring the suit in the local court, and then it can be removed by this corporation to the United States district court.

Mr. CLARK of Wyoming. Does the Senator believe that it is a wise provision of law to take one private corporation and give it legal advantages before the courts of the country which no other private corporation enjoys?

Mr. FLETCHER. I think under the circumstances, with a corporation such as this formed here and doing a business like this, it is perfectly proper and advisable to provide that that corporation should be sued in the district court of the United States.

Mr. CLARK of Wyoming. I shall want to be heard on that point a little later. I will not take the time of the Senator now.

Mr. FLETCHER. That is my view on that point. I think that is a very excellent provision.

FOURTEEN QUESTIONS ANSWERED.

Now I shall proceed to deal with the 14 questions propounded by the Senator from Ohio [Mr. BURTON], beginning at page 1863 of the CONGRESSIONAL RECORD. I shall not repeat the questions.

No. 1. Speaking for myself, Mr. President, I should say that the Government line should be conducted very much on the same policy that would guide any well-managed steamship company. The routes and sailing ports should be determined upon and altered as the vicissitudes of trade make necessary after a careful study of the situation by the officers and directors of the Government line and approved by the shipping board.

"The world is my field" is the motto of a certain large steamship line—the Hamburg-American Line—and it may well be the motto of the Government line in connection with the development of the commerce of the United States.

No. 2. The prime consideration that should determine the selection of routes and sailing ports should be the best interests of American commerce.

No. 3. This question presupposes that there will be such a large offering of freight for shipment that it will be difficult to take care of all the business. That being so, the need for quickly passing this bill is very manifest. The Government line should handle this condition by distributing its facilities as equitably as possible, always remembering that the shipping board will insure a fair deal to all; at any rate, aggrieved shippers will have opportunity for more effective redress than they now have against private-owned steamship companies. I submit a clipping from the New York Tribune of January 19, bearing particularly on this point:

SHIPS EARNING VALUE IN YEAR—HIGH FREIGHT RATES YIELDING GREAT PROFITS TO OWNERS OF STEAMSHIP LINES.

At the present freight returns for all commodities being shipped from American ports steamship interests are reported to be making large enough profits to pay back the cost of their ships within a year. A man connected with the export department of one of the large oil companies finds that it is almost impossible to get freight room for oil exports to South America because most of the lines formerly going from North American points to the southern continent have been diverted to European trade or are interned. On inquiry it was stated to him that ships used in European trade "pay for themselves within a year at the present average freight rates."

An exporter found the average freight rates from ports in the United States to various European points were more than $20 a ton at the present time, while for the same lines and the same articles the normal average before the war started was $3.20 to $3.40 a ton.

One textile manufacturer who exports largely to continental points had a contract rate with one line. Large amounts of goods were to have been shipped by this line several months ago and were delivered to the agents. After several weeks the shipper found them still on the dock, and discovered also that all other contract goods had been left there, while the ships had been crowded with goods paying the ruling freight rates. The shipper went to the representatives of the Government under which the line was registered. His complaint was taken up after considerable delay, and the line finally was ordered by its Government to take his goods.

No. 4. This question has been covered in the answer to question No. 1.

No. 5. The Government line, like every well-managed steamship line, should take care of the business immediately offering before undertaking to develop new business. New trade should be developed in the usual way; by maintaining regular sailings as often as may be warranted, and making rates as low as foreign competition makes necessary.

For instance, if, as recently testified to at the Committee on the Merchant Marine of the House, it costs 50 cents to ship a box of oranges from New York to Liverpool, a voyage of about 8 days, and the same box can be shipped from Jaffa to Liverpool, a voyage of 23 days, for 42 cents, it would be well to reduce the rate to meet the Jaffa competition.

If it costs, as testified, 30 shillings a ton to ship onions to New York via Liverpool, time in transit 26 days, and 40 shillings to ship the same goods from New York to Liverpool, time in transit about 8 days, it would be well to endeavor to develop a market for our onions in Europe by making a more equitable rate than here shown. Innumerable other illustrations, especially of rates to South America, might be cited, but these two will suffice. These illustrations are based on normal, not war-time, rates.

No. 6. The Government line should operate its vessels to earn a fair profit.

The records of Congress show that private-owned steamship lines earn very large net profits, annual net earnings of from 30 per cent to over 50 per cent being frequent. Senate Document No. 601 gives some specific instances. At the present time many vessels are earning their full cost in a single voyage.

The Government line will be able to make great reductions in freight rates and still operate on a profitable basis, as it will not aim for the enormous profits earned by private-owned steamship lines.

No. 7. The Government line should do as most steamship lines do, maintain regular schedules, and when deemed advisable also accept charters for some of its steamers. The probabilities are that the Government line's steamers will be chiefly employed on regular routes. It may be found advisable to send them where there is greater need, and employ them at times to relieve against oppression or total lack of tonnage.

No. 8. The Government should secure its ships in the markets of the world where no breach of neutrality will be possible, until a sufficient number of vessels have been secured with which to commence business. Additional ships should be added to the fleet by construction in American shipyards so far as possible. The transfer of naval auxiliaries and military transports and the ships of the Panama Railroad Co. will in themselves give us a good start. Bearing on this the special committee on the American merchant marine of the New York Chamber of Commerce, made up of experts in shipping, has just reported as follows:

If a substantial tonnage is to be created, it is idle to suggest that it be entirely constructed in this country, for the facilities do not exist for the work. * * * If a large tonnage built abroad is placed under the American flag, the necessary repair work will be an important aid in establishing American yards on a basis where they can compete with foreign shipbuilders.

I am assured that there will be no difficulty in obtaining at favorable prices an adequate number of suitable ships with which to commence business and adding to the fleet by constructing new vessels, as previously stated.

Mr. SMITH of Michigan. From whom is the Senator quoting?

Mr. FLETCHER. I was quoting from the committee's report to the New York Chamber of Commerce.

Mr. SMITH of Michigan. Do I understand that they advocate the building of these ships in foreign shipyards?

Mr. FLETCHER. Oh, no.

Mr. SMITH of Michigan. Does the Senator advocate building the ships in foreign shipyards?

Mr. FLETCHER. No; I did not say that. Shall I repeat the language from the document here?

Mr. SMITH of Michigan. That is what I understood the Senator to say, and yet I was quite surprised.

Mr. FLETCHER. This is the quotation:

If a substantial tonnage is to be created, it is idle to suggest that it be entirely constructed in this country, for the facilities do not exist for the work.

That is the view of the committee of the New York Chamber of Commerce as expressed by them.

If a large tonnage built abroad is placed under the American flag, the necessary repair work will be an important aid in establishing American yards on a basis where they can compete with foreign shipbuilders.

That is the end of the quotation.

No. 9. The shipping board, which can act only with the approval of the President of the United States, can be depended upon to do nothing with regard to the purchase of interned vessels that will prejudice the quality of our neutrality.

No. 10. For 50 years American private capital has had an undisturbed opportunity to engage in the steamship business in the foreign trade under the American flag and has not done so.

Where American capital has engaged in the foreign trade it has conducted it under foreign flags, because it could do so from 5 to 10 per cent cheaper than under the American flag. I take these percentages from the report of the shipping committee of the New York Chamber of Commerce previously mentioned.

One of the members of this committee was Mr. George F. Dearborn, president of the American-Hawaiian Steamship Co. He surely knows what it costs to operate American ships as compared with foreign ships. This committee in its report says:

We desire first to point out that there has been a general misunderstanding of the added cost of operating American vessels as compared with the same vessel under a foreign flag. It has been frequently stated and generally accepted that the operation under the American flag will cost from 40 to 50 per cent more. We believe this percentage should be applied to wages alone, for the cost of fuel, supplies, insurance, and upkeep is substantially equal for the same vessel in the same trade, regardless of flag. On passenger ships, where the wage item may be a larger percentage of the total operating costs, the difference in favor of foreign vessels is somewhat greater; but with strictly freight carriers your committee is informed that the disadvantage under which American tonnage must labor is 5 and 10 per cent of the total operating cost. Even in passenger vessels of a type suitable for South American trade the disadvantage probably does not exceed 10 per cent.

This committee makes this frank admission in order to explain why American investors have been scared off from shipping investments. The report says:

The steamship man must obtain his capital for American ships from American investors. The American investor knows little of the value

of securities of steamship companies beyond the repeated statements in the public press that it costs 40 per cent more to operate an American vessel than one owned abroad, and that, consequently, competition is impossible without a heavy subsidy. These statements are not calculated to attract American capital to vessel securities.

In other words, according to the New York Chamber of Commerce report, subsidists have for years been deceiving the American people as to the cost of operating American ships in their efforts to wring from Congress a subsidy to make up the fictitious difference of 40 to 50 per cent in cost of operations, but have only succeeded in destroying the confidence of American investors in shipping investments.

Mr. SMITH of Michigan. Mr. President——

The PRESIDING OFFICER. Will the Senator from Florida yield to the Senator from Michigan?

Mr. FLETCHER. Just for a question, because I do not want to take too much time.

Mr. SMITH of Michigan. I do not wish to interrupt the Senator, but I would like to suggest that, if the argument he has just read has discouraged private investors in going into that kind of business, what has he to say over the statement made by the Secretary of the Treasury before the House committee that the experiment launched under this bill will undoubtedly be a losing venture, and that for a considerable time, at least, no returns will be adequate to the investment?

Mr. FLETCHER. Of course, no one can look into the future and tell just what the profits will be or what losses may occur, particularly when it comes to opening up new routes. A great deal is going to depend on the management, like any other business enterprise. If the Senator cares anything for my judgment about it, it may be that in the outset there will be losses in the opening up of new routes and in the operation of such line, but there is no need for that to continue. As the trade grows, as the business increases, there is ample reason for believing that the ships can be operated at a profit, and that they will be operated at a profit. I am in favor of their being operated at a reasonable profit. What I am dwelling on now is the New York Chamber of Commerce, which has been one of the most active and chief opponents of the measure and which has been quoted here in arguments over and over again. I do not know but what the report from which I am quoting has been read into the RECORD two or three times. The Senator from New Hampshire read it in full yesterday. The report made by that special committee to the New York Chamber of Commerce—the special committee being Irving T. Bush, William Harris Douglas, George S. Dearborn, Jacob W. Miller, J. Temple Gwathmey—contains the statement which I have mentioned to the effect that the claims which have been made in the years gone by that it cost from 40 to 50 per cent more to operate ships under the American flag than under a foreign flag have not been proved; that the public has been misled by those statements; that the actual fact is they find to-day, and so report, that it does not cost over 5 to 10 per cent more to operate under the American flag than under a foreign flag.

What I am trying to impress upon the Senate now is that this committee, making this formal report, declares that these statements which have been spread broadcast for years past as a basis for subsidy legislation are not true; that they have had the effect, not of producing legislation whereby these gentlemen could get their hands into the Treasury of the United States under some subsidy legislation, but have had the other effect, of driving capital away from the enterprise when it was most needed, and now they want to bring back that capital. They say private enterprise is ready to go into this business; that the statements which have been made and printed over the country for years past as a foundation for insisting that subsidies should be granted are not true statements at all; that they have been greatly exaggerated; and they admit now that the mistake has been made of driving capital away from this business by misrepresenting the facts. They say, and I accept their statement—I accept it because they know more about it than I do; I believe it is correct—that the difference is only 5 or 10 per cent between the cost of operating under the American flag and under a foreign flag.

Mr. SMITH of Michigan. Mr. President, the Senator from Florida is a level-headed, sound, business man, and I think, without exaggeration, a successful business man. I should like to ask him whether he expects the public to promptly subscribe for the 49 per cent of the stock of the shipping corporation which is to be offered to them?

Mr. FLETCHER. Mr. President, I will not take the time to answer that question, first, because while it may strike the Senator as being of consequence, and I give him credit for good faith in asking it, it seems to me utterly immaterial. It is beside the point I am discussing, in the first place, and in the next place it makes no difference whether the public subscribes for this stock or not. The bill provides that the corporation may begin its operation when 51 per cent of the stock is paid up, and whether the public will subscribe or not I do not know. We can not foresee and foretell what will happen in that regard; it may be it will; it may be it will not. It may be the United States will have to take every dollar of the stock. In that event I see no obstacles in the way nor any objection to that procedure. It will be offered, as I understand it, and if the people do not want it, as capital is needed the Government will furnish it.

Mr. SMITH of Michigan. Early in the evening the Senator from Florida referred to criticisms that have been made upon the Federal reserve-bank law, and evidently he feels that thus far it has succeeded. I do not want to divert the Senator to a discussion of that question, but the prospects and prophecies that were held out to the bankers that this would be a profitable investment for them was coupled with the threat that if they failed to buy the stock in the Federal reserve bank their charters would be taken away from them. I undertake to say that if that threat had not accompanied the privileges that were to be derived from the Federal reserve act not one-twentieth of the bankers of this country would have invested in the stock of the Federal reserve banks, and I do not believe the public will invest in the stock of this corporation.

Mr. FLETCHER. I will not follow the Senator in an argument of that kind because we are not dealing with that proposition here. I want to confine the discussion to what is immediately before us as far as possible and proceed as rapidly as I can. So I simply repeat that whether the public subscribe for stock or not it in no way militates either against the feasibility or the success of the plan.

Perhaps the "high finance" of the International Mercantile Marine, the stock of which is to-day quoted at 1⅜ for the common and 5⅜ for the preferred, par value of each being $100, and of the Consolidated Steamship Co., which went into liquidation shortly after it was organized, may also have had something to do with scaring off the American investor from shipping investments.

It should be noted that both of the above mentioned were simply holding companies, and their stock-jobbing fiascos in nowise affected the profitable operation of the various steamship companies which made up these combinations.

Therefore, because of this state of affairs the chamber of commerce committee recommends a Government guarantee of shipping bonds "to all whose character and standing entitle them to it," in order "to satisfy the investing public that they can safely buy bonds secured by vessel property." "Otherwise," says the report, "the steamship man is helpless, and can do little to restore our shipping, no matter what inducements may be held out to him."

This does not indicate that "there is a larger amount of private capital ready for the purchase of ships which is kept from investment by this bill than is contemplated to be expended by the bill itself."

Secretary McAdoo covered the proposal of Government guaranties admirably in his recent Chicago speech, when he said:

> Guaranties by the Government of the principal and interest of bonds issued by private corporations engaged in shipping; this proposal is not worthy of serious consideration. It would be the worst form of subsidy, to say nothing of the wholly indefensible policy of having the United States Government become the guarantor of the bonds of private corporations engaged in any sort of enterprise. Once we entered upon such a course, we should be asked to indorse the bonds of corporations engaged in other than steamship enterprises. In time we should have the same kind of scrambling at Washington for Governmental favor in the way of indorsements of obligations of private corporations that we had for bounties to favored interests under our old tariff laws.

Now, I believe it is a fact that it does cost 5 per cent to 10 per cent more to operate ships under the American flag than it costs to operate them under foreign flags, as I have stated, and there is no assurance that after this war is over and there is no more need for the protection and cheaper war insurance given to ships under the American flag, that American capital in shipping will continue their vessels under the American flag at an added expense of 5 per cent to 10 per cent; and it is even less likely that they will add to their fleets under the American flag, unless they receive a subsidy.

It is quite certain that Congress will never grant a subsidy to a business so profitable as shipping simply to make up the difference between the large profits under the American flag and the larger profits possible under foreign flags.

From the foregoing it is very evident that there is not the remotest likelihood that private capital will or can do anything to establish an adequate American merchant marine.

They have said in this report that private capital has been driven away from such investments. The report claims further-

more that the cost of operation is 5 to 10 per cent greater under the American flag than under the foreign flag. The whole report assures the country that private interests will never develop an American merchant marine unless bonds are guaranteed or unless subsidies are granted.

It shows that by these false statements as to the impossibility of operating American ships except by the aid of a large subsidy they have injured themselves. The fact of the matter is that the revival of the American merchant marine has now become too big a problem for private capital to accomplish. It is no longer a question of whether we shall have a Government-owned merchant marine or a private-owned merchant marine; the question now is, Shall we have a Government-owned merchant marine or no merchant marine, and continue to depend on the foreigner to carry our ocean-borne commerce?

Forty million dollars is sneered at as being inadequate. If properly administered, as I am sure it will be, it will provide a mechant fleet far greater in extent than the entire present American merchant marine in the foreign trade, including all the shipping that has come under the American flag since the outbreak of the Civil War. That foreign shipping is shown by reference to the report of the Commissioner of Navigation, page 188. The documented tonnage of the United States merchant marine employed in the foreign trade in 1914 was as follows: Two thousand three hundred and sixty vessels of 1,066,288 tons; added under the act of 1914, 104 vessels of 372,488 tons; total, 1,438,776 tons.

Now, as to question No. 11. If it is claimed private steamship companies can operate so much more cheaply than can the Government, then private capital will welcome the Government merchant marine, which will show the way and prove the business, for if the Government line can show a profit on any particular route, private steamship companies, according to the statements being made, can show a greater profit, and whenever any private American steamship is prepared to maintain a service equal to that of the Government line on any route established by the Government line, the Government line will withdraw from that route; there will be no necessity to sell it. The Government line will simply transfer its activities to some other undeveloped route.

As to question No. 12, there is no good reason why the Government line should not enter into conferences or agreements with existing lines if it should be deemed to be to the best interests of all concerned, always bearing in mind that the best interests of American commerce should be the first consideration of the Government line, healthy competition, and good service at reasonable rates being maintained.

As to question No. 13, fruit and meat are usually carried in combination passenger and freight boats, and where the traffic calls for such freight it will be a simple matter to properly provide for it. The transportation of oil is pretty well taken care of by the oil companies. There is not any likelihood that the Government line would be called upon to give much attention to the carrying of oil. If it should be, it will not be a difficult problem, and the tank steamers will be excellent naval auxiliaries.

Question No. 14 is fully answered in the answer to question No. 7.

As to the final question, "Is this to be a permanent or temporary policy?" I will say that it will be as permanent or as temporary as the circumstances make necessary. This phase of the question is discussed in the answer to question No. 11.

Mr. President, observations have been repeatedly made that the influences outside the Senate are urging the passage of the bill, implying that Senators on this side are not acting in pursuance of their own judgment. That makes it incumbent upon us not only to deny that implied charge, but to inquire whether it may not be prompted by those deeply interested on the other side, and to consider what those interests may be.

INTERESTS AND INFLUENCES AGAINST THE BILL.

There has developed considerable opposition from certain quarters. The cry of paternalism has been raised, the criticisms of Government ownership has been advanced, and several of the large news and financial papers of the eastern cities appear daily with editorials denouncing the administration's policy. These papers, being the recipients of large incomes from advertising contracts with the steamship companies, are naturally opposed to a plan inimicable to the interests of their customers. This fact may affect their vision. The greatest opposing power, however, to the policy of the Government is the steamship companies themselves.

An investigation of the shipping question and the interests that are involved reveals some very interesting facts. In the report of the proceedings of the Committee on the Merchant Marine and Fisheries in the investigation of shipping combinations the methods of the shipping interests are fully set forth. It is shown that a regular system of agreements and pools prevail, against which the independent shipper has no chance to live. The committee in its recommendations states:

> The committee believes that the disadvantages and abuses connected with steamship agreements and conferences as now conducted are inherent, and can only be eliminated by effective Government control; and it is such control that the committee recommends as the means of preserving to American exporters and importers the advantages enumerated, and of preventing the abuses complained of.

In the investigation by the committee it developed that certain ships were regularly used solely for the purpose of killing competition. To quote the exact words of the report:

> Thus, in the North Atlantic passenger service, the evidence presented in the suit against the Hamburg-American Line et al. shows that in about the year 1908 the conference lines authorized the appointment of a committee for the purpose of selecting fighting steamers to destroy the competition of nonconference lines. This committee, according to the evidence, would select suitable steamers from any of the conference lines to sail on the same days and between the same ports, the regular rates being reduced to a point sufficiently low to secure the traffic. As already stated in this volume (p. 46) "the evidence in the Government's suit shows that such opposition sailings were repeatedly instituted against certain independent lines. * * * Any surplus of passengers which were booked for the fighting steamer, but which could not be carried by the same, would be transferred to other conference line steamers at the reduced rates. The expenses and loss from the lower rates resulting to any line whose vessels had been selected were distributed over the members of the conference. It was thus a case of all the lines united in conference opposing every sailing of a single opposition line. By distributing the loss over the several members of the conference each constituent line would suffer proportionately much less than the one line which was fighting the entire group and which would inevitably soon exhaust its resources in the conflict with the combined power of the large lines with their superior speed and better third-class accommodations."

The report shows that the same methods are still in vogue not only in passenger but in freight traffic as well.

The shipping interests look with concern upon the entrance of the Government into the field; therefore they oppose the Government's policy of purchasing, and especially oppose bitterly the Government's operating, ships. It is believed that it is not so much Government competition that is feared, for it is generally acknowledged that there is sufficient business, but they fear that the entrance of the Government-owned ships will be a protection to the independent companies which will surely enter the field if it is known that fair play and equal competition will be accorded to them.

THE PERSONNEL OF THE SHIPPING INTERESTS.

The question arises as to who composes the American shipping interests. An examination of the personnel of those interested in the various steamship lines reveals a system of interlocking directorates and a community of interest probably unparalleled in the history of modern financiering. By consulting Moody's Manual of Railways and Corporations and the volume entitled the Directory of Directors, one can readily appreciate that the administration, in its desire to benefit the people, has somewhat displeased the most powerful financial interests in the country.

The same interests are associated both in the foreign and coastwise shipping. The most prominent foreign shipping corporations controlled by American interests are owned by the International Mercantile Marine, a New Jersey corporation. This company owns the capital stock of the Oceanic Steam Navigation Co. (Ltd.), known as the White Star Line, which flies the British flag; the Atlantic Transport Co. (Ltd.), British flag; the International Navigation Co., which owns the American Line (American flag) and Red Star Line (Belgian flag); and the Dominion Line. The parent corporation also owns the controlling interest in the Leyland Line. The Atlantic Transport controls the National Steamship Co. (Ltd.). The number of steamers owned by the corporation on July 1, 1913, including those under construction, was 137, with gross tonnage of 1,280,410 tons, exclusive of tugs, lighters, and so forth. A large majority of their ships are under foreign flags. Moody's Manual states that the majority of the stock of the International Mercantile Marine is deposited under a voting-trust agreement. The voting trustees are J. P. Morgan and Charles Steele, both members of the Morgan firm; J. Bruce Ismay, P. A. B. Widener, and Lord Pirrie. Transfer agents are J. P. Morgan & Co.; and the register of certificates, Guaranty Trust Co. of New York. Among the directors are J. P. Morgan, Charles Steele, George W. Perkins, and E. J. Berwind.

The fleets of the United States Steel Corporation, Standard Oil Co., and the United Fruit Co. took advantage of the law of 1913 to register under the American flag. While the Standard Oil and United Fruit Co. have considerable fleets of ocean-going vessels, the United States Steel Corporation has only a limited number of ocean-going ships, these being composed principally of lake steamers. An examination of the personnel of the directors of these companies shows that J. P. Morgan, George W.

Perkins, and Elbert H. Gary are on the executive committee of the United States Steel Corporation and that Mr. William Rockefeller, largely interested in Standard Oil, serves on the board of directors of the National City Bank with Mr. J. P. Morgan and Mr. Frank A. Vanderlip and others, who it will be later shown are largely interested in coastwise shipping. The United Fruit Co. is largely composed of Boston interests, though it is said the Standard Oil Co. interests are large investors.

Investigation of the coastwise shipping interests develops a situation equally interesting. Nine-tenths of the Atlantic coast shipping is owned by the railroads and two corporations. The report of the House Committee on the Merchant Marine and Fisheries says:

The steamers of the railroad-controlled lines, combined with those of the Eastern Steamship Corporation and the Atlantic, Gulf & West Indies Steamship Lines, number 199, or 84.7 per cent of the above-mentioned total for the 28 lines, and represent 516,055 gross tons, or 93.9 per cent of the total gross tonnage. Not only do the railroads and the two shipping consolidations dominate over nine-tenths of the tonnage, but it is significant that very few of the principal routes on our entire Atlantic and Gulf coasts are served by more than one regular steamship line.

The railroad-controlled lines referred to in the report of the committee are the Southern Pacific, or Morgan Line, the Old Dominion Steamship Co., the Merchants' & Miners' Transportation Co., and the Ocean Steamship Co., or Savannah Line. These, with the Eastern Steamship Co. and the Atlantic, Gulf, and West Indian Steamship Lines, generally known as "Agwi," constitute practically the entire coastwise shipping for the Atlantic seaboard. It is a remarkable fact that the interests allied in the ownership and control of all of these coastwise lines are also associated in the foreign American shipping. Taking the companies in the order above named we find that in the Southern Pacific Mr. Henry W. De Forrest, a prominent director, serves on the board of the National Bank of Commerce with Mr. Henry P. Davidson, with J. P. Morgan & Co., with Mr. Frank A. Vanderlip, and Mr. William Rockefeller, of the National City Bank. Mr. L. F. Loree, another director, is on the board of the Seaboard Air Line Railroad and part owner of the Old Dominion Line. Mr. Ogden Mills, another director, is associated with the Pacific Mail Steamship Co., and he, with Mr. Cornelius Bliss, another director, are on the board of the United States Trust Co. of New York, on which board the same interests are found dominant.

The Old Dominion Steamship Co. is controlled by the Atlantic Coast Line, Seaboard Air Line, Southern, Chesapeake & Ohio, and Norfolk & Western Railroads. The same interests appear here. Mr. Frank A. Vanderlip, of the National City Bank, appears on the boards of two of the railroads. Mr. Charles Steel, member of the firm of J. P. Morgan & Co., Mr. Elbert H. Gerry, chairman of the board of directors of the United States Steel Corporation; Mr. Victor Morowitz, a prominent member of the board of the National Bank of Commerce; and others of the same interests are found on the boards of these railroads. The Merchants' & Miners' Transportation Co. was, until recently, owned by the New York, New Haven & Hartford Railroad, which, from recent investigations by the Interstate Commerce Commission and the Department of Justice, it was disclosed that this was controlled by J. P. Morgan & Co. The Government required the railroad to sell the Merchants' & Miners' interests. The new owners, however, belong to the same aggregation. The chairman of the board of directors of the Merchants' & Miners is on the board of the Atlantic Coast Line Railroad, of which J. P. Morgan & Co. are the fiscal agents, and others have similar affiliations. The Ocean Steamship Co.—the Savannah Line—is owned by the Central of Georgia Railroad. On its board are found gentlemen who are interested in New York banking houses with the Morgans and Rockefellers.

The Eastern Steamship Co. is a holding company which controls and operates 11 different steamship lines of the New England coast and controls practically the entire trade of that region. According to Moody's Manual, on June 30, 1913, the New England Navigation Co. owned two and a half million dollars in the stock of this company. Mr. J. P. Morgan is a director of the New England Navigation Co. The Eastern Steamship Co. is understood to be financed and largely controlled by Hayden, Stone & Co., of Boston and New York. G. L. Stone and J. W. Hayden of that firm are on its board of directors. The same firm are understood to control the Atlantic, Gulf & West Indian Steamship Lines, of which company G. L. Stone is vice president and H. R. Mallory, a member of the board of directors of the Eastern Steamship Co., is president. This company owns the majority of the stock of the Clyde Line, the New York & Cuba Line, Mallory Line, and the entire stock of the New York & Porto Rico Line and the Texas City Steamship Co. Mr. Edward J. Berwind, one of the directors of the Atlantic, Gulf & West Indian Steamship Lines, the holding company for the various subsidiary lines, is also a director in the International Mercantile Marine, along with J. P. Morgan and George W. Perkins, and is on the board of directors of the Guaranty Trust Co. with Mr. T. W. Lamont, of the firm of J. P. Morgan & Co., and on the National Bank of Commerce with Vanderlip and others. Mr. Berwind is also the head of a big coal company in New York City, whose business is that of furnishing coal to the various steamship lines, one of which is said to be the Hamburg-American. His brother, Mr. John E. Berwind, is also an official of the Porto Rico Line and is president of the Maritime Register, the leading shipping paper of the country.

To sum up the entire situation, I am assured that an investigation will prove that over 90 per cent of the coastwise and practically the entire foreign American shipping is allied through interlocking directorates with the National City Bank, United States Trust Co., National Bank of Commerce, Guaranty Trust Co., all of which have for their fountain head the Rockefeller-Morgan-Perkins interests.

It is against this aggregation that the administration, representing the American people, finds itself. The shipping interests realize that the entrance of the Government into the field will break the chain by which they have the independents shut out. Government-owned vessels are what they most fear, for it means a breakwater—a bunker—a protection for the independent who now dares at his peril to invest a dollar in shipping against the powerful organization, but who would be willing to invest if fair play was allowed. My information is the same interests own, or are interested in, several of the big eastern newspapers. The vision of these papers is colored, and others are affected by revenues of steamship advertising. Therefore you find a stalwart opposition by the eastern newspapers to the Government policy.

In further reference to the question of American shipping the reason has been shown why the eastern papers and the Shipping Trust are opposed to the bill. The argument has been advanced by some of the eastern papers that the Government should not purchase ships, for the reason that there is no money to be made in the shipping business, and the Government would lose vast sums.

In rebuttal of this argument the following extracts are taken from Special Diplomatic and Consular Reports prepared for the use of the Committee on the Merchant Marine and Fisheries of the House of Representatives in dealing with the methods and practices of steamship lines engaged in the foreign carrying trade of the United States.

The following extract is from the report of Mr. H. P. Beecher, vice consul at Havre, France:

While the steamers of many lines run between Havre and various ports of the world, there exist between them no agreements, pools, or other combinations for the purpose of fixing tariffs, either for freight or passengers, of giving rebates, special rates, and other privileges or advantages, or for the purpose of pooling or dividing their earnings and destroying competition.

On the other hand, there exists between certain navigation companies (whose vessels, however, neither call at Havre nor are affected by French law beyond the enforcement of port regulations, dock dues, and pilotage) an agreement or combination.

It will suffice to name two of these:

First. The International Mercantile Marine Co.

This combination includes the White Star, Dominion, Leyland, American, Atlantic Transport, Red Star, and Holland-America Lines, the last-named company having been absorbed since the company's organization in 1902.

In that year there was formed in the United States a shipping trust for the purchase and control of the stock of the first six named companies. Until that year the White Star Line, for example, was owned by a British company, the Oceanic Steam Navigation Co., and nearly all the stock was held in Great Britain. But on February 4, 1902, an agreement was concluded between the American syndicate and the White Star Line for the purchase of its shares. Each holder of a share of £1,000 in the Oceanic Steam Navigation Co. received £4,196 in cash and £6,000 in preferred and common shares of the trust. The managers of the line, Messrs. Ismay, Imrie & Co., received 10 times their profits for the year 1900 and undertook for 14 years not to associate themselves with any other shipping enterprise trading to ports which the White Star had used.

The Dominion Line also received 10 times its profits for 1900, and Messrs. Richards, Mills & Co. the same. The Leyland Line was paid £2,347,000 in cash. The American, Red Star, and Atlantic Transport Lines, which had been acquired earlier and formed the nucleus of the trust, were taken over for the payment of £6,831,000 almost entirely in trust shares.

The trust created the following capital:

Common stock, dividend limited to 10 per cent until 4½ per cent debentures be paid off	£9,980,000
Preferred stock, cumulative interest at 6 per cent	10,340,000
4½ per cent debentures	10,550,000
5 per cent debentures	3,740,000
Total	34,610,000

(Or $169,000,000.)

Besides this, there are £1,376,000 of debentures in the companies constituting the trust.

The best asset of the trust has been the White Star Line, which in 1910 earned a net profit of £540,000 on a capital of £750,000, after writing off £370,016 for depreciation. A dividend of 30 per cent was paid in that year by this company alone, and a balance carried forward or placed to various reserves, among which was an insurance fund, for which £100,000 was set apart, in view of the increase of the fleet. At the same time the best part of the insurance was underwritten at Lloyds. As an illustration of the White Star's prosperity it may be observed that in 1908 the dividend was 10 per cent and in 1909, 20 per cent.

On the other hand, the earnings of the combination have not been as great as anticipated, and the limiting of the interest on the common stock has been superfluous. No dividends have yet been paid on either preferred or common stock, and the former, with a nominal value of $100, is quoted at $64.

The purchase by an American trust of so many British ships caused considerable concern in England, where sharp criticism was aroused. As a matter of fact, British law forbids a British ship to be owned by a foreign corporation. As a compromise a special agreement was concluded between the American syndicate and the Government, of which Mr. Balfour was then premier, an agreement which provided that British vessels—i. e., American vessels flying the British flag—should be controlled by a committee of British subjects.

As a sequence to this, and while Mr. J. Pierpont Morgan remained the principal power, Mr. J. Bruce Ismay, Lord Pirrie, E. C. Grenfell, H. A. Sanderson, and other British subjects constituted the elements required by law. In this manner the contention of the British Government that "shares and not ships" had been sold was complied with.

In the meantime Mr. Morgan was negotiating for the purchase of the Cunard Line, a fact which decided the British Government to take drastic action to prevent that company's vessels from passing into the hands of the trust. Such a purchase, in connection with an agreement which the American financier had concluded with two great German lines, would have given the syndicate a monopoly of the Atlantic passenger and a part of the freight trade. This was felt to be undesirable and dangerous.

The British Government consequently concluded an agreement with the Cunard Line by which the ships of that company were to remain British. The money required to build the *Mauretania* and *Lusitania* was advanced by the State at a rate of 2¾ per cent, and a special subvention of £150,000 a year for the working of the two lines was guaranteed.

Congressional report shows the existence of pooling agreements among practically all the lines. Mr. Robert P. Skinner, consul general at Hamburg, in his report states:

The most common device of the German shipowners for the maintenance of rates is the division of territory and the rebate system. It is stated that since 1890 this system has not been applied in trade with the United States. These pooling and rebate arrangements are national and international. A most striking example of these undertakings is the North Atlantic passenger pool, to which the conference lines, so called, are parties. These lines include all the best-known companies transporting emigrants from Europe to New York. As far as Germany is concerned, the mechanism of the arrangement whereby all emigrants passing through Germany are directed to conference-line steamers is as follows: The Prussian Government has established 10 sanitary control stations at various points along the frontier of Russia. It is a requirement of law or regulation, with ample means for making it effective, that every emigrant arriving in Prussia shall first sojourn at one of these stations, where he is routed to the United States and forwarded to the seaboard. The carrying out of the administrative and sanitary sides of this work is intrusted by the Government to the Hamburg-American Line and to the North German Lloyd Line, acting jointly as concessionnaires.

Agreements also exist regarding freight rates. The congressional report further states:

Between the following trans-Atlantic steamship companies, Hamburg-American Packet Co., in Hamburg; North German Lloyd, in Bremen; Holland-America Steamship Co., in Rotterdam; Red Star Line, in Antwerp, the following freight agreement has been arrived at to-day:

The purpose of this freight agreement is to bring about a mutual understanding regarding freight rates to be maintained on a corresponding basis and to preserve to each separate company its share of the total income from the freight traffic.

This freight agreement comprises the total freight traffic of the above-mentioned lines from ports of the North German seacoast, Holland, and Belgium to ports of the United States; it further includes the traffic with chartered vessels as well as with the lines' own steamers, and it further includes the freight for dead weight as well as for live stock.

As a rule, a meeting will be held every four weeks by the representatives of the freight departments of the combined lines for the purpose of agreement regarding freight rates to be maintained and for the exchange of opinions regarding the status of the business and measures to be taken to meet competition. The fixing of rates, however, is not done by majority vote but by way of open agreement. The fixing of freight rates, even when such go below the fixed minimum freight rates, can be done, viz, for all ports by majority vote, for single ports by consent of all parties. Furthermore, the cancellation of freight rates can take place by majority vote.

Not only with Germany but with practically all the European countries these pooling agreements exist. Following the report of Mr. T. J. O'Brien, former American Ambassador to Italy, the congressional committee states in reference to the traffic with Italy:

Copies of the pooling agreements between the 12 steamship lines referred to in Ambassador O'Brien's report have been furnished to the Committee on the Merchant Marine and Fisheries by one of the interested lines. One is called the "Mediterranean freight-traffic agreement of December 15, 1911," and has for its object the assurance to each group of lines (group 1 comprising the six Italian lines and group 2 relating to the Anchor Line, the Hamburg-American Line, North German Lloyd, White Star Line, Cunard Line, and Austro-Americana) a certain proportion of the freight on cargo loaded at all ports of Italy and Sicily to all ports in the United States of America and Canada. The other agreement is called the "Mediterranean steerage-traffic agreement of February 8, 1909." By way of explanation, one of the companies interested draws attention to the fact that the steerage agreement was originally concluded in 1909, and in 1911 was renewed in its present shape with the exclusion of the Fabre Line; the latter company, although in principle willing to rejoin the contract, not having been satisfied with the participation quota offered to them.

This system of freight-pooling arrangements has not only existed between the American-European ports, but also between the United States and South American ports. The following is from the committee's report regarding South American traffic:

The reader is referred to the testimony of Mr. Christian J. Beck, freight traffic manager of the Hamburg-American Line, on pages 518 to 541, inclusive, of the hearings before the Committee on the Merchant Marine and Fisheries in the investigation of the so-called shipping combine. In his testimony Mr. Beck submitted the several freight and passenger agreements entered into between the Atlas service of the Hamburg-American Line and the Royal Mail Steam Packet Co.

Briefly summarized, the agreement of February 21, 1908, provides for—

1. A freight-pooling arrangement on the basis of 77½ per cent to the Hamburg-American Line and 22½ per cent to the Royal Mail Steam Packet Co. A margin of 5 per cent on the above proportion, however, is to be allowed each company, and if at the end of the year it is found that the actual total earnings of each company have amounted to less than the respective proportions of 72½ per cent by the Hamburg-American Line and 17½ per cent by the Royal Mail Steam Packet Co., then the difference between these minimum proportions and the proportions in the earnings shall be adjusted in accordance with certain rules adopted in the agreement. It is also agreed to ascertain, month by month, the quantity of cargo carried by the two lines, with a view to arranging the carriage in the agreed proportions, as far as possible.

2. A joint freight tariff to be agreed upon between the agencies of the companies in New York. The parties further agree to run their passenger steamers between New York and Colon alternately, as far as possible.

3. A division of territory. The Royal Mail Steam Packet Co. agrees not to extend its service to Haitian ports and Santa Martha, as far as sailings to and from New York are concerned, except in case of war with the Royal Dutch West India Mail Line, in which case the Royal Mail Steam Packet Co. is to receive the privilege of calling at Haitian ports served by the Dutch Line.

It should be stated here that the Atlas service of the Hamburg-American Line and the Royal Dutch West India Mail Line have an agreement with reference to the division of Haitian ports between themselves, a copy of which is found on page 524 of the hearings in the investigation of the so-called shipping combine. The Royal Mail Steam Packet Co. also expresses its intention not to extend its present service to the port of Port Limon, and in case this should be done the two companies agree to meet, with a view to making such arrangements as will least interfere with the interests of each other. In turn, the Hamburg-American Line agrees not to call at Trinidad and Grenada from and to New York, excepting with their cruising steamers.

The Hamburg-American Line, however, reserves for itself the service between New York and Puerto Barrios, but if more than a four-weekly steamer should be required the Royal Mail Steam Packet Co. is to have the option to share alternate steamers for the additional sailings.

On October 7, 1908, an agreement supplemental to the one of February 21, 1908, was entered into between the two lines. This agreement provided, among other matters:

1. That certain steamships of the two companies shall be dispatched from New York to Colon on alternate weeks.

Mr. Beck testified that these agreements had been renewed and are in existence to-day. He also testified that his line has no hard and fast agreement with the United Fruit Co., which also operates from New York to Jamaica and other ports enumerated in the above-mentioned agreement, but stated that it is tacitly understood that the United Fruit Co. will observe the same rates and conditions as the Royal Mail Steam Packet Co. and the Hamburg-American Line. This understanding with the United Fruit Co., however, is only a rate-fixing arrangement and does not involve a pooling agreement.

In reference to the methods of killing competition, the following is quoted from the report of Mr. Robert P. Skinner, consul general, Hamburg, Germany:

Any account of the methods and practices of the German steamship companies would be incomplete without reference to the Syndikats-Rhederei, a corporation through which are operated the fighting ships of the six largest Hamburg companies engaged in extra-European trade. Nominally, the Syndikats-Rhederei is a vessel-owning company, with a capital of $1,428,000, engaged in commercial transportation enterprises. Actually, it is a defensive corporation owned, in respect to its capital shares, as follows:

Hamburg-American Line	$785,400
Hamburg-South American Line	136,600
German Steamship Co	154,700
German-Australian Steamship Co	130,500
C. Woermann	119,000
German East Africa Co	71,400
	1,428,000

The above distribution of shares is apportioned with reference to the tonnage of the companies named. This fighting corporation was organized on December 19 and registered on December 23, 1905, and one-half of the original capital was paid in immediately. Four comparatively small and inexpensive ships were purchased, and these, with such others as may be chartered from time to time, are hired out to the six owners of the company to meet dangerous competition and to drive it away. The fighting ships handle chiefly bulk goods, leaving merchandise, which requires prompt transportation, to the care of the parent company, which maintains its nominal rates as far as possible, the stress of competition being borne by the fighting ships principally. In times of peace the fighting ships engage in regular trade on time charters. As this corporation is not one for profit primarily, the investment in reality is a new sort of insurance. The Syndikats-Rhederei made no money at the beginning of its history, this fact indicating that the ships were all actively engaged in commercial warfare, but last year the returns were favorable, as rates, generally speaking, were higher and the regular lines required less expensive support. The manager of the company is Mr. Christian Friedrich Bransloew, who is known to be a very careful and competent man.

The purchase of Government vessels would mean a constant vigilance against these secret combinations. Therefore it is against the interest of the Shipping Trust for the Government to own vessels, and they will do everything in their power to prevent the passage of the bill. An examination of the special diplomatic and consular reports, prepared for the use of the Committee on the Merchant Marine and Fisheries and edited by Mr. S. S. Huebner, will show a mass of evidence of the existence of these pools and agreements between various steamship companies plying to all continents of the world.

Following this up, may we not find clearly accounted for the resolutions of certain chambers of commerce which have been produced in the arguments on the other side—New York, Boston, Philadelphia, and New Orleans? The same controlling influences will appear in them all.

I requested Mr. Philip Manson, of New York, to advise me respecting the action of a committee of the New York Chamber of Commerce, and to give me as full information as he could regarding the officers and their associations, and as to the reasons for their opposition to this bill. I have his permission to use his letter. I think you will agree that Mr. Manson understands his subject thoroughly, and, while he frankly sets forth the facts, he is fair and without ulterior motives. His standing, character, and intelligence I do not believe can be questioned. This is his letter, dated January 18, 1915:

THE ATLANTIC COAST STEAMSHIP CO. (LTD.),
290 Broadway, New York, January 18, 1915.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I have to-day received yours of January 15 and the copies of the report, the proposed substitution, and Secretary McAdoo's address, for all of which I thank you very much.

Your report is a masterly document, and I am amazed that the newspapers, in spite of their bias, did not give their readers the benefit of it to a greater extent than they did. It simply shows to what an extent the newspapers are owned, controlled, or influenced by the interests that would prevent the shipping bill from passing. This is a sad commentary on American journalism, but I know it to be true, as I was in the newspaper business before I became interested in the steamship business.

The opposition to the shipping bill comes chiefly from two sources, namely, the steamship interests and the so-called Wall Street interests.

The steamship interests are opposed to the bill because they don't want additional competition, either governmental or private.

Wall Street interests are opposed to the bill for two reasons: First, because of the steamship interests which they own or control, and, second, because they fear that the success of this Government enterprise—and a great success it is bound to be—may result in Government ownership of telegraph, telephone, railroad, and other public-service corporations.

Without going into the pros and cons of Government ownership, the great concern that Wall Street has with regard to that is that under Government ownership the large profits which Wall Street receives from privately owned corporations every time they have a bond or note issue or other form of financing will be done away with.

However, Secretary McAdoo in his address has shown that the objection to the shipping bill on the ground of Government ownership is not tenable even if we were bound to consider it.

The opposition of the steamship interests is of the least importance, as they have not in themselves a very great influence with our legislators or the press.

The opposition of Wall Street influences is a much more serious problem to contend with. I am sure that they are spending large sums of money to kill this bill. A few weeks ago I learned of a fake marine association called the National Merchant Marine Association. After some difficulty I located this alleged marine association in the offices of the New York Life Insurance Co., and after interviewing the secretary I became satisfied that it was formed for the sole purpose of killing the shipping bill.

It is well known that the New York Times and the New York Sun are controlled by Wall Street interests. The New York Evening Post derives its existence from Wall Street. The Journal of Commerce is supported almost entirely by the foreign shipping interests and Wall Street. These are the papers that most strongly oppose the shipping bill. Newspapers outside of New York City attribute to the above papers a superior knowledge of shipping matters and follow their lead.

The position of such Republican papers as the New York Tribune and the New York Press on this bill can well be understood; nevertheless, being free of Wall Street influences, their party bias has not prevented them from indorsing the purpose of the bill and some of its features and to offer subsidy as a substitute, whereas the first-named papers damn the bill throughout, yet offer nothing in its place, the reason for which has already been indicated.

I now come to the request you make in your letter for information as to the men who control the New York Chamber of Commerce.

For many years it has been repeatedly charged that the New York Chamber of Commerce was not representative of the business interests of New York, but that it was controlled by Wall Street interests. The shipping interests are also owned and controlled by Wall Street interests, so the two are bound up in each other.

The following will prove this:

The president of the chamber of commerce is Mr. Seth Low, formerly president of Columbia University and a former Republican mayor of New York City. Mr. Low's present activities are confined to holding honorary positions, and his office as president of the New York Chamber of Commerce is regarded as one of them. Mr. Low may be depended upon to follow the lead of his fellow officers in the chamber of commerce, and it is with them that we are most interested.

Interlocking directors are indicated by letters, thus, (A.).

The officers and executive committee are as follows: (E. E.) J. Pierpont Morgan, vice president; director of the International Mercantile Marine (A.); New England Navigation Co. (B.); New England Steamship Co.; National Bank of Commerce of New York (C.); United States Steel Corporation; Western Union Telegraph Co. (D.); New York Central & Hudson River Railroad; New York, New Haven & Hartford Railroad (E); Northern Pacific Railroad; West Shore Railroad; and others.

Frank A. Vanderlip, member of executive committee. President and director of National City Bank of New York (H.); director of National Bank of Commerce of New York (C.); Farmers' Loan & Trust Co., of New York; American Security & Trust Co., of Washington; and Riggs National Bank, of Washington. Trustee of Consolidated Gas Co., of New York (I.) and Mercantile Safe Deposit Co., of New York; director of New York Edison Co.; Union Pacific Railroad; Chesapeake & Ohio Railroad; Hocking Valley Railroad; Missouri, Kansas & Texas Railroad; Norfolk Southern Railroad; Oregon Short Line Railroad; Oregon-Washington Railroad & Navigation Co.; and Seaboard Air Line Railroad.

James Talcott, vice president. Director of the Manhattan Co. Bank, of New York.

William D. Sloan, vice president and member of executive committee. Director of National City Bank, of New York (H.); Guarantee Trust Co., of New York (K.); Guarantee Safe Deposit Co., of New York; Eastern Steel Co.; Mahoning Coal Railroad Co.; Central & South American Telegraph Co.; and Standard Roller Bearing Co. Trustee of United States Trust Co., of New York (L.).

A. Foster Higgins, vice president. Director and vice president of Compania Metallurgica Mexicana, and Sombrerette Mining Co. Director and president of Mexican Northern Railroad. Director of Montezuma Lead Co., Mexican Lead Co., Potosi & Rio Verde Railroad, Teziutlan Copper Mining Co., Crocker-Wheeler Co., and Knickerbocker Safe Deposit Co.

George B. Cortelyou, vice president. President and director of Consolidated Gas Co., of New York (I.), and director of New York Edison Co., which, with other companies, in all of which he is an officer or director, control the lighting and power business of Greater New York and vicinity. Also director of National Bond & Mortgage Insurance Co. and National Surety Co. (M.)

John I. Waterbury, vice president. Director of International Mercantile Marine (A.); Western Union Telegraph Co. (D.); American Telegraph & Telephone Co.; Western Electric Co.; Audit Co., of New York (N.); Chase National Bank, of New York (O.); United States Guarantee Co.; The Pacific Coast Co.; Chicago, Indianapolis & Louisville Railroad; and Louisville & Nashville Railroad (R.). Trustee of Alliance Insurance Co., of London.

T. De Witt Cuyler, vice president. Director of Audit Co., of New York (N.); New York, New Haven & Hartford Railroad (E.); and Interborough Co. (the New York subway); also director in many other transportation companies.

Frank K. Sturgis, vice president. Member of the governing committee of the New York Stock Exchange. Vice president and director of New York Quotation Co. and Standard Safe Deposit Co., of New York.

James G. Cannon, vice president. Member of executive council American Bankers' Association. Trustee of Associated Simmons Hardware Co. Chairman of the board of H. W. Johns-Manville Co. (Y.). Director of Bankers' Trust Co. (P.); Fidelity Trust Co., of New York; Fifth Avenue Bank, of New York (Q.); Metropolitan Trust Co., of New York (U.); Security Bank, of New York (A. A.); Transatlantic Trust Co., of New York; United States Mortgage & Trust Co., of New York (F.); United States Casualty Co.; United States Guarantee Co.; and Standard Milling Co. Trustee of Franklin Savings Bank, of New York (S.).

Anton A. Raven, vice president. President and trustee of Atlantic Mutual Insurance Co. (T.). President and director of American Bureau of Shipping. Vice president and director of Home Life Insurance Co. Vice president and trustee of Metropolitan Trust Co., of New York (U.). Director of Atlantic Safe Deposit Co.; Bank of New York; and Fidelity & Casualty Co. (V.).

William Skinner, vice president. Of William Skinner & Sons, silks. Member of board of managers of Silk Association of America. Vice president and director of Pacific Bank of New York. Trustee of American Surety Co. (G.). Director of New England Navigation Co. (B.); New York, New Haven & Hartford Railroad (E.); Boston & Maine Railroad; Boston & Lowell Railroad; Boston Railroad Holding Co.; Central New England Railroad; Hartford & Connecticut Western Railroad; Maine Central Railroad; New York, Ontario & Western Railroad; Poughkeepsie Bridge Railroad; Rutland Railroad; First National Bank of Boston; Irving National Bank of New York; Massachusetts Mutual Life Insurance Co.; and Equitable Life Insurance Co.

William H. Porter, treasurer; also member of executive committee. Member of firm of J. P. Morgan & Co. (E. E.). Director of Bankers' Trust Co., of New York (P.); Chemical National Bank, of New York (W.); Astor Trust Co., of New York (X.); Astor Safe Deposit Co., of New York; Fifth Avenue Bank, of New York (Q.); Guarantee Trust Co., of New York (K.); Title Guarantee & Trust Co., of New York; Pere Marquette Railroad; Fidelity & Casualty Co. (V.); H. W. Johns-Manville Co. (Y.); and Remington Typewriter Co. (Z.). Vice president and director of United States Life Insurance Co. (D. D.). Trustee of Franklin Savings Bank (S.) and Mutual Life Insurance Co.

E. H. Outerbridge, chairman executive committee. Director of United States, Bermuda & Caribbean Steamship Co. His family, as agents for the Quebec Steamship Co., a British corporation, have had practically a monopoly of the steamship business between New York and Bermuda and between New York and the Windward Islands for over 30 years. Mr. Outerbridge is also secretary, treasurer, and director of the Pantasote Leather Co. and director of the United States Life Insurance Co. (D. D.).

Welding Ring, member of executive committee. Director of Fourth National Bank of New York and Security Bank of New York (A. A.). Secretary and director United States & Australasia Steamship Co.

Philip A. S. Franklin, member of executive committee. Vice president of International Mercantile Marine (A.). President, manager, and director of Atlantic Transport Co. (Ltd.). Director of Atlantic Mutual Insurance Co.; National Surety Co. (M.); International Elevator Co.; and Terminal Warehouse Co.

Samuel W. Fairchild, member of executive committee. Treasurer and director of Fairchild Bros. & Foster, chemists. Trustee of Bowery Savings Bank, of New York.

Darwin P. Kingsley, member of executive committee. President and director of New York Life Insurance Co. (B. B.); trustee of New York Trust Co. of New York; director of Citizens' National Bank of New York; National Surety Co. (M.); and Louisville & Nashville Railroad (R.).

Isaac N. Seligman, member of executive committee. Member of I. & W. Seligman & Co., bankers; member of advisory committee of

Audit Co. of New York; trustee of Rossia Insurance Co. of Russia; director of Anglo & London-Paris National Bank; Lincoln Trust Co. of New York; Mount Morris Bank of New York; and United States Savings Bank of New York.

Alexander E. Orr, member of executive committee. Vice president and director of Mechanics & Metals National Bank of New York; trustee of United States Trust Co. of New York (L.); and New York Produce Exchange & Safe Deposit Co.; director of Continental Insurance Co.; Federal Insurance Co.; Fidelity & Casualty Co. (V.); Harper & Bros.; and Queens Insurance Co. of America.

A. Barton Hepburn, member of executive committee. Chairman of board of directors of Chase National Bank of New York (O.); director of Bankers' Trust Co. of New York (P.); Columbia-Knickerbocker Trust Co. of New York; First National Bank of New York (C. C.); First Security Co. of New York; Fidelity Trust Co. of Newark, N. J.; Maryland Trust Co. of Baltimore, Md.; New York Life Insurance Co. (B. B.); American Cotton Oil Co.; F. W. Woolworth & Co.; Remington Typewriter Co. (Z.); Safety Car Heating & Lighting Co.; United Cigar Manufacturing Co.; Sears, Roebuck & Co.; Studebaker Corporation; and American Car & Foundry Co.

John Claflin, member of executive committee. President and director of H. B. Claflin Co.; trustee of Atlantic Mutual Insurance Co.; Commercial Union Assurance Co. (Ltd.) of London; United States Trust Co. of New York; and Palatine Insurance Co. (Ltd.) of London; director of Commercial Union Fire Insurance Co. of New York; German-American Insurance Co.; Home Insurance Co.; New York Life Insurance Co.; Astor Trust Co. of New York; Morristown Trust Co.; National Bank of Commerce of New York; and New York Life Insurance & Trust Co.

The committees of the chamber of commerce contain such names as:

Alexander J. Hemphill, president of the Guarantee Trust Co. of New York, and connected with numerous other large banking institutions.

Mortimer L. Schiff, of Kuhn, Loeb & Co., bankers, and connected with many other banking and railroad companies.

Joseph B. Martindale, president of the Chemical National Bank of New York, and connected with many other large banking institutions.

Walter E. Frew, president of the Corn Exchange Bank and connected with other banks.

The committee on harbor and shipping has for its chairman, P. A. S. Franklin, vice president of the International Mercantile Marine. The other members of this committee are Herman Winter, an official of the Cunard Line; L. B. Stoddart, vice president and director of Bowering & Co., who own and operate the Red Cross Line, a British steamship company; Charles Sooysmith, civil engineer; Gustav Lindenthal, civil engineer; Charles D. Norton, president of the First National Bank of New York; and McDougal Hawkes, lawyer.

The committee of five that handed in the resolutions of protest against the Government shipping bill had for its chairman Irving T. Bush, president of the Bush Terminals, which depends for its existence on the foreign steamship lines which use their docks and wharves.

This committee also included:

George B. Dearborn, president of the American-Hawaiian Steamship Co., which is unalterably opposed to the idea of more steamship facilities except of its own.

Jacob W. Miller, formerly of the New England Navigation Co., but now vice president of the Cape Cod Canal Co., built by August Belmont & Co., bankers. It may be well to mention that the charges of the Cape Cod Canal Co. for tolls are so high that there is a considerable agitation for the Government to step in and take charge of it.

You will therefore see that the resolutions which the New York Chamber of Commerce passed against the shipping bill are in effect the resolutions of Wall Street and the shipping interests in their most concrete form. I venture to say that the facts shown by this list of officers of the New York Chamber of Commerce and the shipping companies and railroad companies and banking institutions in which they are directors, and in which they interlock to such a large extent, will be a surprise to most of the Members of Congress.

You will note that I have also shown the larger of the manufacturing corporations in which some of the officers of the chamber of commerce are directors. My reason for this is that a few days ago some of the papers published reports to the effect that the manufacturers of the country were against the shipping bill. It would indeed be strange if the manufacturers were opposed to this bill which has for its object improvement of shipping facilities and lowering of freight rates, all of which would be decidedly for the benefit of the manufacturers. But when you note that the manufacturers who have declared themselves against the bill are controlled by Wall Street interests their action is not so strange.

Regarding the Boston Maritime Association, the membership of that association is of the same nature as that of the New York Maritime Association. It consists of the shipping people of Boston, including officials of the foreign steamship lines. They naturally are opposed to the possible competition of a Government merchant marine.

I have before me a copy of their protest, and it is like all of the protests that I have seen against this bill, very much involved and without merit. It states the same fallacies as contained in the minority report of Senator BURTON; in fact, it appears to me that the minority report made use of the Boston Maritime Association protest for much of its argument.

Yours, very truly, PHILIP MANSON.

I received this letter from Mr. Bush, which explains itself:

BUSH TERMINAL CO.,
100 Broad Street, New York, January 19, 1915.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

DEAR SIR: I inclose a copy of the report of the special committee on merchant marine to the Chamber of Commerce of the State of New York.

In so doing I desire to make it clear that the report was not adopted by the chamber, and therefore represents only the views of the committee, which was composed of men acquainted with shipping matters, but without selfish interest in vessels in foreign trade.

Yours, very truly,

IRVING T. BUSH.

So I wrote Mr. Manson that he must be mistaken about the report being adopted or the resolutions passed. He replied as follows:

THE ATLANTIC COAST STEAMSHIP CO. (LTD.),
290 Broadway, New York, January 21, 1915.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: Your letter of January 20 received, for which I thank you.

Relative to the action taken by the New York Chamber of Commerce on the shipping bill, the newspapers last Friday featured the fact that the New York Chamber of Commerce, according to action taken at their meeting the day previous, was opposed to the shipping bill.

I to-day called on the assistant secretary of the chamber, and he confirmed the fact that a resolution introduced by Mr. Bush had been voted upon and adopted. He read to me Mr. Bush's resolution, as follows:

"Resolved, That the Chamber of Commerce of the State of New York is opposed to the so-called Alexander bill and is opposed to its enactment."

Mr. Gwynne, the assistant secretary of the chamber of commerce, with whom I talked, explained to me that the Bush report consisted of two sections—one declaring that the chamber was opposed to the shipping bill, and the other recommending certain substitute plans to take the place of the proposed legislation.

Mr. Gwynne said that the portion of the report that disapproved of the shipping bill was voted on and adopted. That part that recommended certain substitutes for the shipping bill was referred back to the committee. It is being revised and will be acted upon at a special meeting of the chamber next Thursday.

In view of the foregoing I think that the only change necessary in my statement under that head is to change it to read:

"You will therefore see that the resolution which the New York Chamber of Commerce passed against the shipping bill is, in effect, the resolution of * * *, etc."

Also to change the word "resolutions" on the first line of page 9 of my letter to the singular.

I noticed a certain degree of uneasiness in the chamber officials' discussion of the matter with me. Mr. Gwynne tried to minimize the importance of the chamber's favorable action on Mr. Bush's resolution. I think their action of last Thursday is meeting with some objection among the membership.

As to Mr. Bush's statement that his committee "was composed of men * * * without selfish interest in vessels in the foreign trade," these are the facts:

Mr. Bush is the head of the Bush Terminals (docks and warehouses), which are used by the following steamship lines, all of which are strongly opposed to the shipping bill for perfectly obvious reasons:

American-Hawaiian Steamship Co., Russian-American Line, American Exporters' Line, Austro-Americana Steamship Co., Societa Anonima Trasporti Mestre, America-Levant Line, American & Manchurian Line, American & Australian Line, Norton Line, American & African Steamship Line, American & Indian Steamship Line, Dutch East Indies Line, Lloyd Brazileiro, Prince Line, Funch, Edye & Co. Lines, Royal Dutch West India Mail Line.

There may be more lines using Mr. Bush's docks and warehouses, but the above are sufficient to indicate that Mr. Bush's position in this matter is not totally disinterested.

Mr. George S. Dearborn is the head of the American-Hawaiian Steamship Co., which, as you will note from the above list, uses Mr. Bush's terminals. Mr. Dearborn's steamship company is benefiting tremendously from the present shipping situation, and is hardly likely to approve of additional steamship facilities.

Mr. Jacob W. Miller, formerly of the New England Navigation Co. (New York, New Haven & Hartford R. R.), and now of August Belmont & Co. and the active head of the Cape Cod Canal Co., which may have to fight being taken over by the Government because of the high tolls they are charging, is naturally adverse to a Government merchant marine.

The other two members of the committee, Mr. William Harris Douglas and Mr. J. Temple Gwathmey, so far as I know, have no particular knowledge of or interest in shipping. For them to conform to the views of the three members of the committee who do know the shipping business is entirely natural.

Yours, very truly, PHILIP MANSON.

On the 22d of January Mr. Manson wrote as follows:

THE ATLANTIC COAST STEAMSHIP CO. (LTD.),
290 Broadway, New York, January 22, 1915.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I inclose a copy of the shipping report of the special committee of the New York Chamber of Commerce. They are, of course, unalterably opposed to a Government merchant marine, but in trying to make out their case they have rather helped the cause of the shipping bill.

The failure of the chamber to adopt the suggestions made in the report was because of that. It was undoubtedly a surprise to the powers that be in the chamber to have this committee repudiate the time-honored Republican doctrine that a subsidy is absolutely essential for the revival of the American merchant marine, and the correlated fiction as to the high cost of operating American vessels. According to the published accounts of the meeting last Thursday there was much objection to this part of the report.

The report says that the only vital thing necessary to induce private capital to establish an American merchant marine is for the Government to guarantee the bonds of steamship companies "whose character and standing entitle them to it." They modestly refrain from saying who might qualify.

I have always maintained, based on my own experience, that there is not over 10 per cent to 15 per cent difference in operating costs between American and foreign passenger ships, and the difference is much less for cargo boats. Now the chamber of commerce committee confirms my contention.

I believe that the subsidists' claims, which they made with such positive assurance, that it costs from 40 per cent to 50 per cent more to operate American vessels, caused Secretary McAdoo, at the House hearings on the Alexander bill, and the President in his last message, to say the Government line might run at a loss for a time. The opponents of the bill have seized on this to call the bill a "disguised subsidy." Now that there is a statement from this expert committee, unfriendly to the bill yet disproving the Republicans' claim of much greater operating costs of American ships, their pretext for calling the shipping bill a "disguised subsidy" may be disposed of.

It is an absolute certainty that, if this bill is passed, the Government line will be a big financial success, assuming, of course, that competent people are in charge, and there need be no difficulty on that score.

Yours, very truly,

PHILIP MANSON.

On the 27th came more light on the shifting position of the chamber of commerce, as shown by Mr. Manson's letter of the 26th, as follows, inclosing a clipping from the Times. He says:

THE ATLANTIC COAST STEAMSHIP CO. (LTD.),
290 Broadway, New York, January 26, 1915.

Hon. DUNCAN U. FLETCHER.
United States Senate, Washington, D. C.

MY DEAR SENATOR: I inclose clipping from to-day's New York Times containing a summary of the revised report to be submitted by the special committee of the New York Chamber of Commerce on Thursday.

Inasmuch as the shipping bill's opponents are making much capital of the opposition to the bill by certain chambers of commerce, and the newspapers opposed to the bill are basing editorials on such actions, I thought it well to point out to you that the New York Chamber of Commerce committee has turned a complete somersault on the most important points in their original report.

Their original report, repeatedly and with much detail, showed the falsity of the subsidists' claim that it costs from 40 per cent to 50 per cent more to operate vessels under the American flag; that in fact the difference was 5 per cent to 10 per cent only. The report showed that because of this false belief as to the greatly increased cost of operating American vessels, American investors have been scared away from shipping investments. The report repeatedly stated that a subsidy was not necessary; that only Government guarantee of private shipping companies' bonds would enable sufficient capital to be secured with which to establish an American merchant marine.

The revised report, signed by the same men, now says that our shipping industry can not be placed on a successful basis without subsidies, and proposes "a central board to ascertain, within a very few dollars, the exact difference in cost, ship by ship and voyage by voyage, between the operation of a vessel under the American flag and under any foreign flag." The report continues: "Much as this committee would like to believe that our merchant marine can be reinstated with a smaller amount of Government aid than this report proposes, as men of experience, and looking all facts in the face, the committee is bound to say that, in its opinion, nothing substantially less than is contemplated by this plan can be expected with any sort of confidence to bring about satisfactory results on an adequate scale."

The foregoing is heralded as their answer to Secretary McAdoo's challenge in his Chicago speech for opponents to offer a practicable substitute for the present shipping bill.

It will, of course, have occurred to you that before their plan can be acted upon it will be necessary to wait until shipping conditions and freight rates become normal, as it would be quite useless for the "central board" to work with present rates and conditions.

Rates and conditions will not be normal until a long time after the war ends; no one knows how long that will be. So even if one were to give serious attention to the recommendations of this committee, which so completely reverses itself, their plan is not a practicable one, and I believe that Secretary McAdoo and also you in the Senate called for a practicable plan.

Anything to delay action is the aim of the opposition. When the Alexander bill was up last session they said: "Put it over until the next session." Had action been taken then, the Government merchant marine would have been in operation to-day. Now they say: "Postpone action until next December." (See New York Sun, Jan. 9, clipping inclosed.)

I am sorry to have troubled you to return the copy of the Journal of Commerce letter. The notation to return which it bore was an old one. The Journal of Commerce did not publish that letter. That, however, doesn't alter the facts it contains.

In case they contain facts for you not previously stated, I inclose copies of recent letters to the New York Times and the New York Sun, neither of which were published, although letters opposing the bill find instant publication in those papers.

Yours, very truly, PHILIP MANSON.

In this connection I submit some correspondence which has been placed in my hands by the Senator from New Jersey [Mr. HUGHES]. This indicates the activities of certain people against this bill and the methods employed. Here are "influences" which are "outside the Senate," and the country should know about them.

This is a letter to Mr. A. Rothschild, of Newark, N. J., dated January 15, 1915, on the letterhead of the United States Merchant Marine Association, 50 Church Street, New York City.

NEW YORK, *January 15, 1915.*

Mr. A. ROTHSCHILD,
Stengel & Rothschild, Newark, N. J.

DEAR SIR: The administration at Washington will continue to press to the limit of its power the so-called Alexander bill (H. R. 18666), proposing Government ownership and operation of merchant vessels, the Government investment to be $30,000,000 and operating losses many more millions. This is a socialistic scheme, with international ramifications. The dangers to our Government and to private business involved in this startling project are so far-reaching that we believe you will gladly help us to defeat it.

Will you not immediately write to each of the Senators and Representatives from your State and to any other Senators and Representatives in Congress whom you can appeal to—and it would be well worth while to address them all—a special letter containing your strongest arguments and protests against a proposition so obviously and overwhelmingly bad?

It could not help, but prevent, future merchant marine development. No American capital would enter the business in competition with Government owned and operated ships, and, worse yet, Government owned and operated ships could not compete against privately owned foreign vessels. Government owned and operated merchant vessels competing for private business against foreign merchant vessels owned by private interests would certainly cause international jealousy and friction and sooner or later would bring about war, a fact which of itself ought to make this socialistic scheme impossible.

We are mailing this letter to 5,000 prominent business men throughout the country, asking for a good, solid, American protest against this Government-ownership scheme. We should, and would, mail 20,000 or 50,000 letters if we had the funds for stationery and stamps. If you will inclose your check for $10, we will immediately devote the money to spreading this protest broadcast. The patriotic, conservative business people of this country can not be aroused against this peril too quickly.

I give you my personal assurance that we shall leave nothing undone, night or day, to win. Will you not write these letters? Will you not write us?

Faithfully, yours, WALLACE DOWNEY, *Director.*

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Ohio?

Mr. FLETCHER. I do.

Mr. POMERENE. If I may interrupt the Senator, I wish to say that I think that letter has had pretty general circulation. A similar letter was sent to me by a large manufacturing firm in Cincinnati, and, as nearly as I can carry it in my mind, it is an exact duplicate of the letter which the Senator has read. Can the Senator from Florida inform us as to who this association are and whom they represent?

Mr. FLETCHER. I have no information on that except, as I say, from their letterhead and the letter of Mr. Rothschild to the Senator from New Jersey [Mr. HUGHES], transmitting the letter of Mr. Downey. I really do not know. I have said I have no information on the subject, but I should say I have no information that I should feel like vouching for. It has been reported to me that Mr. Downey was once in the shipbuilding business and he may be so yet. I am not sure as to that. I really can not say as to the association. Mr. Downey appears here, and he signs his name as director.

Mr. POMERENE. Mr. President, four or five days ago I wrote to this gentleman, in substance stating to him that, in order that I might be able to determine the weight which should be given to his protest, I should like to know who composed the association, and what interests they represented; but I have not been honored with an answer to my letter.

Mr. FLETCHER. I doubt if the Senator will get any reply to that. The accompanying copy of a letter to Mr. Downey from Mr. Rothschild reads in this way:

JANUARY 18, 1915.

Mr. WALLACE DOWNEY, *Director,*
United States Merchant Marine Association,
50 Church Street, New York City.

DEAR SIR: I have your circular letter of the 15th instant regarding the proposed shipping bill, H. R. 18666. In reply thereto I beg to say that I am not afraid of any bill which may pass in regard to this matter, as I certainly think that the Government ought to do something about shipping facilities, whether through temporary Government ownership or otherwise, in order to relieve the shipping congestion and exorbitant shipping rates in force at the present time. If the Republican Party when in power had passed the necessary legislation for subsidizing American ships, the present legislation would not be necessary; but any attempt of this kind was always defeated by the shipping combinations in New York. This country did not go to ruin when a bill was passed to build the Union Pacific Railroad, and I do not believe it will go to ruin if the Government sails some merchant vessels to relieve American shipping. I do not feel, therefore, like subscribing to any obstructive campaign to relieve the present situation.

Very truly, yours,

A. ROTHSCHILD.

The letter of transmittal from Mr. Rothschild to the Senator from New Jersey is as follows:

NEWARK, N. J., *January 18, 1915.*

Hon. WILLIAM HUGHES,
United States Senate, Washington, D. C.

DEAR SIR: I received this morning the inclosed letter in regard to the proposed shipping bill, H. R. 18666. I thought it might be of interest to you to know what was being done against it, and I am therefore sending it to you with a copy of my reply thereto for your personal perusal, and with sincere regards, I remain,

Very truly, yours,

A. ROTHSCHILD.

Mr. SMITH of Michigan. If the Senator will permit me, I listened with a great deal of attention to the previous letter, and it rather indicates that this man is in favor of a subsidy.

Mr. FLETCHER. I presume he is a Republican in New Jersey.

Mr. SMITH of Michigan. Oh, no; he can not be a Republican, because he said he had no influence there in that party in obtaining a subsidy for our ocean-going ships; but I should like to know whether he regards this proposition as a subsidy, and if it is quite satisfactory?

Mr. FLETCHER. I only know what he states in his letter; but I do not find that he states that he had no influence with the party. He indicates that the Republican Party when in power should have passed certain legislation, and it rather impresses me he would have been in favor of it.

Mr. SMITH of Michigan. He indicates that it was his desire that we should pass some subsidy legislation, and he bemoans the fact that the Republicans when in power did not do it.

Mr. MARTINE of New Jersey. Mr. President, I should like to inquire was this Mr. Downey——

Mr. FLETCHER. No; the last letter was a letter from Mr. Rothschild to the Senator from New Jersey [Mr. HUGHES] transmitting a copy of his reply to Mr. Downey's letter.

Mr. MARTINE of New Jersey. I recall very well the name Downey. Mr. Downey is connected with some shipbuilding organization, I think, in the State of New Jersey or in Delaware. I myself have received several communications from him, urging that "this iniquitous bill be stayed in order that the Republic might stand." I responded to him in quite emphatic terms, telling him where I stood on the subject.

Mr. FLETCHER. That is one of the letters, I take it, which is similar to the one I first read, sent out by Mr. Downey as director.

The junior Senator from Massachusetts [Mr. WEEKS], the Senator from New Hampshire [Mr. GALLINGER], and others have inserted in the RECORD various newspaper articles which signified that the press of the country was all one way. I am tempted to refer to some clippings, which give facts in some instances and opinions in others, which are not in accord with those which those Senators have read. I do not care to wade through all of them, but I should like to insert some of them as a part of my remarks.

The PRESIDING OFFICER. If there is no objection, the request will be granted.

Mr. JONES. If it is understood that we shall take a recess when the Senator from Florida is through, I shall not object to his printing in the RECORD the matter to which he refers.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Florida for permission to insert in his remarks the newspaper clippings to which he refers?

Mr. JONES. If it is understood that we are going to take a recess when the Senator gets through, I shall not object.

The PRESIDING OFFICER. The Chair hears no objection to the request of the Senator from Florida, and it is agreed to.

Mr. FLETCHER. I make the request in order to save the reading, though I should really like an opportunity to read some of them, as I think they might do some good.

Mr. SMITH of Michigan. I should like to hear them read.

Mr. JONES. I would not object to the Senator reading them.

PRESS COMMENT AND PUBLIC EXPRESSION.

The newspaper articles referred to are as follows:

[From the New York Journal of Commerce of December 7, 1914.]

5,000,000 TONS OFF SHIP MARKET—LOSS IN SUPPLY OF VESSELS SENDS UP FREIGHT RATES—EFFECT OF WAR ON COMMERCE SHOWN IN TIE-UP OF GERMAN MERCANTILE MARINE—REGULAR LINES HAVE DOUBLED AND TREBLED CARGO RATES—CHARTER RATES INCREASED—SPECTACULAR ADVANCE IN GRAIN FIXTURES.

A total of 5,000,000 tons in mercantile ships have been lost for a time to the world's commercial activities, bringing an era of high charter and berth rates as one of the direct and important results caused by the European war.

With 7s. 9d. the top figure paid for grain tonnage and 20s. per gross ton per month for a general cargo boat, rates for full-cargo steamers continue their upward advance with little indication that the crest of the ascending movement has been reached. Throughout the past two weeks factors in the chartering market have been watching rates increase and, in view of the extraordinary tendency in this direction, have not been inclined to commit themselves as to future prospects. The dominant factors in the present chartering situation are as follows:

First. The complete tie-up of the German and Austrian mercantile marines, with their many ramifications in the seven seas, is an important factor in the movement of the world's commerce.

Second. The continued withdrawal of British steamers from commercial service for use by the Admiralty. This has been variously estimated, but authorities figure that at least 500 vessels formerly employed in commercial services are now unavailable.

Third. The improvement in the foreign exchange situation, enabling the financing of cargoes, creating a speculative activity in exports of food products, shippers being assured of quick and profitable returns.

Fourth. The increasing demand for grain from Europe, it being estimated that export purchases in this country were amounting to 1,000,000 bushels a day.

Fifth. The comparatively low levels at which war-risk insurance is obtainable, removing one of the important obstacles that hampered commerce at the outbreak of hostilities.

Sixth. The reduced services by the regular lines operating to Europe, forcing American manufacturers who have taken contracts for supplying war materials to charter vessels in order to make agreed deliveries.

Seventh. The high space rates charged by the regular lines, berth charges being from 100 to 250 per cent higher than before the war.

Eighth. Owners of vessels available for charter are demanding compensation on a time basis in order to avoid losses in the event of being held up by the British authorities for examination and the probability of delay at the discharging ports in Europe, where the best dock facilities have been commandeered by the warring Governments.

It has been estimated that fully 5,000,000 tons in commercial shipping have been taken from service. The following table shows how tonnage has been affected by the war:

	Number.	Gross tons.
Total German and Austrian steam tonnage	2,438	3,507,331
British vessels commandeered	[1] 500	[1] 1,700,000
British vessels seized by Germany	88	[1] 265,000
Vessels lost by mines, etc.		330,683
Total		5,803,014

[1] Based on reliable estimates.

These figures are not entirely complete and do not include any other losses of French, German, Austrian, or Turkish vessels. It is therefore safe to infer that at least 5,000,000 tons have been taken out of the market.

The total German mercantile marine, including both sail and steam vessels of over 100 tons, amounts to 2,321 vessels of 5,082,061 tons. It is estimated that German shipping of a gross tonnage of 672,475 tons has been seized by the British authorities, while 406 German vessels, with a total gross tonnage of 974,226 tons, has been captured or sunk by the allies. In Russian ports German shipping to the extent of 114,488 gross tons has been seized, while a considerable amount is held in French ports. When the Germans captured Antwerp 32 German vessels, amounting to 114,000 tons, seized by the Belgians, were blown up by the retreating British troops.

The following tabulation shows the actual tonnage of the maritime nations having over 1,000,000 tons in mercantile shipping at the beginning of this year:

	Sail and steam.	Gross tons.	Steam.	Net tons.
British:				
United Kingdom	9,214	18,696,237	8,514	11,109,560
Colonies	2,073	1,735,306	1,495	915,959
Total	11,287	20,431,543	10,009	12,025,519
American:				
Sea	2,696	2,908,457	1,209	1,280,958
Lake	627	2,382,690	593	1,724,566
Philippine	77	46,409	69	27,080
Total	3,400	5,427,636	1,871	3,032,604
German	2,321	5,082,061	2,019	2,877,887
Norwegian	2,191	2,457,899	1,597	1,122,577
French	1,552	2,201,164	987	1,029,113
Swedish	1,436	1,047,270	1,043	551,964
Austrian	427	1,011,414	419	629,444
Dutch	759	1,309,849	662	794,840
Italian	1,114	1,521,942	591	773,818
Japanese	1,037	1,500,014	1,037	956,702

RATES DROPPED WHEN WAR STARTED.

With the advent of the war chartering rates slumped heavily. Many steamers that had been fixed in June and July for August loading were canceled, causing a surplus of tonnage in Atlantic ports. Owners of these vessels were glad to take any rate in order to keep their vessels in operation, with the result that a large volume of tonnage was fixed at figures under 2 shillings for various kinds of freights and voyages. One grain vessel was taken at Montreal to the United Kingdom with grain at 1s. 9½d. This was the lowest rate touched in the downward movement. On last Saturday the highest rate for grain to the United Kingdom from Baltimore (Montreal now being closed) was 7s. 9d.

The downward movement did not last very long, however. It continued through the month of August. The high rates demanded for war-risk insurance were a repressive factor, but when the European governments began to take stock and found that war supplies were urgently needed, and orders began to pour in on American manufacturers, the first improvement in charter rates came into evidence.

The surplus of tonnage gradually diminished and then chartering factors began to perceive that a scarcity was inevitable. This was attributed to the tie-up of German vessels, and it was at once seen that the volume of freight that was to be moved from the United States to Europe would necessitate the use of steamers of other neutral nations. Numerous small Norwegian, Swedish, Dutch, Italian, and Greek steamers, that never before had made trans-Atlantic voyages, were chartered on the other side to come here and take away merchandise.

The European Governments, belligerent and neutral alike, took an active interest in the chartering of steamers, so that the much-needed supplies of war materials and foodstuffs could be secured from this country without delay. Rates for full cargo vessels began to advance, and when 3 to 4 shillings was paid for grain tonnage charterers thought that the crest of the advance had been reached. Then word began to filter in that British tonnage, formerly available for commercial services, was being withdrawn for war purposes at a steady rate. First estimated at over 1,000 vessels, shipping authorities now feel that fully 500 steamers, ranging from 2,000 to 8,000 tons, are in the employ of the British Admiralty.

With the volume of freight constantly increasing and the prospects of fewer vessels being available, charter rates continued their upward trend. Starting about the middle of October, rates moved higher week by week without a reaction of any sort up to the present, when further advances are anticipated.

PREDICT 10 SHILLINGS FOR GRAIN.

Chartering factors who were interviewed on Saturday declared that 10 shillings for grain tonnage was a probability before the end of the year, while rates for other commodities would also continue to advance.

When the St. Lawrence closed, recent grain charters have been made out of the leading American ports. New York, Boston, Philadelphia, Baltimore, and Galveston are dispatching from two to three steamers a day each with full cargoes of grain. In spite of this heavy movement which has continued for over two months, the demand from Europe has not been satiated. Chartering of grain tonnage during the past week for December and January loading indicates that the heavy movement will continue well into next year.

One factor in the grain situation is that exports from the Argentine will be resumed in January. A cable received by the National City Bank on Saturday from its branch in Buenos Aires follows:

"The minister of agriculture of the Argentine Republic requests you to advise shipowners generally that excellent grain rates will be obtainable here from January to July for steam and sail tonnage."

Additional cable advices to the National City Bank report that the exportable surplus of grain from the Argentine will be as follows: Wheat, 135,000,000 bushels; oats, 75,000,000 bushels; linseed, 60,000,000; and corn (estimated), 40,000,000. It is also reported that the corn crop is now completed, wheat by January 15, oats by December 31, and linseed by December 15.

URGENT DEMAND FOR COTTON.

In the past month the foreign demand for cotton has grown to large proportions, but the volume of chartering has not been very heavy. One of the most important factors in this trade is the movement of cotton to Germany. American tonnage is absolutely essential for this movement in order to secure war-risk insurance. Cotton landed in Germany is worth from 14 to 18 cents per pound, while the average price here is about 8 cents. The factors in this movement who have chartered five American steamers to load during the early part of this month are charging from 2 to 3 cents per pound freight rate, as compared with 30 cents per 100 pounds paid for the same movement at this time a year ago.

Recently quite a few foreign vessels have been chartered to take cotton to Scandinavian ports, receiving from $1 to $1.30 per 100 pounds. The higher freight rate obtainable on grain charters has, however, caused vessel owners to ignore the cotton movement. But with the demand for cotton urgent and shipper seeking tonnage, rates will no doubt advance to a level that will make cotton a competing factor with grain.

The American steamers that have been taken for cotton movement are being compensated on a basis that will yield almost one-half of the value of a good-sized steamer in two trips. It is reported that a small vessel of 1,414 net tons will receive $20,000 a month, while several vessels of larger capacity are to receive proportionately greater returns.

HOW CHARTER RATES COMPARE WITH A YEAR AGO.

In December of last year, with the charter market holding fairly steady and normal trade conditions obtaining, grain tonnage from Baltimore to the United Kingdom and the Continent was obtainable at — 10½d. On Saturday similar charters commanded 7s. 9d. and upward. Cotton fixtures a year ago to Liverpool, Manchester, or Bremen were made at 25s. to 27s. Rates now range from $1 to $1.30 per 100 pounds. Last December general cargo boats were obtainable at 13 shillings. Now tonnage can not be secured under 16 shillings for the trans-Atlantic trade.

BERTH RATES MORE THAN TREBLED.

The regular lines, operating with a fewer number of vessels and sailings of the German lines stopped, have advanced berth rates from double to treble the rates in force at this time a year ago and, in fact, effective just before the outbreak of the war. The following comparative table shows the berth rates effective on Saturday, those quoted early in September when the rates first began to move upward, the charges made at the beginning of July when normal conditions obtained, and the rates demanded in December a year ago:

LIVERPOOL.

	Dec. 5, 1914.	Sept. 5, 1914.	July 1, 1914.	Dec. 5, 1913.
Grain	7d.	2½ @ 3d.	2½d.	2½d.

[From The New York Press of December 14, 1914.]

A BIG MERCHANT MARINE FOR BIG FOREIGN TRADE.

Since the storm of war burst over Europe the disadvantage and folly of being destitute of a great and flourishing merchant marine such as this country once possessed has come home to the American people with stunning force.

We are a trading nation. We trade with all the world. The sum total of our foreign commerce has become a prodigious thing; it grows with the years, the months, and the very days.

In the last half dozen years our foreign trade has risen from some $3,000,000,000 to some $4,000,000,000 a year. Even with the disturbance caused first by the new tariff and then by the war, our imports for the twelve months ending with last September were $1,874,776,939; our exports were $2,218,134,580, or a combined total of very nearly $100,000,000 more than $4,000,000,000.

Now, as we are always to be a trading nation, and as we mean never to be at war because of any spirit of aggression on our part, what an inconsistent, stupid, irrational thing it is that we, who are to be far and away the greatest international traders in all the world, and that we, who are more immune from the natural causes of war than any other great power in the world, should have our vast foreign commerce entirely at the mercy of the other powers.

Just for lack of ships. Our neutrality is of no avail if other powers at war can not let us have their ships to freight our cargoes across the seas. Our stupendous products, the greatest surplus of food or of anything else, can be of no purpose in foreign trade whenever those nations upon whose ships we must rely to carry our exports as well as our imports are not free to sail the oceans.

We have relied upon Germany to carry a very considerable part of our foreign trade, not only as between us and Germany, but as between us and other corners of the earth. The fleets of the allies have driven the merchant fleets of Germany off the seas. And so, though we are at peace with all the world, though we have a surplus of products in all manner of things, and though many peoples in this hemisphere and in the other hemisphere have been beseeching us to send them some of our supplies, we have not been able to respond to the fullest measure of their demands and to the fullest capacity of our supplies, because we lacked those German ships upon which we had been dependent for a certain part of our overseas traffic.

We have had the use of British vessels, or rather such vessels as Great Britain and France could spare for our traffic, and with these we have had to make out as best we could, doing no trading at all with many, many cities and lands begging us to send them food or goods or whatever it might be they wanted.

But conceive what it would mean to our neutral commerce if, instead of England having swept the seas clear of the German merchant marine, the Germans had swept the seas clear of the British fleets of commerce.

And conceive what it would mean to us if there were so nearly an even balance of sea power between Germany and England that the command of the seas were still in question, were being contested on all the waters of the globe. Then it would be as unsafe for English merchantmen to be abroad on the high seas as for German merchantmen.

We should still be neutral. We should still have abundant surplus supplies. The rest of the world would be asking for our surplus supplies, but we should be able to get no ships at all to carry our over-seas commerce.

What a position for a Nation to be in when it is destined to be the greatest trading Nation in the world! What a preposterous thing that its foreign commerce, even as between neutrals and neutrals, should always have to suffer just as if it were at war, just as if it were bottled up as Russia is bottled up by Germany and as Germany is bottled up by England.

But, peace or war, it is economic lunacy to be building the greatest foreign trade of all nations and yet to be permitting other countries to dictate the ocean freight rates, the insurance rates, and similar charges that foreigners might exact from our vast foreign commerce to eat up all its possible profits and advantages.

Conceive, if you will, a foreign trade not of $4,000,000,000 a year, but of $10,000,000,000 a year. It is just as sure that we shall go to the $10,000,000,000 from the $4,000,000,000 as that we have gone in no very long time from a few hundred millions to forty hundred millions.

And then conceive that this vast foreign trade of ten billions a year divides itself evenly, or nearly evenly, into imports and exports. Conceive that it divides itself into $5,100,000,000 of exports and into $4,900,000,000 of imports—or a trade balance in our favor of $200,000,000 a year.

But conceive that to get that trade balance of $200,000,000 in our favor on ten billions of foreign trade we have to pay freight, insurance, and similar charges twice or three times, even four times as much!

The net result of doing that sort of business is clear, isn't it?

If we are to be the greatest trading Nation in the world, we must have a great merchant marine to carry our foreign commerce whenever wars among other powers deprive us of their merchant marines, which are the only bottoms we now have to do our carrying for us.

But if we are to be the greatest trading Nation, and if there are never to be any more wars by anybody anywhere, we still must have a great merchant marine to save for ourselves hundreds and hundreds of millions of ocean freight charges a year which can sponge off all our trade credits abroad and leave us very much to the bad to boot.

[From the New York Journal of Commerce of November 16, 1914.]

CHARTERING MODERATE—STEAMERS IN URGENT DEMAND FOR PROMPT LOADING—RATES STRONG AND TENDING UPWARD—SCARCITY OF BOATS AVAILABLE FOR NOVEMBER-DECEMBER LOADING.

A moderate amount of chartering of a miscellaneous character was reported in the steamer market, including several boats for grain and cotton cargoes to Europe. There is no falling off in the general demand for tonnage, and, as has been the case for some time past, the bulk of the orders are for prompt boats for trans-Atlantic business. Rates are very strong and continue to favor owners, due to the scarcity of boats in position to make November-December delivery at the loading ports. Grain freights offer freely, and there is an increasing demand for cotton carriers from South Atlantic and Gulf ports. In other of the trans-Atlantic trades, such as coal, deals timber, and general cargo, there is a steady moderate demand. Tonnage is also wanted for long voyage and South American business, but boats offer sparingly for business of the kind. The sail-tonnage market continues dull, and there are no indications of improvement in any of the various trades, and but little is doing in chartering.

[From Journal of Commerce and Commercial Bulletin, Monday, January 11, 1915.]

EXTRA SAILINGS TO MOVE OCEAN FREIGHT—BERTH-ROOM RATES STEADY, WITH TENDENCY HIGHER—STEAMSHIP LINES HAVE DISPOSED OF MOST OF EARLY GRAIN SPACE—MARCH AND APRIL SHIPMENTS TO UNITED KINGDOM IN DEMAND—LINES USING CHARTERED VESSELS TO COPE WITH FREIGHT.

In order to cope with the heavy movement of freight to Europe the trans-Atlantic lines have scheduled quite a few extra sailings during the months of January and February. Inquiry at the offices of various lines and among the large forwarding houses indicate that the volume of merchandise bound to the other side shows no falling

off. In fact, the demand for cargo space tends to indicate an increased movement during the fist quarter of the new year.

Quite a few of the large trans-Atlantic lines have already disposed of their grain space for the balance of this month and for part of February. Grain-berth rates to the west coast of England are holding firm at 9d., while an extra half-pence is charged to the east coast ports. It was stated on Saturday that the recent activity in the grain market portends a continuation of the heavy movement of wheat, flour, oats, corn, and rye to Europe. Sales of grain for export during the past week have been estimated at 7,000,000 bushels. During the latter part of the week just closed, quite a little berth room for grain, April loading, to the United Kingdom was disposed of at 9d. The demand for cargo space to the Mediteranean still continues in excess of tonnage facilities, and on Saturday 12d. was being paid for late January and February loading.

To London the Atlantic Transport Line has scheduled 10 sailings beginning January 14 to February 13. The steamers *Manhattan* and *Manitou* are to be dispatched on Thursday, to be followed by the *Minnetonka* on Saturday. The *Marquette* sails January 20; *Menominee* and *Kansas*, January 23; *Minnewaska*, January 30; *Minneapolis*, February 6; *Manitou*, February 10; and *Minnehaha*, February 13.

Twelve sailings to Liverpool have been arranged for the period between January 13 and February 6. The *Megantic* (White Star), sails on January 13; *Orduna* (Cunard) and *Philadelphia* (American), January 16; *Georgic* (White Star), January 19; *Lapland* (White Star), January 20; *St. Louis* (American), January 23; *Transylvania* (Cunard), January 23; *Baltic* (White Star), January 27; *Lusitania* (Cunard), January 30; *Arabic* (White Star), February 3; *New York* (American), February 6; and *Franconia* (Cunard), February 6.

The Wilson Line is receiving a large amount of freight for transportation to Rotterdam with transshipment at Hull. The *Buffalo* sails on the 16th, to be followed by the *Marengo*, *Ghazee*, and *Morocco* on January 23, the *Aleppo* on January 27, the *Colorado* on January 30, and the *Francisco* on February 6.

To Glasgow the Anchor Line has the following steamers: *Anconia* on January 21, *Cameronia* on January 30, and *Tuscania* on February 13, while the Bristol City Line will dispatch the steamer *Wells City* on January 16, *Bristol City* on January 23, *Exeter City* on January 30, *Kansas City* on February 7, and *Chicago City* on February 14.

Sailings to Christiania and Copenhagen are planned by the Scandinavian-American Line as follows: *Tomsk*, January 16, and *Oscar II*, February 4. The Swedish-American-Mexican Line will send the *Nordpol* on the 13th; *Inland*, 14th; *Sydland*, the 18th; *Preston*, the 23d; *Balto*, the 28th; *Sorland*, 30th; and *New Sweden*, February 5 to Gothenburg. The Barber Line will sail the *Taurus* to Gothenburg on January 31.

Holland-America Line sailings to accommodate the increased movement of foodstuffs to the Continent are as follows: *Zyldik* and *Gorredyk* on January 11; *Nieuw Amsterdam*, the 16th; *Sommelsdyk*, January 19; *Potsdam*, the 23d; *Rotterdam*, the 28th; and *Ryndam*, February 2.

The French Line, Fabre Line, Greek Line, and the Italian Lines will each have several sailings during the month.

Not only from New York is the movement of trans-Atlantic freight very heavy, but also from Boston, Philadelphia, Baltimore, Newport News, Norfolk, and Savannah quite a few steamers are to leave with shipments of foodstuffs to relieve the scarcity in Europe.

The tendency in the cargo space market is upward. The demand for tonnage in the various trades shows no abatement, while the supply of available steamers does not begin to approach the requirements of the trade.

—

[From the Marine News of January, 1915.]

FREIGHT MARKETS OF THE MONTH.

* * * * * * *

No more than a year ago a steamer was thought to be doing well if earning under charter $5,000 a month. It now excites little astonishment to hear of her receiving $50,000. Carriers of grain are now getting 8½d. and 9d. in freight money, compared with 2d. and 3d. half a year ago. The rate for general cargo had similarly advanced from 10s. to 30s.

But cotton has for the time being become the dominant factor. The freight rate for cotton advanced toward the end of last year from 35 and 40 cents to $3 a hundred pounds. To put it in another way, the cotton freight rate is from 2 to 3 cents per pound as compared with 30 cents per hundred pounds paid a year ago.

In the scarcity of tonnage available for the cotton movement American steamers were engaged recently, receiving compensation on a basis that yielded almost one-half of the value of a good-sized steamer in two trips. A year ago grain tonnage from Baltimore to the United Kingdom and the Continent was obtainable at 1s. 10½d. Similar charters have now commanded 7s. 9d. and upward. For general cargo boats which were obtainable at 13s. can not be procured under 16s.

With the trans-Atlantic cotton rate of $3 taken as the basic rate, all other rates automatically rose in sympathy. This brought about its own check, and by the end of the year a falling off was noticed in westbound trade. The employment of chartered boats to carry special exports from Germany, like aniline dyes, potash, and other chemicals, put a further premium on bottoms, while the employment of vessels for relief supplies at heavy prices further enhanced tonnage rates.

Owners naturally held back their boats, waiting higher bids. The effect of this was seen particularly in the Rotterdam trade, when the Holland-American Line, finding that the westbound freight offering was falling off, ceased chartering on the liberal scale which had led them to engage more than 20 supplementary vessels. Tonnage prices became so prohibitive that other intending charterers retired from the market for the time. The difficulty of procuring freight space was thus materially increased, especially on the ships of the smaller regular lines of the neutral countries. Since most of the available space was taken up with foodstuffs and materials which the various Governments were taking for their own use, miscellaneous cargo was shut out and much left behind to congest the piers and warehouses.

Delays in contract deliveries and cancellations of orders consequently served to increase the irritation of shippers. Complaints found expression at Washington through the reports made by the Secretaries of the Treasury and Commerce to the Senate in response to the resolution calling for an investigation of the advance in ocean freight rates.

The first American steamer to arrive at Rotterdam was the *A. A. Raven*, from Wilmington, with 6,600 bales of cotton. The freight charges were reported by cable to be $10 per bale, or five times the normal rate. The rate from Galveston to Bremen, according to the report of the Commerce Committee of the Senate, is ten times that which prevailed a year or more ago. The rates were driven higher by the alarmists' reports about the navigation in the North Sea, while underwriters show a strong disposition to refuse to take risks excepting at premiums which altogether offset the prospects of exceptional profits. Meantime the great activity of the shipyards in England with orders for new tonnage and the large amount of second-hand tonnage likely to be put on the market helped to strengthen the opinion that the only cure for high freight rates would be the inevitable increase, sooner or later, in the supply of tonnage, the trouble thus working out its own cure. At the end of the year rates were advancing in other routes in the Far East and Australian trades. The South African agents found it necessary to advance their rates, and in the coast-to-coast route the low rates which had been set on the opening of the Panama Canal similarly took a strong upward tendency.

—

THE SHIP SHORTAGE QUESTION.

[Tampa Times, December 23.]

The Savannah (Ga.) News delivers itself of an editorial on the ship purchase bill which is well worthy of perusal. Says the News:

"The Senate Committee on Commerce is going to hold open hearings to determine whether there is a shortage of ships at this time to transport American products. The committee will quickly be convinced that there is. The evidence of it is apparent at this port and, it is fair to assume, at other ports. Practically all of the German ships engaged in the ocean carrying trade are now locked up in either home or foreign ports, and there are scores if not hundreds of them, and hundreds of British ships are in the public service as transports. The amount of American products to be transported abroad is as great as in any previous year, if not greater. No better evidence of a shortage is needed.

"The President is insisting that the Government shall begin the building up of a merchant marine by buying and building merchant ships. His purpose is to lead the way, since private capital does not seem to regard ships as a good investment. It is true, of course, that American ships can not be operated successfully in the foreign carrying trade in competition with foreign-owned ships under existing conditions, but it is clearly the purpose of the President to bring about a change in these conditions. If the Government owns ships, as is proposed, Congress will have the evidence brought home to it as to what changes in our navigation laws are necessary to make it possible for American-owned ships to compete successfully with foreign-owned ships.

"Of course, the Republicans are going to oppose changes in our navigation laws because of the protective principle in them. They have always advocated the building up of a merchant marine by means of subsidies. But a subsidy system within reason can be made to assist only swift, mail-carrying steamers. What this country particularly needs are freight carriers.

"If Congress should appropriate money for the purchase or construction of ships to be employed in commerce, they would be of a sort that could be used as transports or colliers, of both of which the Government is greatly in need. In transporting troops to Vera Cruz the Government had to hire ships at a very great cost, something like $1,000 a day for each ship. The money it paid out for transports in that little affair was enough to build several large merchant ships. So if the President's plan of inaugurating the building of a merchant marine were adopted the cost to the Government would be practically nothing, since when it desired to go out of the ocean carrying business it could turn the ships over to the Department of the Navy, which greatly needs transports and colliers.

"It is doubtful if this Congress will settle this question of using the Nation's money to build up a merchant marine, but it is almost certain that the next Congress will. Government ownership of merchant vessels for a time is the most practical way of sweeping away the barriers that prevent the United States from having a great merchant marine."

THE SHIP-PURCHASE BILL.

Republicans in Congress and the Senate, who are lined up against the ship-purchase bill, are identically the same as those who tried to pass the ship-subsidy bill—a measure that did not propose to have the Government own or have any voice in the ownership of ships. It was a big benefit to private owners, and one on which the Government was to pay the freight. The arguments used for a ship-subsidy bill were that the shipping of the world was inadequate to the task of carrying all the trade of the world, and that in consequence the United States, being one of the smallest ship-owning countries, her trade suffered more for lack of ships than any other country. The further argument was used that the cost of labor in this country was so great that American ship builders and owners could not build and man the ships at as small a cost as other countries could do it, therefore there must be concessions from the Federal Government to enable the owners to exist as a business proposition.

Now that the Federal Government proposes to step in and do for the people of this country and our business interests what these men were willing that the Government should pay to have done, they are opposed.

There is no logic in the situation. There is little logic in anything a Republican Senator, who has always had his nose in the pork barrel, would do or would not do. The whole thing that invites this opposition to the ship-purchase bill is that the measure provides that the Government itself shall build or buy ships and operate them, and if there is a profit that profit shall go to the Government, as would any loss that might occur. This seems to be the only reason for opposition, that the passage of the bill would forever bar the way to any subsidies to private owners.

There has never been a time since the United States became a Nation that it is as important as it is now for us to have a merchant marine. It is an opportunity as well as a duty we owe the balance of the world. We are the only great, resourceful, producing nation not at war, and we are the reliance of all the other neutrals to keep things going along a straight line until the havoc in Europe is ended.

—

[From the New York Tribune, January 20, 1915.]

SHIPS EARNING VALUE IN YEAR—HIGH FREIGHT RATES YIELDING GREAT PROFITS TO OWNERS OF STEAMSHIP LINES.

At the present freight returns for all commodities being shipped from American ports steamship interests are reported to be making large enough profits to pay back the cost of their ships within a year. A man connected with the export department of one of the large oil companies finds that it is almost impossible to get freight room for oil exports to South America because most of the lines formerly going from North American points to the southern continent have been diverted to European trade or are interned. On inquiry it was stated to him that

ships used in European trade "pay for themselves within a year at the present average freight rates."

An exporter found the average freight rates from ports in the United States to various European points were more than $20 a ton at the present time, while for the same lines and the same articles the normal average before the war started was $3.20 to $3.40 a ton.

One textile manufacturer, who exports largely to continental points, had a contract rate with one line. Large amounts of goods were to have been shipped by this line several months ago and were delivered to the agents. After several weeks the shipper found them still on the dock, and discovered also that all other contract goods had been left there, while the ships had been crowded with goods paying the ruling freight rates. The shipper went to the representatives of the Government under which the line was registered. His complaint was taken up after considerable delay, and the line finally was ordered by its Government to take his goods.

MR. M'ADOO'S SHIPPING QUEST AND WHAT SHOULD COME OF IT.

Secretary McAdoo's call for information concerning the scarcity of ocean-going vessels, the lack of cargo space, and the high ocean freight rates exacted by those vessel owners who have space to offer should have the widest publicity.

It has a vital bearing upon the question of the rehabilitation of our American merchant marine.

"The Secretary of the Treasury says that letters already received show that the scarcity of vessels is so great and the freight charges are so high that American foreign trade is being seriously handicapped."

This official statement should put a quietus upon the chief argument advanced by certain newspapers—notably the Times and the Evening Post—against any governmental effort to build up and extend our merchant shipping.

To every suggestion for the purchase or building of ships by the United States Government to replace those withdrawn from the lanes of commerce by the war these newspapers have vehemently objected. "There are plenty of ships," they cried. "What is needed is cargoes, not ships. Cargo space is going begging." And so on, until the few readers dependent for knowledge of public affairs upon newspapers of this type might well have believed that there was no need for a larger ocean shipping list—American or otherwise.

Of course anyone with intelligence enough to read the sailing lists in the daily newspapers could see for himself that the course of these opponents of a truly national policy was one of deliberate falsehood. The published sailing lists, however do not cover fully the carriers of 75 per cent of ocean cargoes—the "tramps," or other purely freight-carrying ships. It is among these that war's demands for auxiliary ships and the high rates of war insurance have caused a scarcity of available cargo space.

Mr. McAdoo's inquiry will elicit facts with which the shipping community is well enough acquainted, but which it is well to have in official form. But when he has the facts, what is he going to do about it?

* * * * * * *

When Mr. McAdoo's inquiry has demonstrated, as it infallibly will, that American commerce is handicapped and hobbled by a lack of ships to carry it on, the National Government should proceed to provide those ships. But it should not go about it in a way to provide fat pickings for a lot of favored politicians and contracts a few years hence, when the shipping lines have proved profitable.

"American ships for the American people" should be the guiding maxim; a small group of beneficiaries of public favors are not to be regarded as the American people. What the Government builds and develops it should hold for the common good. The blunder of Pacific railroads must not be repeated on the ocean.

[From the New York American, Thursday, January 21, 1915.]

STUPID AND UNPATRIOTIC FIGHT ON SHIPPING BILL.

In the fight they are leading against the bill providing for a merchant marine the filibustering Senators are fighting against the people of the United States.

Every day that they succeed in prolonging their filibuster is a day lost to American commerce.

This country needs ships. It needs them now. Until it has them its commerce must stagnate. Until there is a way open over-seas American goods must remain in storehouses, or taking the long chance of falling into the hands of countries for which they were never intended and which will never pay for them.

The bill has defects. That is admitted. But defects can be remedied. There is plenty of time for that.

The crying need of the moment is ships. The United States must buy those she needs for immediate use. She must build a fleet of her own as soon as possible.

Filibustering Congressmen and Senators must get out of the way. It is stupid and unpatriotic to oppose the bill. It is fighting against the immediate interests of the whole people.

None of the Senators in this filibuster has any argument to offer that can compare with the argument which grows out of the real needs of the American people.

Here is a case which requires the assistance of every patriot in Congress, which demands the use of all the influence the Executive can bring to bear.

The prosperity of the Nation, now and hereafter, depends on the upbuilding of its merchant marine. Delays are worse than dangerous in this case, they are calamitous.

If the opponents of the bill can not be made to see the truth, they must be suppressed. The fight they are making on an immediately necessary measure is too dangerous to be tolerated.

—

[From the Tampa Times, January 23, 1915.]

PASS THE SHIP-PURCHASE BILL.

Secretary of Commerce Redfield put some concrete facts before the National Convention on Foreign Trade at St. Louis yesterday concerning the feeling of Great Britain and France toward the proposed law to enable the United States Government to purchase ships and put them in the ocean freight-carrying trade. Mr. Redfield, who ought to know, says Great Britain does not object; and from equal knowledge of the condition of the ocean freight-carrying business he is authority for the statement that the shippers in this country are being robbed right and left by the steamer owners.

Dealing with the statement made by various opponents to the ship-purchase bill—it was rather a coincidence that Senator Lodge of Massachusetts was making the statement before the Senate at Washington even as Mr. Redfield was addressing the convention at St. Louis—that the United States is working in the interest of Germany and intends to buy German ships now interned in this country, thus actually aiding the German Government, the Secretary of Commerce uttered a stout denial and backed his statement with fact. He showed that offers to sell outright had been made in any number of instances recently by English and French shipowners, who are anxious to get out of business until their countries are through fighting. "Last week we could get English ships immediately; buy them by cable. I have propositions here now," said the Secretary. "I am getting weary of being told not to do certain things which we never thought of doing."

Mr. Redfield had with him letters and contracts showing that ocean-going freights had advanced as much as 300 to 400 per cent, and that shipowners are constantly breaking contracts and compelling shippers to pay exorbitant advances.

"The Panama Steamship Co. earned a profit of $314,000 from its steamship operations in the 12 months ending June 30. That was after charging 6 per cent per annum depreciation on the ships," said the Secretary. "Extortion is closing American factories to-day and causing cable-stop orders at the time of our biggest opportunity. The violation of written contracts by shipping companies makes the robber of the middle ages look like a public benefactor."

Mr. Redfield said the steamer lines were doing things just now that would land any railway man who attempted similar holdups in jail. He continued:

"Two groups of private interests have asked that we hold up what we propose to do, and when I have asked them in return what they would do I got silence only. They come to me with prospectuses of steamship companies, admirably drawn, and the people are of the highest character and are sincere. When I put squarely to them this question: 'Will you operate a line of steamers that will take into primary consideration the interests of American commerce, that will take into account all the circumstances of the times, the extra cost arising from war risks, the delays, and the extra insurance' they say nothing."

The shipping interests are busy at Washington in an effort to kill a measure which, if enacted into law, is destined to build up our merchant marine and relieve our shippers of the extortion now being practiced.

—

[From the Washington Post, Monday, January 25, 1915.]

PROVIDING AN AMERICAN MERCHANT MARINE IS A NATIONAL NEED, NOT A PARTISAN ISSUE.

Providing the Republic with a merchant marine to fly the country's flag should not be made a political nor a partisan question.

For more than 30 years the Republican Party has failed in every respect to keep the pledges of its national conventions upon this subject.

The Democratic Party in its years of political power has made no better record as to its promises of a merchant marine.

For more than 10 years the Post has persistently urged action by the Congress upon this subject of such paramount importance to every citizen of the United States, but it was not until the present crisis as to ocean transportation arrived that serious efforts in Congress have been put forth to secure the needed legislation.

The losses in cotton to the planters of the South during the year 1914 would have paid for a score of dreadnaughts and for the construction of 100 first-class steamship freighters, and those losses could have been prevented if the Nation had possessed the ships.

As it is, the people have sustained the losses, and both dreadnaughts and steamships will have to be provided if the survival of our commerce is to be regarded.

Both political parties have been guilty of criminal neglect as to this, and both parties should unite to give the country the very wisest and the best legislation to provide for the present and the future.

Several things are clear as to what must be done if the interests of the Nation are made the prime object of the legislation.

Private capital alone will not and can not provide the country with a satisfactory service. Private capital has not occupied to any considerable extent the field vacant now for nearly 50 years. Private capital is fully aware of the cost and the impossibility of its competing for the world's ocean transportation as against cheaper vessels, lower-waged crews, efficient organization of foreign shipping combines subsidized in various forms by foreign Governments. Private capital in the United States is just as selfish and avaricious as is private capital abroad, and private capital in control of the operations and of rates would mean combination with foreign shipping combines and no relief to the interests of our merchants, our manufacturers, or those of the masses of the people of the United States.

The control of operation and of rates should lie with the Government, and the financial support in some form must be given by the Government, otherwise this country must remain at the mercy of its commercial competitors.

The Post does not advocate the administration measure as it stands to-day. It can be greatly changed for the better, amended, and transformed to serve the country in a practical, permanent, and successful way; and the leaders of the Democratic Party are but delaying action upon a vital national affair if they persist in trying to force the measure through as it reads at this time. They are doomed to failure in any such attempt.

The Republican Party has had 40 years of thought on this subject. What conclusion has its representatives in Congress reached? What measure have they to present as the line of Republican thought and action on this issue?

They have been charged with evolving no new idea on any political topic during the past 30 years. Are they about to plead guilty so far as the merchant marine of the United States is concerned?

They can not afford to play only the rôle of obstructionists to a Democratic bill. Let them prove their statesmanship by offering some better measure, by pointing out the defects of the present bill, and offering practical remedies for such defects.

The Republic must have legislation quickly for the establishment of its own marine.

The Post looks solely to the advancement of the interests of the country and to the prosperity of the masses of the people and considers both political organizations pledged to these results.

Partisanship should be set aside, political considerations promptly dismissed, and the Members of the Congress of all parties should unite upon legislation that will meet the demands of the American people.

[From the Florida Metropolis.]

AMERICAN MERCHANT MARINE.

There has never been an opportunity and duty like the present since the American Colonies declared their independence in 1776 and became the nucleus of a Nation. That duty lies along the line of producing and supplying the world with food and clothing and the necessities of life while Europe wars. The opportunity lies in seizing the trade openings all over the world and putting American products of mine and mart and factory into every nook and corner of civilization.

Europe has left the plow and the forge and the machine shop and the ship to pursue the dark death valley of war and waste, and America is the last of the great nations left to supply the world while Europe wars.

What does it matter if we raise crops doubly great, and if our factories increase their output twofold, if our foodstuffs, clothing, and supplies lie and rot in our fields and factories and on our docks and in our storehouses? What does it benefit Europe or us?

There is but one way to avoid such a calamity as that, and that one way lies in the buying or building and operating in this country under the American flag a merchant marine not only large enough to carry everything we have to sell, but everything that must be transported from place to place the world over, to continue trade and industry among the nations of the earth.

Commerce has been the forerunner of civilization. Had it not been for trade there would not to-day be half the globe covered with civilized people that are now representing civilization and human progress and enlightenment. It is trade that must keep the fires burning on the altars of civilization. It is trade that must supply the world with food and raiment while Europe wastes her men and her energies and her opportunities on fields of battle.

No other nation that is neutral stands any show of being able to build, man, and operate ships. It is left for America to do that. Our own prosperity and progress depends on our doing it, and we must do it now.

The Democrats in Congress and the Senate have made a start in the right direction to secure a merchant marine. The ship-purchase bill is not on as broad a scope as it should be, but it is a step in the right direction. It is a movement that means the accomplishment of great things for America, and every American citizen, no matter where he lives or what he does, or what his interest, ought to stand as one man behind the Democratic Party for the passage of the ship-purchase bill, and ought to speak in tones not uncertain as to their meaning and help the passage of this important measure.

And it is the duty of every Democrat to toe the mark and stand by his party in Congress, and by his country, and demand that every Democrat in both Houses of Congress do his duty and pass the bill.

GOVERNMENT SHIPPING BILL.

WASHINGTON, D. C., *January 21, 1915.*

Editor WASHINGTON POST,
Washington, D. C.

DEAR SIR: The opportunity presented to American manufacturers to secure a large share of the business of neutral countries due to the European war should not be translated to mean that the bulk of this business will come to us of its own accord. In each one of the neutral countries will be found most efficiently equipped industries that will prove strong competitors. It therefore behooves us to study the ways and means of securing this dislocated trade in the quickest possible manner in order to become sufficiently intrenched to maintain a permanent advantage.

In the process of developing foreign trade much preliminary work is necessary—an understanding of the particular products adaptable to each and every country, a knowledge of the methods of packing, proper banking facilities, and last, but not least, prompt and regular transportation service.

Our business with foreign nations will not be confined only to staple products, raw materials, and foodstuffs, but to the thousand and one specialties that at present contribute to the comfort and efficiency of our own highly developed civilization.

After resident agencies and wholesale distributors are established and direct introduction to the larger interests is secured our manufacturers will find themselves flooded with small sample orders, given with a view of testing the quality and serviceability of the product and its adaptability to the purchaser's requirements. But one of the most important considerations will be the promptness in delivery, particularly during the present world-wide depression which necessitates buying from hand to mouth. These orders will come not only from countries and important ports where we have at present fair shipping facilities, but from countries and ports where we have directly absolutely none. The transportation cost to many ports are now beyond all possible profit on what would constitute even liberal-sized sample orders, and in many cases the present minimum charge alone would eat up not only all profit, but much of the principal involved so as to preclude making small shipments. But the same products shipped in bulk or large quantities would prove handsomely profitable to steamship companies.

Our larger manufacturers who have for years been developing foreign trade are now shipping in sufficient volume to be indifferent to any suggestion that will overcome this condition, but the smaller manufacturers who are about to exploit foreign markets will find the seriousness of this situation.

The Government shipping bill introduced in Congress will open up at the earliest possible moment avenues of transportation not only to ports now amply covered by established steamship lines, but to countries and ports where such facilities are inadequate or do not exist.

Private capital will not engage in what would be for some time at least an unprofitable proposition, particularly at this time, and for the American people to wait for individual enterprise to fulfill the requirements as indicated would simply mean blocking every effort for trade expansion that is so necessary to the early return of prosperity to our country. The development of the West would have been retarded a generation had not similar foresight been exercised by the Government in its generosity toward the railroads.

Letters of inquiry regarding American products are pouring into importing and exporting concerns from every country on the face of the globe.

Are we going to embrace this opportunity of creating a world market for our varied products, or are we going to allow partisan politics and the selfish interest of a few powerful shipping concerns, not only American but foreign, to prevent the passage of this most vitally necessary law?

When a sufficient volume of business is established private enterprise will be quick to embrace the opportunities presented, and gradually, but surely, will competing independent lines be established to take over the business previously handled by the Government line.

Obviously, subsidies to private companies could not produce the immediate results required.

If this bill is passed, the writer sincerely believes that our international market will expand beyond the expectations of most people unacquainted with the possibilities, and that every trade route over the seas will be regularly sailed by a highly efficient and healthy competing American merchant marine.

WM. T. BUTLER.

EDITOR.—Mr. Butler was until recently general manager of the Manufacturers' International Sales Co., 320 Broadway, New York City.

[From the Evening Star, Washington, January 26, 1915.]

THE MERCHANT MARINE.

The Baltimore platform made this reference to the merchant marine:

"We believe in fostering, by constitutional regulation of commerce, the growth of a merchant marine, which shall develop and strengthen the commercial ties which bind us to our sister Republics of the south, but without imposing additional burdens upon the people and without bounties or subsidies from the Public Treasury."

At that time the matter was on the old basis. Everybody favored, or so declared, the rehabilitation of the American merchant marine. As we had once been a carrying power on the sea, it was essential that we should become one again, and especially as sea traffic had grown to enormous proportions, and we were paying some hundreds of millions annually in freight rates to the foreign owners of foreign bottoms.

The controversy was over the method of procedure. How could the thing be done? Some advocated straight subsidies, and pointed to the fact that those nations with sea power of the carrying kind had established and were maintaining it by the granting of subsidies. How could we, it was asked, compete by other means? And by what other means?

This was opposed, on the ground that subsidies were un-American, and with us would lead to corruption and scandal. Better no merchant marine than one established and maintained on such a basis; and old-fashioned Democrats quoted repeated declarations of their party against all policies of a subsidy nature.

The war gave a new twist to the question. Suddenly we found ourselves in dire need of a merchant marine. We had none, and had not the time to build one for the emergency. Hence the proposition that the Government go into the sea-carrying business temporarily in order to relieve the situation, and buy ships owned abroad and now interned in American ports as a result of the war.

The President stands for the proposition, and so stoutly that he is willing to risk an extra session of Congress in pushing it. Many Republicans and a few Democrats oppose it, the former on the ground that it points and may lead to State socialism on a large scale, and the latter on the ground that it is a more objectionable form of subsidy than that their party has been thundering against for years.

While this proposition was known last fall, it did not figure prominently in the campaign. The tariff and business depression overshadowed all other issues, and in large part accounted for the rebuke to the administration administered at the polls. Public opinion has not yet been taken on this question.

[From the Nashville Tennessean and the Nashville American, January 25, 1915.]

FIGHTING THE PURCHASE OF SHIPS.

A certain class of newspapers and public men who have favored all the emergency measures adopted by the Government to meet a remarkable situation brought about by the European war are now throwing up their hands in holy horror over the proposition for the Government to purchase ships to meet the emergency in the shipment of exports.

When emergency currency was proposed, these men and newspapers said it was just the thing; when it was proposed for the Government to advance millions to bring stranded Americans home from the war area, these men and newspapers said it was a proper thing to do; they favored any and all measures that were meant to give relief to the money centers; they were so patriotic and considerate of the public welfare that they were willing for the public to come to the aid of any tottering industry or great, though struggling, commercial interest; they even wanted to allow American ships to pass through the Panama Canal without paying toll, and whenever the American ships wanted to hold up the Government for a subsidy they were for it; but now when the Government proposes to purchase ships to meet an urgent necessity these same men and newspapers strenuously oppose it, because they fear the Government will refuse to get out of the business after the war is over.

Those who are fighting the shipping emergency bill are the ones who have always been the champions of a ship subsidy in whatever form it may have been presented. No doubt they would now favor a bill providing for shipbuilding, for then the Shipping Trust would have a chance to get its hands into the fund; but they are not willing for the Government to buy ships for immediate use and to meet the emergency, because such ships would come into competition with privately owned ships which, though inadequate for handling the traffic, the owners want to retain whatever monopoly they have always enjoyed.

The Louisville Evening Post, a newspaper that is sound on economics and democratic principles, calls attention to the fact that the shipping charges have advanced on account of a shortage in ships and the shipping combination, and that now it costs $15 a bale for cotton where the charge was formerly only $1 a bale for carrying it across the ocean; and that 17 cents a bushel on wheat is now the rate, whereas formerly the rate was from 4 to 5 cents a bushel; and yet the eastern newspapers, that paper says, point to "high prices" for farm products as demonstration that the farmers are the most richly rewarded toilers in the world.

The Post gives the opponents of the shipping emergency bill this nut to crack:

"Let them go back to the primal market. Let them go back to the farms and see what the farmers are getting for wheat and cotton and corn and cattle—for all of these food products that Europe is clamoring for.

"They will realize then that a good part of these fancy prices is absorbed by speculators, middle men, transportation lines on land and sea, and that the greatest extortioners are the shipowners.

"It is to break this combination that the President has urged upon Congress the bill to purchase ships.

"Why should we not purchase ships to meet this emergency? We purchased the Panama Railroad, we built the Panama Canal for the relief of traffic, we subsidized with land grants and bond issues our transcontinental railroads; last summer we sent ships abroad for the relief of the interned or imprisoned Americans in the different nations of Europe."

—

CHICAGO, ILL., *January 22, 1915.*

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.:

The directors of the Illinois Manufacturers' Association in special meeting January 20 make the following presentation to the Senators and Representatives from Illinois in Congress:

"The manufacturers of the Middle West want Congress to pass the ship-purchase bill because they believe that American ships are the only means by which the ocean rate competition can be met. Their foreign trade can not be developed with foreigners fixing the tariff for the hauling of their goods.

"The Illinois Manufacturers' Association has been the greatest agency in the Middle West for the stimulation of foreign trade. It has consistently and persistently kept up the agitation for years. It believes the American manufacturer is about to reap a harvest. Interest is developing in every direction. One thing, and one thing only, stands in the way, and that is that America does not control the ships carrying the American products."

You are therefore respectfully requested to use all your influence and to vote to secure the passage of the ship-purchase bill.

EDWARD N. HURLEY, *President.*

—

JACKSONVILLE, FLA., *December 23, 1914.*

Whereas it has been brought to the attention to the board of governors of the Jacksonville Board of Trade that there is now pending a bill before the United States Senate to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States, etc., and numbered Senate bill 6856; and

Whereas this organization thinks that this is a bill calculated to be of immense help in opening up routes of trade and getting our products to market: Therefore be it

Resolved by the board of governors of the Jacksonville Board of Trade in regular session assembled, That we most heartily approve the bill and urge its passage. Be it further

Resolved, That our Representatives in Congress, and particularly our Senators, be requested to use their best endeavors to secure the passage of the bill at an early date.

[SEAL.] JACKSONVILLE BOARD OF TRADE,
CHAS. H. MANN, *President.*
W. N. CONOLEY, *Secretary.*

Mr. FLETCHER. I desire to submit a letter from Mr. Sidney Story, of Louisville, Ky., who has had experience and gained a thorough understanding of this subject, particularly as relating to South American business. Mr. Story wrote me on November 16, 1914, saying:

I read in the Cincinnati Enquirer of the 11th instant a report giving your views in regard to the "Need for an American merchant marine." It is not only refreshing, but encouraging to note expressions of this kind from men of your standing and influence nationally.

The letter then discusses the general subject, particularly with relation to South American trade, and I will ask to insert it without further reading.

The PRESIDING OFFICER. If there is no objection, the request will be granted. The Chair hears none.

The letter referred to is as follows:

NORTH AND SOUTH AMERICAN TRADING CO.,
Louisville, Ky., U. S. A., November 16, 1914.

Senator DUNCAN U. FLETCHER,
Washington, D. C.

MY DEAR SENATOR: I read in the Cincinnati Enquirer of the 11th instant a report giving your views in regard to the "Need for an American merchant marine." It is not only refreshing but encouraging to note expressions of this kind from men of your standing and influence nationally.

We are a Nation enjoying profound peace, with a bountiful overproduction from forest, field, and factory. Our foreign commerce is seriously handicapped, simply because we have no delivery wagons to take our manufactures and foodstuffs to the nations who need them. This plight of ours is indeed pitiable, not to say humiliating.

I have given some thought to the study of this question, for in 1911 and 1912 I made two lengthy visits to South America and negotiated with one of those Latin Governments south of the Equator a mail contract for an American line if installed. The contract was for not less than $500,000 a year for a monthly service, the ships to be of not less than 12,000-ton capacity and 16-knot speed, and three years were given the said proposed American steamship company to build American ships, but in the meanwhile said American company to have the right to use by charter or purchase foreign ships of reasonable speed and tonnage.

There were many other privileges granted in this contract by the South American nation. One of the conditions of said contract was that the American steamship company should at least raise $3,000,000 by the sale of its stock and secure from the Government of the United States a mail contract to Brazil, Uruguay, and Argentina.

The dense ignorance of the American people in regard to the need for ocean transportation prevented these plans from developing. The response of business men and shippers in America to an appeal for aid to an American shipping proposition has always been "Let George do it," which means we are satisfied with the service given us by our commercial rivals—England, France, and Germany.

These same smart, intelligent, American business men, who are close figurers at home when it comes to the question of railroad tariffs, display an amazing ignorance as to ocean freight rates in the expansion of our foreign trade.

The foreign subsidized American newspapers have for years molded public sentiment to believe that Americans can't run ships and that it is better for us to employ the delivery wagons of our foreign commercial rivals, who wring annual tribute from our commerce to the tune of hundreds of millions, and by their arbitrary and discriminatory tariffs keep us out of lucrative markets which would be ours if we only controlled the carriers.

Foreign subsidized newspapers, as well as certain press bureaus in this country, financially supported by foreign boards of trade and foreign steamship trusts, have been potent factors in blinding the people of America. Sinister influences have capitalized the prejudices of sections and parties to becloud the issue and make the voters take fright whenever the bugaboo of subsidy or preferentials is mentioned.

The South American nations are as great sufferers as we are. Like ourselves, they have little or no shipping and have been dependent entirely upon the foreign European ocean octopus to handle their foreign commerce.

Since the beginning of the European war it is not difficult to realize that foreign influences have been at work to defeat legislation that would give us relief from the present unparalleled, humiliating, and impotent situation in which this great Nation finds itself as regards its foreign commerce. No sooner is a measure passed by Congress which contemplates the purchase of German ships marooned in our harbors than diplomatic strings are pulled and the bugaboo of international intervention and treaty violation are waved in our faces. This is done to frighten American capital from investing in American steamship lines.

No one is fool enough to believe that we can buy any British, French, or German ships which have been withdrawn from the sea and are now anchored within fortified harbors. The Europeans are not such asses as to sell us their good ships so that America might build up a merchant marine and take possession of the ocean trade routes and thereby accomplish European commercial strangulation. Both Germany and England can better stand a 10-year war than to see America take possession of the trade routes with an American merchant marine. "Uncle Sam," who has been developing some aggressiveness during the last decade in the South American fields, is coming in for a share of this envy and jealousy, and it won't be long before powerful rivals will be trying to clip our wings.

In this connection I beg to attach an interview which I prepared for one of our papers last spring. You will note it refers to the exaggerated reports that reach us via London and France about things generally in South America. I think it would be well worth your time to read this interview.

The European nations have been indeed clever at the game. Their statesmanship has been farsighted and aggressive, and it has kept pace and, in fact, in the lead of their commercial advance.

With the control of the cables to South America; with the control of native newspapers, published in their own languages in all the leading centers of Latin America; with their European bank system controlling the finances and gobbling up all the federal, state, municipal, railroad, and industrial bonds; and with their control of the news service, which enables them to furnish North and South America with a few items concerning each other after said items were first censored in London; and with the absolute monopoly of the ocean carrying trade, no wonder we have not been getting more than 15 per cent of the immense foreign commerce of these Latin-American nations.

To him who is familiar with the history of America the fact is self-evident that Europe, and notably England, has been fighting America's effort to build up her maritime interests since 1782. You will remember that after the Revolutionary War England passed in her Parliament many drastic laws aimed at United States shipping. She even forbade American ships under the American flag to enter British ports, and our Continental Congress in 1782 granted in retaliation a 10 per cent preferential to all goods imported in American bottoms. This resulted in the development of our maritime interests so that in 1812 we carried 85 per cent of our foreign commerce, whereas to-day we only carry 5 per cent, and yet have 95,000,000 more people in the land, with an annual foreign commerce of four and one-half billion dollars.

The War of 1812 was forced on us because England was jealous of our maritime development. In 1814 we signed the treaty of Ghent practically at the point of a bayonet, which gave us peace, but sealed the doom of American merchant shipping, for the signing of said treaty was conditioned on President Madison repealing the 10 per cent preferential, which, in 1782, had been granted by the Continental Congress and which had built up her maritime supremacy in a few years. From 1814 to 1860 the history of the American merchant marine is full of struggles and disasters, due to the ignorance of backwoods legislators, whose minds are molded and prejudices capitalized by the subtle intrigues of foreign lands, who are determined that America shall remain a vassal among the nations, paying tribute to Europe for the carrying of American commerce. This humiliating chapter in the annals of our country bears out the warning of the immortal Washington, who, in his message to the American Congress urging legislation for the upbuilding of our merchant shipping, said, "The nation that controls the sea will control your commerce, and the nation that controls your commerce will dominate you politically." Every President, from Washington down to and including Woodrow Wilson, has ardently and strenuously advocated legislation favorable to an American merchant marine; but, strange to say, Congress has never hearkened to their appeal. Even now the preferential in the Underwood bill, which would grant relief to American shipping, is hung up in the courts by the foreign European shipping trust.

The present European troubles should teach us a great lesson. The American people, from ocean to ocean, are discussing the war and its effects on American commerce, and I believe the American people are now beginning to realize the humiliating and impotent state of this great Nation in respect to its foreign commerce. I believe the American people are beginning to see that, internationally speaking, "We have been asleep at the switch" and that our statesmanship has been shortsighted.

President Wilson not very long ago, in an address of his, said, "We must build a merchant marine if we want to expand our foreign commerce. If not," said Mr. Wilson, "we must then be content to remain within the confines of our own domestic development." This, of course, would mean stagnation as well as retrogression. President Wilson further stated on another occasion, "We have now reached the time when we must rise to greater heights and take a broader view of affairs internal and external." The President no doubt meant it is about time, for the American people should not be satisfied to remain a nation of peddlers and home traders; that we must cease to be content with swapping jackknives among ourselves, as we have been doing for half a century past, and must step out into the arena of international commerce and build up our commerce so as to build up a trade balance in our favor that will show an annual net profit.

The trade balance which "Uncle Sam" publishes annually of several hundred millions is misleading. Against that enormous trade balance should be charged up the millions we pay to foreign shipping to

carry our commerce; the millions we pay to foreign banks, through whom we finance our foreign commerce; the millions some of our countrymen send to their families in Europe annually; the millions American tourists annually take out of American and spend in foreign capitals; the millions we pay in the nature of dividends on foreign capital invested in American enterprises. When we charge off all these items, instead of a trade balance in our favor we will find a trade balance against us of several hundred million dollars annually, which accounts for our tremendous shipments of gold to Europe.

The conclusion is that the basic foundation of all development is transportation. It is the base of the triangle, of which agriculture and industry are the other two sides. This spells commerce, which is the lifeblood of nations. It is time, therefore, for American statesmenship to realize that government and business must be partners; that international statesmanship must march hand in hand with our foreign commercial development.

We have just built a great canal at the cost of $400,000,000, and yet we have but few American ships engaged in transmarine service to use it. We have built it, therefore, for the use of our foreign commercial rivals, to enable them not only to extend their further commercial conquests, made easier by the shortening of trade routes due to the Panama Canal, but to enable them also to take away from us what commerce we now have. What we should do is to get busy. Now is the time for action. Now is the time when we can capitalize the psychological moment and lay the foundation for the building of a merchant marine under the American flag, without which it will be impossible for this Nation to maintain prosperity within her borders.

We are exporting less foodstuff every year. England is spending millions annually to develop the cotton industry of other countries in order to insure her independence of American cotton. This is simply following out her old policy, which we must all agree is a wise and sagacious one from the English standpoint. England aided and encouraged the development of cattle raising in Argentine in order to insure independence of American beef, and to-day Argentine, or rather previous to the European war had been, supplying Europe with beef, whilst Australia has been supplying the world, practically speaking, with mutton and wool. For some years back England has been encouraging the growth of rubber in East India to emancipate her from dependence on Brazilian rubber. This she can very well do, since she controls a monopoly of transportation, not only on the sea, but on the Amazon. The British East India production of raw rubber to-day equals that of Brazil and is fast displacing the Brazilian produce, because England has practically a monopoly of ocean transportation. In time the Brazilian rubber industry, which now faces a crisis, will be destroyed and the world will be dependent on the British East India production. Following her wise statesmanship, England will see to it that the British manufacturer gets the inside track. Where will Mr. American Manufacturer get his raw rubber? He will be dependent on the British East India production, which will favor the English manufacturer first, and Mr. American Manufacturer will be compelled to close down his rubber factory and remove to England. The only thing that can deflect such a possibility is American transportation, operated in the interest of American commerce from the ports of our country to South America and the world generally.

The commerce is there waiting for such lines, and the rates of freights are profitable to such investments, as evidenced by the dividends recently declared by the Hamburg-American and other steamship lines, as well as by the volume of commerce which flows in and out of this Nation annually.

I will say for your information that you will note from the testimony taken before the merchant marine congress on January 7, 1913, that I was a witness in the foreign steamship trust investigation, which revealed the doings of some of our foreign friends in the South American fields in their efforts to keep "Uncle Sam" out.

I am a member of the New Orleans Association of Commerce and a member of the merchant marine committee of said association.

Awaiting the pleasure of hearing from you, I beg to remain,

Yours, very cordially,

SIDNEY STORY.

SOUTH AMERICAN TRADE.

Mr. FLETCHER. Mr. President, dealing somewhat further with the trade of South America with a little more particularity, but in a condensed way, I desire to call attention to some of the opportunities for extending South American trade.

Argentina is a very prosperous country. It is largely agricultural. Of all the exports of the world to South America Argentina takes above 60 per cent. Of all our exports to South America Argentina takes about 40.3 per cent. That Republic affords an important market for manufactured products. Vessels are needed to meet the demands of commercial interchange. Small cargoes and trustworthy agents, the minister points out, are the main factors required to organize the trade which should be placed on a similar basis of credit as that practiced by European countries. Agricultural implements and manufactured goods of all kinds are wanted, and the minister estimates that the consumption market of Argentina can be increased $100,000,000 over present exports to that country. That market includes unrefined naphtha, wood, iron, machinery, petroleum, furniture, typewriters, machines, coal, steel rails, galvanized iron, woolen goods, pig and sheet iron, cement, locomotives, railway cars, refined sugar, automobiles, steel wire, rail joints, sheet zinc, cotton fabrics, printing paper, electric wire and cables, iron piping, household articles, clothing, and so forth. Return cargoes include hides, wool, quebracho, tannin, and so forth. The laws of Argentina permit the establishment of branches there by United States bankers.

In Uruguay the great packing houses on the River Plata are under American control. This is largely an agricultural country, needing agricultural implements, machinery, and manufactured articles, and goods similar to those mentioned above for Argentina. Both these countries have hides to sell. We could send them shoes, belting, valises, and other goods in exchange.

Colombia and Paraguay have hardwood for sale. Let them have axes, tools, machinery, and furniture in exchange. Colombia will exchange Panama hats, coffee, rubber, sugar, vegetable ivory, precious stones, and her varied products for cotton goods, implements, grain products, and manufactures of various kinds.

Brazil wants a market for coffee and rubber, and she needs conveyances, engines, machinery generally, our flour, and our cotton goods. Antwerp has heretofore taken a considerable portion of Brazil's rubber. We can exchange automobile tires and rubber goods for it.

Venezuela needs our oils, cereals, lumber, and manufactured goods. With these we can buy her cacao and coffee.

Bolivia wants locomotives, which we can swap her for tin. She furnishes about one-fourth of the world's annual output of tin, which has been going to Hamburg.

Ecuador furnishes about one-fifth of the world's supply of cacao. We can exchange cocoa and chocolate for the cacao beans.

Chile would like to sell her nitrates. We can send her harvesters, tractors, implements, and machinery of all kinds, as well as manufactured goods.

American trains are running on American rails on top of the Andes. American steel and cement are found in the high trestles of the La Guayra-Caracas Railway. American tractors are doing service in Chile.

The time has passed when any country desiring to take care of its people and to move forward can ignore its water transportation facilities. As Mr. Kirkaldy, in his work on "British Shipping," says:

A century ago the shipping of the world was, for the most part, employed in supplying luxuries solely for the well-to-do members of society. To-day it is the mass of mankind it benefits.

England has realized this and has taken advantage of every opportunity to provide for this important need. Mr. Kirkaldy further says:

The teeming population of England could be neither clothed nor fed were not foreign supplies obtainable.

Another English writer, Mr. Owen, in his Ocean Trade and Shipping, says:

Seeing that we are an island state, depending entirely, both for our export trade and for the import of our food supplies and raw materials, on our shipping, it is clear that any hostile interference with our vast over-sea transport system might be fraught with consequences of the utmost gravity. If our raw materials ceased to come to us and we were cut off as well from the markets for which our manufacturers produce, the trade of the country must perforce come to a stop; there would be no work, and consequently no wages for the workers; the country would be smitten with paralysis. Still more serious, however, would be any interference with our food supplies, and the mere possibility of such a dire calamity is a "heel of Achilles" to the Empire. Of every five loaves we consume four have been sold to us over the ship's rail; about two-fifths of our meat; considerably more than half of our eggs, butter, and cheese; and so on. In food, drink, and tobacco we import annually about 250 millions sterling. This means 685,000 pounds a day, 28,000 pounds an hour, 475 pounds a minute.

I ask permission at this point to insert two brief newspaper clippings bearing on the question of South American trade.

The PRESIDING OFFICER. If there is no objection, permission is granted.

The clippings referred to are as follows:

GREAT OPPORTUNITY IN SOUTH AMERICA FOR COTTON GOODS—CURTAILMENT OF EUROPEAN MILLS OPENS DOORS—SOUTH AMERICAN AGENT SOUTHERN RAILWAY CALLS ATTENTION TO SOME PERTINENT FACTS AND FIGURES.

Great opportunities for expansion of the cotton-goods trade with the South American countries are open now that the European mills have been curtailed, and a number of southern cotton mills are taking active steps to capture a generous share of this trade, declares Charles Lyon Chandler, South American agent of the Southern Railway, who calls attention to the following figures:

Of the $14,000,000 of cotton goods imported by Chile in 1912 only $770,000 came from this country. Germany, whose trade is now cut off, supplied $3,400,000 and Great Britain the rest. In the same year Argentina bought $35,700,000, of which $5,527,000 came from Germany, over $17,000,000 from England, and only $445,300 from this country. Of the $18,000,000 of cotton goods imported by Brazil $3,800,000 came from Germany, $11,000,000 from England, and only $329,000 from this country. Figures in regard to woolen goods and cutlery into the South American countries show similar opportunity.

SOUTH AMERICAN TRADE—THE OPPORTUNITY GIVEN BY THE WAR TO THE UNITED STATES.

To the EDITOR OF THE SUN:

SIR: I have recently returned from an extensive journey which embraced Venezuela, Colombia, the Canal Zone, and a number of the islands of the Caribbean Sea. On this journey, through our "sphere of influence," I, like all Americans who travel there, regret the absence of the flag of the United States. We see it flying over our legations and consular offices, but with one exception nowhere else.

War news reached us first at Colon; we found Jamaica under martial law. Our steamer ran dark all the way home from Colon, but we did not sight anything in the way of a war vessel. At Puerto Colombia, Cartagena, Colon, and Panama numerous German steamers were tied up at neutral wharves, but the English vessels went on about their business.

It was a pleasure to learn that a bill was before Congress to reestablish our merchant marine, and now the President has signed it, to the delight of all who travel, especially in the Caribbean and the coast of South America. It only seems a pity that the coastwise steamship owners and other interested parties can not at this time put aside their petty jealousies and all work for the commerce of the seas that is rightfully ours. Everywhere abroad you see American goods in ever-increasing quantities, but all carried in foreign ships. Do you want to travel, you pay the foreigner for the privilege. Do you want to do business, you must do it through foreigners. Why, with this wonderful opportunity caused by the European war, do our people not awaken to the opportunity that is theirs for the taking? Be sure that England, still mistress of the seas, will not neglect to grasp the enormous German trade. At least a share of this is ours. All we need is the ships, and we now have the chance to secure them. Why all this pettifogging about neutrality and coastwise shipping? It is foolish in the extreme, and arises either from supreme ignorance of the situation or from selfish personal reasons. Can we Americans never rise to an international viewpoint; must we, a world power, still be colonials?

There is but one American steamship line trading to Venezuela and the Caribbean, and its fleet is composed of four vessels, the largest of 3,000 tons and 25 years old; the second of 2,500 tons, 30 years old; then two of 1,800 tons and one of 630 tons. It was my good fortune to see at Curacoa three of these, with the combined capacity of 4,930 tons, in the harbor of Willemstad, all flying the American flag at the same time. This line has a United States mail subsidy and is old in the service of the flag and the almighty dollar. It is a well-known fact that since its inception this line has made fortunes for everyone who has been interested in it. Yet the cry goes up continuously—they almost believe it themselves—that it costs too much to run an American ship. The boats go heavy laden with freight and passengers. If they would purchase some of the fine ships now for sale, they could and would grasp and hold the largest part of the traffic of the Caribbean Sea. Why not? They have the money and here is the chance; South Americans, West Indian islanders, all want us to come to them with ships and goods. The business people who understand welcome us, the ignorant hardly know us; the politicians hold us up as a bogy man for their own purposes.

There are vast opportunities in South America, especially in the countries least in the public eye. Brazil, the Argentine, Chile have been exploited and financed to death; but Peru, Venezuela, Ecuador, and others offer golden chances for banking and trade. They want us to come to them, to know us not as the northern bully but as a helping friend. Can we not stop talking and attend to business? Let us sell them the goods direct, not through England and Germany, for our southern neighbors use American goods in quantities, but they are shipped first to Europe and then to South America in foreign ships.

One instance: Domino sugar retails here at 6 cents a pound, in Caracas at 26 cents a pound, and that within sight of local sugar mills whose product of brown sugar retails at 11 cents a pound. And so with other American goods.

We have the greatest opportunity in the world; now is the time to act. Send out men who know South America, the people and their ways, and who speak Spanish. Send many, but send them now. Buy ships, put our flag on them, and do it now. Stop talking and get busy. The greatest chance in the world is ours.

Our ministers and consuls are alert and glad to help—a better class than the representatives of any other country.

F. WALN MORGAN DRAPER.

NEW YORK, *September 18*.

Mr. FLETCHER. The New York Tribune said, as I recall, that if this measure were limited in its application to Latin-American countries it would be unobjectionable.

NATIONAL DEFENSE.

Now, Mr. President, I come to the question of national defense. This bill is intended to provide auxiliaries for the Navy and military transports. I have heretofore called attention to Senate Document No. 225, Sixtieth Congress, first session, pages 30-34 and 41-47, showing the need of ships as naval auxiliaries and as transports at that time. I have requested the Navy Department and the War Department to bring those reports down to date, and I present communications from the Secretary of the Navy and the Secretary of War, respectively, which give the present requirements. I ask to have those communications inserted in my remarks. They show authoritatively, from the standpoint of these departments, that the enactment of this measure should not be delayed. They speak for themselves and require no elaboration.

The PRESIDING OFFICER. If there is no objection the request will be granted. The Chair hears none.

The matter referred to is as follows:

NAVY DEPARTMENT,
Washington, January 12, 1915.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I beg to acknowledge the receipt of your letter of December 22, regarding the pending ship-purchasing bill (S. 6856) and calling attention to the report made by the General Board to the Secretary of the Navy, dated November 23, 1905.

You inquire as to what changes, additions, or modifications should be made to-day to the General Board's letter on the subject to bring it to date.

The matter has been referred to the General Board, and I am inclosing herewith for your information a copy of the board's indorsement.

Sincerely, yours, JOSEPHUS DANIELS.

[Second indorsement.]

JANUARY 12, 1915.

G. B. No. 423.
From: President General Board.
To: Secretary of the Navy.
Subject: Letter of Senator FLETCHER re ship purchasing bill (S. 6856).
Character of auxiliaries.

Returned.

Second. The General Board interprets the first indorsement to refer to auxiliaries which might be obtained for service in war from the merchant vessels that are provided for in Senate bill 6856, and therefore reports as follows:

Third. Merchant vessels which would be most suitable for use in the Navy in time of war may be divided into three classes, viz, (a) Scouts; (b) Cargo vessels; and (c) Transports and hospital ships.

(a) Scouts: Fast passenger ships of not less than 23 knots speed, and of as great a steaming radius as possible.

(b) Cargo vessels: Cargo ships to be used as colliers, oilers, supply ships, repair ships, etc., of a minimum displacement of 10,000 tons, and a sustained sea speed of 14 knots and at least 6,000 miles radius.

(c) Transports and hospital ships. Passenger vessels capable of a sustained sea speed of 14 knots and of at least 6,000 miles radius, and capable of carrying a regiment of at least 1,000 men with their impedimenta.

Fourth. In the light of the terms of Senate bill 6856, of the letter of Senator FLETCHER, and of the department's indorsement, the General Board has no recommendations to offer in this connection concerning the other smaller auxiliary vessels referred to in its letter of November 23, 1905.

(Signed) GEORGE DEWEY.

NAVY DEPARTMENT,
Washington, January 20, 1915.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In reply to your letter dated January 14, 1915, requesting information as to the number of auxiliary vessels that are required for the Navy of the United States in time of peace and the number of various types that would be required in time of war, you are informed that, in the opinion of this department, the number of auxiliary vessels recommended in the building program, together with those now in service, will meet the present needs of the Navy in time of peace.

As a matter of fact, the Navy of the United States maintains more auxiliary vessels in time of peace than that of any other nation, but by the lack of an adequate merchant marine, upon which other naval powers depend for a supply of auxiliary vessels in time of war, the United States Navy would be seriously handicapped if we should go to war under the conditions which now exist in our merchant marine. All nations utilize their merchant marine as an adjunct to the regular navy in time of war, and, in fact, depend upon it for supplying the auxiliary vessels of their fleets.

The active fleet of the United States in order to operate against any one of the possible enemies will need upon the outbreak of war the following number of auxiliary vessels:

1. Forty vessels for scouting purposes with a possible sustained speed of not less than 20 to 23 knots.

The 10 armored cruisers and the 5 first-class cruisers now in service will be used in the scouting line, and it will therefore be necessary to obtain by purchase or otherwise for scouting purposes 25 auxiliary vessels of great steaming radius and high speed.

2. Five mine depot vessels.

Two are now in service, which leaves 3 to be obtained at the outbreak of hostilities.

3. Twenty-five colliers of great capacity and with sufficient speed to permit of their accompanying the battle fleet.

There are at present in service 10 colliers which would be utilized for this purpose, and it will be necessary to acquire 15 more to accompany the fleet and an additional large number to maintain a supply line.

4. Ten oil-tank vessels with sufficient speed to accompany the fleet.

There are at present 1 of these vessels in service and 2 building.

5. Five supply and refrigerating ships.

There are at present in service 4 old supply vessels that can be utilized and the construction of a new one is authorized.

6. Five hospital ships.

One is now in service.

7. Five repair ships.

The Navy at present has 2 such vessels and it will be necessary to acquire and outfit 3 more.

8. Six transports suitable for carrying advanced base expeditions and material.

There are at present 3 such ships available and 1 under construction.

9. Ten dispatch boats of 18-knot speed.

10. Ten seagoing tugs.

There are at present available 2 large fleet tugs and 3 smaller ones that can be used for work in the open sea. It would be necessary to acquire 5 more seagoing tugs.

11. Five ammunition ships.

One is available, leaving 4 to be acquired.

12. Four destroyer tenders and repair ships.

Three of an inferior type are now in service and 1 new tender is building.

In addition to the above a large number of vessels suitable for harbor and coast patrol, submarine tenders, mine sweepers, and dispatch boats would be necessary for the harbor and coast defenses.

For this purpose the smaller cruisers, gunboats, and monitors would be used, and such additional merchant vessels as necessary purchased and converted.

The Navy has at present built and building the following auxiliary vessels:

Five supply vessels.
Twenty-two colliers.
Three oil-fuel vessels.
Four torpedo-boat tenders.
Four transports.
Two mine depot ships.
Forty-four tugs (two large seagoing tugs, five large enough to be used at sea, and the others suitable for inshore and harbor work).

It will be necessary at the outbreak of hostilities to acquire for naval purposes, by purchase, charter, or otherwise, at least the following number of auxiliary vessels:

Twenty-five merchant vessels suitable for scouting purposes.
Three mine depot ships.
Fifteen fleet colliers.
Seven oil-fuel vessels.
Four ammunition ships.
Four hospital ships.
Three repair ships.
Two transports.
Ten dispatch boats.
Five seagoing tugs.

In addition to the above a large number of vessels suitable for submarine tenders and mine sweepers would be necessary for the harbor

and coast defenses and coast patrol, and in case of a distant oversea naval campaign, which would be necessary in order to bring to a successful conclusion a war with any one of the possible enemies, a larger number of fuel and cargo ships would be needed to maintain the supply line to the base in the United States. The number of vessels necessary to supply an oversea fleet is dependent upon the distance from the base of supplies, and for the most distant oversea field of naval activity it is estimated to be 200 vessels.

The Navy has at present a number of small cruisers and gunboats which are not suitable for service with the battle fleet, but which in time of war would be used for harbor and coast patrol duty. It is the opinion of this department that upon the outbreak of hostilities with any naval power the Navy will be in need of about 100 auxiliary vessels of the types stated above, and would, in case the war necessitated an oversea campaign, need approximately an additional 100 vessels before the war could be brought to a successful conclusion.

In a consideration of the desirability of having merchant vessels immediately available as auxiliaries for service with the fleet, it is considered proper to invite attention to the fact that during the War with Spain in 1898, in which the naval operations were of very little importance when compared to what may be expected in any future wars, the Navy Department purchased for naval purposes 96 vessels at a cost of $11,418,027 and chartered at a high per diem rate 5 others.

The vessels purchased were:

Seven merchant ships which were converted into cruisers.
Thirty-one tugs.
Seventeen colliers.
Twenty-six yachts.
Sixteen vessels of special classes (refrigerating supply ships, hospital ships, repair ships, transports, etc.).

The vessels chartered were four large and fast passengers steamers at a cost of $2,000 to $2,500 per diem, and one tug at $1,000. The four large and fast steamers were used as scouts.

The merchant services of all foreign naval powers are much better prepared by their size, equipment, and organization for naval purposes, to supply naval auxiliaries than is the merchant marine of the United States.

Any steps, therefore, that it may be possible to take looking toward an expansion of our merchant service on the seas will add greatly to the number of auxiliary vessels available for the Navy in time of war, and the building up of an oversea trade in vessels flying the American flag will be of the greatest possible value to the naval arm of the national defense.

JOSEPHUS DANIELS.

—

TREASURY DEPARTMENT,
Washington, January 7, 1915.

Hon. DUNCAN U. FLETCHER,
United States Senate.

DEAR SENATOR: Further in reply to your letter of December 19, requesting information in connection with the shipping bill, I beg leave to send you herewith a copy of a letter and inclosure, just received from the Secretary of War in answer to your questions Nos. 6 and 7, respectively.

Very sincerely, yours,

BYRON R. NEWTON,
Acting Secretary.

—

JANUARY 4, 1915.

Hon. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington, D. C.

DEAR SIR: Replying further to your letter of the 21st ultimo, inclosing copy of Senate resolution passed on December 18, 1914, and of a letter addressed to you by Senator Fletcher, acting chairman of the Committee on Commerce in the Senate, I take pleasure in forwarding herewith a statement which has been prepared giving information called for by Senator Fletcher's questions Nos. 6 and 7.

Faithfully, yours,

LINDLEY M. GARRISON,
Secretary of War.

—

"6. WHAT IS THE NEED OF THE ARMY * * * FOR AUXILIARIES AND TRANSPORTS?"

In any military movement involving the transportation of troops oversea, the matter of first and paramount importance is the transport. The primary requisites of a sea transport are sufficiency, suitability, and readiness.

It has been demonstrated within recent times that under conditions hitherto prevailing the United States could not expect to obtain a sufficient number of suitable steamers flying the American flag required for an expedition involving the transportation of large armies oversea, and it would unquestionably be necessary to charter steamers of foreign register. It requires no argument to show how comparatively helpless we would be were it necessary to charter a large number of foreign ships at such a time as this, when the largest maritime nations of the world are engaged in warfare and in need of all their resources, while the neutral maritime nations are jealously guarding their own interests. Any legislation tending to foster the growth of an American merchant marine, therefore, would vastly increase the potential military efficiency of our Army by providing a source upon which the Nation could draw in time of great need for its Army transports, officered and manned by American citizens, provided the operation of law would authorize the taking over of such vessels on the breaking out of war, or when war becomes imminent. Such a law should act automatically and effect transfer to the military service from commercial service at a price and under conditions provided in the law itself, together with the crew of the ship and all appurtenances. Aside from the greater facility and dispatch with which a large fleet of transports could be fitted out under such conditions, the efficiency of the personnel of such ships must, of necessity, be immeasurably superior to the personnel of foreign ships, whose only interest would be of a pecuniary nature, the elements of patriotism and sacrifice being entirely lacking among the latter.

In principle the War Department is heartily in favor of anything which will tend to promote the growth of an American merchant marine, as, with such a marine, the mobility of its forces will not be limited and circumscribed by the natural barriers of oceans and seas, and under certain circumstances the efficiency of its forces could be immensely increased by the knowledge that there was a certain and sure source upon which to draw for its Army transports.

The annual reports of the Quartermaster General for the past few years have advocated the advisability of providing new transports for the service, to replace the present units which are becoming old and so out of date as to prove increasingly more expensive in their upkeep and operation; he being of the opinion that the Army of the United States requires as a part of its equipment transports of the most modern and efficient type if it is expected to perform efficiently its required duties at points away from the continental limits of the United States; it being considered just as necessary that the Army be provided with first-class transports as for the Navy to be provided with first-class battleships, if it is expected that the United States is to maintain its proper position among the powers of the world.

"7. WHAT HAVE WE READY, OR WHAT COULD BE MADE READY IN THREE WEEKS, TO TRANSPORT TROOPS AND SUPPLIES?"

The War Department now has 10 troop transports, 1 animal and freight transport, 1 refrigerator transport, and 1 cable ship in commission and ready for service. Also, 2 troop transports out of commission, which, however, are very old and unserviceable, and authority for their sale has been requested of Congress.

It is probable that about 20 ocean-going steamships of American register could be chartered or commandeered and made ready for service as troop and animal transports within a period of three weeks; average capacity for about 1,000 men each.

The owned transports now in commission, as at present fitted, have a total carrying capacity of 11,045 men, 27,301 tons of impedimenta and supplies, 750 animals, and 2,224 tons of refrigerated stores, at 100 cubic feet per ton.

Of the owned ships now in commission four are engaged in trans-Pacific service, including the one animal and freight transport, and three are engaged in interisland service in the Philippines. The cable ship is in service between Seattle and Alaskan ports, thus leaving only four transports, including the refrigerator transport, available for duty on the Atlantic. The total capacity of the four transports now available for Atlantic service is 2,857 officers and men, 5,902 tons of impedimenta and supplies, 200 animals, and 1,171 tons of refrigerated stores, at 100 cubic feet per ton.

—

WAR DEPARTMENT,
Washington, January 7, 1915.

The CHAIRMAN THE COMMITTEE ON COMMERCE,
United States Senate.

MY DEAR SENATOR: Referring to your letter of December 22, in regard to the report made to the Secretary of War by the General Staff, December 22, 1905, appearing in Senate Document No. 225, Sixtieth Congress, first session, pages 41 to 47, on the subject of "The Army's need of merchant steamships as transports in war," I have the honor to advise you that that report is equally applicable to conditions to-day, except that our tonnage, under the stimulus of recent legislation, has since September 1, 1914, been increased by 50 vessels of 4,000 tons or more, making an increase in total gross tonnage of 263,954 tons.

Of merchant steamships of American registry of 4,000 tons or more gross tonnage there are now on the Atlantic 70, with a total gross tonnage of 435,539 and capacity to transport a total of 95,000 men.

On the Pacific there are 23, with a total gross tonnage of 191,073 and capacity to transport a total of 42,000 men.

Assuming these ships to be engaged in foreign trade, there exists the same probability, formerly referred to, of not more than one-third of them being available within 15 days. In other words, if the Navy needed none of them, it appears probable that we would be able in 15 days to embark on the Atlantic in suitable ships not more than 31,660 men and on the Pacific not more than 14,000 men.

The fact, however, that the Navy must count on supplying its deficiencies from the same list of ships leaves the number finally available for the Army somewhat problematical.

The requirements and specifications for ships suitable for Army transports remain the same as given in the report of the General Staff to which you refer.

Very respectfully,

LINDLEY M. GARRISON,
Secretary of War.

PREVIOUS STEPS IN THIS DIRECTION.

Mr. FLETCHER. Mr. President, last August the junior Senator from Massachusetts [Mr. WEEKS] was taking rather advanced ground in the direction of the pending measure, if, indeed, he did not plant his banners upon its very front line. Senate bill 5259, introduced by him, provided:

That the Secretary of the Navy is hereby authorized to establish one or more United States Navy mail lines by employing such vessels of the Navy as in his discretion * * * for the purpose of establishing and maintaining regular communication between the east or west coast or both coasts of the United States and either or both coasts of South America.

The vessels were to carry mail, passengers, and freight under such regulations and at such rates as the Secretary of the Navy might prescribe. The Senator introduced a resolution—Senate resolution 317—on the subject, and that resolution was referred to the Committee on Naval Affairs. The Secretary of the Navy recommended the passage of the bill, and the committee made a favorable report August 3, 1914, and the bill passed the Senate on August 3, 1914. I think it worth while to set forth the resolution, the letter of the Secretary of the Navy, and the brief report of the committee, because they are all recent and throw considerable light on the question now before the Senate. I ask that they be included in my remarks.

The PRESIDING OFFICER. If there is no objection, the request will be granted.

The matter referred to is as follows:

[Senate. Report No. 718. Sixty-third Congress, second session.]

UNITED STATES NAVY MAIL LINES BETWEEN UNITED STATES AND SOUTH AMERICA.

Mr. THORNTON, from the Committee on Naval Affairs, submitted the following report:

We, the undersigned members of the Senate Committee on Naval Affairs, recommend the passage without amendment of S. 5259, being a bill introduced by Senator WEEKS, entitled "A bill to establish one or more United States Navy mail lines between the United States and

South America," and being the bill recommended for passage by the Secretary of the Navy in response to Senate resolution 317.

LETTER FROM THE SECRETARY OF THE NAVY TO THE CHAIRMAN OF THE COMMITTEE ON NAVAL AFFAIRS, TRANSMITTING CERTAIN INFORMATION ON SENATE RESOLUTION 317 RELATIVE TO A PLAN FOR THE ESTABLISHMENT OF A LINE OF SHIPS TO RUN BETWEEN THE CITIES OF NEW YORK AND NEW ORLEANS AND THE CITY OF VALPARAISO, CHILE, AND INTERMEDIATE PORTS, TOGETHER WITH A DRAFT OF A PROPOSED BILL TO ACCOMPLISH THE SAME.

[S. Res. 317.]

Mr. WEEKS submitted the following resolution, which was referred to the Committee on Naval Affairs:

Whereas it is desirable to develop and extend commercial relations between the United States and the countries of South America by the establishment of direct lines of communication for carrying the United States mail and for the transportation of passengers and freight; and

Whereas private capital has not engaged in this service to a sufficient extent to furnish facilities comparable to those enjoyed by the people of other countries having trade relations with South America: Therefore be it.

Resolved, That the Secretary of the Navy be, and he is hereby, directed to cause to be prepared, in detail, a plan for the establishment of a line of ships to run between the cities of New York and New Orleans and the city of Valparaiso, Chile, and intermediate ports, to consist of the cruisers *Columbia* and *Minneapolis* and the scout cruisers *Salem*, *Chester*, and *Birmingham*, and that the information requested in this resolution shall include the following:

First. The time required by these ships to make a round trip between the ports named.

Second. The number of passengers which could be carried in each ship as now equipped or with any changes that would not impair their usefulness if required in the naval service.

Third. The amount of freight that each ship could carry under similar conditions; this estimate to include mail as well as freight.

Fourth. The number of naval officers and seamen required to man the ships engaged in the service which is proposed.

Fifth. The probable cost of the service, including the pay of the officers and men employed in connection with it and all other necessary elements, such as wharfage in the cities where the ships would touch, fuel, repairs, and maintenance of every description.

Sixth. The cost of such necessary changes as may be required to put the ships named in condition for such service, in removing unnecessary military equipment and any other changes necessary in order to carry passengers and freight safely and to adequately perform the service proposed in this resolution.

Seventh. An expression of opinion by the department as to whether the above-named ships can be used for such purposes without impairing their usefulness for naval purposes should their prompt return to the naval service be required.

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
Washington, April 11, 1914.

Hon. B. R. TILLMAN,
Chairman of the Committee on Naval Affairs,
United States Senate.

MY DEAR SENATOR: 1. Referring to Senate resolution No. 317, Sixty-third Congress, second session, I have the honor to forward to your committee a report embodying the information requested.

2. It is practicable, by the use of naval vessels, to carry out the purpose indicated in the resolution, and the following vessels will be available for the service, viz. *St. Louis*, *Charleston*, *Milwaukee*, *Columbia*, *Minneapolis*, *Salem*, *Chester*, *Buffalo*, *Rainbow*, *Ancon*, *Cristobal*, *Hector*, *Mars*, *Vulcan*, *Cyclops*, and *Neptune* (or two equally good), and the *Nanshan*.

3. The *St. Louis*, *Charleston*, *Milwaukee*, *Columbia*, and *Minneapolis* are fast cruisers; the *Salem* and *Chester* are fast scout cruisers; the *Buffalo* and *Rainbow* are transports; the *Ancon* and *Cristobal* are steamers employed by the Panama Railroad Co. to be turned over to the Navy Department; and the others are naval colliers.

4. The cruisers are suitable for carrying only a small number of male passengers—15 to 20 each—and could not be fitted for carrying bulky freight without interfering materially with their military value; but they could carry the mails and a limited amount of express freight and parcels, about 150 tons each.

5. The *Buffalo*, *Rainbow*, *Ancon*, and *Cristobal* are suitable for carrying a limited number of passengers and any kind of freight: *Buffalo*, 20 first-class passengers and 4,000 tons of freight; *Rainbow*, 25 passengers and 2,500 to 3,000 tons of freight; *Ancon* and *Cristobal*, each 74 first-class and 32 steerage passengers and between 10,000 and 11,000 tons of freight. The naval colliers are not suitable for carrying any passengers, but are well adapted to a freight service; the first three carrying 6,500 to 10,000 tons each; the two of the *Cyclops* class 10,000 to 12,500 tons of freight and 2,900 tons of fuel oil in bulk each; and the *Nanshan* about 3,000 tons.

6. The distance from New York to Valparaiso via Panama and Callao is 4,666 miles, and each of the fast cruisers going at 15 knots could cover that distance, allowing 24 hours for delays incident to passage through the canal, in 13 days 23 hours; or make one round trip without stop, except at the canal, in 27 days 22 hours.

The distance from New Orleans to Valparaiso via Panama and Callao is 4,087 miles, and the time for the same vessels to make one round trip without stop, except at the canal, is 24 days 17 hours.

The distance from Panama to Valparaiso via Callao is 2,652 miles, and the same vessels can, at 15 knots, cover the distance in 7 days 9 hours, or make one round trip in 14 days 18 hours.

The other vessels are slower, and will sustain a speed of 12 knots, except the *Nanshan*, which can be counted on for 10 knots.

7. By the use of the *Charleston*, *St. Louis*, *Columbia*, and *Minneapolis*, a fast but very expensive mail service, with accommodations for a limited number of male passengers, could be easily maintained between Panama, Guayaquil, Mollendo, and Valparaiso, with weekly sailings from Panama. A far less expensive service could be maintained by the use of the *Salem*, *Chester*, *Columbia*, and *Minneapolis*. These stops would be best for quick deliveries of mails to the South American countries on the west coast, to Argentina, Bolivia, Uruguay, and Paraguay. There is a daily railway express service from Valparaiso to Buenos Aires and Montevideo via the Trans-Andean Railway. The time from Valparaiso to Buenos Aires by rail is about 60 hours, and to Montevideo 72 hours. Allowing four days for the delivery of mails from New Orleans to Panama, and 11 days for delivery from Panama to Valparaiso, the mails from the United States would reach Buenos Aires in 17½ days and Montevideo in 18 days. The time from Liverpool to Buenos Aires by mail steamers running in connection with the Royal Mail Steam Packet Co. is 22 days, and to Montevideo 21 days, on a weekly schedule. From New York to the same ports via existing lines the time is 24 and 23 days, respectively, with a weekly schedule. There is at the present time a weekly mail and passenger service between New Orleans and Colon. If it should be found desirable to run the mail steamers from New Orleans to Valparaiso, it could be done by the addition of another cruiser, but at very greatly increased cost. The cost of running each vessel is given in the table appended marked "A."

8. A passenger and freight line can, in addition, be maintained between New Orleans and Valparaiso, and a freight line between New York and Valparaiso, making such ports as may be necessary; or a combination freight and passenger service and a freight service between New York and Valparaiso.

For a service from New Orleans, the *Buffalo*, *Rainbow*, *Ancon*, and *Cristobal* could be used, insuring a sailing every 14 days.

In addition, a freight line can be maintained between New York and Valparaiso, using the five large colliers, which would insure a sailing every 12 days.

If the vessels mentioned above for the New Orleans trade were combined with the freighters, a mixed service could be maintained, which would insure a steamer from New York every seven days.

The *Nanshan* might be useful as a freighter between Panama, Buenaventura, and Guayaquil.

9. Due to the engine room, fireroom, and bunker construction of the cruisers, a large number of men is required in the engineering department; in addition, these vessels are great coal consumers, and would have to coal both on the outward and return voyages. Since continuity and regularity of mail service would be essential, it would be necessary to maintain at some point on the west coast, preferably at Callao, either ashore or afloat, a reserve of coal. This need could, however, be easily met.

10. The personnel that would be required for the ships is as follows: *Columbia*, *Minneapolis*, *Salem*, and *Chester*, 9 commissioned and 6 warrant officers and 202 men each; *Buffalo* and *Rainbow*, 9 commissioned and 6 warrant officers and 118 men each; *Ancon* and *Cristobal*, 9 commissioned and 6 warrant officers and 135 men each; *Hector*, *Mars*, and *Vulcan*, 7 commissioned and 6 warrant officers and 117 men each; *Cyclops* and *Neptune* (or two others of equal capacity), 7 commissioned and 6 warrant officers and 134 men each; and the *Nanshan*, 7 commissioned and 6 warrant officers and 69 men; a total of 114 commissioned and 84 warrant officers and 2,002 men.

11. The cost of changes necessary to fit the vessels for the proposed service would be small. For the *Rainbow*, on which it is contemplated installing five additional staterooms at a cost of $2,000, $3,000 would be required; and $1,000 for each of the other vessels would probably cover the cost of changes proper. In addition, each vessel carrying passengers would need an auxiliary radio installation required by law for passenger ships. This would cost $2,000 for each vessel, and the total cost for the above vessels would be about $32,000.

12. The pay and subsistence of officers and men to man the 14 ships would be about $1,862,444, and the maintenance of the ships, other than pay and subsistence, including repairs, docking, and supplies of all kinds, would approximate $1,774,250; total, $3,636,694.

13. The probable cost of the shore establishment for operating the lines is difficult to estimate at this time. This would include salaries of officers, agents, clerical force, and other personnel, terminal facilities, wharfage, port dues, rent of offices, furniture, and other expenses, and the department is making an investigation to determine this expense. It is believed, however, that it would be but a small percentage of the total cost, as Government terminal facilities will be used wherever practicable.

14. The expense of such services would, of necessity, be relatively large, due to the character of the vessels to be used and the fact that they must be kept in condition for immediate military service if required. It should be remembered, however, that there would be considerable return to the Government in mail, passenger, and freight receipts.

Retired officers or officers on the reserve list, should one be created, would be employed in the service as soon as practicable, and under such conditions the expense involved in the pay and subsistence of officers, as given in the table, should be reduced by three-fourths.

When it is considered that the men will be enlisted men in the Navy, and available for service with the Navy in time of war, the actual total additional expense for personnel for 14 ships would be but $151,244.

15. Should the department be authorized to establish the service as contemplated in the resolution, it is suggested that the question of ships to be used, ports to be made, schedules, etc., be left entirely to the discretion of the department, and the department would make every effort to carry out the plan successfully. In so doing it is considered best to inaugurate the business by establishing a fast line from Panama to Valparaiso, via Callao and Mollendo, and utilize for the purpose the *Columbia*, *Minneapolis*, *Salem*, and *Chester*. This mail and passenger line, in connection with those now in existence from New York and New Orleans to Colon, would be a rapid-transit route between the United States, Peru, Bolivia, and Chile, and thence, via the Trans-Andean Railway, to Argentina, Uruguay, and Paraguay.

It is not deemed wise to establish at the beginning a schedule that would utilize all the vessels mentioned as available. One sailing a month of freighter or passenger vessel from New York and New Orleans to Valparaiso and intermediate ports would be enough for a beginning. As business developed other vessels would be added, and sailings made more frequent, as the traffic warranted.

The *Rainbow* or *Nanshan*, or both, as the traffic might warrant, would be scheduled to ply between Panama and Guayaquil, Ecuador, via Buenaventura, Colombia. These would carry mails, passengers, and freight, and act as feeders for our freighters passing through the canal and connecting with the mail lines from New Orleans and New York.

As for docks and terminal facilities, the navy yard at New Orleans is well adapted for the purpose, and the New York yard could be used until the traffic warranted renting another terminal. The cost of wharves in New Orleans would depend upon the freight handled, and would, therefore, be included in the freight rates. In South American ports practically all cargoes are handled by means of lighters, the cost of which would be included in the freight rates.

Although it might appear that the cost of maintenance of the four cruisers of the fast-mail line from Panama to Valparaiso is excessive,

this is not so apparent when considered in connection with the freighters. One is necessary to the other for developing the South American trade, and the average cost should be taken. The freighters would begin to pay for themselves at once by taking coal and oil, for which there is great demand, and returning with general freight.

16. The department sees in the plan an opportunity for a twofold advantage:

First. The opportunity for developing a large trade with South America, which is not practicable for private vessels under the United States flag.

Second. The gradual development of a large auxiliary fleet which would be necessary in time of war, and which would be built up and maintained in time of peace without cost to the Government, as it will pay for itself after having once been firmly established.

Should the development of the business warrant, the cruisers used in this service would be gradually replaced by auxiliary vessels vastly more suitable and economical for the service itself as well as for the use of the Navy in time of war.

17. The approximate cost of maintenance of the ships of the lines proposed for beginning the service is as follows:

1. Fast-mail service from Panama to Valparaiso, using the *Columbia*, *Minneapolis*, *Salem*, and *Chester*:

Pay and subsistence of officers and men----per annum--	$597,120
Maintenance, including repairs, docking, supplies of all kinds, etc., per annum----------	790,800
Total----------	1,387,920

2. *Rainbow*, plying between Panama, Buenaventura, and Guayaquil:

Pay and subsistence of officers and men----------	118,840
Maintenance, including repairs, docking, supplies of all kinds, etc----------	81,300
Total----------	199,140

3. Monthly sailings from the terminals, New York and New Orleans, for Valparaiso and intermediate ports, would cost, on the average for each vessel engaged in the service, as follows:

Pay and subsistence of officers and men----------	121,160
Maintenance, including repairs, docking, supplies of all kinds, etc----------	100,500
Total----------	221,660

18. Any of the vessels mentioned for this service can be so employed without impairing their usefulness for naval purposes in any way, should their prompt return to the naval service be required.

19. In indorsing the establishment of this service the department takes occasion to state that the personnel of all vessels engaged in it should be naval officers and enlisted men of the Navy, and it will be necessary to increase the number of men at present allowed by law by the number of men required for this service.

20. The draft of a bill which would, in the opinion of the department, meet requirements is inclosed, marked "B."

JOSEPHUS DANIELS.

[1] Charleston and Milwaukee same as St. Louis in all respects.

[2] 74 first class; 32 steerage

Mr. FLETCHER. Mr. President, it seems to me that the position the Senator then took in furthering his own bill answers his position now and is to be preferred as the sounder of the two. He is moving backward instead of forward in opposing this measure. He then declared that "private capital was not furnishing facilities comparable to those enjoyed by the people of other countries having trade relations with South America," and he proposed to have the Government supply them.

Mr. President, I am reminded at this point of some comment made by Mr. W. D. Boyce, of Chicago, in his very interesting and instructive book, Illustrated South America, page 3, as he was proceeding on his journey to South America, to wit:

I am prompted at this point to speak critically of the peculiar policy of my own country in the matter of ocean commerce, since the vessel on which I sailed was a representative illustration of the absurdity of that policy.

The vessel was owned by the United Fruit Co., a United States corporation, commonly called the Fruit Trust. This corporation owns and sails under foreign flags over 90 ships. These were built abroad, mostly in Scotland, and cost two-thirds of the price of ships of equal tonnage and quality if built in American shipyards. In order to avoid the payment of duties imposed by the United States, they fly foreign flags and have officers who are citizens of and carry papers of foreign countries. Yet our United States shipyards compete with and undersell foreign countries in building ships for foreign navies. This is a United States corporation, selling all its fruit in the United States, and controlling the tropical fruit market as completely as the Standard Oil Co. has controlled the oil business. In the event of war with a foreign nation this Fruit Trust, being a United States corporation, would demand and receive protection for its shore property from the strong arm of the United States. It is rather an anomaly, isn't it? Capt. Lamb, our ship's chief officer, was an Irishman; her purser a Scotchman; her chief cook an Englishman; her flag British; and her firemen, all Chinamen.

Doubtless all the company's 90 vessels are similarly manned.

The questions that arise are these:

1. Why should the ships of a United States corporation fly foreign flags?

2. Why should our Government be called upon to protect the shore property in a foreign country of a trust that has its ships built in other lands?

3. Why should not our laws be so made that it would be possible to build ships in the United States, fly the Stars and Stripes, and officer them with our own brave men?

Mr. Boyce was speaking as a good American citizen, and his impressions and questions are quite natural.

CONSTITUTIONALITY.

I shall not take much time in discussing the constitutional phase of the question. The Senator from Iowa [Mr. CUMMINS] finds constitutional objections to the bill. Clearly, it seems to me, the bill may be rested upon the provisions of section 8, Article I, of the Constitution. Congress is given power, in clause 3—

To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

In clauses 12 and 13 Congress is empowered to raise and support armies and to provide and maintain a navy.

The Senator's own amendment can scarcely be distinguished from the provisions of this bill, so far as the technical, constitutional question is concerned. I have no doubt whatever as to the constitutionality of the law if the bill passes.

OCEAN CARRIAGE BEFORE WAR.

The war has emphasized a situation which was unsatisfactory before and fast getting intolerable.

An extraordinary man is David Lubin, of California, delegate of the United States to the International Institute of Agriculture,

with headquarters in Rome. Patriotic, earnest, sincere, he is a thinker and sees far ahead and comprehends big problems. He was in Washington last August, and he had a few things to say at hearings before the Assistant Secretary of Commerce, Mr. Sweet, and committees of the House and Senate.

Let me read some extracts, first, from Senate Document No. 423, Sixty-third Congress, second session, what he said on the subject of "Cost of ocean carriage" as far back as December, 1913, and January, 1914. Mr. Lubin said:

The slightest turn of the wheel directs the motion of the automobile. The slightest change in the cost of carriage directs the price movement of the staples. The slightest movement in the world's price of the staples directs the economic, the social, the political life of the people. What the wheel is to the movement of the automobile the cost of carriage is to the price movement of the staples.

Then he proceeds, in a letter to Mr. S. S. Pratt, secretary of the Chamber of Commerce of New York, to discuss the subject further, and he quotes from Mr. Pratt's letter. He says:

INTERNATIONAL INSTITUTE OF AGRICULTURE,
Rome, Italy, December 11, 1913.

SERENO S. PRATT, Esq.,
Secretary Chamber of Commerce, New York, N. Y.

DEAR SIR: I have your valued letter of November 24, in reply to mine of the 5th and 7th on the question of reporting the cost of ocean carriage for the staples of agriculture. I am pleased to note that you say "our chamber would be willing to cooperate with you in giving out any information that we feel would be of real value." You point out, however, that there are difficulties in the way which would be likely to render the information on cost of ocean freight rates now available of no utility. You say:

"We have carefully noted your comments and the marked clauses in the report (S. Doc. 961). The matter has been given very careful attention by one of our committee on foreign commerce and revenue laws, who has made inquiries in regard to this matter among the agents of the shipping companies on our New York Produce Exchange. * * * It would be extremely difficult to give any definite information in regard to freights that would be of value in publishing the world's price for cereals."

You further say:

"You no doubt are aware that freight rates, particularly for agricultural products, change almost daily and sometimes several times during the day, depending upon the demand or otherwise for freight room. Rates quoted to-day would be only for refusal for 24 hours, and they are constantly influenced by the fluctuating demand for room in the various steamers. * * * Frequently wheat has been carried between the United States and London free of any charge, being simply used for ballast in the steamers, and at other times the rate has advanced to 10d. and 12d. per bushel."

Now, if what you say of New York also holds good of the other world market centers, what guide, then, have buyer and seller as to the equity of the relation between prices current elsewhere and the home price? If the cost of ocean carriage influences the home price of the product, and if this cost fluctuates to an extent which makes it practically an unknown quantity, what conclusion are we driven to? What but this, that buyers and sellers everywhere lack the data on which to base their calculations so far as this price-forming factor is concerned? That is to say, that buyer and seller, in determining what they should pay and what they should receive, have to guess the probable cost of carriage in the various ports of the world or simply trust to luck and chance. If this is the case in the distribution of the staples of agriculture on such a progressive market as New York it is surely a sad commentary on the state of commercial procedure in the twentieth century.

Then he quotes from a letter from Hon. Walter Scott, of Saskatchewan, Canada, in which he says:

The subject of the cost of ocean carriage is being given a great deal of attention in Canada, so much so that the head of the Canadian railway board [Mr. Drayton] was recently sent to England to inquire into the question with the purpose of ascertaining whether any action is open to the Canadian authorities which would likely lead to a lessening of the exceedingly high rates in force at present. These rates, I understand, have within the past two or three years been largely increased. The question has become acute in Canada.

Mr. Lubin says:

I think it can be shown that the question before us can not be narrowed down to the limits of one or two countries. It is broader than a local issue; it is broader than a national issue; it is, in fact, an international issue. Nor can it be narrowed down to a mere question of high rates or low rates. The real question is one of steady rates, fixed rates, equitable rates, rates periodically fixed in advance for the principal world's ports and promptly made public.

That there is an adequate basis for this stand can be clearly shown by the following illustration:

Let us say that the price of wheat is $1 a bushel in Liverpool; that is to say, $1 a bushel is offered for wheat delivered at the Liverpool warehouse. Wheat is therefore worth $1 at the exporting ports at New York, Seattle, Montreal, Rosario, Odessa, etc., less the cost of carrying it from any of these ports to Liverpool. Now, if the cost of carrying wheat from New York to Liverpool be 24 cents, these 24 cents will be deducted from the dollar, leaving the New York price at 76 cents; 76 cents not only for the quantity exported, but also for the entire quantity in the home market, for it is a well-known fact that the home price and the export price is the same. But if the cost for carrying be nothing, if wheat be carried, say, from New York to Liverpool free of charge, as ballast, the price in New York should then be (barring deductions for minor expenses) $1 as in Liverpool. So, here we have an example in which the price in New York is $1 a bushel one day and 76 cents a bushel the next day.

That this is no fanciful nor overdrawn statement is shown by the following: In reply to my inquiry as to whether this institute could be supplied with regular reports on the cost of ocean carriage, the New York Chamber of Commerce informed me, November 24, 1913, that as there was so much fluctuation in the rates for ocean carriage the publication of those rates could not be of economic value. Corroborative of its statement the chamber said:

"Freight rates, particularly for agricultural products, change almost daily and sometimes several times during the day. * * * Rates quoted to-day would be only for refusal for 24 hours. * * * Frequently wheat has been carried between the United States and London free of any charge, being simply used for ballast in the steamers, and at other times the rate has advanced to 10d. and 12d. per bushel."

It seems to me that instead of disproving the needs for the proposed service, the New York Chamber of Commerce has given facts which strongly support my contention, for here we have an example of the cost of freight ranging anywhere from nothing to 12d. (24 cents) per bushel.

This is intended to show, and does show quite conclusively, that long prior to the war, in 1913, not only had the rates of freight on the transportation lines across the ocean been gradually increasing and were high then, but it was simply impossible to get any quotation that was good for 24 hours on bulk shipments. You could not figure what the freight was on a cargo of grain from New York to Liverpool for over 24 hours. They were liable to shift and change from nothing to 12 pence within 24 hours.

That was the situation prior to the war. We have no reason to believe it will not be the situation when the war is all over, unless there is some way devised for taking this matter out of the absolute, arbitrary, monopolistic control of certain people handling this shipping.

Mr. Lubin made a statement before the Assistant Secretary of Commerce on Friday, August 14, 1914, about a year after this other time, and he again brings that question up. He says:

What is this resolution? Is it a proposition about getting ships to carry our exports overseas during the continuance of this war? It has nothing at all to do with the war, but it has much to do with the question of agriculture, the distribution of agriculture. It has to do with the question of the world's price of the staples, and it has to do with the home price of staples. Say, for instance, that the price of wheat in Liverpool is $1; in other words, the buyer there says, "I will give you a dollar per bushel for wheat." The producer in this country says, "Very good; give me the dollar and I will give you the bushel of wheat," and the buyer in Liverpool says "All right; deliver it right here in my warehouse and you may have the dollar."

And so you see that a carrier is wanted to carry it over the sea, and now if it costs a cent a bushel for delivery from New York to Liverpool the American seller will receive 99 cents for the wheat, or 1 cent deducted from the dollar. If it should cost 25 cents for delivery from New York to Liverpool it would only leave the New York seller 75 cents net a bushel. Seventy-five cents net for what? Is it for the quantity exported? Yes; and, more than that, for the remaining quantity that is left in the home market. For the export price for the staples is the home price likewise, and right here we see there is a great difference between the price-fixing mode of the staples and the price-fixing mode of the manufactures. The cost of carriage on neckties or shoes may advance or decline, but that cost of carriage will not increase or diminish the home or foreign price of all other neckties or shoes. But in the case of the staples of agriculture, inasmuch as they are sold in the bourses, pits, or exchanges, which are practically the world's megaphones, speaking to one another, it thus follows that an increase or decrease in the cost of carriage has an immediate and direct effect in the home market and an indirect effect in the world's price. And this I tried to explain at the last joint meeting that we held on August 1, between the representatives of the Department of Agriculture and the Department of Commerce, when Mr. Harris, the Director of the Census, presided. You will remember, Mr. Harris, the illustration I gave; let me repeat it. We attach a hook in the ceiling and fasten a pulley on the hook, then pass a rope through this pulley and pass the two ends of the rope down on a line horizontal to our arms. We take one end of the rope in the left hand and let that represent the home market price of the staples of agriculture, and we grasp the other end of the rope in the right hand and call it the carrier, and then we do this [indicating]; in proportion as we raise the right hand, down will come the left hand, and as we press the right hand down, up will go the left hand. In other words, when you raise the cost of carriage you lower the home market price correspondingly, and when you reduce the cost of carriage you raise the home market price correspondingly.

And so we see that if we give the carrier full play he has it in his power to raise and lower the home price at will, and in the matter of ocean carriage, if there is a combination of shipowners, they can raise and lower the world's prices at will; they can raise the price of carriage and thus lower the cost of the product and then go into the pit and buy. They can then lower the cost of carriage and raise the price of the product correspondingly, and then sell. They can do this, and make so much money out of producer and consumer until they get tired gathering in money. They can not do this with raising and lowering the cost of carriage on neckties, shirts, typewriters, or desks, but they can do this on the staples of agriculture, because manufactured merchandise is transported at fixed rates, with 30 or 60 days' notice of a change of rates, but the staples of agriculture have no fixed rates of carriage at all. The rate can be 1 cent a bushel one day and it can be 25 cents a bushel the next day.

Now, you and I know that a buyer of manufactured goods must figure it all out in buying, the charge at the place of sale, the cost of carriage to lay the goods down. Without such calculation he could not rationally buy. Now, then, how is a man to buy the staples of agriculture or how is the producer to sell it? What is the basis for their calculation? Since the cost of carriage is an unknown factor, how is the price to be arrived at? We are driven to the conclusion that there is no rational way of arriving at what the price should be. There is a rational way for buying and selling merchandise, for the cost of carriage of merchandise is fixed with 30 or 60 days' notice for any change. But in the case of staples of agriculture there can be no basis for calculation so long as the cost of carriage may vary from day to day and from hour to hour.

"Give us this day our daily bread," and the good Lord gives us this bread, but a lot of irresponsible shipowners come along and by

arbitrarily changing the rates of ocean carriage from day to day, and from hour to hour—by doing this, they put a measuring rod on the bread, which in substance is the same as saying, "The good Lord gives you the bread all right, but we, the shipowners, shall determine for you what the size of that loaf shall be," and when the shipowners have that power they have more power than presidents, emperors, czars, kings, or princes upon this earth, and that is too great a power to have. They should have no such power; it does not fit in with the twentieth century. It is not sensible; it is not just; it is not right; and it should stop and stop for good.

That was the condition prior to the war with reference to this subject. There is not only an emergency now that calls for this legislation; there is a prospect ahead of us that calls for it. The condition before the war was getting to be almost impossible, especially with regard to the transportation of freight. As to the passenger transportation, that was controlled by conference agreements, pools, and combinations. Generally the same condition prevailed as to freight, except the North Atlantic freight. The freight moving southward was all parceled out and controlled by combinations and conference agreements, rates fixed as these people saw fit to fix them, and after the war, of course, the same situation would ordinarily obtain.

DEVELOPMENT OF SHIPS AND SHIPPING.

Now, I wish to make some general observations on the development of shipping and what it means. From the Roman wooden ship with leather sails, the Venetian buss, the Viking ship, to the magnificent liner of to-day is a romantic and interesting story. From the expedition of Richard I, which taught English sailors, to the trip of the *Oregon*, the story embraces discoveries of continents and world communication. In the period from the laws and judgments of Oléron, in 1194, to the modern admiralty laws and rules and regulations respecting navigation, the history of civilization and enlightenment has been written. Improvement has followed improvement in design, construction, and motive power, and the great shipyards of Belfast and elsewhere are to-day preparing to build ships one-third larger than the *Olympic* and *Titanic*. The tendency is to overdo size at the expense of safety and to stress speed to the increase of risk and danger.

From the days of the celebrated East India Co., chartered in 1599 by Elizabeth to the Earl of Cumberland and about 200 knights and merchants, it has been the experience that trade is developed by going after it. The largest ship of this company was the *Dragon*, 600 tons. One wonders what the earl would think of the 56,000-ton *Vaterland*. Ships have increased in size on an average of a hundred tons a year.

The American clippers, the fast-sailing Baltimore brigs, were once our pride, and compelled British shipowners to devise new designs. The period of the sailing ship was between 1850 and 1890. The keenest rivalry for the ocean carrying trade of the world existed between the United Kingdom and the United States during the first half of the nineteenth century. American foreign trade spurted ahead about 1830, and by the year 1850 our total tonnage, including lake and river craft, was only about 750,000 tons below that of England. By 1861 the margin was reduced to about 250,000 tons.

After the Civil War we concentrated our efforts on internal development. British shipbuilders produced a faster and better type than our clippers. They substituted iron for wood as material for construction. England repealed in 1849 her old navigation laws, and five years later threw open her coasting trade to all comers. These were the operative causes for the decline of American shipping.

It is worth noting, though our own experience causes us not to be surprised, that British shipowners protested most vigorously against changing the navigation laws and declared most earnestly that they would be ruined. These shipowners had insisted on more and more restrictions. They caused the passage of the act prohibiting any foreign ships trading with the "American Plantations" (Colonies) unless licensed, and in October, 1651, Cromwell's full policy came into operation and the navigation act provided that no goods or commodities whatever of the growth, production, or manufacture of Asia, Africa, or America should be imported into England, Ireland, or the English Plantations except in British-built ships, owned by British subjects, or of which the captain and not less than 75 per cent of the crew were British subjects. The war with Holland resulted. All this legislation and all these provisions were repealed in 1849. It is still the law, however, that the trade from any one part of any British possession in Asia, Africa, and America to another part of the same possession can only be carried on in British ships.

In October, 1849, we threw open the foreign trade of the Union, but retained the coasting trade in its integrity for the benefit of American bottoms.

The trans-Atlantic service as it exists to-day really commenced in 1838 with the steamers *Sirius* and *Great Western*. The auxiliary steamer *Savannah* crossed the Atlantic in 1819, taking 29½ days. The *Sirius* crossed in 17 days and the *Great Western* in 15 days. In 1905 the turbine steamer *Virginian* made the record Atlantic passage in 4 days and 6 hours.

The desire for speed has always been an unfortunate feature of trans-Atlantic voyages. Always good business management has been as essential to success as fine ships and powerful engines. The invention of the compound engine solved the problem of producing a cargo steamer which would be a commercial success. The typical cargo steamer, as given by Mr. Kirkaldy, measures 7,760 tons gross, 4,870 tons net; length, 470 feet; beam, 54 feet; depth of hold, 31 feet. Her cargo-carrying capacity is 10,400 tons; consumption of coal, 68 tons a day; steams 4½ knots per ton; average sea speed, 13 knots per hour. He estimates the cost of transporting a ton of goods 1,000 miles at 2 shillings. Such a steamer ought to be built for not exceeding $600,000.

The authorities say shipping is divided into two great classes—the liner, carrying pasengers, mail, and cargo, and the tramp, fitted to go anywhere and do anything, capable of picking up freight at a large number of widely scattered ports. The tramp is the one great ship which has carried civilization into the remotest parts of the earth by opening up trade routes, and it has never been subsidized by any country.

The English adopted the policy of combinations about 10 years ago when they thought Americans were endeavoring to get command of the north Atlantic trade by forming the International Mercantile Marine Co., consisting of the White Star, American, Red Star, Atlantic Transport, Leyland, and Dominion Lines, the fleet in 1912 numbering 126 ships and moving 1,140,000 gross tons. Out of this precedent amalgamations and working agreements have flourished exceedingly. This "unification of interests" tends irresistibly toward a gigantic world monopoly under the control of the leaders of British shipping.

In the continental and international conference now in operation the procedure followed is based on—

First, a division of areas.

Second, a consolidation of rebate systems.

Third, agreements or understandings that the same rates are to be charged on similar goods from the United Kingdom and the Continent.

The gross tonnage of ships and steamers belonging to the United Kingdom in 1912 was 18,213,620, which, together with 1,660,740 tons belonging to the Colonies, gives a total of 19,824,360 for the Empire.

England has appreciated the importance of a merchant marine. She does a business of $65,000,000,000 a year. It means commerce and exchange, without which the conditions of living for the greater part of mankind would be one of uncertainty. Thereby the luxuries of the rich have become the necessities of daily life.

The land road and the caravan were the original route and vehicle of exchange. The water road, river, lake, and sea was developed. First, coasting voyages were attempted. Then the ocean route was opened up and the countries of the world were brought into touch. Railways revolutionized the land route. The engineer, scientist, and navigator have carried the world's trade to all points of the earth's surface possessing economic advantage.

By removing the bar at Suez the distance between western Europe and India was reduced 4,000 miles. The advice to Philip II that "what God had joined together man must not part asunder" has been recognized as a species of superstition. The isthmus has been pierced, and the distance and danger of voyages from Europe to Pacific ports and countries have been greatly reduced by the opening of the Panama Canal. The cruelty and wrongs of the Spanish Main growing out of the absurd bull by Pope Alexander VI, giving Spain and Portugal exclusive rights on the seas, disappeared along with the recognition that the sea is the open free highway of trade for all the people of the earth.

English shipowners strongly opposed the building of the Suez Canal. Engineers said it could not be done. It took 10 years to break down the opposition. New types of ships were built. The British flag is first among the 5,000 ships which pass through it annually. The time required is 17 hours, and the original £20 shares are now worth £220.

Increased trade means cheaper transports and cheaper goods, raises the standard of living, and furthers the ends of civilization.

The great industrial and manufacturing centers of the world are the United Kingdom, Germany, and the Eastern States of the United States. The great food-producing countries are

North and South America, parts of eastern Europe, and the countries of the Far East, including Australia and New Zealand. The United States is the only country which is not only a hive of manufacturing industry but also produces sufficient food for themselves and a large quantity for export. This means a large trade in the export of both manufactured goods and foodstuffs. What we need are ocean carriers. The countries supplying raw material are northwestern Europe, North and South America, India, China, Japan, and Australasia.

The Panama Canal will give our manufacturers an advantage of 2,500 miles over British manufacturers to New Zealand. All Japanese and New Zealand and Australasia ports east of Port Lincoln will be nearer New York via Panama than to London by any route.

The western coasts of South and Central America are opened up to us. Our own eastern and western coasts are brought into water communication. We are proceeding to deal with that factor in commerce, the rate of exchange. Goods pay for goods in international trade, but the relation is fixed by money values. The bill of exchange is the medium for settling the great bulk of international trade. The price of a bill is known as the rate of exchange, and this is definitely determined by the cost of transporting and insuring gold. Fluctuations and difficulties are experienced with China, because she does not have the gold standard.

Considering this bare sketch of conditions to-day without regard to disturbances by the European war we can understand how it is stated by English authorities that the focusing points of the world's shipping routes now are:

First, that stretch of sea lying between the south of Ireland and Ushant, where St. Georges Channel, the British Channel, and the English Channel all merge in the Atlantic Ocean.

The second great focusing point of the world's shipping routes at present lies between Cape Race and Long Island.

The Panama Canal will give the third, perhaps destined to become as important as the other two. American coal should be stored at both ends of that canal.

An American merchant marine would add to our prosperity, give us foreign markets, strengthen us among the nations and benefit all those with whom we would form friendly relations thereby.

Let us not overlook our opportunities nor shirk our responsibilities.

The passage of this bill means work for our shipyards, steady shipbuilding and ship repairing, putting these industries under full steam, causing their highest development and greatest efficiency, resulting in enabling them to turn out work as favorable to builders as the yards of any country can. Perfection in designs and types of standards have not been reached. We can accomplish as much in that direction as any other people. Private enterprise will be thus encouraged and helped. The trade routes just now are in a situation to be shaped as our trade possibilities demand, and as those entirely feasible are established it becomes simply a question of growth. The development is bound to afford opportunities inexhaustible in extent for private capital. The intervention of the Government while benefiting the producers and shippers of the country will likewise advantage, not injure, what is known as the shipping interests in the legitimate pursuit of their business.

It will be a mistake for which the future will pile up increasing regret if we fail at this opportune time to take proper care of our foreign commerce by doing what will place us on a solid footing from which we can shove out from shore a definite, substantial beginning of an American merchant marine, launched with the purpose that it shall not be scuttled, but that every care shall be taken that the fleet shall grow, increased by private enterprise, serving our country in every capacity needed, carrying our flag and good will on every sea.

PETITIONS AND MEMORIALS.

Mr. KERN presented petitions of the United Mine Workers' Association of Jasonville, Terre Haute, Newburg, and Hymera, all in the State of Indiana, praying for the enactment of legislation to extend the Bureau of Mines, which were referred to the Committee on Mines and Mining.

He also presented petitions of sundry citizens of Stendal, Jonesville, and Woodburn, all in the State of Indiana, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. PERKINS presented petitions of sundry citizens of Los Angeles, Cal., praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. TOWNSEND presented petitions of sundry citizens of Michigan, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of Kalamazoo and Addison, in the State of Michigan, remonstrating against the enactment of legislation to authorize the Postmaster General, at his own discretion, to exclude matter from the mail, which were referred to the Committee on Post Offices and Post Roads.

Mr. McLEAN presented petitions of Local Branch No. 84, Workmen's Sick and Death Benefit Fund, of Meriden; of the German-American Alliance of Norwalk; and of sundry citizens of Danbury and South Norwalk, all in the State of Connecticut, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented a petition of the Trades Council of New Haven, Conn., praying for the enactment of legislation to regulate interstate commerce in convict-made goods, which was ordered to lie on the table.

Mr. OLIVER presented petitions of sundry citizens of Pennsylvania, praying for the enactment of legislation to prohibit the exportation of ammunition, etc, which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of Stoneboro, Pa., remonstrating against the enactment of legislation increasing the Army and Navy equipment, which were referred to the Committee on Military Affairs.

He also presented a memorial of sundry citizens of Philadelphia, Pa., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, etc., which was referred to the Committee on Interstate Commerce.

He also presented memorials of sundry local branches of the United Mine Workers of America in the State of Pennsylvania, praying for the enactment of legislation to extend the Bureau of Mines, which were referred to the Committee on Mines and Mining.

He also presented a memorial of the Professional Club, of Philadelphia, Pa., remonstrating against the enactment of legislation to prohibit the intermarriage of white and colored persons in the District of Columbia and the Territories, which was referred to the Committee on the District of Columbia.

He also presented memorials of sundry citizens of Pennsylvania, remonstrating against the enactment of legislation to change the present practice of issuing Government stamped envelopes bearing printed return requests, which were referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of Pennsylvania, remonstrating against the enactment of legislation proposing to restrict the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

Mr. CHAMBERLAIN presented petitions of sundry citizens of Oregon, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of Oregon, remonstrating against the enactment of legislation to exclude certain publications from the mails, which were referred to the Committee on Post Offices and Post Roads.

Mr. TOWNSEND presented petitions of sundry citizens of Michigan, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of Michigan remonstrating against the exclusion of certain matter from the mails, which were referred to the Committee on Post Offices and Post Roads.

Mr. BURLEIGH presented memorials of sundry citizens of Aroostook County, Me., remonstrating against the exclusion of certain matter from the mails, which were referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the National German-American Alliance, of Lewiston, Me., praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which was referred to the Committee on Foreign Relations.

Mr. McLEAN presented petitions of Court Schiller, No. 117, Foresters of America of Meriden; of the Hungarian societies and sundry citizens of South Norwalk; of Rev. W. von Schenk and 130 other citizens of Rockville; and of sundry citizens of Danbury, all in the State of Connecticut, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of Bridgeport, Conn., remonstrating against the exclusion of certain matter from the mails, which were referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of Gavel Lodge, No. 18, Knights of Pythias, of Naugatuck, Conn., remonstrating against any change being made in the existing law providing for the printing of Government return envelopes, which was referred to the Committee on Post Offices and Post Roads.

Mr. ROBINSON presented petitions of sundry citizens of Batesville, Ark., praying that an appropriation be made for the construction of seven locks and dams on the Upper White River, Ark., which were referred to the Committee on Commerce.

Mr. SHIVELY presented a petition of local union No. 2196, United Mine Workers of America, of Terre Haute, Ind., and a petition of Local Union No. 1967, United Mine Workers of America, of Hymera, Ind., praying for the extension of the work of the Bureau of Mines, which were referred to the Committee on Mines and Mining.

He also presented a petition of the Young People's Association of the First Evangelical Church, of Elkhart, Ind., and a petition of the Epworth League of St. Paul's Methodist Episcopal Church, of Elkhart, Ind., praying for the Federal censorship of motion-picture films, which were referred to the Committee on Education and Labor.

He also presented a petition of V. G. Tolbert, A. Heacock, B. C. Strode, and 47 other citizens of Decker, Ind., praying for the enactment of legislation authorizing a return of a citizen to his own State after his acquittal of the charge of crime in another State, which was referred to the Committee on the Judiciary.

Mr. POINDEXTER presented petitions of Local Union No. 2610 and Local Union No. 2583, United Mine Workers of America, of Roslyn, and of Local Union No. 2747, United Mine Workers of America, of Issaquah, all in the State of Washington, praying for the extension of the work of the Bureau of Mines, which were referred to the Committee on Mines and Mining.

He also presented petitions of Local Union No. 201, United Garment Workers, and sundry other labor organizations of Tacoma, and of Local Union No. 626, Culinary Alliance, and sundry other labor organizations of Walla Walla, all in the State of Washington, praying for the enactment of legislation to regulate interstate commerce in convict-made goods, which were referred to the Committee on Interstate Commerce.

He also presented a petition of the Woman's Christian Temperance Union, of Davenport, Wash., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of the board of trustees of the Merchants' Exchange of Seattle, Wash., praying for the appointment of a commission to revise the navigation laws and regulations, and remonstrating against the passage of the pending ship-purchase bill, which was ordered to lie on the table.

He also presented memorials of the American Federation of Labor, of Philadelphia, Pa., and of Mr. A. O. Wharton, president railroad employees' department, American Federation of Labor, of St. Louis, Mo., remonstrating against the enactment of legislation to extend the boiler-inspection laws, which were referred to the Committee on Interstate Commerce.

He also presented petitions of the United Brotherhood of Carpenters and Joiners of America, Union No. 1335, and sundry other labor organizations of Seattle; Cigar Makers' Union No. 113 and sundry other labor organizations of Tacoma; of Timberworkers Union No. 2 and sundry other labor organizations of Everett; and Longshoremen's Union, Local No. 38-25, and sundry other labor organizations of Bellingham, all in the State of Washington, praying for the passage of the so-called La Follette seamen's bill, which were referred to the Committee on Commerce.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. KERN:

A bill (S. 7459) for the relief of William E. Murray; to the Committee on Claims.

A bill (S. 7460) granting a pension to Anna Mitchell (with accompanying papers);

A bill (S. 7461) granting an increase of pension to John M. Taylor (with accompanying papers);

A bill (S. 7462) granting an increase of pension to Helen Morgan (with accompanying papers);

A bill (S. 7463) granting a pension to Rosalie A. Partridge (with accompanying papers);

A bill (S. 7464) granting an increase of pension to William E. Howard (with accompanying papers);

A bill (S. 7465) granting an increase of pension to Jacob Boyd (with accompanying papers); and

A bill (S. 7466) granting a pension to Margaret Hayden (with accompanying papers); to the Committee on Pensions.

By Mr. LA FOLLETTE:

A bill (S. 7467) granting an increase of pension to Lydia A. Brockway (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 7468) granting an increase of pension to William R. Donaldson (with accompanying papers); to the Committee on Pensions.

By Mr. OLIVER:

A bill (S. 7469) granting an increase of pension to William Hawkins (with accompanying papers); to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 7470) granting a pension to Albert C. Schuman (with accompanying papers); to the Committee on Pensions.

By Mr. SHIVELY:

A bill (S. 7471) granting an increase of pension to Joseph A. Nolan;

A bill (S. 7472) granting an increase of pension to Michael Galligan;

A bill (S. 7473) granting an increase of pension to John P. Leister;

A bill (S. 7474) granting an increase of pension to Frederick W. Green;

A bill (S. 7475) granting an increase of pension to Elisha Thomas (with accompanying papers); and

A bill (S. 7476) granting an increase of pension to James B. Kitts (with accompanying papers); to the Committee on Pensions.

By Mr. ROBINSON:

A bill (S. 7477) granting a pension to Andrew J. Pope; to the Committee on Pensions.

By Mr. REED:

A bill (S. 7478) granting an increase of pension to Robert R. Ferris (with accompanying papers); to the Committee on Pensions.

By Mr. SWANSON:

A bill (S. 7479) granting an increase of pension to William Henry Beck; and

A bill (S. 7480) granting a pension to Viney Blanks; to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 7481) granting a pension to Frank J. Bauer (with accompanying papers); to the Committee on Pensions.

By Mr. BURLEIGH:

A bill (S. 7482) granting an increase of pension to James M. Palmer; and

A bill (S. 7483) granting an increase of pension to Gardiner Roberts, jr.; to the Committee on Pensions.

By Mr. SHIVELY:

A bill (S. 7484) granting an increase of pension to Jackson Smith; to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 7485) granting an increase of pension to Job Ingram (with accompanying papers); and

A bill (S. 7486) granting a pension to Alice Cox (with accompanying papers); to the Committee on Pensions.

By Mr. CATRON:

A bill (S. 7487) granting an increase of pension to Aniceta R. de Lopez; to the Committee on Pensions.

A bill (S. 7488) for the relief of the owners of the Nicolas Duran de Chaves grant; to the Committee on Claims.

By Mr. OLIVER:

A bill (S. 7489) granting a pension to William Bowen; to the Committee on Pensions.

RIVER AND HARBOR APPROPRIATIONS (H. R. 20189).

Mr. SHEPPARD submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. THORNTON submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. CULBERSON submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

AMENDMENT TO ARMY APPROPRIATION BILL.

Mr. O'GORMAN submitted an amendment proposing to reappoint officers of the Army who were mustered out without a hearing under General Orders No. 1, January 2, 1871, etc., intended to be proposed by him to the Army appropriation bill (H. R. 20347), which was referred to the Committee on Military Affairs and ordered to be printed.

OMNIBUS CLAIMS BILL.

Mr. CATRON submitted an amendment intended to be proposed by him to the omnibus claims bill (H. R. 8846), which was ordered to lie on the table and be printed.

RECESS.

Mr. KERN. I move that the Senate take a recess until 11 o'clock to-morrow morning

The motion was agreed to, and (at 10 o'clock and 15 minutes p. m., Thursday, January 28, 1915) the Senate took a recess until to-morrow, Friday, January 29, 1915, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

THURSDAY, *January 28, 1915.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord, deliver us from the superstitions which make cowards of us all, the sins which make us slaves, and lift us into the higher realms of thought and purity, that we may worship Thee in spirit and in truth, think our own thoughts, act our own volitions, and harmonize our souls with Thy will. In the Christ spirit. Amen.

The Journal of the proceedings of yesterday was read and approved.

HOUR OF MEETING ON FRIDAY AND SATURDAY.

Mr. UNDERWOOD. Mr. Speaker, in order to expedite the passage of the naval appropriation bill, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow morning, Friday, and that when the House adjourns on Friday it adjourn to meet at 11 o'clock on Saturday morning.

The SPEAKER. The gentleman from Alabama asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow, and that when it adjourns to-morrow it adjourn to meet at 11 o'clock a. m. Saturday. Is there objection?

Mr. BORLAND. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman if it is intended to bring on the naval appropriation bill right immediately following the disposal of the Agricultural bill?

Mr. UNDERWOOD. Yes. If we finish the Agricultural bill to-day at an early enough hour, I think the chairman of the Committee on Naval Affairs expects to take up the naval appropriation bill to-day.

Mr. BUTLER. Has the gentleman consulted with the chairman of the Committee on Naval Affairs? I notice that he is not here.

Mr. UNDERWOOD. Yes. I am making the request at his suggestion.

Mr. BUTLER. I thank the gentleman very much.

Mr. BARTLETT. Is it the desire of the gentleman from Alabama and that of the gentleman from Tennessee, the chairman of the Committee on Naval Affairs, that the naval appropriation bill shall follow this bill?

Mr. UNDERWOOD. The Speaker arranges how the bills shall come in. My understanding is that the chairman of the Committee on Naval Affairs will be recognized.

Mr. BARTLETT. Yes. That is perfectly satisfactory to me.

Mr. MANN. I suppose that is a matter between the gentleman from Tennessee [Mr. PADGETT] and the gentleman from Georgia [Mr. BARTLETT]. We might be able to run in the pension appropriation bill at some odd moment.

The SPEAKER. The Chair takes these bills up in the order in which they are reported, unless there is some good reason for acting otherwise upon them.

Mr. BARTLETT. Then, Mr. Speaker, acting on the suggestion of the chairman of the Committee on Naval Affairs, I suggest that the Naval appropriation bill, if ready, shall follow the Agricultural bill.

Mr. UNDERWOOD. The Speaker has not put the question.

The SPEAKER. Is there objection?

There was no objection.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries.

EXTENSION OF REMARKS.

Mr. BULKLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Ohio [Mr. BULKLEY] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. MANN. Assuming that it is on the subject of rural credits, is that to print a lot of stuff in the RECORD?

Mr. BULKLEY. It is for printing some information on the subject of rural credits.

Mr. MANN. It is not newspaper clippings and the like?

Mr. BULKLEY. No. It is careful work.

The SPEAKER. Is there objection?

There was no objection.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 20415, the Agricultural appropriation bill.

The motion was agreed to.

The SPEAKER. The gentleman from Missouri [Mr. HAMLIN] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 20415, the Agricultural appropriation bill, with Mr. HAMLIN in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 20415, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 20415) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1916.

The CHAIRMAN. The Clerk will proceed with the reading of the bill for amendment.

The Clerk read as follows:

DIVISION OF PUBLICATIONS.

Salaries, Division of Publications: One editor, who shall be chief of division, $3,250; 1 editor, who shall be assistant chief of division, $2,500; 1 chief clerk, $2,000; 2 assistant editors, at $2,000 each; 4 assistant editors, at $1,800 each; 1 assistant editor, $1,600; 1 assistant editor, $1,400; 1 assistant editor in charge of indexing, $2,000; 1 indexer, $1,400; 1 assistant in charge of illustrations, $2,100; 2 draftsmen or photographers, at $1,600 each; 2 draftsmen or photographers, at $1,500 each; 2 draftsmen or photographers, at $1,400 each; 1 draftsman or photographer, $1,300; 6 draftsmen or photographers, at $1,200 each; 1 assistant photographer, $900; 1 assistant in charge of document section, $2,000; 1 assistant in document section, $1,800; 1 foreman, miscellaneous distribution, $1,500; 1 forewoman, $1,400; 1 clerk, class 3; 1 clerk, class 2; 9 clerks, class 1; 16 clerks, at $1,000 each; 40 clerks, at $900 each; 18 clerks, at $840 each; 2 skilled laborers, at $900 each; 8 skilled laborers, at $840 each; 4 skilled laborers, at $780 each; 16 skilled laborers, at $720 each; 1 folder, $1,000; 2 folders, at $900 each; 2 skilled laborers, at $1,100 each; 1 skilled laborer, $1,000; 2 messengers, at $840 each; 2 messengers, at $720 each; 3 messengers or messenger boys, at $600 each; 2 messengers or messenger boys, at $480 each; 2 messengers or messenger boys, at $420 each; 2 messengers or messenger boys, at $360 each; 1 laborer, $840; 2 laborers, at $600 each; 4 charwomen, at $480 each; 3 charwomen, at $240 each; in all, $174,750.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Missouri [Mr. BORLAND] moves to strike out the last word.

Mr. BORLAND. Mr. Chairman, I have noticed in dealing with this particular bureau of the Department of Agriculture that they have a system of writing a letter, written on a typewriter by some clerk, signed by the Chief of the Bureau of Publications, in response to every addressed frank that is sent to them requesting that a publication be sent to any person in the United States. I have frequently gotten as high as a dozen or 20 of these in a single morning in response to addressed franks sent out by my clerk.

Now, it seems to me that that is a great deal of labor, to write a letter of some five or six lines on a typewriter, merely to tell me that the addressed frank has been used and that the publication has been sent. It may be a matter of very trifling interest to me and not of very great interest to the man who receives it. Still he is entitled to the Government publication, and I am glad to send it to him, and sometimes it is of value. But it does not seem to me that it is necessary to write a letter about it.

Mr. RUBEY. Mr. Chairman, will my colleague yield?

Mr. BORLAND. Yes.

Mr. RUBEY. I have received some of these acknowledgments in which they acknowledge receipt of a number of franks all at once.

Mr. BORLAND. Yes; and so have I. Sometimes they combine several in one letter.

Mr. RUBEY. Is not that because you combine several franks in one request?

Mr. BORLAND. Yes; that may be.

Mr. RUBEY. If you put all the requests in one letter, you will probably get one acknowledgment for them all.

Mr. BORLAND. Yes; but that depends on how my clerk sends them out, or it depends on whether I get the requests all at the same time. But the main point is that, so far as the department is concerned, it is useless to write a letter of that kind at all. It seems to me a blank form or a little printed slip would do just as well, if any acknowledgment is necessary.

Mr. PAGE of North Carolina. Mr. Chairman, that is just what I was going to suggest to the gentleman, that a printed form slip would serve every purpose and save the time of at least one stenographer, and I should think of half a dozen, which it must take to reply to the receipt of these address blanks sent by the Members of Congress. That work must take the time of several employees in this department, and I think the suggestion of the gentleman is a wise one.

Mr. BORLAND. In view of the fact that there are 437 Members of the House and 96 Members of the Senate, manifestly one stenographer can not attend to that business, if it is all done on the same scale as it is in regard to my requests.

Mr. LEVER. I am satisfied the suggestion of the gentleman will be taken under consideration by the officials in charge of the work. It is a good suggestion.

Mr. BORLAND. I withdraw the pro forma amendment.

The CHAIRMAN. The gentleman from Missouri withdraws the pro forma amendment.

Mr. MADDEN. Mr. Chairman, I move to strike out the last two words, and I ask unanimous consent that I may be allowed to proceed for 10 minutes, and not to talk on the particular item that is before the committee, but on the bill.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for 10 minutes, without confining his remarks to this particular paragraph. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Chairman, on page 2265 of the CONGRESSIONAL RECORD of January 25 the gentleman from South Carolina [Mr. LEVER] said:

> The statement has been made several times on the floor of the House carrying inferences that there was some sectionalism in this bill in the expenditure of the money carried by it. In order that the country may have the facts, I want to ask unanimous consent in this connection to publish some figures issued by the Department of Agriculture showing the expenditure of funds by sections.

In the course of the colloquy which followed I reserved the right to object to the unanimous consent, in order to inquire of the gentleman from South Carolina how the divisions referred to in which the money was distributed were made, and inquired if the statement was to show the expenditures by States, to which the gentleman from South Carolina replied, "No; not by States."

I was curious to see whether there was, as a matter of fact, any sectionalism in the distribution of the funds, and I have taken the pains to make an analysis of the distribution of the appropriations covered by the statement placed in the RECORD by the gentleman from South Carolina.

The analysis of the expenditures is interesting and instructive. I am sure it will throw light upon the manner in which the money is distributed. Here it is:

Appropriations in Agricultural bill for 1914 and 1915.

States.	Excepting Forest Service and Weeks law.		Including Forest Service and Weeks law.	
	1914	1915	1914	1915
Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut	$885,692.88	$1,190,412.70	$1,508,365.81	[1] $1,426,243.70
New York, New Jersey, and Pennsylvania	1,194,013.60	1,361,927.84	1,202,783.60	[2] 1,369,714.84
Ohio, Indiana, Illinois, Michigan, and Wisconsin	1,771,953.78	2,261,669.71	1,922,998.78	[3] 2,420,678.67
Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas	1,939,529.63	2,395,493.02	2,092,038.63	[4] 2,551,281.02
Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, and Florida	1,450,381.69	1,963,220.59	1,731,404.21	[5] 4,559,859.5
Kentucky, Tennessee, Alabama, and Mississippi	$677,691.04	$967,866.55	$726,348.48	[6] $1,965,055.55
Arkansas, Louisiana, Oklahoma, and Texas	1,037,477.71	1,364,231.20	1,121,566.71	[7] 1,449,709.20
Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada	1,109,691.03	1,390,148.73	4,156,263.03	[8] 4,539,875.73
Washington, Oregon, and California	793,356.92	989,234.36	2,503,236.92	[9] 2,701,558.36
Alaska, Hawaii, Porto Rico, and Guam	131,736.19	147,241.09	180,631.19	[10] 196,618.09
Washington, D. C.	4,111,572.54	4,466,499.81	4,555,287.54	[11] 4,931,577.81
SUMMARY.				
Virginia, West Virginia, Maryland, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiana, Arkansas, Oklahoma, and Texas (15 Southern States)	$3,103,389.00	[12] $1,223,316.04	$3,517,157.96	[13] $7,933,036.04
Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas, Delaware, Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, Hawaii, Porto Rico, and Guam (33 Northern States, and Territorial and insular possessions)	7,825,974.03	[14] 9,736,127.45	13,566,317.96	[15] 15,205,681.41

[1] Decrease, $82,122.11.
[2] Increase, $157,932.24.
[3] Increase, $497,679.89.
[4] Increase, $459,242.39.
[5] Increase, $2,828,455.38.
[6] Increase, $1,239,705.07.
[7] Increase, $327,942.49.
[8] Increase, $383,612.70.
[9] Increase, $198,292.44.
[10] Increase, $15,986.90.
[11] Increase, $376,290.27.
[12] Increase, $1,119,927.04.
[13] Increase, $4,415,878.08.
[14] Increase, $1,910,189.42.
[15] Increase, $1,639,603.45.

The grouping of the States by the department is ingenious, and unless one made a comprehensive study of the expenditures under that grouping it would not be possible to tell how one section of the country is discriminated against in favor of another, but I feel sure that with this analysis no one will have any difficulty in reaching the conclusion that there is such discrimination.

For example, the analysis shows that Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut received $82,122.11 less in the current law than they did for the fiscal year 1914.

New York, New Jersey, and Pennsylvania received $157,932.24 more in 1915 than in 1914.

Ohio, Indiana, Illinois, Michigan, and Wisconsin, $497,679.89 more.

Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas, $459,242.39 more.

Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, and Florida received $2,828,455.38 more in 1915 than in 1914.

Kentucky, Tennessee, Alabama, and Mississippi received $1,239,705.07 more.

Arkansas, Louisiana, Oklahoma, and Texas received $327,942.49 more.

Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada received $383,612.70 more.

Washington, Oregon, and California received $198,292.44 more.

Alaska, Hawaii, Porto Rico, and Guam, $15,986.90 more.

Washington, D. C., received an increase of $376,290.37 over 1914.

Virginia, West Virginia, Maryland, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiana, Arkansas, Oklahoma, and Texas, 15 Southern States, received $3,517,157.96 in the 1914 Agricultural appropriation bill and $7,933,096.04 in the current law, or an increase of 202 per cent. Think of it.

Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania,

Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas, Delaware, Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, Hawaii, Porto Rico, and Guam, 33 Northern States and 4 Territorial and insular possessions, received $13,566,317.96 in the 1914 bill and $15,205,951.41 in the current law, an increase of only 11 per cent as compared with 202 per cent increase for the 15 Southern States above indicated.

In this connection it will be interesting to note that the 15 Southern States receiving out of the Agricultural appropriation for the current fiscal year an increase of $4,415,938.08, paid into the Treasury in corporation and individual income tax $5,987,642.85, while the 33 Northern States and the 4 Territorial and insular possessions, which received an increase of but $1,639,633.45 in the current law over that of 1914, paid into the Treasury in 1914 in corporation and individual income tax $54,722,623.67.

The expenditures in the Washington office in 1914, amounting to $4,555,287.54, were about 24 per cent of the whole appropriation, while the apportioned expenses of the office for 1915, amounting to $4,931,577.81, were 25 per cent of the total appropriation, and the increase for 1915 over that of 1914 amounts to about 12 per cent.

To say that this is an extravagant overhead charge is to state the case mildly.

I do not assert that the statement made by the Department of Agriculture, and introduced by the gentleman from South Carolina, grouping the expenditures for 1914 and 1915, was intended to make it impossible for anyone to understand the facts, but I do assert that no one, without a very close study of the question could possibly tell from the statement really what was expended and what proportion was expended in the different sections, but I have undertaken that study for the purpose of giving to the House the information which every Member ought to be able to read and understand, without making a technical analysis of the figures and for the purpose of placing before the country the facts.

Of course no one can tell how the appropriations made in the bill now pending will be distributed by the department, but it is fair to assume that the same rule will be applied in the distribution of the funds that characterized the distribution made under the current law, in which event it is obvious that discrimination in favor of one section and against another will be practiced.

Mr. LEVER. Mr. Chairman, I do not desire to take the time of the committee in answering the statement of the gentleman from Illinois. In fact, I have not had an opportunity to analyze these figures myself. I put them into the RECORD just as they were handed to me by officials of the department.

I can say this, and I think it will be confirmed by every member of the Agricultural Committee on this side and on that, that this bill is drawn with no view of giving any section of the country any advantage over any other section of the country.

Mr. MADDEN. I think that is true.

Mr. LEVER. I believe that Republican members of the committee will acquiesce in that statement.

Mr. MADDEN. Will the gentleman yield to me just for a moment?

Mr. LEVER. Certainly.

Mr. MADDEN. I did not charge the committee with any discrimination. I simply charged that the department, in the distribution of the funds, had discriminated.

Mr. LEVER. I think, looking over the summary furnished by the department, that the summary shows that the 15 Southern States, or the South Atlantic States, get about one-third of the total appropriation from the Department of Agriculture.

Mr. MADDEN. They get more than half.

Mr. LEVER. The gentleman has the figures more clearly in mind than I have, but I think the gentleman, in his analysis, is overlooking the fact that about $1,500,000 is included of the appropriation under the Weeks law, which has largely in the last few years been going into the Southern States. But taking the real, genuine work of the department, even including the Weeks law, I think the gentleman will find, upon careful study of the figures, that the Southern States get about one-third of the appropriations, or about what they are entitled to; although I do not think either the Committee on Agriculture, the Department of Agriculture, or the House itself ought to be concerned very much as to where these funds are being expended. The question is, Are they being expended where they are needed and where they will do the most service to the entire country?

Mr. GOULDEN. Will the gentleman yield?

Mr. LEVER. I will.

Mr. GOULDEN. I should like to ask the gentleman whether he has at hand any comparison of the distribution of this money back in 1910, 1911, or 1912?

Mr. LEVER. The comparison I have is only for 1914 and 1915.

Mr. GOULDEN. I should go back to the department as administered by our friends on the other side and see what was done then.

Mr. LEVER. I will say to my friend from New York, and I am glad to say, that ex-Secretary of Agriculture James Wilson was always fair, always generous, and always helpful to the people of the South in the administration of his department.

Mr. GOULDEN. I think that is universally conceded.

Mr. LEVER. I am absolutely glad to stand here and say for him that he has never discriminated against us. In fact, it might be said that, if anything, he was somewhat partial to us, and I thank him for it and I am glad to pay him that tribute.

Mr. GOULDEN. I think that everyone interested in this subject heartily indorses that sentiment.

Mr. LEVER. He was a Republican, but he was a big man, who did not see any North, any South, any West, or any East, but he saw the whole great country and its common interests.

Mr. GOULDEN. That is why I asked the question, because I have the most implicit confidence in Secretary Wilson, and I wanted to know what proportion went to the 15 Southern States under his able administration.

Mr. LEVER. I have not the figures at hand. They are, of course, obtainable.

Mr. GOULDEN. I have no hesitation in saying, from my knowledge of ex-Secretary Wilson's administration, that the gentleman's statement is true; and also I have no hesitation in saying, from my knowledge of the matter, that the appropriations are more needed in those States to develop agriculture along certain lines than they are in the North and West.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the Agricultural appropriation bill, H. R. 20415, and had come to no resolution thereon.

The SPEAKER. The Chair desires to lay before the House a message from the President of the United States.

Mr. STAFFORD. Mr. Speaker, I believe this is a very important message, and I make the point that there is no quorum present.

SEVERAL MEMBERS. Oh, no!

Mr. STAFFORD. I withdraw the point, Mr. Speaker.

IMMIGRATION (H. DOC. NO. 1527).

The SPEAKER laid before the House the following message from the President of the United States:

To the House of Representatives:

It is with unaffected regret that I find myself constrained by clear conviction to return this bill (H. R. 6060, "An act to regulate the immigration of aleins to and the residence of aliens in the United States") without my signature. Not only do I feel it to be a very serious matter to exercise the power of veto in any case, because it involves opposing the single judgment of the President to the judgment of a majority of both the Houses of the Congress, a step which no man who realizes his own liability to error can take without great hesitation, but also because this particular bill is in so many important respects admirable, well conceived, and desirable. Its enactment into law would undoubtedly enhance the efficiency and improve the methods of handling the important branch of the public service to which it relates. But candor and a sense of duty with regard to the responsibility so clearly imposed upon me by the Constitution in matters of legislation leave me no choice but to dissent.

In two particulars of vital consequence this bill embodies a radical departure from the traditional and long-established policy of this country, a policy in which our people have conceived the very character of their Government to be expressed, the very mission and spirit of the Nation in respect of its relations to the peoples of the world outside their borders. It seeks to all but close entirely the gates of asylum which have always been open to those who could find nowhere else the right and opportunity of constitutional agitation for what they conceived to be the natural and inalienable rights of men; and it excludes those to whom the opportunities of elementary education have been denied, without regard to their character, their purposes, or their natural capacity.

Restrictions like these, adopted earlier in our history as a Nation, would very materially have altered the course and

cooled the humane ardors of our politics. The right of political asylum has brought to this country many a man of noble character and elevated purpose who was marked as an outlaw in his own less fortunate land, and who has yet become an ornament to our citizenship and to our public councils. The children and the compatriots of these illustrious Americans must stand amazed to see the representatives of their Nation now resolved, in the fullness of our national strength and at the maturity of our great institutions, to risk turning such men back from our shores without test of quality or purpose. It is difficult for me to believe that the full effect of this feature of the bill was realized when it was framed and adopted, and it is impossible for me to assent to it in the form in which it is here cast.

The literacy test and the tests and restrictions which accompany it constitute an even more radical change in the policy of the Nation. Hitherto we have generously kept our doors open to all who were not unfitted by reason of disease or incapacity for self-support or such personal records and antecedents as were likely to make them a menace to our peace and order or to the wholesome and essential relationships of life. In this bill it is proposed to turn away from tests of character and of quality and impose tests which exclude and restrict; for the new tests here embodied are not tests of quality or of character or of personal fitness, but tests of opportunity. Those who come seeking opportunity are not to be admitted unless they have already had one of the chief of the opportunities they seek, the opportunity of education. The object of such provisions is restriction, not selection.

If the people of this country have made up their minds to limit the number of immigrants by arbitrary tests and so reverse the policy of all the generations of Americans that have gone before them, it is their right to do so. I am their servant and have no license to stand in their way. But I do not believe that they have. I respectfully submit that no one can quote their mandate to that effect. Has any political party ever avowed a policy of restriction in this fundamental matter, gone to the country on it, and been commissioned to control its legislation? Does this bill rest upon the conscious and universal assent and desire of the American people? I doubt it. It is because I doubt it that I make bold to dissent from it. I am willing to abide by the verdict, but not until it has been rendered. Let the platforms of parties speak out upon this policy and the people pronounce their wish. The matter is too fundamental to be settled otherwise.

I have no pride of opinion in this question. I am not foolish enough to profess to know the wishes and ideals of America better than the body of her chosen representatives know them. I only want instruction direct from those whose fortunes, with ours and all men's, are involved.

WOODROW WILSON.

THE WHITE HOUSE, *January 28, 1915.*

Mr. BURNETT. Mr. Speaker, at the proper time I shall move a reconsideration of the vote by which the bill was passed, and that the same be passed, the President's veto notwithstanding. Mr. Speaker, I do not desire any snap judgment on anybody. I think that no one who favors the bill has had any tips as to when the message would come in. I believe that there ought to be a fair discussion of it, and I believe that the message itself within its four corners gives good reasons why the bill should become a law. Therefore I shall ask unanimous consent that on either Thursday or Friday, as may best suit the convenience of gentleman who are opposed to it, the message be taken up for consideration and the consideration of a motion to pass the bill, notwithstanding the veto, and in the meantime that the message lie on the table.

Mr. GOLDFOGLE. Did the gentleman say next Thursday?

The SPEAKER. The time is not a necessary part of the request. The gentleman from Alabama asks unanimous consent that the veto message and bill lie on the Speaker's table temporarily.

Mr. SABATH. Mr. Speaker, reserving the right to object, I wish to state that we who are opposed to this legislation are in the same position as the gentleman from Alabama and those who support it. We did not receive any tips, as he states, or any information. We did believe that this great humanitarian President of ours would veto the bill, because we believe that he desires to do what is right and what is just. Therefore I resent the statement that anyone on our side has received any tips as to the possibility of what was likely to be done by the President. Many of us may have had an idea as to our President's intention, but he is not a man who would deliberately give an advantage to one side or the other.

As to the day on which this should be considered I would much prefer, if we could agree to a day, one early next week. I believe Tuesday would be agreeable to the majority of the Members, because that would give ample opportunity to all, no matter where they reside, to be present. That will give us five or six days. I ask the gentleman from Alabama whether it will be possible to agree on Tuesday of next week?

Mr. BURNETT. Mr. Speaker, I desire to disclaim having made any imputation on the gentleman or those opposed to the bill, as the gentleman from Illinois says. I will not even say that the wicked flee when no man pursueth. [Laughter.] It will not be convenient or agreeable to have the message considered before Thursday of next week.

Mr. MANN. If the gentleman will yield—while both gentlemen say that they did not receive any tip as to when or whether the President would send a veto message, I think everybody else in the House had received a tip that the President was going to veto the message, and he had to send in a message today, to-morrow, or next day, and that is not very far apart. What is the object in postponing the matter for more than a week?

Mr. BURNETT. I frankly state that I think Tuesday would not be ample time.

Mr. MANN. Ample time for what?

Mr. BURNETT. For Members who desire to be here to be present. I could have called it up to-day, I suppose, but I thought it was not fair to do it, and for the same reason, when there may be ample time for Members to be here without any snap judgment being taken, I thought Thursday of next week would be better.

The SPEAKER. Is there objection?

Mr. MOORE. Mr. WALLIN, and others objected.

Mr. BURNETT. Mr. Speaker, I move to refer it to the Committee on Immigration.

Mr. GOLDFOGLE. Mr. Speaker, who made the objection?

The SPEAKER. The gentleman from Pennsylvania and others.

Mr. MOORE. I made the objection. I think it is unnecessary to wait a week. The gentleman from Alabama asked unanimous consent that it be postponed for a week.

The SPEAKER. That was not a part of the request.

Mr. MOORE. The gentleman from Alabama asked unanimous consent that it be postponed until Thursday, and the Chair put the question.

The SPEAKER. The Chair did not put that part of the request. The gentleman from Alabama did put into his request that it lie on the Speaker's table until next Thursday, but the Chair stated that it was not necessary to put in the date, because it is a privileged matter and the gentleman from Alabama can call it up whenever he gets ready. The question is on the motion of the gentleman from Alabama.

Mr. GOLDFOGLE. Mr. Speaker——

Mr. BURNETT. Mr. Speaker, I withdraw the motion.

Mr. UNDERWOOD. Mr. Speaker, if the gentleman will yield, this is a matter that is privileged. It is within the right of the gentleman from Alabama and his committee to have the message referred to the committee for consideration before reporting it if they desire. It is for the chairman of the committee to determine what time he thinks it is convenient to take the matter up, and I see no reason in the world why an agreement should not be made to let it lie on the table, as it saves time.

Mr. MOORE. Does the gentleman recollect what action the House took when the bill was vetoed by President Taft as to the length of time to be given?

Mr. UNDERWOOD. I think at that time it was near the end of the session and there was a full attendance of the House. The chairman of the committee thought it advisable to call it up at once. But the only point I am making here is that this is a matter for the chairman of the committee to determine, when he thinks it advisable to bring it before the House, like all other legislation.

Mr. MOORE. Did not the gentleman from Alabama make the motion immediately on receipt of the Taft veto?

Mr. BURNETT. No; not until the next day.

Mr. UNDERWOOD. He may have, but it must be clear to the gentleman from Pennsylvania that, although there may be doubt as to whether there is a two-thirds vote in favor of this bill, there can be no question but that a majority of this House is in favor of the bill, and the gentleman from Alabama can have it referred and bring it back when he pleases, and I think it is wise if we can agree on it satisfactorily to the gentleman and everybody else and let it in the meantime lie on the table.

Mr. MOORE. I am perfectly willing to come to an agreement now, but the gentlemen on the other side seem to have adjusted the matter between themselves, and the chairman of the committee fixed next Thursday and no other day.

Mr. GALLIVAN. I think we can all agree to Thursday next, and I hope all objections will be withdrawn.

Mr. MOORE. Now, many of us would be willing to have a day fixed. I am perfectly willing to have Tuesday fixed.

Mr. SABATH. Mr. Speaker, I have no objection that a day should be set. I do not desire to delay or desire to hurry or inconvenience any Member of the House. I would prefer that we agree on a day. If we could agree on Tuesday of next week, it will be agreeable, if not I am willing to yield, and if we could set it for Wednesday it would be agreeable to me.

Mr. GALLIVAN. I understand Wednesday is Calendar Wednesday, and that this is privileged business, anyway.

The SPEAKER. The Chair will help clear up this situation a little. This veto and all matters appertaining to it are privileged. The gentleman from Alabama, if it goes to his committee, can call it up in 15 minutes if he wants to do so, or he can call it up on Calendar Wednesday or on Monday, or any time he please; the whole thing is privileged.

Mr. GOLDFOGLE. Mr. Speaker, I suggest to the gentlemen who would prefer to send this matter to the Committee on Immigration, of which I am a member, that they withhold their objections and set a day. I agree with the gentleman who desires to set a day certain, as it will relieve many of the Members of this House from embarrassment. It will make a certain time when gentlemen will all be here and vote upon this all-important matter, and I respectfully suggest to the membership of the House present that we agree upon a day. May I say, in order to come to a conclusion, that we set it for Thursday?

Mr. GALLIVAN. Will the Chair restate the situation?

The SPEAKER. The Chair will restate the situation.

Mr. MANN. Mr. Speaker, I am going to object, I think, anyhow. As I understand it—and if I am not correct I would like to be informed—if this bill is referred to the Committee on Immigration and Naturalization that committee has the power to report the bill with the veto message back at any time and demand immediate consideration.

The SPEAKER. Yes.

Mr. MANN. And they can agree among themselves as to when it shall be called up in the House instead of trying to do so this morning where it is a waste of time, and therefore I object.

Mr. SABATH. Will the gentleman withhold his objection for a moment?

The SPEAKER. The gentleman from Illinois objects, and the gentleman from Alabama [Mr. BURNETT] is recognized.

Mr. MANN. I will withhold the objection for a moment.

Mr. SABATH. Mr. Speaker, the gentleman from Illinois withholds his objection for a moment. I desire to call his attention to this fact: If it is referred to the committee, no one knows, of course, but the chairman when the meeting of the committee would be called, and there would be no one but the chairman and members of the committee who would know when the committee is likely to meet and when they would report the bill and when it would come up. I think it would be much better if we could agree on a day now.

Mr. MANN. Mr. Speaker, I have absolute confidence in the integrity and honesty of purpose of the gentleman from Alabama [Mr. BURNETT]. I have no doubt whatever that he will be perfectly fair with the committee in the matter, and the House can be notified with reference to the time after the gentlemen have agreed upon a day.

Mr. BURNETT. Mr. Speaker, if the gentleman will permit, I think it will be fairer to every Member of the House here and those who are not here now to have an understanding as to a date, rather than that the committee should report and then get an understanding later on when it will again consume some time, and I think it could be better settled here.

Mr. MANN. I do not see much chance of getting a unanimous-consent agreement, and so I object. Let us go on to other business.

The SPEAKER. The gentleman from Illinois objects, and the gentleman from Alabama is recognized to make any motion he sees fit.

Mr. BURNETT. Mr. Speaker, I move that the bill and message of the President be referred to the Committee on Immigration and Naturalization.

Mr. GOLDFOGLE. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GOLDFOGLE. Is it in order to move an amendment to a day certain?

The SPEAKER. This is simply a motion to refer, and if it is voted down the gentleman from Alabama can call up the bill right now.

Mr. BURNETT. And in connection with that, Mr. Speaker, I give notice that I will call the committee together and ask them to report this bill back on Thursday, and on that motion I move the previous question.

Mr. GOLDFOGLE. That is satisfactory.

The SPEAKER. The gentleman from Alabama moves the previous question on his motion to refer.

The question was taken, and the previous question was ordered.

The SPEAKER. The question is on referring the bill and veto message of the President to the Committee on Immigration.

The motion was then put, and by vote of the House was agreed to.

Mr. SABATH. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Illinois rise?

Mr. SABATH. To ask that 100,000 copies of the President's veto message be printed for distribution.

The SPEAKER. The gentleman from Illinois asks unanimous consent that 100,000 copies of this message be printed.

Mr. HOWARD and Mr. LANGLEY. Mr. Speaker, I object.

The SPEAKER. The gentleman from Alabama [Mr. BURNETT] notifies the House and the country that on Thursday the committee will report this bill back.

Mr. SABATH. Mr. Speaker, would it be in order for me to move that 100,000 copies of the President's message be printed?

Mr. LANGLEY. Mr. Speaker, the matter has been disposed of.

The SPEAKER. That has to be referred to the Committee on Printing.

Mr. BARNHART. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Indiana rise?

Mr. BARNHART. I would like to ask unanimous consent that 50,000 copies of this message be printed for the use of the House.

Mr. HOWARD. I object, Mr. Speaker.

The SPEAKER. The gentleman from Georgia [Mr. HOWARD] objects.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 20415, the Agricultural appropriation bill.

The question was taken, and the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 20415, the Agricultural appropriation bill, with Mr. HAMLIN in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 20415, the Agricultural appropriation bill, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 20415) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1916.

Mr. YOUNG of Texas. Mr. Chairman, I rise to oppose the amendment offered by the gentleman from Illinois [Mr. MADDEN]. And first, Mr. Chairman, I would like to have permission to extend my remarks in the RECORD by inserting an analysis of the figures prepared and put in the RECORD by the gentleman from Illinois [Mr. MADDEN]. I will take some little time to do that.

The CHAIRMAN. The gentleman from Texas [Mr. YOUNG] asks unanimous consent to extend his remarks in the RECORD by inserting some figures which he names. Is there objection?

There was no objection.

Mr. YOUNG of Texas. From the Department of Agriculture, Mr. Chairman, I have before me a summary of expenditures of that department. The same was published some days ago in the RECORD. From it I quote these figures. For the 15 Southern States—and in these are included Maryland and Delaware—for the year ending June 30, 1914, $3,579,319.40 was expended in the Southern States, and in the remainder of the States of the Union $17,145,628.36 was expended. All these figures include the Forest Service and the Weeks law.

Mr. Chairman, in the very nature of things it is impossible to say that so many dollars can be or must be expended in this particular State or in that particular State, or in this particular section or in that section, and the sooner the Members of Congress understand this fact, that all the States of this Union act as one, and that whatever injures one section of the country necessarily injures other sections of the country, and stop this quibbling over sectional propositions in a great bill like this, the better it will be for the country. [Applause.]

I dare say that in the gentleman's home State more money is expended on the meat-inspection proposition in the great city

of Chicago under this bill than in any other given locality in the United States. And yet who objects to it? [Applause.] Problems arise in one section to-day that were not expected yesterday.

Take, for example, the hog-cholera proposition. When that outbreak sprang up and wiped out these great values, Congress did not hesitate to spend $600,000 in a few of the western hog-growing States of this Union. Take again the case of the foot-and-mouth disease, which sprang up this year. Congress did not hesitate to spend $2,500,000 to wipe out that disease, because whatever destroys the values in one State of this Union is going to be felt in its effects in the other States of this Union. Again, when the forests of New England were invaded by the gypsy moth, appropriations were at once made available to curb this destructive pest. No man from the South was unpatriotic enough to raise the sectionalism cry when these appropriations were made.

Now, let us take up the question a moment further. You take it in the section of the country where the chief industry is cotton growing. My State produces 4,500,000 bales of cotton. Last year we had nearly 8,000,000 head of cattle to help furnish the meat supply, to say nothing of other millions of dollars from other crops and stock. We probably get less out of this Agricultural bill than any other section in the Union, and yet we are the greatest wealth-producing agricultural State in this Union. When the European war broke out, on the very eve of the time when the cotton, which annually adds a billion dollars to our wealth, came on the market there was no market for it. Who felt it first? We people who produced this great crop in the South, the crop that goes, 65 per cent of it, to foreign countries and brings back the gold supply. Who felt it next? I will tell you. Our people from the South patronize and purchase the manufactured products from the people of the other sections of the country. We go to the West, and we buy your flour. We go to the New England States and buy your manufactured products. We go to other sections to buy iron and steel to build our bridges across our streams and to erect our skyscrapers. We purchase from the manufacturers of our northern and eastern brethren farm implements, tools, wagons, and harness. We take the money made from the cotton and we purchase your finished products.

I want to ask you, when this market for cotton fell down, what happened in the Southern States? The first thing to happen was that expense accounts had to be cut down in those States for people to live. Our merchants had already put in their orders for the next year's supply, and they canceled those orders for dry goods and hardware and everything that could be done without, so that while the direct injury was felt first by the South, every other section of the country felt the kick-back of that injury and loss sustained by reason of the failure in the price of the great staple crop of the South.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. STEPHENS of Texas. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. The gentleman from Texas [Mr. STEPHENS] asks unanimous consent that the time of his colleague [Mr. YOUNG of Texas] be extended five minutes. Is there objection?

Mr. LEVER. Mr. Chairman, pending that, I ask unanimous consent that debate on this paragraph and all amendments thereto close in 10 minutes.

Mr. ANDERSON. I want five minutes.

Mr. HAUGEN. I think this side ought to have as much time as you have consumed on that side.

Mr. LEVER. The gentleman from Illinois [Mr. MADDEN] had 13 minutes and I had less than 5. The gentleman from Texas [Mr. YOUNG] will have 10, and that will leave 5 over there. If you want to make it 10, all right.

Mr. MANN. Do you want 10 minutes to continue this sectional discussion?

Mr. LEVER. I understand the gentleman from Minnesota [Mr. ANDERSON] wants to make a statement along this line. He is a member of the committee, and one of the best ones on it.

Mr. MANN. The gentleman from South Carolina wants to open a discussion that will probably last all afternoon. If he wants 15 minutes on one side, then I suggest an equal time on the other side.

Mr. LEVER. No; the gentleman misunderstood my request. I was asking unanimous consent that the discussion on this paragraph be closed in 10 minutes. That would give the gentleman from Texas [Mr. YOUNG] five minutes and the gentleman from Minnesota [Mr. ANDERSON] five minutes.

Mr. MANN. They are both on the same side.

Mr. LEVER. No; I think the gentleman from Minnesota is on the other side of the question.

Mr. MADDEN. Mr. Chairman, I wish to state to the gentleman from Texas [Mr. YOUNG] that the statement that I made was simply an analytical study of the figures placed in the RECORD by the gentleman from South Carolina [Mr. LEVER]. If those figures had not been placed there, I would not have made the study; but the figures speak for themselves, and what I said is deduced entirely from what the gentleman said and from those figures.

Mr. LEVER. Mr. Chairman, is there any objection to my request?

The CHAIRMAN. The Chair has not put the request, as he thought gentlemen were going to agree. The gentleman from South Carolina asks unanimous consent that the debate on this paragraph and all amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. YOUNG of Texas. Mr. Chairman, when these great problems confront the agricultural interests of the country, it is for this country to deal with those problems. If the foot-and-mouth disease breaks out in any part of the country, we want to deal with it and suppress it, and it makes no difference in what section of the country it springs up. Let any other problem threaten a great crop of the country, it is the duty of the Government to intervene and meet that problem, because this is one country, and one section can not be injuriously affected without that effect being felt in every other section of the country. In the very nature of things some sections of this country are given specifically to agriculture. Other sections of the country are given specifically to manufacturing and mining and other industries, great in themselves, yet in those sections of the country, under the very conditions that surround them, agricultural problems do not arise as they arise in the great agricultural belt of the country. And what I appeal for is that we ought to remember that this is one country, one flag, and one interest, and no man wants to be guilty of trying to destroy a great bill or an appropriation, it matters not in what section problems are being dealt with, when that appropriation is wisely expended for the purpose of improving agricultural conditions, because those conditions need to be improved, and this committee is free from partisanship and free from sectionalism. [Applause.]

Mr. ANDERSON. Mr. Chairman, I had not intended to participate in this discussion, and would not do so were it not for the fact that the statement placed in the RECORD by the gentleman from South Carolina, the chairman of the committee, and prepared by the Department of Agriculture, is, in my opinion, absolutely misleading and unfair. I do not mean by that to claim that the figures are erroneous, but I do mean to claim that if that statement purports to show that one section of the country has not received a larger proportion of the local benefits of the appropriations in the Agricultural bill than another portion of the country, then the statement is absolutely misleading in that respect.

The Department of Agriculture expends annually about $25,000,000. According to the report of the Secretary of Agriculture for last year, $16,000,000 of that amount is spent in regulatory services. No one would claim for a minute that that $16,000,000 ought to be taken into consideration in a statement which purports to show that one section is not receiving greater local benefits from the appropriations than another. For instance, the Bureau of Animal Industry spends some $3,000,000 a year in meat inspection. Probably 90 per cent of that money is spent in half a dozen cities in the United States, and yet no one with a modicum of fairness could claim that those particular cities or the States in which they are located ought to be charged with local benefits under that appropriation.

Six hundred thousand dollars are spent annually in animal quarantines. No one would claim that that appropriation ought to be charged to any particular section. We spend some $635,000 a year for the enforcement of the food and drug act. No one ought to claim that that amount should be taken into consideration in determining the local benefits of this appropriation bill. Yet that is exactly what the Department of Agriculture has done in making up this statement.

Now, there are some items in this bill the benefits of which are purely local and recognized as being local. Among these are the items for farm-demonstration work in the North and for cotton boll-weevil work in the South. Of those items the gentleman from Texas [Mr. SMITH], who preceded me, says his State probably receives less than any other. Yet the record shows that the State of Texas received last year $72,000 for farm-demonstration work, while the State of Iowa, very nearly as

large, if not larger, in its agricultural products, received but $17,000.

Mr. LEE of Georgia. Is it not true that there is $400,000 appropriated in this bill for farm-demonstration work in the North?

Mr. ANDERSON. And that $400,000 is distributed among 33 States, while the $666,000 appropriated for the cotton boll-weevil work and farm-demonstration work in the South is spent in 15 States. I do not complain particularly about that. Everybody who knows anything about the agriculture of the United States knows that the South needs help worse than any other section of the country. The thing I am complaining about is that the Department of Agriculture has presented a statement here which is absolutely misleading as to the facts, if it pretends to show, as I think it does, that these 15 Southern States have not received greater local benefits from the Agricultural bill than the rest of the country.

Mr. CANDLER of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. CANDLER of Mississippi. The gentleman will concede that any benefit derived from this money spent in any part of the country will be for the benefit of the whole country.

Mr. ANDERSON. Well, no; I think not. I do not think the gentleman's statement is entirely accurate.

The CHAIRMAN. The time of the gentleman has expired.

The Clerk read as follows:

In all, for general expenses, $18,750.

Mr. MOORE. Mr. Chairman, we have just passed an item relating to telephone and telegraph charges, and I take occasion to inquire of the chairman of the committee whether he was able to get those figures that we asked for the other day with respect to the division of the appropriation for general telegraph and telephone charges.

Mr. LEVER. I asked for the information requested by the gentleman from Pennsylvania in the colloquy between him and myself. I believe the proposition the gentleman had in mind was, if a corporation or an individual telegraphed to the department for information, could that information be telegraphed back at Government rates and paid for by the Government?

Mr. MOORE. The question was whether they could get it free of charge.

Mr. LEVER. They do not get it free of charge. I put that information in the RECORD.

Mr. MOORE. Was it put in the RECORD as of the day's proceedings?

Mr. LEVER. Yes.

The Clerk read as follows:

BUREAU OF CROP ESTIMATES.

Salaries, Bureau of Crop Estimates: One statistician, who shall be chief of bureau, $4,000; 1 chief clerk, $1,800; 6 clerks, class 4; 9 clerks, class 3; 14 clerks, class 2; 1 clerk, $1,300; 19 clerks, class 1; 17 clerks, at $1,000 each; 21 clerks, at $900 each; 2 messengers, at $840 each; 2 messengers or laborers, at $720 each; 2 messengers, messenger boys, or laborers, at $660 each; 1 messenger, messenger boy, or laborer, $480; 1 charwoman, messenger, or laborer, $540; 2 charwomen, messenger boys, or laborers, at $360 each; in all, $116,780.

Mr. BOOHER. Mr. Chairman, I move to strike out the last word. I want to ask a question about this bureau. Does the gentleman from South Carolina think this information that the people of this country derive from the Crop Estimate Bureau is worth what it costs?

Mr. LEVER. I do. I regard the Bureau of Crop Estimates as one of the most valuable lines of work conducted by the department. The estimates and statistics that they furnish are almost invaluable to the farmers of the country.

Mr. BOOHER. How are they valuable to the farmer?

Mr. LEVER. Let me illustrate very briefly: The Department of Agriculture collects statistics—estimates—as to the total yield of the cotton in this country. It gathers those statistics as to the condition of the cotton crop from time to time. On the first Monday of December, I think it is, it publishes a final estimate as to the yield of cotton. That estimate, coupled with the information issued by the Census Bureau every two weeks, furnishes the farmer the only accurate, unbiased data of the probable yield of that crop for the year that he can have.

Before this system was adopted the speculators of the country—large cotton firms—would issue their own private estimates—and they do now—with the effect that it kept the market in a turmoil and kept the farmer in absolute darkness as to the actual situation. Since, however, we have begun to carry on this system of estimates—while the individual estimates go out to the country; to the whole speculative world—the farmers themselves, in my part of the country at least, look to the accurate information issued by the Census Bureau and the Department of Agriculture.

Mr. JACOWAY. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. JACOWAY. And is it not a fact that the estimates made by the Government as to the cotton crops have been approximately correct?

Mr. LEVER. Yes. I will say that there was an investigation of the matter made four or five years ago and a period of 10 years was taken to ascertain how accurate these figures were. It was found that in one five-year period they overestimated the crop very slightly, and within the other five years they slightly underestimated it, but the average was only about 2 per cent out of the way for 10 years. The farmers appreciate the service and want it continued, although a great many farmers misunderstand it.

Mr. BOOHER. My observation of the bureau is about this: When the crop has been planted three to six weeks they begin to issue bulletins as to the probable production of that crop, and they keep it up during the entire season. At first they report that it is going to make 99 per cent of a full crop. The result of that is that the grain speculators put down the price of grain. Then they make an estimate that there will be 80 per cent full crop, and the price goes up and the speculator gets the benefit of it because he has got the crop. And then perhaps it will be 75 per cent of a full crop. Whenever a report of that kind goes out there can be but one result, and that is that it acts injuriously on the producer of the crop. It may be true that the cotton estimates are different from those of wheat, but you take it in the great wheat and corn raising sections of this country, and the different reports go out affecting the prices of the commodity injuriously to the producer.

Mr. BALTZ. Will the gentleman yield?

Mr. BOOHER. Yes.

Mr. BALTZ. I noticed last year that the State report of Illinois estimated the crop of wheat at 20,000,000 bushels, while the Federal report was 53,000,000; that was on last year's crop.

Mr. BOOHER. I read in the hearings that they made their investigations very carefully and tried to be accurate, but they go to the great transportation companies—in other words, the railroads and the warehouses—and they take their estimates and compare them with their own, and upon these estimates they mainly base their reports; but the information comes mainly from the railroads and the warehouses.

The time of Mr. BOOHER having expired, by unanimous consent he was given five minutes more.

Mr. BOOHER. Now, I have talked with a great many farmers about this matter—or rather they have talked with me—and I have not had a farmer talk with me but who was opposed to these crop estimates. It may be that the farmer does not understand it. It may be that I have not been able to explain it thoroughly to him; but the farmers as a general thing do not rely on this information, and they do not believe that it is worth the money that it costs the Government.

Mr. JACOWAY. Will the gentleman yield?

Mr. BOOHER. Yes.

Mr. JACOWAY. Suppose the Government got out no estimates at all, would not that leave the farmers at the mercy of the speculators to bear down on the price o the commodity?

Mr. BOOHER. No; I want to call the gentleman's attention to the fact that this country for 110 years never had any crop estimates, and the farmers got along very well; and we did not hear of anybody being crushed.

Mr. JACOWAY. Was not the Government different then from what it is now?

Mr. BOOHER. Wonderfully different; we did not have much paternalism in the country at that time; and now we have more paternalism and less individualism.

Mr. CULLOP. Will the gentleman yield?

Mr. BOOHER. Yes.

Mr. CULLOP. Do not the large dealers send men out into the country, into the field to make estimates, and do not they send out competent men to make investigation as to the production?

Mr. BOOHER. There is no doubt about that; and if the gentleman will read the hearings before the committee, he will see that Mr. Easterbrook says that they rely a good deal on information gathered by the very class of people that the gentleman mentions. You can pick up any agricultural paper in the country and it publishes the estimates of the very men the gentleman suggests, and the farmers get the advantage of it.

Mr. CULLOP. Is it not true that the crop report of the Government is usually taken by some man of the city who drives out along the road and looks over the fields and then sends in his estimate?

Mr. BOOHER. I do not know about that.

Mr. CULLOP. That is true in my section of the country.

Mr. CANDLER of Mississippi. That is not true in our section of the country.

Mr. CULLOP. In my State our farmers rely on the reports made by the large dealers who send out competent men who go into the fields and make their estimates. They rely upon those estimates more than they do upon the Government report.

Mr. CANDLER of Mississippi. Mr. Chairman, I desire to say in response to what the gentleman from Indiana says, that in our section these crop estimates are made as a rule by practical farmers. They visit the farm and make estimates. I desire to make the further suggestion that it was the condition suggested by the gentleman from Indiana that private parties engaged in various kinds of business sent out agents and made investigations and made reports in their own interest that required the legislation to be adopted which is in this bill, providing that the Government should make the estimates and make reports in order to meet the reports which private parties were making, which were not in the interest of the producers, but in their own interest and in the interest of the people who wanted to buy the products.

Mr. SLAYDEN. Will the gentleman yield to me?

Mr. BOOHER. I have but a moment or so remaining.

Mr. SLAYDEN. I will ask for some time.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BOOHER. Mr. Chairman, I will ask unanimous consent that my time may be extended for two minutes, and I will yield one minute to the gentleman from Texas.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to proceed for two minutes. Is there objection?

Mr. LEVER. Mr. Chairman, pending that, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in seven minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and all amendments thereto close in seven minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BOOHER. Mr. Chairman, now I do not know, of course, the way these appointments are made except from the hearings, but the department I assume uses the best means it can. I assume that the department tries to be just as accurate in it as it can be; there is no question about that in mind, but the question with me and with the farmers with whom I have talked about this is whether or not this information is worth the cost of obtaining it. The farmers with whom I have talked say it is not, that when they report a full crop or that there will be a 95 per cent crop of corn or wheat that the price of wheat goes down, which was an injury to them if they have got any of the old crop on hand. Now, in a few weeks or a month they issue another bulletin that the size of the crop is not going to be more than 80 per cent. Then what is the result? The grain in the hands of speculators goes up and the farmer, the producer of the wheat or corn or oats or other cereal, is caught in the trap going either way. If he backs up they get him, and if he goes ahead they get him. Now, if it is worth the money that the chairman of the committee seems to think it is the appropriation ought to be made, but it does seem to me there ought to be a careful investigation of this question by this Committee on Agriculture to see whether or not this section of this bill can not be cut down, and cut down very materially, and if it is not worth to the producers of this country what it is costing it ought not to be made.

Mr. HEFLIN. Mr. Chairman, if we are going to have crop estimates at all, it is very essential that they be made by the Government. If you withdraw this work of estimates from the Government, as the gentleman from Missouri suggests, you put it entirely in the hands of the speculators to make them, and I do not care how fair gentlemen here think they will be in those estimates to the producers, I had rather trust Government officials, who are sworn to do their duty, to do the just thing by the farmers of the country than to turn this work over to the men who are figuring on ways and means to buy the crop as cheaply as possible. Various concerns representing those who speculated in cotton and grain used to be the only source of this information. They gathered such information as they desired, and published such crop estimates as helped their business, and by this method of crop estimation they robbed the producer every year of millions of money. [Applause.] It is this that caused the friends of the producer to see the necessity of having estimates made by the Government. Now, if we do not have estimates at all, it is all right; the Government need not make them; but the very moment you withdraw this work by the Government the speculators will fleece the corn producer, the wheat producer, and the cotton producer. These estimates are not made now by information gathered about towns and cities. My information is that these representatives of the Government are in every precinct in the farming sections of this country. I helped to increase the number and this committee had to do with swelling this number of crop reporters for the Government.

I think, Mr. Chairman, that it would be a bad step for us to take, for as long as estimates can be made by somebody, speculators will make them, and then in the absence of reports or estimates by the Government, which will try to speak the truth in regard to crop estimates. The farmer would be left to the mercy of speculators to make and publish whatever estimates suited them. Why not? Here is a man who wants to buy a certain crop. He proposes an estimate on that crop. Is he going to publish an estimate that will injure his business and put up the price of the very thing that he wants to buy cheaply? Of course not. [Applause.] Then, if he works to his own interest it is necessary that the Government shall come in and make a true estimate as to what the crop will be. Now, Mr. Chairman, I admit that time was when this information on which these estimates were made by the Government was not as full as it is now, but the information now gathered by the Department of Agriculture comes in, not from a handful of reporters, but from hundreds and thousands of reporters in the various farming portions of the Government.

Mr. BOOHER. Where does the gentleman get his information that the Government has got these skilled men in every community in this country?

Mr. HEFLIN. I furnished a list of over 1,000 names from my district four or five years ago, and I recall that Members of this House were called upon to furnish the names of men who would report in the various sections and precincts of the country.

Mr. BOOHER. You can not find anything of that kind in these hearings. I call the gentleman's attention to the hearings and ask him to read them, and I think then he will qualify his statement.

Mr. HEFLIN. No; not in these hearings. I am not referring to the hearings on this bill, but about what happened four or five years ago. I suppose the chairman of this committee remembers when we were called upon by the department to supply the names of those who would do this work——

Mr. LEVER. Yes——

Mr. HEFLIN. Giving reports as to the condition of the crop in the growing season. I have supplied names myself from my district, and I am certain they did not single out my district and neglect the other districts in the United States. It can not be, I am sure, that my district was of so much more importance in an agricultural way than the district of my good friend from Missouri [Mr. BOOHER].

Mr. BOOHER. Will the gentleman permit me to read just a question and answer from the hearings, showing where they get this information?

Mr. HEFLIN. Yes.

Mr. BOOHER. I read:

Mr. MAGUIRE. I would like to inquire whether you have made a comparison to see how your forecasts agree with such as Mr. HELGESEN suggests—the railroad estimates? A great many railroads and other agencies make forecasts.

Mr. ESTABROOK. We watch those very closely and make comparisons from time to time. We consider them as one source of information.

Mr. MAGUIRE. Do you think your agents all over the country are influenced one way or the other by the reports that they see of some railroad systems or the forecasts of some agency?

Mr. ESTABROOK. No; I think not. It is their business to check these up. That is what they are out in the field for. They interview all these people, see those elevator men and railroad men, keep in touch with them, and get their estimates, and then check them up from their own private sources of information. If it were at all necessary, we could disprove many of those estimates.

Now, you take what the railroads gather up and what the warehouses gather up, and that is the whole thing on which you base the estimate.

Mr. LEVER. Will my friend yield to me for a word?

Mr. HEFLIN. They interrogate every witness available, I understand, and consult every reliable source of information possible in their effort to make the estimate speak as nearly as possible the truth.

Mr. LEVER. Yes; that is right. That is what I myself was going to say.

Mr. SLAYDEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas [Mr. SLAYDEN] moves to strike out the last word.

Mr. LEVER. I suggest to the gentleman to wait until the next paragraph. The time on this paragraph is up.

Mr. SLAYDEN. Very well.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

General expenses, Bureau of Crop Estimates: For all necessary expenses for collecting, compiling, abstracting, analyzing, summarizing, and interpreting data relating to agriculture; for making and publishing periodically crop and live-stock estimates, including acreage, yield, and value of farm products, as follows.

Mr. SLAYDEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas [Mr. SLAYDEN] moves to strike out the last word.

Mr. SLAYDEN. Mr. Chairman, I have spent all my life in proximity to the cotton fields. All my life I have been interested in the yield of the cotton fields. I have had ups and downs as a grower, with more downs than ups, and in the last year, particularly, a disastrous experience as a cotton grower. I have had a good many years of experience as a cotton dealer and as an exporter of cotton. I want to say of my knowledge—not speaking from prejudice, but of my knowledge—that the effort of every business house with which I have ever had any acquaintance that has ever put out a forecast of the yield of cotton has been to make it accurate.

Why should they not be accurate? Successful business is not conducted upon a lack of information. Men of repute and integrity—and there are such in all branches of business—do not want to acquire a reputation of spreading misinformation abroad. This House seems to be full of gentlemen who believe that because a man is in business he is necessarily dishonest and untruthful; who believe that there is only one side to a speculative market.

Now, business men just as often go in on the bull side of cotton, to make a profit out of an advance, as they go in on the bear side, to make a profit out of a decline; and in the South they very much more often go in on the bull side.

Now, I recall in my experience one house, a great English firm in London, strange to say, and not in Liverpool, which has been marvelously accurate for more than 30 years in its estimates. A member of that firm whom I know personally very well, a man of high character and a reputable and an honorable and a truthful man, traveled in every State in the South in the months of July, August, and September, beginning his journeys in the Gulf States and working up with the development of the cotton crop; and on information supplied by him this house annually put out a forecast which was marvelously accurate.

On the other hand, before they began taking the figures respecting the output at the gins, and which necessarily, as the yield of cotton increased normally year after year, showed in the reports an increased production almost each year, when the Government was issuing annual estimates, those estimates were marvelous for their inaccuracy. I remember on one occasion going down to the Department of Agriculture the day after an estimate was made and seeing the man there in charge of that bureau. I do not remember the figures that were given out in that estimate, but I will use arbitrary ones for the purpose of illustration. An estimate, say, was put out that the crop would be 9,100,000 bales. I went to that man and I said to him: "Good heavens, how can you issue such a report as that, when the receipts that are already in show more than that amount?" He said: "Mr. SLAYDEN, I know it is absurd and inaccurate, but we can not reach any other conclusion on the data which are provided to us."

Mr. LEVER. How long ago was that?

Mr. SLAYDEN. That was some years ago. I observed it for 20 years in succession, Mr. Chairman, and the estimates of the Department of Agriculture were almost uniformly inaccurate.

But, Mr. Chairman, I did not get up here to state that. I got up here to resent the imputation that men of business, speculators, even, can not be honest and truthful men. The country seems to have gone mad on the theory that because a man does not toil with his hands in the field he is necessarily trying to rob somebody.

Mr. MARTIN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Texas yield to the gentleman from South Dakota?

Mr. SLAYDEN. Yes.

Mr. MARTIN. I would like to ask the gentleman of what particular value to the producer of the growing crop it would be to underestimate that crop unless he is holding over some of last year's crop that he wants to sell?

Mr. SLAYDEN. I did not understand the gentleman. Does the gentleman mean the crop grown in 1914, now being marketed?

Mr. MARTIN. No. I mean what particular value is the estimate of the crop of 1915 to a man who is growing that crop unless he has some of the crop of 1914 lying over?

Mr. SLAYDEN. It would be of particular value to the buyer if he estimates an excessive yield.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. MARTIN. But it would be of no value to the producer.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

General expenses, Library: For books of reference, technical and scientific books, papers, and periodicals, and for expenses incurred in completing imperfect series; for the employment of additional assistants in the city of Washington and elsewhere; for official traveling expenses, and for library fixtures, library cards, supplies, and for all other necessary expenses, $17,500: *Provided*, That hereafter the Secretary of Agriculture may exchange books and periodicals of the library not needed for permanent use for other books and periodicals.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. Here we have an item providing for the purchase of books and materials connected with the library of the Department of Agriculture. In this paragraph we find an item for official traveling expenses. It is very hard for me to understand—though, perhaps, the gentleman can give the information—how a library can have any traveling expenses.

Mr. LEVER. I answered that question last year in the consideration of this bill, and I will state my recollection of it.

Mr. STAFFORD. I did not recall that the gentleman had done so. If I had recalled it I would not have asked the question.

Mr. LEVER. Occasionally the librarian of the Agricultural Department desires to attend some convention of librarians, and the traveling expenses are allowed him for that purpose.

Mr. MANN. I think the gentleman has not remembered all that he said last year.

Mr. LEVER. I do not recall all that I said.

Mr. MANN. Occasionally the librarian of the Agricultural Department is required to attend a sale of books, or to inspect books which are very rare, which are for sale, and which are very much desired by the Agricultural Department.

Mr. LEVER. I am much obliged to the gentleman from Illinois for supplementing my statement.

Mr. MANN. I think the expense is very nominal, but occasionally it is required.

A MEMBER. Not over $200 a year.

Mr. STAFFORD. I can understand the need of having some small amount for that character of expense. I withdraw the pro forma amendment.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. REED having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had agreed to the amendments of the House of Representatives to bill of the following title:

S. 6839. An act extending the time for completion of the bridge across the Delaware River authorized by an act entitled "An act to authorize the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co., or their successors, to construct, maintain, and operate a bridge across the Delaware River," approved the 24th day of August, 1912.

The message also announced that the Vice President had appointed Mr. PAGE and Mr. LANE members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments," for the disposition of useless papers in the Department of Labor.

The message also announced that the Vice President had appointed Mr. PAGE and Mr. LANE members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments," for the disposition of useless papers in the Department of Commerce.

AGRICULTURAL APPROPRIATIONS.

The committee resumed its session.

The Clerk read as follows:

MISCELLANEOUS EXPENSES.

Miscellaneous expenses, Department of Agriculture: For stationery, blank books, twine, paper, gum, dry goods, soap, brushes, brooms, mats, oils, paints, glass, lumber, hardware, ice, fuel, water and gas pipes, heating apparatus, furniture, carpets, and matting; for lights, freight, express charges, advertising, telegraphing, telephoning, postage, washing towels, and necessary repairs and improvements to buildings, grounds, and heating apparatus; for the purchase, subsistence, and care of horses and the purchase and repair of harness and vehicles, for official purposes only; for the payment of duties on imported articles, and the Department of Agriculture's proportionate share of the expense of the dispatch agent in New York; for official traveling expenses; and for other miscellaneous supplies and expenses not otherwise provided for,

and necessary for the practical and efficient work of the department, $115,000, of which sum $5,000 shall be immediately available.

Mr. PAGE of North Carolina. Mr. Chairman, I make the point of order against the language in line 18, on page 59. It is evidently a deficiency appropriation.

Mr. LEVER. I concede the point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

To enable the Secretary of Agriculture to enforce the provisions of the above acts and the act approved May 8, 1914, entitled "An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture," relative to their administration, including the employment of clerks, assistants, and other persons in the city of Washington and elsewhere, freight and express charges, official traveling expenses, office fixtures, supplies, apparatus, telegraph and telephone service, gas, electric current, and rent outside of the District of Columbia, $59,500; and the Secretary of Agriculture shall prescribe the form of the annual financial statement required under the above acts, ascertain whether the expenditures are in accordance with their provisions, coordinate the work of the Department of Agriculture with that of the State agricultural colleges and experiment stations in the lines authorized in said acts, and make report thereon to Congress: *Provided*, That of this amount $20,100 may be used for general administrative expenses connected with the lines of work of the States relations service, including the offices of the director, the chief clerk, the officers in charge of publications, library, accounts, records, supplies, and property, and for miscellaneous expenses incident thereto: *And provided further*, That hereafter all correspondence, bulletins, and reports for the furtherance of the purposes of the act approved May 8, 1914, entitled "An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and the act supplementary thereto, and the United States Department of Agriculture," may be transmitted in the mails of the United States free of charge for postage under such regulations as the Postmaster General from time to time may prescribe by such college officer or other person connected with the extension department of such college as the Secretary of Agriculture may designate to the Postmaster General.

Mr. STAFFORD. Mr. Chairman, I make a point of order against the last proviso in the paragraph as being new legislation.

The CHAIRMAN. To what part of the paragraph does the gentleman make the point of order?

Mr. STAFFORD. From line 10 to the end of the paragraph.

Mr. LEVER. I concede the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

For farmers' cooperative demonstration work outside of the cotton belt, including the employment of labor in the city of Washington and elsewhere, supplies, and all other necessary expenses, $386,080.

Mr. ANDERSON. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 63, in line 2, by striking out "$386,080" and inserting in lieu thereof "$289,560."

Mr. ANDERSON. Mr. Chairman, the amendment which I have proposed reduces the item for farm-demonstration work in the Northern States by 25 per cent. If this amendment is adopted I intend to move to reduce the amount for farm-demonstration work in the South proportionately.

This morning there was carried in the Washington Post a story regarding the present financial condition of the country. That story states that there will be a deficit in the Treasury of about $90,000,000 at the end of the present fiscal year, and that there is now a deficit of about $70,000,000, notwithstanding the war tax and the income tax; that in the near future we will probably be under the necessity either of finding new subjects of taxation or of issuing bonds. It emphasizes the necessity of exercising the most rigid economy.

I am in favor of the extension of agricultural education. I am particularly in favor of it in the way of demonstrational work. But under the Lever Act, if the States take advantage of all its provisions, we will expend this year $1,080,000 more than has been expended for this purpose in any previous year with the exception of last year, when we spent $480,000 more than the preceding year. In view of the constantly increasing appropriations contemplated under the Lever Act and the condition of the Treasury I think the Congress ought to cut down the appropriations under these items, both the one to which this amendment applies and the succeeding one, until those items shall represent only investigational work and overhead charge on the part of the United States Government. The time has now come when the demonstration work in agricultural lines ought to be carried on practically exclusively by the agricultural colleges and other State institutions and the investigational work carried on by the Federal Government. In other words, the activities of the Federal Government ought to be limited very largely to the investigational lines, while the State work ought to be confined to the dissemination of the information gathered by the investigational work of the Federal Government. With that end in view, I have proposed this very modest reduction of the two amounts involved in this bill going to farm-demonstration work.

Mr. BARTLETT. Until last year this work was done in cooperation with other people, who also furnished funds for the purpose, was it not?

Mr. ANDERSON. The work under the next item was, and under both, I think.

Mr. BARTLETT. Under both.

Mr. ANDERSON. Yes.

Mr. BARTLETT. Then in the last appropriation bill an amendment was put on in the Senate, and the House agreed to the amendment, prohibiting the department from using any money contributed by anyone else, did it not?

Mr. ANDERSON. It prohibited the department from accepting certain kinds of contributions. Of course, the States were not prohibited from contributing.

Mr. BARTLETT. Yes; but Congress, by the adoption of this Senate amendment, prohibited the Secretary of Agriculture from accepting contributions from outside to the fund over which Mr. Knapp exercises control.

Mr. ANDERSON. Yes; from private persons or corporations, and the amount of the appropriation was increased by reason of that fact.

Mr. BARTLETT. It was doubled, was it not?

Mr. ANDERSON. Yes.

Mr. BARTLETT. Does not the gentleman think the prohibition contained in that Senate amendment last year ought to be repealed?

Mr. ANDERSON. I think both these amounts ought to be reduced.

Mr. BARTLETT. You could reduce the amount if you restored the old law, could you not?

Mr. ANDERSON. Yes.

Mr. BARTLETT. In other words, under the old law it was just half of what it is now.

Mr. LEVER. I think the gentleman is mistaken. We have no assurance that the old cooperative arrangement would be restored.

Mr. ANDERSON. I do not think it ought to be restored.

Mr. LEVER. Neither do I.

Mr. HAUGEN. We had no assurance, but we passed the Lever Act, which provided for the appropriation of $480,000 permanent appropriation, which adds that amount to this appropriation. Besides, we have other appropriations available, providing the States accept and put up an equal amount, which in the aggregate will amount to $1,080,000.

Mr. ANDERSON. There is no question about that proposition, and the chairman of the committee stated, when the Lever bill was under consideration, that he thought the policy would be to reduce these two items as fast as the appropriations became available under the Lever Act. The work done under these appropriations should be limited very largely to investigational work with the view to furnishing information which the demonstrations under the Lever Act were to carry to the people. The only purpose of my amendment is to commit Congress now to the policy of reducing these two items as funds under the Lever Act become available. As I said in the first place, for the next fiscal year more than a million dollars will be available under the Lever Act, and we certainly can properly at this time make a reduction in these two items.

Mr. LEVER. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. LEVER. The gentleman makes the statement that for the next fiscal year the fund available under the Lever Act will be about a million dollars. The gentleman makes the statement on the assumption that the States are going to accept the provisions of the Lever Act, many of which have not so far done so.

Mr. ANDERSON. I understood that all the States had accepted the terms of the Lever Act. I do not mean to say that all the States have made appropriations which will entitle them to a portion of the fund appropriated under the Lever Act, but what I do mean to say is that if the States do make the appropriations, as they are expected to, more than a million dollars will be available under the Lever Act. I think it is better that the appropriations should be made under the Lever Act than under this item, because the contributions by the States are compulsory, and they are not compulsory under these two items. That adds another reason why the appropriations should be carried as far as possible under the Lever Act and not under these two items.

Mr. CANDLER of Mississippi. Under this provision they require cooperation of the States, and they will not give them any money unless they contribute.

Mr. ANDERSON. That is true; but the item does not require a contribution.

Mr. CANDLER of Mississippi. The department does.

Mr. ANDERSON. It is true the department requires a certain contribution from the States, but it has not been uniform. In some cases it has been equal to the contribution of the Federal Government and in many instances it has been less, while under the Lever Act the contributions in every case must be uniform. Every State is then treated exactly alike. If the appropriations for farm demonstration work are based on the Lever Act, we will get away from the sectional proposition that we have been talking about this morning, and the appropriations will be fairly distributed over the country.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

Mr. CANDLER of Mississippi. The motion of the gentleman from Minnesota is pending.

Mr. STAFFORD. Well, I can move to amend his amendment, can I not? When the Lever Extension Act was brought before this House for a final vote last September, as I recall, I protested against the policy under which the National Government was committing itself of appropriating millions and millions of dollars for work belonging exclusively to the State, in that instance amounting in 10 years, as I recollect, to the enormous sum of $4,500,000. Here we are reaping in this demonstration work the whirlwind of the practice in having the National Government assume State functions. The proponents of that measure in advocacy of it stated that these appropriations would be eliminated, and yet we find the department, admitting that although the work is the same, coming and asking that these appropriations in this bill shall be continued. If there is anything that emphasizes the extravagance of the department and the disinclination of the department that has a hobby to check expenditures, it is this very item under consideration.

Mr. CANDLER of Mississippi. Will the gentleman yield?

Mr. STAFFORD. I can not yield. I do not think the amendment goes far enough, and I would like to see the whole appropriation eliminated. Here we have an appropriation of $300,000 for cooperation in demonstration work. The hearings disclose that the work is identical with the work provided for under the Lever bill. What justification can anybody in these hard-pressed times, when a bond issue is imminent and when a deficit stares us in the face and when this bill is under consideration which carries the largest appropriation that it has ever carried in the history of the Government, have for the continuation of these large appropriations.

Mr. CANDLER of Mississippi. I want to suggest to the gentleman that there was an amendment offered to the Lever bill on the floor of the House which provided that nothing in that bill should interfere with these appropriations.

Mr. STAFFORD. Oh, but the hearings disclose that the work is identical under these appropriations as in the Lever bill. Hundreds of thousands of dollars are to be expended under this extravagant appropriation of the Government's money.

Mr. MOORE. Will the gentleman yield?

Mr. STAFFORD. I yield.

Mr. MOORE. Does the gentleman mean to say that we are, in effect, appropriating money twice for the same purpose?

Mr. STAFFORD. We are appropriating for identically the same thing under the items in this paragraph and the work as authorized in the Lever Act.

Mr. MOORE. In an address made by the gentleman on yesterday he referred to "pork" in the river and harbor appropriation bill. Does the gentleman mean to say that same condition might apply to the agricultural bill in connection with any of these items?

Mr. STAFFORD. What condition?

Mr. MOORE. Why, the gentleman yesterday referred to "pork" in the river and harbor bill.

Mr. STAFFORD. That is acknowledged by everybody. As far as the intercoastal waterways project is concerned, everybody, except, perhaps, the president of the Inland Waterways Association—everybody else who is not prejudiced or biased or interested in this subject—knows it is a chimerical proposition. But I decline to go off on that proposition.

Mr. MOORE. The gentleman is way off now.

Mr. STAFFORD. It is extravagance. Here we have an instance where the department is not willing to accept hundreds of thousands of dollars appropriated in a permanent act, but comes here again asking for a continuation of the same old appropriations, so as to increase the agents in this field of work.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes.

Mr. HAUGEN. Mr. Chairman, I suggest 10 minutes.

Mr. LEVER. I will make it 10 minutes.

The CHAIRMAN. The gentleman from South Carolina modifies his request and asks unanimous consent that all debate on this paragraph and all amendments thereto close in 10 minutes.

Mr. HEFLIN. Mr. Chairman, reserving the right to object, is the gentleman from Michigan opposing this section?

Mr. McLAUGHLIN. I am opposing the amendment offered by the gentleman from Minnesota. I am in favor of the bill as it stands.

Mr. HEFLIN. I will not ask for time.

The CHAIRMAN. Is there objection. [After a pause.] The Chair hears none.

Mr. McLAUGHLIN. Mr. Chairman, I am opposed to the amendment offered by the gentleman from Minnesota [Mr. ANDERSON], although we admit that some of the statements made by him and by the gentleman from Wisconsin [Mr. STAFFORD] are correct. It is true that the work to be done under this appropriation and the appropriation carried in the following paragraph are the same, to some extent, as the work contemplated in the Lever Act. Some one has said it was the Lever-Smith Act, but it is the Lever Act. [Applause.] A gentleman in another body tried to take advantage of the popularity of this act to attach his name to it, but the credit for this law belongs to the gentleman from South Carolina [Mr. LEVER], and to him alone. [Applause.]

The Lever Act provides money for extension work in cooperation with agricultural colleges of the country; the first year $480,000, $10,000 for each State, to be given to each State unconditionally. It provides for an additional appropriation of $600,000 each year for seven years, when the law will mature, when it will carry annually the sum of $4,580,000. Most of that money, though, is to be appropriated by the Federal Government and paid to the States on condition that the States shall duplicate the amount which they might respectively be entitled to receive under the law. And it was intended by the committee which framed the law that that money should be used largely to carry on the same kind of work that is now being carried on under these two appropriations—money to be appropriated under this paragraph for farm demonstration work in the States outside of the cotton belt and the money appropriated in the next paragraph for helping the States of the South to overcome the evils and the effects of the boll weevil. Now that line of work is entirely in its infancy. It has practically just begun, and these sums of money appropriated for it in the different sections of the bill are, I was about to say, a mere drop in the bucket compared to the money actually necessary to carry on the work. These sums appropriated by this bill are altogether much lower than is necessary properly to carry on the work.

Mr. LEVER. Will the gentleman yield right there for a moment?

Mr. McLAUGHLIN. Yes.

Mr. LEVER. I think the figures will show this work has been carried on in two hundred and some odd counties, whereas there are 1,600 counties without it.

Mr. McLAUGHLIN. I do not remember those figures, but I know whenever application is made for some of this money the Department of Agriculture has found it necessary to deny the request; they have not the money, because the appropriations have not been large enough.

Mr. ANDERSON. Will the gentleman yield?

Mr. McLAUGHLIN. I will.

Mr. ANDERSON. If the gentleman does not think the appropriation is large enough and that this work is not carried on fast enough, why does he not move to increase the appropriation?

Mr. McLAUGHLIN. The work is increasing very rapidly, and the money provided by the Lever law is at present small, but each year it will be larger, each year following it will be larger, until it will total the sum of $4,580,000. The idea in continuing the appropriation provided in this bill is that that work be carried on and the maturity of the Lever bill be anticipated. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from Minnesota.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, including the employment of labor in the city of Washington and elsewhere, supplies, and all other necessary expenses, $666,020: *Pro-*

vided, That the expense of such service shall be defrayed from this appropriation and such cooperative funds as may be voluntarily contributed by State, county, and municipal agencies, associations of farmers, and individual farmers, universities, colleges, boards of trade, chambers of commerce, other local associations of business men, business organizations, and individuals within the State.

Mr. ANDERSON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 63, line 7, strike out "$666,020" and insert "$499,515."

Mr. ANDERSON. Mr. Chairman, I merely offer this amendment as a matter of good faith with myself. I stated that I would offer it as I had offered the amendment to cut down the preceding item. As a matter of fact this item ought to be cut down a great deal more than the amendment provides. The statement submitted by the Department of Agriculture to the committee shows that this $666,000 is divided among 15 Southern States at an average of about $44,000 each, and that the preceding item of $386,000 is divided among 33 States at an average of about $12,000 a year each. I merely moved to cut it down 25 per cent in the hope that our southern friends would recognize the equity in making that small reduction.

Mr. MANN. Mr. Chairman, personally I believe that if there is any money that the Government spends that is of more value than any other money it spends, it is the money that we spend in aiding the farmer by practical demonstrations and theoretical demonstrations which add to the value and the amount of the crops produced. [Applause.]

I shall not vote for the amendment offered by the gentleman. The amount carried in the bill now is between $600,000 and $700,000—a very great increase over what it was a few years ago—and it is further supplemented by the amount carried in the Lever bill. The Lever bill adds half a million dollars a year for a number of years to the amount of the permanent appropriation until that amount will be over $4,500,000, I believe. That will be 10 years from now, and by that time it is very likely that you will be carrying a larger amount for this appropriation, because I doubt very much whether the appropriations in these two items will be discontinued or even reduced.

There is no doubt but that the country, through the theoretical and practical work of the Department of Agriculture, and the teaching and the urging which they have done, has considerably increased the productivity of the soil. Yet we have only commenced on that subject. In the little farms of Europe, of course, there is an advantage there. They produce a much greater amount of wheat and other cereals and other crops per acre, with the same amount of cultivation, than we do. It is true that with our large areas and farms we must not expect to produce quite so much, and yet everyone knows that in the midst of a time when the cost of living is increasing and the population and consumption are increasing more rapidly than the amount of crops produced from the soil—in the midst of all that we could very largely increase the quantities per acre and the number of acres by more careful attention and cultivation.

Now, having said that, I would like to say a word to my southern friends. The amount in this item is $666,020. That is for farm demonstrations exclusively in the South. The other item was for $386,000, for farm demonstrations in the North. I make no complaint whatever about that. I think you need this demonstration work under present conditions in the South to a greater extent than it is needed in the North. But when we freely give it to you, so far as the North is concerned, sometimes I wonder at the nerve of some gentlemen from the South who, whenever a proposition comes up affecting the industries of the North, proceed to get red in the face and inveigh against these industries in the North. We are willing to help you in the South.

Mr. LEVER. I do not think the gentleman from Illinois would say that about any member of the Committee on Agriculture, however.

Mr. MANN. No; I do not say that about the chairman of the committee, nor, so far as I recall, have I said it about any member of the Committee on Agriculture, although I do not think that any of the gentlemen from down there are practically interested in taking care of our industries in the North, outside of our agricultural products, and they have been very fair about those, I believe. What the gentleman from Texas [Mr. YOUNG] a little while ago said was true, that wherever you help one part of the country you help the whole country, and where you injure one part of the country you injure the whole country. We ask just the same attention from you about our matters that you receive from us. I constantly hear Members on the other side of the House, and sometimes members of the Committee on Agriculture, assaulting as violently as they know how some of the industries of my city, without which your farmers would be in very much worse shape than they are now.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. GOULDEN and Mr. LEVER rose.

The CHAIRMAN. The chairman of the committee, the gentleman from South Carolina, will be recognized first.

Mr. LEVER. Mr. Chairman, I do not want to take up any of the time of the committee, but I think it is fair to the committee to say that the farm demonstration work in the North has been begun only within the last three years and since the party to which I belong has been in the majority in this House. Before that time not a dollar of money for this purpose was being expended except in the South. That is a strange coincidence—that the Republican Party should have started the farm demonstration work in the South and that the Democratic Party should have started the farm demonstration work in the North, and it shows how nonpartisan and nonsectional and how generous to each other the members of the Committee on Agriculture are. [Applause.]

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from North Carolina yield to the gentleman from Pennsylvania?

Mr. LEVER. Yes.

Mr. MOORE. Will the gentleman explain to the House how this money is expended; in what way it is distributed in carrying out the purpose of the paragraph?

Mr. LEVER. I will say to the gentleman that that is rather a long story, but I can do it in a few moments, I think.

Mr. MOORE. I can come in a little later.

Mr. LEVER. No; I prefer to answer the question now. In most of the States there is a cooperative arrangement with the State agricultural college in the expenditure of this sum. The State agricultural college is located at some central point in the State, and in this college is what we know as the extension leader. This extension leader has his various local demonstrators in the various communities of the State, who come in personal contact with the farmers of the community and impart to them the information in regard to better methods of agriculture.

Mr. MOORE. The paragraph provides for the employment of labor in the city of Washington and elsewhere. Does that mean labor in the sense of mere manual labor or is it scientific labor or brain labor?

Mr. LEVER. I really do not know what construction they give to the term "labor" there, but that item provides for the overhead charges in the city of Washington.

Mr. MOORE. The item says:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton boll weevil, including the employment of labor in the city of Washington and elsewhere, supplies, and all other necessary expenses, $66,020.

I am asking the question because that is a very large sum of money, and if it is applied to the employment of labor, that is one thing. If it is applied to the appointments of scientists and experts, that is another thing. That is what I wanted to get at.

Mr. LEVER. I will say to the gentleman this: That under that language probably this item will provide for the charwomen or a messenger and probably occasionally a laborer, but the bulk of the administrative expenses in the city of Washington would be such as the gentleman describes as scientific work.

Mr. MOORE. Are bodies of workingmen sent out to do this work, or is it a body of scientific and brain workers?

Mr. LEVER. These men sometimes travel and meet large bodies of farmers in conventions. They sometimes meet a convention of the various county agents and impart to them the instructions that they carry from the city of Washington, but the bulk of this work is done in the field.

Mr. GOULDEN. The gentleman from Pennsylvania has anticipated one of my questions, but I want to ask if the chairman of the committee has any idea of how much of the amount included in these two items is for the employment of labor in the city of Washington, including all overhead charges—about what percentage of these two appropriations?

Mr. LEVER. I will say that I can not give the exact figures off hand. Here are the items submitted in the estimates, but I have not added them up. It is, however, a comparatively small amount, about the usual amount for administrative purposes.

Mr. GOULDEN. I am somewhat familiar with the demonstration work in the North in this direction, and I want to compliment the committee and the department for the progress that they are making. If the chairman of this committee [Mr. LEVER] had done nothing else than to secure the passage of the Lever Act, his name would be handed down to posterity, and

as a benefactor would be remembered by the farmers of this country for many years. [Applause.]

Mr. BOOHER. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. BOOHER. Is there anything in the hearings about what progress is being made toward the destruction of the boll weevil?

Mr. LEVER. I will say to the gentleman that the purposes of these two items, and the general progress being made under the two items, were quite well known to the members of the committee, and hence we did not take the time of the committee to take testimony upon the subject, so that the hearings this year were not very full.

Mr. BOOHER. What new method have they discovered, or what new remedy have they discovered, for this scourge in the cotton district?

Mr. LEVER. They have not discovered any new remedy.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEVER. I ask unanimous consent for one minute more.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that he may proceed for one minute more. Is there objection?

There was no objection.

Mr. LEVER. The only practicable way that has been found of handling the boll-weevil situation is to grow a crop of cotton under certain cultural methods in spite of the boll weevil. In my judgment, so far as the entomological work in reference to the boll weevil is concerned, practically no positive progress has been made. Some negative progress has been made. I mean by that, they have discovered that a great many suggested remedies will not do the business.

Mr. BOOHER. A year ago it was discovered that rotation of crops would destroy the boll weevil. Is that practiced yet?

Mr. LEVER. That is being practiced yet.

Mr. BOOHER. Does it require $660,000 a year to inculcate that knowledge?

Mr. LEVER. That question has been asked a great many times. I think this language is very unfortunate. It carries the words "boll weevil" in it. My genial friend from Michigan [Mr. McLAUGHLIN] has always protested against that language, but for certain tactical reasons I have not desired to have those words cut out.

Mr. BOOHER. What are the tactical reasons?

Mr. McLAUGHLIN. I simply protested against the language used; not against the appropriation or the use made of it.

Mr. LEVER. Oh, no; only against the language in the appropriation. The tactical reason was that I was afraid if I brought this bill in here with this item changed by striking out the words "boll weevil," I would create a panic among my southern friends, and that is all there is to it.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. BOOHER. Mr. Chairman, I move to strike out the last word. I will ask the gentleman how much money has been appropriated for the boll-weevil proposition?

Mr. LEVER. I can not tell the gentleman offhand. We have been appropriating for it for about 10 years.

Mr. BOOHER. Not less than $500,000 a year, have we?

Mr. LEVER. Not that much until very recently.

Mr. BOOHER. There has been more than $3,000,000 appropriated, has there not?

Mr. LEVER. This is the first year the amount has exceeded $500,000.

Mr. BOOHER. Heretofore it has been carried at $500,000, has it not?

Mr. LEVER. No; up to last year the Federal appropriation was only about $250,000 to $275,000.

Mr. BOOHER. The gentleman is mistaken.

Mr. LEVER. The gentleman in charge of the bill knows. Last year, on account of the proviso here striking out the cooperative arrangement which had theretofore existed between the general education board and the Department of Agriculture, which, I think, was a wise provision, this was increased.

Mr. BOOHER. Now, are they making any progress in this work at all toward the destruction of the boll weevil?

Mr. LEVER. I will say to my friend that the work of farm demonstration in the South—getting the boll weevil out of your head now—is absolutely creating a revolution in the agriculture of the South.

Mr. BOOHER. I am not talking about farm-demonstration work. I am in favor of it. I want some information on the subject of boll weevil, if I can get it.

Mr. LEVER. I have been very frank with the gentleman about the boll-weevil proposition. I am very willing to have an amendment to strike it out, because the language of the bill is misleading.

Mr. BOOHER. I do not want to strike it out. I am trying to find out what progress has been made.

Mr. LEVER. I am telling the gentleman.

Mr. BOOHER. You have not told me.

Mr. LEVER. Either the gentleman is unfortunate or I am.

Mr. BOOHER. I suppose I am unfortunate in my understanding.

Mr. LEVER. No; I think not. I am.

Mr. BOOHER. Over $3,000,000 has been appropriated to find out some remedy for the boll weevil. What progress has been made?

Mr. LEVER. I stated to the gentleman a moment ago, as plainly as I knew how to state anything, that the entomological work in regard to the boll weevil has not made any affirmative, positive progress. The entomologists disagree with me on that, but in my opinion they have made no positive progress. They have made some negative progress, in this, that a great many remedies suggested by different people have been tried out and found to be useless in checking the ravages of the boll weevil. Whatever positive progress has been made has been due to the cultural methods which the Department of Agriculture is inducing the people of the infected areas in the Southern States to adopt.

Mr. BOOHER. This boll weevil does not infest the whole country. It is only found in spots.

Mr. LEVER. The boll weevil covers the larger part of Texas and Louisiana, a large part of Mississippi, and it is now in Alabama and touching the border of Georgia, and going eastward at the rate of about 70 miles a year.

Mr. BOOHER. Diversified farming is a remedy for it, is it not?

Mr. LEVER. They think so; yes.

Mr. BOOHER. Then why do you want $600,000 to teach people that diversified farming will stop the boll weevil when they know it already.

Mr. LEVER. My friend thoroughly misunderstands the scope of this work. We are teaching the people how to diversify.

Mr. BOOHER. Does not the farmer in your country know enough to sow wheat or oats or rye, or to plant corn when his cotton crop was destroyed the year before, when he has been told by your experts to do so, or do you have to go down there and put it in for him?

Mr. LEVER. No; we do not go down there and put it in for him at all; we do not sow his wheat, we just simply preach to the people the doctrine of diversified agriculture and show them how.

Mr. BOOHER. You have been preaching that for 10 years, have you not?

Mr. LEVER. Yes; I have been preaching it for 15 years.

Mr. BOOHER. And it has not done any good.

Mr. LEVER. Oh, I think it has.

Mr. BOOHER. You have got the same boll weevil down there, have you not?

Mr. LEVER. Yes; the boll weevil is there and we will have more in 10 years.

Mr. BOOHER. Then why make this appropriation of money if you are not accomplishing anything?

Mr. LEVER. We are trying to grow cotton in spite of the boll weevil; and, also, we want the people to diversify their crop growing.

Mr. HEFLIN. Mr. Chairman, I move to strike out the last two words.

Mr. NORTON. Will the gentleman yield?

Mr. HEFLIN. I will yield.

Mr. NORTON. I want to ask the chairman of the committee, is it not a fact that this item of $66,000 is used largely for demonstration work in the South, not pertaining to the eradication of the boll weevil, but to assist in the improvement of farm conditions in the South?

Mr. HEFLIN. That is true to some extent. The chairman of the committee, I thought, had explained that to the gentleman from Missouri. All of the money is used in teaching the farmers how to farm in boll-weevil regions.

Mr. NORTON. Just as the preceding item is used in the North in cooperative demonstration work?

Mr. HEFLIN. Yes; with the additional amount made necessary by the presence of the boll weevil in the South. I am certain that my friend from Missouri [Mr. BOOHER] is not objecting to the appropriation because it is appropriated for use in the South. I could remind my friend that we very cheerfully appropriated $600,000 last year to be used in the hog-cholera region, and that was in the Middle West and not in the South.

I hail from a Southern State, and, Mr. Chairman, I stand ready to vote for relief for the people in any section of our country. I do not care whether it is in the East, in the North, or in the West. I am ready to support at any time any measure to aid the farmers in every section of our country. I sometimes grow a little weary with gentlemen who undertake to charge that this committee is appropriating money to aid the South to the detriment and neglect of other sections of the country. This work of eradicating the boll weevil is of vast advantage to the farmers in my section. We have taught the farmers in the section affected by the weevil how to produce some cotton even in his presence. I want to say that one remedy we are teaching the people is to plow the cotton when the weevil is in the small square. Shaking it off by the plow and by the animal coming in contact with the stalk causes the little square to fall, and turning up the fresh soil, moist in the heat of the day, causes the square when it falls on the soil immediately following the plow to get very hot and very dry, and that actually kills the weevil; it steams him to death. But we are teaching the people down there to grow other things than cotton. I want to say to my friend that it is not an easy matter to teach people who have been raising cotton for 100 years, and relying absolutely on that crop, to quit producing cotton. You have got to show them that they can do better by producing other crops.

Mr. BOOHER. Will the gentleman yield?

Mr. HEFLIN. Yes.

Mr. BOOHER. I do not want the gentleman to think that I am objecting to this appropriation because it is for the South. I am not objecting at all; I am trying to find out what progress has been made. Now, I am going to recommend something to the gentleman; I do not know whether he will follow it or not. The Agricultural Department has published an interesting bulletin, No. 519, on cotton raising. I wonder if the gentleman from Alabama has sent any of those bulletins into his district.

Mr. HEFLIN. Oh, I think that the farm that the bulletin refers to is in my district.

Mr. BOOHER. Does not the gentleman think that would educate his people?

Mr. HEFLIN. I think, as I have said here once before, that the old negro who claims to have made that tremendous amount of cotton on 2 acres of land—7 bales of cotton on 2 acres of land—produced most of it at night while his neighbors were asleep. [Laughter.]

Mr. BOOHER. I know that the gentleman said so, but the Department of Agriculture does not agree with him.

Mr. HEFLIN. Of course, the department is further removed from the premises than I am and knows less about the old, old method of producing cotton in the nighttime. [Laughter.]

Mr. BOOHER. The trouble is that the farmer who is so successful in raising the cotton happened to be a colored man, and you would not take any advice from him. Nobody had to go and tell him how to raise cotton, but he did it by hard work. Now, I recommend the gentleman to get 5,000 of these bulletins and distribute them personally to these people, and if he does so they will get rid of the boll weevil in his district. Information on this subject should be welcome, without reference to the source from which it emanates. Why does not the gentleman avail himself of the information contained in Bulletin No. 519 and advise his constituents who are cotton raisers to do likewise?

Mr. MOORE. Mr. Chairman, has all time expired?

The CHAIRMAN. Unless some one makes the point of order.

Mr. McLAUGHLIN. Mr. Chairman, I move to strike out the last two words.

Mr. MOORE. Mr. Chairman, I just inquired of the Chair if all time had expired, and I understood the Chair to say that it had.

The CHAIRMAN. What the Chair meant was that if under the general rule a point of order was made, there was no more time.

Mr. MOORE. A parliamentary inquiry, Mr. Chairman. Will it be proper to ask for recognition to discuss the amendment after the gentleman from Michigan has spoken?

The CHAIRMAN. According to the way we have been running, unless some one makes the point of order, I think it would be.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto close in 15 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. Is there objection?

There was no objection.

Mr. McLAUGHLIN. Mr. Chairman, I feel the same about this amendment as I did about the one offered to the preceding paragraph. I think this appropriation ought to be continued this year, so that the work may be continued and extended as it will be, and perhaps appropriations of this kind ought to be continued even a little longer than one year, or until the States have the full benefit of the money coming from the Lever law. But what the chairman of the committee said in answer to an inquiry by a gentleman as to the meaning of this appropriation justifies the action that some of us have taken or attempted, rather, to take with a view of changing this language. These words "boll weevil" ought not to be in the bill at all.

Mr. YOUNG of Texas. The gentleman is right.

Mr. McLAUGHLIN. The appropriation has nothing whatever to do with the boll weevil. The money is used for the hire of men and to pay the expenses of men to work and cooperate with the farmers in the South in the study of agricultural problems, and in particular to bring about better agriculture in that part of the country. The need of that effort was made evident by the ravages of the boll weevil. The boll weevil came and devastated the cotton fields, and it was necessary for the people in that section of the country to have some relief, and they asked for an appropriation, and the use of the language "for the relief of the boll-weevil situation" was a subterfuge. I always believed it was a subterfuge, and the House by misapprehension has appropriated this money, believing that it was to be an appropriation to fight the boll weevil, whereas it was simply to teach the people other lines of agriculture, made necessary by the ravages of the boll weevil. Now, the question has been asked as to how this money is used. In the North it is used in this way: The Department of Agriculture will offer to the people of a county—in my State, for instance—the sum of $1,200 a year to be applied to the payment of a man to do work in that county, on condition that the people of the county, the county authorities or some association organized for that purpose, shall undertake to furnish the rest of the money necessary to pay the salary and expenses of the man, usually from $2,500 to $3,000 a year in the aggregate. Perhaps a dozen or 15 men are now employed in my State in that way, covering a dozen or fifteen counties. In addition to that a man is employed in a congressional district to oversee the work of the county men in that district. There are several district men in Michigan. These congressional-district men are paid by the Department of Agriculture altogether out of this appropriation. Then there is one man employed over the entire State, employed jointly by the Department of Agriculture and the agricultural college, and he is paid out of the money furnished by the department out of this appropriation and by the agricultural college out of its own money. Now, that is the work in a general way as it is done in the States of the North. I think the work done in Michigan is typical of the work done in other Northern States. I do not know so much about how it is done in the States of the South. The criticism made by the gentleman from Missouri, that the people in some sections are asking for too much to be done for them, is a proper criticism. The people in some sections of the country, perhaps all of them, have been asking that in various lines of work too much—more than should be asked—shall be done for them. They have not been satisfied with advice or suggestions as to better methods. Many of them asked to have the Federal representatives come in and actually take part with them and do the physical work in connection with their business or the lines of work in which they are engaged.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE. Mr. Chairman, I move to strike out the last two words. Mr. Chairman, this discussion upon the boll weevil has brought out two or three very clever suggestions, one of them from the gentleman from Texas [Mr. YOUNG], which interested me mightily. His speech was eloquent and it was patriotic. He believes that what benefits one section of the country benefits all sections of the country, and what tends to injure one section of the country tends to injure all sections of the country. That is a fine, splendid, patriotic sentiment, and I believe in it. I believe in it thoroughly with respect to the treatment of farmers in an Agricultural bill. I believe in it thoroughly also with respect to a river and harbor bill, and I believe in it thoroughly with respect to the welfare of all the people of this country, whether employer or employee. Sometimes gentlemen have contended on this floor, and violently, over the question of "special privileges" supposed to be granted to one section of the country above another section or to one kind of industry over another industry, and generally such conflicts have arisen from attacks made upon the eastern and northern industries. So I hail with pleasure and with gratifica-

tion the speech of the gentleman from Texas because of its breadth and its foresight, and I commend the leader of the Republican side of the House, the gentleman from Illinois [Mr. MANN], for so promptly stating that there was another side of this question affecting our so-called sectional criticisms. Now, here is a bill that proposes to appropriate for the benefit of the country $22,000,000. The gentleman from Wisconsin [Mr. STAFFORD] a moment ago made some reference to river and harbor "pork." He alluded to the river and harbor bill.

I contend that the river and harbor appropriation bill is a bill that tends not only to improve the commercial relations of the country and lower the freight rates, but it also gives employment throughout the country to as great an extent as is provided in any other bill. From the answer of the chairman of this committee, the gentleman from South Carolina [Mr. LEVER], and from the speech of the gentleman from Michigan [Mr. MCLAUGHLIN] it does not appear that the bulk of this appropriation of $666,000 for the treatment of the boll weevil goes to the labor of the country. Apparently it is not put in circulation to feed the men who work upon the farm; it is expended rather in the payment of salaried men, who are specialists or instructors, whose duty it is to teach the plodding farmer how to do his work. Now, I am in favor of the farmer who does the farm work, just as I am in favor of the man who works upon river and harbor improvements, or who dirties his hands in digging the canal. These are the kind of men I want to help, whether they live in Texas or up in Pennsylvania.

I question whether we are doing much to help these men here, since most of this appropriation of $666,000 goes to pay the specialists who tell the workingman how to work. I believe in the elimination of the boll weevil, and I want you gentlemen to get this money. I think you ought to have it. But I think it is only fair to say that if the appropriation is intended wholly and solely for those who have been trained to instruct, rather than to work, it would be better to frame our agricultural bills and our river and harbor bills, so that actual labor, whether in the factory or on the farm, may have at least an equal chance at our hands, along with our intellectual friends, the specialists. [Applause.]

Mr. HELGESEN. Mr. Chairman, this matter was thrashed out in the committee for a long time, and if the committee had taken my advice in regard to the matter there would have been no occasion for this lengthy discussion on the subject.

When the men from the Department of Agriculture in charge of the expenditure of this $666,000 were before our committee, I asked them what success they had had in exterminating the boll weevil. They said they had had no success whatever and had no hope of exterminating that pest. Then I wanted to know why they retained this language in the bill, and they could not give any excuse for it.

I suggested to the committee at the time that it would be well to strike out these words, "and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil," leaving this section worded identically as the preceding section, except that it was inside the cotton belt; not outside.

There is no man from the North who will oppose an appropriation of whatever sum of money is necessary for farm demonstration work in the South, but I believe it is wrong to leave language in this bill that is absolutely misleading. People in the North who do not know the situation can not understand why we appropriate money that can not be used for the purpose expressed in the bill or for the accomplishment of anything practical in that line for the benefit of the South. It is absolutely misleading, and I think if we were wise enough to strike out these words it would obviate the necessity for lengthy discussions of this matter in the future when it has no bearing upon the value of this appropriation whatever.

While I do not now want to submit an amendment, because the committee turned it down—and I am perfectly willing to stand by the judgment of the committee—I still believe that it would be a wise thing to strike out this language, so that this discussion will not occur annually over these words and over this same sentence.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. LEVER. Mr. Chairman, an amendment is pending. I ask for a vote on the amendment.

The CHAIRMAN (Mr. FLOYD of Arkansas). The question is on agreeing to the amendment offered by the gentleman from Minnesota [Mr. ANDERSON].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

To enable the Secretary of Agriculture to establish and maintain agricultural experiment stations in Alaska, Hawaii, Porto Rico, and the Island of Guam, including the erection of buildings, the preparation, illustration, and distribution of reports and bulletins, and all other necessary expenses, $120,000, as follows: Alaska, $40,000; Hawaii, $35,000; Porto Rico, $30,000; and Guam, $15,000; and the Secretary of Agriculture is authorized to sell such products as are obtained on the land belonging to the agricultural experiment stations in Alaska, Hawaii, Porto Rico, and the Island of Guam, and this fund shall be available until used: *Provided*, That of the sum herein appropriated for the experiment station in Hawaii $5,000 may be used in agricultural extension work in Hawaii.

Mr. MANN. Mr. Chairman, I make a point of order against the language on page 64, line 11, as follows: "And this fund shall be available until used."

Mr. LEVER. I concede the point of order, Mr. Chairman.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

That hereafter there be prepared by the Department of Agriculture an annual report on the work and expenditures of the agricultural experiment stations established under the act of Congress of March 2, 1887 (24 Stat. L., p. 440), on the work and expenditures of the Department of Agriculture in connection therewith, and on the cooperative agricultural extension work and expenditures of the Department of Agriculture and of agricultural colleges under the act of May 8, 1914, entitled "An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture;" and that there be printed annually 8,000 copies of said report, of which 1,000 copies shall be for the use of the Senate, 2,000 copies for the use of the House of Representatives, and 5,000 copies for the use of the Department of Agriculture.

Mr. MANN. Mr. Chairman, I reserve a point of order on that.

Mr. BARNHART. Mr. Chairman, I make a point of order against the paragraph.

Mr. MANN. This is purely legislation.

Mr. BARNHART. It is new legislation, to begin with, Mr. Chairman, and it makes it permanent law.

Mr. LEVER. Mr. Chairman, these gentlemen may be right, but I have an idea that they are not, and I am going to call the attention of the Chair to page 253—the present occupant of the chair has that volume there—of "Laws Applicable to the United States Department of Agriculture." At the bottom of page 253 I will read:

That there be printed 8,000 copies of the report of the Director of the Office of Experiment Stations, prepared under the supervision of the Secretary of Agriculture, on the work and expenditures of that office and of the agricultural experiment stations established in the several States and Territories under the law of Congress of March 2, 1887, for 1903, of which 1,000 copies shall be for the use of the Senate, 2,000 copies for the use of the House of Representatives, and 5,000 copies for the use of the Department of Agriculture; and that annually thereafter a similar report shall be prepared and printed, the edition to be the same as for the report herein provided.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. LEVER. Yes.

Mr. MANN. If that is the law, what is the purpose of this item in the bill?

Mr. LEVER. The explanation given by the chief of the bureau was that inasmuch as the department under its scheme of reorganization has changed the name of this service, there might be some question about the authority. He thinks he has the authority to print, but he wanted to be absolutely sure. I say I am not sure that this is a change of existing law. I am in doubt about it myself.

Mr. MANN. There is no doubt about it changing existing law.

Mr. LEVER. I am ready for the Chair to rule.

Mr. MANN. Is the only explanation that of the change in the name?

Mr. LEVER. That is the only explanation given in the committee.

Mr. MANN. As I recalled, when I saw this item, we now get a quota——

Mr. LEVER. The House now gets 2,000 copies——

Mr. MANN. Of these reports?

Mr. LEVER. Yes.

Mr. MANN. And this does not change what we now get?

Mr. LEVER. This language here would just continue that exactly. That is the only purpose. It may be that the item is subject to a point of order. I am in doubt about it, and the department is in doubt about it, but they very frankly confess that. But they said they thought it was well to let them continue to make these reports. I think this is a very valuable document.

Mr. MANN. Of course if it is to continue reports now being printed, and this paragraph is necessary because of the change of name, I would not make a point of order against it.

Mr. LEVER. They included, in addition, only the agricultural extension bill in this language. The reports will also cover the operations under the agricultural extension act. That is all there is to it. I do not believe it is subject to a point of order myself.

Mr. BARNHART. Mr. Chairman, I want to call the attention of the Chair to Rule XI, on page 363 of the Manual. It reads:

All proposed legislation or orders touching printing shall be referred to the Joint Committee on Printing on the part of the House.

Then I want to call the attention of the Chair to section 2, paragraph 4, of the act of March 1, 1907, which reads as follows:

Orders for printing extra copies otherwise than herein provided for shall be by simple, concurrent, or joint resolution.

Further on it says:

Such resolutions when presented to either House shall be referred immediately to the Committee on Printing, who in making their report shall give the probable cost of the proposed printing, upon the estimate of the Public Printer.

Mr. LEVER. Is the gentleman reading from the statute?

Mr. BARNHART. I am reading from the statute. I have given the Chair the citation.

Mr. LEVER. But this is authorized under that joint resolution.

Mr. BARNHART. It should be referred to the Committee on Printing.

Mr. LEVER. What is the necessity of referring it to the Committee on Printing when it is already law? This is an exception to the gentleman's proposition. It seems to me the language is clearly in order, under the explanation I have made in answer to the gentleman from Illinois [Mr. MANN].

Mr. BARNHART. How could the gentleman do it under the act of 1914 if his premise is true?

Mr. LEVER. I have tried to explain, in the first place, that this is nothing more than a continuation of work authorized under this joint resolution which I read to the Chair a moment ago. In the second place, answering the gentleman's other question, the department had some doubt as to their authority to do this work.

Now, in my own judgment, I think they have the authority. I am a little in doubt about it, I confess, but they want to do the work that they have been doing and that they were authorized to do under the old Office of Experiment Stations. The name of that office is now changed, and they want to do exactly the same work, except that they want to include in it the extension work. I think it is authorized.

Mr. BARNHART. Over and above all, it is a move to secure further privileges of public printing for a department. These department heads seek from time to time to get all of the appropriation allowances they can in the sundry civil or other appropriation bills, and then come directly and indirectly to Congress to get more and more. Personally I have no objection whatever to publishing every possible document that will conduce to larger success in agriculture or any other department of human endeavor, but I know from my own experience that it is the general disposition of these departments to go before the Committee on Appropriations and get all that they can secure there, and then come to the other committees of the House, or to the House itself, and ask for more, in order that they may exploit certain notions of their own with the general appropriations; and then when the Congress wants anything for the benefit of the people generally, it must make additional appropriation, as the departments utilize all of their printing allotments as they choose to do.

Mr. Chairman, if it is in order for the Committee on Agriculture—I will not say to usurp the functions of the Committee on Appropriations, but to assume its functions in this respect—and also to assume the functions of the Committee on Printing, then the rule which I have just cited has no force.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Salaries, Office of Public Roads and Rural Engineering: One director, who shall be a scientist and have charge of all scientific and technical work, $4,500; 1 draftsman, $1,920; 1 chief clerk, $1,900; 2 clerks, class 4; four clerks, class 3; 1 clerk or editorial clerk, $1,600; 1 clerk, $1,500; 1 clerk, $1,440; 2 clerks or instrument makers, at $1,440 each; 1 clerk or tabulator, $1,440; 2 clerks, class 2; 1 clerk, $1,380; 2 clerks, at $1,320 each; 4 clerks, at $1,260 each; 5 clerks, class 1; 1 clerk or editorial clerk, $1,200; 1 clerk or draftsman, $1,200; 1 clerk or draftsman, $900; 1 clerk or photographer, $1,200; 1 clerk or photographer, $1,000; 2 clerks, at $1,140 each; 2 clerks, at $1,080 each; 1 clerk, $1,020; 7 clerks, at $1,000 each; 3 clerks, at $900 each; 1 clerk or instrument maker, $1,200; 1 messenger or laboratory helper, $840; 2 messengers, laborers, or laboratory helpers, at $720 each; 1 messenger or laborer, $660; 5 messengers, laborers, or messenger boys, at $600 each; 5 laborers, messenger boys, or charwomen, at $480 each; 3 charwomen, at $240 each; in all, $75,960.

Mr. HUMPHREY of Washington. Mr. Chairman, I move to strike out the last word. I want to call the attention of the chairman of the committee to line 17——

Mr. LEVER. On what page?

Mr. HUMPHREY of Washington. On page 66:

One clerk or editorial clerk, $1,600.

And then, in line 22:

One clerk or editorial clerk, $1,200.

I presume those are the gentlemen who perform these meritorious services, of which I gave an illustration yesterday, of preparing these bulletins for the press. This is the first place where I have seen them appropriated for. They have these gentlemen in all the other departments, but no man on this floor can find out how they are paid. What are the duties of these distinguished editorial clerks, and what do they do?

Mr. LEVER. I will say to the gentleman from Washington that I think the language of the items explain just about what you could expect their duties to be. I have not looked into that. The gentleman understands that it is impossible for me to know the duties of every clerk and employee in the Agricultural Department. That is a physical impossibility. I think they get out bulletins——

Mr. HAWLEY. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. HAWLEY. As I remember the explanation made by the department of the work of these clerks, it is that they prepare the manuscripts sent in to them by the writers in the department for printing at the Printing Office.

Mr. LEVER. That is the inference I draw from it, of course.

Mr. HUMPHREY of Washington. The other day I took occasion to look up the traveling expenses of the department. I had the data on the desk, but it is gone now. I found where they paid some man $10, expenses to go down to Richmond, Va., to see about purchasing a printing press for the Forestry Service to be sent out to Utah. I was wondering what the Forestry Service needed with a printing press in that State.

Mr. LEVER. I should wonder about that myself.

Mr. HUMPHREY of Washington. And whether it is a part of the duty of one of these editorial clerks to edit some paper in Utah.

Mr. LEVER. I have no information about printing presses at Denver, and of course I do not know anything about the $12 to which the gentleman refers.

Mr. HUMPHREY of Washington. I can look up the item.

Mr. LEVER. I do not question the gentleman's statement.

Mr. HUMPHREY of Washington. I had it on my desk, but I can not find it now. I think it is to be commended that in this bill it states here what these items are for. In the Post Office Department they have a gentleman by the name of McAdam, who prepares these bulletins, and so far as I have been able to find it is not possible to ascertain how he is paid. He is not under the civil service, but he is there on a salary telling what a great and glorious work the Post Office Department is doing.

Mr. LEVER. I wish the gentleman would send me the information about the printing press in Utah.

Mr. HUMPHREY of Washington. The gentleman will find it in the accounts of traveling expenses, but I will furnish it to him. I do not say that none of the bulletins are of any value, for some of them are, but it has gotten to be an abuse. Take the bulletins issued by the Agricultural Department, and most of them are valuable; but such a bulletin as I read here yesterday, sent out over the country where we appropriate $100,000 a year for that kind of nonsense, is an abuse. The principal object of some of these bulletins is to create a sentiment to compel us to make more appropriations for the bureau. You will see a great many containing insidious attacks on Congress and say if Congress would only appropriate more money so they could investigate certain things they could do great service to the country.

Mr. BARKLEY. Mr. Chairman, I desire to ask the gentleman from South Carolina a question. I notice in the item a salary for clerks and employees at $1,920 a year. How does the committee or the department fix a salary at $1,920 instead of $1,900 or $1,950?

Mr. LEVER. It is their method of division; it is at the rate of $160 a month.

Mr. BARKLEY. They fix it by the month?

Mr. LEVER. Yes.

Mr. BUTLER. Mr. Chairman, I move to strike out the last word. I do not recall when this bureau was established. Is the gentleman able to tell me the year?

Mr. LEVER. No; I have not the record here, but it was 8 or 10 or 15 years ago.

Mr. BUTLER. Can the gentleman tell me the amount of this appropriation originally?

Mr. LEVER. That would be hard to recall.

Mr. BUTLER. I know that we ask the gentleman from South Carolina many questions that we ought not to ask him; we use him as a sort of encyclopedia.

Mr. LEVER. The original appropriation was very small.

Mr. BUTLER. And yet the office expenses have crept up to $75,960.

Mr. LEVER. Let me say to the gentleman that there is an apparent increase in the statutory roll of $23,000 on account of transfers of certain items carried in other parts of the bill. The Roads Office has grown very rapidly.

Mr. BUTLER. I appreciate that it has grown very rapidly, and especially the appropriations. I should like to know something about the activity of this bureau. Will the gentleman tell us what it is the bureau really does in the way of assisting in the construction and maintenance of good roads? It does no more than advise?

Mr. LEVER. The Government, of course, conducts a great many experiments in road building, as to the best kind of road machinery, but does not enter into the building of roads except probably a mile here and there as a demonstration proposition. They do give advice in the construction of roads.

Suppose that a county in my State has issued bonds for the construction of roads. The department will be called upon to send an expert or a specialist to go over the local conditions and the best methods of expending the money and the best kind of roads to be built.

Mr. BUTLER. Has not the State of South Carolina its own road department?

Mr. LEVER. We do not have any central department; no State institution; it is a county organization.

Mr. BUTLER. Then, this bureau does have an official who goes about and advises as to the kind and character of roads to be built.

Mr. LEVER. They do.

Mr. BUTLER. Does the gentleman know how many officials they have traveling around giving advice?

Mr. LEVER. I can not; but that can easily be ascertained.

Mr. BUTLER. Gentlemen understand how much easier it is to get this information from him than it is to hunt it up. As I understand, they decide on the advisability of the territory where they are invited to go examine the character of the ground and advise the authorities what sort of a road to build.

Mr. LEVER. They look over the material, and then they have to determine, considering the kind and quantity of material, the most economical and the best way to build the roads in that locality.

Mr. BYRNS of Tennessee. If the gentleman will yield, I want to say that they not only advise as to the best road to be built, but they allow the engineer of the department to stay on the ground and instruct the local officials how best to build the road, and allow him to remain for two or three weeks until they are advised properly how to construct the road.

Mr. LEVER. That statement is correct.

Mr. BUTLER. Will the gentleman permit me to make this observation. I am greatly interested in road construction, but I believe it is a factor in our public life that ought to be worked out by different communities and different States. I believe that much of this appropriation of $660,000 is absolutely wrong and a waste of money. But there is no use of making any objection to it here. I live in a community where we build our own roads. The State of Pennsylvania has its own road department, or a department of public roads, where we can obtain instruction if we see fit. This appropriation has grown to the enormous sum of $600,000, and inasmuch as we may next year have to hold out our hats, I think we ought to reduce some of these expenses.

Mr. CANDLER of Mississippi. The interest in public-road building all over the United States has increased to such an extent that it justifies to some extent the additional appropriation in this bill. I can give a succinct illustration that occurred in my country. They had a certain kind of material down there, and they were in doubt whether a road could be constructed of that material.

Mr. BUTLER. But it would not cost $60,000——

Mr. CANDLER of Mississippi. They want to build it for the purpose of demonstrating that the material could be used and that it could be built with benefit to the community and economy to the country.

Mr. CLINE. Mr. Chairman, I would like to be recognized for about three minutes. Mr. Chairman, I just want to state Indiana has more good roads than any other State in the Union and it has made more progress in the development of good roads probably in the last three or four years than any other section of the country in road making. These appropriations have been made from time to time and continue to grow, and while I am not in favor of large appropriations of this character, I do believe, from the fact that we have a skilled force of men going throughout the country to demonstrate with very little cost that good roads can be scientifically and economically made and the way to construct them, that Congress ought to take advantage of that opportunity which it now has. I know that one county in the district which I represent has built and in process of construction 600 miles of stone roads. They have had a man from the Department of Agriculture who had given the people in that section some instructions in building gravel and stone roads, and it happens, Mr. Chairman, that the character of the soil is of a loamy character and does not contain much gravel, and they have been able to continue this gentleman from the Department of Agriculture there for three weeks to get this sort of instruction, which is very valuable to the people of that community; and I am satisfied that as long as the Government has made this expenditure and has increased this appropriation, that the value and benefit of such information disseminated throughout the country can not be overestimated. I merely wanted to make that observation, which came within my range of view.

Mr. BUTLER. Will the gentleman yield?

Mr. CLINE. Yes.

Mr. BUTLER. I desire to call attention to the paragraph of this bill which provides for an expenditure of $75,960 for a civil force in this bureau. In this paragraph there is no provision made—I can not find it—to pay for an official who visited the community of which the gentleman spoke to give instructions. I have noticed this item grow from an inch long until it covers a page. It is mighty expensive, and I simply here make my protest and give notice that if I live to be a Member of Congress when the Republicans come into power I intend to make an effort to get rid of this item or greatly reduce it.

Mr. CLINE. I desire to say to the gentleman I am not out of harmony very much with what the gentleman from Pennsylvania has said; but inasmuch as we have increased these expenditures to the extent we have, and inasmuch as we have experts on hand, and inasmuch as we have men who know the necessity for the dissemination of knowledge is very great, I believe that we ought to make use of what we now have. As a general proposition I am opposed to all appropriations of this character; but from the fact that we have now large experience, derived from former appropriations, I think that advantage ought to be taken of it.

Mr. MADDEN. Mr. Chairman, I move to strike out the last two words. I have often wondered what the men engaged in the Office of Public Roads do for a living, and I still continue to wonder why it is we continue to increase the number of men whose employment is of an uncertain character, and I am still more at a loss to understand why it is that the Office of Public Roads has included in its functions an investigation and report on the utilization of water in farm irrigation. We have in another department, I believe, a bureau that has charge of irrigation subjects of the country; but what irrigation has to do with road building is more than I can understand; and yet there is a paragraph in this bill, under the head of "Office of Public Roads," for investigation and report on utilization of water in farm irrigation, including the best methods to apply in practice, an appropriation of $106,400.

Mr. LEVER. Will the gentleman yield?

Mr. MADDEN. I do.

Mr. LEVER. The gentleman realizes, of course, that the item has heretofore been carried under the Office of Experiment Stations and has been transferred here because it was thought it was more nearly an engineering proposition and logically belonged to this bureau.

Mr. MADDEN. Well, it has no more to do with road building than the man in the moon has, not a bit. It is only another way of pretending to give an organization that has nothing to do from the outset some excuse for existing.

Mr. LEVER. Will the gentleman yield again? Because I know he does not want to do anybody an injustice. The gentleman will notice that the title of this office has been changed to read, "Office of Public Roads and Rural Engineering."

Mr. MADDEN. Well, I understand that.

Mr. LEVER. And the change which was made was to meet the criticism which the gentleman is making, so as to make it really indicate the character of the work being done under it.

Mr. MADDEN. Now, if men are employed in the Road Construction Bureau because of their expert knowledge of materials that are required and the conditions under which roads are to be constructed in various sections of the country, the further admission must be that these men are not qualified to do the thing which this section authorizes the men in the Road Building Bureau to do.

Mr. LEVER. Well, now, the gentleman has his facts wrong again, and I want to keep him straight, because I know he does not want to state the facts wrongly. The organization heretofore existed in the Office of Experiment Stations, and has been bodily transferred over here.

Mr. MADDEN. Why it should be transferred to the jurisdiction of a general manager, or whatever his title may be, director of good roads, is a matter I can not understand. This man who has charge of experiments in road building has no knowledge whatever, if I understand the man, of the duties that are to be performed in connection with the investigation of the utilization of water in farm irrigation.

And then it goes on further and gives the authority to this man to investigate and report upon farm drainage and upon the drainage of swamp lands and wet lands, which may be made available for agricultural purposes. I had supposed that when you authorized men to develop agriculture you would find men who were qualified to advise as to what the best method of agriculture is. We are pretending here in this paragraph of the bill to employ men who are versed in the best methods of road building, and I have some doubt about whether we have accomplished the object for which this law is intended even then, because I do not regard the man at the head of the Office of Public Roads as the best qualified man to give advice as to how roads should be built or as to the materials to be used in the construction of roads. On the other hand, I believe that every community in America best understands its own needs.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MADDEN. I ask for two minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MADDEN. As a matter of fact, Mr. Chairman, I believe that all communities naturally employ the materials which are in closest proximity to the road that is to be built, no matter what advice they get as to what is the best material abstractly for the construction of a road. After all, the cost of building a road is the prime consideration entering into the question of its construction, and, although it may be quite well understood by an expert or even by a layman that a granite road would be much preferable to a burned-clay road or that a crushed-stone road or a road made of macadam or concrete would be better than an ordinary dirt road, the financial condition of the people of the community would be such that they would not want to build either kind of road, and no matter what kind of advice they might get from the expert they would decide the question altogether upon their financial condition. So after all, in the case of a community in South Carolina, for example, where the gentleman who is chairman of this committee [Mr. LEVER] lives, his people would assemble their officials and decide whether they wanted to build the road. They might ask how the road would be constructed in the best way by somebody, but when the time came when they would conclude and determine how much money they were going to spend on the building of the road the taxpayers would decide that question, and the advice of the expert from Washington would be wholly unnecessary and ignored.

The CHAIRMAN. The time of the gentleman from Illinois has expired. The Clerk will read.

The Clerk read as follows:

General expenses, Office of Public Roads and Rural Engineering: For salaries and the employment of labor in the city of Washington and elsewhere, supplies, office fixtures, apparatus, traveling and all other necessary expenses, for conducting investigations and experiments, and for collating, reporting, and illustrating the results of same, and for preparing, publishing, and distributing bulletins and reports, as follows: *Provided*, That no part of these appropriations shall be expended for the rent or purchase of road-making machinery, except such as may be necessary for field experimental work as hereinafter provided for.

Mr. HUMPHREY of Washington. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Washington moves to strike out the last word.

Mr. HUMPHREY of Washington. Answering the inquiry of the chairman [Mr. LEVER] awhile ago, I have that item now. It is found in the expenditures for traveling from Washington to points outside of the District of Columbia, performed by certain officers and employees of the Department of Agriculture during the fiscal year ending June 30, 1914.

I find I was in error as to where they wanted to send the printing press. I find, on page 55, this item:

Ballard, C. M., clerk, Richmond, Va., and return, January 21, 1914: To examine, with a view to purchase, "Humana" automatic press feeder for printing office at supply depot, Ogden, Utah.

That is under the Forest Service.

Mr. LEVER. I am very much obliged to the gentleman. I would like to see a printing plant established out there, and we have found it.

Mr. HUMPHREY of Washington. Now, as to this proposition of printing these bulletins, I have a few more suggestions to make. I know I am talking out of order, but I will not consume more than five minutes. I hold in my hand a Weekly News Letter to Crop Correspondents. I understand that is printed in the Department of Agriculture. I do not know whether I am right about that or not. I am only speaking on hearsay. I recognize they have the right to print bulletins in the Weather Bureau. The law specifically provides that. Is there any specific provision giving the Department of Agriculture the right to print these bulletins?

Mr. LEVER. No specific authorization that I know of, and I am inclined to think they do not print this in the Department of Agriculture. My own idea is that it is printed at the Government Printing Office. Of course the Department of Agriculture gets up the facts.

Mr. HUMPHREY of Washington. It is undoubtedly printed under the direction of the Government Printing Office, because it is so stated at the bottom.

Now I want to call attention to a decision that I have here from the Comptroller of the Treasury, under date of December 11, 1914, which I think the chairman of the Committee on Printing [Mr. BARNHART], who is not here just at present, ought to have brought to his attention.

The decision is that they have no authority to purchase printing presses for any of these departments unless it is especially given them by act of Congress, and that they have no right to print these various documents that come from these departments without authority.

Now, the duplications of all these bulletins of the character to which I called attention yesterday are merely subterfuges. It is simply a violation of the regulations to print. While they are manifolded, they are still simply printed, and they keep a great number of men employed in that work, estimated to cost, as I said, $100,000 a year. There is no excuse for their doing that, because here is a decision of the comptroller delivered recently to this very Bureau of Good Roads that we have just passed. They wanted to purchase a printing press and use it.

Mr. Chairman, I ask unanimous consent to print this decision in the RECORD.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD by printing the decision referred to. Is there objection?

There was no objection.

The following is the decision referred to:

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE TREASURY,
Washington, December 11, 1914.

The honorable the SECRETARY OF AGRICULTURE.

SIR: I have your letter of December 3, 1914, requesting a decision upon whether a printing press may be purchased for the use of the Office of Public Roads to do certain printing upon tracings, engineering drawings, maps, and plans prepared by said office.

You state that in preparing them "several different styles of letters are required and in many cases only one impression is necessary. It is desirable for the draftsman who prepares the tracing or plan to select the style of type and in many cases to make the impression himself after setting up the form." Also "that it is impracticable to have the Government Printing Office do the lettering or printing on these plans and tracings."

It is proposed to purchase the printing press under the item in the appropriation "General expenses, Office of Public Roads" (Public, No. 122, p. 27), as follows:

"For investigations of the best methods of road making, especially ordinary sand-clay and dirt roads, and the best kinds of road-making materials, and for furnishing expert advice on road building and maintenance, $145,000."

Where printing offices are authorized in the departments they are required to be under the control of the Public Printer, who is to furnish all presses, etc., from the general supplies of the Government Printing Office. (Sec. 31, act of Jan. 12, 1895.)

The authority to use a department appropriation for the purchase of a printing press must be considered with respect to the statutory provision, supra, and the further provision in the statute (sec. 87) that all printing for the executive departments shall be done at the Government Printing Office.

In Ninth Miscellaneous Comptroller's Decisions, page 47, April 6, 1899, section 31, supra, was viewed by this office as prohibiting the Division of Vegetable Pathology of the Department of Agriculture from procuring and operating its own press for the printing of scientific names for labeling herbarium specimens, although at times only one or two of the same kind were required, and there seemed to be inconveniences and practical difficulties in complying with the law.

In the present case I understand the use of a printing press as commonly understood is necessary, and that the work to be done thereby is none other than printing. Whatever may be said as to purchasing printing presses in the nature of labor-saving machines, and under an appropriation for such machines, as was the case in Seventeenth Comptroller's Decisions, page 349, cited by you, the statutory provisions, supra, necessarily must exclude the furnishing of printing presses under general department appropriations, and if I were to authorize the purchase under such an appropriation it would be not so much a construction of the permissible uses of an appropriation as an arbitrary permission to make such use.

The impracticability there is stated to be in having the work done at the Government Printing Office does not permit me to go to the extent of authorizing a printing press to be installed in your department, but is matter for addressing to Congress supporting a request to make specific provision therefor. In absence of such authority in the appropriation in question its use for the purchase of a printing press is not authorized.

Respectfully, GEO. H. DOWNEY, *Comptroller.*

Mr. BUTLER. Mr. Chairman, I rise in opposition to the motion to strike out the last word. I want to ask the chairman of the committee a question.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last word.

Mr. BUTLER. I find a proviso in this paragraph which denies to this bureau the privilege of purchasing road-making machinery. Does this bureau purchase road-making machinery?

Mr. LEVER. It can not, except under the terms of the proviso.

Mr. BUTLER. Not under this "except such as may be necessary for field experimental work as hereinafter provided for"? Does the gentleman have the information at hand from which I can learn about how much money this bureau spends every year in the purchase of what is known as road-making machinery?

Mr. LEVER. I presume we have it here somewhere, but I can not tell offhand. This proviso was put on this bill on the floor of the House to prevent what members of the committee thought might be an abuse. We did give them the authority to purchase some machinery for experimental purposes. Just how much they have expended I do not know. Of course we have the facts, but I can not lay my hand on them. They are available.

Mr. BUTLER. Will the gentleman direct my attention to some publication by which I can learn just what this bureau does with its money?

Mr. LEVER. There is a large book known as "Expenditures in the Department of Agriculture." I refer the gentleman to that.

Mr. BUTLER. I am obliged to the gentleman. Now, does the gentleman know of any public roads that this bureau has constructed?

Mr. LEVER. My colleague [Mr. BYRNES of South Carolina] has a mile of model road which was built in his county.

Mr. BUTLER. Can the gentleman from South Carolina tell me how I can get them to build a piece of road at my home?

Mr. LEVER. Yes; go down and see them about it.

Mr. BUTLER. No; there is no use of my going down to see them. I will get my friend to do it. I should like to have 25 miles of good roads built, and yet I would not ask the Government to build a road that the people there ought to build for themselves.

Mr. LEVER. The gentleman knows that these are nothing but model roads, built for demonstration.

Mr. BUTLER. If it is a road a foot long, built by the United States, I call that a special privilege, and inasmuch as the Government has ordered off rural carriers on the ground that the service is a special privilege, I say this is all wrong for the same reason.

Mr. CANDLER of Mississippi. They do not build any roads at all. They simply instruct the people in the construction of the roads.

Mr. BYRNES of South Carolina. I want to say that possibly the chairman of the committee has been misunderstood by the gentleman from Pennsylvania in stating that a mile of road in my district was built by the Government. That mile of road in my county was built by the county, and every cent of the expense of it paid by the county. All the United States Government did was to send its engineer there to supervise its construction and advise them as to the best methods to be used in its construction.

Mr. LEVER. My colleague [Mr. BYRNES of South Carolina] states the fact which I attempted to state. My language misled my friend from Pennsylvania, but I had not intended it to do so.

Mr. BUTLER. I congratulate the people of South Carolina on their ability to take care of themselves, instead of standing around the Treasury holding out their hands for something that does not belong to them alone. This is all wrong, and the gentlemen who stand for it will regret it.

Mr. SELDOMRIDGE. Mr. Chairman, I move to strike out the last word. During the debate on Tuesday, concerning expenditures in the Forest Service, I was unable to be present on the floor and participate in the discussion, but I have read in the RECORD the very serious strictures made by some Members concerning the operations of the Forest Service and its great expense to the Government and the necessity for an investigation concerning its operations. I hold in my hand a copy of some resolutions that were adopted by the Longmont Commercial Association in the growing and active city of Longmont, Colo. I desire that those resolutions be read in my time, as they bear directly upon the paragraph which is now before the committee.

The CHAIRMAN. The resolutions will be read in the gentleman's time.

The Clerk read as follows:

Resolution.

Whereas the Longmont Commercial Association, through its authorized representatives, has been apprised of the plans of the Forest Service in regard to the construction of roads and trails in the Colorado National Forest; and

Whereas it is the opinion of the members of the Longmont Commercial Association that said proposed improvements portray a real knowledge on the part of the Forest Service of the needs of the people, and, planned from such knowledge, tend toward the most effective and comprehensive development and use of the forest; and

Whereas the aforementioned plans of the Forest Service, if permitted to be brought to a successful conclusion, will render all points of the Colorado National Forest accessible, and in so doing will serve to develop the wonderful scenic and economic resources of the region: Be it therefore

Resolved by the Longmont Commercial Association, That the plans of the Forest Service for the construction of roads and trails in the Colorado National Forest are hereby given hearty indorsement; and be it further

Resolved, That we earnestly and respectfully urge the cordial support of the Colorado congressional delegation to such measures of financial appropriation and otherwise as will tend toward an early completion of the work herein outlined.

Attest:

D. W. THOMAS, *Secretary.*

LONGMONT, COLO., *January 11, 1915.*

The CHAIRMAN. The pro forma amendment being withdrawn, the Clerk will read.

The Clerk read as follows:

For investigations of the best methods of road making, especially ordinary sand-clay and dirt roads, and the best kinds of road-making materials, and for furnishing expert advice on road building and maintenance, $145,000.

Mr. McLAUGHLIN. Mr. Chairman, I move to strike out the last word. I wish to say a word here commenting on the objection made to some of these appropriations because they provide for work to be done by agents and representatives of the department, which work ought to be done by the people of the communities themselves. I believe much of that objection is good. There is a growing disposition on the part of the people all over the country to ask appropriations for the employment of men, to be paid by Federal appropriations, to go into local communities to do work the people themselves ought to do. Now, in this road bureau there have been demands upon the bureau for men and machinery for the actual building of roads, whereas the work of the officers and representatives of the department should be simply to give advice and make suggestions as to the character of the material to be used and methods of construction, while the work itself should be done by the people themselves.

Mr. SELDOMRIDGE. Will the gentleman yield?

Mr. McLAUGHLIN. In the limited time I have I can not yield. The gentleman will excuse me. This disposition is not limited to any particular section of the country. In the South, when they were trying to eliminate the cattle tick, the people were asking to have not only demonstrations and experiments made, but that vats for dipping should be built by the Federal Government. In Massachusetts and other parts of New England, where the Government was making an effort to stop the ravages of the gypsy moth and the brown-tail moth, it was determined by the representatives of the Bureau of Entomology that the best way was to clear out the brush along the highways and along the railroad tracks, because vehicles and railroad trains passing back and forth knocked down and carried along the nests of the moths and distributed them to other places.

The people of New England, usually willing to pay their own money and to do their own work, demanded that the department itself should do the work, and the result was that this experimental, highly scientific bureau, the Bureau of Entomology,

at one time employed as many as 500 men in doing nothing more or less than cutting brush along the highways. The members of the Agricultural Committee will bear me out when I say I have opposed appropriations for that kind of work, as I have stood strongly against like appropriations, or to be similarly used, in other parts of the country, insisting that it is the duty of the department to make investigations and experiments to learn the best means and the best methods, to learn evils and the best way to overcome them, and then, after learning the way and being able to point out the way, that its work should be limited entirely to pointing out the way in which the people themselves should do the work.

Now, in relation to this particular matter, it will be noticed that we have refused permission to the Office of Public Roads to buy machinery. It was demanded of them that expensive road-building machinery be purchased and that the bureau send out forces of men to use these machines and actually do the physical work and in some cases pay the entire expense of building the roads. It is a wrong policy; we have stood against it and have tried to prevent it by the insertion of this proviso, and we ought to go further—the effort of the committee ought to be, and the Congress ought to approve its recommendations, to limit these appropriations to the making of investigations and experiments and to pointing out the best way to the people; and the people themselves ought to be required or permitted to do the actual work themselves.

Mr. BUTLER. Mr. Chairman, I rise in opposition to the motion made by the gentleman from Michigan, to ask the chairman a question. I want to learn, because I am preparing myself for a fight in the future against this appropriation of the public funds, which I think is absolutely unnecessary and wrong. I do not criticize the gentleman from South Carolina or his committee. I helped to grow into present practices. I voted for the Shackleford bill, but I thought it would produce some good roads. Now, I wish to ask the chairman a question. I find here an appropriation for a system of road management. Will the gentleman please tell me what on earth is "road management"?

Mr. McLAUGHLIN. The maintenance of the road, I suppose. I do not know unless it is road maintenance, the method of managing and taking care of the road. I know in some places the people have taxed themselves to build a road, and then they have constructed it and gone off and left it to maintain itself. They thought that all that was necessary was to construct it, and left it to take care of itself.

Mr. BUTLER. I appreciate the gentleman's statement; it is wise, and we will all profit by it. I suppose one official from the Government will come along and tell the people that here is a puddle in the road, and you ought to get rid of the puddle, and I will determine for you whether to drain it or put some stones in it. Is that management?

Mr. LEVER. I will give the gentleman the information. It is work covering general statistics and research, investigation and experimental maintenance, and the economical study of highway system and traffic. Lectures, demonstrations on road and bridge models, instruction on highway engineering, maintenance of State index. They employ a corps of collaborators, one in each State.

Mr. BUTLER. The gentleman has read well. I only wish I was able to understand it as well. I find in the next paragraph, "Investigation of the best methods of road making." Will the gentleman tell me how the fine discrimination is made between road management and road making?

Mr. LEVER. Under this item we send out experts to the town where the citizens want to build a road, and these experts advise as to the best method of building the road under the peculiar conditions that may exist there.

Mr. BUTLER. Then will the other agent arrive and advise them on the method of managing the road?

Mr. LEVER. No; I think the method of management is left as a scientific matter.

Mr. BUTLER. Then the two do not go together and ride in the same car?

Mr. LEVER. No; the first part of it is scientific work and the other is practical.

Mr. BUTLER. I notice that you provide that the office of director shall be filled by a scientist.

Mr. LEVER. Yes; he is a scientist and a graduate of Harvard.

Mr. BUTLER. I can not understand how a Harvard graduate should know any more about road building than I do, and I never was a graduate.

Mr. LEVER. He is a graduate from the engineering department and regarded as one of the great engineers of the world.

Mr. BUTLER. I take my hat off to him. I did not know of his proportions.

Mr. GOULDEN. Mr. Chairman, I move to strike out the last word. There are certain roads in an adjoining State, Maryland, that are dirt roads, and at certain seasons are very bad and certainly need attention. I want to ask if the bureau recently created has measured up to its expectations. Has it done good work and been helpful to the country?

Mr. LEVER. I read the report of the chief of the bureau some nights ago, and with reference to the sand, clay, and dirt roads I feel that he is doing very satisfactory work.

Mr. GOULDEN. What will be the average cost of these dirt roads per mile? I heard an estimate made by the gentleman from South Carolina [Mr. BYRNES] placing it at $400, but I thought that was rather low.

Mr. LEVER. From $400 to $1,580, depending upon conditions.

Mr. GOULDEN. It would depend also on the proximity of the clay and the sand, the material used in making these improved roads.

Mr. LEVER. Yes.

Mr. GOULDEN. Is there much demand on the department at this time, or in 1914, for instruction in this kind of road building in the engineering department? This, I understand, costs the various communities nothing.

Mr. LEVER. Yes; more than they could meet, and cost nothing.

Mr. GOULDEN. I ask because I have in mind making a request myself in the near future.

Mr. RUBEY. I want to call the gentleman's attention to page 200 of the hearings, in which he will find all this information as to dirt and clay roads.

Mr. KREIDER. Mr. Chairman, I rise to oppose the amendment. I do that in order to ask the gentleman, the chairman of the committee, a question in regard to the road engineers. Who determines whether they are engineers? Is there a school or department that educates them and do they have a diploma? Who determines whether they are competent engineers?

Mr. LEVER. They are appointed through civil-service examination, which determines their competency. Of course, an examination would be established in order to determine whether they are competent men or not.

Mr. KREIDER. In view of the fact that there are two separate items provided in the bill—one of $42,600 for road management and another of $145,000 for road building and road maintenance—are the same engineers qualified to do both or does it require one engineer to show them how to manage the road and another how to build and maintain it?

Mr. LEVER. As I tried to explain to the gentleman from Pennsylvania a moment ago, the work under the first item to which the gentleman refers is largely scientific, constituting the whole big problem of the best method of road management. Of course, it would take a high-grade man for that kind of work. The work under this item of $145,000 is largely in sending out engineers to carry to the country the information that has been gathered by the other men. The one is scientific and the other is taking the information out to the people and demonstrating it.

Mr. KREIDER. Is it not a fact that scientific road-building work and the science of road building are so closely allied that it is a very difficult matter to separate the two?

Mr. LEVER. That is very true.

Mr. KREIDER. The point I want to make is this——

Mr. LEVER. If the gentleman will permit me, I have no doubt that the man who goes out and supervises the building of one of these roads will probably be a competent man for the work on the item before, but not necessarily so.

Mr. KREIDER. My thought was this: That it would not be necessary to double up expenses by sending two men possibly 500 miles from their home office.

Mr. LEVER. The gentleman misunderstands this entirely, I think. In the item carrying $42,000 the department does not send its experts out into the country to teach the people how to manage their roads. Whatever field work the men of the department do at all is going out into the field hunting up from other folks the management of roads so as to develop the best system of management. It is a scientific expert study of the problem of road management, and on a road proposition such as suggested a moment ago they would not send one of that type of men to show the people at Aiken, S. C., how to manage that little amount of road.

Mr. KREIDER. When they have acquired the knowledge, how do they distribute that knowledge? Do they publish it through the form of a bulletin?

Mr. LEVER. No; they distribute that information through bulletins and also the item carrying the $145,000.

Mr. KREIDER. Well, that is for road building and making.

Mr. LEVER. And expert advice, if the gentleman will read.

The CHAIRMAN. The time of the gentleman has expired. Without objection, the pro forma amendment will be considered as withdrawn.

There was no objection.

The Clerk read as follows:

For investigations of the chemical and physical character of road materials, $34,820.

Mr. SELDOMRIDGE. Mr. Chairman, when the gentleman from Michigan [Mr. McLAUGHLIN] was addressing himself to this amendment, I tried to obtain some time from him in order to ask him a question. I think the gentleman was fair and considerate in his remarks concerning the desire and disposition of the people to constantly impose upon the Federal Government for work and money in the conduct of local enterprises that should be developed properly and justly by individuals either singly or jointly. I purposed to ask the gentleman this question. If he did not think that that desire on the part of the people was largely promoted by Congress in the character of legislation proposed and considered, and in voting large sums of money for purposes which are more or less indefinite in character? That Congress is showing by some of the provisions of bills of this character and the appropriation of large sums of money in an indefinite way without giving actual knowledge as to how the money is to be spent, and how it has been expended from former appropriations, and how easy it is to extract money from the Treasury. The people hear of these large sums and what has been expended in this locality and in the others for various purposes, and are thus stimulated to secure from the Government, if possible, that which they think has been denied them. Then these bureaus, through the dissemination of bulletins and literature, some of which is largely unreliable and not at all necessary, arouse in the minds of the public a desire to secure from the Government that support and that assistance that they are unwilling to contribute themselves. I believe that the fault, if any exists, largely rests upon the shoulders of Congress and does not rest upon the people.

Mr. BUTLER. Mr. Chairman, I greatly appreciate what the gentleman says. Congress has grown. I can recall the time when Congress did practically nothing of this character, and I am willing to confess I grew along with Congress in this kind of work. I do not object to instructions being given upon public road building. I do not object to such assistance. What I object to is this enormously extravagant, in my judgment almost useless, expenditure for office hire, clerks, messengers, and charwomen. I want the money to go where it will assist in the construction of work and be used for the purpose which Congress would have it used for. Remember, I do not object to this instruction, let me say to the gentleman. I do not object to such——

Mr. SELDOMRIDGE. Will the gentleman yield?

Mr. BUTLER. Yes.

Mr. SELDOMRIDGE. Does not the gentleman believe that a large proportion of every dollar of money that we appropriate for this purpose is used purely in clerical ways, and that it has not had the effect which was intended?

Mr. BUTLER. The gentleman is absolutely correct, and more than correct. The same thing he says here now I have heard said many times in this House, and yet we have not advanced one step to correct the evils which we all saw before us. In the community in which I live there is a pike—now, let me call the attention of the gentleman from South Carolina to it, so that he may have it in his mind when he prepares his next bill—the first pike built in the United States is the one running from Lancaster to Philadelphia, built in 1795. That pike has stood all these years without ever moving, unaffected by the heat of summer or the cold of winter. The builders never employed an engineer. It was built by the people in the different communities, who hauled the stone, putting the big stone at the bottom and the smaller sizes on the top. We knew then how to make public roads. We did not require an expenditure of $60,000 to show my community how to build a pike that has lasted for 115 or 120 years, and practically without repair.

Mr. BARTLETT. May I interrupt the gentleman?

Mr. BUTLER. Yes.

Mr. BARTLETT. The gentleman knows there were some roads built in ancient times such as the Appian Way and the roads built by Cæsar that have lasted for 2,000 years and more.

Mr. BUTLER. So has the road I speak of. It was built to stay. I only give this to the Chairman to illustrate that when men see fit to apply the good sense which nature has given them they can do those things largely themselves, and do not need $60,000 to spend in messengers, clerks, and charwomen hire.

Mr. GOULDEN. Mr. Chairman, I want to ask the gentleman—I happen to know about the pike the gentleman speaks of because I have been over it—but what about his dirt roads?

Mr. BUTLER. The mud roads are bad roads. We are against mud roads. We can not do everything, however, at one time.

Mr. GOULDEN. You have got them.

Mr. BUTLER. Yes; but I will say to my friend that we have got so much taxes in our county that we have to lower the rate of taxation. We have so much money in the treasury that we do not know what to do with it.

Mr. GOOD. Give it to Secretary McAdoo. [Laughter.]

Mr. BUTLER. We will make our own roads in our own fashion. They will be good roads, and they will not cost the Government a penny.

Mr. GOULDEN. I suggest you had better begin soon. They are bad roads. You need scientific engineers to show you how to build them.

Mr. BUTLER. If the engineer comes, we would have no money left. [Laughter.]

Mr. GOULDEN. You do not spend your money aright.

Mr. BUTLER. We will not give the money to the engineers. We will put it on the roads. [Laughter and applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For investigating and reporting upon the utilization of water in farm irrigation, including the best methods to apply in practice; the different kinds of power and appliances, and the development of equipment for farm irrigation; the flow of water in ditches, pipes, and other conduits; the duty, apportionment, and measurement of irrigation water; the customs, regulations, and laws affecting irrigation; for the purchase and installation of equipment for experimental purposes; for the giving of expert advice and assistance; for the preparation and illustration of reports and bulletins on irrigation; for the employment of assistants and labor in the city of Washington and elsewhere; for rent outside of the District of Columbia; and for supplies and all necessary expenses, $106,400.

Mr. BARTON. Mr. Chairman, I move to amend by adding a new paragraph.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Nebraska [Mr. BARTON].

The Clerk read as follows:

Amend, page 68, by adding, after line 25, a new paragraph, as follows:

"For investigating and reporting upon the cost and feasibility of pumping from wells for the irrigation of lands in southwestern Nebraska; for preparing plans for the impounding of waters that now go to waste in water courses leading into streams in southwestern Nebraska; for investigating and developing equipment intended for the construction and maintenance of wells for irrigation for the purchase of materials and equipment; and for preparing and illustrating reports and bulletins on subirrigation and for demonstration purposes, $100,000."

Mr. LEVER. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The gentleman from South Carolina reserves a point of order on the amendment.

Mr. BARTON. Mr. Chairman, I do not care to discuss the point of order now, although it seems to me that if the point of order would lie against this amendment it certainly would lie against the paragraph that has just been read and the one following.

On examining the provisions of this bill, Mr. Chairman, we find appropriations made for draining swamp lands and also for irrigating lands that have no water at all. We have in my part of the country a condition of semiarid lands. If we can get water on that land once a year, we could then produce bountiful crops. A survey has been made by the Government, proving that there is an inexhaustible supply of water close to the surface, but we have never been fortunate enough to get the assistance of the Government in that part of the country to develop our resources. There are possibilities of making this section one of the finest agricultural countries in the world. A bulletin has been issued by the Department of Agriculture giving experiments on 18 different wells in Louisiana, Arkansas, and Texas—wells used for pumping water for the irrigation of rice fields. I will insert in the RECORD their experiments or investigations. These wells range from 150 feet to 300 feet deep. They are proven to be practicable.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Nebraska yield to the gentleman from Pennsylvania?

Mr. BARTON. Yes.

Mr. BAILEY. Are these wells to which the gentleman refers operated by the Government of the United States or by the people of the localities?

Mr. BARTON. In only one instance, I think, the State of Arkansas and the Government of the United States cooperated in building one well and operating it.

Mr. BAILEY. Is there any reason why the people of Nebraska could not dig these wells for themselves?

Mr. BARTON. Not at all. If the gentleman had examined my amendment he would find that we do not ask the Government to do it. We simply ask the Government to do what it has already done in other parts of the country and is providing for all through this bill—to investigate the feasibility of the proposition.

Mr. BAILEY. Is there any reason why they should not investigate that themselves?

Mr. BARTON. No more reason than that the people of the South, who will receive the benefit of many provisions in this bill, should do those things themselves; no more than that a State should take care of its own rivers, or should take care of its own rural carriers, or should take care of its own roads, and do for itself a lot of other things such as run through this bill; for example, the reclamation of swamp lands and the irrigation of arid lands.

Mr. STEPHENS of Texas. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Nebraska yield to the gentleman from Texas?

Mr. BARTON. Yes.

Mr. STEPHENS of Texas. I will state to the gentleman that if he and any of his friends will come down to the Staked Plains in Texas they will find large wells that have been put in there, and you will find all the authority you want there as to the best means and appliances for pumping water, for pumps, engines, and everything connected with doing this irrigation work, without any experimentation or the spending of a cent. We will be glad if the gentleman will con.e down there and buy some of those irrigated lands. They will be sold cheap.

Mr. BARTON. We could go into areas in Illinois where they have drained their swamp lands, and in Iowa, where I am personally acquainted, where they have tilled their land, but why ask us to do different than other sections of this country? Other sections of this bill provide that people of other States may be very much benefited by Government assistance. Why deprive us of the same privilege? Swamp lands are not in existence in that part of the country. Neither is it arid. It is a semiarid region, and we are asking for this help from the Government that the people as a whole may be benefited. I ask gentlemen of the House to give us more than ordinary consideration. I ask for only $100,000 for this experiment. We are appropriating much more for nearly every other experiment that is provided for under this bill. I believe we are entitled to advice. We are asking not for money to dig wells, not money to turn the water on the land, or anything of that character, but to enable us to have it demonstrated to us that this project is feasible and that it can be done.

Mr. PAGE of North Carolina. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. PAGE of North Carolina. I ask unanimous consent, Mr. Chairman, that the gentleman's time be extended two minutes.

Mr. BARTON. Mr. Chairman, I will insert the following as a part of my remarks:

The United States Department of Agriculture issued October 30, 1908, a pamphlet giving the cost of pumping from wells in Louisiana and Arkansas, and I will insert at this point a description of some of the plants and the results of tests:

DESCRIPTION OF PLANTS AND RESULTS OF TESTS.

In general, the tabulated results are self-explanatory. The attempt is made to bring out the facts of greatest interest to the owners of pumping plants, and especially the cost of pumping. Measurements covering several years show that the average quantity of water used on rice is about 15 inches in depth over the land during the growth of a crop, and this depth has been used in computing the cost of pumping per acre irrigated. No data showing the cost of attendance and other labor employed in pumping were collected. This is considerable, as the plants are operated night and day for 60 to 100 days each year, taking practically all of the time of two men, who receive from $1.50 to $2 per day. This makes an average cost of perhaps $3.50 per day for attendance. Assuming an average season of 80 days makes this cost $280 for each plant. In each case this sum is divided by the number of acres, to secure the cost of attendance per acre.

Interest is assumed at 7 per cent, and depreciation at 10 per cent of the first cost. Interest, depreciation, attendance, and fuel cost for 1.25 acre-feet, or 15 acre-inches, are added to secure the annual cost of pumped water per acre irrigated.

PLANT NO. 1.

The plant of Mr. H. E. Wesson, located about one-half mile northeast of the railway station at Welsh, La., was tested on June 17, 1907. This same plant was tested in 1905. The engine and boiler used at that time were still in use in 1907, but the well and pump had been changed. The new well is 335 feet deep; it has a 10-inch casing with 80 feet of strainer, consisting of wire of trapezoidal cross section wound over a pipe through which numerous holes had been drilled. The new pump is a No. 6 compound vertical centrifugal. It was driven by a quarter-twist belt. The engine flywheel is 60 inches in diameter, and the pulley on the pump 18 inches in diameter. This pump is peculiar in that no pit is required except the steel casing above and fastened to the pump, of the same diameter as the largest diameter of the pump. A hole of the proper diameter is bored into the ground to a depth sufficient to submerge the impellers of the pump. This hole is approximately three times the diameter of the casing below. With this type of pump alignment of shaft is insured. The pump was placed 40 feet below the surface.

The boiler is of the locomotive type, having seventy-two 2-inch flues 9 feet long, and has a capacity, according to the builders' rating, of 50 horsepower.

The engine is a simple noncondensing slide valve, and has a cylinder 12 inches in diameter and stroke of 15 inches. There is a feed-water heater in the base of the engine. The boiler was fed by a pump. The feed water used during the test was weighed.

The fuel used was crude oil, costing $1.40 per barrel of 42 gallons at the plant. During the test it was measured in an elevated tank by noting the fall of level. The specific gravity was determined by means of a hydrometer.

The cost of this plant was as follows:

Engine, boiler, and shed	$1,175
Belt	50
Well, pump, and derrick, including steel pit	2,074
Total	3,299

The plant was in fairly good condition, as the engine had received a general overhauling and had been placed on a new foundation.

The water pumped was measured by means of a weir 36¾ inches in width, with end contractions suppressed; the depth over the crest of the weir was measured by means of a hook gauge.

It was impossible to measure the depth of water in the well even when the pump was not running; however, there was an old well about 75 yards away in which the depth could be measured. The water in the old well and in the new one was known from previous observations to be at the same level.

As already stated, the useful work credited to the pump was computed on the basis of the height from the level of water in the well when the pump was not running to the level at which it was discharged. It must be remembered that the true head was greater than the head used. The water in this well is lowered when the pump is started, and there is a loss of head in passing through the screen and some loss in the suction pipe below the pump. The only way the true head can be known is by attaching a vacuum gauge to the suction pipe underneath the pumps, and this was impossible. The efficiency given might be termed the efficiency of engine, pump, and well, charging the lowering of the water and loss in the screen to the well.

There was a comparatively small amount of heat added to the water at the feed-water heater, because the steam merely enters the heater and emerges from the point of entry. This arrangement could be improved by having the exhaust pipe taken out at a point which would compel the steam to travel along the outside of the pipes containing water in the heater.

Results of test of plant No. 1.

Duration of test, hours	4.67
Lift, feet	11.60
Average indicated horsepower	42.3
Average discharge of pump, cubic feet per second	3.21
Average discharge of pump, gallons per minute	1,444

COST OF WATER.

Cost of plant	$3,299

PLANT NO. 2.

The well-pumping plant of Mr. John H. Armstrong, located about 3 miles southeast of Welsh, La., was tested on June 18, 1907. It was used to water 140 acres during the season of 1907.

The well is 9⅝ inches in diameter and 305 feet deep. The pit is 35 feet deep, and there are 82 feet of sawed strainer (fig. 2).

The pump used is a No. 6 vertical-shaft centrifugal with a 14-inch pulley.

The engine is a slide-valve; diameter of cylinder, 9½ inches; stroke, 12 inches; diameter of rod, 1⅞ inches. The exhaust of the engine passed through a closed heater to the smokestack. The flywheel of the engine to which the pump is belted is 40 inches in diameter.

The boiler is of the locomotive type, with 52 tubes 12 feet in length and 3 inches in diameter. The builders' rating of boiler is 60 horsepower. A feed-water heater utilized a part of the heat of the exhaust steam that otherwise would have been thrown away. A small, direct-acting steam pump is used to feed the boiler. The mean temperature of water coming from the well was 80° F., while the mean temperature of the water after passing through the heater was 188.5° F. The saving of fuel by the use of the heater in this case was 9.5 per cent.

The importance of a heater in a small pumping plant is too often overlooked. An inexpensive one can be made of pipe fittings; in the average case a heater will save about 10 per cent of the fuel, and at the present prices for fuel so large a saving is well worth while. Feed water was measured during the test by weighing.

Indicator cards and general observations were taken every half hour.

Coal was carefully weighed and the time noted for using each 100 pounds. The fuel used was bituminous coal, costing $5.70 per ton of 2,000 pounds at the plant.

The discharge was measured by means of a current meter in a small flume built in the discharge ditch for that purpose.

The height through which the water was raised was measured in an abandoned well near the one in use, as in the case of the test plant No. 1. The height from water surface to level of discharge was the head used in computing useful water horsepower.

The cost of this plant, complete, including engine, boiler, belts, foundations, heater, and feed pump, well pump, pit, well, lumber, strainer pipe, and shed, was $2,668.

Some trouble was encountered because of the slipping of the cotton belt, and during the test the belt lacing broke and had to be repaired. Otherwise the test was entirely satisfactory.

The pump is provided with an appliance for maintaining alignment of shaft. Briefly, it consists of special pipe fittings by means of which the discharge pipe of the vertical-shaft centrifugal pump is brought over near the shaft and then carried up parallel to the shaft. The pipe is screwed home very solidly into the fittings so that it is rigid. Special bearings for the shaft are then clamped to the pipe. Any settling of the pump or change of position results in a corresponding change in the discharge pipe and shaft, so that the alignment is maintained.

The results of the test follow:

PLANT NO. 3.

The pumping plant owned by Mr. M. A. Neely and located about 4 miles north of Welsh, La., was tested on June 20, 1907. During the season of 1907 about 300 acres of rice was irrigated.

The engine is a simple, noncondensing, slide-valve, with dimensions as follows: Diameter of cylinder, 11 inches; stroke, 14 inches; diameter of rod, 1¼ inches. From the flywheel of the engine power is transmitted to the pump by means of a rope drive consisting of four strands of 1¼-inch manila rope. The driving sheave on the engine is 69 inches in diameter and that on the pump 21 inches in diameter.

The pump is a vertical-shaft centrifugal, in a pit about 30 feet deep. The well has a depth of 325 feet; 80 feet of strainer is used. It is of the usual type made by drilling holes in the casing and then wrapping it with wire.

The boiler is a horizontal, return tubular, rated by the builders at 50 horsepower.

The fuel used was crude oil from the Jennings field, costing $1.40 per barrel at the plant. During the test the height of oil in a cylindrical tank was noted and at the end of the test the same level was restored by adding a weighed quantity of oil to the tank.

Feed water is forced through a heater by the steam pump used to feed the boiler.

The water discharged by the pump was measured by means of a current meter in a small flume leading from the pond in which the pump discharged to the small canal used to convey the water to the field.

Indicator cards and other observations were taken at half-hour intervals; the duration of the test was four hours. The level of the water in the discharge pipe could be observed when the pump was not running by letting down a lantern. The distance from this level to the point to which the water was discharged was used as the head in computing useful water horsepower and efficiency.

The cost of the entire outfit, including boiler, engine, pump, well, belt, and shed, was $2,200.

The results of the test follow:

PLANT NO. 4.

The plant owned by Mr. L. E. Robinson, located about 7 miles northeast of Welsh, La., was tested on June 22, 1907. It was a new outfit, used for the first time during the season of 1907, when about 230 acres was watered.

The plant is equipped with a heavy-duty, noncondensing slide-valve engine, with dimensions as follows: Diameter of cylinder 12½ inches, stroke 20 inches, diameter of rod 1⅝ inches. The flywheel is 60 inches in diameter; a quarter-turn belt is used to transmit power from the engine to a No. 10 centrifugal pump, similar to that described in test No. 1, having a discharge pipe 12 inches in diameter. The well has a casing 18 inches in diameter, is 320 feet deep, and has 105 feet of strainer. The pit is 50 feet deep.

The boiler is of the locomotive type, with 79 3-inch tubes 13 feet long.

Fuel oil was used. It was stored in a vertical cylindrical tank. The distance from the rim of the tank to the surface of the oil was observed every hour, and the weight of oil computed from these readings and the specific gravity. As the oil used during the test had been placed in the tank from which it was fed by gravity to the burner only a short time previous to the test, it is probable that some water was still mixed with it, as sufficient time had not been allowed for it to settle. The exhaust pipe of the small steam pump used to feed the boiler was run through the fuel-oil tank and by this means the temperature of the oil was raised to 103° F.

The discharge of the pump was measured by placing a plank, beveled on the downstream side and with a sharp corner on the upstream side, across the flume below the pump, to act as the sill of a weir without end contractions. There was quite a large velocity of approach which was taken into account in computing the quantity of water. A hook gauge was used to measure the depth of water over the sill of the weir.

The water fed to the boiler was carefully measured by means of a calibrated barrel, which was filled by means of a hand pump and then allowed to empty into a barrel below, from which it was pumped to the boiler. There was a heater in which the water had its temperature raised from about 75° F. to 175° F.

During the test readings of the hook gauge were taken every 15 minutes; indicator cards and general observations were taken every half hour. The quantity of oil used was measured every hour.

The level of the water in the well was found by means of a steel tape let down into the discharge pipe. Before the test was started the observed depth was 26.5 feet below the level of discharge, while at the end it had increased to 27.5 feet; the mean of the two was used as the head in computing useful water horsepower.

The cost of the outfit was as follows:

Engine and boiler, feed pump, piping, etc	$1,500
Well, pit, and pump, set up	2,304
Shed	600
Total	4,404

The results of the test follow:

PLANT NO. 5.

The pumping plant of Mr. W. S. Robertson, located about 2 miles east of the town of Iota, La., was tested on June 26, 1907. This plant watered 175 acres of rice during the season of 1907.

The plant is equipped as follows: There is a simple, slide-valve, noncondensing engine, with diameter of cylinder 10 inches, length of stroke 12 inches, and diameter of rod 1¼ inches. The engine is direct connected to a rotary pump having a capacity of 13.6 gallons per revolution. The engine and pump are placed in a pit about 10 feet deep. The pump has its suction side connected to two 10-inch wells, each 200 feet deep and about 40 feet apart. The pump is between the two wells, about 20 feet from each. The discharge pipe of the pump is 12 inches in diameter. The suction pipes are provided with wire-gauze strainers of unknown length. The plant has been operated for five years.

The boiler used is of the locomotive type, rated by its builders at 25 horsepower. Water is fed to the boiler by means of an injector.

The fuel ordinarily used is coal and wood. The cost of the former is $6.35 per ton and of the latter $2.25 per cord at the plant. During the test coal only was used, so that the measurement of fuel could be made more definitely. Coal was weighed up in quantities of 40 pounds and the time noted when each charge was fired.

The water pumped was measured in a small flume by means of a current meter.

Indicator cards, readings of steam pressure, temperature, and observations with the current meter were taken at half-hour intervals.

The true head pumped against was determined in this case by placing a vacuum gauge on the suction pipe. Measuring the head from the point where the gauge was attached to the level of discharge and

adding it to the vacuum expressed in feet of water gave the head against which the pump was actually operating.

It was impossible to directly measure the depth of water in the well, as the tees at the top of the well casing into which was screwed the pipe leading from the well casing to the pump were both several feet under ground. Previous to 1907 the pump and engine had been at the surface of the ground. The flanges forming covers for the top of the tees had often been taken off the tees and the depth measured and compared to the depth observed by neighbors in the discharge pipes of centrifugal pumps at a distance of a mile or two from the wells tested, and it was found that they always agreed within a few inches. At the time the test was made the level of water in the same neighbors' wells was known to be about 20 feet from the surface, and therefore that head was used as the basis for computing useful water horsepower, in order that a comparison could be had between the centrifugal pumps and the rotary. By consulting the summary of results it will be seen that the efficiency on the same basis as that used for all other pumps is 50 per cent better than the best one of any other class. This accords with the efficiencies found for large pumps of this type. By consulting the table showing the cost of pumping it will be seen that this plant made a good showing in comparison with others as to fuel economy. A feed-water heater would reduce the fuel bill by about 10 per cent and ought to be added to the equipment of this plant.

The total cost of this plant complete, including boiler, engine, pump, wells, piping, etc., was $3,300.

Results of test of plant No. 5.

PLANT NO. 6.

The plant owned by Mr. Henry Schambaugh, located near the town of Iota, La., about a mile distant from the plant described as plant No. 5, was tested on June 27, 1907. One hundred and forty acres of rice was watered in 1907.

The engine is a noncondensing slide-valve, with dimensions as follows: Diameter of cylinder, 11 inches; stroke, 13 inches; diameter of rod, 1¼ inches. The flywheel, 50 inches in diameter, drives a vertical shaft centrifugal pump by means of a quarter-twist belt. The diameter of the pulley on the pump is 14 inches.

The boiler is of the locomotive type, having 54 tubes 2½ inches in diameter by 8 feet 3 inches long, rated by its builders at 40 horsepower. It is well lagged with sheet metal arranged to leave a space over the surface which is filled with charcoal.

A pump is used to feed the boiler. The feed water is forced through a heater in the engine base, into which the engine exhausts. In this way the feed is heated from an average temperature of 84° F. to 147° F.

The fuel used was crude oil, costing $1.40 per barrel of 42 gallons at the plant.

The pump is a No. 6 vertical shaft centrifugal, having suction and discharge pipes each 10 inches in diameter. The well is 315 feet deep and the pit 38 feet deep. Both sawed and wire-wound screens were used in the 60 feet of strainer.

The water pumped was measured by means of a current meter in a flume about one-fourth mile distant from the pumping plant. Although the test lasted for four hours, the water measurement was taken only during the last two hours.

Fuel oil was measured at half-hour intervals by the drop in level in a vertical cylindrical tank from which the burner is fed by gravity.

Indicator cards, readings of current meter, and the other observations were taken at intervals of a half hour.

The distance between the water level when the pump was still and the level of discharge was measured by means of a steel tape in the discharge pipe of the pump. This height was used as the head in computing useful water horsepower and efficiency. The pump had been running for some time and was stopped only long enough to make the measurement.

The cost of the entire plant was $2,500.

PLANT NO. 7.

The plant owned by Mr. T. J. Curtis, tested on July 9, 1907, is located about 3 miles northwest from Gueydan, La. During the season of 1907 about 165 acres of rice was watered.

The engine is a slide-valve, noncondensing, with dimensions as follows: Diameter of piston, 11 inches; stroke, 14 inches; diameter of rod, 1 7/16 inches.

The boiler is of the locomotive type and contains forty-eight 3-inch flues 11 feet 9 inches long. The length of boiler over all is 18 feet and the diameter of the front portion 45 inches. The builders' rating is 50 horsepower.

The pump is a vertical-shaft centrifugal, with a 6-inch discharge pipe. A quarter-twist belt from the engine flywheel drives the pump.

The well is 10 inches in diameter and 238 feet deep, with 80 feet of wire-wound screen. Of this, 60 feet is wound with galvanized and 20 feet with copper wire.

The fuel used was coal, costing $6.75 per ton of 2,000 pounds at the plant.

An injector is used to feed the boiler. There was no feed-water heater. The feed water was measured in a calibrated barrel.

The discharge was measured by means of a current meter in a small flume. Readings were taken at half-hour intervals.

Coal was weighed out in 30-pound quantities and the time of firing each charge was noted.

Indicator cards and other readings were taken at half-hour intervals.

The cost of the outfit is given in detail in the following statement:

Engine, boiler, and pump	$1,562.00
Well, 238 feet deep, at $3	714.00
Strainer	80.00
Lumber for pit	16.00
Digging pit	16.00
3 hoops for pit	9.00
160 feet lumber for pump frame	3.20
Cost of setting pump	12.50
Cost of unloading boiler from car	5.00
Hauling pump, boiler, and engine	14.00
3,000 brick	30.00
3 barrels cement	12.00
Labor for setting engine	50.00
Total	2,523.70

When the pump was idle for some time the level of the water was only 7.81 feet below the height to which it was elevated when the pump was running. Water stands quite near the surface in the Gueydan district, as it is much nearer the Gulf of Mexico than the wells previously tested, and the level of the ground surface is lower than it is farther north. At first glance it would seem as though the pumping of water in this territory would be much less expensive than in sections where the distance from water surface to ground level is much greater. The advantage, however, is lost when the wells are pumped to nearly their full capacity. The hydraulic gradient in the immediate vicinity of the well falls from this cause as well as from the loss of head in flowing through the gravel, so that the original height as observed may be only a small portion of the total head when the pump is running at full capacity, and therefore the head as observed and used in these tests may be only a small part of the total head.

PLANT NO. 8.

On July 10, 1907, a test was made of the pumping plant of Mr. J. W. Gardiner, located about 3 miles south of Gueydan, La. It furnished water to irrigate 200 acres of rice in 1907.

The equipment of this plant was as follows: A slide-valve, noncondensing engine; size of cylinder 14 by 20 inches with piston rod 1¾ inches in diameter.

The engine is belted to a jack shaft about 25 feet long, from which power is transmitted by quarter-twist belts to two vertical shaft No. 6 centrifugal pumps, one for each of the two wells. The depth of wells is 230 and 233 feet, and the diameter of the casing in each case 10 inches, with 60 feet of wire-wound strainers at the lower end. The wells are 100 feet apart. The pits were comparatively shallow, only about 20 feet deep.

The boiler is of the locomotive type, having a length of 18 feet and a diameter of 54 inches. There are seventy-six 3-inch flues 13 feet in length.

Feed water is pumped into the boiler direct by means of a small steam pump; the mean temperature was 73° F. During the test it was impossible to measure the feed water, and as the plant was in bad condition it was not of much importance that the feed be measured. There were several leaks about the ends of tubes from which the water was running in little streams into the fire box. There were also several leaks in the steam main and the engine was in need of adjustment. A leak in the suction pipe of one of the pumps necessitated the flooding of the pit and doubtless reduced efficiency to some extent.

It was intended to run the test for four hours, but at the end of two hours the main belt broke, necessitating a shutdown for about a half hour, so the test was concluded at the end of the two-hour period.

The fuel used was Pittsburgh bituminous coal, costing $7 per ton of 2,000 pounds at the plant. The coal was carefully weighed during this time. The revolutions per minute of engine and one of the pumps were observed. As the pulleys on the jack shaft and pump were the same in both cases the revolutions of the pump, neglecting slip, were identical.

The discharge from both pumps was measured by means of a current meter in a small flume.

The test was in every way satisfactory. However, it is probable that observations as to the fuel used for a longer period of time would have given a slightly more reliable result, but, considering the condition of the plant, further efforts in this direction were unwarranted.

Again, as in the case of test No. 7, the water was near the surface, so that the height through which the water had to be elevated was only 6.27 feet. The plant had been in operation several days and was stopped to measure the head. The remarks made in the case of the previous test apply equally well in this one.

The following is a detailed statement of the cost of this outfit:

Cost of wells and pits	$1,700
2 Kingsford pumps, at $200 each	400
Engine and boiler (second hand)	1,000
Shed	250
Belting	150
Total	3,500

When purchased the engine and boiler had been used but were almost new and were bought at a bargain. The shed was unusually large and contained more material than was necessary. The cost of belting was excessive because of the arrangement of the plant, one main belt being required between engine and jack shaft and two more between jack shafts and pumps.

Total annual cost per acre irrigated	7.73

PLANT NO. 9.

This plant is located about 1½ miles west of Lonoke, Ark., at the State Agricultural Experiment Station. The plant was installed in 1904 by the State of Arkansas in cooperation with the United States Department of Agriculture. During the season of 1907 45 acres was watered.

A noncondensing slide-valve engine is used, having a diameter of cylinder 8 inches and diameter of rod 1 7/16 inches and stroke 13 inches.

By means of a quarter-twist cotton belt the engine drives a vertical-shaft centrifugal pump placed in a pit 30 feet deep. The well is 100 feet deep with casing and 30 feet of copper-gauze strainer. The engine flywheel is used as a pulley. It is 54 inches in diameter, while the pump pulley is 14 inches in diameter.

The boiler is of the self-contained, horizontal, return-tubular type, shell 10 by 2 feet, 10½ inches. There are 26 3-inch tubes. The setting is built of bricks and the plant is in fairly good condition.

An injector is used to feed the boiler; there is no heater.

The test lasted for four hours; the conditions were fairly regular.

Coal was weighed in quantities of 45 pounds, and the time of firing each charge noted. Indicator cards and general observations were taken at half-hour intervals. The quantity of water fed to the boiler was carefully weighed.

The water pumped was measured by means of a permanent 12-inch Cipolletti weir. The height of water over the crest was measured by means of a hook gauge.

The level of the water in the pit was known to be the same as that in the discharge of the pump when the pump was idle. The height of the discharge from that level was used as the head in computing useful water horsepower and efficiency, as was done in the plants tested in Louisiana. On this basis the head was 27.6 feet.

The fuel used was bituminous coal, costing $3.40 per ton at the plant.

The cost of the entire plant, including machinery, shed, and well, was $1,800.

Results of test of plant No. 9.

Duration of test, hours	4
Lift, feet	27.6
Average indicated horsepower	17.2
Average discharge of pump, cubic feet per second	1.10
Average discharge of pump, gallons per minute	495
Average discharge of pump, acre-feet per hour	0.0913
Fuel consumed per hour, pounds	123.8
Fuel consumed per indicated horsepower hour, do	7.2
Fuel consumed per acre-foot, do	135.6
Fuel consumed per foot-acre-foot, do	49.1
Cost of fuel per ton	$3.40
Cost of fuel per hour	$0.211
Cost of fuel per indicated horsepower hour	$0.0123
Cost of fuel per acre-foot	$2.32
Cost of fuel per foot-acre-foot	$0.0842
Efficiency of engine, pump, and well, per cent	20

COST OF WATER.

Cost of plant	$1,800
Area irrigated, acres	45
Cost of plant per acre irrigated	$40

ANNUAL COST PER ACRE.

Interest on first cost, at 7 per cent	$2.80
Depreciation, 10 per cent of first cost	4.00
Fuel cost of 1.25 acre-feet	2.90
Attendance	6.22
Total annual cost per acre irrigated	15.92

PLANT NO. 10.

On August 20, 1907, the well pumping plant belonging to Mr. W. H. Hicks, located about 5 miles southeast of Lonoke, Ark., was tested. Ninety-two acres of rice was watered during the season of 1907.

The well is 168 feet deep; the casing is 10 inches in diameter and has 70 feet of sawed strainer. The pump is a No. 6 vertical-shaft centrifugal, placed in a pit 40 feet deep.

The engine has a 10-inch cylinder with a 12-inch stroke; diameter of rod, 1⅞ inches.

The boiler is a horizontal return-tubular, 14 feet long by 44 inches in diameter, having 28 3-inch tubes. The setting is of brick. The furnace was in bad condition, due to cracks in the front of the setting, causing several large leaks. An injector was used to feed the boiler; there was no feed-water heater.

The fuel used was wood, costing $1.50 per cord, and bituminous coal, costing $4 per ton of 2,000 pounds at the plant.

The water pumped was measured by means of a portable 18-inch Cipolletti weir placed in the discharge ditch.

During the test the water used was carefully weighed, as was also the coal. The wood used was measured. General observations as noted in the log were taken at half-hour intervals. The test lasted for 2½ hours. All the conditions were uniform and the results entirely satisfactory.

The height through which the water was elevated was measured, as in the other tests, by means of a steel tape in the discharge pipe of the pump. It was 35.8 feet. The plant had been running for several days, and was stopped only long enough to measure the head.

This plant could cut down fuel expense 10 per cent by installing a heater. The mean temperature of feed was only 60.5° F. A heater could be employed to raise the temperature over 100°, and not only effect a saving in fuel but also prolong the life of the boiler by avoiding stresses due to wide variations in the temperature of the water in its different parts.

The total cost of this plant was as follows:

Well, pit, and pump	$1,000
Engine and boiler	1,100
Total	2,100

Results of test of plant No. 10.

Duration of test, hours	3
Lift, feet	35.8
Average indicated horsepower	41.7
Average discharge of pump, cubic feet per second	1.64
Average discharge of pump, gallons, per minute	738
Average discharge of pump, acre-feet per hour	0.136
Cost of fuel—	
Coal, per ton	$4.00
Wood, per cord	$1.50
Cost of fuel per hour	$0.312
Cost of fuel per indicated horsepower hour	$0.0075
Cost of fuel per acre-foot	$2.30
Cost of fuel per foot-acre-foot	$0.0642
Efficiency of engine, pump, and well, per cent	16.1

COST OF WATER.

Cost of plant	$2,100
Area, irrigated, acres	92
Cost of plant per acre irrigated	$22.82

ANNUAL COST PER ACRE.

Interest on first cost at 7 per cent	$1.60
Depreciation, 10 per cent on first cost	2.28
Fuel cost of 1.25 acre-feet	2.88
Attendance	3.04
Total annual cost per acre irrigated	9.80

I could insert the other tests made, but I feel that enough proof has been marshaled to convince this body that irrigation by wells is practical.

A survey has been completed of southwestern Nebraska, which proves that the supply of water a few feet under the surface is practically inexhaustible.

We know that damming of the watercourses leading into the streams must prove of benefit in bringing more rains, and as the representative of this part of our country I plead with you to give us this appropriation, so that men that we help pay, will devote a portion of their time to our interests. On page 75

of this bill you have made special provision for the Louisiana farmer, as we did in the last Agricultural bill. All through the bill runs legislation that will specially assist favored communities. I know from living in Nebraska a lifetime that you could not come to the assistance of a people who are more worthy than the farmers of southwest Nebraska, who have for years watched their crops dry, wither, and blow away; then with indomitable courage tackle the job again and again. We are just asking our rights, and I ask you in the interests of economy and right, to buy $100,000 less powder, shot, and shell, and come to the rescue of the farmers of southwest Nebraska.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. PAGE of North Carolina. I wanted to suggest to the gentleman that the appropriation made in this paragraph was for investigating the very subject to which his amendment applies. I did not catch directly the reading of his amendment. It says:

For investigating and reporting upon the cost and feasibility of pumping from wells or the irrigation of lands in southwestern Nebraka; for preparing plans for the impounding of waters that now go to waste in watercourses leading into streams in southwestern Nebraska; for investigating and developing equipment intended for the construction and maintenance of wells for irrigation; for the purchase of materials and equipment—

And so forth.

Here is $106,000 appropriated, which applies anywhere in the country where these investigations may need to be made or can be made.

Why can not part of this appropriation be applied to the very purpose that the gentleman from Nebraska is asking for, to come in with all the balance of us?

Mr. BARTON. I am inclined to think, after reading this paragraph, that it would not apply to the damming of watercourses or the holding of water just as a sort of surplus and for experimenting on subirrigation.

Mr. LEVER. I think the gentleman is wrong. Although the department is not doing the character of work specified by the gentleman from South Carolina, I am satisfied that the language is broad enough to permit the department to do it.

Mr. PAGE of North Carolina. It strikes me that the language is broad enough to permit the department to do exactly what the gentleman's amendment intends they shall do, and that he can take his chances on the $106,000 that is appropriated in this paragraph.

Mr. BARTON. I trust I shall be fortunate enough to have the chairman of the committee and the gentleman now addressing the committee use their good influences to have this paragraph applied to southwestern Nebraska; and if they do, I shall have no objection to having the amendment voted down, as I know it will be.

Mr. MARTIN. Mr. Chairman, I should like some light from the chairman of the committee, if the statement he has just made is correct, as to why it is that he raises a point of order on the paragraph?

Mr. LEVER. I reserved a point of order simply because I could not hear the amendment as it was read. I do not think it is subject to a point of order, in all probability, and I am going to withdraw the point of order and let the House vote on the proposition.

Mr. MARTIN. While I am on my feet I should like to ask the chairman upon what theory this work is put under the Department of Good Roads, or Public Roads?

Mr. LEVER. The only engineering corps in the department at all has been carried in the Office of Public Roads, except the engineers provided for in the items for irrigation and drainage. Those two items have been carried as miscellaneous items in the Office of Experiment Stations. They require engineers to do that kind of work. The Secretary of Agriculture thought it was better to concentrate all the engineering activities, both for roads and rural engineering, in one bureau, and we agreed to it.

Mr. MARTIN. Of course the gentleman is aware that the Government is maintaining a very large corps of engineers in the Reclamation Service under the particular work of hydraulic engineering.

Mr. LEVER. The gentleman will notice that we have confined our work to the irrigation work in connection with agriculture.

Mr. MARTIN. Practically all the irrigation work that the Reclamation Service is doing is in connection with agriculture.

Mr. LEVER. This has to do more largely with the country outside of the arid region.

Mr. MARTIN. The gentleman is now for the first time putting these two classes of engineering work in connection with water as applied to farming under the particular Bureau of Good Roads.

Mr. LEVER. Heretofore they have been carried under the Office of Experiment Stations.

Mr. MARTIN. Of course they have no logical connection with the Office of Good Roads.

Mr. LEVER. They have no connection whatever with the Office of Experiment Stations.

Mr. MARTIN. Does not the gentleman think this is only another way of building up and giving dignity and larger scope and jurisdiction to a bureau which we will be called upon to appropriate more and more for as we go on?

Mr. LEVER. I tried to point out a moment ago to the gentleman from Pennsylvania that the name of the office has been changed, so as to indicate the character of the work that is being done. It is now designated the Office of Roads and Rural Engineering. Formerly it was the Office of Roads. This suggestion comes from the Secretary of Agriculture, under the authority to reorganize the Department of Agriculture.

Mr. MARTIN. I think this is one of the mischiefs of our method of making appropriations. We are doing work in various departments, and here is a great corps of engineers whose business it is to understand all about irrigation as applied to farming, and we are also building up this bureau in the Department of Agriculture, really duplicating the work that those engineers must do, in order to be informed about irrigation projects, and there are engineers to spare in that department.

Mr. LEVER. It is not really a duplication in the usual sense of the word "duplication." We are trying here to concentrate these engineers in one bureau, in order to prevent duplication, at least in the Department of Agriculture.

Mr. MARTIN. I know from actual observation and experience that the problems connected with irrigation, and the application of irrigation to farming, are being studied by those engineers in the Reclamation Service, and anyone desiring to be informed ought to be able to ascertain information from that service, without the necessity of duplicating and multiplying appropriations.

Mr. LEVER. I am inclined to think this amendment is so juicy that it may precipitate a good deal of discussion, and I ask unanimous consent that all debate on the amendment and all amendments thereto be closed in six minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this amendment and amendments thereto be closed in six mintes. Is there objection?

There was no objection.

Mr. HAUGEN. May we have the amendment reported again, so that we will know what it is?

The CHAIRMAN. If there be no objection, the amendment will be again reported.

The amendment was again read.

Mr. LOBECK. Mr. Chairman, I rise to support this amendment offered by my colleague [Mr. BARTON], for I know something about the needs of this country in southwestern Nebraska, and even in northwestern Kansas. I have in my mind a farmer, who unfortunately lost his life last spring, who was willing, if this effort would be made by the Government, to supply, in addition to whatever money the Government would use in boring wells, all the labor that was necessary.

It is a rich land; it is a rich country; but, like some parts of Texas, it needs rain. It needs water. With the needed water it would make a productive country. If the Government would search for these subterranean streams I believe it would find an immense amount of water coming from the mountains that settles into the earth with underground streams. I am firm in the belief that if a number of ponds were impounded that it would cause, on account of evaporation, more rainfall, and that land in western Nebraska is as rich as any land in the country. I have heard it stated here that when Illinois and Iowa people wanted drainage they drained and tiled their own lands, but they did it after their lands were worth $100 or $150 an acre, when they had become rich and could afford to do it. But here is a new country, practically all homesteaders, who have settled there within a few years and have not got the means to do what the Illinois and Iowa farmers did. I believe it would be helpful and develop one of the greatest grain-producing countries in the United States. I am in favor of the amendment.

Mr. LEVER. Mr. Chairman, one moment. I am satisfied that under the language of the amendment just read the work contemplated in the amendment can be done. However, I want to say that the committee has given no consideration to the proposition. It was not estimated for. It is a large sum of money, and I trust that the amendment will be voted down.

Mr. HAUGEN. Mr. Chairman, I want to ask the chairman of the committee if it is not a fact that the department was doing the very thing up to a few years ago and then abandoned it? A number of wells were sunk, but the expense of pumping was so great that they abandoned it.

Mr. LEVER. Not since I have been closely affiliated with the work of the department has that been done; but the gentleman has been on the committee much longer than I have, and I am sure his recollection of the facts is correct.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nebraska.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For investigating and reporting upon farm drainage and upon the drainage of swamp and other wet lands which may be made available for agricultural purposes; for preparing plans for the removal of surplus water by drainage, and for giving expert assistance by advice or otherwise in the drainage of such lands; for conducting field experiments and investigations concerning the construction and maintenance of farm drainage work; for investigating and developing equipment intended for the construction and maintenance of farm drainage structures; for the purchase of materials and equipment; and for preparing and illustrating reports and bulletins on drainage; and for the employment of assistants and labor in the city of Washington and elsewhere; for rent outside the District of Columbia, and for supplies and all necessary expenses, $96,280.

Mr. HAWLEY. Mr. Chairman, I would like to ask the gentleman from South Carolina a question. Following the book that we used in making up the bill, I find that there is a paragraph which I remember we approved of, at the bottom of page 102, and I do not see it in the bill.

Mr. LEVER. I am about to offer that as an amendment, as a new paragraph.

Mr. MOORE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE. I desire to offer an amendment to the existing paragraph. Would a new paragraph cut me out?

The CHAIRMAN. The Chair is inclined to think it would.

Mr. MOORE. Then I want to offer the following amendment.

The Clerk read as follows:

Amend, page 69, in line 8, after the word "work," by inserting the following: "For investigating and developing drainage with a view to the extermination of the disease-carrying mosquito."

Mr. STAFFORD. I reserve a point of order on that.

Mr. MOORE. Mr. Chairman, I question whether this is subject to a point of order. It follows the language of the paragraph closely, and pertains to the department work. However, I desire to speak on the merits and to say that for several years I have undertaken, at the instance of a large number of people who are annoyed by the pest, to have some consideration given in this bill, which appropriates so much money for other insect purposes, to the elimination of the mosquito.

The very efficient but, in this instance, hard-hearted chairman of the committee, the gentleman from South Carolina [Mr. LEVER], has maintained that the mosquito is a pest that pertains only to man. He contends for that reason that my amendment has no place in an agricultural bill; that the mosquito, to obtain a status here, must harass the plant or disturb the peace of mind of the barnyard fowl or annoy the cow. He seems to want to hold me directly to these animals of the lower kingdom. I contend that there is no pest on earth that in virulence and in its general powers to irritate has a worse effect upon humankind or animals in both kingdoms than the mosquito. It belongs to no section of the country and can not be confined to any State. It develops everywhere and roams everywhere. Recent scientific information—and all through the bill we have a plethora of scientific helpfulness, from the experts in bugology to the deep thinkers in all the other "ologies"—leads us to believe that the treatment of the mosquito is wrapped up in the drainage question. It is scientific to believe that the mosquito can be conquered by proper drainage; therefore the amendment ought to be in order.

I have looked this bill over and believe the proper place for this amendment is in the drainage paragraph, and I hope the gentleman from South Carolina will come to the same conclusion.

Mr. LEVER. Mr. Chairman, inasmuch as the Public Health Service and the Bureau of Entomology both are doing considerable work along the line the gentleman suggests, I am constrained to make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. MOORE. Mr. Chairman, may I inquire what the point of order was?

Mr. LEVER. That it is new legislation on an appropriation bill.

Mr. MOORE. New legislation on an appropriation bill?

Mr. LEVER. Yes; new legislation on an appropriation bill.

The CHAIRMAN. Does the gentleman from Pennsylvania desire to appeal from the decision of the Chair?

Mr. MOORE. No; I do not; but the Chair ruled so quickly and before I had any explanation of the point of order that I felt myself entitled to know what the point was.

Mr. LEVER. Mr. Chairman, the point was ruled on last year, and ruled out of order.

Mr. MOORE. Very well.

The CHAIRMAN. The Chair had no desire to be discourteous to the gentleman in any way. The Clerk will read.

The Clerk read as follows:

For investigating and reporting upon farm drainage and upon the drainage of swamp and other wet lands which may be made available for agricultural purposes; for preparing plans for the removal of surplus water by drainage, and for giving expert assistance, by advice or otherwise, in the drainage of such lands; for conducting field experiments and investigations concerning the construction and maintenance of farm drainage work; for investigating and developing equipment intended for the construction and maintenance of farm drainage structures; for the purchase of materials and equipment; and for preparing and illustrating reports and bulletins on drainage; and for the employment of assistants and labor in the city of Washington and elsewhere; for rent outside the District of Columbia, and for supplies and all necessary expenses, $96,280.

Mr. LEVER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from South Carolina offers an amendment as a new paragraph, which the Clerk will read.

The Clerk read as follows:

Insert, after line 15, on page 69, the following paragraph:

"For investigation of farm domestic water supply and drainage disposal and construction of farm buildings and other local engineering problems involving mechanical principles, including the employment of labor in the city of Washington and elsewhere, supplies, and all other necessary expenses, $12,805."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. LEVER. I understand the gentleman desires to know about this item.

Mr. STAFFORD. I certainly do.

Mr. LEVER. Mr. Chairman, I will say when the committee first began consideration of the bill and first began making it up it did so on the theory that we were not going to put into the bill any new lines of work unless they were in the nature of emergencies, and the committee reaching this item was not advised at the time that it was a character of work that was already being carried in the Bureau of Plant Industry under the Office of Farm Management, and hence cut the entire item out. Later the Secretary of Agriculture wrote me——

Mr. HAWLEY. Will the gentleman yield? A part of this also has been carried in the Bureau of Animal Industry and also transferred.

Mr. LEVER. Yes. Lately the Secretary of Agriculture wrote to me, and I will read a portion of his letter:

The amount heretofore allotted for the work of construction of farm buildings in the Bureau of Plant Industry alone was $12,805. If item 40, carrying $25,000, should not be approved by the committee in its entirety, I sincerely hope that there will be an adequate allowance for the farm architectural work. It is clear that unless $12,805 is allowed for this work the activities of the department in this direction will be curtailed. Instead of being curtailed they ought to be extended, as there are many demands upon the department for assistance in this direction and very much more could be done than is being done.

Mr. STAFFORD. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. STAFFORD. Will the gentleman show or state where there has been any authorization heretofore for investigation and construction of farm buildings and machinery?

Mr. LEVER. I have just read it to the gentleman. It has heretofore been carried under the general-expense item of farm management. The gentleman will remember heretofore the Office of Farm Management has just simply been carried in one line in the bill, "For farm management," and it has been carried under that language——

Mr. STAFFORD. Will the gentleman permit me to read a note from the department, so far as farm buildings are concerned, to show that it is entirely new and that it has never been carried heretofore?

Mr. LEVER. I do not know what note the gentleman speaks of, but I read to the gentleman from the Secretary's letter. The Secretary may be giving misinformation——

Mr. STAFFORD. No; but he is not giving all the information. He does not say anything about investigating the subject of farm buildings and machinery.

Mr. LEVER. I will say to the gentleman——

Mr. STAFFORD. This note is entirely consistent with the letter of the Secretary of Agriculture. He states what has been heretofore carried and also gives the nature of and the additional amount needed, showing that the investigation of farm buildings and machinery is new. That is why I am protesting

as to the need of this department of engineering stretching out into some new field connected with farm buildings and machinery.

Mr. LEVER. The gentleman is certainly mistaken, although I am very glad to have——

Mr. HAWLEY. Will the gentleman yield?

Mr. STAFFORD. Not at the moment.

Mr. LEVER. I have just read the gentleman what the Secretary said:

Mr. STAFFORD (reading)—

This item also relates to farm buildings and involves the transfers from other bureaus of specialists engaged in such work. This is also in the interest of economy and efficiency, as this work is of an engineering character.

The Office of Public Roads and Rural Engineering is equipped with a mechanical department under the direction of a mechanical engineer, and it is believed that with the small additional appropriation asked for this department can be made of great use to the farmers of the country in connection with the development and testing of farm machinery.

Mr. LEVER. Will the gentleman continue to read?

Mr STAFFORD. I did read the other, but I read it out of order.

Mr. LEVER. I ask the gentleman to read it into the RECORD.

Mr. STAFFORD. I have read it into the RECORD, but I read the last sentence first and then went back. I got the idea by just reading this last statement that this is new work involving an investigation of farm buildings and machinery.

Mr. LEVER. The last sentence shows it is a transfer.

Mr. HAWLEY. The language of the amendment offered by the gentleman from South Carolina, chairman of the committee, does not include all that was proposed in the item in the book the gentleman has in his hand.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. LEVER. We have modified the language there from the estimates.

Mr. HAWLEY. And the words "and machinery" have been eliminated.

Mr. STAFFORD. Let us have the amendment again reported, Mr. Chairman, but not out of my time.

The CHAIRMAN. Without objection, the amendment will be again reported.

There was no objection.

The amendment was again reported.

Mr. STAFFORD. Mr. Chairman, the item that I am most opposed to is the investigation into the construction of farm buildings. I think that is an idle proposition.

Mr. LEVER. But we changed it.

Mr. STAFFORD. The phraseology of the amendment as now proposed will cover all the activities, even in the more specific wording, of the Book of Estimates.

Mr. LEVER. I differ with the gentleman. We changed the language because we wanted to modify it.

Mr. STAFFORD. I have no objection if the gentleman would strike out the "construction of farm buildings." I do not wish to limit the activities of this department. I have no objection to investigating farm drainage disposal. I see no need, however, of a scientific investigation of the construction of farm buildings. Farmers know what they need with respect to their buildings.

Mr. HAWLEY. I will say to the gentleman from Wisconsin that this is not a new project. It was carried in at least two bills.

Mr. LEVER. Mr. Chairman, I will say to the gentleman that we had the man in charge of this work before the committee, and his testimony was to the effect that there was a tremendous demand throughout the country for the study of the most economical and advanced plans for the building of small farm homes. He submitted to the committee a number of letters from engineering societies all over the country commending his work, and he submitted also a number of pictures to the committee, together with plans and drawings and the like of that. I think this is very important work. We had a special hearing on it after the bill was made up, and the result of it is this amendment.

Mr. STAFFORD. If it is allowed to remain in this act, will the subsequent appropriation be increased?

Mr. LEVER. Not so long as I am chairman of the committee.

Mr. STAFFORD. The gentleman will certainly be chairman of the committee until a vacancy occurs in another body, and we all know that he will then fill that vacancy with credit.

The CHAIRMAN. Does the gentleman from Wisconsin withdraw his point of order?

Mr. STAFFORD. Yes.

The CHAIRMAN. The gentleman from Wisconsin withdraws his point of order.

Mr. MOORE. Mr. Chairman, I renew the point of order, or reserve it.

The CHAIRMAN. The gentleman from Pennsylvania reserves a point of order.

Mr. MOORE. I would like to know the difference between this amendment, so far as it is legislation upon an appropriation bill, and the amendment which I offered a little while ago and which the Chairman ruled out.

Mr. LEVER. I will say to the gentleman that I am not sure that this amendment is in order here in the first place, but this whole Agricultural bill relates to agriculture. The gentleman's proposition was a medical proposition, a scientific study of diseases of the body.

Mr. MOORE. I beg the gentleman's pardon. It related wholly to drainage, as it pertains to the mosquito. It is purely an agricultural proposition.

Mr. LEVER. That is one of the very things that should be kept out of this bill.

Mr. MOORE. It is just as pertinent as many of the items that have been inserted in the bill. There are some people who say that because there is $660,000 in this bill for investigations of the cotton-boll weevil that therefore the bill is a "pork-barrel" bill, just as they say it of a rivers and harbors bill. I want the gentlemen to remember that it is perfectly easy to rule out an amendment that does not meet the approval of the committee on the ground that the amendment contains legislation tacked onto an appropriation bill; but it is not always fair for the committee to come in with an amendment that proposes legislation on an appropriation bill and have everybody sit quiescent and allow it to pass.

Now, I consider the destruction of the mosquito more important, not only to the animal kingdom, but also to the human family, than a provision attached to the bill making an appropriation to buy more machinery or pay more salaries. That is my point.

Mr. LEVER. Does the gentleman make the point of order?

Mr. MOORE. I do not make the point of order. Having said what I desire to say, and having shown that some of us are on guard over here, and that we appreciate the power which the committee has over the proceedings of the House, I will withdraw the point of order.

Mr. LEVER. Nobody doubts that the gentleman is on guard all the time.

Mr. MOORE. Of course; I thank the gentleman for that.

Mr. BAILEY. Mr. Chairman, in regard to that item for investigation as to the construction of farm buildings, does that recommendation come from the farmers throughout the country or does it come from engineering societies?

Mr. LEVER. From both. Mr. Atherton, who has charge of this work, showed us half a dozen letters and indicated that he has a great number more, many from farm women, asking about plans for building a kitchen and building farm homes. It was very interesting.

Mr. BAILEY. In other words, as I understand, the people of this country have come to look to the "Little Father in Washington" for all kinds of guidance?

Mr. LEVER. Yes; I think that is true. Mr. Chairman, I ask for a vote on the amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from South Carolina.

The question was taken, and the Chairman announced that the "ayes" seemed to have it.

Mr. BROCKSON. Mr. Chairman, a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 49, noes 3.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

In all, for general expenses, $497,700.

Mr. HELM. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Kentucky [Mr. HELM] moves to strike out the last word.

Mr. HELM. Mr. Chairman, I suppose the membership of the committee of this House and the country would be pleased to know that it is possible to thrash and put wheat into the sack or bag at a cost of 2 cents a bushel.

I go back to the days of the old cradle, when the farmer used the cradle to cut his wheat, and from that time down to the

time of the reaper, and from that down to the twine binder, that ties the bundles and throws the bundles into a pile.

A MEMBER. Into a shock.

Mr. HELM. Oh, they do not shock it. Now, I am speaking of something that is worth the attention of you gentlemen. Here is a proposition. A gentleman by the name of Jones stopped at the hotel where I board who has invented a machine that will cut, thrash, and put in the sack wheat at 2 cents a bushel, as against 12 cents under the old methods that have been used heretofore. In these degenerate days, when a man invents a gun that can destroy 300 or 400 men at a shot, or knock down a city, his name is heralded to the world as a genius; but a man who can put up and operate something that makes for good, a machine that lightens the burdens of life, and who accomplishes something good for mankind, gets no attention, is never heard of; and when a man gets upon the floor here and talks about an invention that has done as much to benefit mankind as the sewing machine did in its day, or as the screw propeller did for ocean navigation, or the cotton gin for the planter, when a man presents a proposition that will reduce the cost of harvesting grain from 12 cents a bushel to 2 cents a bushel, there is a ripple of laughter in the House of Representatives, from men who are presumed to be at least sometimes serious in the matters in which they are engaged.

Mr. NORTON. I come from a wheat-raising State. Can the gentleman tell us where this machine is in operation?

Mr. HELM. The name of the inventor is Mr. Jones, and he comes from Walla Walla, Wash.

Mr. NORTON. It cuts, harvests, and thrashes and stacks grain at 2 cents a bushel?

Mr. HELM. He cuts the grain and thrashes it and puts it in sacks at 2 cents a bushel, assuming that you have a yield of 50 bushels to the acre.

Mr. NORTON. That is quite an assumption in the wheat-raising country. Of course, it might be all right here.

Mr. HUMPHREY of Washington. I will inform the gentleman that it is not too much of an assumption. I have seen many a field out there that averaged 65 bushels to the acre.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HELM. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. HELM. I suppose some of you gentlemen here doubt that there is such a machine. I suppose some of you are so skeptical that you will not believe there is such a machine, but it is in operation. It cut approximately 320 acres of grain last season without a single breakdown, going all the time.

Mr. SLOAN. Was that a season's work—320 acres?

Mr. HELM. Oh, no.

Mr. SLOAN. I was going to say that that would be a very slim season's work.

Mr. HELM. Oh, no. You will understand that this gentleman has only recently got his machine perfected, and that was only a try out.

Mr. ADAIR. Will the gentleman yield for a question?

Mr. HELM. Certainly.

Mr. ADAIR. What effect would the use of such machines have on the demand for labor?

Mr. HELM. I suppose, like all similar labor-saving machines, it would reduce the number of persons employed in harvesting.

Mr. COOPER. Will the gentleman permit an interruption?

Mr. HELM. I yield to the gentleman.

Mr. COOPER. Is it not true that the invention of the sewing machine was opposed because it was feared it would lessen the demand for labor, but, on the contrary, it increased it very greatly?

Mr. HELM. Yes.

Mr. COOPER. Has not that been the universal experience with labor-saving machinery?

Mr. HELM. I think so.

Mr. FIELDS. Will the gentleman yield for a question?

Mr. HELM. Yes.

Mr. FIELDS. In connection with the question of the gentleman from Indiana, I want to ask what effect it would have on the price of bread?

Mr. HELM. I should naturally suppose it would cheapen it, if we could get away from the Biscuit Trusts.

Mr. BUTLER. Can you not mow down the trusts? [Laughter.]

Mr. HELGESEN. Does not the gentleman know that there is only a small section of the United States where that machine could be used?

Mr. HELM. Here is a picture of the machine running on a hillside.

Mr. HELGESEN. Let me tell the gentleman something he does not know, that in the great wheat section the grain does not ripen on the straw so that it can be thrashed at the time it is cut. This machine can only be used on the Pacific coast or where the grain will ripen on the stalk, so that it can be thrashed at that time.

Mr. HELM. The inventor claims that the machine can be successfully operated in any wheat section of the country.

Mr. BUTLER. Is this machine for sale?

Mr. HELM. It is for sale, and I have not a particle of interest in it and never expect to have.

Mr. BUTLER. I know my friend has not. How much does it cost?

Mr. HELM. It costs less than a thousand dollars. [Applause.]

Mr. LEVER. Mr. Chairman, I understand that the gentleman from Kentucky has concluded.

Mr. HELM. Yes.

Mr. LEVER. I ask the Clerk to read.

The Clerk read as follows:

Salaries, Office of Markets and Rural Organization: One chief clerk, $2,000; 4 clerks, class 4; 5 clerks, class 3; 9 clerks, class 2; 10 clerks, class 1; 5 clerks, at $1,000 each; 1 laboratory aid, $900; 2 clerks, at $900 each; 1 laboratory aid, $720; 2 laboratory aids, at $600 each; 1 map tracer, $720; 1 map tracer, $600; 2 messenger boys, at $600 each; 1 laborer, $540; 4 messenger boys, at $480 each; in all, $56,400.

Mr. BAILEY. Mr. Chairman, I hope it has not escaped the attention of the Members of this House that the newspapers report a hurried meeting of the Cabinet at the Treasury yesterday for the purpose of revising downward the estimates submitted to Congress in December last by the various departments of the Government.

This is a belated recognition of a grave situation, but it is better late than never.

However, I observe in the account of the retrenchment conference that the deficit of more than $80,000,000 for the fiscal year ending June 30 next is attributed to "reckless appropriations by Congress, chiefly in 'pork-barrel' rivers and harbors and public buildings bills," no mention being made of the Army bill, the fortifications bill, or the Navy bill, although they cap all records for these in times of peace. Apparently there is no thought of retrenching in the direction of "preparedness." The Army bill carries $101,000,000 and the Navy bill as drawn calls for an expenditure of more than $148,000,000.

Mr. Chairman, early in the life of this Congress I took occasion more than once to remind Democrats of what I have called the "forgotten plank" of the Baltimore platform—that plank pledging the Democratic Party to rigid economy in public expenditures—but without avail. Republican extravagance which we had denounced was outdone by our own party, and no serious effort on the part of our leaders, let it be said with regret, was made to curb the saturnalia of extravagance. In a most flagrant manner was economy disregarded in making provision for Army and Navy. Had we been face to face with a foreign war we could not have spent money with a more lavish hand.

We are told that the income tax has proved disappointing. That was to have been expected. The income tax is, after all, a tax on conscience, and the conscience of those possessing taxable incomes is sometimes elastic. Incomes in some mysterious manner shrink at the approach of the inquisitor. They never yield quite the revenue which they are expected to furnish.

The emergency tax law has likewise disappointed the expectations of Treasury officials and party leaders. It has not yielded the returns hoped for. It fails to make up the deficit in revenues occasioned by the decline in customs receipts since the outbreak of the European conflagration. Either the country must seek out new sources of supply or it must lay the ax at the root of the tree of extravagance.

For my part, Mr. Chairman, I have voted consistently for economy. In some cases I have been compelled to part company with my party leaders in doing so. I have felt that I owed no higher duty to the people than that of standing across the path of those headed toward the Treasury; and this I have done as best I might, not always or often successfully, but I have stood there nevertheless.

While money has been wasted on rivers and harbors, and perhaps also on public buildings, the waste here at the very worst has been negligible in comparison with that on battleships, big guns, fortifications, and militaristic expansion. For every dollar wasted in the one direction a hundred dollars have been wasted in the other. The country has something material to show for the money it devotes to rivers and harbors; it has something material to show for the money it invests in public

buildings; it has something material to show for the sums it spends on agriculture and other activities designed to promote the development of our resources; but what has it to show for the enormous sums it has devoted to naval and military expansion? It has a vast array of fighting machines of one sort or another; it has nearly 200,000 men drawn from gainful pursuits to be borne on the backs of the workers of the land; and it has a shouting and tumultous band of patriots, of whom the gentleman from Massachusetts [Mr. GARDNER] is perhaps the most vociferous, who insist that, with all the expenditure, we are unprepared for defense and in so sorry a plight that the nations of the earth make merry at our expense.

Of course this is sheer tommyrot. It is inspired, it is to be feared, by other than genuinely patriotic motives. But that it is sweeping this Congress before it is only too apparent. The question then arises, Shall jingoism prevail or shall sober sense resume its sway and put an end to the orgy of militaristic extravagance, which has already gone too far?

The Clerk read as follows:

For acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing and distributing of farm and nonmanufactured food products and the purchasing of farm supplies, independently and in cooperation with other branches of the department, State agencies, purchasing and consuming organizations, and persons engaged in the transportation, marketing, and distributing of farm and food products, $238,000.

Mr. BOOHER. Mr. Chairman, I should like to inquire of the chairman of the committee how much of this lump sum of $238,000 is for salaries. In the first paragraph you appropriate $56,400, entirely for the salary list.

Mr. LEVER. That is for statutory salaries.

Mr. BOOHER. How much of this $238,000 is appropriated for salaries?

Mr. LEVER. Necessarily the larger part of this appropriation is for salaries and traveling expenses. This is the lump sum, which carries the scientific force of the office.

Mr. BOOHER. Does the gentleman mean to say that it costs $56,400 and $238,000 for salaries to run this bureau?

Mr. LEVER. The gentleman from Missouri must understand that we are not employing any soldiers or building anything, but practically our whole appropriation is a matter of salaries. The whole Department of Agriculture is made up of men who are employed upon salaries. There is a scientific force and a statutory roll, and, outside of rent and traveling expenses, practically every dollar of this appropriation is expended for salaries.

Mr. BOOHER. How long has the bureau been organized?

Mr. LEVER. It was organized two years ago, with an appropriation of $50,000.

Mr. BOOHER. And it has grown to $352,650 in two years—a pretty rapid growth.

Mr. LEVER. Yes; but they have transferred some work from other bureaus. The total increase is about $90,000.

Mr. BOOHER. It is more than that, because the bill now appropriates $352,650.

Mr. LEVER. But that represents a considerable number of transfers.

Mr. BYRNS of Tennessee. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. BYRNS of Tennessee. I want to ask the gentleman if he can state briefly what progress is being made by the Department of Agriculture in the work cut out for it under this appropriation?

Mr. LEVER. The Office of Markets in the outline of its work promises to develop into one of the most important lines of activity in all the Department of Agriculture. Of course it is a new work, and a large part of the time has been spent in organizing the work. It has been a very difficult matter to get men of that expert training, comprehension of facts, and understanding necessary in the conduct of the study of the problems of marketing. But they have made substantial progress in their investigation and study, and they have been of immense use in their work with the Committee on Agriculture both in the cotton-futures act, the grain-standardization bill, and the warehouse bill, and various other lines of constructive legislation that the committee has been studying. I think the office is now prepared to do very good fundamental work.

Mr. BYRNS of Tennessee. May I ask whether or not it is the purpose of the office to extend its work so as to give the farmer information as to the foreign markets, or whether or not it is proposed to confine it altogether to the markets in this country?

Mr. LEVER. The language of the item under which various other items are allowed here is so broad that I am satisfied that the whole problem of marketing as to its effects on agriculture in this country, both domestic and foreign, can be investigated.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. BYRNS of Tennessee. I ask unanimous consent that the gentleman's time be extended five minutes.

Mr. LEVER. Pending that, Mr. Chairman, I desire to ask unanimous consent that all debate on the paragraph and amendments thereto close in 25 minutes. There are quite a number that want to speak.

Mr. MANN. Make it 15 minutes.

Mr. LEVER. There are several on this side who want to speak.

Mr. MANN. If they are going to speak 25 minutes, I want 5 minutes.

Mr. LEVER. My colleagues will see the situation that we have here, and we must complete this bill this afternoon if we have to keep a quorum here all night. I do not think it will be necessary, but gentlemen can never tell in the consideration of a bill what will happen. I would be glad to accommodate Members, but I can not do it. If we are going to get through the bill in a reasonable time we must not devote so much debate to every provision. I ask unanimous consent, Mr. Chairman, that debate be limited on this paragraph and amendments thereto to 15 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. Is there objection?

Mr. THOMPSON of Oklahoma. Reserving the right to object, I would like to ask what that paragraph includes?

Mr. LEVER. From line 13 to line 21.

Mr. THOMPSON of Oklahoma. I do not care to speak on that.

Mr. SUMNERS. Mr. Chairman, reserving the right to object, I am offering an amendment, which I believe to be an important amendment whether it is in order or not in this paragraph, and I certainly want the right to speak five minutes.

Mr. LEVER. The Chair will control the time. Personally, I should be glad to have the gentleman have the time, and if the gentleman from Tennessee will expedite his questions, there will be a few minutes of my own time left.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina? [After a pause.] The Chair hears none.

Mr. BYRNS of Tennessee. I want to say to the gentleman from South Carolina that I agree with him. I do not think there is a more important appropriation in the bill, so far as the farmer is concerned, than this, and I hoped the office had proceeded far enough so that they could undertake to make some investigations in the foreign field as well as in the local or domestic field.

Mr. LEVER. I am sure that when we come back next year we can report great progress in this work, probably along the lines the gentleman suggests.

Mr. QUIN. Mr. Chairman, the gentleman from Tennessee [Mr. BYRNS] asked what progress this Bureau of Markets had made. I do not believe that the gentlemen of this House have given this part of the Agricultural Department proper consideration. The poor farmer—and when I say the poor farmer I mean the man engaged in diversified farming, the man who digs his living out of the ground my making food to feed the human race—has been taught by the Government many years how to make crops, but we are not showing him the places or the methods of marketing. I refer to the seventh district of Mississippi, where the boll weevil virtually put that prosperous part of the country out of commission. These farmers have learned diversification of crops, but they are up against the proposition of getting a market for their corn, their molasses, their potatoes, Irish and sweet, and all kinds of vegetables. This Bureau of Markets should show the men producing these crops the best method of packing, the best method of marketing, and a way to find the markets for these farm products, and the Government should furnish an inspection that will keep them from being cheated by the commission dealers or middlemen in the cities. That, in my judgment, is what the Bureau of Markets should devote its attention to. The gentleman from Tennessee wanted to know if they could look out for the foreign markets. We have people in this country that they should look out for. People in the cities are crying for diversified products of the farm. You can not get them to the cities without the poor farmer being robbed in commissions and transportation charges. In Washington you pay 50 cents a peck for corn meal, and in the seventh district of Mississippi the farmer can

not as a rule get more than four bits a bushel for his corn. There is something wrong when the farmer can not get full value for his labor out of his crops. That is what the bureau ought to do, to show the people where they can sell their products and the people in the cities can get their stuff for reasonable prices without the farmer being oppressed and without the people in the city being robbed. The farmer and the consumer should be brought together, and when the Bureau of Markets gets its machinery operating in a systematic way a great portion of the waste, expense, and stealage will be done away with. Then the poor farmer will get a fair price for the products of his farm and the poor consumer in the city can eat a plenty. As it is now the consumer pays an exorbitant price for the things he eats and the farmer hardly gets enough for it to keep soul and body together. A few middlemen and transportation companies are getting rich off of the labor of the farmers. The farmer must get relief, and you fellows had better get busy in his behalf.

Mr. BYRNS of Tennessee. Will the gentleman yield?

Mr. QUIN. I will yield to the gentleman.

Mr. BYRNS of Tennessee. I am sure, of course, the gentleman does not want to discriminate against any class of farmers of this country. I want to call his attention to the fact that there are some farm products for which there is no market in this country, particularly dark tobacco, which is exported to Europe. Now, does not the gentleman think that it is the duty of the office of the Bureau of Markets to undertake to give to the tobacco farmers who grow tobacco for the purpose of export the same facilities for a market and the same information that it does to other farmers?

Mr. QUIN. Why, certainly I do; but that is something that the world is bound to have. They are bound to have that tobacco. Men are going to chew and smoke tobacco just as long as the breath of Adam is in them, and we have to have the markets to sell tobacco in. Now, in reference to the tobacco markets, they have organized a great trust to oppress the tobacco farmers. We know that is the case. Mr. Chairman, the proposition the gentleman is talking about will be attended to later. We have a bill passed by the last Congress that will prevent the thieves in the Tobacco Trust from robbing the producers of tobacco. I contend that the farmer of this country right now needs this Market Bureau extended. The gentleman from Missouri seems to think there is too much money expended on it. I want to spend more on the Bureau of Markets, for I realize the sale and distribution of farm products is bound to be handled in a sensible and practicable way. Instead of spending that money on these men going around to look over the great mountains of this country, instead of spending it on men going around to look at the beautiful spots to establish parks, there can be no better work done by the Agriculture Department than to find markets for the farm products of this country. [Applause.]

Mr. BOOHER. If the gentleman referred to me as objecting to this——

Mr. QUIN. No; not as objecting to it; but that there was some extravagance about it.

Mr. BOOHER. No; my question was only as to how this money was all spent or how much of the lump sum has been spent for salaries; that is all.

Mr. QUIN. I am in favor of expending whatever money is necessary to extend the Bureau of Markets in every possible manner to help the farmers of this country. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. SUMNERS. Mr. Chairman, I offer the amendment to the paragraph which has already been sent to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. SUMNERS: Page 70, line 16, after the word "products," insert "and for establishing and operating an exchange, with the necessary branches thereof, for the economic sale and distribution of farm products, and the Secretary of Agriculture is hereby authorized and directed to establish, at as early date as practicable, a farm-produce exchange, with such branches thereof as may be necessary, in order to afford a medium through which the economic and systematic sale and distribution of such products may be effected.

"In the operation of such exchange the Secretary of Agriculture, as far as practicable, shall cooperate with the several States and the various agencies therein which may be utilized, and may formulate plans and regulations for exchange of service between them and such exchange.

"It shall be the duty of each of the departments of the Government to furnish the Secretary of Agriculture with such statistics and data as they may acquire which would be useful in the operation of such exchange, and to render such other service in the sale and distribution of farm products through such exchange as it would be practicable to render.

"The Secretary of Agriculture shall keep advised as nearly as practicable with the details of the quantity, quality, location, and price at which held, of agricultural products and the volume and location of demand in the United States and abroad, and the price at which such products may be sold, and shall make such information available to the producer and purchaser of such products, and shall endeavor to bring about such system in the sale and distribution of such products as shall eliminate the waste and extremes in prices resulting from the present lack of system therein.

"Those desiring to offer products for sale through such exchange may do so by grade or by sample delivered to such exchange, under such rules and regulations as the Secretary of Agriculture may prescribe, but all tenders of such products shall be for a definite quantity and quality: *Provided, however* That the Secretary of Agriculture is authorized to permit contracts for the sale of such products to be made upon a basis grade, with the option to deliver other grades in fulfillment of such contract: *Provided, however*, That no contracts shall be made through said exchange permitting a delivery within a wider range of grades than the ordinary user of such product dealt in uses in the general conduct of his business wherein such products are used, nor upon any other delivery value difference than the commercial difference between the basis grade and the grade or grades delivered.

"The Secretary of Agriculture is authorized to require such deposits in money, bond, or other guaranty of compliance with the obligation to deliver according to tender or receive and pay according to offer as in his judgment may be necessary to insure compliance with the contracts made through such exchange.

"All information furnished by such exchange shall not be at a higher cost than that necessary to defray the expenses of transmission.

"No charges shall be made to individual producers or to producers' organizations for services rendered in effecting sales of products grown by them or by their members, as the case may be.

"The Secretary of Agriculture is authorized to establish such rules and regulations governing transactions through said exchange and the service rendered by said exchange as in his discretion may be deemed necessary."

During the reading of the amendment,

Mr. LEVER. Mr. Chairman, I reserve a point of order on the amendment.

Mr. SUMNERS. I hope the gentleman will not make the point of order.

Mr. CANDLER of Mississippi. I also reserve a point of order on the amendment.

The Clerk resumed the reading of the amendment.

Mr. CANDLER of Mississippi. Mr. Chairman, I submit there has been enough read to put the matter before the House. If the gentleman wants to talk on the subject, he had better proceed; if not, we will have to make the point of order against it in order to save time.

The CHAIRMAN. The Clerk will proceed with the reading of the amendment.

The Clerk proceeded with and concluded the reading of the amendment.

Mr. LEVER. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The point of order is reserved against the amendment, and nine minutes are left for debate.

Mr. SUMNERS. Mr. Chairman, the amendment offered by myself, to create a produce exchange and a clearing house of information, does not propose to bring the Government into a new field of activity. It would only bring the Government activity into a field already occupied by it, into rational conformity with the conditions which now obtain in that field. The Government has definitely committed itself to the policy of aiding agriculture to deal properly with its big problems. For this purpose the Agriculture Department was created. As community isolation and community self-sufficiency have disappeared with improved transportation facilities and the development of great cities, there has been added to the two original great agricultural problems—production and preservation of soil fertility—a third and the most difficult one, namely, that of sale and distribution of farm products. The amendment is intended to confer the necessary power upon the Secretary of Agriculture to enable him to bring the activities of the Agriculture Department into the new field of difficulty. Mr. Chairman, I can not understand upon what theory opposition to this amendment can be based. Everybody knows that production, preservation in the soil of the power to continue to produce, and the proper disposition of the products by the producers constitute the farmer's business.

The farmer's business being indispensable to the very existence of all people, its difficulties have been taken cognizance of by all the enlightened Governments of the world. A special department in each of them has been created to protect the public interest by aiding farmers to deal with the big problems of agriculture. No gentleman on this floor can deny that the sale and distribution of farm products is the most difficult of the three. Underpaid farmers on the one hand and underfed people on the other, because of the wasteful and absurd system of sale and distribution of farm products demand the creation of the necessary machinery for their distribution. Mr. Chairman, within the memory of men yet active in the affairs of this country but a small percentage of agricultural products entered into the channels of commerce. Production was primarily to supply the family of the producers and was diversified to meet their needs.

Local necessity, rather than the adaptability of the soil, fixed the character of crops. Then the people conformed to local production. When the land raised wheat but not corn, the family ate flour bread; and when it raised corn and not wheat, they ate corn bread. Of the small percentage sold a large part went to the neighboring towns and villages. They had to use what the community produced. The expense of transportation would not permit outside products to come in, and the expense of transportation would not carry products far away. The slowness of transportation barred perishable products from distant markets. If this condition had not changed I would not be offering this amendment, but it has completely changed. The farmers' children no longer wear homespun clothes, homemade shoes, and so forth. The farmer produces primarily to sell now. The people have moved from the country. Towns have grown to be great cities.

Now, nonfarmers can not purchase from their farmer neighbors. Consumption has moved far from the field of production, not only physically far away but far away in every other sense. Both the producer and the consumer require just what this amendment proposes to create. It would establish between producer and consumer a dependable substitute for the lost personal acquaintance and put them in trading relations with each other. It would reduce the expense of sale and distribution, first, by giving to many agricultural products a commercial status as they come from the farms; second, by making the point of origin the point of sale, thereby enabling products to move from the point of origin to the point of use by the most direct and economical route, and thereby make it possible to have the total volume of movement of all products to a given point of use substantially conform to the total volume of demand for use at that point. I understand full well the difficulties, but I say it is possible of substantial accomplishment. To the extent this accomplishment is achieved, uniformity of price to producers, uniformity of cost to consumers, and uniformity of supply in the markets throughout the country would result. With this exchange and clearing house of information in proper operation the millions of dollars' worth of food products which now decay in the fields after production and in congested markets—a clear loss to farmers—would go to the tables of the people who need them, and at a price which would reduce the cost of their living. Here is the place for those who want to reduce the cost of living to do effective work.

In addition, I submit, Mr. Chairman, that the exercise of the power proposed to be conferred by this amendment is necessary to give result to many of the present activities of the Department of Agriculture. We are spending millions of dollars per annum in the department teaching how to produce. I know a man in southwestern Texas, for instance, who absorbed some of this information. He put in a field of lettuce. He worked hard to produce a superior quality and succeeded. He was proud of his achievement. He sent a hundred samples to the different markets. It was pronounced excellent. In great hope he made his first shipment of a carload. He paid in freight charges $9 above the result of the sale. He tried once more and had to pay $13 above the receipts, and the rest of his crop rotted in the field. Now, I would like to know what good that enthusiastic Government agent did that man or the people who wanted lettuce to eat, but who did not know where the lettuce could be found, while the man did not know where the need was. A few years ago somebody went over into east Texas and inspired the people along the Cotton Belt Railroad to put in Irish potatoes. There was much enthusiasm. When the potatoes were harvested, they discovered that potatoes were bringing a good price in St. Louis. They all shipped to that market, and their returns would not pay for the seed they had planted. The much-preached doctrine of diversification received a solar-plexus blow in that country. We were told that our eastern section is a great peach country, and it is. I know of one concern that spent nearly half a million dollars developing a peach orchard. They have cut down hundreds of acres of bearing trees and put the land in cotton because of the uncertainty—the gamble of trying to reach a profitable market.

I have seen field after field of cantaloupes rotting because there was no market. The local stores, when they could sell them at all, were retailing the choicest ones at 10 cents a dozen, while in a neighboring State they were retailing at 10 cents apiece. I have seen thousands of bushels of tomatoes rotting on the plants when no doubt the poor people in your cities could not afford to have them for Sunday dinner, because of the local price. We have been spending hundreds of thousands of dollars to kill the boll weevil, and I have seen figures compiled showing the number of bales of cotton destroyed per year, and then this number of bales multiplied by the price, to show the loss to the South resulting from this ravage. When everybody knows that a small crop of cotton brings more money than a large one, not because it ought to, but because of the methods under which it is sold. There is absolutely no medium through which the investing energy of the world can reach and safely purchase the chief product of my people. There is no open market, no market place except for the professional operator. Had such an agency existed this year as this amendment proposes to create, cotton would not have gone within 2 cents per pound of the price to which it went. Millions and millions of money from all over the country would have gone into competitive bidding against the professional speculator, if the ordinary individual could have made his investment through such an agency, assured as he would have been of integrity of transaction, protection against physical damage to his purchase, and that without further personal attention, through the same dependable agency he could later sell his purchase. I know this to be a fact, because I talked to people from different sections of the country, who believed cotton a good investment, and were willing to back their judgment with their money.

The biggest problem of agriculture is not that of production. My people always produce as much as they can get a fair price for under present marketing methods. What I want the Agriculture Department to do, after it has taught my people how to raise more, is to prevent the application of that information from working an injury to them. There is nothing extreme about this amendment. It proposes the safe and common-sense thing to do under existing conditions. I hope you will not confuse this with any valorization scheme or thing of that sort. I have never asked for valorization of cotton by the National Government. I would not for anything on earth put it in the power of Congress to fix the price of the cotton which my people produce. Those of us who come from the cotton districts constitute about one-fourth of the membership of this body. The same power that could fix the price at 15 cents per pound could fix it at 5 cents. I mean no reflection on this Congress, but I know human nature, and three-fourths of you represent constituents who do not raise cotton. I am not only not asking you to fix a price, but I am not willing to give that power to you. I am not asking for anything artificial. I want to destroy the artificial, the clique-controlled market of the country, and establish an honest market place, an open market place, for the actual products of the soil, a market place in which the whole world can trade with full assurance of protection. I want again to direct attention to the language of the amendment.

The Secretary of Agriculture is hereby authorized and directed to establish, at as early date as practicable, a farm-produce exchange, with such branches thereof as may be necessary, in order to afford a medium through which the economic and systematic sale and distribution of such products may be effected.

In the operation of such exchange the Secretary of Agriculture, as far as practicable, shall cooperate with the several States and the various agencies therein which may be utilized, and may formulate plans and regulations for exchange of service between them and such exchange.

It shall be the duty of each of the departments of the Government to furnish the Secretary of Agriculture with such statistics and data as they may acquire which would be useful in the operation of such exchange, and to render such other service in the sale and distribution of farm products through such exchange as it would be practicable to render.

The Secretary of Agriculture shall keep advised as nearly as practicable with the details of the quantity, quality, location, and price at which held of agricultural products and the volume and location of demand in the United States and abroad and the price at which such products may be sold, and shall make such information available to the producer and purchaser of such products, and shall endeavor to bring about such system in the sale and distribution of such products as shall eliminate the waste and extremes in prices resulting from the present lack of system therein.

Those desiring to offer products for sale through such exchange may do so by grade or by sample delivered to such exchange, under such rules and regulations as the Secretary of Agriculture may prescribe, but all tenders of such products shall be for a definite quantity and quality: *Provided, however*, That the Secretary of Agriculture is authorized to permit contracts for the sale of such products to be made upon a basis grade, with the option to deliver other grades in fulfillment of such contract: *Provided, however*, That no contracts shall be made through said exchange permitting a delivery within a wider range of grades than the ordinary user of such product dealt in uses in the general conduct of his business wherein such products are used, nor upon any other delivery value difference than the commercial difference between the basis grade and the grade or grades delivered.

The Secretary of Agriculture is authorized to require such deposits in money, bond, or other guaranty of compliance with the obligation to deliver according to tender or receive and pay according to offer as in his judgment may be necessary to insure compliance with the contracts made through such exchange.

All information furnished by such exchange shall not be at a higher cost than that necessary to defray the expenses of transmission.

No charges shall be made to individual producers or to producers' organizations for services rendered in effecting sales of products grown by them or by their members, as the case may be.

The Secretary of Agriculture is authorized to establish such rules and regulations governing transactions through said exchange and the service rendered by said exchange as in his discretion may be deemed necessary.

This amendment is governmentally and economically sound. I want to direct the attention of the House to the fact that the plan suggested by the amendment does not contemplate the construction of a marketing machine, but the assembling of the parts of this machine which are now in existence, supplying only the necessary parts to put it into operation. The present organization of the Agricultural Department and of a number of other departments can be utilized. The entire agricultural organization of the several States can be utilized as well as cooperative organization throughout the country, and so can the Consular Service abroad. The necessity for this service by the Federal Government is obvious. No State can create such a marketing agency for its products as is needed, because much of the products of each move interstate. The movement of the products of a given State might be highly systematized and yet failure result because of conflicting shipments from other States. Interstate and foreign commerce under our Constitution is exclusively under the control of the National Government. The several States could deal with production and soil conservation within their respective confines, but they have no extraterritorial jurisdiction which would enable them to deal with marketing beyond their borders. We are therefore confronted with a situation where we have an Agricultural Department dealing with that two of the three big problems of agriculture which the several States have full and complete power to deal with, and practically ignoring the only one of the three big problems which the States can not deal with. If there is any common sense or governmental wisdom in this, I am unable to discover it, and therefore I have offered this amendment. I presume it will go out on a point of order.

But the time will come when it will have a more favorable reception. I am not guessing. I know it. I recognize it is a very difficult thing which I propose; that is why I am urging that we begin now before the situation becomes more acute. We ought to legislate now while we can do it deliberately and give the Secretary of Agriculture time to work out the problems involved. It seems to me that any man who will open his eyes to developments must see that upon the heels of this problem of sale and distribution is coming the problem of building up and holding in reserve a sufficient quantity of food to insure against the hazards of current production. The machine proposed by this amendment will be indispensable to that service. No change of so great importance to all the people ever progressed with such rapidity as that by which the world's reserve supply of food is being exhausted. You men from the great cities may be indifferent now, but you will not be indifferent long. Your people are more and more paying the preventable cost which I have mentioned. You are more and more paying in the price given for that which you consume the value of that which wastes after production. Your people more than my people will suffer when the time comes when there is not enough food for all.

Mr. CANDLER of Mississippi. Mr. Chairman, I consider this Office of Markets one of the most important in the Department of Agriculture. It was suggested by the gentleman from Missouri [Mr. BOOHER] a little while ago that the expense of this office has increased quite rapidly in the short length of time it has been in existence. I helped to establish it two years ago with an appropriation of $50,000. Last year we made an appropriation for it of $200,000, and this year, by reason of transfers from other offices and divisions of the Department of Agriculture to this Office of Markets and its increasing work, it required a necessary increase, which brings it up to the appropriation that is recommended in the present bill of $484,050.

Nevertheless, the work that has already been done by this office justifies the expenditures that have been made. It has assisted in the preparation and passage in this House of some very important legislation. One of the bills was the United States cotton-futures act. Another was the warehouse act. Still another was the State grain act, which passed the House a few days ago. Another still is the United States cotton-standardization act, which is pending with a favorable committee report at the present time.

The work which this office proposes developing is along the lines of cotton handling and marketing; cooperative purchasing and marketing; market surveys, methods, and costs; market grades and standards; city marketing and distribution; transportation and storage; miscellaneous problems in marketing and collaboration; marketing by parcel post and express; marketing live stock, meats, and animal by-products; marketing business practice; grain market investigations.

These are the subjects which will engage the attention of this office during the next year. As was suggested a moment ago, it is not so much the production in this country, because we have a good deal of that—and it is increasing year by year—but the great question that is engaging the minds of the American people to-day is where we can best dispose of products after they are brought into existence. It is to devise ways and means whereby the producer can realize the highest benefit from the products which he brings into existence. If we can bring the producer and the consumer close together and eliminate so far as possible the middle man, who now gets the great bulk of the selling price to-day, we will have accomplished a solution of a very great question which is before the American people at the present time. [Applause.] So that I say that this bureau has begun a great work which will go on from year to year. It is true that it promises the very best field in which to labor for the benefit of the man who produces the farm products which the people who buy them desire to secure at the lowest possible price, and one of the great questions that we all know is confronting the American people to-day is the high cost of living.

We desire to reduce the cost of living if it is possible to do so, and in order to reduce it we want the producer to get the best possible price from the man who consumes the product and eliminate this terrible expense that intervenes between the sale of the product by the producer and its purchase by the man who buys it at the end of the line for his own personal use. If we do that, the cost of living will be very materially reduced, and that is a matter of vital importance to the American people. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. CANDLER of Mississippi. I desire, Mr. Chairman, to incorporate in my remarks a further discussion of this item in this bill, prepared by Hon. Charles J. Brand, Chief of Office of Markets and Rural Organizations.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

The statement prepared by Mr. Brand is the following:

MEMORANDUM REGARDING INCREASE IN APPROPRIATION FOR THE OFFICE OF MARKETS AND RURAL ORGANIZATION.

GENERAL CONSIDERATION.

"An increase is recommended for this branch of the work because this is a new organization which has necessarily been feeling its way, but which has now done the preliminary work which has brought it to the point where definite services of far-reaching importance can be performed. It has developed a viewpoint and personnel which justify the expectation of exceptional usefulness in several specific fields.

"Before outlining the exact lines of work upon which this increase will be spent, I wish to say that the money already spent in what may be called preliminary work has produced valuable results, for this office has been of material assistance to Congress in framing at least four important economic measures, one of which—the United States cotton futures act—has become a law, and its enforcement is now in the hands of this office.

"The second is the United States warehouse act, which has passed both Houses in different forms and which we confidently expect to see enacted before the close of this session.

"The third is the United States grain grades act, which has just passed this House by an overwhelming vote; and the fourth is the United States cotton standards act, which is now before this House with a favorable report from this committee, and it may be said in passing that this is really the most far-reaching measure of all.

"Had the Office of Markets and Rural Organization rendered the country no other service, its existence would be amply justified and the money appropriated for its use would have yielded a very satisfactory return. This, however, is far from the case. From the work already done we have every reason to expect as great help from this office when we are ready to consider the regulation of cold storages and commission houses, and inspection service under suitable supervision, and other economic questions already pressing for attention.

"The increase recommended will enable the office to actually set in motion new services of direct money value to the public, as well as important fundamental investigational work, upon which in the end improvements in our marketing system will rest.

"The regular lines of work in this office were presented to the committee in some detail when the hearings were held for the annual appropriation for the present fiscal year. These include cotton handling and marketing; cooperative purchasing and marketing; market surveys, methods, and costs; market grades and standards; city marketing and distribution; trans-

portation and storage; miscellaneous problems in marketing and collaboration; marketing by parcel post and express.

"The work on these projects will be continued necessarily under the appropriation here proposed, but the added amounts beyond those absolutely necessary to provide for slight additional growth will be devoted to three new projects, namely, marketing live stock, meats, and animal by-products; marketing business practice; and grain-marketing investigations; and to the extension of the market news-service work in the form of a demonstration under the project established last year, entitled 'Market surveys, methods, and costs.'

"In addition this office is charged with the work which has to do with rural credits, agricultural insurance, and rural social and educational activities, the appropriation for which during the current year is carried in the miscellaneous section of the last agricultural appropriation bill. In the plan of reorganization all of this work has been included in a single administrative unit.

"The character of the work and its importance warrants a slightly more detailed discussion of it than usual and will be taken up under the headings suggested above.

MARKETING LIVE STOCK, MEATS, AND ANIMAL BY-PRODUCTS.

"Considering the importance of the great market centers which handle a large proportion of the live stock sold in the United States, a thorough study of the organization, equipment, methods, and charges for services rendered at these markets is essential to the interest of all who produce or consume animal products. In this work special attention will be given to the efficiency of methods and reasonableness of charges for feed, yardage, and handling of live stock. It should be determined whether the prevailing rates and customs are equitable and whether the regulations in force operate to the advantage of patrons to a reasonable degree. In the nature of our marketing system these central markets should be regarded as public-service institutions. In view of the interstate character of the bulk of shipments passing through them, they are to a degree a proper subject for Federal control, at least so far as may be necessary to insure fair and efficient service.

"Transportation facilities to and from the market centers likewise determine in a large measure the economy and dispatch with which farm live stock and their products may be marketed. Hence there are numerous railroad problems which vitally concern the stockmen, not only regarding freight rates, but availability of cars, stock train service and accommodations, proper loading facilities, feeding stations en route, live-stock contracts, and liability of carriers for loss and damage.

"The sale of farm live stock involves peculiar problems in localities where farmers have less than carload lots for sale. Even in the older cattle and hog feeding districts a considerable proportion of stock must be disposed of in small numbers at a time. Local buyers or speculators frequently impose large margins of profit in handling their purchases and form little trusts among themselves to maintain such margins in a community. Farmers' cooperative live-stock shipping associations within recent years have proven a successful means of avoiding some of the costs of the local middleman's service, and an extension of this movement in various parts of the country offers an exceptional opportunity for aid on the part of the Federal Department of Agriculture.

"Classification and grading of live stock and meats, both at the market centers and in local communities, will be given careful study with a view to establishing standards of quality among dealers, instructing producers of live stock as to market demands and conducting a campaign of education among consumers, looking toward a more rational and intelligent selection of meats. Such a standardization would render market quotations more uniform and intelligible, and thereby enable stockmen to operate with greater confidence and precision.

"In different parts of the country where live-stock production is new and undeveloped, as, for example, on western irrigation projects and in parts of the South, where diversified farming is being developed, marketing problems arise which demand prompt and intelligent aid. Adequate help in the solution of these problems can only be extended by Federal agencies, and this work is to be provided for by the Office of Markets and Rural Organization. On the other hand, certain localities and individuals have developed methods of marketing which possess features of marked efficiency, and it should be the function of the Office of Markets and Rural Organization to disseminate the knowledge and encourage the use of these methods in other localities where they are feasible. Examples of this kind are the direct marketing of home-prepared meat products, especially farm-cured hams, bacon, and sausage, municipal and cooperative slaughtering and curing plants, live-stock shippers' associations, and other forms of cooperation, and the shipment of meats by parcel post.

"Specific and first-hand information is needed regarding the actual cost of marketing live stock and distributing meats and animal by-products as an indication of the efficiency of present market methods, and the margin of profit realized by each class of middleman who participates in the operation. Charges of extortion are freely made, and there is a lamentable lack of cooperation among all parties involved, from the producer to the consumer. Authentic figures representing the entire transaction in detail are almost entirely lacking, and it is desired to conduct carefully planned investigations which will serve as a basis for just conclusions regarding the legitimate and proper place of each class of middleman involved. Information of this kind can not fail to bring about a better understanding and a more confident attitude on the part of producer, middleman, and consumer, and thereby react favorably upon the entire live-stock and meat industry.

MARKETING BUSINESS PRACTICE.

"The marketing of agricultural products is a business, and as such, in order to bring the greatest returns to the producer and lessen the price to the consumer, marketing must be conducted in a thorough businesslike way. The farmer is expected to be both manufacturer and salesman. Selling—marketing—is a tough proposition, even more so for farm products than for many manufactured articles. The farmer needs help on it. His physical force is almost exhausted by the work of production.

"While we have considerable literature dealing with the business problems of industrial and commercial enterprises and volumes on cost accounting and efficiency engineering for manufacturing establishments, wholesalers, retailers, municipalities, etc., we have no literature on the fundamental requirements, from a business standpoint, for the proper conduct of cooperative purchasing and marketing organizations and other agencies engaged in the marketing of agricultural products. There is no place where information can be obtained relating to plans of financing farmers' organizations. The requirements for accounting systems and auditing, data relating to modern appliances for offices, methods of obtaining cost per unit of doing business, processes and plans for the elimination of wastes, and other business essentials are unfamiliar to practically all farmers' organizations.

"Realizing the above, and encouraged by the results obtained in helping the farmers' elevators and farmers' produce and fruit exchanges of the country, by the devising of accounting systems, which have been praised by all who have come in contact with them, and by the demand for information that would place marketing agencies on a sounder and safer business basis, it is considered necessary to give concrete and specific help on the business side of marketing. The best results in improving business methods of farm marketing agencies can not be secured by investigations alone. The information gathered must be disseminated in every possibly way and especially by well-planned demonstrations.

"If we can prevent the failure of one-tenth of the farmers' elevators which annually fail in this country, due to a lack of knowledge as to certain essential business requirements, it is estimated that we will have saved the farmers in one year several hundred thousand dollers. Over $100,000 were lost in one year in a northwestern grain State through the failure of farmers' elevators, due to the inefficient business methods employed in their operation. We are told that it costs a certain percentage of the sale price of a product to handle it on a commission basis; that it costs so much to handle a bushel of grain through a local elevator; and that the cost of marketing a pound of butter from the creamery to the retailer is so much, and yet we have no accurate information on these costs. To successfully eliminate waste we must secure the accurate costs of each step in the marketing and distribution of agricultural products, in order that unnecessary wastes and excessive profits may be discovered and eliminated.

"The Department of Agriculture, in the Office of Farm Management, is now engaged in investigating farm bookkeeping and farm cost accounting, and devising systems for keeping farm records, realizing that proper accounting is one of the great needs of the individual farmer. If with his limited knowledge of accounting principles the average farmer is not able to keep such accounts as should be kept for his own farm, how can he be expected to handle a good system of accounts and efficient plan of operation for the marketing of his products? If it is necessary to improve the business of the farmer with relation to his production, is it not as essentially necessary to improve the business of marketing those products?

"It is the purpose of the work above outlined not only to be helpful to the farmers' organizations, but also to give the individual farmer in his marketing business such helpful assistance as may be possible.

"All the various marketing agencies should keep proper accounting records. So doing should eliminate unnecessary wastes and help to place the marketing of agricultural products upon a business basis. This is necessary before the producer can receive an equitable value for that which he produces.

GRAIN-MARKETING INVESTIGATIONS.

"Up to the present time such investigations of the marketing of corn, wheat, oats, barley, rye, and other grains as have been conducted have been carried on under the funds set aside for the project entitled 'Miscellaneous Problems in Marketing and Collaboration.' This was due to the fact that the importance of grain-marketing investigations was not recognized, but because the problems in connection with the inauguration of the work in the marketing of perishables were believed to be more acute.

"The development of the office has now progressed to a point where it is important that grain-marketing work be instituted. The following general topics will serve to indicate the direction which the work will take: Studies of the primary marketing of spring and winter wheat, including especially the uses and abuses of dockage in the first sale and the comparison of results in the case of grain passing from the farmer to the line elevator and to the farmers' mutual elevator; the various methods of marketing corn, both for the domestic and export trade, to be studied and compared and especial attention given to the marketing of southern corn. The crop of the South, in a general way, matures almost 30 days in advance of that of the grain belt, but because of inadequate handling and distributing machinery it is not harvested and gotten onto the market in advance of the huge crop of the Middle West. A distinct and fair commercial advantage is thus lost.

"A study of future grain transactions and exchange practices similar to that which has been conducted in future cotton markets should be undertaken. This will involve, among other things, the determination of the relation of cash prices of wheat to future quotations, the effect of the character of the future contract on prices and especially a study of the benefits of hedging. Other topics include the comparison of the 'spread' in marketing of various grains, with the possible suggestion of methods for its reduction; the investigations of grain-storage practices in primary point and terminal elevators; scalping practices and the function of scalping in the large markets, commission methods in the grain trade; mixing practices at terminal elevators, and the effect of mixing on prices of higher grades; a study and comparison of the various grading and inspection methods in use to determine their relative efficiency in economical marketing; the advisability and desirability of uniform grades; 'inspection in' as compared to 'inspection out'; investigation of the efficiency of farmers' cooperative elevators as compared with private and line elevator systems; warehousing practices in the grain trade; and track selling and the cost of marketing grains by the various methods in vogue.

MARKET-INFORMATION SERVICE.

"The project entitled 'Market surveys, methods, and costs' embraces a number of those phases of the work of the office in which the public has manifested universal interest and to which the shippers of perishable products look for the earliest and most tangible results. There is a general feeling that this office should build up an information service, both as to crop movement, market receipts, and prices, which will be prompt enough to give to the entire shipping public the facts which are now available only to the larger distributing organizations, and which each obtains for itself at an excessive cost. We plan to institute a series of reports day by day of car-lot movements of specific crops out of certain important producing districts, reporting the destinations and the movements from diverting points as far as practicable. This information can be obtained from many important transportation lines and their agents, and it is of the greatest importance, especially to shippers of perishable products, to know what is going out simultaneously from competing producing areas. A general dissemination of this information must result in a wiser distribution, in fewer needlessly glutted markets, and in more uniform and fairer prices in all the markets. Much of this information, so far as it relates to perishable products, will ultimately have to be handled telegraphically if it is to be an effective instrument in the improvement of marketing conditions and the stabilizing of prices.

"This is a work which can not be done on a very small scale. If undertaken at all, it must cover at least the commercial movement of one entire crop. This means that there must be a considerable office force ready to give instant attention to the telegraphic information and to compile it and prepare it for telegraphic release with the least possible loss of time. Fortunately, the office force and equipment which will make possible the handling of one crop will also enable the department to handle several crops coming on the market in succession. It will, however, require a somewhat larger field force to secure the necessary information on the movement of four crops than on the movement of one. True economy will, therefore, be effected if the technical field force is increased to the point where it can check up all the information which is being received and tabulated in the office.

"This service to accomplish its greatest good must be supplemented by a system of disinterested reports on conditions existing in the principal distributing centers where the car-lot shipments are inspected and sold. The department must know the actual prices paid for specific typical cars of produce, must have its own information on their condition, and must be able to furnish disinterested information and advice which will enable shippers to improve the quality and condition of their products on arrival, thus insuring better prices. A study of the quotation machinery of many of the important markets has shown that the shipper receives little useful information from such figures as are furnished him.

"The office has already the nucleus of the necessary force, made up of men who have had experience at both the producing and distributing end, several of whom have made a special study of terminal market conditions in a number of our most important cities during the present year.

"The increased amount included in the bill which it is planned to expend in this work is not sufficient to establish a comprehensive price-reporting service for the entire country or for all products, but will finance a sufficient field and office force and provide for enough telegraphic service to handle about four products which succeed each other in the markets and which are shipped over long distances.

"The logical development of this service will inevitably cost money, but it will as certainly assist in securing a better distribution and more economical marketing of farm products, and is the only means yet devised or suggested which promises to reduce the number or frequency of glutted markets. The increase for this phase of the work is confidently recommended as an investment which will yield immediate and profitable returns.

"The investigations of the Office of Markets and Rural Organization so far attempted have opened a wide field of study, suggestion, and field demonstration along the line of grading, packing, standardizing, distributing, and marketing of practically all our farm products. The economical feeding of the Nation demands that intelligent help be given both the producers and consumers along these lines. The present force of this office is wholly inadequate, both as to numbers and equipment, to undertake the lines of work that seem most urgent, to say nothing of the constant requests of producers and consumers from all over the land for assistance along their own special lines."

Mr. LEVER. Mr. Chairman, I make a point of order on the amendment.

The CHAIRMAN. The Chair thinks that the amendment offered by the gentleman from Texas [Mr. SUMNERS] is clearly new legislation, and he sustains the point of order against it. The Clerk will read.

The Clerk read as follows:

To enable the Secretary of Agriculture to make studies of cooperation among farmers in the United States in matters of rural credits and of other forms of cooperation in rural communities; to diffuse among the people of the United States useful information growing out of these studies, in order to provide a basis for a broader utilization of results secured by the research, experimental, and demonstration work of the Department of Agriculture, agricultural colleges, and State experiment stations, $35,920.

Mr. MOORE. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE] moves to strike out the last word.

Mr. MOORE. This item, Mr. Chairman, provides in part for a diffusion amongst the people of the United States of "useful information growing out of these studies, in order to provide a basis for a broader utilization of results secured by the research, experimental, and demonstration work of the Department of Agriculture, agricultural colleges, and State experiment stations," and the appropriation provided is $35,920.

I desire to comment upon this paragraph in order to have the committee thoroughly understand the difference between this kind of an appropriation and the appropriations contained in a bill that was recently before the House and which has now gone to another body, where it is threatened with destruction because

it is a so-called "pork-barrel bill." The rivers and harbors bill which passed this House, and which was subjected to a very close scrutiny, had the interest of no salaried officers of this Government, save those, perhaps, who are employed in the War Department in the Corps of Engineers; and I venture to say that no man will contradict me in the statement that not one of those engineers had anything to do with the passage of the rivers and harbors bill because their salaries were involved. Their salaries are assured under the general operation of the War Department, and it would avail them nothing to lobby the bill through this House.

The river and harbor bill provided a total appropriation of $31,000,000 to carry on a great structural work of the Government, involving the employment of labor in every section of the country and in every State of the Union. That was work that meant the making of revenues for the Government and an increase in the business and the material of the Government. I call attention to that work now threatened with destruction and contrast it with this bill, because we here propose to appropriate approximately $36,000 of a total of $22,000,000 for a purpose which is so built up in words that as we read it we have to pause to understand what it means: To diffuse—not to work, not to labor, not to construct, not to create revenue, but to diffuse—among the people of the United States "useful information growing out of these studies, in order to provide a basis for a broader utilization of results secured by research, experiment," and so forth. This means brains, for sure, against——

Mr. NORTON. Does the gentleman argue that that information should be boxed up rather than diffused?

Mr. MOORE. Not at all. It may be very valuable information, but I question whether it can be placed in the same relation with the labor-creating work, with the constructive work, with the revenue-producing work, with the trade-promoting work, contemplated in the river and harbor bill, which has been subjected to very great abuse in both bodies of the National Congress and before the people.

Mr. YOUNG of Texas. The purpose of river and harbor construction is to carry trade, ultimately, is it not?

Mr. MOORE. Yes.

Mr. YOUNG of Texas. Does not the gentleman think this will go hand in hand, finding markets for these farmers, so that they can use these boats to carry their produce?

Mr. MOORE. I think the gentleman is entirely correct in that, and I want to say that these two lines of work should go hand in hand; but I am making this criticism because there seems to be a tremendous influence in Washington that is able to carry through an Agricultural bill, while there are no salaried officers in various branches of the Government, scientists and experimenters, as it were, to stand behind the river and harbor bill. And say what you please as to the river and harbor bill, there is no lobby in Washington made up of men paid by the Government of the United States to urge it forward. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANAHAN. Mr. Chairman, I desire to make a few observations on this paragraph, which provides for the study of cooperation among farmers and the diffusion of knowledge resulting from that study. And in doing so I call attention of the committee to the amendment proposed by the gentleman from Texas [Mr. SUMNERS] a few moments ago, and which I fear was not understood or appreciated by the members of this committee.

To my mind no more important amendment has been offered in the whole course of this discussion, nor is there a more important section in this bill than the section now under consideration. As the gentleman from Texas suggested, it is all very well for the Department of Agriculture to teach farmers how to raise more crops, but larger crops do little good if those crops and the profits of them are taken from the farmers by combinations and monopolies in the market place. The gentleman's suggestion that there ought to be an exchange operated by the Government which would make the transfer of the farmers' products directly to the consumer without graft or the exaction of undue profit is the most valuable suggestion yet made in the whole consideration of this bill. There is not an open market place in the whole United States for the great staple products of wheat, corn, oats, barley, and cotton. There is no place where they can be dealt with as merchandise upon their intrinsic value. The Chamber of Commerce of Minneapolis, the Board of Trade at Chicago, and such organizations elsewhere have a grip upon the market place under existing laws that makes it utterly impossible for the farmers' produce to get a square deal; and if this Government had wisdom, it would create for the benefit of the farmers of this entire Nation an exchange, an open market place, where the gamblers would not be permitted to destroy values during the seasons when the farmers must sell, and would not be permitted to exploit the consumer all the time by making the spread between the farmer's price and the consumer's price wider than it should be.

I repeat that if there was a Government exchange operating honestly, the farmers would get more for their produce and the consumers would pay less for what they have to buy in order to live. Yet this important amendment went out on a point of order; and gentlemen on this floor hardly stopped conversation to listen to its being read, and gave it no consideration whatever while its author was making its meaning clear and urging its passage.

I am not criticizing the Committee on Agriculture for making this point of order, because I recognize the fact that the able chairman of this committee has been working along the line of marketing; but I insist that if this House did its full duty it would pass this amendment as separate legislation. It is more important than this subdivision of the bill under consideration; infinitely more important than that of experimental farms and of scientific farming, elsewhere provided for, because, unless you make the market place an honest place and guard against price manipulation and control, the amount of the crop, the skill in raising it, the transportation problems, and other reforms all go for nothing, and all of the profit is reaped, as I deliberately say it has been for over a quarter of a century, by gamblers in the pit, so-called future traders in cotton and grain, who do not steady the market, as claimed, but rather make it fluctuate and change to serve their gambling purposes. When this great Agricultural Committee and this House acquire sufficient comprehension of the great problem of marketing and learn its evils they will destroy future trading as a first step and then make the market an honest, fair, and open market. When they do this and provide a system of honest inspection this House and this committee will be serving this entire Nation to a degree that they have not yet approached in the consideration of agricultural legislation. [Applause.]

Mr. THOMPSON of Oklahoma. Mr. Chairman, I move to strike out the last two words, for the purpose of asking the chairman of the committee a question. In view of the appointment of a commission to visit Europe to investigate the matter, and the further fact that the Banking and Currency Committee of the House and Senate have prepared bills on this subject, what is the necessity of this paragraph with reference to rural credits?

Mr. LEVER. This item is for the study not only of rural credits but of other means of cooperation among the rural population—the study of rural insurance; the study of rural communication; and other problems of rural cooperation.

I think they have only one man in the department now who is studying rural credits, and I heard the distinguished gentleman from Indiana [Mr. Moss], who knows as much about this subject as any man, say that this gentleman's presentation of it to the Banking and Currency Committee was the strongest presentation made at all.

Mr. THOMPSON of Oklahoma. I want to ask a few questions of the gentleman. The Secretary of Agriculture in his report for 1914, on page 26, used this language:

> There seems to be no emergency which requires or justifies Government assistance to the farmers directly through the use of the Government's cash or the Government's credit.

Then he goes on further, and uses this language:

> It is the judgment of the best students of economic conditions here that there is need to supplement existing agencies—a proper land-mortgage banking system, operating through private funds, just as other banking institutions operate, and this judgment is shared by the leaders of economic thought abroad.

Now, the Secretary seems to have all the information he wishes to form an opinion as to the character of the banks that ought to be established. Why make an appropriation for a subject which the Secretary has expressed an opinion on already.

Mr. LEVER. The judgment of the Secretary is not going to control the expert information gathered under this appropriation. I do not know personally whether the gentleman referred to a moment ago by me—Mr. Thompson, I think his name was—concurs with the Secretary in that regard or not. I have not discussed it with him because it does not come under my jurisdiction.

Mr. THOMPSON of Oklahoma. For the fiscal year ending June 30, 1914, there was an appropriation of $50,000 carried for this identical purpose, and for the fiscal year ending June 30, 1915, the current year, there was an appropriation of $200,000 carried for this purpose.

Mr. LEVER. Not for this purpose. This is an item carried separately, a separate item in the bill that has been transferred to this work.

Mr. THOMPSON of Oklahoma. It covers the same subject matter.

Mr. LEVER. The gentleman is mistaken; the first appropriation for the Office of Markets carried $50,000, and there was a separate item of $40,000 for this work, and now they have combined the two under one management.

Mr. THOMPSON of Oklahoma. Two hundred and fifty thousand dollars has been appropriated.

Mr. LEVER. Not for the study of rural credits, but for the general problem of marketing, and so forth.

Mr. THOMPSON of Oklahoma. The Secretary of Agriculture seems to have formed a definite opinion as to rural-credit institutions that ought to be established.

Mr. LEVER. This is not all for the study of rural credits.

Mr. THOMPSON of Oklahoma. As I understand it covers all the items contained in rural credits and other forms of cooperation in rural communities. It covers the items on pages 70 and 71 down to line 19. But that $250,000 has been carried in a previous bill and covers these two items.

Mr. Chairman, I feel that it is a waste of the people's money to make this appropriation for the Department of Agriculture to experiment on the subject of rural credits and marketing farm products. Before an effective system of marketing farm products can be established it is necessary that we establish a system of rural credits which will supply the farmers of the country with money on long time at a low rate of interest. A banking and currency system for the farmers is just the opposite of a banking and currency system for those engaged in commercial pursuits. A commercial banker is engaged in congregating the money of a community in a common fund to be loaned to the people of that community. These funds are taken by the bank as demand deposits, and necessarily the bank must be in position to repay these deposits at any time they are called for. This renders it necessary for the banks to loan on short time, upon such security as will insure the payment of the obligation at maturity. In other words, the bank can only deal in paper having an early maturity, and known in commercial banking as liquid assets—that is, commercial paper which can at any time be converted into money. On the other hand, the function of a rural credit system of banking is to assemble the assets of a community and secure an advance of money on them. One is to assemble the money and loan it; the other to assemble the securities and secure money on them. The commercial banker must loan for a high rate of interest on short time, while the farmer must secure his money for a long time at a low rate of interest. Both the Moss-Fletcher bill and the Bulkley-Hollis bill provide a system of rural-credit banks to be incorporated under the terms of the different acts, privately owned and controlled. These systems would necessarily be conducted for dividend purposes, and this would defeat the whole purpose of a rural-credit banking system, which is to lower interest rates to the farmers. The more I have thought on this subject the more I have become convinced that the whole subject ought to be taken in hand directly by the Government, without the intervention of banks of any character, even though the banks should be organized and financed by the Government.

I have arrived at this conclusion: First, by reason of the great cost of establishing and maintaining such a system as provided in the Moss-Fletcher and the Bulkley-Hollis bills would entail, which cost, of course, would have to be paid by the borrowers and would to that extent increase the interest rate; and second, because of the red tape that would be encountered by the farmers when they applied for a loan. Only last fall, when the cotton farmers of the South were forced to sustain a loss of nearly $400,000,000, and from $30,000,000 to $35,000,000 of this loss fell on the Oklahoma farmers, a pool of $135,000,000 was raised to loan them on their cotton. It was announced that the amount of the loan would be $30 per bale at 6 per cent interest, running for one year, with the privilege of renewal at the option of the borrower for an additional period of six months. When the fund had been subscribed and the promise of great relief was made to the farmers the Federal Reserve Board so hedged the fund about with restrictions and regulations and red tape that only $12,000 of that vast sum that promised so much relief has been applied for. The newspapers on yesterday carried a news item that the pool was to be dissolved on February 1. The item reads:

COTTON FUND TO END FEBRUARY 1—RESERVE BOARD BELIEVES LOAN PLAN HAS ACCOMPLISHED ITS PURPOSE.

Unless there is an unexpected increase in the demand for loans the $135,000,000 cotton loan fund will end its existence shortly after February 1. Then subscriptions of banks through the North, West, and East will be canceled and southern bankers and cotton men left to finance the surplus crop in their own way.

Up to date applications for loans from the fund amount to about $12,000, and officials here say they have no reason to believe that there will be any more applications before the period for making them expires, February 1.

Members if the Federal Reserve Board said yesterday that, in spite of the few applications, the loan fund had done its work in keeping up the confidence of the cotton men at a time when confidence was needed.

The rules and regulations concerning the loaning of this fund were such that the farmer—the actual producer—could not take advantage of it. One of the regulations governing the fund was that no loan be made on cotton in less than 100-bale lots. This regulation necessarily precluded the actual producer, except in rare instances, from securing the benefits of the fund. For this reason I foresee that the borrower will obtain little relief from any system of rural-credit banking that is enmeshed by a lot of red tape and numberless rules and regulations prepared by clerks and janitors who feel that they must add dignity to their positions.

I heard the gentleman from Arkansas [Mr. CARAWAY] discuss his bill the other day, and I see no reason why the plan he outlined is not practicable and feasible. It provides a farm-loan department in one of the bureaus here in Washington, and the gentleman from Arkansas, in discussing the bill and outlining its provisions, said:

To procure a loan under the provisions of this bill all the machinery for its operation is local. The farmer desiring a loan would apply to his postmaster, who would appoint two committees of people residing in his community, and these committees would appraise the lands at their fair value, and the improvements would also be appraised at their fair value, but separately. These appraisements would be turned in to the postmaster, and the postmaster and the chairman of the two committees would revise the appraisement and forward to the commission at Washington, and from that appraisement the amount to which the applicant is entitled would be determined. The title to the lands would be determined by an abstract furnished by the applicant and examined without cost by an agent of the Government. If the Torrens system of registration of land title prevailed, the certificate of the State is made, under this bill, sufficient evidence of title. Inasmuch as that system is so much cheaper and safer than abstracts and title guarantees, this bill would hasten the day when all States would adopt that system of land registration. The loans are to be guaranteed by the Government, though the Government would put no actual capital in the system. It guarantees the repayment of these loans as it guarantees the circulating medium of the national banks and Federal reserve notes. It does under this for the farmer only what it has done for the merchant, doctor, banker, lawyer, and manufacturer in the banking laws as they are now written. An applicant for a loan under the provisions of the bill does not name the rate of interest, but his securities are placed on the market and sold at par to the one who is willing to accept them at the lowest rate of interest, thereby putting the farmer in touch with trust funds and savings-bank accounts and all moneys that are seeking an absolutely safe long-time loan and would procure for the farmer as low rate of interest as the bonds of our Government command in any market of the world. Not only will it attract domestic capital, but foreign capital willing to invest in our Government bonds would be willing and anxious to invest in these securities and at the same rate of interest. In addition to the interest that the farmer will be compelled to pay, he will pay some per cent to be determined by the commissioners as an amortization fund, which fund will be a trust fund held in the Treasury, to be deposited in banks or loaned, as the commission may prescribe. The holders of the securities may cash their interest coupons at interest-paying dates at any post office or national bank in any State or Territory of these United States.

These funds are exempt from taxation in exactly the same way and for the same reason that the Federal reserve act exempts from taxation the resources of the regional and member banks. The security upon which the loan rests will have been taxed in the community where it is situated, and to tax the loan would be double taxation, and therefore increase the rate of interest the farmer would be compelled to pay.

The bill provides, further, that the loans shall be issued in series of 5, 10, 15, 20, 25, or 30 years, at the option of the borrower, but where a loan is for a period greater than five years the borrower has the right at any interest-paying period to pay the entire indebtedness or $100 or any multiple thereof, and on the sums so paid all interest payments will cease.

Until a successful system of rural-credit banks is established it is idle to talk about establishing a system of marketing farm products, for the reason that as long as the farmer is compelled to pay the heavy rates of interest which he is forced to pay in Oklahoma, and which run from 10 to 36 per cent, he is forced as soon as his crops mature to throw the same on the market, no matter what price he may obtain therefor, in order to pay his banker or his merchant, who have carried him for the amount he owes them, and thereby stop the accumulation of interest. If a successful system of rural credit banks is established so that the farmer can secure money on his assets on long time at a reaonable rate of interest, he will be in position to withhold from the market his products and sell them as the consumer's needs demand, thereby cutting out the profit of the middleman, and enabling the actual producer to secure the full value of the product of his toil. The object of a rural credit system of banking is to put the farmer in direct touch with the man who has money to loan and cut out the profit of the middleman, enabling the farmer to secure money on the same terms that those engaged in commercial pursuits now ob-

tain it, and the object of the bureau of marketing farm products is to enable the farmer to sell direct to the consumer, thereby cutting out the profits of the middleman and secure the full value of the crops which he produces.

I am convinced that the Government could not exercise its activities in a line fraught with more good to our country than by establishing both these systems. In 1913 Congress remained in extra session from April 7 until the convening of the regular session in December in order to perfect a system of banking and currency which would afford relief to the commercial interests of our country. The Democratic platform at Baltimore declared:

> Of equal importance with the question of currency reform is the question of rural credits or agricultural finance. Therefore we recommend that an investigation of agricultural credit societies in foreign countries be made, so that it may be ascertained whether a system of rural credits may be devised suitable to conditions in the United States. * * *

Mr. Chairman, I am in favor of making good our promises to the people of this country. I can not understand how Members of this House, who vote for an Army appropriation bill carrying, in round numbers, $130,000,000; a Navy appropriation bill carrying $148,000,000, in round numbers; a rivers and harbors bill carrying $34,000,000, in round numbers; and for every bill which increases the appropriation for salaries of Government employees, vote against every proposition advanced for the benefit of the American farmer, on whose back every one of these different organizations ride.

I am not in favor of, nor does the farmer desire, any special privilege in this country, but when we can appropriate $35,000,000 to build a railroad in Alaska—$1,000 for each person in that far-distant Territory—and $40,000,000 to build or purchase ships to carry the commerce of our country on the high seas, it does seem to me that those who ask us to so vote ought to be willing to vote to assist more than 40 per cent of the people—the farmers—when they are threatened with financial ruin and bankruptcy. I shall continue to vote against the Army, the Navy, and the rivers and harbors bills, as well as all other appropriation bills, until the farmers and producers of this country receive justice at the hands of the Congress.

I hope an extra session will be held in 1915 to grant the same relief to the farmers and producers of the country as was given the commercial and banking interests in 1913. I am willing and anxious, though I have been here now nearly constantly for the past two years, to remain another year in order to perfect the rural credit banking system and the marketing of farm products system, which I regard as absolutely necessary to the future prosperity of our country. I therefore indulge the hope that the President will call an extra session of Congress to perfect these bills and grant relief to the farmers of the United States from the extortionate rates of interest which they have been compelled to pay by dividing the profits of their toil with the middlemen.

In conclusion, Mr. Chairman, I desire to say what is in the minds of all here, that the expenses of this Government finally rests on the backs of the tillers of the soil, and that they expect us to vote and speak for them. So long as they honor me with a seat in this House I shall raise my voice and cast my vote as will most promote their interest and their prosperity.

Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The Clerk read as follows:

In all, for general expenses, $352,650.

Mr. GOODWIN of Arkansas. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 71, line 19, insert the following:

"NATIONAL MARKETING COMMISSION.

"That the President be authorized to appoint a national marketing commission, to be composed of nine members, five of whom shall be engaged in agricultural or horticultural pursuits and four of whom shall be selected with special reference to their knowledge of commerce, finance, transportation, and law, and who shall receive compensation not in excess of $7,500 each per annum.

"And furthermore, that said commission shall meet in the city of Washington, at a time designated by the President, to organize by the election of officers and to adopt a plan of action for the effective organization of the States, counties, and localities of the United States, to the end of securing the economic distribution of the products of the farm, orchard, and garden.

"Said commission shall, furthermore, be empowered and directed to act with such organizations and individuals as may elect to become part of the national marketing system, when such organizations and individuals may have been authorized by said commission to cooperate to that end."

Mr. LEVER. Mr. Chairman, to that I reserve a point of order. As I understand, Mr. Chairman, there are three gentlemen who want to be heard on this proposition; and, while it is getting late and I am anxious to get through with the bill, I think, in courtesy to them, I shall ask that all debate close in 15 minutes.

Mr. MANN. Reserving the right to object, as I understand, it is the intention of the gentleman to ask that the committee sit in session until the bill is finished and to pass it to-night?

Mr. LEVER. Yes.

Mr. MANN. How many more amendments of this character, which they know will not go into the bill, but upon which they want to talk, are to be offered?

Mr. LEVER. I know of no more that will provoke discussion. I have one committee amendment.

Mr. MARTIN. Mr. Chairman, while we are on this subject, I want to say that I have an amendment.

Mr. LEVER. It seems to me that we ought to get through by 6 o'clock.

Mr. MANN. I thought we ought to have finished the bill by 3 or 4 o'clock, but I am perfectly willing to stay.

Mr. LEVER. The gentleman understands that I am anxious to finish the bill, but the bill is made up in such a way that I am at the mercy of these gentlemen.

Mr. MANN. Oh, I do not think that; but I think we ought to have a reasonable discussion.

Mr. GOODWIN of Arkansas. Mr. Chairman, this amendment will go out on a point of order, but I desire to thank the chairman for his generosity in giving 15 minutes to the discussion of the proposed amendment.

The Agricultural Department has done much in the past few years in speeding the farmer up to a greater production in the output of the soil. He has been taught to make two blades of grass grow where only one grew before. But little has been done to find a market for the product of the farm. The gentleman from Texas [Mr. SUMNERS] and others who have preceded me have made appropriate remarks by saying, substantially, that every bushel of corn or potatoes or product of the farm or the garden that may go to waste is paid for by somebody in the centers of population. The trouble with this country, of course, is that we have not the cooperative spirit that obtains in the European countries, and especially among the German people. We have been taught to rely entirely upon our individual efforts. Individualism has been accentuated and emphasized in this country to the exclusion of cooperation. Now, I know this proposed amendment will go out upon the point of order reserved by the chairman, but I have an object in this as well as the other Members who are desirous of addressing the committee. I want to lay stress upon and emphasize as much as possible the great importance of this matter, in order that the same may be crystallized in the minds of the membership of this House as well as the incoming Congress.

We are in great need of something like this. Now the joint resolution 344 was not the product of my imagination altogether. The gentleman from North Dakota [Mr. NORTON] and other Members of the House, Senator FLETCHER and one or two other Members of the Senate, as well as Mr. Lubin, including Dr. Owen, the secretary of the Southern Commercial Congress, got together and thought out this resolution, and I was selected to introduce it. This proposed resolution now before the committee, however, is a substitute for the resolution, because it was thought by its friends to be more practicable at this time.

The bill before the committee at this time goes only to the extent of "acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing and distributing of farm and nonmanufactured food products, and the purchasing of farm supplies," and so forth.

I appreciate the necessity of acquiring necessary data and proper diffusion of the same among the people, but data and statistics alone will not bring relief either to the people who grow surplus agricultural products or to the consumer thereof. What we need is not so much data, but the inauguration of a movement whereby the producer and consumer may be brought into closer relationship, to the extent that many of the middlemen now making fabulous fortunes off products of the country may be eliminated, thereby causing the grower of agricultural products to obtain a higher price than he is now receiving and at the same time permitting the consumers of these products—the people who reside in cities and crowded centers—to purchase the same at a cost less than now obtains.

I am not informed as to the value of agricultural products that annually go to waste by an improper distribution, but it runs, I am quite sure from the best information I can gather,

into hundreds of millions of dollars. In addition all of this waste is not an additional loss. The producer of many of the articles that are marketed receives an inadequate price therefor, not only on account of the intervention of so many middle men, but for the further reason that without a coherent system the farmer does not know of a market for the sale of his stuff.

Those of us who have been observers know that without a system of marketing and cooperation many products reach a city only to find that city overcrowded with a great surplus of similar products, with the result that if a sale is effected it will be a sacrifice, and frequently the price obtained is insufficient to pay the transportation charges. Speaking concretely, I recall in my own county several years ago many of the farmers there undertook to diversify their crops, and with a degree of cooperation in the raising of Irish potatoes. They set to work early in the spring, planted their potatoes, reaped an early harvest, and put the same upon the market in St. Louis and elsewhere, with the result that few of them, as I recall, received enough for their potatoes to pay the railroad transportation charges. These products reached their destination only to find that the market was flooded, so to speak, with potatoes that had just been received a day or so before.

Now, such a thing as this would not happen if we had a national marketing commission, properly linked and correlated with similar State, county, and local organizations, all working and cooperating to a general purpose to find a market for everything to be marketed at the best price to be obtained, and with as little cost as possible for transportation charges, and thus bringing more nearly together the producer and consumer.

I have been told by several of the Members from the California delegation that a number of years ago tens of thousands of California fruit of all kinds were thrown overboard into the Pacific Ocean to be disposed of for the reason that a market could not be found for these products, and when a thing like this happens the farmer who loses his vegetables, his potatoes, corn, or what not, is not the only loser; the people who are compelled to buy these things, on account of this loss, are thereby forced to pay a higher price for that which they purchased on account of this loss.

I know of no two subjects that so vitally affect the great masses of the people of this country, especially the great farming class of people, who, by their toil, feed and clothe the world, as a failure for the Congress to provide a proper national marketing commission, such as this amendment of mine purposes to create, and another as well—a failure to enact a proper rural-credit law to enable the farmer to borrow money at a low rate of interest on a long-time loan, that his farm may be improved, ditches, fences, and houses constructed, as well as the purchase of the necessary live stock that he may thus have an investment to operate upon.

Our agricultural people can not prosper as they should if both these important factors, so necessary in their life, are to be continued to be denied. These two legislative demands are necessary for their prosperity.

It is not sufficient, I say, that a man may be able to borrow money for a period from 6 to 12 months only, as it would be impossible for him within this time to make the improvements to which I have just referred. But, Mr. Chairman, I did not intend at this juncture to lay such great stress upon the subject of rural credit, as important as that subject is, but to speak more directly to the pending amendment, and to the bill itself; but in passing I will say that my disappointment has been great, and I know dozens of other Members of this House share with me the same disappointment, that we have not been able to give to the people not only one but both of these measures—a rural-credit law as well as a national marketing commission. The people have a right to not only expect one but both of these, and if Congress continues to refuse to grant these demands it will continue to earn the displeasure and disappointment of the people.

But from this digression I revert to the subject at hand. I wish every Member of Congress could have heard the argument made by Hon. David Lubin before the House Committee on Agriculture September 14, 1914, on House joint resolution 344, introduced by me on September 10, as I now recall, the pending amendment which I am just now discussing being a modification of this other resolution of mine, House joint resolution 344.

Mr. Lubin, as you recall, gentlemen, is the American delegate to the International Institute of Agriculture, which sits permanently at Rome, Italy. It was Mr. Lubin who conceived, or dreamed, so to speak, of this great institute to which the United States and all the other nations of the world, except two or three of the smaller countries, some years ago entered into a treaty or convention, and all of these are represented in this institute.

Mr. Lubin returned from Italy last August and was in Washington about seven weeks, and it was my pleasure to be with him a good part of every day, and I was selected by him and others to introduce House joint resolution 344, and I am sorry indeed that the Agricultural Committee, owing to the shortness of time since then, has not been able to give proper investigation to this matter and to report out a bill on same. It is in substance a resolution creating a national marketing commission.

For the past 10 years Mr. Lubin has been in Rome as the American delegate to this International Institute of Agriculture. He is not there for the small salary that he receives, because he made the remark to the President of the United States in my presence, when I accompanied him to see the President about this and another matter, that he spent six or seven times the salary he receives.

It seems Mr. Lubin is a man of considerable means, and by no means is he dependent upon his salary, which is $3,600 per annum, and the work already accomplished by him in behalf of his own country would immortalize him, not to mention the great world-wide work he is doing as a member of this institute, which, so to speak, acts as a great clearing house to the world on all matters pertaining to agriculture.

Practically all of the European countries have a marketing commission in one form or another, and most of them are modeled after the German system, which, as stated in the outset of my remarks a few moments ago, alone is largely responsible for the great strength in arms which Germany is to-day displaying to the world. Very little, if anything, of any value whatsoever goes to waste in Germany. There is no such thing over there as a trust in food products. The cooperative spirit there is probably not equaled elsewhere in the world, and if our country is to ever take her place, as in time she must, we, too, must be more cooperative and less selfish than we are.

We must learn that we are in a measure our brother's keeper; that each of us does not live for himself alone; that as our neighbors prosper we, too, may prosper, and that out of a just and friendly cooperation grows concord, agreement, and mutuality; that those giant aggregations of wealth, centered in a few hands which we call the trust, have long enough devoured the substance of the people, and that such institutions are made possible largely by our own selfishness and lack of cooperation; that the more we pull apart and have dissension in our own ranks the more readily the enemy enters the camp, taking always advantage of any mutiny that may exist.

House joint resolution 344, above referred to, and introduced by me, has received wide advertisement, I think largely through the efforts of Mr. Lubin in the State of California, which is his home State. I have received many letters in the past few weeks from all parts of that great State from all kinds of organizations, societies, and associations, as well as from individuals, farmers, fruit and truck growers, and the like, and many of the Members of the California delegation have received like letters, all urging that this resolution of mine, referred to, pass at this session of Congress; and I ask, Mr. Chairman, that as a sample of these letters I may have printed in the RECORD three communications, one of which, from Gov. Hiram W. Johnson, of that State, has just been a few moments ago received by me, and the other two received by me on yesterday, and I herewith submit the same to be printed.

The letters referred to are as follows:

JANUARY 22, 1915.

Hon. W. S. GOODWIN, *Washington, D. C.*

MY DEAR MR. GOODWIN: The men and women of California are beginning a Nation-wide campaign for the furtherance of H. J. Res. No. 344, the national marketing commission resolution which you introduced. They feel that this commission will be an important factor for the entire country, especially from an economic standpoint. It is a question that will vitally affect many phases of our existence, and among those most interested in its successful working out will be the producer, the consumer, the public carrier, the realty man, and others.

As you have stood sponsor for the resolution, we will be glad to hear from you in regard to suggestions for a campaign. To whom shall we appeal expecting assistance, and to whom, if any, shall we look for opposition?

To begin our campaign we held a public mass meeting, at which the resolution and proposed bill was indorsed by Los Angeles Chamber of Commerce, its president-elect speaking for it from the platform; the public carriers, with representatives from the Pacific Electric and Salt Lake Railroads; the Well-Fargo Express; and the parcels post, in which the postmaster represented the carrier. A letter from E. P. Ripley, president of the Sante Fe, also indorsed the work, and was read from the platform that night.

The man who organized the first cooperative citrus association in the State, 23 years ago, represented the producer, the head of one of the largest and most influential produce exchange houses in the West, declared unequivocally in favor of the bill, and the attitude of the

consumer was presented by a woman who had been instrumental in establishing the municipal markets in the city.

The Outlook Association's campaign has been indorsed by the following local organizations: The chamber of commerce, all of the chambers on the Pacific coast, except one which we have been unable to reach; the realty board; the City Club, 600 members; the Friday Morning Club, 1,500 members; the Ebell Club, 1,500 members; the Evening City Club, 400 members; the Woman's Civic Club, 200 members; the Municipal League; the Woman's Republican League, and many others of importance.

In addition to these commendations, the chairman of the committee received this morning the most enthusiastic and unqualified indorsement from Gov. Johnson, a copy of which is inclosed to you.

For creating national interest in this campaign there are committees appointed as follows—and their political characteristics are noted that you may see at once the absolutely nonpartisan nature of the campaign:

Mrs. D. C. McCan, Democrat, chairman of campaign committee; Department of National Housewives League, Mrs. Edwin T. Earl, Progressive—wife of Progressive editor; Federation of State Societies, James R. H. Wagner, Republican; Interstate Woman's Committee, Mrs. Frank E. Wolfe, Socialist; National Legislation, Miss Mary Foy, Democrat; State Legislation, Mrs. Seward Simon, Republican; Public Carriers, Mrs. James F. Scherfee, Progressive; Membership, Mrs. E. C. Bellows, Republican; National Federation of Woman's Clubs, Mrs. R. J. Waters, Democrat; Speakers and Meetings, Mrs. W. C. Tyler, Democrat; Finance, Dr. John R. Haines, Progressive; Landowners, Mrs. Harriet Barry, Progressive; Distribution of Literature, Mrs. William Carnes, Republican.

Letters have been sent to all the registered agricultural organizations in the State and to the organizations represented in these committees. All the members of the house and senate and the members of the committee on agriculture as well as the gentlemen present at the hearing on September 14, 1914, have also been notified of our undertaking.

Awaiting your reply, we are,

Yours, very truly,

OUTLOOK ASSOCIATION,
Mrs. JAS. F. SCHERFEE,
President.
Mrs. DAVID C. MCCAN,
Chairman of Campaign Committee.

—

JANUARY 23, 1915.

Hon. W. S. GOODWIN,
Washington, D. C.

MY DEAR SIR: The Outlook Association of California has begun a state-wide campaign for the purpose of furthering H. J. Res. 344, and it asks that you at once make known to the members of the Committee on Agriculture your interest in the resolution and your desire that it be brought out of committee at once and given an opportunity for favorable action at this session.

Indorsements of the Outlook Association's campaign in this work have been received from every chamber of commerce on the Pacific coast except one, which we have not been able to reach—from the president of the Santa Fe Railway; E. P. Ripley, from the Salt Lake Railway; the Pacific Electric Railway; the Wells-Fargo and parcel post representatives; the Realty Board; the Municipal League; the City Club, 700 members; Friday Morning Club, 1,500 members; the Ebell Club, 1,500 members; the Federation of Poultry Growers of Southern California, 500 members; Women's Republican League; Business Women's Civil League; and many others of importance.

In addition we received this morning an enthusiastic letter from Gov. Hiram W. Johnson, a copy of which we inclose, giving his unqualified indorsement to the campaign and to the proposed national marketing commission.

In speaking of this matter to your associates it might be well to remind them that these indorsements are all from voters, and that we who represent them in this campaign will be glad to know of their attitude in regard to this important resolution, upon which we want your immediate active cooperation.

Very truly, yours,

THE OUTLOOK ASSOCIATION.
Mrs. JAS. F. SCHERFEE, *President.*
Mrs. DAVID C. MCCAN, *Chairman.*

—

STATE OF CALIFORNIA,
EXECUTIVE OFFICE,
Sacramento, January 29, 1915.

Mrs. DAVID C. MCCAN,
Chairman Campaign Committee, The Outlook Association,
Los Angeles, Cal.

DEAR MADAM: I gladly avail myself of this opportunity to express my earnest hope that House joint resolution 344, providing for a national marketing commission, will be adopted by Congress, and I also wish to commend you personally for your activity in behalf of this measure.

I am keenly interested in the problem of marketing farm products, and I take it that the resolution now pending at Washington is a step toward solving it. In California our farmers have, in some instances, demonstrated signally what can be accomplished, for the benefit both of the producer and the consumer when intelligent methods of marketing are introduced. Speaking generally, however, the agriculturists labor under serious disadvantages in this particular that imperatively demand correction. The farming industry has failed to receive, probably more than any other, the aid of governmental functions. Such a body as a national marketing commission could, I am sure, perform a great service to the country.

Please accept my thanks for honoring me with your request for an expression of my opinion for, if it can avail anything to help you in your cause, I shall, because of my deep interest in the matter, feel grateful to have had the opportunity to lend a helping hand.

Sincerely,

HIRAM W. JOHNSON, *Governor.*

Mr. GOODWIN of Arkansas. You will see from two of these letters, Mr. Chairman, that divers and sundry organizations have indorsed this resolution, and among these are many women's clubs, political, social, business, agricultural, and others have indorsed this resolution.

The good women in that State are cooperating with the men in bringing about a better condition of affairs. They have many hundreds of organizations working to this end, to the end that not only their own lot may be made better, but likewise the lot of their children and grandchildren and neighbors may likewise be made better.

That man serves himself best who serves the world best, because "no man liveth unto himself alone."

Mr. KENT. Mr. Chairman and gentlemen, if this amendment were not to be ruled out on a point of order, I am not sure that at the present time I should be advocating it. I am here on this floor at the present time to emphasize the necessity of correlating all information that may lead to the marketing of crops and to the saving of waste. In my experience—and I believe individual experience is best worth while as illustrative—I can sell beef from the range but two months in the year. I can not sell beef any other months of the year because my beef comes off grass and is only good those months. If I tried to send to the eastern market the beef killed on my range, I would find that the local markets in the East could not afford to buy from me, because I could only furnish them for two months in the year.

If others could supplement for the rest of the year, we could furnish cheap and good meat all the year around under existing conditions. Retailers must buy from sources that can furnish them all the year around, and therefore unless I can market my beef locally I must sell my cattle off the range for feeders. This is but one of the propositions that is up to me and to every other producer, this question of the economic waste due to the lack of a coherent system of marketing. As a boy in California I continually saw the most outrageous waste of product. Fruit was dumped overboard into San Francisco Bay, and it bobbed with wasted produce. All over this country to-day we find that produce is going to waste simply because people do not know how or where they can market their output. The remedy that is proposed under this bill seems to me inadequate. The amendment is a forward vision.

This amendment will lead to a system which, working toward complete distribution, would carry with it merely the expense of a central body, which body will cooperate through the States and through the counties down to the smallest districts, and will work with all the machinery furnished by the granges and other farmers' organizations. It is our duty to know how we may place products where they are needed at the lowest possible cost. When we passed a bill the other day to standardize the apple barrel we were working exactly along this line of marketing and of creating standards. We must find out where products are and where there is a market for them. We must standardize the qualities and the packing of products. We must learn the freight rates and distribute the information, and show whether products can or can not be exported from the place of their origin. In so doing, in furnishing information, in establishing standards, we shall afford this country the greatest possible service. We shall provide against waste, and in so doing we shall practically duplicate our productivity. By the simple process of bringing producer and consumer together we shall more than double the beneficence of production. [Applause.]

Mr. Chairman, if I have any of my time left, I yield it to the gentleman from California.

Mr. NORTON. Mr. Chairman, I most heartily support this amendment, and I wish that the amendment might be permitted to come squarely before the committee at this time, so that a vote could be taken upon it.

A national marketing commission will be of inestimable value to the country and will fit in splendidly with and properly supplement the local cooperative marketing organizations that are now to be found in many of the States. In the State which I have the honor in part to represent we have a number of local cooperative marketing organizations affiliated with the American Society of Equity and with the National Grange which are doing a very good work in disseminating knowledge concerning market prices to their members and in assisting and directing the farmers to market their products to the best advantage.

This amendment proposes to have established in this country an organization similar in its scope to the Landwirtschaftsrat in Germany. In that country is seen the highest development of cooperation among its people engaged in agriculture. Farming in all its departments has reached a higher degree of development in Germany than in any other country. All of us have seen within the past few months some of the results of Germany's wise agricultural development and great agricultural resources in the manner in which that country has been carrying on its part in the great European war. And

I now venture to say that the remarkable improvement in farming and farm life that has taken place in Germany during the past 70 years and which has been so greatly assisted by the study and attention that has been given to the problems of cooperative marketing of farm products, will be even more strikingly emphasized to the world in the months to come.

The national marketing commission provided for in this amendment would, as part of its work, gather information from the different States of the Union as to the supply and demand for different farm products, and thus be in position to direct local marketing organizations where their farm products might be sent and marketed to the best advantage. To-day in this country such system of farm marketing as we have is an indefensible, archaic system, through which the farmer very often receives but a small portion of what he should receive for his products. In the marketing of wheat by the farmers of my State this year during the months of September, October, and November they received in most cases from 10 to 20 cents a bushel less for their wheat at the time of sale than they should have received and which they would have received if a thoroughly well-organized cooperative marketing system was in operation in this country.

Mr. CURRY. Mr. Chairman, I regret this amendment is subject to a point of order and that a point of order will be made against it. The establishment of a national marketing commission is of the utmost importance to the country. The proposition has been indorsed by nearly all of the farmers and orchardists' associations and by all but one of the chambers of commerce of California, where we know from experience the economic value of cooperation in the distributing and marketing of certain farm products.

Mr. Chairman, in California the citrus fruit and deciduous fruit people have organized voluntary associations which have resulted favorably toward the bringing of good results to the farmers and marketing fruits at a reasonable cost to the consumers. But in the United States in general the system of distributing and marketing farm products is unscientific, wasteful, and uneconomical. The farmer receives less than he should for his products and the consumer pays more than he ought to. How this national marketing commission is expected to correct this condition and benefit the farmer and the consumer and to destroy trusts in food products is best explained by Mr. David Lubin in his own words, and I will send to the desk his statement, which I will ask the Clerk to read in my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

WE CAN REDUCE THE COST OF LIVING—SHALL WE?

A BRIEF EXPLANATION OF THE RESOLUTION PROVIDING FOR A NATIONAL MARKETING COMMISSION.

The undue rise in the price of foodstuffs and the evil influences on the economic condition of the people arising therefrom has given, and is now giving us, as a people, an added incentive to find an effective remedy. This remedy should not be of a temporary character, but should be a permanent betterment.

Fortunately we have had living in Rome, Italy, a man who sees things with a world vision, and from that vantage ground has proposed a remedy which will be both effective and permanent.

Mr. David Lubin, in speaking before the Committee on Agriculture in the House of Representatives, when the matter of a remedy was under discussion, said:

"On the 3d of October (1914) it will be 10 years that I have been living in Rome as delegate of the United States to the International Institute of Agriculture, and in that capacity the opportunity presented itself for observing the operation of the Landwirtschaftsrat (German Council of Agriculture). This system (of directing the marketing of the products of the soil) is substantially in operation in a number of the continental countries, and is more clearly defined in Germany than in the other countries.

"The more I observed the operation of that system the more I became convinced that its adoption in the United States would promote the economic interests, not merely of the farmers but of the consumers, of all the American people. Yes; it would even transcend the boundary line of economic advantage; it would go beyond that; it would be a political advantage to the American people.

"The American people simply must adapt and adopt the Landwirtschaftsrat, or drift, as old Rome drifted, toward the ultimate fall.

"The President and the people are complaining about the undue rise in the price of the products of the farm; for the undue rise in the price of food products. Well, what is the remedy?

"Will it be to argue with buyers and sellers or to penalize them? I do not think anything can be accomplished in that way. There has been a great talk, and there is a great talk all over the country that the trusts are responsible for the high prices in the cost of food products, for the high cost of living. Well, there is but one effective way to fight the trusts, and that is to take the goods that are trusted out of their reach; that is the way to make the trust impossible, and this is just what I propose under the plan to be set forth."

The plan, in substance, is this:

First. Let the President of the United States appoint a national marketing commission consisting of (*a*) the president of an influential chamber of commerce; (*b*) the mayors of three of the largest cities in the Union; (*c*) three members of the leading mail-order and department stores; (*d*) a leading railroad man; (*e*) a parcel-post man (*f*) a leading banker; (*g*) a leading workingman; (*h*) two Congressmen; (*i*) a Senator; making 14 in all; and in addition to these let the President add 15 farmers from the various sections of the United States.

This committee of 29 would be the national marketing commission, who would meet and organize for the purpose of having the food products in the various States of the Union distributed under the plan that shall be explained further on.

Second. Said national commission shall have prescribed power of direction of similar committees to be appointed by each of the governors in every State in the Union.

Third. Said State commissions shall have power to appoint committees of the same kind for every county in that State, and the county commissions shall have the right to appoint the township committees.

The national commission, after organization, shall devise a plan for the delivery and sale of the products by the farmers or their hired agents. They shall devise plans and specifications and details of sample rooms, auction rooms, exchanges, pits, and street markets, and designate, for the benefit of the producers or their agents, how the products in townships, counties, and States shall be synchronized for shipment, for display, by private sale or by auction, the rules for selling and delivery, the terms of sale and the mode of procedure.

The various commissions appointed are to ask the cooperation and assistance of the press, the carriers, the Federal, State, and county officials, the ministers of the various denominations, the various chambers of commerce and boards of trade, the labor leaders, and the farmers everywhere.

For instance, the products will be synchronized all along the route of the railway and train service will take these products up and deliver them, according to a schedule known beforehand to both the producer and the purchaser, at certain sales places.

Each town and city will have its auction rooms and at almost every hour of the day a different line of produce will be offered for sale. There will be the open-air markets; the cities and towns will designate certain public squares for that purpose, when these public squares will be converted into a market, with a space designated for each seller.

In these markets or exchanges, run by the farmers, under the direction and in accordance with the plans of the different commissions, all the different kinds of farm produce could be put on sale at different hours in the day or week. There would be a time for the sale of potatoes or other root crops; a time for the sale of fruits; a time for tobaccos; a time for cereals; a time for cotton, wool, flax, and hides; a time for dairy products and forage; a time for live stock and poultry. Thus every hour in the day these markets or exchanges would be to the agricultural interests of America what the heart is to the human body.

The mode of disposing of farm produce here proposed is not new. It is in operation in almost every country of Europe, and why should it not be in operation in the United States? The old and present system which places the buyer from a wholesaler in direct contact with the producer by bringing him to the farm where the product is grown, is not conducive to the economic welfare of the farmer. On the contrary, under this old system the farmer becomes, as it were, the "under dog," the hungry dog tusselling with a bare, gristly bone.

In fact, the close approach of a few large buyers surrounding the districts producing the crops which they wish to purchase may be compared to the besieging of a city by an invading force of irresistible power. Closer and closer these few buyers hem in the farmer in the producing district until, finally closing up the ranks, they stifle all sound commercial practices and instincts in the seller. And thus those few buyers succeed in substantially voting over to themselves, at their own price, the products of the seller.

If we ever have a scientific analysis of the causes which have led up to the formation of the trusts in the United States, it will surely be found that one of the main causes is the seemingly harmless system which places a few large buyers in direct contact with the producers, by bringing them to the farm to purchase the product where it is grown. This system enables these few buyers to surround the many sellers and hem them in completely, thus using them as a property peculiarly their own, to have, to hold, and to keep.

At any rate, under this new system proposed, the best brains of each community would be given a chance to act upon its own problems and solve them in the most direct and effective way, but also in concert with an organization which has an underlying principle of procedure, or design, back of it all.

The whole thing would work out somewhat after this style: Supposing John Smith, of Whittier, has a dozen sacks of potatoes which he can not sell in his local Whittier market. He can call up or write his Whittier township commission and tell them that he needs a market for that dozen sacks of potatoes. But the township commission does not have a market for them in that township. It in turn calls up the Los Angeles county commission, and says: "County commission, we have a dozen sacks of potatoes for sale. Can you find us a market?" "Yes; there is demand for 12 sacks of potatoes at Sawtelle (in Sawtelle township). Will you send them there?" "Yes; we will send 12 sacks of potatoes to Sawtelle to-day," and John Smith accordingly finds his market, prepares them in proper style for shipping, and sends them to Sawtelle.

"Well, you object, that can be done now without all that machinery to go through." Yes, it can, but here is where the "design" back of all this thing—this machine—comes in. After the county commission has told Whittier commission that there is a market at Sawtelle for his potatoes, supposing El Monte (township) commission comes in with a request for a market for 10 sacks of potatoes. Under the old plan of marketing both producers might have sent their potatoes to the Sawtelle market, and there would be conflict, with the result that potatoes would be a drug on the Sawtelle market, and neither of them would be able to get their price. They would have to be held for future consumption, or else reshipped to some other market, where they might come in conflict with some other shipment from another source of supply. With this machinery in operation, the county commission would say to the El Monte commission, "We have just made arrangements to fill the needs of Sawtelle to-day, but we have an inquiry from Venice (township) for 10 sacks of potatoes; ship them there to John Jones." Thus by both shippers working through their county commission it could direct them aright, while if the two township commissions should try to operate between themselves, and not through its county commission, confusion would arise, because no central bureau would have the information that the two had come to terms on the transaction.

In a large sense this is the big difficulty that shippers of produce are meeting every day. They have no way of knowing that, at the same time they ship a carload of onions for the St. Louis market, Texas is doing the same thing for the same market. Had both shippers some central bureau that would give trustworthy information on such operations or consignments, no duplication of markets need arise.

Now take an example of interstate shipments. Supposing California finds that she has a carload of apples in the hands of some one of its growers, and no local market can use them. The township commission in which the carload of apples is located would call up, or write, its county commission that it had a carload for shipment, but had no local market. The county commission upon investigation would find no local county market, so it would wire the State commission its need of a market for a carload of apples. If the State commission could find no market in any of the counties of the State it would then wire the national commission, "Have carload of apples. Where shall we send them?" The national commission, if it had no call for apples, would start a wire, say, to the Louisiana State Commission.

That State commission would wire the Orleans Parish commission, and that parish commission would wire the New Orleans commission, asking if it had a market for a carload of apples. That New Orleans commission would find that Chris. Reuter in New Orleans could use a carload of apples, and back the wire would start, "Ship carload of apples to Chris. Reuter, this city." Now, mark you well the routing of that wire back—first to the parish commission, next to the State commission, then to the national commission, then to the California State commission, then to the county, and finally to the township commission where the apples were on hand. Then the owner would himself ship that car to Chris. Reuter in New Orleans. The commission's work would have been done, and it would not duplicate that order from some other source of supply.

Now, should the New Orleans commission have wired back direct to this California township commission, the national commission or the two State commissions involved might be spending time and money to find a market, without knowing that the market had already been found. Or meanwhile it might have had another inquiry for a market for a carload of apples from Vermont, and not having had the information go through its hands from the New Orleans market, would have routed the Vermont apples through, only to find a duplication.

It has been this very conflict of information or entire absence of it that has caused many losses and disasters to shippers. In other words, there is no design in the marketing situation as it is now. No light; no intelligence. And it is light and intelligence that is needed in the process of handling the products of the soil. We have light and intelligence in every step taken by the maker and seller of lead pencils, muslins, machinery, steel, iron products, or any of the varied products of our industries. That intelligence we take as a matter of course or of pride, according as we look at it. Certainly we never think of it as being paternalistic, nor socialistic, nor even cooperative, but just good, sound business sense. Why not apply the same sound doctrine to agricultural products?

Another point showing the "information" feature: Suppose California is producing asparagus commercially. California markets demand white varieties of asparagus shipped in bulk, while the eastern markets demand the green varieties shipped or packed in bundles. Through this information bureau this intelligence could be given the grower here in California, and he would not be so foolish as to grow white asparagus for the eastern market, nor would he ship in bulk to an eastern market.

Or supposing it is potatoes that are to be shipped. Orders here are placed by the pound or sack. In eastern markets the orders are placed by the bushel or barrel. By inquiry it could be ascertained before shipment that bushel cartons would be more acceptable to the eastern buyer than sacks, and that red potatoes would find an easier market in the South than white, while the Chicago market wants white potatoes altogether.

The situation would be no different were the product fruits, melons, or perishables. The information could be just as specific for them as it need be for hay or grain. If the outlook for tomatoes was bad, information could go out that canning would be advised for all local California tomatoes. The canned product would have a means of finding its market also.

This system or scheme of operation, as provided in the Lubin suggestion, would result in a form of cooperation compatible with the American spirit. Cooperation in agricultural products is a world movement to-day, and corresponds to similar movements among other producing factors. In other branches of economic activity the development is in the direction of larger producing units. So it is in agriculture, and the failure to meet this change with a new theory of marketing has wrought havoc with our markets. In the face of this modern concentration of forces the farmer can not remain isolated, if he is ultimately to retain any influence upon the fruit of his soil.

The resolution under consideration provides a coherent and coordinating clearing house of information on all questions relating to the products of agriculture, both for the use of the producer and consumer. The numerous organizations, widely scattered and wholly disconnected at present, while serving many useful purposes, are not only inadequate but often conflicting when it comes to handling the problem of economic distribution.

This is the great unsolved problem of this country, and until it is solved there will be waste, unprofitable labor, and high living cost. No greater service could be rendered all the people than is possible with such a commission determined upon the wise solution of the difficulties of marketing and distributing the necessity of life.

We would be betraying the competence of mother earth should we give up in despair. So long as there is one hungry man and one unused potato in the fields that has not found that hungry man we have not succeeded in organizing the greatest of the world's arts—the art of growing things—into a united, intelligent industry, whence can come that opulent productivity which justifies the industry of the farmer.

Now, the proposal is practical or it is not. If it is not, that ends the matter; but if it is, it can be safely counted upon that every Member of the present Congress will feel it his duty not merely to urge the passage of this resolution, but also to exert his best energy toward putting the work called for in the resolution in proper working order.

Mr. CURRY. Mr. Chairman, I ask unanimous consent to extend my remarks by the insertion of that part of Mr. Lubin's statement that for lack of time the Clerk has not read.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. LEVER. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The Chair is of opinion that the amendment changes existing law, and therefore the Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Enforcement of the United States cotton-futures act: To enable the Secretary of Agriculture to carry into effect the provisions of the act approved August 18, 1914 (Public, No. 174, 63d Cong.), entitled "An act to tax the privilege of dealing on exchanges, boards of trade, and similar places in contracts of sale of cotton for future delivery, and for other purposes," including all expenses necessary for the purchase of equipment and supplies; for travel; for the employment of persons in the city of Washington and elsewhere; and for all other expenses, including rent outside of the District of Columbia, that may be necessary in executing the provisions of this act, $75,000.

Mr. LEVER. Mr. Chairman, I ask unanimous consent to print in connection with this item in the bill certain data relating to the workings of the cotton-futures bill as far as it has gone.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. LEVER. It will be remembered that in my report accompanying the cotton-futures bill, which latter became a law, I predicted that as a result of this legislation the value of the New York contract would be enhanced from $1 to $2.50 per bale, and that this enhancement of the value of the quotation basis, reflecting itself in the spot markets of the South, would mean from $15,000,000 to $35,000,000 each year additional to the cotton producers.

Immediately succeeding the beginning of the war in Europe the exchanges closed, and remained closed until the 16th day of November. On that day they reopened. The cotton-futures act does not become effective in whole until the 18th of February of this year, but in anticipation of its becoming operative the exchanges since their opening have been dealing in two kinds of contracts, namely, the old contract, under which they formerly operated, and the new contract, drawn to conform substantially with the provisions of the contract provided for in the cotton-futures act. I feel a pardonable pride in finding that my prophecy as to the effect of this act in enhancing the value of cotton in the hands of the farmer is borne out by the difference in the value of the two contracts, showing a much higher value for the new contract over the old, as will be seen by the following comparison furnished me by the Department of Agriculture:

[1] Old style.

I desire also to quote from the market letter of January 8, 1915, of A. Norden & Co., of New York, a large cotton firm, bearing upon the effect of the Lever Act upon the market:

Some of the selling has also been from southern sources, as the advance here was much more rapid than in southern markets, and at times we have apparently been on a parity that might warrant shipments from some localities on a commercial basis; it must not be overlooked, however, that with our new contract this shipping parity has changed radically; New York will no longer be the dumping ground for undesirable odds and ends, and cotton will only come here in volume, if our prices are maintained on a competitive level with the rest of the world.

The largest cotton manufacturer in the South, and probably the best-informed man in the South upon cotton in all of its phases, writes me under date of January 8, 1915, as follows:

It will interest you to know that during this season the New York contracts are maintaining, as they should, a proper relation to southern spots.

This was one of the main purposes of the bill and was predicted as the result of the cotton-futures act. I said also in my report accompanying the cotton-futures bill that the adoption of the bill would tend to make manipulation less frequent and at the same time fluctuation less violent and therefore legitimate hedging more safe. That prediction is being borne out, as is shown from this excerpt from the market letter of Shearson, Hammill & Co., of January 6, 1915:

The New York Cotton Exchange has adopted the Government standards of grade, and is now operating under the provisions of the United States cotton-futures act, commonly known as the Lever bill. Under the new classification, the buyer is assured of receiving a merchantable grade of recognized spinning value, and the future market should reflect this improved standard at all times. It is possible, therefore, for the investor to use the New York market on a basis of future delivery without involving a tie-up of any material sum of money, and obtaining the same results involved in the purchase, storage, and insurance of the actual cotton itself.

I desire to submit also an excerpt from the market letter of Henry Clews & Co., of New York, of January 5, 1915, one of the largest brokerage firms in the country and one of the most reliable, as follows:

There was a quiet tone to the cotton market during the entire week, but the undertone continued strong, due in great part to the further increase in buying for foreign account and domestic investment interests. To some degree, however, the firmness was owing to the fact that the new contract under the terms of the United States futures act is really stronger than the trade has been generally led to believe. On the medium grades, which include middling, strict middling, and good middling, as well as strict low middling, it has been discovered that the new Government standards are worth 35 or more points over the old standard of classification. In addition to this it is necessary to consider the stipulation of the staple, which calls for at least seven-eighths of an inch. While this requirement does not affect deliveries from such sections as Texas, Oklahoma, or Arkansas, it has a decided influence on tenders from the eastern portion of the belt. Another feature that should be considered in regard to the new contract is the single certificate provision, which makes it possible for the holder of contracts of cotton in the local stock to withdraw a certain number of bales and replace these withdrawals without being forced to take out certificates for the full contract. There is no question that these three features alone demonstrate the enhanced value of the new contract, and, as repeatedly pointed out in these advices, the New York market is now as never before the best spinners' market of the world.

It is very gratifying to me, because I have spent 10 years in the study of this problem, to feel that this act is working in the interest of the cotton producer and is at this moment adding from $25,000,000 to $35,000,000 to the value of his crop for this year.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Total for Office of Markets and Rural Organization, $484,050.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. MANN. Mr. Chairman, I had not intended to detain the House at all, but so many gentlemen have made speeches on the subject of marketing, telling how the farmer receives such a low price for his products as compared with what he ought to receive, especially my friend from North Dakota [Mr. NORTON], who has just stated that the farmer in his State received 20 cents a bushel less for wheat than the market prices would justify, that I am lead to say a word or two.

Last summer the gentleman from Kansas [Mr. DOOLITTLE] offered a resolution directing the Bureau of Corporations in the Department of Commerce to make an investigation of the selling price of wheat in Kansas, asserting in his preamble, as I recall it, that wheat there was selling by the farmer for 20 to 25 cents a bushel less than the market price would justify. Finally the resolution was passed, delegating the Secretary of Agriculture to make the investigation, and that investigation was made by this bureau; and in a report sent to Congress on December 7 last is the result of that investigation.

When we came to examine the report of the department we found that instead of the farmers of Kansas selling their wheat—I presume the same thing applies to North Dakota—for from 20 to 25 cents a bushel less than the market price would justify, this statement, part of the summary, is set forth:

The prices of wheat paid to farmers in Kansas are based largely upon the prices in Kansas City, Mo., and at the Gulf ports for export. From these basic prices must be subtracted the freight rate, shipper's profit, and other incidental charges and the margin taken out by the country elevator to determine the price which is paid to the farmer. Since the margins of profit taken by the grain dealers in the larger markets are very small—averaging about 1 cent a bushel—it appears that the farmers of Kansas, as a general rule, are obtaining all their wheat is worth.

Mr. SELDOMRIDGE. Mr. Chairman, will the gentleman yield?

Mr. MANN. Certainly.

Mr. SELDOMRIDGE. In corroboration of what the gentleman has stated, I wish to say that a statement was recently made to me by a gentleman connected with one of the great grain exchanges of the country that he was selling grain at a profit of one-eighth of a cent per bushel. His profit was included in that.

Mr. MANN. Here I read another extract from the report, page 5, which is as exhaustive on the subject, and it gives an illustration. I read:

Country buyers work on a margin of from 2½ to 4 cents per bushel. Hence, the country price on a given day would be the price for which the buyer can sell his grain "on track" at the elevator, less his margin. For example, on September 28, an elevator which allows a margin of 3 cents per bushel on all wheat purchased received several track bids averaging 90¼ cents per bushel, basis No. 2 hard, which is the contract grade in Kansas. The quotation to farmers on this day was the "on-track" price quoted the elevator less its margin of 3 cents, or in this case making the price to the farmer 86¾ cents per bushel. When the local buyer does his shipping on a commission basis he will take the spot price at Kansas City, subtract the freight and other charges incident to selling in Kansas City, and deduct his margin. If the market quotation at Kansas City on spots is 97 cents, the freight to Kansas City 5 cents, commission and other charges 1¼ cents, and the elevator margin 3 cents, the local market price would be 97 cents minus 9¼ cents, or 87¾ cents.

That is the way the wheat is sold; and if there are farmers in Kansas or North Dakota, who do not know enough to sell their wheat for the market price at Duluth or Minneapolis, less the freight charges, a very small commission charge, and a very small elevator charge, what they need is an education. The gentleman from North Dakota [Mr. NORTON] ought to print a speech and send it to all of them, so that they will know their rights.

Mr. NORTON. Will the gentleman yield?

Mr. MANN. Certainly.

The CHAIRMAN. The time of the gentleman has expired.

Mr. NORTON. I ask unanimous consent for five minutes.

The CHAIRMAN. The gentleman from North Dakota moves to strike out the last two words.

Mr. NORTON. From the reading of the pamphlet by the gentleman from Illinois [Mr. MANN], I am led to believe that the gentleman who wrote it probably knows considerably more about city-farm life than he does about some of the problems surrounding the marketing of grain.

Mr. MANN. Will the gentleman permit me to inform him who wrote it?

Mr. NORTON. It may be that the Secretary of Agriculture did, who is reported in the newspapers to have stated a short time ago——

Mr. MANN. No; it was not written by the Secretary of Agriculture.

Mr. NORTON. That the farmers of the country did not need any rural-credit legislation.

Mr. MANN. I am willing to state who wrote it.

Mr. GARNER. Will the gentleman from Illinois state who wrote it?

Mr. NORTON. I shall be pleased to have the gentleman state the names of the authors of the article.

Mr. MANN. It was written by W. H. Kerr and L. H. D. Weld, Office of Markets and Rural Organization, and Charles J. Brand, chief of this bureau.

Mr. NORTON. I will state to the gentleman that the condition in North Dakota during the months in which practically all of the marketing of grain was done last fall was this: The cash price of wheat in Minneapolis and Duluth was from 10 to 20 cents a bushel higher than was the future market price of grain; that is, the cash market price of wheat in September at the terminal grain markets was from 10 to 20 cents a bushel higher than the November and December future market price. The local elevators in North Dakota bought the farmers' wheat at local prices, based on the future market price of wheat less transportation and incidental charges, and not at all based on the cash market price of wheat at the terminals.

Mr. MANN. That would depend on when it was delivered.

Mr. NORTON. It was delivered to the local elevators, of course, at the time it was bought.

Mr. MANN. Oh, not usually.

Mr. NORTON. Such has been always my observation.

Mr. MADDEN. Not future prices.

Mr. MANN. The gentleman is not familiar with the handling of this product, I am afraid.

Mr. NORTON. With all due respect to the general superior knowledge of the gentleman, I am confident that I know as much about the problems pertaining to the marketing of wheat as does the gentleman from Illinois. I am convinced of the fact, also from my own observations and experience, that the farmers of my State received in most cases last fall from 10 to 20 cents a bushel less for their wheat than they would have received for it if they had been able to market it through a cooperative marketing exchange.

Mr. MANAHAN. Mr. Chairman, I did not intend to speak again on this question, but the gentleman from Illinois [Mr. MANN] has so completely missed the point which Members have urged here as to what the farmers received for their crops, and has so clearly failed to comprehend the point that I urged in this matter of markets, that I feel impelled to make a few more observations.

Mr. MANN. I did not hear the gentleman's speech, so I disclaim any effort to answer it.

Mr. MANAHAN. I regret that the gentleman did not hear my speech.

Mr. MANN. I regret it, too.

Mr. MANAHAN. It would have enlightened the gentleman on this important subject of marketing.

Mr. MANN. I have heard it before, and I never thought so.

Mr. MANAHAN. Read it again. I never lose faith in the capacity of the gentleman from Illinois to understand, if he will study long enough.

Now, the point made by the gentleman from North Dakota [Mr. NORTON] and others regarding what the farmers receive for their products—its inadequacy under present marketing conditions—is based upon facts; and when the gentleman from Illinois says that the report which he read shows that the farmers received approximately what they ought to receive, deducting from the price upon the market place transportation, commissions, and incidental terminal expenses, and rests his case upon that, he does not take into consideration at all the more important fact that the price upon the market place is an artificial price, made by gamblers betting on the future price. The gentleman from Illinois [Mr. MANN] ought to know that every bushel of cash wheat or grain sold upon the Chicago market is based upon the future bidding in the pit at the very hour when it is sold. In other words, the men in the pit and speculators from all over the country operating in the pit; clerks in banks and in business houses, for instance, who want to take a "flyer" upon the market place, are competing in the market place with the farmer who really has grain to sell, and beating down his price for real grain by what they think they may be able to buy grain for several months in the future.

Mr. SELDOMRIDGE. Is the gentleman aware of the fact that in the grain-producing States the farmers also indulge in fliers, as the gentleman calls them?

Mr. MANAHAN. A few poor, misguided farmers may, but that does not justify the infamy of having the price of a staple article of food made by gamblers in the pit. [Applause.] And when any man says to me that that is an honest price, I say he does not know what he is talking about. It is a gambler's price; a dishonest gambler's price; a dishonest gambler's deliberately dishonest price.

Mr. SHERLEY. Will the gentleman yield for one question?

Mr. MANAHAN. Certainly.

Mr. SHERLEY. Will the gentleman name one agricultural product that is not dealt in upon the exchanges that costs as little from the producer to the consumer as those that are dealt in on exchanges—just one?

Mr. MANAHAN. I certainly can.

Mr. SHERLEY. Name it.

Mr. MANAHAN. Barley; and I myself put the proposition up to the leading officials of the Chicago Board of Trade before the Rules Committee of this House, and I put the same proposition up before the leading members of the Minneapolis Chamber of Commerce, before the legislative investigating committee of the Minnesota Legislature, for which I was the attorney two years ago, to produce their books, and offered to show by their own records that every grain that was not affected by future trading sold at a closer margin than grain affected by pit trading, notwithstanding the fact that many of the local inspectors in grading malt barley graded it as feed barley—notwithstanding this dishonesty barley sold by the producer closer to the real price than wheat.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANAHAN. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to proceed for five minutes more. Is there objection?

Mr. MANAHAN. I have not taken much time of the House.

Mr. LEVER. I know the gentleman has not taken much time, but if every Member of the House should take the time the gentleman has, even 10 minutes, we would not be able to get through. But I will not object.

Mr. MANN. Let us see whether the debate is ended then or not.

Mr. LEVER. I had the idea that this was the last speech. I ask unanimous consent that all debate on this paragraph and amendments thereto close in five minutes.

Mr. HELGESEN. I object. I want five minutes.

Mr. MANN. I just read an extract from an official report, and it will take the gentleman four days to answer it.

Mr. LEVER. Mr. Chairman, I will make it 10 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. MANAHAN. Mr. Chairman, as I was saying, in answer to the gentleman from Kentucky [Mr. SHERLEY], it was put squarely up to the great operators in Chicago and Minneapolis to show by their books the actual amount they made on grain subject to sale for future delivery and how much they made on grain not subject to pit trading. They did not dare produce their books, because, by the system they have, instead of making 1 cent on a bushel, which is the ostensible commission, they make 6 cents, 7 cents, or 8 cents a bushel. How? By a concerted action and arrangement between themselves and local inspectors and public-warehouse men, by which bidding in futures is manipulated for the purpose of making the market fluctuate, and prices are forced up or down at will by means of grain in the warehouses they control, where the enormous quantities are stored, and which they can throw in a doctored, mixed, and depreciated condition into the market for the purpose of controlling their trading program.

Only December last a case was tried in Chicago, with which I have no doubt the gentleman from Illinois is familiar, in which

Mr. Leiter was sued for $330,000 by Peavy and Pillsbury, so-called elevator interests of Minneapolis. It was in the time of the Leiter corner in wheat that the cause of action arose. These men, Peavy and Pillsbury, it was claimed, broke an agreement with Leiter to withhold their grain while he cornered the market, and it cost Leiter and his father something like twelve or thirteen million dollars. The corner in wheat was busted, and Leiter was almost busted because, forsooth, the agreement with his fellow gamblers busted under temptation.

Leiter was sued for $330,000 worth of notes that he gave to elevators controlled by these coconspirators of his, while they were in bad faith unloading their storage grain upon him, and Judge Humphrey, of the Federal court, submitted to the jury the question of whether or not there was an illegal conspiracy between these three men to control the price of wheat, and if they found that there was such a conspiracy to control the price of wheat the notes would be void. It was submitted on the testimony showing the understanding between these men—only three men—and the jury brought in a verdict that there was such a conspiracy, and the $330,000 in notes were declared void. If three men can by this sort of agreement as to how they shall bid in the pit and withholding their grain in storage control the price of wheat, as they showed they could, what can half a dozen do? What can the whole combination do, operating as a close corporation like the chamber of commerce?

Mr. SHERLEY. What happened to that attempted deal? The fellows that were in it went broke.

Mr. MANAHAN. Yes; but the price of wheat went up almost to the present price.

Mr. SHERLEY. Did it hurt the farmer?

Mr. MANAHAN. Of course it did. The farmers did not unload any of that wheat. The speculators had gotten nearly all of the wheat in the elevators before they conspired to corner the market and hold up consumers. The Peavys and the Pillsburys had the wheat, and the farmers did not have it. The suggestion that future trading lessens the margin of profit between the price the producer gets and the price the consumer pays is absurd. Is any man so childish as to think that these great operators whose profits depend upon this margin would cling so tenaciously to the pit and defend it so valiantly if it narrowed their margin and cut their profits? Are the Armours and Leiters and Pillsburys in the grain business for their health or for profit—big, fat profit?

They want wide margin between producer and consumer. They do not operate their corners in the fall, but wait until after the farmers are compelled to sell the wheat. After the bulk of the crop has been sent to market the pit machinery is set in motion to boost the price of wheat and flour, and the consumers pay the excessive prices. The farmers are compelled to sell their wheat early, as a rule, and the result is that the wheat they sell cheap the middle men later sell at a very much higher price to the consumer in the form of flour. I say again and deliberately that these gamblers' prices are swindling prices. They do not depend upon the law of supply and demand, which is practically constant and unchanging.

Why, look at it. Right after war was declared they boosted it up 40 cents. Then it went down 20 cents. It has ever since been juggled back and forth. Every time the price of grain changes 1 cent it affects the value of the farmers' product in the United States $50,000,000. If it juggled 10 cents, it is affected $500,000,000 in the aggregate.

Mr. MOORE. Will the gentleman yield?

Mr. MANAHAN. Yes.

Mr. MOORE. Does not the export of wheat have something to do with it?

Mr. MANAHAN. Very little. The members of the Chicago Board of Trade, the grain gamblers, deal in three hundred times as much phantom wheat as they actually handle in real wheat. They sell more wheat futures every day than actually comes to Chicago in a year. That was shown by the testimony before the Rules Committee. They make the price of wheat for the world, because their pit trading dominates, and what they send abroad or export to Liverpool is miserable doctored wheat, which can not affect domestic prices. Only yesterday the head of the chemical department, under the pure-food act, attached 100 cars of grain in Baltimore and other export points for being doctored and adulterated with water and screenings by Chicago Board of Trade and other operators in the West. If our prices were not made by gamblers operating under cover of monopoly, and if foreign buyers were not swindled repeatedly by dishonest dealers, shielded by boards of trade, where the pot dare not call the kettle black, the law of world supply and demand would doubtless maintain a fair and almost constant price for all staple articles of food. [Applause.]

[Mr. HELGESEN addressed the committee. See Appendix.]

The CHAIRMAN. Without objection, the pro forma amendment will be considered withdrawn, and the Clerk will read.

The Clerk read as follows:

Total, Department of Agriculture, for routine and ordinary work, $19,702,712.

Mr. SUMNERS. Mr. Chairman, I ask unanimous consent to extend and revise my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas? [After a pause.] The Chair hears none.

Mr. MOORE. Mr. Chairman, I ask the same privilege to extend my remarks in the RECORD.

Mr. JACOWAY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on the question of markets.

The CHAIRMAN. Is there objection to these requests? [After a pause.] The Chair hears none.

The Clerk read as follows:

Enforcement of the plant-quarantine act: To enable the Secretary of Agriculture to carry into effect the provisions of the act of August 20, 1912, as amended March 4, 1913, entitled "An act to regulate the importation of nursery stock and other plants and plant products; to enable the Secretary of Agriculture to establish and maintain quarantine districts for plant diseases and insect pests; to permit and regulate the movement of fruits, plants, and vegetables therefrom, and for other purposes," in the city of Washington and elsewhere, including official traveling expenses, telegraph and telephone service, express and freight charges, and all other expenses, employing such assistants, clerks, and other persons as may be considered necessary for the sale or transportation of adulterated or misbranded Paris greens, lead arsenates, and other insecticides, and also——

Mr. BARTLETT. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amend, on page 74, line 2, by adding at the end of the line, after "$50,000," the following:

"*Provided*, That no part of the sum in this paragraph or this act appropriated shall be used or expended in the enforcing of any rules, orders, or regulations promulgated by the Secretary of Agriculture which have for their purpose an intention to, and do in effect, give preference to the ports of one State over those of another."

Mr. LEVER. Mr. Chairman, I reserve a point of order.

[Mr. BARTLETT addressed the committee. See Appendix.]

Mr. STAFFORD. I think we ought to have some understanding as to the time to be allowed for this debate.

Mr. ADAMSON. This is an important matter, Mr. Chairman, and my colleague has not interfered much with this discussion.

Mr. STAFFORD. I understand that; but we ought to have some understanding about the close of debate.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this amendment close in five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this amendment close in five minutes. Is there objection?

Mr. SISSON. I object, Mr. Chairman. I have not opened my mouth to-day, and there are many gentlemen who have talked repeatedly on the bill, among them my good friend from Wisconsin [Mr. STAFFORD], who wants to limit debate.

Mr. BARTLETT. No; he does not.

Mr. STAFFORD. No; I do not wish to cut off the gentleman. We do not want to lose our suppers and our sleep as well.

Mr. LEVER. I ask unanimous consent, Mr. Chairman, that debate close on this paragraph and amendments thereto in 10 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this paragraph and amendments thereto close in 10 minutes. Is there objection?

Mr. ADAMSON. Reserving the right to object, Mr. Chairman, I wish to state to the chairman of the committee that he must recognize the importance of the matter that the gentleman from Georgia is talking about.

Mr. LEVER. I do.

Mr. ADAMSON. I want my colleague from Georgia [Mr. BARTLETT] to have ample opportunity to discuss it; and if he is allowed that opportunity, I promise that I shall not speak on it myself.

Mr. HEFLIN. Mr. Chairman, I want to say to my friend from Georgia that in his State the sea-island cotton that is produced there, and that which is produced in South Carolina and Florida, serves the purpose of the long-staple cotton, and we do not want this long-staple stuff coming there from abroad if it will be in the least dangerous.

Mr. SISSON. Reserving the right to object, Mr. Chairman, I would like to have 10 minutes on this amendment.

Mr. ADAMSON. I hope my colleague from Georgia will not be lost in the shuffle.

Mr. LEVER. It is now nearly 6 o'clock.

Mr. SISSON. I understand that it is nearly 6 o'clock; but I am so much interested in the amendment that the gentleman from Georgia offers that I feel the House is entitled to know the full limitation of that amendment. I have no desire on earth to delay the proceedings. So far as I am concerned, I have no desire on earth to delay the bill. I have been here helping to make a quorum, and I have not discussed the bill, and I have taken up no time, but this is a matter in which I am very much interested.

Mr. LEVER. Then, Mr. Chairman, in view of that statement, I will modify my request and ask unanimous consent that the debate close in 15 minutes.

Mr. SISSON. With the understanding that I may get unanimous consent to proceed for 10 minutes, I have no objection.

Mr. ADAMSON. Does that take care of the extension of the time of my colleague [Mr. BARTLETT]?

Mr. LEVER. That will be included.

The CHAIRMAN. Will the gentleman from South Carolina state his request again?

Mr. ADAMSON. That all debate on this paragraph and all amendments thereto close in 15 minutes.

Mr. BARTLETT. That does not include argument on the point of order?

Mr. LEVER. No.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] asks unanimous consent that all debate on this paragraph and all amendments thereto close in 15 minutes. Is there objection?

Mr. SISSON. Reserving the right to object, I want to proceed myself for 10 minutes, and if he will include in his request that I may have 10 minutes, I have no objection.

Mr. STAFFORD. That will take care of itself.

Mr. SISSON. If the gentleman will withhold his request, Mr. Chairman, I will make a personal request that I may be permitted to address the committee for 10 minutes on this amendment, at the conclusion of the remarks of the gentleman from Georgia [Mr. BARTLETT].

Mr. STAFFORD. There is one question pending before the House, and I ask for the regular order.

The CHAIRMAN. Does the gentleman from South Carolina withhold his request?

Mr. STAFFORD. I ask for the regular order.

The CHAIRMAN. The regular order is, Is there objection to the request of the gentleman from South Carolina?

Mr. ADAMSON. The request I made was, first, that the gentleman from Georgia [Mr. BARTLETT] be allowed to proceed for five minutes longer.

The CHAIRMAN. The Chair recognized the chairman of the committee [Mr. LEVER] first, in the hope that some definite time could be agreed upon.

Mr. SISSON. I shall have to object, unless I can get consent to address the committee for 10 minutes.

Mr. HEFLIN. That time can be yielded to the gentleman.

Mr. STAFFORD. If the gentleman will not object, he can get his time.

Mr. SISSON. I have no objection, if I can get the time.

Mr. HEFLIN. Following the gentleman from Georgia [Mr. BARTLETT].

The CHAIRMAN. The Chair is not permitted under the rule to yield to any gentleman more than five minutes without unanimous consent.

Mr. LEVER. I have no objection to the gentleman having 10 minutes.

Mr. STAFFORD. Regular order.

The CHAIRMAN. Is there objection?

Mr. SISSON. With the understanding that I may have 10 minutes——

Mr. McLAUGHLIN. Regular order.

Mr. SISSON. If I can not get my request——

The CHAIRMAN. The Chair will state to the gentleman from Mississippi that the Chair is absolutely powerless to give him that assurance.

Mr. SISSON. I am trying to get the committee to give me that courtesy.

Mr. LEVER. Recognition is the right of the Chair.

Mr. ADAMSON. Will the gentleman modify his request so as to give the gentleman from Georgia [Mr. BARTLETT] 5 minutes and the gentleman from Mississippi 10 minutes?

Mr. TRIBBLE. Mr. Chairman, the regular order has been called for.

The CHAIRMAN. The regular order has been called for. The regular order is, Is there objection to the request of the gentleman from South Carolina?

Mr. SISSON. Mr. Chairman——

The CHAIRMAN. The regular order having been called for, the gentleman must either object or not object.

Mr. SISSON. Then I object.

Mr. ADAMSON. Then I ask unanimous consent that the gentleman from Georgia [Mr. BARTLETT] proceed for five minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the time of his colleague [Mr. BARTLETT] be extended five minutes. Is there objection?

There was no objection.

[Mr. BARTLETT addressed the committee. See Appendix.]

Mr. HEFLIN. Mr. Chairman, I want to say a word. The gentleman from Georgia referred to me a moment ago——

Mr. BARTLETT. I should not if the gentleman had not "butted in."

Mr. HEFLIN. Mr. Chairman, I reserve the right to "butt in" whenever I hear a speech made directly antagonistic to the best interest of the cotton producers of the South. I did not mean to be discourteous to my good friend from Georgia in "butting in" as he calls it.

Mr. BARTLETT. Will the gentleman yield?

Mr. HEFLIN. Yes.

Mr. BARTLETT. Does the gentleman think that he is any more interested in the cotton raisers of the South than I am? My State raises one-third more cotton than does his.

Mr. HEFLIN. That may be true, but I think if the cotton producers of the gentleman's district were permitted to determine just now who is their best friend, the gentleman or myself, I am inclined to the opinion that they would decide in my favor.

Now, Mr. Chairman, I am in favor of this Government exercising the authority that it has to prevent the shipment of fruit trees affected with deadly parasites into the various sections of this country. I think the Government has a right to prevent cattle and other animals that have the foot-and-mouth disease from coming into the various sections of our country, and I think that this Government has the right, and it ought to exercise that right, to prevent the coming into the South of cotton from Egypt affected with the pink boll worm, and in the name of twenty-seven millions of people interested directly in the cotton industry I protest against the bringing of the Egyptian pink worm into the South. We have had enough trouble with the boll weevil without having the Egyptian pink boll worm turned loose upon us.

Mr. Chairman, we are producing in the gentleman's own State of Georgia some of the finest sea-island cotton in the world, and we grow some of it in South Carolina and some in the State of Florida, and now to permit the Egyptian cotton, with its pink boll worm, to come in in competition with our long-staple cotton seems ridiculous to me. No, Mr. Chairman; it is not to the interest of the cotton producers to bring these pink boll worms into the South in order that two or three mills may have the opportunity to spin a little Egyptian cotton. We can produce the finest short-staple cotton in the world, and now we are growing some of the finest long-staple cotton to be found anywhere. I plead for the exercise of the quarantine power of the Government against this infected Egyptian cotton going into the South. Hold it for 24 months? Yes; 48 months, if necessary; long enough to destroy the boll worm and the eggs; and that is the purpose of the provision that the gentleman talks against.

I can not see to save my life why the gentleman pleads for the nonenforcement of a provision like this. The course that he would have us take in this matter is not in the interest of the masses of the people in the cotton-producing States. [Applause.]

Mr. SISSON. Mr. Chairman, practically all I have is invested in raising cotton. I produce principally what is called good bender or staple cotton, but this amendment I favor, first, because it limits the expenditure of this appropriation by the department in accordance with the Constitution. Now, if this board sees fit to establish a quarantine and close all the ports of the United States to cotton, and they feel that that is proper, then they should assume the responsibility, but I do not believe that this Congress ought to say, by voting this amendment down, that that provision of the Constitution which provides that no preference shall be given to one port of one State over that of another port is constitutional. My own private interest, and that of my section, could be advanced by shutting out all foreign cotton, but we can not afford to violate our oath of office, even to do that.

When I voted against the proposition to vest the Secretary of Agriculture or this board with this enormous power I anticipated in the exercise of that power something like this might

happen. If this precedent is to be set, then you vest with this board the power of quarantining to that extent that they can discriminate and force all the cotton imported into the United States to come to one particular port.

If I understand the order properly now, it provides that the importation of cotton into the United States will come into the port at New York or Boston or San Francisco, thereby excluding the importation of cotton into any other port of the United States. Not only that, but it provides that after the cotton shall have been imported into the United States, whatever may be the effect upon any mill in the South, this cotton shall be kept two years. So under the guise of these quarantine rules you are preventing the southern cotton mills from securing any of this cotton they may desire to secure.

Another thing is it increases the amount of freight that must be paid from the port of Boston or New York to the southern mill. I would not place that extra burden upon any mill in any section of the United States. I do not believe that under the Constitution they have the right to expend the money in this way, and this limitation is one which says that you can not expend this money in violation of the Constitution of the United States. If they want to protect the cotton, it is their duty to prevent this importation of cotton altogether, but by an order of the executive department, something this Congress can not do, you are vesting that board with a power that Congress itself has not the power to enforce.

But I am unwilling to give that much power to any single department of this Government. I do care how it may affect the southern cotton interests so far as this bill is concerned. I will support the Constitution of the United States. But the Secretary of Agriculture should, by the proper means, ascertain whether or not the cotton so imported has been exposed to this weevil or worm, and then should shut out altogether, as he ought to do under his oath of office, the cotton which has been exposed to this worm. But cotton which has not been exposed to this worm and tends in no way to bring the weevil into this country should be shipped into all the ports of all the States just alike.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes more.

The CHAIRMAN. Is there objection?

Mr. STAFFORD. Mr. Chairman, reserving the right to object, I presume the gentleman will be able to conclude in those five minutes.

Mr. SISSON. Yes.

Mr. ADAMSON. Will the gentleman yield to me for a second?

The CHAIRMAN. Is there objection?

Mr. ADAMSON. I want to suggest one thing.

The CHAIRMAN. Is there objection to the gentleman's request?

Mr. LEVER. Mr. Chairman, reserving the right to object, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in six minutes.

Mr. McLAUGHLIN. I want a couple of minutes.

Mr. LEVER. Eight minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on the paragraph and amendments thereto close in——

Mr. LEVER. Ten minutes.

The CHAIRMAN. Ten minutes. Is there objection? [After a pause.] The Chair hears none. Now the question is on the request of the gentleman from Mississippi that he be allowed to proceed for five minutes.

Mr. MOORE. Mr. Chairman, reserving the right to object, I would like to have two or three minutes on this.

Mr. LEVER. The time is in the control of the Chair, I will say to the gentleman from Pennsylvania.

Mr. MOORE. I understood that the gentleman intended to grant two minutes to the gentleman behind him.

Mr. LEVER. He said he is not certain he may need it. I will give the gentleman one minute.

Mr. MOORE. This, I understand, is the selection of certain ports through which the exports of this country shall go?

Mr. SISSON. The amendment was to prevent it.

Mr. MOORE. The amendment indicated that no money shall be spent for the purpose of particularizing with regard to ports.

Mr. HEFLIN. I will say the amendment, as I understand it, is against the cotton coming from an infected region.

Mr. BARTLETT. It does not say anything of the kind.

The CHAIRMAN. The unanimous-consent request of the gentleman from South Carolina has not been objected to. Is there objection?

Mr. BARTLETT. I ask unanimous consent that the agreement may be modified as to time and make it 12 minutes, so that Mr. MOORE may have 2.

Mr. LEVER. I will make it 12 minutes.

The CHAIRMAN. The gentleman from South Carolina modifies his request and asks that the debate on this paragraph and all amendments thereto close in 12 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. ADAMSON. Will the gentleman now yield?

Mr. SISSON. For a short question.

Mr. ADAMSON. If cotton or any other property or individuals are required to perform quarantine, must not that be done first?

Mr. SISSON. Absolutely.

Mr. ADAMSON. Let that be done first and then give equal right of access to all ports.

Mr. SISSON. That is my position exactly. Now, gentlemen, if you will note the order of the Agricultural Department, it excludes the importation into this country of all cotton, whether infected or not, named and specified in the order, and that is all the cotton that is raised in the world except Indian cotton, and it prevents it from coming into ports except those three ports—Boston, New York, and San Francisco. Now, my position is that in the exercise of quarantine power of the United States you must first ascertain that there is something wrong with the subject matter quarantined. If a man can by a proper regulation act certify under proper authority that the cotton he endeavors to ship into any port of the United States has not been infected by the boll weevil or the pink boll weevil, then I say in the name of justice, in the name of the Constitution, he has the right to import that cotton into the United States. And I am unwilling that a body of men who are appointed by the Secretary of Agriculture, vested under the statute with certain powers in reference to quarantine—that they may set aside a specific provision of the Constitution under the guise of quarantine regulations. Now, if the cotton is infected, no man wants that cotton imported into this country, and if they will make an order in accordance with such authority unquestionably all the cotton growers of the South will be absolutely protected. Now, I have declined to vote for a duty on cotton. I raise cotton which is a long-staple cotton, which could be protected 5, 6, 8, 9, or 10 cents a pound. Whatever amount of protection is placed upon it would inure to my private benefit, because we raise a million bales less long-staple cotton than actually comes into the United States, but you are putting a quarantine upon cotton and making an absolute prohibition on the cotton, except you ship into these two favored ports on the eastern seaboard and one on the west.

Now, gentlemen, I do not believe that I am looking in the face of men who are willing to say that this amendment of the gentleman from Georgia [Mr. BARTLETT], which provides that none of this money shall be expended for the purpose of evading the provision of the Constitution which says that no port in any one State shall receive preference over another port, and if the quarantine authorities want to see a quarantine so as to protect the southern cotton grower, let them require a proper and safe provision that the cotton shipped into any of these ports is not infected by the boll weevil, and it will come.

And then, when that is done, I want to see the ports of Delaware and the ports of Pennsylvania, and the ports of all New England, and the other ports where it would not affect them—I want to see all those ports receive absolutely the same treatment. The cotton that would be infected, if you please, could be admitted, if they saw fit and proper, into those ports where the boll weevil could not spread to that cotton which is not affected. I take it that no man will hold that the infected cotton should be subject to quarantine regulations if that cotton is not shipped into all the ports of the United States alike. Then you would not be violating the provisions of the Federal Constitution.

I do not know anything personally about the effect of the pink boll weevil, but I do know that they are raising a great deal of cotton in Egypt. I do know that Egypt is prospering in the cotton-raising business, notwithstanding the weevil. I do know that the islands of the sea, where they say they have it, are producing about a million bales, which is being imported into the United States every year. If that be true, it is not doing much harm. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired. The Chair will yield two minutes to the gentleman from Michigan [Mr. McLAUGHLIN].

Mr. McLAUGHLIN. Mr. Chairman, I hope this amendment will not prevail. Some of you remember the difficulty we had in securing passage of the Simmons law, which came from the

Committee on Agriculture, the law under which this quarantine board was established. When the bill was before the House you were given facts and conditions which showed the necessity of enacting it into law. You were told that nearly every one of the pests and diseases which prevail in this country was brought in from a foreign country, and that its coming might have been prevented if we had had such a law as this Simmons law and a quarantine board such as has been organized under that law, so that foreign pests and diseases could have been shut out. Their coming has caused a loss of millions of money and the destruction of untold millions of property. This quarantine board inspects products coming or offered for import from foreign countries, and forbids altogether the entry of those which are very dangerous. The board is composed of well-informed and intelligent men, and is doing its duty. Do not tie the hands of these men in this important matter.

Mr. HULINGS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Michigan yield to the gentleman from Pennsylvania?

Mr. McLAUGHLIN. I can not yield in two minutes.

The CHAIRMAN. The gentleman declines to yield.

Mr. McLAUGHLIN. Do not yield to a demand based on nothing except local pride or a desire to secure temporary local advantage. If you embarrass this board or interfere with or prevent its free and vigorous action you may be opening the door for the introduction into this country of a new cotton pest more dangerous to and destructive of our cotton crop than even the boll weevil or any other cotton pest with which we now have to contend. I urge you not to do it. [Applause.]

The CHAIRMAN. The gentleman from Michigan used only one minute. The Chair will yield one minute to the gentleman from Mississippi [Mr. HUMPHREYS].

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I hope the amendment will not prevail. My colleague [Mr. SISSON] is a constituent of mine [laughter], and I want to protect him from this pink boll worm which has wrought such frightful havoc in the cotton fields of Egypt. While I commend my constituent, of course, for his stand in behalf of the Constitution and his effort to protect the Constitution from the ravages threatened by the Committee on Agriculture, yet I feel that my duty to him as a constituent requires me to plead with this House to protect him and his delta plantation from the ravages of this Egyptian pink worm, which if it is imported into this country will add one more tremendous burden to the cotton farmers of the South and to my district.

As I understand his contention, it is, because the Constitution forbids that any preference shall be given one port over another port, that therefore no quarantine can be declared or enforced at one port unless it be similarly enforced at all other ports. If a quarantine is established at New Orleans or Galveston against yellow fever, then Portland, Me., and Juneau, Alaska, must be quarantined also. I can not believe that this argument will appeal very strongly to the southern cotton growers as a reason for leaving the southern ports open for the importation of this new plague of Egypt, which the department experts declare is more destructive to the cotton plant than the boll weevil.

The department, under the bill as it is now, will quarantine against importations of Egyptian cotton into any southern port where this pink worm can live, and it will do so because it has been discovered that in this way this pest has actually been brought across the seas from Egypt to Boston. If that were the end of it, all would be well, because the worm can not live in New England and reproduce its species; but because some cotton mills in the South are beginning to spin Egyptian cotton they are protesting that this quarantine against southern ports is giving a preference to ports of New England, and this amendment, if adopted, would prevent it.

My colleague says he does not object at all to Egyptian cotton being imported into this country, although it does compete directly with the Bender cotton of the Mississippi Delta. His sole objection is that the law which will forbid the importation through southern ports is unconstitutional.

Then, too, he discounts the damage which this pink worm can do. He says they raise cotton in Egypt in spite of the worm. I may say they raise cotton in Texas in spite of the boll weevil, yet my colleague has always voted for appropriations to prevent the spread of the boll weevil.

Mr. MOORE. Mr. Chairman, there has been a decided increase recently in importations of Egyptian cotton. I do not wonder that our southern friends are alarmed at that fact. There was also a great increase in the importation of Irish and Bermuda potatoes, and I do not wonder that our friends on the other side, and their Department of Agriculture, took occasion to levy a quarantine up yonder in the State of Maine to protect the Maine farmer from the disastrous effects of a low tariff.

But what I object to in this particular matter is that we should allow one of the departments of this Government to fix the channel depth of our ports and centralize our business at three places. There has been no great alarm over the Egyptian boll weevil. That is largely imaginary, or has been up to this time. In our part of the country we need the raw materials, and we want to buy them and keep the mills going. I am inclined to agree with the gentleman from Georgia [Mr. BARTLETT] and the gentleman from Mississippi [Mr. SISSON] that all our ports should be treated alike. There is not one port from the extreme southern point of the Atlantic coast up to New York that equals in depth of water the ports of New York and Boston, and the department order which the gentleman from Georgia proposes to restrict therefore would close out the other ports where the business of cotton manufacturing along the Atlantic seaboard is conducted. The great ocean leviathans that go into New York can not go into a single South Atlantic port. What we need along the coast is not monopoly at one or two ports, but wholesome competition.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired. The gentleman from South Carolina [Mr. LEVER] has three minutes.

Mr. LEVER. Mr. Chairman, this is a very important proposition which the gentleman from Georgia [Mr. BARTLETT] has sprung upon the House. The Egyptian pink worm is described to me by experts of the Department of Agriculture as being a cotton pest much more destructive than the boll weevil. Now, what they have done is to quarantine certain southern ports against the importation of Egyptian cotton seed or Egyptian cotton. It is not for the purpose of playing any favoritism to anybody, but for the purpose of protecting our cotton growers of the South, and in my opinion there could not be a worse amendment proposed, as far as the cotton growers are concerned, than the amendment offered by the gentleman from Georgia. We have enough of pests now. We are spending thousands of dollars in this bill to fight cotton pests and potato pests and all kinds of pests, and now for us in this amendment to throw the doors wide open to the world and say, "Bring in your pests"——

Mr. BARTLETT. It does not do that——

Mr. LEVER. It does not seem to me to be in keeping with the logic of the situation.

Mr. Chairman, I ask for a vote. I withdraw my point of order, Mr. Chairman.

Mr. BARTLETT. Mr. Chairman, I wish to have the amendment read again, so that the committee may see that the gentleman from Alabama and the gentleman from South Carolina have misstated the amendment.

The CHAIRMAN. If there be no objection, the amendment will be again reported.

The Clerk read as follows:

Amend, on page 74, line 2, by adding at the end of the line, after "$50,000," the following:

"*Provided*, That no part of the sum in this paragraph or this act appropriated shall be used or expended in the enforcing of any rules, orders, or regulations promulgated by the Secretary of Agriculture, which have for their purpose and intention to, and do in effect, give preference to the ports of one State over those of another."

The CHAIRMAN. The question is on the amendment of the gentleman from Georgia.

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. BARTLETT. I want to see who will vote for the Constitution. Mr. Chairman, and I ask for a division.

The committee divided; and there were—ayes 19, noes 63.

Accordingly the amendment was rejected.

The Clerk read as follows:

Domestic potato quarantine: To enable the Secretary of Agriculture to cooperate with those States in the inspection of Irish potatoes where a quarantine has been or hereafter shall be established by the Secretary of Agriculture, prohibiting the movement of such potatoes from any State into any other State, District, or Territory of the United States except under such rules and regulations as he may prescribe, and for the enforcement of such rules and regulations, and for the employment of persons and means necessary in the city of Washington and elsewhere, including rent outside of the District of Columbia, $50,000.

Mr. GUERNSEY. Mr. Chairman, I offer an amendment to this paragraph.

The CHAIRMAN. The gentleman from Maine offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 74, line 13, by striking out "$50,000" and inserting in place thereof "$100,000."

Mr. LEVER. Mr. Chairman, before the gentleman proceeds I ask unanimous consent that debate on this pargaraph and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this paragraph and all amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. GUERNSEY. Mr. Chairman, last year there was an appropriation of $50,000 for the inspection of potatoes in Maine under the quarantine regulations. That was for the fiscal year 1915. Up to the 1st of last December the department was able, with this appropriation, to take care of all the expenses of the inspection. Since December 1, owing to the insufficiency of the appropriation, it has been found necessary to impose a tax of $2 per car on the potato shippers, which will result, before the Maine crop is moved, in the shippers having to contribute nearly $50,000 to carry on the Government inspection. In order to prevent that recurring next year I have offered this amendment to increase this appropriation to $100,000, the amount that is estimated and recommended by the horticultural board.

I believe that the Federal Government should assume the entire expense, for the reason that in the inspection of meats which enter into interstate commerce the Government pays the whole bill. We inspect grain which enters into interstate commerce, and the Government pays the whole bill. Both of these are food products. Potatoes are a food product. The potato shipper in Maine, in my opinion, should be accorded the same treatment that the beef packer and the grain-elevator man receives. I hope that the chairman of this committee will not oppose this increase, which is absolutely necessary to provide sufficient funds for the department to pay the whole expense of the inspection and moving of the potato crop in Maine and relieve the burden now imposed upon the shippers, a burden that in equity should be borne by the Government, as a very small proportion of the great potato crop in Maine is to-day infected; nevertheless the entire crop has to be inspected and will until the quarantine is raised. It costs a good deal to inspect thirty or forty million bushels of potatoes. I appreciate the fact that the department, through the well-directed efforts of the members of the horticultural board and W. Blair Clark, superintendent of this service in Maine, is doing excellent work, and with this appropriation will wipe out the last suspicion of infection and give to Maine potatoes what is their due—a clean bill of health. This inspection is in the interest of the whole country, as Maine seed potatoes enter many States. For that reason the whole expense should be assumed by the Federal Government.

Mr. MOORE. Will the gentleman yield?

Mr. GUERNSEY. I will yield to the gentleman with pleasure.

Mr. MOORE. The farmers themselves are paying the excess over the appropriation of $50,000 of the expense not required to make the inspection?

Mr. GUERNSEY. The shippers and the farmers will during the next few months as the crop is shipped from the State.

Mr. MOORE. They have arranged to pay that out of their own pockets?

Mr. GUERNSEY. They will be assessed $2 a car.

Mr. MOORE. Which is a condition that does not prevail in any other State that the gentleman knows of?

Mr. GUERNSEY. I know of no such situation elsewhere; in fact, as I have already pointed out, the Government in other inspections of food products for shipment pays the whole expense, as the inspection is for the protection of the whole country. If the additional amount is not allowed here, we will have to ask the Senate to make allowance; but the House should provide for it now.

Mr. BRYAN. Maine is a prohibition State. [Laughter.]

The CHAIRMAN. The question is on the amendment of the gentleman from Maine [Mr. GUERNSEY].

The question was taken, and the Chairman announced that the noes appeared to have it.

On a division (demanded by Mr. GUERNSEY) there were—ayes 15, noes 50.

Accordingly the amendment was rejected.

The Clerk read as follows:

International Dry Farming Congress, Denver, Colo.: To enable the Secretary of Agriculture to cooperate with and make an exhibit at the next annual meeting of the International Dry Farming Congress, to be held at Denver, Colo., during the fiscal year ending June 30, 1916, illustrative of the investigations, products, and processes relating to farming in the subhumid region of the United States, including labor and all expenses in the city of Washington and elsewhere, $20,000.

Mr. HARRISON. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentleman from Mississippi reserves a point of order.

Mr. HARRISON. When is this congress to be held?

Mr. LEVER. It is to be held during the year.

Mr. HARRISON. Did not the Secretary of Agriculture state to the committee that it was useless to make this appropriation now?

Mr. LEVER. The Secretary made no recommendation whatever; but I will say to the gentleman that there have been held about five of these international dry-farming congresses, starting somewhere in Canada. Usually this provision has been put in on the Senate side. Our committee heard gentlemen interested in this proposition, and believing that the item would be put into the bill in the Senate, and believing that it was a good item, agreed to report it. It is subject to a point of order.

Mr. HARRISON. It was my impression that the Secretary stated that it would be too late when this congress was held for the appropriation to do any good.

Mr. LEVER. The Secretary of Agriculture did not estimate for this and made no statement about it one way or the other.

Mr. HARRISON. I withdraw the point of order.

Mr. BOOHER. I make the point of order.

Mr. MONDELL. Will the gentleman reserve the point of order just a moment?

Mr. BOOHER. I will reserve the point of order for the present.

Mr. MONDELL. Mr. Chairman, the International Dry Farming Congress was organized some 10 or 12 years ago and has been doing a great work in the West. I think four years ago we made the first appropriation for representation at that dry-farming congress. Last year we made an appropriation of $20,000 for the congress at Wichita. At that congress, in my absence, the presidency of it was wished onto me. I may say, therefore, that I am somewhat responsible for this item. It is a great work that is being done out there under the auspices of this congress. We have been appropriating for it in the past. I believe it is a good item. I do not want to ask the House to provide for it on the ground that I am officially connected with the congress, but I want to suggest, as my friend the chairman of the committee has suggested, that the item will probably be put in at the other end of the Capitol in any event, and it seems to me we might quite as well take care of it here. It is a worthy work, and a splendid exhibit will be made.

Mr. LEVER. If the gentleman will permit, I will say to him that this congress was held in Kansas last year at Wichita, and the item was put in on the floor of the House largely as a recognition of the personal friendship of the gentleman from Kansas [Mr. MURDOCK], although all of us recognized that it was really a good educational proposition.

Mr. MONDELL. I will say to my friend, further, that the dry-farming congress is to-day doing a work that is adding to the agricultural, particularly to the grain-producing area of the country, vast acreages that heretofore have been considered only useful and valuable for grazing. The dry-farming movement has added a great many more of grain and cereal products to the country and will add a greater area. It deals with the intensified, scientific, thorough farming methods, methods valuable not only to that dry region, but in the country at large. It is a great work, a work that is adding more to the agricultural acreage of the country than any other that I know of.

The CHAIRMAN. Does the gentleman from Missouri insist on his point of order?

Mr. BOOHER. I insist on the point of order.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

The Clerk read as follows:

Cooperative fire protection of forested watersheds of navigable streams: For cooperation with any State or group of States in the protection from fire of the forested watersheds of navigable streams under the provisions of section 2 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," $100,000.

Mr. MARTIN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amend, page 75, by inserting after line 15 a new paragraph, as follows:

"EXPERIMENTS IN DAIRYING AND LIVE-STOCK PRODUCTION IN SEMIARID AND IRRIGATED DISTRICTS OF THE WESTERN UNITED STATES.

"To enable the Secretary of Agriculture to conduct investigations and experiments in problems connected with the establishment of dairying and meat production enterprises on the semiarid and irrigated lands of the western United States, including the purchase of live stock, the erection of barns and other necessary buildings, and the employment of necessary persons and means in the city of Washington and elsewhere, $87,500."

Mr. LEVER. Mr. Chairman, I make a point of order to that.

Mr. MARTIN. If the gentleman is going to make the point of order, I want to be heard. If he does not intend to make it, I do not want to take up the time.

Mr. LEVER. I will state the proposition in the committee and let the committee vote on it.

Mr. MARTIN. I do not think the paragraph is subject to a point of order, and I do not care to take up the time with the discussion of it unless the gentleman seriously makes it.

Mr. LEVER. The gentleman from South Dakota is so fine a man that I am going to withdraw the point of order and put the proposition up to the House.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order.

Mr. SHACKLEFORD. I make the point of order.

The CHAIRMAN. The gentleman from Missouri makes the point of order.

Mr. SHACKLEFORD. I will withdraw it.

Mr. MARTIN. Mr. Chairman, I will not take the time to discuss the point of order unless it is made, in which case I desire to be heard.

The CHAIRMAN. The gentleman from Wisconsin reserves the point of order.

Mr. MARTIN. Mr. Chairman, the Secretary of Agriculture made a request for this item as the result of a committee investigation from his department. There is a full statement of the merits of the item in the hearings before the Agricultural Committee. The Secretary asked for two items of this general character. This one I have referred to for dairying in connection with certain public farm experiment stations that the Government is maintaining in the West, one in the Panhandle region in Texas, and the others farther north, covering the Great Plains and some arid regions. He asked for $60,000 for similar experimental work in the cotton and cane growing regions of the South. In the language of the Scripture, one was taken and the other left. I desire you to consider the request of the Secretary. In his estimate is the following note, which I will read:

NOTE.—This is a new item, and carries an increase of $87,500. The field stations of the department in the semiarid and irrigated districts of the United States have in the past been devoted almost entirely to the production of crops. Methods have been established on these stations that make it possible now to produce large forage crops in these districts with a considerable degree of success; but such crops are not marketable, for the reason that in most cases there are no near-by cities and there is no demand for them in the immediate neighborhood in which they are produced. The profitable utilization of these crops on the farm, therefore, is essential to successful farming in these regions. For the purpose of establishing proper methods of feeding, along with the natural grazing that is afforded, it is the desire of the department to place live stock at several of the field stations in the semiarid and irrigated districts of the United States, and thereby make the production of field crops profitable and at the same time increase the production of live stock. If this work is provided for, attention will be given both to dairying and meat production, and this will make these field stations serve as guides to the farmers in these regions not only in crop production but also in the profitable utilization of these crops for the production of live stock.

I may say that in the Great Plains area, covering something like 500,000,000 acres, upon which the Government still has in the neighborhood of 300,000,000 acres of public land, there are being carried on efforts to utilize these vast regions by dry-farming methods and otherwise. We have established certain stations for dry farming and experimental work, and they are succeeding in growing varied crops, and every man who goes there—every individual farmer as well as the Government—must depend ultimately upon the utilization of the forage crops far from market by raising live stock and the promotion of dairy interests. The proposal is to carry on dairying in experimental work at these stations, and in that way have some valuable data to pass on to the settler as he comes into the country and help him solve the problem.

In other words, the Government, in an experimental way, is reaching out to conduct this work in aid of the settler because he is not able, in many instances, to do this practical work for himself. They are seeking to learn how to grow forage crops in this area and the use of them, in the way of selection of proper breeds of stock and data of a scientific and statistical kind that will tell the settler, the farmer, whether certain classes are profitable and what are unprofitable, and so help him to solve this great problem, in which the entire country is interested.

The Department of Agriculture, in its efforts to make the results of its work of practical benefit not only to the experiment stations but of practical value to the men who are to be guided by their efforts, should have some opportunity to make these experiments with dairy and other live stock——

The CHAIRMAN. The time of the gentleman has expired.

Mr. MARTIN. I ask for two minutes more.

The CHAIRMAN. The gentleman from South Dakota asks unanimous consent to proceed for two minutes. Is there objection. [After a pause.] The Chair hears none.

Mr. MARTIN. Mr. Chairman, I am not suggesting to this committee that they have made a distinction against one section of the country over another, but because of the vast merits of this question I do suggest that if we are to expend money in only one locality, in an effort to enlarge the stock production and dairy production of this country, it ought to be spent in this vast area of the West, the natural home of the live-stock industry, rather than to put it down in the cane and cotton-growing sections of the South, where there is great doubt whether we can ever develop a great live-stock country or not. The mere fact that the committee put in an item of $60,000 for this work in the South a year ago, and submits another item appropriating $60,000 in the next section of this bill, is no reason why the work in such direction should be confined to that section of the country. It is desirable to place a fund in the hands of the Secretary of Agriculture to do this experimental work, of value not only to the department but to the settlers who are pioneers of the country in building up these new communities.

Mr. STAFFORD. On the reservation of the point of order, is the gentleman ready to submit the matter to a vote?

Mr. LEVER. I only desire to make a brief statement of one minute.

Mr. STAFFORD. I withdraw the point of order.

Mr. LEVER. It is true the Secretary of Agriculture estimated for it; but the committee in making up this bill did not allow any new projects whatever, although many of them were meritorious, unless the project was in the nature of an absolute emergency. Therefore I ask that the amendment be voted down.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from South Dakota.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. MARTIN. Division, Mr. Chairman.

The committee divided; and there were—ayes 17, noes 50.

So the amendment was rejected.

The Clerk read as follows:

Experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States: To enable the Secretary of Agriculture, in cooperation with the authorities of the States concerned, or with individuals, to make such investigations and demonstrations as may be necessary in connection with the development of live-stock production in the cane-sugar and cotton districts of the United States, including the erection of barns and other necessary buildings and the employment of persons and means in the city of Washington and elsewhere, $60,000.

Mr. MARTIN. Mr. Chairman, I make a point of order on the item.

Mr. LEVER. Mr. Chairman, I hardly think it is fair after the treatment that has been given the gentleman. I concede the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. FORDNEY. Mr. Chairman, what disposition was made of the item? Has the paragraph gone out?

The CHAIRMAN. The paragraph went out.

Mr. FORDNEY. Mr. Chairman, I want to offer an amendment, which I will offer as a new paragraph, and I wish to have it amended so it will read $10,000 instead of $70,000.

The CHAIRMAN. The Clerk will report the amendment with the necessary correction.

The Clerk read as follows:

Amendment offered by Mr. FORDNEY: Page 75, line 26, after the word "elsewhere," strike out "$60,000" and insert "$10,000," and add the following language: "*Provided*, That of this amount $10,000 may be used in one or more of the States in which sugar beets are extensively grown, to make investigations and experiments to determine the value of sugar-beet tops for the feeding of cattle and other live stock."

Mr. LEVER. Mr. Chairman, I reserve a point of order.

Mr. MANN. I would like to ask where this amendment comes in?

Mr. FORDNEY. The amendment is to the paragraph which was stricken out, but I offer it as a new paragraph.

Mr. MANN. I know, but it provides of this amount, and the amount has been stricken out.

Mr. FORDNEY. I offer it in the sum of $10,000.

Mr. GARRETT of Tennessee. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Hereafter the Secretary of Agriculture is authorized to sell in the open market or to exchange for other live stock such animals or animal products as cease to be needed in the work of the department, and all moneys received from the sale of such animals or animal products or as a bonus in the exchange of the same shall be deposited in the Treasury of the United States as miscellaneous receipts.

Mr. GUERNSEY. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After line 7, page 76, insert the following:

"To enable the Secretary of Agriculture to carry on experiments and demonstrations in live stock in the Eastern States, including the maintaining in these States breeding animals, to promote the raising of

beef cattle, and to offer prizes and bounties in counties or other subdivisions of the States to encourage the development of the beef-raising industry of these States, $50,000.

Mr. GUERNSEY. Mr. Chairman, this amendment does not come in where I expected it might, as the paragraph which related to a similar subject was stricken out on a point of order; nevertheless I wish to address the House briefly.

The CHAIRMAN. Does the gentleman from South Carolina reserve the point of order?

Mr. LEVER. I reserve a point of order.

Mr. GUERNSEY. Yes.

Mr. MURRAY. Will the gentleman yield?

Mr. GUERNSEY. For a question.

Mr. MURRAY. I want to know if the gentleman agrees to add five thousand to experiment in dairying.

Mr. GUERNSEY. Mr. Chairman, the reasons I offer this amendment are these: The Secretary of Agriculture in his recent annual report stated, with reference to the decrease of our meat supply, that we could no longer look to the ranges to settle this question; we must look to the settled farming areas of the country for an increase in our meat supply. In order to awaken interest in the raising of more beef in the settled farming areas it seems to me that some action must be taken by the Federal Government.

The proposal set forth in the amendment is just a suggestion of what the Secretary of Agriculture might be authorized to do toward encouraging the raising of beef cattle; Federal prizes and bounties should be much sought after, and undoubtedly would awaken great interest among breeders, and breeding stations established by the Government in the States, under the direction of the Secretary of Agriculture, might be of great value in establishing the right breeds of beef animals.

In New England within the last 20 years they have fallen off something like 250,000 head, and what is true of New England is true also of all the Eastern States, where during that period the shrinkage has been near a million head. If the Federal Government should take some steps that would encourage the industry, or that would attract attention to it, they might revive it in those States, where a very large proportion of our population is and always will be. In the near future I hope to address the House more fully than the present time permits relative to the proposal set forth in the amendment that I have offered.

I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD by inserting some data on the number now and in the past in the Eastern States.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Following are the figures referred to:

Number of cattle on farms and ranges (excluding calves).

States.	1890	1900	1910
New Jersey	212,052	200,299	195,055
Pennsylvania	1,706,418	1,475,524	1,350,863
Delaware	51,844	44,817	47,833
Maryland	267,189	237,181	248,687
Ohio	1,763,387	1,558,729	1,581,925
Maine	299,110	277,053	224,622
New Hampshire	222,898	186,358	149,228
Vermont	395,288	400,356	362,741
Massachusetts	256,128	242,323	226,845
Rhode Island	34,777	30,696	30,375
Connecticut	203,661	179,758	174,717
New York	2,131,392	2,089,249	1,984,674
Total	7,544,136	7,022,343	6,577,575

Mr. LEVER. Mr. Chairman, I withdraw the point of order and call for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Maine [Mr. GUERNSEY].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Naval stores investigations: For investigating the grading, weighing, and handling of naval stores, and preparation of definite type samples thereof, including the employment of necessary persons and means in the city of Washington and elsewhere, $5,000.

Mr. HARRISON. Mr. Chairman, I move to strike out the last word.

Mr. MOORE. Mr. Chairman, I make a point of order against that paragraph.

Mr. HARRISON. I hope the gentleman will not make a point of order to that item.

The CHAIRMAN. The gentleman from Pennsylvania makes a point of order against the paragraph.

Mr. MOORE. Five thousand dollars is not sufficient to start a bureau.

Mr. HARRISON. I hope the gentleman will not make the point of order. This is a very important provision. It only carries $5,000, and means much to the naval stores industry of the South.

Mr. MOORE. That is the whole trouble. Five thousand dollars would not begin to start a bureau like this, but if the gentleman wishes to make a statement, I will reserve the point.

Mr. HARRISON. If the gentleman would investigate, he would not make a point of order against this provision.

Mr. STAFFORD. Mr. Chairman, a similar provision authorizing a leather investigation went out on a point of order, and I think a point of order should be made on this.

Mr. MONDELL. I hope the gentleman from Wisconsin will not make a point of order.

Mr. STAFFORD. I am merely making a statement for the information of the gentleman from Mississippi [Mr. HARRISON].

Mr. HARRISON. This item was carried for the first time in the last Agricultural appropriation bill. It affects an industry that has been crippled probably more than any other industry in the country recently. The products of the naval stores industry have just been declared to be contraband of war. They are not allowing resin and other naval stores products now to be shipped to Germany or Austria, and therefore, to a very large extent, the markets of the world have been cut off from the manufactures in this country. They are having a hard time, and everything should now be done to encourage and aid them.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. HARRISON. If I have the floor I will.

Mr. MOORE. Does the grading and handling of naval stores in any way affect the farmer, or the forester, or the man who owns the timber?

Mr. HARRISON. It benefits the man who owns 120 or 160 acres of timberland as well as the manufacturer and the employer in the industry. They have what they call a southern grading of resin and what they call a New York grading—one is a cheaper grading than the other. In other words, the producer might sell his products on the southern grading and the broker resell on the New York grading, thereby obtaining a better price on the grading, where there is little difference in the grading and quality, than the producer obtained. This appropriation is to investigate that difference in the grading and obtain if possible a universal standard of measurement and grading and classification.

Mr. MOORE. I want to ask the gentleman this question, and then I will be through. Is the weighing, grading, and handling of naval stores of more advantage to the farmer or the man who owns the forest and caps the trees than it is to the man who has been heralded here from time to time to-day as a speculator?

Mr. HARRISON. Oh, the speculator gets nothing out of this $5,000 appropriation. It is to protect the producer of resin and spirits of turpentine and aid the men who are actually and bona fide in the business.

Mr. STAFFORD. Would the gentleman conclude if I withdrew the point of order?

Mr. HARRISON. To be sure; yes. Mr. Chairman, I thank the gentleman for withdrawing his point of order. I withdraw my pro forma amendment.

The CHAIRMAN. The gentleman from Mississippi withdraws his pro forma amendment. The Clerk will read.

The Clerk read as follows:

That not to exceed $55,000 of the lump-sum appropriations now available or herein made for the Department of Agriculture shall be available for the purchase, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles and motor boats necessary in the conduct of the work of the Department of Agriculture: *Provided*, That not to exceed $15,000 of this amount shall be expended for the purchase of such vehicles and boats, and that such vehicles and boats shall be used only for official service: *Provided further*, That the Secretary of Agriculture shall on the first day of each regular session of Congress, make a report to Congress showing the amount expended under the provisions of this paragraph during the preceding fiscal year.

Mr. MOORE. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE] reserves a point of order on the paragraph.

Mr. LEVER. Mr. Chairman, the matter is not subject to a point of order at all. I hope the Chair will pass upon the proposition. I insist that the Chair rule upon the proposition.

Mr. MOORE. This is new legislation, is it not?

Mr. LEVER. No. Two or three Chairmen have ruled on it. I do not care to argue the question. The Chair is familiar with it.

Mr. MOORE. Mr. Chairman, I would like to inquire, before the Chair rules, whether this has been provided for in the law; whether there is any statutory law justifying the admission of this new item as legislation upon an appropriation bill?

Mr. LEVER. I hardly think it is necessary to argue the point of order to the Chair. It was passed upon in connection with the Indian appropriation bill and later on the Army bill and held to be in order. I think it is in order on this bill. It is nothing more nor less than a segregation of appropriations.

Mr. MOORE. Mr. Chairman, I ask the gentleman to produce the statutory law which provides for the inclusion of this item in this bill.

Mr. LEVER. If the Chair wants that, the gentleman can give it to him.

Mr. MOORE. I ask that because the gentleman does not explain the item and wants the Chair to rule.

Mr. MANN. If the Chair has not the law before him, it is section 5 of the legislative appropriation act for the current year.

Mr. STAFFORD. But, Mr. Chairman, that law that the gentleman from Illinois refers to has no applicability to the Agricultural appropriation bill.

If the Chair will indulge me, the Chair has ruled on the question referred to by the gentleman from Illinois, as a limitation on the action of the department heads in the disbursement of lump-sum appropriations, that there must be specific appropriations for automobile service before the department heads will be authorized to spend the money for that character of service.

Now, the question before the Chair is whether there is any authority in law for the Agricultural Department to invest moneys in automobiles. The gentleman from South Carolina [Mr. LEVER] has frequently relied upon the organic act, that its purpose is to acquire and diffuse useful information relating to agriculture. It must be a very far-fetched argument to hold that on that ground you can justify the purchase of anything and everything for the dissemination of information. As far as the Indian Service and the war service and the Postal Service are concerned, it has been held that the character of those services naturally presupposed the having of conveniences, like automobiles, for the use of those services; but I question whether there is any substantive law which authorizes the Agricultural Department to purchase automobiles.

The CHAIRMAN. The Chair will ask the gentleman this question: If the law directs the Department to do certain things, does it not imply the right of Congress to furnish the means to carry out the duties which the law imposes upon the head of that department?

Mr. STAFFORD. I think the Chair is going pretty far in holding——

The CHAIRMAN. The Chair has not held anything yet. The Chair is asking the question.

Mr. STAFFORD. I should say that any Chairman would be going pretty far to authorize anything which might be held to be a means of conveyance or communication.

Mr. MANN. Mr. Chairman, it seems to me the matter is very simple. It would be silly to say, first, that the Department of Agriculture could not expend any money for transportation. It would be ridiculous to say that they could not spend any money for the payment of freight charges. Yet there is no distinction between one kind of transportation and another. Years ago, on the military bill, the Chairman held distinctly that Congress had the same power to provide motor vehicles that it had to provide for the payment of freight charges; that it was all transportation; and that same ruling has been followed ever since. It is only for Congress in its judgment to determine how much the appropriation shall be. We could segregate the amount which we would allow to be expended for freight charges, as far as the appropriation is concerned.

The CHAIRMAN. The Chair thinks there is no doubt that this provision is in order, for the reasons heretofore given, and the point of order is overruled.

Mr. LEVER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 76, line 19, strike out "$15,000" and insert "$5,000."

The amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. I want to ask the gentleman from South Carolina what the boats are used for that are authorized to be purchaseed under this section of the bill?

Mr. LEVER. There will be 3 used in the Biological Survey and 26 of them in the Forest Service. They use a great many motor boats in the Forest Service in Alaska and Florida.

Mr. MADDEN. All right.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last two words. The gentleman having reduced the amount available for the purchase of new boats, does he mean to leave the same amount available for the general purposes of the paragraph?

Mr. LEVER. I do, for the reason that after the bill was printed it came to my information from the department that the maintenance allowance was not sufficient, and I looked into the matter thoroughly and became satisfied that that statement is correct.

Mr. STAFFORD. I withdraw the pro forma amendment.

The Clerk read as follows:

Hereafter all moneys received from, or deducted in settlements with, carriers on account of the loss of, or damage to, any property of the Department of Agriculture shall be credited to the appropriations or funds out of which the same was purchased.

Mr. MANN. Mr. Chairman, I make a point of order against the paragraph.

Mr. LEVER. I concede it.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Hereafter, in case of an emergency arising out of an outbreak of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious disease of animals, which in the opinion of the Secretary of Agriculture threatens the live-stock industry of the country, he may expend during each fiscal year, in the city of Washington and elsewhere, out of any money in the Treasury not otherwise appropriated, the sum of $2,500,000, or so much thereof as he determines to be necessary, in the arrest and eradication of any such disease, including the purchase and destruction, in cooperation with the States, of animals affected by or exposed to, or of property contaminated by or exposed to, any such disease: *Provided*, That any such expenditure may be made only upon the written assent of the President: *Provided further*, That a detailed statement of any such expenditure shall be submitted by the Secretary of Agriculture in the Book of Estimates.

Mr. PAGE of North Carolina. Mr. Chairman, I make a point of order against the paragraph.

Mr. LEVER. I concede it, and offer the following amendment.

The CHAIRMAN. The point of order is sustained. The gentleman from South Carolina offers the following amendment, which the Clerk will report.

The Clerk read as follows:

In case of an emergency arising out of an outbreak of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious disease of animals, which in the opinion of the Secretary of Agriculture threatens the live-stock industry of the country, he may expend during the fiscal year, in the city of Washington and elsewhere, out of any money in the Treasury not otherwise appropriated, the sum of $2,500,000, or so much thereof as he determines to be necessary, in the arrest and eradication of any such disease, including the purchase and destruction, in cooperation with the States, of animals affected by or exposed to, or of property contaminated by or exposed to, any such disease: *Provided*, That any such expenditure may be made only upon the written assent of the President: *Provided further*, That a detailed statement of any such expenditure shall be submitted by the Secretary of Agriculture in the Book of Estimates.

Mr. PAGE of North Carolina. Mr. Chairman, I make the point of order against the amendment. I do not see that it differentiates from the paragraph that just went out on a point of order, except that the paragraph undertook to make it permanent law, whereas this is new legislation and is legislation on an appropriation bill, not estimated for, and there is no law for it. On that ground I make the point of order.

Mr. MANN. Will the gentleman yield for a question?

Mr. PAGE of North Carolina. I yield to the gentleman.

Mr. MANN. I presume the provisos are subject to a point of order. Certainly the last one is; but I take it the gentleman has no desire to strike out the provisos if the rest of the amendment goes in.

Mr. PAGE of North Carolina. No; that would not effect the purpose I have in view.

The CHAIRMAN. Does the gentleman make the point of order on the proviso?

Mr. PAGE of North Carolina. No; I make the point of order on the amendment as a whole. If one goes out, all go out. I make the point of order on the entire paragraph.

Mr. LEVER. Of course the proviso is subject to the point of order.

Mr. PAGE of North Carolina. And therefore the whole amendment is subject to the point of order.

Mr. LEVER. Will not the gentleman from North Carolina reserve the point of order one moment?

Mr. PAGE of North Carolina. Of course.

Mr. LEVER. In order that I may make a very frank statement.

Mr. MANN. Let us offer such an amendment that we can get a ruling on the question, and not on an incident.

Mr. LEVER. I concede the point of order, and offer the following amendment. Will the Clerk read the amendment again, striking out both provisos?

Mr. MANN. Offer an amendment down to and including the word "disease," in line 15.

Mr. PAGE of North Carolina. Will the Clerk report the amendment as now offered?

Mr. LEVER. It is to strike out the word "hereafter" in line 6, page 77, and on line 11 insert the word "the" for "each," and put a period after the word "disease" in line 15.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend by inserting, after line 5, page 77, the following:

"In case of an emergency arising out of an outbreak of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious disease of animals, which in the opinion of the Secretary of Agriculture threatens the live-stock industry of the country, he may expend during the fiscal year, in the city of Washington and elsewhere, out of any money in the Treasury not otherwise appropriated, the sum of $2,500,000, or so much thereof as he determines to be necessary, in the arrest and eradication of any such disease."

Mr. PAGE of North Carolina. Mr. Chairman, frankly I do not think that the point of order would lie against that amendment and I do not make it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The amendment was agreed to.

Mr. LEVER. Now, Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Insert on page 77, after line 22, the following paragraph:

"To enable the Secretary of Agriculture to carry out an agreement heretofore made by and between him and the State of Washington, through its proper officers, looking to the exchange of lands and indemnity rights with said State, $50,000, or so much thereof as may be necessary, to be available until expended when the said State shall have made available a like amount to be used for carrying out the aforesaid agreement: *Provided*, That such exchanges shall be made on the basis of approximately equal area and value."

Mr. HUMPHREY of Washington. Mr. Chairman, I will only take a minute or two to explain this. This is offered at the request of the Secretary of Agriculture, and the reason why it was not included in the original bill was that the agreement between the department and the State of Washington was not entered into until the bill had been reported.

In the exterior limits of the forest reservations in the State of Washington, including the Olympus Monument, is 500,000 acres that belonged to school lands of the State of Washington. For several years we have been trying to reach an agreement whereby the land could be exchanged so as to be in a compact body, in order that the State might be able to make use of the lands and in order that the Government might not be put to the expense of caring for that 500,000 acres. This is quite a burden resting on the National Government in protecting it from fire. The State is willing to bear this expense when they take charge of it. In addition to that, the State is prohibited from cutting the timber on the land, and much of this is already overripe.

Mr. BURKE of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. BURKE of South Dakota. I wish to say to the gentleman that South Dakota effected an exchange exactly as is proposed by this amendment for the State of Washington. The Secretary of the Interior has recently held that he will not ratify the exchange, for two or three reasons. Among others is the reason that under the constitution of the State of South Dakota, which is identical with that of the State of Washington, the school lands could not be disposed of for less than $10 an acre, and that the State of South Dakota could not convey to the United States a good title in exchange, such as proposed by these exchanges that are contemplated and that have been made.

In connection with the proposition of South Dakota, we had expected to offer an amendment to this or some other bill, but we were advised by the Interior Department that they would oppose it, and that they thought the matter ought to go over until it had been fully looked into and until it was decided just what could be done in order to make the exchange valid. I doubt very much, if the proposition of the gentleman should become a law, whether it would accomplish what he is attempting by this amendment.

Mr. HUMPHREY of Washington. The Secretary has asked for it.

Mr. BURKE of South Dakota. What Secretary?

Mr. HUMPHREY of Washington. The Secretary of Agriculture.

Mr. BURKE of South Dakota. What does the Secretary of the Interior say about it?

Mr. HUMPHREY of Washington. I do not know.

Mr. STAFFORD. Mr. Chairman, this question is of too much importance to be decided at this point and at this late hour, and I make a point of order on the amendment.

Mr. HUMPHREY of Washington. I hope the gentleman will withhold it.

Mr. STAFFORD. I will withhold it if the gentleman wishes.

Mr. HUMPHREY of Washington. I have not much more to say, except that this is an advantage both to the Government and the State of Washington. This appropriation has to be made before the State appropriates its part. The State of Washington appropriates an equal amount to survey these lands. The conditions are that a great deal of timber is being wasted, timber that is ripe and can not be cut; and also timber killed by fire that can not be used.

The Government would save enough money in two or three years to pay its part of the expense.

Mr. STAFFORD. Mr. Chairman, I do not wish to pass on the merits of this proposition to-night, and therefore I make the point of order.

Mr. HUMPHREY of Washington. There have been half a dozen like cases within the last hour; why did not the gentleman make a point of order against them also?

Mr. STAFFORD. This matter has been up in the committee, as I understand, and some members voted adversely on it, and, therefore, there are two sides to the question.

Mr. HUMPHREY of Washington. All right, if the gentleman constitutes himself the guardian of these matters; but he ought to be fair about it and not single out one item and make a point of order against it and let the rest be passed upon by a vote of the committee.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Total carried by this bill for the Department of Agriculture, $22,627,712.

Mr. CANDLER of Mississippi. Mr. Chairman, I move to strike out the last word for the purpose of asking unanimous consent to extend my remarks in the RECORD at the close of the bill in order to put in some very important matter.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. CANDLER of Mississippi. Mr. Chairman, the last item in this bill reads: "Total carried by this bill for the Department of Agriculture, $22,627,712." This amount, together with about $5,000,000 permanent appropriations, makes the grand total of about $27,000,000, in round numbers, appropriated for agriculture for the next fiscal year. I assert, without fear of successful contradiction, that this money brings the best returns of any money appropriated by Congress.

When I first came to Congress the appropriations for this great business of agriculture amounted, in round numbers, to about $3,000,000. From year to year I advocated an increase of this amount, in proportion to some extent at least, to the increase and development of the great agricultural interests throughout the country, and I am glad that my efforts, together with others who agreed with me in this regard, have not been in vain, but have borne fruit to the benefit of all the people. I am a strong believer in this great department and its great work and increasing usefulness. In my judgment no department does as much for the general welfare of all the people as does this department of our magnificent Government. I read some statistics a few days ago which to me were very interesting. They are as follows:

A HALF CENTURY OF AMERICAN PROGRESS.

Since 1850 the population of the United States has more than quadrupled; there are now more than 100,000,000 people in this country.

During the past 50 years the foreign commerce of the United States has grown from $318,000,000 to $4,259,000,000, and the per capita value of exports from $16.90 to $23.27.

The national wealth has increased from $7,000,000,000 to $140,000,000,000.

The amount of money in circulation has increased from $279,000,000 to $3,419,000,000.

The value of farm property has increased from $4,000,000,000 in 1850 to $41,000,000,000 in 1910.

In 1850 there were 9,021 miles of railways in operation in the United States, and to-day there are approximately 260,000 miles.

The yearly output of factories in 1859 was $1,000,000,000; now it is over $20,000,000,000.

These statistics should be, and no doubt are, very gratifying to every true American citizen.

Whence comes this marvelous increasing wealth? Primarily, from agriculture, because it is the foundation of all our prosperity. Take away our farmers and agriculture, the result of their labors, and we would have no foreign commerce, no farm property, no railroads, no factories, no cities; but our onward march would cease, our foreign commerce would disappear, our factories would go to ruin, our railroad trains would stand still, and our centers of trade would become waste places.

[Applause.] Therefore the necessity of this great department and the manifest justice of the appropriations to sustain it in its great and continually expanding fields of activity.

In this connection I commend to the membership of the House the following poem written by S. E. Kizer, of Chicago, the city of the distinguished minority leader [Mr. MANN]. I clipped it from the Industrial Educator, of Tippah County, published at Chalybeate, Miss., which paper was sent to me by my good friend, Mr. John D. Bell, of Walnut, Miss. I commend it to you not alone for its beautiful sentiment, but because of the genuine truth it contains. It is as follows:

THE MAN BEHIND THE PLOW.

[By S. E. Kizer in Chicago Herald.]

They sing about the glories of the man behind the gun,
And the books are full of stories of the wonders he has done;
There's something sort o' thrillin' in the flag that's wavin' high,
And it makes you want to holler when the boys go marchin' by;
But when the shoutin's over and the fightin's done, somehow
We find we re still dependin' on the man behind the plow.

In all the pomp and splendor of an army on parade,
And through the awful darkness that the smoke of battle's made;
In the halls where jewels glitter and where shouting men debate;
In the palaces where rulers deal out honors great,
There is not a single person who'd be doin' bizness now
Or have medals if it wasn't for the man behind the plow.

We're buildin' mighty cities and we're gainin' lofty heights,
We're winnin' lots of glory and we're settin' things to rights;
We're a-showin' all creation how the world's affairs should run;
Future men'll gaze in wonder at the things we have done,
And they'll overlook the feller, just the same as they do now,
Who's the whole concern's foundation—that's the man behind the plow.

[Applause.]

How true it is that "there is not a single person who'd be doin' bizness now or have medals if it wasn't for the man behind the plow." For this reason I have fought for his interest, welfare, and prosperity as best I could since I have been in Congress, and expect to continue to do so so long as I am honored by a seat in this historic hall of the House of Representatives. In helping him I help everybody in my district, State, and Nation. I will never consent to take anything away from him he now has, but will always help to aid him in every possible way in his manly fight for humanity and this great Republic. I will not even consent to deprive him of the garden and flower seed, but permit me to say that it gives me pleasure to send them to every man, woman, boy, and girl in my district who will write me a postal and request me to send them a package. From the smallest to the largest benefit we can bestow, I am for them all. I am just as ready to serve all my other constituents, as I feel sure they would readily testify, because nothing makes me happier than to be useful to them all and to "scatter sunshine in the pathway of all" and bring gladness and joy to their hearts and happiness to their homes every time it is possible to do so. Allow me, in conclusion, to thank all who have aided us of the Committee on Agriculture to pass this splendid bill. [Applause.]

Mr. MAGUIRE of Nebraska. Mr. Chairman, I desire to make the same request.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. BOOHER. Mr. Chairman, I ask unanimous consent to return to the bottom of page 74, the paragraph beginning in line 21, for the purpose of withdrawing a point of order which was made against the paragraph.

Mr. STAFFORD. Mr. Chairman, I object.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent that I may offer an amendment that went out on a point of order making appropriations for an exhibit at the International Dry Farming Congress, at Denver, Colo., in October, as a new section.

The CHAIRMAN. The gentleman from Missouri made a request for unanimous consent to return to the bottom of page 74. Was there objection to returning to it?

Mr. STAFFORD. I object.

Mr. MONDELL. The gentleman did not understand my request. My request is for unanimous consent to offer this as a new paragraph at this point at the end of the bill.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to offer an amendment at this time at the end of the bill. Is there objection?

Mr. FINLEY. Reserving the right to object, will the gentleman explain his amendment?

Mr. MONDELL. It is a paragraph against which a point of order was made.

Mr. HEFLIN. It is all right, Mr. Chairman, I think.

Mr. SISSON. Mr. Chairman, I object.

Mr. HEFLIN. This proposition went out on a point of order of the gentleman from Missouri, and he desires to return for the purpose of asking unanimous consent to let it go back in the bill.

Mr. MONDELL. I hope the gentleman will not object. The gentleman probably does not understand it.

Mr. BRYAN. Mr. Chairman, I offer the amendment at the present time. Mr. Chairman, a parliamentary inquiry: Is it necessary to get unanimous consent?

The CHAIRMAN. The Chair is of opinion that it is not.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise, and report the bill and amendments to the House with recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. MONDELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MONDELL. Is there not a motion now pending? There certainly is.

The CHAIRMAN. No.

Mr. MONDELL. The gentleman from Washington made a motion to amend.

The CHAIRMAN. The gentleman did not offer an amendment but submitted a parliamentary inquiry.

Mr. BRYAN. I offered the amendment of the gentleman from Wyoming at the end of the bill.

The CHAIRMAN. It is too late; the gentleman from South Carolina has made a motion.

The question was taken, and the motion that the committee rise was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 20415, and had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. MONDELL. Mr. Speaker, I move the following amendment. After line 20, page 74, I move to insert the following.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

After line 20, on page 74, insert the following:

"International Dry Farming Congress, Denver, Colo.: To enable the Secretary of Agriculture to cooperate with and make an exhibit at the next annual meeting of the International Dry Farming Congress, to be held at Denver, Colo., during the fiscal year ending June 30, 1916, illustrative of the investigations, products, and processes relating to farming in the subhumid region of the United States, including labor and all expenses in the city of Washington and elsewhere, $20,000."

Mr. SISSON. Mr. Speaker, I make the point of order against the amendment.

The SPEAKER. What is the point of order.

Mr. SISSON. That it is legislation on an appropriation bill and that it has been held out of order in the Committee of the Whole House on the state of the Union.

Mr. MANN. It was ruled out of order.

Mr. LEVER. It is subject to a point of order.

The SPEAKER. The point of order is sustained.

Mr. LEVER. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The question was taken, and the amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. LEVER, a motion to reconsider the vote by which the bill was passed was laid on the table.

RECONSIDERING ACTION ON H. R. 20818.

Mr. MANN. Mr. Speaker, on yesterday we passed the bill H. R. 20818, which was a bridge bill, and in the bill it refers to the general bridge act as an act approved March 29, 1906. It is a typographical error and should be the act of March 23, and I ask unanimous consent that the proceedings sending the bill to engrossment and third reading and passage be vacated and that the error be corrected by making it March 23, and the bill be again put upon its passage.

The SPEAKER. The gentleman from Illinois asks unanimous consent that all proceedings on the bill H. R. 20818 be vacated back to the amendment period. Is there objection? [After a pause.] The Chair hears none. Without objection, the amendment suggested by the gentleman from Illinois is agreed to, and without objection the bill is ordered to be engrossed and read a third time.

There was no objection.

The bill was passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, upon the request of Mr. NEELY of West Virginia, Mr. BROWN of West Virginia was granted leave of absence for one week on account of personal illness.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 16 minutes p. m.) the House, under its previous order, adjourned to meet to-morrow, Friday, January 29, 1915, at 11 o'clock a. m.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting schedules and lists of papers, documents, etc., on the files of the Treasury Department which are not needed in the transaction of public business and have no permanent or historical interest (H. Doc. No. 1528), was taken from the Speaker's table, referred to the Committee on Disposition of Useless Executive Papers, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. FIELDS, from the Committee on Military Affairs, to which was referred the bill (S. 5495) authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls, reported the same with amendment, accompanied by a report (No. 1331), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. PALMER, from the Committee on Ways and Means, to which was referred the bill (H. R. 21159) to amend section 4 of the act of April 21, 1910, entitled "An act to protect the seal fisheries of Alaska, and for other purposes," reported the same with amendment, accompanied by a report (No. 1332), which said bill and report were referred to the House Calendar.

Mr. GARNER, from the Committee on Ways and Means, to which was referred the resolution (H. Res. 672) directing the Secretary of the Treasury to transmit to the House of Representatives all facts in his possession with reference to the conduct of the collector of customs of the Laredo district, in the State of Texas, reported the same without amendment, accompanied by a report (No. 1329), which said resolution and report were referred to the House Calendar.

Mr. STOUT, from the Committee on the Public Lands, to which was referred the bill (S. 3878) to validate certain homestead entries, reported the same with an amendment, accompanied by a report (No. 1336), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. ALEXANDER, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill (H. R. 21126) to authorize the change of name of the steamer *General Garretson* to *S. H. Robbins*, reported the same without amendment, accompanied by a report (No. 1330), which said bill and report were referred to the Private Calendar.

Mr. KEY of Ohio, from the Committee on Pensions, to which was referred the bill (H. R. 21218) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 1328), which said bill and report were referred to the Private Calendar.

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (S. 1377) for the relief of Alfred S. Lewis, reported the same without amendment, accompanied by a report (No. 1334), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 12075) to correct the military record of A. W. Sudduth, reported the same with an amendment, accompanied by a report (No. 1335), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 18884) for the relief of Daniel Jordan, reported the same with an amendment, accompanied by a report (No. 1333), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 20908) granting an increase of pension to Mary F. Wilkinson, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ADAMSON: A bill (H. R. 21219) providing that the Panama Canal rules shall govern in measurement of vessels for imposing tolls, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. COADY: A bill (H. R. 21220) to amend paragraph 2 of section 3264 of the Revised Statutes of the United States, as amended by section 5 of the act of March 1, 1879, and as further amended by the act of Congress approved June 22, 1910, and to amend section 3285 of the Revised Statutes of the United States, as amended by section 3 of the act of May 28, 1880, and as further amended by the act approved June 22, 1910; to the Committee on Ways and Means.

By Mr. SMITH of Texas: A bill (H. R. 21235) to detach Pecos County, in the State of Texas, from the Del Rio division of the western judicial district of Texas and attach same to the San Angelo division of the northern judicial district of said State; to the Committee on the Judiciary.

By Mr. BARTHOLDT: A bill (H. R. 21236) to dissolve the Foundation for the Promotion of Industrial Peace, and for other purposes; to the Committee on Labor.

By Mr. BAILEY: Resolution (H. Res. 714) authorizing the printing of President's message vetoing immigration bill (H. R. 6060); to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. KEY of Ohio: A bill (H. R. 21218) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; to the Committee of the Whole House.

By Mr. CLANCY: A bill (H. R. 21221) granting a pension to John F. O'Donnell; to the Committee on Pensions.

Also, a bill (H. R. 21222) granting a pension to Frank E. Welch; to the Committee on Pensions.

By Mr. DRISCOLL: A bill (H. R. 21223) granting a pension to Carolina Reichold; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21224) for the relief of Carrie Stevens Todd; to the Committee on Claims.

By Mr. FOSTER: A bill (H. R. 21225) granting a pension to Ellen Hammon Clark; to the Committee on Pensions.

By Mr. GILLETT: A bill (H. R. 21226) granting an increase of pension to Sarah C. Parish; to the Committee on Invalid Pensions.

By Mr. GREEN of Iowa: A bill (H. R. 21227) granting a pension to Nancy Palmer; to the Committee on Invalid Pensions.

By Mr. McANDREWS: A bill (H. R. 21228) granting an honorable discharge to John Berrien; to the Committee on Military Affairs.

By Mr. MOSS of West Virginia: A bill (H. R. 21229) granting an increase of pension to Jacob Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21230) for the relief of the estate of Alexander Shock; to the Committee on War Claims.

By Mr. RUBEY: A bill (H. R. 21231) granting a pension to Mahala Clifton; to the Committee on Invalid Pensions.

By Mr. SELDOMRIDGE: A bill (H. R. 21232) granting a pension to Smith Gee; to the Committee on Invalid Pensions.

By Mr. STEVENS of Minnesota: A bill (H. R. 21233) granting a pension to Charles Lawrence; to the Committee on Invalid Pensions.

By Mr. WICKERSHAM: A bill (H. R. 21234) granting an increase of pension to Francis J. Jamart; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Philadelphia Bourse, protesting against the passage of H. R. 18666, S. 6856, the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. ASHBROOK: Memorial of German-American Alliance of Cincinnati, Ohio, favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. BORCHERS: Petition of citizens of Broadlands, Ill., favoring embargo on all war material; to the Committee on Foreign Affairs.

By Mr. CANTOR: Memorial of Philadelphia Bourse, protesting against the passage of the ship-purchase bill, H. R. 18666; to the Committee on the Merchant Marine and Fisheries.

By Mr. CARY: Petition of Herman Valet, Robert Podratz, Frank Hoppe, Henry Kammerer, P. O. Phillips, Richard Becker, Frederick Raduege, and 361 others, all residents of Milwaukee County, in the State of Wisconsin, indorsing and urging the passage of House joint resolution 377; to the Committee on Foreign Affairs.

By Mr. DONOHOE: Petition of citizens of Pennsylvania, favoring an embargo on all contraband of war; to the Committee on Foreign Affairs.

By Mr. DRUKKER: Memorial of German Methodist Episcopal Church, of Paterson, N. J., favoring passage of bills to prohibit the export of war material; to the Committee on Foreign Affairs.

By Mr. EAGAN: Petition of the Iron City Central Trades Council, of Pittsburgh, Pa., favoring Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of citizens of New Jersey, favoring an embargo on export of arms; to the Committee on Foreign Affairs.

Also, petition of I. S. Freeland, of Change, N. J., and F. E. Langstrath, of Montclair, N. J., favoring the Palmer-Owen child-labor bill; to the Committee on Labor.

By Mr. FARR: Petition of St. Stanislaus Society, Polish National Alliance, and Polish Roman Catholic Associates, all of Old Forge; Polish National Alliance of Throop; John Gasienco, of Carbondale; Polish National Alliance of Minooka; Zwiazku Narathowego Polskiego, Lackawanna County, all in the State of Pennsylvania, against Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. FOSTER: Petition of citizens of Hoffman, Lafayette County, Shumway, Centralia, Effingham County, and Wakefield; Catholic Union of Effingham; citizens of St. Peter; and Central Verein of America, of St. Rose, all in the State of Illinois, favoring House joint resolution 377, to forbid export of arms; to the Committee on Foreign Affairs.

By Mr. GERRY: Petition of Matthew Kilguss, Providence, R. I., favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petition of Kent County Pomona Grange, Hope, R. I., protesting against rural free delivery being conducted on a private-contract basis; to the Committee on the Post Office and Post Roads.

Also, petitions of Martin S. Fanning and Karl P. Wallin, of Providence, R. I., favoring the passage of civil-service-reform bill; to the Committee on Reform in the Civil Service.

Also, petitions of Henry P. Ryder, Patrick S. Donlan, Joseph E. Donahue, James P. Walsh, Arthur L. Conaty, and James J. Daly, of Providence, R. I., urging the protection of Catholics in Mexico; to the Committee on Foreign Affairs.

By Mr. GRAHAM of Pennsylvania: Petition of Louis A. Woll, of Philadelphia, Pa., favoring an embargo on wheat; to the Committee on Foreign Affairs.

Also, petitions of Wesley M. Oler, New York City, and Philadelphia Bourse, protesting against the passage of the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

Also, memorial of mass meeting of citizens of Louisiana, protesting against the export of war material by United States; to the Committee on Foreign Affairs.

By Mr. HAMLIN: Petition of Louis H. Meyer and other citizens of Missouri, favoring House joint resolution 377 to forbid export of arms; to the Committee on Foreign Affairs.

By Mr. JACOWAY: Petition of citizens of Lutherville, Ark., to lay an embargo upon all contraband of war; to the Committee on Foreign Affairs.

Also, protest against amendment to Post Office appropriation bill relative to freedom of the press; to the Committee on the Post Office and Post Roads.

Also, protest of Polish National Alliance, Local 940, Denning, Ark., against Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, protests of D. C. Porter, of Little Rock, and J. F. Williams, of Center Ridge, Ark., against amendment to Post Office appropriation bill relative to freedom of the press; to the Committee on the Post Office and Post Roads.

Also, protest of Polish Federation, U. S. A., 70, headquarters Argenta, Ark., against the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. KEISTER: Memorial of mass meeting at Monessen, Pa., favoring amendment to abolish polygamy in United States; to the Committee on the Judiciary.

Also, petition of Italian Protective Association, of Greensburg, Pa., protesting against the passage of the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. KENNEDY of Rhode Island: Petition of Patrick A. Donlan, of Providence, R. I., protesting against the treatment of Catholics in Mexico; to the Committee on Foreign Affairs.

Also, petition of 24 citizens of Pawtucket, R. I., favoring an embargo on all war material; to the Committee on Foreign Affairs.

By Mr. LONERGAN: Petition of Joseph Mackay, South Norwalk, Conn., favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petitions of S. S. Thompson Co., New Haven, and the Bridgeport Hardware Manufacturing Corporation, Bridgeport, Conn., protesting against the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

Also, petition of Francisk Ryter, Hartford, Conn., protesting against passage of Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. McANDREWS: Memorial of Forest Park Business Men's Association, urging the adoption of House joint resolution 372, for national security commission to inquire into preparedness of the United States in case of war; to the Committee on Rules.

By Mr. MAHAN: Petitions of citizens of Norwich, Conn., and vicinity, favoring the passage of House joint resolution 377, to prohibit the export of war material; to the Committee on Foreign Affairs.

Also, petitions of St. Stanislaus Society, of Norwich, and the Polish Catholic Society, of Rockville, all in the State of Connecticut, protesting against the passage of the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. MAPES: Petition of citizens of Grand Haven, Sparta, and Grand Rapids, Mich., favoring House joint resolution 377, to forbid export of arms; to the Committee on Foreign Affairs.

By Mr. MOORE: Memorial of Philadelphia Bourse, protesting against the passage of the ship-purchase bill, House bill 18666; to the Committee on the Merchant Marine and Fisheries.

By Mr. O'SHAUNESSY: Petition of citizens of Providence, R. I., favoring Hamill civil-service reform bill; to the Committee on Reform in the Civil Service.

Also, petition of citizens of Providence, R. I., favoring protection for the Catholic clergy in Mexico; to the Committee on Foreign Affairs.

Also, petition of Rev. Carl Kruger and other citizens of the United States, favoring embargo on export of arms; to the Committee on Foreign Affairs.

By Mr. PADGETT: Petition of citizens of Slayden, Tenn., favoring restriction of immigration; to the Committee on Immigration and Naturalization.

Also, petition of citizens of Slayden, Tenn., favoring rural-credit legislation; to the Committee on Banking and Currency.

By Mr. SCULLY: Petitions of Tw. Swt. Jozefa, Jamesburg; St. Joseph's Society, Perth Amboy; and Polish Roman Catholic Union, Sayreville, all in the State of New Jersey, against Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. STEPHENS of California: Petitions of sundry citizens and societies of the State of California, protesting against the Fitzgerald amendment to the Post Office appropriation bill; to the Committee on the Post Office and Post Roads.

Also, memorial of Society T. Kosciusko, Branch 1751, of the T. National, Los Angeles, Cal., protesting against the passage of the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of Don S. Ford, of Los Angeles, Cal., favoring the passage of the Palmer-Owen child-labor bill; to the Committee on Labor.

Also, petition of Pasadena (Cal.) Audubon Society and Alice W. Pitman, Elizabeth P. Evans, Lydia Pike, and Ellen L. Garwood, of Pasadena, Cal., protesting against shipment of American horses to European battle fields; to the Committee on Foreign Affairs.

Also, memorial of citizens of Los Angeles, Cal., urging Congress to invite all nations to join us in a world federation; to the Committee on Foreign Affairs.

Also, petition of Harvey H. Duryee, of Los Angeles, Cal., relative to the Zeppelin raid on England and urging protest by the United States; to the Committee on Foreign Affairs.

Also, memorial of board of supervisors of Solano County, Cal., favoring passage of civil-service retirement bill, H. R. 5139; to the Committee on Reform in the Civil Service.

By Mr. VOLLMER: Petitions of 31 American citizens and citizens of Mankota and vicinity, to lay an embargo on war material; to the Committee on Foreign Affairs.

By Mr. YOUNG of North Dakota: Memorial of mass meeting of citizens of Louisiana, protesting against export of war material by United States; to the Committee on Foreign Affairs.

SENATE.

FRIDAY, *January 29, 1915.*

(Legislative day of Tuesday, January 26, 1915.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

THE MERCHANT MARINE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Norris	Smith, Ga.
Brandegee	James	O'Gorman	Smith, Md.
Catron	Johnson	Overman	Smoot
Chamberlain	Jones	Page	Stone
Chilton	Kenyon	Perkins	Swanson
Culberson	Kern	Pittman	Thomas
Cummins	La Follette	Ransdell	Thompson
Dillingham	Lippitt	Reed	Thornton
Fletcher	Lodge	Robinson	Tillman
Gallinger	McCumber	Saulsbury	Townsend
Gore	Martine, N. J.	Shafroth	Vardaman
Gronna	Myers	Sheppard	White
Hitchcock	Nelson	Simmons	Williams

The VICE PRESIDENT. Fifty-two Senators have answered to the roll call. There is a quorum present.

Mr. NORRIS obtained the floor.

Mr. GALLINGER. Will the Senator from Nebraska yield to me for a moment?

Mr. NORRIS. I yield to the Senator.

Mr. GALLINGER. I had intended to continue the discussion of the bill this morning, but I gladly yield to the Senator from Nebraska, and will follow the Senator from Nebraska when he concludes.

Mr. KENYON. Will the Senator from Nebraska yield to me for a moment?

Mr. NORRIS. I yield to the Senator from Iowa.

Mr. KENYON. I ask consent to have printed and lie on the table two amendments to the pending bill.

The VICE PRESIDENT. It will be so ordered.

Mr. NORRIS. Mr. President, I take it that all of us, without regard to party affiliation and without regard to the section of the country from which we come, are in favor of building up our merchant marine and are also in favor of lending whatever legitimate assistance we can in a legislative way to the upbuilding of American shipping on the high seas.

As to the methods that we should follow in improving our merchant marine or building up our shipping, there is great difference of opinion. I desire to concede, to begin with, that there is ground for difference of opinion. I have always been one of those who have opposed the building up of our merchant marine by a subsidy from the Treasury. I concede, however, that there are two sides to that question, and I am not questioning the fidelity or the patriotism of those who think we ought to resort to a direct subsidy. I have opposed this method, however, ever since I have been in Congress, and I formed the opinion myself several years ago that a better and more practical way would be for the Government itself to build such ships as might be necessary for our Navy in time of war, and that those ships, in time of peace, should be used through the instrumentality of a governmental corporation or some other method that would put them in use. It has never seemed to me proper to pay enormous subsidies to private parties to keep their ships on the high seas and then when we needed them, if ever, in time of danger we would be compelled again to pay for the ships themselves.

Several years ago I offered an amendment in the House of Representatives to the naval appropriation bill, the substance of which and the effect of which would have been, if adopted, to provide for the building of vessels by the Government and their use in time of peace through the instrumentality of the Panama Railroad Co. When the Alaskan railroad bill was before the Senate I offered a similar amendment here. It was, however, defeated by quite a large vote.

These introductory statements I make simply to show that I feel friendly to the method provided in this bill for the building up of a merchant marine through the instrumentality of a corporation. If I had my way about it, I would change the bill in several respects regarding this corporation with a view of keeping it from under the control of political influence, but my objection to the details of the bill in that respect are not sufficient to preclude me from voting for the bill if it had attached to it two amendments of which I desire to speak this morning.

I think it is to be regretted that this measure is made a partisan one and that it is drafted in caucus so that any amendments which may be offered here will necessarily be voted down unless they are taken up by the committee and by the committee referred to the caucus and receive favorable action there. I am in earnest about the amendments I am suggesting, and I wish it were possible that they might be taken up in this way with a view of having them considered. I have just as much interest and I think others have the same interest in the drafting of a proper law and in its proper consideration as anyone on the other side of the Chamber.

There is one respect in which I differ very materially from the President in his advocacy of a measure of this kind, and one of the amendments that I had printed yesterday, and which is now on the desks of all Senators, has to do with that part of the bill carrying out the President's idea that when through the instrumentality of this corporation we engage in business and build it up and make it profitable we shall immediately withdraw from it and let private parties take it up. My own idea is that if we go into the business and build up a line of trade or commerce with any of the foreign countries of the world or of domestic commerce and it becomes profitable we should, through the instrumentality of this same corporation, remain in the business and let the taxpayers of the country share the profits as well as bear the losses incidental to the building up of the business.

I believe the idea of the President in his message was not that we should make money out of the transaction, and I am not advocating going into it because I would like to see the Government make money out of it. There are two objects in view—one to build up the merchant marine and the other to put these ships to beneficial use when they are not needed as a merchant marine. Incidentally it will improve our shipping; incidentally it will perhaps decrease the rates somewhat; but I believe it ought to be the permanent policy of the Government. I am not in favor of going into it as a temporary proposition, and would rather stay out of it entirely than to go in only to build up a profitable business for somebody else to reap the benefit at the expense of the taxpayers of the country after it has been built up.

The President, in his message delivered on the 8th day of December, in speaking of the desirability of this kind of legislation, used the language I shall read. I will quote that particular part of his message in which he lays down the idea that we should not remain permanently in the business. The President said:

> It may seem a reversal of the natural order of things, but it is true, that the routes of trade must be actually opened—by many ships and regular sailings and moderate charges—before streams of merchandise will flow freely and profitably through them.

Again, he said:

> The Government must open these gates of trade, and open them wide; open them before it is altogether profitable to open them, or altogether reasonable to ask private capital to open them at a venture. It is not a question of the Government monopolizing the field. It should take action to make it certain that transportation at reasonable rates will be promptly provided, even where the carriage is not at first profitable.

That far with the President I most heartily agree. I think it must be conceded that when we undertake to open lines of trade and of commerce where there are none now we will necessarily lose some money in the venture. But even though we do lose it the theory is, and I believe it is a good one, that since it is almost imperative that we must have a merchant marine so that our Navy can be of any practical benefit in time of war we must make some provision for the merchant marine. It will be expensive, it will cost money, and when these ships are not in use as a merchant marine they would be idle unless some provision was made for their use.

But what the President says further, it seems to me, is wrong. He goes on:

> And then, when the carriage has become sufficiently profitable to attract and engage private capital, and engage it in abundance, the Government ought to withdraw. I very earnestly hope that the Congress will be of this opinion, and that both Houses will adopt this exceedingly important bill.

It seems to me in that respect the President is wrong and in that respect this bill is wrong. The particular language of which I complain has been in every print of the bill. The President's message was delivered on the 8th day of December, 1914; the bill now under consideration was introduced on the 9th day of December, 1914—the next day; it was reported from the committee with quite a number of amendments on December 16, 1914; it was made the unfinished business on January 4, 1915. On the 6th day of January, two days thereafter, the committee withdrew its amendments which it had offered, and offered a new bill by way of a substitute. Again, on the same day, the committee withdrew its substitute and offered another new bill by way of substitute. In each one of those prints, in each one of those bills, somewhere in the bill was always contained language that would enable this governmental corporation provided for in the bill to withdraw from the business. It was not declared in the bill as the open policy, but it has always been there. I think it is the joker in this bill, and thus far in this debate it has not been noticed.

Mr. SIMMONS. To what provision of the bill does the Senator from Nebraska refer?

Mr. NORRIS. I am coming to that now. I will say to the Senator from North Carolina that in the last print, the last substitute that was offered, it is found on page 2. It is part of the charter of the corporation provided for in the bill. I want to read that. In order to get the connection, I will read some other parts of the provision in reference to the corporation:

> Said corporation shall have for its object the purchase, construction, equipment, maintenance, and operation of merchant vessels to meet the requirements of the foreign commerce of the United States, or to charter vessels for such purposes—

Under the authority contained in this charter this corporation could purchase ships, could construct ships, and could charter ships—purchase, construct, and charter; in other words, they could purchase the ships outright, they could build them, or they could lease them.

The next clause, however, gives the corporation authority to dispose of these ships, and that is the particular language to which I object. It is the clause in this substitute, and which in substance has been in every one of the bills, which enables this governmental corporation to practically go out of business whenever the President desires it to do so; for while this is done through the shipping board, the shipping board provided for in the bill is, of course, under the control of the President. Two members of the shipping board are members of his Cabinet, and the other members of the shipping board are appointees of the President. That is the language following that which I have just read, and reads as follows:

> And to make charters or leases of any vessel or vessels owned by such corporation to any other corporation, organized under the laws of a State—

In other words, all of these ships, with the exception of ships that they might rent, this corporation can at any time lease out to other private corporations. They can lease every one of these ships for 99 years or for any other length of time. They have, so far as the practical operation of the business is concerned, power to sell them. The only reservation would be that these ships could be taken in time of war as part of our merchant marine.

Mr. FLETCHER. May I interrupt the Senator?

Mr. NORRIS. I yield to the Senator.

Mr. FLETCHER. I ask the Senator from Nebraska if he will not agree that it is important that the corporation should have the power to charter or lease vessels under its control? There might be times when, for instance, a regular line operating ships to South America would be crowded with business and would not be able to take care of the cargoes offered. Is it not important for the corporation to be in a position to charter one of its ships to such line for a voyage, for instance? These charter parties do not generally extend over a voyage, or perhaps to three round trips. The purpose of the bill is to put the corporation in a position where, if it becomes important to serve commerce by chartering one of their vessels to a regular line doing business, as may be needed——

Mr. NORRIS. For temporary purposes?

Mr. FLETCHER. For a voyage, or even more than a voyage.

Mr. NORRIS. Yes. Now, let me ask the Senator if it is the purpose of the language to enable this corporation to do that?

Mr. FLETCHER. That is the main purpose, I think.

Mr. NORRIS. Is that the only purpose?

Mr. FLETCHER. Well, I do not know what contingency might arise. I would not want to say that that is the sole power or that that is the extent of the power or the extent of the purpose; but so far as I know it is the purpose to give the corporation the power to make these charters or leases as conditions may warrant. Of course, we can not tell what situation may develop.

Mr. NORRIS. Let me say to the Senator that I am in entire sympathy with that purpose; I have no objection to giving this corporation the power that he has outlined; but if that be the purpose of those who are behind this bill, and there is no intention to permit the making of a lease that will be so long that it will have the practical effect of a sale, then the Senator can easily provide by a very simple amendment that such lease shall not extend over, say, three months or over a voyage, or something of that kind, or that it should only be a temporary lease; in other words, to declare the policy that this governmental corporation shall not go out of business unless the law is changed. Of course, it would always be in the power of Congress to do that.

Mr. FLETCHER. The main objection I have to that is that I would hesitate to hamper or embarrass the reasonable and proper operation of the line.

Mr. NORRIS. I do not want to do that. I would not object to any reasonable provision which might be put in the bill for the purposes which the Senator has outlined; but this language goes a great deal further. Even if we declared in the law that it was the intention to permit such leasing only for temporary purposes and that the intention of the law was that this governmental corporation, when it got into business, should remain in it permanently, it would relieve the objection.

Mr. SMITH of Georgia. Mr. President——

Mr. NORRIS. I yield to the Senator from Georgia.

Mr. SMITH of Georgia. The permanency which the Senator from Nebraska asks for is permanency of operation of these vessels by the Government, and not simply permanency of ownership?

Mr. NORRIS. No; I would not agree to that statement, because that means that they could be leased out for 99 years.

Mr. SMITH of Georgia. No; the Senator from Nebraska misunderstands me.

Mr. NORRIS. Perhaps I do.

Mr. SMITH of Georgia. The permanency which the Senator from Nebraska desires is permanency of actual operation of the vessels by the corporation?

Mr. NORRIS. Yes, sir.

Mr. SMITH of Georgia. The Senator is not satisfied simply with the permanency of ownership if the vessels are to be leased out?

Mr. NORRIS. No; I am not satisfied to give this corporation the power to lease out these vessels to various other corporations indefinitely.

Mr. SMITH of Georgia. The Senator, then, differs radically from those of us who would vastly prefer an assurance that they would not be operated at all.

Mr. NORRIS. If the Senator is in favor of the Government constructing these vessels and then not operating them, if that is what he means, then I do disagree, of course.

Mr. SMITH of Georgia. That is what I mean exactly. I would vastly prefer an assurance that the Government would never operate them at all.

Mr. NORRIS. Well, if the Government is not going to operate them through the instrumentality of this governmental corporation, then, in my judgment, it never ought to build them. It seems to me it would be an economic waste to build a lot of vessels and not use them.

Mr. SMITH of Georgia. How would it be an economic waste if the Government built them and leased them on a basis that would pay the Government 4 per cent rental on the money and 5 per cent per annum for depreciation and turn them into the

control of separate companies to stimulate the development of individual enterprise?

Mr. NORRIS. I see the Senator's point, and, of course, a great deal can be said in its favor. The Senator from Iowa [Mr. CUMMINS] has introduced an amendment as a substitute that will have that effect; but if the Senator believes that, then he is in reality opposed to the fundamental principles underlying this bill. There is no use of this governmental corporation being organized if we are not going to use it. The Government can build the ships and lease them direct without the interposition of the corporation provided for in the bill.

Mr. SMITH of Georgia. I think so.

Mr. NORRIS. To that policy——

Mr. OWEN. Mr. President——

Mr. NORRIS. In just a moment I will yield to the Senator. To that policy I do not agree; that is, I would prefer that the ships be operated through the instrumentality of the corporation to be organized. I now yield to the Senator from Oklahoma.

Mr. OWEN. Mr. President, I wish to make this suggestion, that the idea of leasing these boats instead of the Government operating them proceeded upon the conception that by leasing the boats to different companies and groups of men they would compete with each other and, by their competition, lower rates. We have tried that idea to a legitimate conclusion and have found that it is not sound. We have found that different groups in the United States, in England, in Germany, in France, in Italy, in Belgium, and in Holland instead of having free competition have an international trust; and why should we contribute $40,000,000 to enlarge a system that already exists?

If we were to lease these boats at 4 per cent rental and 5 per cent depreciation—9 per cent altogether as interest and as maintenance—the very men obtaining such leases would be the instrumentalities of a trust existing now. The very trusts existing would send individuals to make these leases and back them up. You would be able to trace the transaction with the very greatest difficulty. It would be almost impossible, and I may say practically impossible, to do so. They would act exactly as was done in Oklahoma, where the trust grabbed the oil under color of a lease through the medium of thousands of men acting under shelter, under the blanket, and operating for the Standard Oil Co. and for the Prairie Oil & Gas Co. under rules intended to establish free competition, but under a system that actually works out an absolute, grinding monopoly in the transport of oil out of that country through a series of pipe lines that have a perfect understanding with each other.

Mr. NORRIS. Mr. President, I take it, from what the Senator from Oklahoma says, that he is in favor of the amendment that I have proposed to strike out the language that gives this governmental corporation the power to lease these ships to others.

Mr. OWEN. I thoroughly agree with the idea which the Senator has, but I think to make it so drastic as to say that the shipping board should not under any circumstances make a lease would be going rather further than practical administration would require. I think the purpose of this bill, the intent of this bill, is not to permit leasing except under some exigency which would justify it, separate and apart from the conception of establishing free competition through a system of leasing.

Mr. NORRIS. The Senator, then, would at least favor an amendment such as I have suggested to the Senator from Florida, which would, of course, be entirely satisfactory to me. The Senator must understand that I have no objection to a temporary lease if it shall become necessary. I do not know that it ever will be necessary; but if such a contingency should arise, if this governmental corporation were operating a line of ships and they had no particular use for some vessel and some other corporation wanted to lease it to make a trip, as the Senator from Florida suggests, I certainly would have no objection to giving them the authority to do that; but under the bill as it stands this corporation could lease out every one of these ships for 99 years.

Mr. SMITH of Georgia. Mr. President, not only is that true, but is it not also true that the spirit of this bill contemplates that they shall be leased if practicable?

Mr. NORRIS. I think so. I think the Senator is perfectly fair, and that is the reason I read, to begin with, the message of the President——

Mr. SMITH of Georgia. That is the reason I can vote for the bill.

Mr. NORRIS. Where the President outlined that course, and here comes the bill introduced the next day to carry out the President's idea containing this provision. So I take it that it would be the policy of the President when he built up through the instrumentality of this corporation a line of business which became profitable, then he would lease all these vessels for a long term of years to private corporations and practically withdraw from the business. That is what I object to.

I am perfectly willing, if Senators think there should be some clause in the bill providing, in case of an emergency, for a temporary lease, or something of that kind, that it should be in the power of the shipping board to make it; but what I desire to take away from this governmental corporation, what I desire to take out of the charter of this corporation, is the power to lease for an indefinite length of time, and practically put the corporation out of the shipping business, and I am glad to know that in that I have the entire sympathy of the Senator from Oklahoma.

Mr. SIMMONS. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. SIMMONS. Mr. President, I appreciate, as I am sure all Senators on this side do, the spirit of fairness with which the Senator from Nebraska is discussing this bill. I think we ought to have a clear understanding as to the purpose of this side of the Chamber, with reference to the provision which the Senator is discussing.

It is well known that there have been two lines of thought in this Chamber with reference to the ownership and operation of these vessels. One group have insisted that the Government should buy and operate, while the other group have insisted that the proper method would be that the Government should buy and own and not operate but lease. It has been my understanding that a large number of Senators on the other side of the Chamber who are opposed to the bill in its present form would not be disposed to offer any serious objection to it if it provided for the ownership by the Government, and that the Government should not undertake at all to operate, but in every instance lease, leaving the operation to private capital. There are on this side certain Senators who have taken that view of it, and who have insisted quite strenuously that the Government ought not to operate these vessels; that it ought to purchase them in order to meet an emergency; but that as soon as it purchased them it should lease them to private companies to be operated by them.

I think it is due, in fairness to this side of the Chamber, to say that that view has not met the approval of the majority on this side of the Chamber. It did not meet the approval of the committee. It did not meet the approval of the caucus, if I may speak frankly. I do not think this bill would receive any very hearty support on this side of the Chamber—although it would receive very enthusiastic support from some of the ablest Senators on this side—if it was understood that the Government was to lease these ships; that the Government was not to operate them at all, but merely to hold the ownership of stock in a corporation purchasing ships and leasing them to private individuals.

From that statement the Senator will see, I think, that it was not our purpose, in using the language to which he has called attention, to provide for Government ownership and private operation. Still we thought conditions might arise where the corporation would find it wise to charter this ship or lease that ship, just as any shipping company operating its own ships now and then finds it expedient, wise, and good policy to charter or lease some of its ships. Therefore we have not denied the board the right to lease, as we denied the board the right to sell the stock.

Mr. SMITH of Georgia. Mr. President——

Mr. SIMMONS. Just a moment; let me finish this statement. The Senator will discover in section 7 of the bill, I think, that while authority to sell the stock is conferred upon the board, it is upon the condition that the board shall have the approval and sanction of Congress; or, in other words, the board may sell the stock with the consent of the Congress, requiring additional legislation. We have not seen fit to put in that condition with reference to the power to lease. The board may lease, but it was not and is not the thought or the purpose of this side that this corporation shall simply hold the ownership of these ships for the Government without undertaking to operate them themselves, and shall lease them. That is not the thought, that is not the purpose of this side.

Mr. SMITH of Georgia. Mr. President——

Mr. NORRIS. Just let me answer the Senator. I will yield to the Senator from Georgia later.

Mr. SIMMONS. That was not the purpose. It was sought to have the bill so framed that the board should be compelled to lease these vessels, provided they could secure reasonable rental, but that thought and that proposition did not prevail.

Mr. NORRIS. If the Senator has the right theory of it, if the purpose of this bill be as he states, that these ships shall

not be leased out indefinitely or for long terms to other corporations, then why not say so in the bill?

We are brought face to face with this condition: The Senator says it is not the intention to lease out these ships indefinitely; and yet there are Senators on that side of the Chamber supporting the bill because they are in favor of having them leased out indefinitely, and they see in the very language to which I have called attention the right so to lease. They support the bill, therefore, on the theory that these ships are going to be practically sold, leased out indefinitely, to other corporations; and then you are getting other Senators to support it on that side, I presume, from what the Senator from North Carolina says, because they conceive there will be a contrary policy. So you are getting both extremes with that kind of language. You are attempting to catch them coming and going.

Now, let us make it certain. Let us be fair. If we are going to lease them out, if that is going to be the policy, let us say so. If we are not, let us say so in the law. I think the Senators on that side who are supporting the bill believing that the proper policy is to lease out these ships permanently have the best of the argument, because it is undisputed that this language will give the board that power. It is undisputed that the President will control the board. It is undisputed that the President is in favor of that kind of a policy as soon as the business becomes profitable.

Now I yield to the Senator from Georgia.

Mr. SMITH of Georgia. Mr. President, is it not true that the language used in this bill is very different from the language of construction which the Senator from North Carolina has placed upon it?

Mr. NORRIS. I think so.

Mr. SMITH of Georgia. Instead of simply not denying the board the privilege of leasing out the vessels, it broadly gives them the privilege, and broadly encourages their lease.

Mr. NORRIS. Absolutely.

Mr. SMITH of Georgia. I want to say that there certainly are Senators upon this side who supported the bill in the hope that but little operation will be necessary and that, practically, the result will be that the vessels will be leased to private enterprise.

Mr. NORRIS. I think that is a complete answer to the Senator from North Carolina.

Mr. SIMMONS and Mr. WALSH addressed the Chair.

The VICE PRESIDENT. Does the Senator from Nebraska yield, and to whom?

Mr. NORRIS. I yield first to the Senator from North Carolina.

Mr. SIMMONS. The thought I wanted to get into the Senator's mind is that it had been seriously and strenuously urged upon this side that we should incorporate in the bill a provision that these ships should be leased out, and that this side of the Chamber did not approve of that proposition; on the contrary, it emphatically expressed its dissent from that proposition; but that we thought it advisable to permit the board under certain conditions, such as may arise in the operation of any enterprise of this sort, to make a lease, and that the purpose was not to deny the board the right to meet those conditions and those circumstances by withholding from them the power. That is my idea of the thought we had in incorporating this provision in the bill.

I am glad the Senator is discussing it in the way he is discussing it. It may be that to carry out the views of, I think, a large majority on this side it may be necessary to modify that language somewhat. I am glad to hear the Senator discuss it, and, so far as I am concerned, I am listening to him with an entirely open mind.

Mr. NORRIS. Oh, I understand the Senator is. The Senator understands, of course, that I would be delighted if such an amendment could be offered and adopted.

Mr. SIMMONS. Let me say that my idea was that the bill was so framed that the board, and the directors of the corporation that they might select, would see that it was the purpose of the Government to own and operate these ships. We have denied them the power to sell the stock without the consent of Congress. The sale of the stock would have put the Government absolutely out of the business altogether. We have refused to incorporate in the bill a provision that they should be compelled to lease, notwithstanding that was insisted upon, provided they could secure reasonable rates, and we thought it might answer the purpose and meet the situaton if we left that question to be determined by the shipping board, composed as it will be of two of the leading members of the President's Cabinet and three other gentlemen selected by the President himself and confirmed by the Senate. We felt that we might safely trust them with a discretion to determine at all times while this measure should be in operation how many of these ships it was wise and expedient to lease and how many it was wise and expedient for the Government to operate.

Mr. POINDEXTER. Mr. President——

Mr. NORRIS. Let me first answer the Senator from North Carolina.

Mr. SIMMONS. Just one moment, if the Senator will permit me. So far as I am concerned, I have seen in this legislation a larger emergency than that of simply supplying the present scarcity of ships to transport the products of this country to foreign markets. I see another emergency—an emergency of deep import and importance; an emergency not temporary in its character; an emergency which has not come upon us suddenly, but which has existed for years; an emergency that will continue to exist until our merchant marine is rehabilitated. It is the emergency of this Government's acquiring, either by Government ownership or through the ownership of citizens of this country, a sufficient control of sea transportation to make this Government and this people at least measurably free from the exactions and handicap of their competitors controlling the transportation facilites upon which they must rely.

Until that emergency is met I do not think myself the emergency which calls for this legislation will have passed. When we have secured a sufficient control of sea transportation to make us, to some extent at least, possessors of our own transportation to those open and neutral markets of the world where we have to meet the world in competition. Until we have been able to secure, I say, reasonably the possession and control of our own transportation to those markets and our relief, and to relieve us from our dependence upon our competitors in those markets for our transportation, I do not see how we can hope to meet their competition upon equal terms or successfully; but when we have accomplished that, then the emergency feature of this matter will have passed, and to my mind it will not have passed until then.

Mr. NORRIS. That means that it never will have passed, in my judgment.

Mr. SIMMONS. Well, I do not know how far that will go. I do not know how long it is going to take.

Mr. NORRIS. I am in favor of what I have outlined as a permanent policy. I am not in favor of going into this business and then backing out as soon as it becomes profitable, and letting somebody else who did not share the danger of losses in building it up take all the profits. I believe the Senator from North Carolina [Mr. SIMMONS] is in harmony with me, as well as the Senator from Oklahoma [Mr. OWEN], on this particular part of the bill; but the Senator from North Carolina can not fail to notice what has been said by his colleague from Georgia [Mr. SMITH], whose support of this bill, as I understand, was brought about because this language is in here. He believes in leasing these ships all the time to some other corporation, and he is supporting this bill because such authority is in the bill. I presume he takes into consideration, too, the fact that the shipping board provided in this bill is already on record as being in favor of such a policy, through the message of the President of the United States.

So it seems to me those Senators really have the better of the argument. Now, if it is the policy on that side that these leases should be made only for temporary purposes then this bill ought to be amended, perhaps not by the adoption of my amendment that strikes out the language giving this authority, but in a modified form as I have suggested.

Mr. WALSH. Mr. President——

Mr. NORRIS. I will yield to the Senator in just a moment. That would suit me just as well as the amendment I have proposed.

I want to assure the Senator from North Carolina that I do not want to take away from this shipping board, however it may be constituted, a reasonable discretion. I know that this corporation can not do business if its discretion is entirely taken away. I have no disposition, and it is not my intention, to interfere with a reasonable discretion; but we are giving the board a power to nullify this act if the construction placed on it by the Senator from North Carolina is proper.

Mr. SMITH of Georgia. Mr. President——

Mr. NORRIS. They will have authority practically to nullify it. The President, as soon as it becomes a profitable business, will be in favor of so doing, and they can readily say: "Why, this bill that you have passed gave us this authority. It was introduced to carry out the recommendations of the President, who himself made that kind of a recommendation. Therefore

we are entirely within the scope and the spirit of this act," if it is passed in this form, "if we lease for 99 years every ship that this Government corporation owns."

Mr. WALSH. Mr. President——

Mr. NORRIS. I yield to the Senator from Montana.

Mr. WALSH. I dare say the Senator from Nebraska is not unaware of a fact, information of which was conveyed to the public through the press, that in the Democratic caucus the Senator from Georgia was one of three who stood for the sentiment he has expressed upon this floor. That was the occasion that brought me to my feet.

Mr. SMITH of Georgia. Mr. President, if the Senator will allow me, he is incorrect in that statement.

Mr. WALSH. I am not incorrect in what the newspapers said.

Mr. SMITH of Georgia. That was not the newspaper statement. I was one of three who opposed making this bill a party measure, and thought that the entire subject should be left free to amendment by all Senators. That was not the vote upon the proposition to restrict operation by the Government.

Mr. NORRIS. Let me inquire whether the Senator from Georgia is speaking now of the newspaper report of the caucus or of the fact.

Mr. SMITH of Georgia. I am speaking of the newspaper report and the fact, too.

The VICE PRESIDENT. Just one moment. The Chair wants to make an observation at this point. The Chair has heretofore ruled, and been sustained by the Senate, that if a Senator on the floor yields for any purpose except for the purpose of a question he yields the floor. That ruling would have to be made upon a point of order being made.

Now, the Chair wants to say that he is not going to enforce that rule of order if the Senate does not assist him in enforcing it. He can not go along here a part of the time with speeches being interjected in the argument of the Senator who is supposed to have the floor and no point of order being raised, and when a Senator wants to raise a point of order it must be enforced. It must either be raised regularly or the Chair will not enforce the rule.

Mr. WALSH. Mr. President——

Mr. NORRIS. Mr. President, as I understand the Chair and I ask for information, I know the ruling has been as the Chair has said, but I have gone on the theory that unless some one objected or made the point no notice would be taken of it. I have no objection to the interruptions.

The VICE PRESIDENT. The interjection of the Chair is for the protection of the Chair. He does not choose to be placed in a position of seeming partiality by any ruling upon this question. The Chair has once ruled and has been sustained by the Senate, and the Chair believes that it is the duty of the Senate to enforce that rule or to abrogate it.

Mr. WALSH. I rose for a question.

Mr. NORRIS. I yield to the Senator from Montana.

Mr. WALSH. Unless the Senator from Nebraska misquoted himself in saying——

Mr. NORRIS. The Senator now, after the admonition received from the Chair, must ask me a question or I can not yield.

Mr. WALSH. Very well. In saying that the President of the United States was committed to the policy of leasing these ships for a long or a short term, will the Senator kindly call our attention to that portion of the message of the President to which he gives that interpretation? I was not able to give it to any portion of the message to which the Senator now calls the attention of the Senate.

Mr. NORRIS. The Senator, I presume, was here when I read from the message. I do not care to take up the time of the Senate to repeat it.

Mr. WALSH. I simply inquire whether it is the understanding of the Senator from the extract he read that the President is committed to the policy of leasing these ships for a long term.

Mr. NORRIS. The President is committed to the policy of this governmental corporation going out of the shipping business just as soon as the business becomes profitable. That is what I take the message to mean.

Mr. WALSH. That is what I was——

Mr. NORRIS. And I believe this language gives this corporation the right to practically go out of the shipping business by leasing all these ships for an indefinite number of years.

Mr. POINDEXTER. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Washington?

Mr. NORRIS. I yield to the Senator for a question.

Mr. POINDEXTER. I wish to ask a question, but rather of the Senator from North Carolina [Mr. SIMMONS].

Mr. NORRIS. I presume I could not yield for that purpose. I would be glad to yield if it were not for the parliamentary situation, but I suppose that would take me off the floor.

Mr. POINDEXTER. I will ask the Senator from Nebraska——

Mr. SIMMONS. If the Senator from Nebraska will pardon me, he having the floor, I am quite sure that the President has meant all he said in his message in reference to——

Mr. NORRIS. I have not yielded to the Senator. I would be glad to yield, but under the ruling I am not allowed to do so.

Mr. SIMMONS. I was going to say——

Mr. NORRIS. Of course, if the Senator insists on talking, I can not help it, and personally I do not object to it.

Mr. SIMMONS. What I wanted to say was, that while I think the President may have some idea, as his message indicates, that the Government at some time will go out of this business, I think the President feels like a great many others of us, that so long as the Government does remain in the business it shall operate these ships and not lease them.

Mr. POINDEXTER. I understood the remark of the Chair somewhat different from the Senator from Nebraska. I understood the Chair to say that he has made a ruling and has been sustained by the Senate, but that the Senate is violating the rule so constantly that the Chair will not undertake to enforce the rule unless he is sustained by the Senate, and the point can only be raised by some one making a point of order.

Mr. NORRIS. I had supposed the Chair would not be called upon to rule unless some one made the point.

Mr. POINDEXTER. However, I wanted to ask a question. I am sorry the Senator from North Carolina has disappeared from the Chamber just as I wanted to get some information from him, but the Senator from Nebraska probably can answer it.

Of course, this is a legislative matter that has just been discussed between the Senator from North Carolina and the Senator from Nebraska, as to whether or not the Government shall remain in the business of operating these ships. That is a vital principle of the bill which is before Congress for determination as a legislative matter. Now, I should like to understand if the proposition is to transfer that legislative power and legislative discretion in effect to this board, divesting Congress of it. That would be the result if the board is going to have the discretion of quitting the business at any time it sees fit. If the board can do that, it can, in effect, repeal this law, if the purpose and intention of those passing the bill is what is stated by the Senator from North Carolina. He states that it is the purpose and intention that the Government, acting through this corporation, shall continue in this business until the emergency disappears. The whole bill is based on the proposition of an emergency existing. Congress is now debating the proposition as to whether there is an emergency. Congress is to determine whether an emergency exists which justifies the Government going into this business.

The Senator from North Carolina interprets this bill so that when Congress has passed the bill, perhaps when Congress has adjourned, at any time—it may be in a few weeks or a few months or a few years—the board created under the bill will take up then and discuss and determine the exact question which Congress is now debating under the conditions existing now. It will determine, under conditions existing then, the very proposition which is involved in this whole measure, as to whether the Government shall operate merchant ships.

Now, there is a little further inquiry I should like to make.

Mr. NORRIS. The Senator's question is already long enough, and it will take some time to answer it.

Mr. POINDEXTER. The Senator declines to yield?

Mr. NORRIS. I have really forgotten just what the question was. The Senator will have to repeat it.

Mr. POINDEXTER. I will not undertake to repeat it. I will repeat it in my own right at some future time.

Mr. NORRIS. I do not believe the clause the Senator refers to—the particular clause to which I have called attention—is delegating legislative authority to this board. It simply provides in the charter of this corporation that the corporation itself shall have the right to lease the vessels that it owns. I do not believe that is a legislative act. It does not appear to me that it would be subject to the objection that it was unconstitutional because it was a delegation of legislative authority.

Mr. POINDEXTER. Will the Senator yield for a question?

Mr. NORRIS. Certainly.

Mr. POINDEXTER. Would not the effect of it be just as much legislative as the bill is if they lease all the vessels and go out of the business?

Mr. NORRIS. This legislation gives the permission to do that. We can provide by law for the building of vessels and then leasing them. We can provide that they shall be built by the Government and then leased to private corporations. We can provide that they shall be constructed and built by the Government and given to this corporation and by them leased to some other corporation. That is what this bill does.

It seems to me, from the admissions made on the other side of the Chamber, that this bill is so framed as to be guilty of the charge that it is obtaining votes under false pretenses.

Mr. SMITH of Georgia. Mr. President——

Mr. NORRIS. It gets the support of one man because he is in favor of all these vessels being leased as a permanent policy, and it gets the support of another man because he agrees with me that the policy ought to be that these ships shall be operated through the governmental corporation provided in the bill.

Mr. SMITH of Georgia. Mr. President——

Mr. NORRIS. Now, I submit to Senators that is not a fair way to legislate. We ought to do one or the other. While I am opposed to one and am in favor of the other, at the same time there ought to be no doubt about this bill, if it is enacted into law, as to what it means. I yield to the Senator from Georgia for a question.

Mr. SMITH of Georgia. Is not this a fairer statement of the effect of the bill. It gives unlimited discretion, does it not, to this board?

Mr. NORRIS. I think it does.

Mr. SMITH of Georgia. Either to operate or to lease?

Mr. NORRIS. Yes, sir.

Mr. SMITH of Georgia. Those who entertain the view I have upon the subject vote for the bill upon the ground that we believe this board, if not satisfied from the start that they ought to lease the vessels, will, from their experience, quickly realize that they ought to lease them, and that the result will be that the vessels will be chartered or leased and not operated by the Government.

Mr. NORRIS. I think the Senator has made a very fair statement. I presume that is what has moved the Senator in his support of the bill. It all goes to show that some amendment along the line I have suggested ought to be adopted, or if the majority party in caucus favor the theory outlined by the Senator from Georgia, they ought to say so in this bill.

Mr. JONES. Mr. President——

Mr. NORRIS. I yield to the Senator from Washington.

Mr. JONES. I merely wish to ask the Senator if it is not clear that when the operation of the ships becomes profitable, a President holding the views of the present Executive would then force the leasing of the ships.

Mr. NORRIS. I should think so. I would if I were President, and if the President did that after the message he delivered to Congress, and we passed this law as we have it before us now, I should say he was perfectly justified in doing it, although that is a policy in which I do not agree with him.

Mr. JONES. If we were to elect a President in 1916 who was opposed to the Government operating the ships, whether they are profitable or unprofitable, immediately upon his inauguration a shipping board would be selected that would lease the ships whether they are profitable or whether they are not profitable.

Mr. NORRIS. Yes; and if the next President who was elected was of a different faith and policy and believed the Government ought to operate them, he would immediately proceed to cancel all the leases, if he could, if he had the power under the leases or the law, and so we would have a checkered policy changing every time there was a change in the occupant of the White House.

Mr. JONES. Mr. President——

Mr. NORRIS. I yield again to the Senator.

Mr. JONES. Would not that necessarily bring the matter into politics?

Mr. NORRIS. Yes; I think so. I think it is already brought into politics a great deal more than it ought to be; but that would, of course, plunge it into every campaign that would come up, and the business, in my judgment, with that uncertainty would be a failure.

If the view of those in favor of building these ships by the Government and leasing them to private corporations prevails and that is enacted into law, then, of course, as a patriotic citizen or as one of those public officials, I would do everything I could to see that that policy was carried out in good faith, although I do not agree with the policy. At least the permanent policy of the Government ought to be announced in this law, and that is the object of the amendment.

The Senator from North Carolina has said that in section 7 the bill provides that the stock of the corporation can be sold with the consent of Congress. Of course that would be true, even if it was not there; Congress could amend the law, but when I read section 7, providing as it does that this board can sell any part or all the stock the Government owns in this corporation whenever Congress consents to such sale, I could not see why they did not say in the same section that they could not only sell the stock but they could sell or lease the property, the ships of this corporation, with the consent of Congress. That would mean that the law would have to be changed before these ships could be leased for an indefinite term. You can lease all the ships and still own all the stock, and while you practically put the corporation out of business technically the stock is already in existence and the corporation is still alive.

Instead of strengthening the idea of the Senator from North Carolina, that because we say in section 7 that the stock can not be sold without the consent of Congress, it would necessarily imply that the vessels could not be disposed of by long-term leases, I look at it just the contrary. If we leave the bill as it is, any President who wanted to lease the ships after they had been in operation for some time, after they had been built and owned by this governmental corporation, could say, "Well, I will lease these ships for 99 years. If Congress did not intend that I should lease them for an indefinite term, they would have said in section 7 that not only the stock could not be sold but that the ships could not be leased or sold without the consent of Congress."

Mr. President, I want to take up another amendment. I offered yesterday and had printed another amendment that I expect to offer and to which I desire to call the attention particularly of the Members on the other side, with a candid hope that they may take it into consideration through the instrumentality of the caucus, if that is the only way that it can be reached, and either adopt it or some other similar amendment having the same purpose in view. This amendment is intended to be offered as an amendment to the last substitute of the bill reported by the committee. On page 5 of the substitute, at the end of section 3, I propose to insert the following proviso:

Provided, That no vessel shall be purchased under this act, which sails under the flag of any nation at war with any other nation which is at peace with the United States, unless prior to such purchase an understanding or agreement shall have been reached that will avoid any international difficulty or dispute regarding such purchase.

To my mind, Senators, there is great danger ahead of us, great danger of international difficulty, if not of war, if we pass the present bill without some amendment similar to that one. Men may disagree, do honestly disagree, I presume, as to whether the purchase of a belligerent ship after the breaking out of hostilities is an unneutral act. To my mind it is clear—under international law I can not see any possibility of doubt—but there are other men more able and wise than I am who take the opposite view. I had assumed up to yesterday that Senators on that side agreed with the proposition that under international law any ship flying the flag of a belligerent nation could not be purchased by a neutral nation and avoid the possibility—or the right, rather—of capture of the ship if it were used on the high seas, because in a colloquy that I had with the Senator from Mississippi [Mr. WILLIAMS], joined in later on by the Senator from North Carolina [Mr. SIMMONS], I formed the opinion that they believed that was international law, but that if this bill were passed, it being provided that the Government shall purchase the ships and then turn them over to the shipping board, there would be no danger of our Federal officials purchasing any such ships to be transferred to this governmental corporation; but yesterday we listened to an able argument of considerable length by the Senator from Montana [Mr. WALSH] in which he took the view, in a general way, as I understand, that there was no doubt we had a right to purchase such ships and that, as a matter of fact, we ought to purchase them and have the question tested and settled. He was satisfied that we had such a right, that we would be able to maintain it and establish that kind of precedent in international law.

It has been my understanding that, under international law, a ship sailing under the flag of a belligerent nation could not avoid the liability of capture by such transfer either to a neutral nation or to the citizens of a nation that was neutral. There are some exceptions—and I think it always has been conceded that there are some exceptions—which I am not going into now. A few years ago all the leading civilized nations of the earth met in a great conference in London and adopted what is known as the Declaration of the International Naval Conference. This conference was held in London, England, from December 4, 1908, to February 26, 1909. This conference, as I said a few

moments ago, was participated in by practically all of the civilized nations of the world, including our own. I have a list of them here, but I do not know that it is important to put it in. It is sufficient to say that Russia, England, Germany, France, the Netherlands, and Italy were represented there, and all joined in this declaration.

I believe it is fair to say that under international law each nation has a right to determine for itself the course that shall be pursued in time of war with regard to contraband and a great many other things, including the right to transfer ships during hostilities from a belligerent nation to a neutral nation. That being true, even without this declaration of London in this naval conference, each one of the belligerent nations would have a right to declare for itself in the case of hostilities what its policy should be. While this declaration was agreed to by all of the representatives there—as I understand, it was a unanimous agreement—there was no action taken by the nations afterwards in formally approving it; but England has declared her intention of abiding by the conference, with certain exceptions that she noted in the various declarations she has issued since the war. I understand that this declaration was also approved by Germany, by France, and by Russia. Article 56 of the declaration reads as follows:

> The transfer of an enemy vessel to a neutral flag effected after the outbreak of hostilities is void unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel, as such, is exposed.
>
> There, however, is an absolute presumption that a transfer is void—
>
> (1) If the transfer has been made during a voyage or in a blockaded port.
>
> (2) If the right to repurchase or recover the vessel is reserved to the vendor.
>
> (3) If the requirements of the municipal law governing the right to fly the flag under which the vessel is sailing have not been fulfilled.

I am not now contending that any of the ships of which I shall speak in a general way are included in any of the three presumptions here, which are absolute. I am confining myself entirely to article 56 itself, wherein it is stated that—

> The transfer of an enemy vessel to a neutral flag * * * is void unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel as such is exposed.

There will be two things to prove if article 56 is brought into question. Supposing we pass this bill without making any changes in this respect, that we buy through this governmental corporation provided for in the bill some of the hostile ships of any of the belligerent nations, that we then take one of such ships out on the high seas, and that some other belligerent nation takes it as a prize on the ground that the transfer to this corporation of ours was void under article 56 of the London declaration—an article that no one of the belligerent nations on any side has modified, but which they have accepted and declared to be the law in full force—what would we have to prove under those circumstances?

I think it would be fair to say that there would be two things incumbent upon us to prove in order to escape the liability of giving up the ship as a prize. First, we would have to prove our good faith; we would have to prove that we bought the ship in good faith. I concede that would not be difficult to do, for I am going on the theory that the Government would not purchase a ship in any other way; that, so far as we were concerned, we would be acting in good faith. But, Mr. President, that is not all of the proof which we would have to offer and establish. Not only would we have to show our good faith, but we would be confronted with the proposition of proving that the vendor of the vessel in selling it to us had no intention of escaping the liability of capture at sea of his vessel, that he did not intend "to evade the consequences to which an enemy vessel as such is exposed."

Mr. President, why are any of these vessels now interned in American ports? This is the most profitable season in the shipping business that has existed for a century. A man with a vessel that is able to carry produce from our shores across the Atlantic Ocean now, of all times under the sun, would be busy with that vessel, because there is now more cargo to carry at a higher rate than ever before existed in the life of any man who lives to-day. The very fact that his vessel is interned, the very fact that his vessel is not on the high seas earning large profits for its owner, is evidence of the fact that the owner is afraid of its capture at sea. The interned vessel is not only idle, but its owner must pay for having the right to keep his ship in a neutral port tied up to a dock that can not be used for any other purpose while the vessel is there. Its idleness therefore is a source of expenditure to him. Then, it seems to me, it would follow as logically as the rising and setting of the sun that under those circumstances his object in selling the ship would be, as article 56 says, "to evade the consequences to which an enemy vessel, as such, is exposed."

Under no other circumstances that I can conceive of would he offer a vessel for sale, and under no other circumstances would his vessel remain there idle when it might, if it were not for that one thing, bring greater profit and benefit to him than at any other time he had owned that vessel or any other vessel. So, it seems to me, that as to one of these propositions we would absolutely fail of proof; we could not produce it, because it would be impossible of proof. We could not produce it, because the opposite is true and apparent to every man, it seems to me, who will look at it reasonably and fairly in the face.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Montana?

Mr. NORRIS. I yield for a question.

Mr. WALSH. Mr. President, if the Senator from Nebraska has not forgotten the circumstance, how would he account, upon his theory of the position which Great Britain is likely to take, for the statement which her own representatives made three days after the conclusion of the conference in the formal representation they made to their Government, that all that was necessary to prove under article 56 was that the sale was bona fide?

Mr. NORRIS. Mr. President, I have not seen that statement and did not know of it, except as the Senator gave it to us yesterday. I assume that it is correct in all respects, of course, but I thought yesterday, when the Senator gave that statement to us, that it is an opinion expressed by some individual citizens of Great Britain.

Mr. WALSH. Oh, Mr. President——

Mr. NORRIS. Although they happen to hold high official position.

Mr. WALSH. And they were acting under the immediate direction and in absolute conjunction with Lord Grey, the official representative of the British Government.

Mr. NORRIS. That has no more effect than if, when we pass this bill, some one should say, "Why, the Senator from North Carolina said if this bill were passed the policy clearly outlined meant that the Government corporation should remain permanently in the business when it once entered upon it," and some one else should say, "Another Senator on an equal footing and standing with the Senator from North Carolina made the statement that if this bill should be passed there would not be any question on earth that the President of the United States and the shipping board could, without any inconsistency whatever, lease every ship that we had purchased." When the law came to be tested, what the Senator from North Carolina had said or what the Senator from Georgia had said would not be evidence. The court, as the Senator from Montana himself yesterday pointed out, would not take their opinion, great and able as they may be.

Great Britain has, since the beginning of the war, actually declared to the world that the London conference is in full force and effect excepting as she has modified it in her various proclamations; and in no proclamation has she ever modified in any particular whatever article 56. So article 56, whatever it means, according to the official declaration of the Government of England, is in full force and effect, and the same can be said of Germany, of France, and of Russia.

Mr. WALSH. But, let me ask the Senator, why does he assume that the Government of Great Britain will not take exactly the view that her representatives took concerning the meaning of this article?

Mr. NORRIS. Well, in the first place, I take it, Mr. President, that any man who reads the article can not possibly, as I view it, give it any other construction than the one I have placed upon it. It seems to me it is plain. The Senator must remember, however, that the officials of Great Britain who made the declaration of which he speaks, simply said, as I remember, in effect that this did not change the law as heretofore existing; that it did not change the position heretofore taken by Great Britain.

Mr. WALSH. Exactly.

Mr. NORRIS. That was it in substance. The position Great Britain has heretofore taken is at issue in that statement as well as article 56.

Mr. WALSH. If the Senator will excuse me, let me correct him. The representatives of the British Government declared:

> The provisions under this head are practically in accord with the rules hitherto enforced by British prize courts.

Mr. NORRIS. Yes.

Mr. WALSH. There was not any doubt about that, was there?

Mr. NORRIS. There could be a great deal said on both sides of the question as to just what were all of the rules that were enforced heretofore by the English prize court.

Mr. WALSH. The Senator from Nebraska does not want us to understand that prior to that time there was any doubt about what were the rules established by the English prize courts upon this particular subject, does he?

Mr. NORRIS. I think there is some doubt.

Mr. WALSH. Will the Senator tell us of some case in which the doubt was expressed?

Mr. NORRIS. No; for the sake of argument, I am going to assume the literal correctness of the statement of the Senator from Montana. I am going to argue it from that standpoint. At most, it could be said that some official of England, after the declaration of the London conference had been agreed to, had said—and it was not an official who took part in the conference, either, as I understand——

Mr. WALSH. If the Senator will excuse me, the statement was made by the English delegates to the conference——

Mr. NORRIS. That makes it all the better.

Mr. WALSH. Sitting, bear in mind, in the foreign office in the city of London, under the immediate direction and in immediate communication with the foreign secretary. It was made by the delegates to the conference in their official report made three days afterwards.

Mr. NORRIS. That makes it all the stronger, if it comes from that source. Here was a man who had represented Great Britain in this great international conference. He, of course, was anxious to have his Government pleased with the work of that conference in which he had taken such an active part. Naturally and properly he wanted to have it approved by his Government. It was the same with every other delegate from every other country; and anything that he could say that would have a tendency to bring approval from his countrymen he would say if he could consistently do so with his idea as to what had been accomplished. So that we must take his statements with that kind of an allowance, and then take the statement itself where it says there was "practically" no change. In my judgment there was some change. I do not think there was as big a change as the Senator from Montana argued yesterday, but I think that is quite immaterial, because the Government of England afterwards, through her proper authorities, through her regular legal channels, announced to the world the approval of this conference, and made no exception to article 56. When it comes to be construed by an English prize court, will that prize court say: "We are going to put a construction on this language that was put on it by a man who was a member of the conference"? They will not do so. They will cite the same authority the Senator from Montana cited yesterday—the Supreme Court of the United States—wherein it said that, in construing an act of Congress, the individual opinions of Members on the floor when they were arguing would not be taken into consideration. They will take the language, and I ask Senators to take the language. There is not anything doubtful about it. There is not anything covered up. I can not conceive of language being plainer. It seems to me there can be no doubt in the mind of any reasonable man what it means. Let me read again that part of article 56 that is now under discussion:

> The transfer of an enemy vessel to a neutral flag effected after the outbreak of hostilities is void—
>
> The presumption is that it is void—
>
> unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel, as such, is exposed.

I do not believe there can be any doubt in any man's mind that when a ship which has been taken off the seas and hid in a port at a time when it would be more profitable than at any time in a hundred years to be out on the seas doing business is sold the sale was, on the part of the vendor at least, with a view of evading "the consequences to which an enemy vessel, as such, would be exposed"; and we would have to prove that such was not the case.

Mr. WALSH. Mr. President, just one other question.

Mr. NORRIS. I yield to the Senator from Montana.

Mr. WALSH. I should like to know whether the Senator from Nebraska desires to convey to the Senate the idea that he is of the impression that Desart, the English representative, sought to deceive Lord Grey, and that Lord Grey was deceived, as to the meaning of this article?

Mr. NORRIS. Oh, no. I do not believe the Senator from North Carolina [Mr. SIMMONS] sought to deceive the Senate this morning when he gave his construction of another part of this bill; neither do I believe that the Senator from Georgia [Mr. SMITH], who gave an exactly opposite construction, desired to deceive anybody.

Mr. WALSH. That is, the Senator thinks that Desart honestly believed that was the proper construction of the article and that Grey honestly believed that was the proper construction of the article?

Mr. NORRIS. Yes.

Mr. WALSH. Is that what the Senator desires to say?

Mr. NORRIS. The Senator must remember that they did not say that there was no change. If you take their own language, they did not say that; they said "practically" no change; but my proposition is that it does not make any difference what they said. Here is the language. They are not going to pass on it. They will not be the prize court. While I may be mistaken about this, I believe it has already been stated on this floor that word has already reached our Government that the British Government will not consent, at least in one instance that has been put up to it, to the transfer of one of these interned vessels.

Mr. WALSH. The Senator would not consider that that settled the thing, would he?

Mr. NORRIS. Oh, no; I would not consider that that settled it.

Now, Mr. President, it seems to me that just as soon as we get doubt on this question, as soon as there is in the mind of any reasonable man any honest question as to whether we have a right to do this thing, and that the consequences of doing it might bring us into the present war, we ought to hesitate long and consider well before we take the step. The Senator from Montana himself, the only Senator so far that I have heard who has defended taking that kind of a course, has practically, in his argument, admitted that there would be a controversy. He says that if the prize court decides against us, that does not end it. That is true. He says we can take it up through diplomatic sources and settle it in that way, if possible; and if it can not be settled in that way, there is still another place to go, and that is arbitration. Now, that is all true. There is still another place to go, and that is to the battle field.

Suppose you pass this bill with this provision unamended, and one of these interned vessels is purchased, goes out on the high seas, is seized and taken into the prize court of a foreign nation, and is condemned, as I believe it will be, as a prize of war. What are we going to do about it? We can remain silent and let it go if we want to. If that is the case, we have lost our vessel and all the money we put in it. We can, after fighting through the prize court and getting beaten there take it up, as the Senator from Montana says, through diplomatic channels. What courses are left open to us? We can either quit and do nothing, we can ask for arbitration, or we can go to war.

I assume we would ask for arbitration. Let us see what kind of difficulty we would get into. What nation in Europe can furnish a citizen for that arbitration tribunal? Where are we going to get a tribunal to arbitrate the question? If the dispute was with Germany, do you suppose Germany would consent that a citizen of France or of England or of Russia or of Italy should be put on that tribunal? If the dispute was with England, would we consent that a citizen of France, of Russia, or of Italy should be put on the tribunal—nations standing for the same thing that England is standing for? Would England in that case consent that a citizen of Germany should be put on the tribunal?

So that arbitration begins to get in the distance to quite an extent. Suppose we consented to citizens of some of these belligerent nations going on the tribunal and we were beaten in the arbitration, what would our citizens think? What effect would the judgment of that tribunal have upon our citizens? They are already divided between these contending armies in Europe. The sympathies of millions of our citizens are on one side or the other in that controversy. What would they demand? Why, I fear there would come a demand that would say: "We must defend our rights. We will not submit this question to a biased tribunal, and we can not get any other. We will send with these ships the vessels of our Navy." There is where the demand would come.

Mr. WALSH. Mr. President, is it disagreeable to the Senator to have me question him?

Mr. NORRIS. Oh, no.

Mr. WALSH. I inquire of the Senator whether he would not regard all of the nations engaged in the present war as excluded from the arbitration?

Mr. NORRIS. Yes; I should think so.

Mr. WALSH. Certainly. Then does the Senator feel that it would be difficult to select arbitrators from the neutral nations—Italy, Spain, all of the South American Republics?

Mr. NORRIS. Well, let us take the first one the Senator mentions—Italy. Do you suppose that Germany, if we had

a dispute with her, would consent to that? And if we had a dispute with England, would we consent to putting an Italian on the court of arbitration?

Mr. WALSH. Let us exclude Italy, then.

Mr. NORRIS. Yes.

Mr. WALSH. There is Spain.

Mr. NORRIS. The same thing is true of Spain. There is not a nation in Europe, whether she is engaged in war or not, but that would raise suspicion upon one side or the other.

Mr. WALSH. Well, assume that that is the case.

Mr. NORRIS. I think it is fair to do it.

Mr. WALSH. I see no reason at all why any of these nations should object to a representative from Spain, from Denmark, from Norway, from Sweden; but in addition you have all the South American Republics, all of them or many of them furnishing some of the great standard writers upon the subject of international law.

Mr. NORRIS. Yes; but let us see what we would come up against there. Would any European nation consent that a European question should be settled by American or South American citizens? Immediately you run up against that prejudice. I want to say to the Senator that I believe it would be very difficult to agree upon an arbitration tribunal.

Mr. WALSH. We would have no difficulty in picking out arbitrators.

Mr. NORRIS. Oh, we would not object to some, but we would object to some others, and what we did not object to they would object to.

Mr. WALSH. The statement of the Senator, then, is that England would refuse to arbitrate?

Mr. NORRIS. Possibly not; but after she agreed to arbitrate, the selection of the arbitrators would still be an undecided question that might defeat the arbitration itself.

Mr. President, I have been discussing a case with England. We have got that along to arbitration; but we will say this bill is passed, and we have bought a whole lot of ships. England got the first one that went out, which was a German ship. England captured it. It went into a prize court in England. The next ship that went out was one that had formerly been sailed under the English flag. Germany, we will say, captured that ship, and it went into a German prize court. The next one might have been a German ship, again, and a French man-of-war captured that and took it into a French court; and Russia captured another one. So we would have ourselves in every prize court on the face of the earth, contesting for something that all these nations are opposed to.

Is that where we want to go? Is that what we want to do? Can we afford to do it—the only great Nation under the shining sun now at peace with all the world? Can we, as such Nation, afford to take a chance of that kind?

Why, Mr. President, for the sake of a few paltry dollars we would jeopardize our good standing with the world, and, in my judgment, in the end would bring ourselves into this great, foolish, illogical contest that is now going on upon a hundred battle fields across the water. We can not afford to do it. I appeal to Senators on that side, let us not take a step that will by any possibility put us in a position where we will get into that kind of a difficulty.

For the sake of argument, let us assume that the Senator from Montana is right in every respect. Let us assume that. He admits that it will get us into difficulty. He admits that we will get into arbitration, and I think it will follow that we will be in a controversy not with one nation but with five or six nations, every one of them against us. Do not let any man get the idea that only England is against this idea. Germany, her enemy, is likewise against it. The Senator devoted most of his attention to England's position. Why, we are not confined to that. There is not any doubt in his mind of the position of France being exactly against it before the London conference, although he said it was ancient. Suppose one of these ships goes out on the high seas and is captured by a French man-of-war, and then we go into a French prize court. Does the Senator contend that what Lord Grey or somebody else said over in England is going to influence that court? Is there anybody here or elsewhere who contends that France could not consistently enforce article 56 of the London declaration? No man so far has made any such claim.

Suppose the vessel is captured by a Russian man-of-war. It is not so apt to take place, I concede; but if that is the case, we go into a prize court in Russia. Is there any danger of this? The Senator from Mississippi [Mr. WILLIAMS] said the other day that there was not any, because nobody would be so foolish as to buy one of these ships unless, he said, they had an agreement with the other nations that they would not object. Then why not put it in the law? Why not write it in the statute, if that is what you believe is going to be done? Let us take no chances.

Why, I thought when I heard the Senator from Mississippi that possibly he was speaking for the administration, but it was said by the newspaper men who interviewed the President the next day that he was not representing the administration. I assume that the administration inclines more to the theory of the Senator from Montana, and I do not criticize any man for taking that position. Do not let anyone misunderstand me. He has a right to take it. I assume when he takes it there is a prima facie case against opposition to this amendment that I have offered.

Mr. SIMMONS. Mr. President, I do not know what the Senator refers to when he speaks of the newspaper statement of the attitude of the President. It may have appeared differently in different papers. I only saw it in one paper, and I gathered from that paper that what the President had said was that if this bill was passed and these powers of purchase were conferred, no one need apprehend that anything unneutral would be done in connection with the purchase of those ships.

Mr. NORRIS. That is what the Senator from Mississippi said, in effect. He said that there would not be any danger, because nobody would be foolish enough to do it.

Mr. SIMMONS. That is what the newspaper I read represented the President as saying. I do not know what he said. I do not know what his position about it is.

Mr. SMITH of Michigan. Mr. President, will the Senator from Nebraska yield to me for a question?

Mr. NORRIS. I yield for a question.

Mr. SMITH of Michigan. Perhaps the newspapers did not properly reflect the attitude of the administration, but Secretary McAdoo must reflect the attitude of the administration. There is no question about that, is there? I ask the Senator from North Carolina.

Mr. SIMMONS. Why, Secretary McAdoo is a leading member of the Cabinet.

Mr. SMITH of Michigan. Is he not the most potential figure in the administration outside of the President?

Mr. SIMMONS. I would not care to say that.

Mr. SMITH of Michigan. The Senator is the only Democrat who will not admit it; but I wish to suggest that when asked before the House committee as to whether the purchase of these interned bottoms might not bring us trouble, and when Mr. SAUNDERS said:

> It has been suggested that there would be grave objection to our undertaking to purchase German bottoms.

Secretary McAdoo, with astonishment, said, "Why?" And while dismissing the question of the diplomatic policy of the administration with the suggestion that he did not want to discuss it, he ventured to say:

> That is a question altogether aside, I think, from the issue. I believe that it can not be successfully disputed by any individual or any nation that this Government or any Government has a right to buy merchant ships, provided it buys them in good faith and for a neutral purpose, and that is exactly what would be done in this case.

There is no question about the attitude of the administration. The Secretary is astonished at the suggestion that you could not buy the ships of belligerents.

Mr. SIMMONS. I do not think the Senator read all of Secretary McAdoo's testimony.

Mr. SMITH of Michigan. I have read every word of it.

Mr. SIMMONS. Somewhere in Secretary McAdoo's testimony, speaking about this very matter, he said that in view of the President's record upon these questions he did not think any one would doubt that the President would pursue a policy which would not violate our neutrality with other nations.

Mr. SMITH of Michigan. Oh, yes; if the Senator from Nebraska will pardon me.

Mr. SIMMONS. That is all I said that I understood the newspapers had represented the President as saying about this matter.

Mr. SMITH of Michigan. Secretary McAdoo did wind up his statement with a brilliant eulogy of the President of the United States, as he always does whenever he speaks regarding the administration; and he did attribute to the President discretion and judgment and care in making these investments; but you may rely upon him at all times to attribute to the President of the United States infallible qualities with respect to the exact attitude of foreign nations as to any question of this character.

Mr. NORRIS. Mr. President, I hope the Senators will not engage in a colloquy outside of my remarks here. I should like to proceed. I do not want to consume too much of the time of the Senate, and under the admonition made by the Presiding Officer some time ago I do not want to get in a position where I might violate the rule.

Mr. SIMMONS. Of course, if the Senator objects I will not interrupt further.

Mr. NORRIS. I yield to the Senator for a question. He can put it in the shape of a question.

Mr. SIMMONS. All I desired to say was that I had understood the Secretary of the Treasury in his testimony—and I have read his testimony—as saying, in substance and effect, that we can safely trust the President in this exigency to do nothing which would violate the neutrality of this Government.

Mr. NORRIS. I think he said that. That has been said repeatedly by a good many people.

Mr. SIMMONS. And I think that is what the President is represented by the newspapers as saying in the interview—that nothing would be done by him that would violate the neutrality obligations of this Government.

Mr. SMITH of Michigan. If the Senator from Nebraska will permit me, the President said he could be relied upon, but it is not the first time he said it. He said that he could be relied upon in the Mexican situation to prevent any difficulty, and he was not a good prophet.

Mr. NORRIS. Mr. President, I was about to give the source of my information when the Senator from North Carolina interrupted me, but the controversy went on and I was not able to do it. I was speaking of what the Senator from Mississippi said, in substance saying that there was no danger of anybody buying any of these ships where there might any question arise, and if he had the buying of them he would not buy an interned ship unless he got the consent of the other nation.

I say that the President, in talking with the newspaper men the next day, said that the Senator from Mississippi was not speaking for him or for the administration. I got my information from a newspaper man who was there. I did not happen to see anything about it in the newspapers. That is no reflection on the President. I offer it simply to show that when the Senator from Mississippi rather conveyed the idea that he thought there was no use paying any attention to this because nobody had tried to do anything of this kind, he did not claim to be representing the President, but the President has declared, as I understand it, that he was not representing him, which I presume was the fact, going to show, at least being some evidence to show, that the President did not agree with that statement.

I was about to offer, and I shall offer, some additional evidence on that subject. We have an opinion given by the Solicitor for the State Department to the State Department which rather bears out the theory advocated by the Senator from Montana [Mr. WALSH]. This was printed here. You will find it in Senate Document 563, Sixty-third Congress, second session, printed as a Senate document August 11, 1914, in which the Solicitor for the State Department expressed the opinion which I will read:

CONCLUSIONS FROM THE MEMORANDUM ATTACHED.

1. Merchant ships of a belligerent may be transferred to a neutral after the outbreak of hostilities.

2. If the sale of the ship is made in good faith, without defeasance or reservation of title or interest in the vendor, without any understanding, expressed or tacit, that the vessel is to be retransferred after hostilities and without the indicia or badges of a collusive or colorable transaction.

3. But transfer can not be made of such vessel in a blockaded port or while in transitu.

4. The transfer must be allowable under and in conformity to the municipal regulations of the country of the neutral purchaser.

5. The declaration of the London convention that transfers of an enemy vessel to a neutral during war will not be valid unless it be shown that the same was not made to evade the consequences to which an enemy vessel, as such, is exposed, if it were controlling of the question, relates only to the good faith of the transfer and not to the ulterior motive of the parties to reap the natural advantages to flow from the operation of the vessel under the flag of a country not at war, while it inverts the burden of proof of the good faith of the transaction.

So I say the State Department has already been advised as indicated here.

I said at the beginning of my remarks to-day that in my judgment this advice was wrong, contrary to the declaration of London, contrary to article 56, contrary to international law; but it shows that the adviser of the State Department holds a different opinion. He is in error when he says:

2. If the sale of the ship is made in good faith, without defeasance or reservation of title or interest in the vendor, without any understanding, expressed or tacit, that the vessel is to be retransferred after hostilities and without the indicia or badges of a collusive or colorable transaction.

The good faith, as I pointed out, and I am not going over it again, provided for in article 56 is not only on the part of the purchaser but on the part of the vendor as well. He must have made this transfer without any idea of evading the consequences to which an enemy vessel, as such, is exposed. It makes absolutely no difference whether we pay the full price of the vessel, whether, as far as we are concerned, it is absolutely bona fide, although we must prove that. I am assuming that we will be able to prove that. I do not suppose our Government would buy a vessel except it acted in good faith. But whatever good faith we may have can not apply to the man who owns the vessel. We can not get down into his heart and find the reason why he transferred it. But it is quite apparent that he transferred it to avoid its capture on the high seas, especially if his vessel is interned and held in idleness at a time when it would be earning him much money.

But, Mr. President, that is not the only evidence the administration holds to the idea of the Senator from Montana. The Senate received an official communication on the 26th day of January, 1915, signed by the Secretary of Commerce and the Secretary of the Treasury, two members of the President's Cabinet, both of whom will be members of this shipping board if this bill passes unamended In that official communication they say, in disputing the charge that has often been made that the only vessels that could be purchased if this bill were passed are German vessels that are interned in American ports—they say that is not true, that there are other vessels which can be purchased, as well; and they say:

There is attached to this report as Exhibit 76 a list of ships offered by the Merchant Marine Agency, J. V. McCarthy, manager, Boston, Mass., from which it will be seen that there are 15 ships of English registry and 7 of German registry which he proposes to sell.

Further, where we get Exhibit 75, we find a minute description of each one of those vessels—15 under the English flag and 7 under the German flag—that one man has for sale and wants to sell to this new corporation.

Mr. President, let us not get the idea that it is going to be confined to vessels of one nationality alone. We will have various kinds of ships that, if we purchase, will be subject to seizure.

It seems to me, taken in connection with the address of the Senator from Montana [Mr. WALSH] and the statement of the President, that the Senator from Mississippi [Mr. WILLIAMS] in the statement referred to did not represent the administration. The statement read by the Senator from Michigan [Mr. SMITH] from the Secretary of the Treasury, the official letter of the Secretary of Commerce and the Secretary of the Treasury, giving us the list of these ships, all taken together, demonstrate absolutely that we are sailing on the rocks if we pass this bill unamended. If Senators believe that our Government should not purchase ships sailing under the flag of a belligerent nation without the consent of the other nations, then there can be no objection to this amendment.

Some Senators have said if we purchase, for instance, German vessels interned in our ports, England would be glad of it. It may be she would in some instances; I do not know. There might be cases; it may be it would be so in all of them. If that be true, then why should this amendment not be adopted?

Some Senators say, "Why, before the President would purchase a German vessel he would get the consent of England, and England would not object, because she would rather the vessel would be sailing under our flag than after the war to be back under the German flag, and besides, it would help in carrying produce to England." Assuming that to be true, what is the objection to the amendment?

If the Senator from Montana has the right position the President will not take that course. He will want this question settled, and the way to settle it will be to take a ship without the consent of anybody, just the same as we were going to have free coinage without the consent of any other nation on earth. That will settle it; it will be determined. The fact that that difficulty will arise, and it is practically undisputed that it will arise, is a sufficient reason for the adoption of this amendment.

But take the German vessel. Suppose England does consent, what about France or Russia? Suppose France says no and France seizes the vessel, and there is much more danger of our being defeated in a prize court and in arbitration if France seizes it than if it was seized by England, because there is no dispute but what France itself before the declaration of London held that th transfer under such circumstances of the ship of a belligerent nation to a neutral one was void and did not relieve her from capture on the high seas. France at least will not have to take a step backward. France at least is consistent in that course.

Mr. President, I know the amendment offered by me can not be adopted on the floor of the Senate. The Senator from North Carolina [Mr. SIMMONS], one of the leading Senators on the other side, has very kindly given me credit within the last hour for being fair in this discussion, saying, in regard to the other amendment, that he did not know but what it ought to be taken up and considered by the committee. I want to appeal to him as a patriotic citizen to take the same course with regard to this amendment. If we must be ruled by caucus action, which

of course I do not agree to, I submit to it because I must submit to the inevitable, but if we must be ruled by caucus action, then in the name of peace I ask the Senators on the other side to give consideration to this question.

It is no reflection on the President; it can not be construed as such, to put into the law what we think ought to be there, and it is no reflection on the President if he thinks we have a right to go and take these ships without anybody else's consent. I concede he has a right to that opinion. I no more find fault with him if he holds that opinion than I do with the very able and distinguished Senator from Montana who holds that opinion. But it seems to me that before us there is a difficulty that will lead us, because of the difficulty of obtaining arbitration, to one of two dilemmas. It seems to me either that we will let these ships go to the prize court and abide the judgment of the prize court without any controversy afterwards or we send our Navy out on the seas to defend these vessels against all other nations.

Mr. President, even if you assume that this bill, unamended if enacted into law, will not bring about difficulties because the President will never purchase a ship of a belligerent without the consent of the other belligerent, you have not answered the argument fully, because I say the passage of this law without some statement in it in regard to the position of the American Government will of itself create an international suspicion against us all over the civilized world.

We sent our representatives to London who took part in that conference, a conference participated in by all the world, and practically all the belligerents of the world announce that they uphold that conference with certain exceptions in regard to contraband which they enumerate. We alone would stand out and say to the balance of the civilized world, "Article 56 is not in force; we will not abide by it; but for the sake of a few paltry dollars we will defy civilization and go back of the conference and stand out alone against the world in favor of our right to purchase these contraband ships."

Mr. SMITH of Georgia. Mr. President——

Mr. NORRIS. I yield to the Senator from Georgia.

Mr. SMITH of Georgia. Is it the view of the Senator that we should go to the extent of excluding the purchase of any belligerent vessels or simply that we should follow the article he has just referred to in the London conference, and exclude any vessel the purchase of which is denied by that provision?

Mr. NORRIS. The amendment I read at the beginning of my remarks I will read again, because it will answer the Senator's question, and then I have just a few words to say in regard to the amendment and I am done. This I propose to put in the bill at the end of the section where provision is made for the purchase.

Provided, That no vessel shall be purchased under this act which sails under the flag of any nation at war with any other nation which is at peace with the United States, unless prior to such purchase an understanding or agreement shall have been reached that will avoid any international difficulty or dispute regarding such purchase.

Mr. SMITH of Georgia. Would it not be amply far enough to limit the purchase according to the language of the London conference? Would not that be just as far as——

Mr. NORRIS. To me that would be sufficient, but I understand there are men—able men like the Secretary of the Treasury, the Senator from Montana, and the legal adviser of the State Department—who contend that even under the London conference we have a right to purchase these vessels. I do not see how anyone can contend that. I can not get that out of the language, but I concede, of course, the fact that I may be wrong and the others right.

I want to say in regard to this amendment I had first prepared it to simply prohibit the purchase of these vessels. For instance, the pending amendment offered by the Senator from Massachusetts [Mr. LODGE] prohibits absolutely the purchase of these vessels, and prohibits as well the purchase of any vessels from a nation that gives a subsidy. I, of course, am not in favor of that amendment. I thought if the amendment provided that no vessel flying the flag of a belligerent nation should be purchased, and just make it absolute, it would be sufficient; but I have talked with some Members of the majority in this body and some Members on this side in regard to such a provision, and they have agreed that there might be cases where that kind of a rule would be too stringent. As was said by the Senator from Mississippi, perhaps these other Governments would not object in case of our purchasing the vessels, and if they do not, certainly there ought to be no prohibition against their purchase, and I agree to that. So I have drawn this amendment with that in view. If it does not express the idea, if some other idea that will carry out the theory just as well can be better expressed, as no doubt may be true after you consider it in committee or in caucus, of course it will be satisfactory to me. But it seems to me that it is your duty, having this responsibility on you now, to so shape this bill that there will be no danger even of a serious international dispute arising out of it.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER (Mr. POMERENE in the chair). Does the Senator from Nebraska yield to the Senator from Montana?

Mr. NORRIS. In just a moment. There will come a time—I hope it is not far in the future—when this furious war will draw to a close and when the world with one acclaim will be looking to the United States to take the lead in bringing about peace and the ceasing of hostilities. Let us take no step here that will either directly or indirectly cause any ripple of suspicion in the civilized world against our good intentions.

Senators, when that time comes we can not say now how great may be our responsibility. There can be no reason now why we should not strengthen our good standing with all the belligerent nations by putting in the law this amendment either directly or in substance. It will elevate us in their minds. It will place us above suspicion. No man can then point the finger of suspicion at us and say, "You passed this legislation, running the risk even of going to war, in order that you might make a few dollars in commercial transactions."

I yield to the Senator from Montana for a question.

Mr. WALSH. Mr. President, inasmuch as the Senator from Nebraska has suggested that some serious difficulty may arise in respect to the choice of arbitrators if this matter should eventually go before arbitrators, I desire to inquire of him whether he has in mind these provisions of The Hague convention of 1899:

ARTICLE 23.

Within the three months following its ratification of the present act each signatory power shall select four persons at the most, of known competency in questions of international law, of the highest moral reputation, and disposed to accept the duties of arbitrators.

The persons thus selected shall be inscribed as members of the court, in a list which shall be notified by the bureau to all the signatory powers.

Any alteration in the list of arbitrators is brought by the bureau to the knowledge of the signatory powers.

And the succeeding paragraph:

ARTICLE 24.

When the signatory powers desire to have recourse to the permanent court for the settlement of a difference that has arisen between them, the arbitrators called upon to form the competent tribunal to decide this difference must be chosen from the general list of members of the court.

Failing the direct agreement of the parties on the composition of the arbitration tribunal, the following course shall be pursued:

Each party appoints two arbitrators, and these together choose an umpire.

If the votes are equal, the choice of the umpire is intrusted to a third power, selected by the parties by common accord.

Our Government has appointed as members of that permanent tribunal Mr. George Gray, Mr. Oscar S. Straus, Mr. ELIHU ROOT, and Mr. John Bassett Moore, and the other signatory powers have completed their quota of members of the court. I desire to inquire of the Senator whether he still has apprehensions about the possibility of organizing an arbitration tribunal?

Mr. NORRIS. Yes, Mr. President; I still have apprehensions about the possibility of organizing an arbitration tribunal. I suppose, of course, that the Senator from Montana knows that I have always been in my weak way an advocate of international arbitration. I favor it; I believe in it; and I do not say now and I have not said in the course of my remarks that we would absolutely not be able to get an arbitration tribunal under the present conditions. But I did say that it would be extremely difficult. It might result in an impossibility. It would with most of the signatory powers to that convention at war with each other.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Montana?

Mr. NORRIS. I yield to the Senator.

Mr. WALSH. Will the Senator pardon me until I read the list of the signatory powers?

Mr. NORRIS. The Senator can, but I do not care to take up the time. I think we all know in a general way.

Mr. WALSH. We start in with Argentina, Austria-Hungary, Belgium, Bolivia, Brazil, Bulgaria, Chile, China, Colombia, Cuba, Denmark, Dominican Republic, Ecuador, France, German Empire, Great Britain, Greece, Guatemala, Haiti, Italy, Japan, Luxemburg, Mexico, Montenegro, Netherlands, Nicaragua, Norway, Panama, Persia, Peru, Portugal, Roumania, Russia, Salvador, Servia, Siam, Spain, Sweden, Switzerland, Turkey, United States, Uruguay, Venezuela.

Mr. NORRIS. Suppose we eliminate those that are either directly or indirectly interested, what have we left? We have Mexico left. Do you say it would be possible to get persons out of Mexico now to settle an international difficulty, and would we want to submit it to them if we did?

Mr. GALLINGER. China.

Mr. NORRIS. The Senator from New Hampshire suggests China. We can get one from Ecuador. There are several countries where we can get them to settle the difficulty all Europe is interested in. Do you suppose they would agree to it? Do you suppose we would ourselves demand it?

It all goes to prove, Mr. President, that right ahead of us is this difficulty that I have pointed out in my weak way. But the Senator really admits it, although he minimizes, I think, the difficulty that will come; there is no escape from it, Mr. President. Every time the Senator interrupts and asks a question he only leads us further into that difficulty. It is only an additional demonstration that trouble is ahead if we do not amend this bill.

This amendment would not appeal I know to the Senator from Montana, because it would avoid a question that he wants to settle. The Senator is so belligerent in his good-natured way that he sees here an opportunity for a discussion and a debate and he wants the Government to get into it right away. But at the other side of that discussion and that debate there is danger of war even though we take some time in reaching it. In any case there is this thing sure, that in the eyes of the world the American Government has gone down by leaps and bounds.

Mr. WALSH. Let me inquire of the Senator from Nebraska, then, whether he believes that Secretary Marcy, Secretary Cass, Secretary Fish, and Secretary Evarts all pursued a most unwise policy in counseling the purchase of such ships?

Mr. NORRIS. Oh, no. I have always felt pretty good when I read about our great statesman who preceded all of us a good while who said, "Millions for defense but not a cent for tribute." I do not want the Senator to get the idea that I think the American people ought to be cowards. I do not want the Senator to get the idea that I am not in favor of defending ourselves on all occasions where we conscientiously believe we are right. But I want to be just as careful that we do not put a chip on our shoulder and walk out into the international world and say to all the balance of the world, "Knock it off." The man who puts a chip on his shoulder and the man who knocks it off are probably both at least inviting trouble. We ought not to do it. It is no indication that we are cowards or that we lack either the energy or bravery or the courage to defend ourselves and our flag when we put into a law of this kind a provision that will keep us out of international difficulty that everybody admits we will get into without it. We ought to avoid a quarrel.

I believe we ought always to keep in mind, as I said a while ago, the fact that we are almost alone among the leading nations of the world at peace. Everybody else is quarreling. We are going to have a responsibility before long undoubtedly on our shoulders to help to bring about the settlement of this great strife. We can not afford for the sake of settling a question about which I do not believe there can be any doubt to begin with, or for the sake of making a few dollars, to run any risk of putting ourselves in disrepute before the world or endangering our country and our flag, as I believe this measure will do, even to the extent of getting into war.

Mr. SMOOT obtained the floor.

Mr. SIMMONS. Will the Senator from Utah yield to me?

Mr. SMOOT. I yield to the Senator from North Carolina.

Mr. SIMMONS. Mr. President, I am sure the Senator from Nebraska [Mr. NORRIS], who has just taken his seat, did not intend to misrepresent my position with reference to the ownership of these vessels, and yet sometime ago he made a statement as to my position that does misrepresent it. I simply want to make my position clear.

The Senator stated that I had said I wanted the Government to remain permanently in the shipping business. The Senator misunderstood me if he understood me to say that. What I did say was that we were not going into this business, from my standpoint, simply to meet the emergency of a present scarcity of ships. I said that in my judgment there was another and a broader emergency, and I undertook to describe that emergency. I said that until these two emergencies were met and remedied I thought the Government ought to remain in the business and operate these vessels through the corporation provided in this bill.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The Secretary will call the roll.

The Secretary proceeded to call the roll, and called the name of Mr. ASHURST.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. SIMMONS. I want to inquire if there has been any business transacted since the last roll call? If so, I do not now recall what it was. Will the Senator from Utah indicate what he has in mind?

Mr. SMOOT. The Senator from Iowa [Mr. KENYON] introduced a couple of amendments after the roll was last called.

Mr. SIMMONS. Was he recognized to introduce them and did he introduce them?

Mr. SMOOT. He did introduce them.

Mr. SIMMONS. Then I withdraw the point.

The PRESIDING OFFICER. The Secretary will proceed with the calling of the roll.

The Secretary resumed the calling of the roll, and the following Senators answered to their names:

Ashurst	Gallinger	O'Gorman	Smith, Md.
Borah	Gore	Overman	Smoot
Brady	Gronna	Owen	Stephenson
Bryan	Hitchcock	Page	Sterling
Burton	Hollis	Perkins	Swanson
Catron	James	Pittman	Thomas
Chamberlain	Kenyon	Poindexter	Thompson
Chilton	Kern	Pomerene	Thornton
Clark, Wyo.	Lane	Reed	Tillman
Clarke, Ark.	Lee, Md.	Saulsbury	Walsh
Colt	Lodge	Shafroth	Warren
Culberson	McLean	Sheppard	White
Cummins	Martine, N. J.	Shively	Williams
Dillingham	Myers	Simmons	Works
du Pont	Nelson	Smith, Ariz.	
Fletcher	Norris	Smith, Ga.	

Mr. MARTINE of New Jersey. I am requested to state that the Senator from South Carolina [Mr. SMITH] is detained from the Senate on account of illness in his family.

Mr. SMITH of Georgia. I wish to state that my colleague, the junior Senator from Georgia [Mr. HARDWICK], is detained from the Chamber on account of sickness.

Mr. KERN. I desire to announce the unavoidable absence of the Senator from Illinois [Mr. LEWIS], who is detained on account of illness. This announcement may stand for the day.

The PRESIDING OFFICER. Sixty-two Senators have answered to their names. A quorum is present.

Mr. GALLINGER. Mr. President, I know that rumors should always be taken *cum grano salis*, but the word has been passed around the Senate that we are to be kept here all night, and that we are likely to see the sun rise before we are permitted to go to our homes. In that connection it has been very strenuously urged that we are engaged in a filibuster on this bill, and from certain Democratic utterances the country would be led to believe that a filibuster is a very unusual thing in this body.

Mr. President, I have listened hour after hour to Democratic Members of this body engaged in what we supposed was a filibuster, who, taking their utterances now, one would suppose that if they should meet a filibuster on the street they would call upon the police to rescue them from it. We have had a good many filibusters during the 23 years that I have been a Member of this august assembly, and I want to call attention very briefly to a few of them. It will be remembered that in the closing days of the last administration we had over 200 filibusters in this Chamber, one succeeding another, when our Democratic friends marched in solemn column to the cloakroom, preventing us from getting a quorum, and then marching solemnly into the Chamber when it suited their purpose to do so. They have forgotten that, very likely, and hence they look with great concern upon the so-called filibuster that is now going on, when in reality we are trying by legitimate debate to defeat an utterly obnoxious and dangerous piece of legislation.

The length of time that we have taken to discuss the pending bill, Mr. President, which, from my viewpoint, has done a great deal of good, is a very short period compared with what we have taken to discuss other bills in the past. A tariff bill in 1883 was debated in the Senate 33 days. My friend the Senator from Wyoming [Mr. WARREN] remembers it well. The Mills bill, in 1888, was debated 10 days in the first session of the Fiftieth Congress and 31 days in the second session—41 days. The McKinley bill, in 1895, passed the Senate after 44 days' debate and 2 days' debate on the conference report. The Wilson-Gorman bill was debated in the Senate 3 months and 1 day in 1894. The Dingley tariff bill, in 1897, passed the Senate after 37 days' debate on the bill and 5 days' debate on the conference report. The Panama Canal tolls bill was considered in

the Senate from May 29 to August 26 in 1912, almost 3 months. The Canadian reciprocity bill was debated in the Senate from May 1 to July 22, 1911—2 months and 21 days.

Mr. President, I recall some of the noted speeches made in this body on some of those bills.

Mr. WARREN. May I ask the Senator a question?

The PRESIDING OFFICER (Mr. POMERENE in the chair). Does the Senator from New Hampshire yield to the Senator from Wyoming

Mr. GALLINGER. I yield to the Senator.

Mr. WARREN. Does the Senator remember—I am not quite certain whether or not he was then a Member of this body—the contest over the so-called force bill 24 years ago, which extended through December and January, during which the carpet on the floor fronting the cloakroom on the other side was worn out with Senators passing in and out to break and make a quorum?

Mr. GALLINGER. Mr. President, I was a Member of the House of Representatives in the Forty-ninth and Fiftieth Congresses. At the end of four years' service I seriously came to the conclusion that I ought to return to my profession, in the practice of which I could care for my family better than I could in public life, and I was absent from public life for two years. So I was absent and not a Member of either House during the debate on the force bill; but I read about it, and I know that one Senator spoke 13 hours on that bill without cessation, and that many other Senators did the same thing; that the quorum was broken time after time and the roll was called every little while.

I remember that one Senator spoke 14 hours on the bill to repeal the silver-purchasing clause of the Sherman law; one Senator spoke on the river and harbor bill 14 hours; another Senator spoke 18 hours and 20 minutes on the currency bill, during which 39 roll calls for a quorum were made in a single day; that a merchant-marine bill was defeated by a filibuster carried on by two Senators on the other side; that another Senator spoke for 8 hours and 5 minutes on the adoption of the resolution declaring Senator Lorimer entitled to a seat in the Senate; that another Democratic Senator spoke 12 or 13 hours on the resolution approving the constitution adopted by the constitutional convention of the Territory of New Mexico; and we all know that another Senator occupied quite a little time in a discussion of the river and harbor bill at the last session.

Mr. President, when filibusters were carried on by our Democratic friends when they were in the minority we were constantly told that that was the only protection the minority had against the aggressions of the majority; that it was the only weapon they had to defeat bad legislation; and that they were justified in using it to the fullest extent. I never felt like quarreling with that declaration, because really it seems to me that when some great fundamental or constitutional question is involved to which the minority is firmly opposed the fullest possible latitude of debate ought to be allowed until the country is fully informed concerning the matter.

The late John B. Gough, one of the greatest orators that this country has produced, in one of his impassioned addresses spoke of the minority, and inasmuch as our Democratic friends have been in the minority most of the time I know it will appeal to them. This is what Mr. Gough said:

> What is a minority? The chosen heroes of this earth have been in a minority. There is not a social, political, or religious privilege that you enjoy to-day that was not bought for you by the blood and tears and patient sufferings of the minority. It is the minority that have vindicated humanity in every struggle. It is a minority that have stood in the van of every moral conflict and achieved all that is noble in the history of the world. You will find that each generation has been always busy in gathering up the scattered ashes of the martyred heroes of the past to deposit them in the golden urn of a nation's history. Look at Scotland, where they are erecting monuments—to whom? To the Covenanters. Ah, they were in a minority. Read their history, if you can, without the blood tingling to the tips of your fingers. These were the minority that, through blood, and tears, and bootings, and scourgings—dyeing the waters with their blood and staining the heather with their gore—fought the glorious battle of religious freedom. Minority! If a man stand up for the right, though the right be on the scaffold, while the wrong sits in the seat of government; if he stand for the right, though he eat, with the right and truth, a wretched crust; if he walk with obloquy and scorn in the by-lanes and streets while falsehood and wrong ruffle it in silken attire, let him remember that wherever the right and truth are there are always "troops of beautiful tall angels" gathered round him, and God himself stands within the dim future and keeps watch over His own! If a man stands for the right and the truth, though every man's finger be pointed at him, though every woman's lip be curled at him in scorn, he stands in a majority, for God and good angels are with him, and greater are they that are for him than all they that be against him.

Mr. President, I have called attention to the fact that the minority have rendered both the country and the majority in this body great service by discussing the pending bill and thus giving to the majority time to reconstruct it, which they have done at least three times.

The able speech just made by the Senator from Nebraska [Mr. NORRIS] opened new avenues of thought, which led the Senator from North Carolina [Mr. SIMMONS] to admit that possibly other amendments to the bill may be desirable.

Mr. President, in picking up the morning paper my attention was attracted to two or three matters that struck me as being of very great interest at the present time. The heading to the first article is, "Mexico City falls to Carranza army"; in other words, the conflict in Mexico, in which we intervened and from which we retreated, is going on; bloodshed is rife throughout that unfortunate Republic. What does it all mean? What does it mean, Mr. President, that this country has said to the nations of the world that we will take care of their interests in Mexico as well as our own? Why have we, under the Monroe doctrine, kept England and Germany out of Mexico and prevented them from redressing their wrongs and securing their rights? We all hope that that fearful struggle in Mexico will at some time come to an end; but when it comes to an end, Mr. President, in view of the attitude our Government has taken on that question, who is wise enough to know what indemnity will be demanded of the United States by England, Germany, and possibly other nations?

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER (Mr. ASHURST in the chair). Does the Senator from New Hampshire yield to the Senator from Kansas?

Mr. GALLINGER. I yield.

Mr. BRISTOW. Let me inquire of the Senator what he thinks would have happened if the United States had landed an army and with its naval vessels had blockaded a port on the coast of England and, having taken possession of a port of that country and collected a million dollars of the money of the people of England, had then sailed off to the United States with its army and vessels and the money? What does the Senator think would have happened to our country in such a case?

Mr. GALLINGER. Of course, Mr. President, we would have been at war with England, but, in my opinion, we would never have had a chance to sail away from a port of England with either the ships or the money.

Mr. BRISTOW. If the Senator will allow me further, does he think that it would have been impossible for us to have done the same thing to a port of England that we did to a port of Mexico?

Mr. GALLINGER. Oh, we did it to Mexico because Mexico is a weak nation, unable to defend herself from our aggressions; that is all there is to it. We would not have done it to any great maritime power in the world—certainly not without war.

Mr. BRISTOW. What does the Senator think the civilized judgment of mankind will be as to the episode of our Government making war on Mexico, robbing her revenues of a million dollars and then carrying it off?

Mr. WHITE. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Alabama?

Mr. GALLINGER. Yes.

Mr. WHITE. I rise to a point of order.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. WHITE. My understanding is that under the rules a Senator may ask another Senator a question when that Senator consents to the interruption.

Mr. GALLINGER. Where does the Senator find that rule?

Mr. WHITE. That a Senator may ask questions of a Senator who is on the floor?

Mr. GALLINGER. Yes.

Mr. WHITE. Well, it is the practice here, and I suppose there is a rule to that effect; but what I am objecting to and the point I make, is that the Senator from Kansas has no right to ask the Senator from New Hampshire to prophesy; he has no right to call for prophecies.

The PRESIDING OFFICER. The point of order is well taken. [Laughter.]

Mr. GALLINGER. Well, Mr. President, that decision will be historical. We had a very interesting discussion this morning when the Senator from Nebraska was speaking. There was a free interchange of opinion between Senators. The Vice President was in the chair, and he did not call any Senator to order.

Mr. BRISTOW. Well, Mr. President——

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Kansas?

Mr. GALLINGER. I yield for a question; yes.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. The Senator from Kansas has the floor, the Senator from New Hampshire having yielded to him.

Mr. BRISTOW. I do not ask the floor. I want to ask permission of the Senator from New Hampshire to ask him a question.

Mr. GALLINGER. I yield for that purpose.

The PRESIDING OFFICER. The Senator from New Hampshire yields.

Mr. FLETCHER. I should like to say, on the question of the point of order, that what the Senator from New Hampshire refers to took place by unanimous consent. In case of objection I think the ruling still holds good that an interruption can be made only for a question.

Mr. GALLINGER. Will the Senator from Florida please point us to that rule?

Mr. FLETCHER. I refer to the ruling of the Chair.

Mr. BRISTOW. I will ask the Reporter to read the last question I asked the Senator from New Hampshire.

Mr. GALLINGER. Mr. President, if the Senator from Kansas will suspend a moment, I am told that the Vice President admonished the Senate this morning on that point. I was not present. It is an unfortunate ruling that we are not permitted to indulge in debate, as we always have done in the Senate for 23 years to my knowledge, but if a different ruling has been made, I yield to it. But I do not see that even that ruling has been violated. I now yield to the Senator from Kansas for a question.

Mr. BRISTOW. I will ask the Reporter to read the last question which I asked the Senator.

The PRESIDING OFFICER. The Reporter will read as requested.

The Reporter read as follows:

Mr. BRISTOW. What does the Senator think the civilized judgment of mankind will be as to the episode of our Government making war on Mexico, robbing her revenues of a million dollars, and then carrying it off?

Mr. GALLINGER. Mr. President, recognizing that as a proper question, I reply that, in my judgment, we will not stand very well in the eyes of the civilized world so far as that episode is concerned.

Mr. BRISTOW. May I ask the Senator another question?

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Kansas?

Mr. GALLINGER. For a question, yes.

Mr. BRISTOW. Will the Senator advise the Senate in what respect he regards the action of our Government in the taking of Vera Cruz and the securing possession of the customs collected there as different from the action of any pirate taking possession of a port and committing a similar wrong?

Mr. GALLINGER. Well, Mr. President, I will let the individual Senators and the country form their own judgment as to a proper answer to that question. I think I know what the answer will be.

The point I was making is that, having assured the civilized world that we under the Monroe doctrine would protect the interests of other countries in Mexico, after this unfortunate war ends we are likely to be called upon for an indemnity that will make it rather necessary that the $30,000,000 that we propose to invest in interned ships shall be in the Treasury of the United States; and I think the Government will be disposed to thank the minority of this body for having saved $30,000,000 during the last session in reducing the appropriations carried by the river and harbor bill. Those $30,000,000, in my judgment, will come in handy when we are called upon to settle with great Britain and Germany because of the injury that has been done to their property and their subjects during the Mexican war.

I notice, Mr. President, another rather startling headline, which reads: "Deficit must stand."

It seems that on yesterday there was a little conference at the White House. Mr. UNDERWOOD, the chairman of the Ways and Means Committee of the House, was there, and Mr. FITZGERALD, the chairman of the Appropriations Committee of the House, was there. In conferring with the President they told him that it was impossible to reduce the appropriations in the present Congress beyond the point that had been recommended, and that the deficit of $80,000,000 in the revenues of the Government, to which attention had been called, must remain and must be added in due time to the debt of the Government. It is a rather startling thing to some of us that after the tariff bill that is on the statute books was passed and the predictions concerning the revenue-producing qualities of that measure were heralded to the world, we found ourselves in a position where we had to impose upon the taxpayers of this country a so-called war revenue tax of $100,000,000, and that now we are informed that $80,000,000 more will have to be raised in some way to meet the deficit that is imminent. It will be remembered that there are yet several months of this fiscal year, and the $80,000,000 is likely to be doubled, if not trebled, before the fiscal year comes to an end.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Kansas?

Mr. GALLINGER. I yield to the Senator from Kansas for a question.

Mr. BRISTOW. Let me inquire of the Senator if the writer of that article did not, in connection with his comment, take the position that sugar was on the free list, and that we had lost $50,000,000 revenue from that source, when, as a matter of fact, sugar is not on the free list, and that additional deficit in the Treasury is yet to come?

Mr. GALLINGER. A portion of it; yes. That is true. No one can prophesy what the amount of the deficit will be on the 30th day of June, any more than any man can prophesy what amount will be demanded from this country on the part of Great Britain and Germany because of the losses incurred by them in Mexico, so far as property is concerned, and the losses of the lives of their citizens.

I find another very interesting item on the front page of the Post. There is also a very illuminating editorial in this number of the Post. When I quoted the Post the other day as being against the shipping bill, the Senator from Florida [Mr. FLETCHER] promptly said that some days after that editorial had been written the Post had an editorial of a different tenor. I had not observed that; but I will direct the attention of the Senator from Florida to an editorial in the Post this morning, which seems to indicate that the editor has gotten back to his desk again, and that he is again writing very vigorously against this shipping measure. But the item that interested me was on this question of neutrality on the part of the United States, which has been discussed this morning. It is said that the President can be safely trusted to observe the strictest neutrality between the contending nations of the world, and I am inclined to think that is so. My impression that that is so comes from reading this article:

HOLDS TO NEUTRALITY—PRESIDENT WILL NOT ATTEND UNVEILING OF MONUMENT TO HERO OF REVOLUTION.

RALEIGH, N. C., *January 28.*

Declining an invitation to attend the unveiling of a monument at Guilford Courthouse, N. C., to Gen. Nathanael Greene, who won a battle over the British in the Revolutionary War, President Wilson gave as his reason that he thought it would be unneutral for him to participate in such a demonstration.

The delegation which extended the invitation to the President consisted of United States Senators OVERMAN and SIMMONS, of North Carolina; Secretary of the Navy Daniels, President Graham, of the University of North Carolina, and Prof. George Howe, a nephew of the President.

At Raleigh to-night it was stated that the President's decision, together with the reason he gave, caused surprise and disappointment in North Carolina.

Well, I should think it would. One of the leading generals of Washington's army, a man who distinguished himself on all the battle fields of the Revolution, a man whose name has gone down in history as one of the greatest heroes this country ever produced, is to have a monument erected to his memory at Guilford Courthouse, N. C., and the President of the United States will not attend that dedication because he is afraid it will be an unneutral act! Unneutral to whom? To England, of course. What other country could find fault?

Mr. POINDEXTER. Mr. President——

Mr. GALLINGER. I yield to the Senator from Washington for a question.

Mr. POINDEXTER. I was going to ask the Senator if he knows whether that letter has been printed? It would be extremely interesting to see a written statement from the President of the United States declaring that it was not proper for us in the conduct of our foreign affairs to participate in celebrations of Revolutionary generals. It would amount to a repudiation of the most interesting period in our history. It would amount to a statement that in order to be loyal to our international obligations we must be disloyal to our own origin and the founders of our Republic.

Mr. GALLINGER. I apprehend that no letter has been written. This delegation of distinguished men, according to this dispatch, called upon the President, and he gave that as his reason—that he was afraid it would be an unneutral act, according to his judgment, to participate in that celebration.

Mr. POINDEXTER. It sounds more like a statement coming from the Carnegie Peace Society than from the President of the United States, and like an echo of the message in regard to the Panama Canal.

Mr. GALLINGER. Mr. President, it means just this, that if that is a proper attitude for the President of the United States to take we will have the flags on the White House and on this Capitol Building hauled down on the 4th day of July. They ought to be hauled down.

Mr. FLETCHER. Mr. President——

Mr. GALLINGER. I yield to the Senator from Florida for a question.

Mr. FLETCHER. May I ask the Senator who says the President takes that position?

Mr. GALLINGER. A dispatch from Raleigh, N. C., which has not been denied The Senator will find it on the third column of the first page of the Washington Post of this morning.

Mr. FLETCHER. Of this morning? They have not had very much time to deny it.

Mr. GALLINGER. Does the Senator deny it?

Mr. FLETCHER. The Senator does not know the party sending the dispatch or purporting to send it.

Mr. GALLINGER. Does the Senator deny it on behalf of anybody?

Mr. FLETCHER. No; I never heard of it before.

Mr. GALLINGER. I give it, then, for what it is worth. I do not vouch for it.

Mr. FLETCHER. But I hesitate to believe a newspaper article making a statement of that sort.

Mr. GALLINGER. I am afraid the Senator is violating the ruling of the Chair. I yielded to the Senator for a question.

Mr. President, I shall await with a great deal of interest a denial of this dispatch from Raleigh. It is very specific. It says that two Members of this body, the Secretary of the Navy, the president of the University of North Carolina, and another gentleman, a nephew of the President, called on him, and that the President gave that as his reason; and at Raleigh last night it was stated, so the dispatch says, that the President's decision, together with the reason he gave, caused surprise and disappointment in North Carolina. I should think it would.

There is another matter discussed on the front page of this paper that I desire to call attention to, because I want to correct some history in reference to it. On yesterday a presidential message was sent to the House of Representatives vetoing the immigration bill. A President representing the party to which I belong vetoed a similar bill on the same ground, and it was a matter of profoundest regret to me that he did so. It is a matter of equal regret to me that a President of the Democratic Party has vetoed the bill, putting the veto upon the same ground that President Taft did. As the House of Representatives may not pass the bill over the veto, and it may never come here officially, I feel that it is my duty to read this message to the Senate so they will all understand it. The veto message is in this morning's CONGRESSIONAL RECORD, and perhaps that is too recent for me to read with any degree of authority, but I assume that it is accurate. The veto message is as follows:

To the House of Representatives:

It is with unaffected regret that I find myself constrained by clear conviction to return this bill (H. R. 6060, "An act to regulate the immigration of aliens to and the residence of aliens in the United States") without my signature. Not only do I feel it to be a very serious matter to exercise the power of veto in any case, because it involves opposing the single judgment of the President to the judgment of a majority of both the Houses of the Congress, a step which no man who realizes his own liability to error can take without great hesitation, but also because this particular bill is in so many important respects admirable, well conceived, and desirable. Its enactment into law would undoubtedly enhance the efficiency and improve the methods of handling the important branch of the public service to which it relates. But candor and a sense of duty with regard to the responsibility so clearly imposed upon me by the Constitution in matters of legislation leave me no choice but to dissent.

In two particulars of vital consequence this bill embodies a radical departure from the traditional and long-established policy of this country, a policy in which our people have conceived the very character of their Government to be expressed, the very mission and spirit of the Nation in respect of its relations to the peoples of the world outside their borders. It seeks to all but close entirely the gates of asylum which have always been open to those who could find nowhere else the right and opportunity of constitutional agitation for what they conceived to be the natural and inalienable rights of men; and it excludes those to whom the opportunities of elementary education have been denied, without regard to their character, their purposes, or their natural capacity.

Restrictions like these, adopted earlier in our history as a Nation, would very materially have altered the course and cooled the humane ardors of our politics. The right of political asylum has brought to this country many a man of noble character and elevated purpose who was marked as an outlaw in his own less fortunate land, and who has yet become an ornament to our citizenship and to our public councils. The children and the compatriots of these illustrious Americans must stand amazed to see the representatives of their Nation now resolved, in the fullness of our national strength and at the maturity of our great institutions, to risk turning such men back from our shores without test of quality or purpose. It is difficult for me to believe that the full effect of this feature of the bill was realized when it was framed and adopted, and it is impossible for me to assent to it in the form in which it is here cast.

The literacy test and the tests and restrictions which accompany it constitute an even more radical change in the policy of the Nation. Hitherto we have generously kept our doors open to all who were not unfitted by reason of disease or incapacity for self-support or such personal records and antecedents as were likely to make them a menace to our peace and order or to the wholesome and essential relationships of life. In this bill it is proposed to turn away from tests of character and of quality and impose tests which exclude and restrict; for the new tests here embodied are not tests of quality or of character or of personal fitness, but tests of opportunity. Those who come seeking opportunity are not to be admitted unless they have already had one of the chief of the opportunities they seek—the opportunity of education. The object of such provisions is restriction, not selection.

If the people of this country have made up their minds to limit the number of immigrants by arbitrary tests and so reverse the policy of all the generations of Americans that have gone before them, it is their right to do so. I am their servant and have no license to stand in their way. But I do not believe that they have. I respectfully submit that no one can quote their mandate to that effect. Has any political party ever avowed a policy of restriction in this fundamental matter, gone to the country on it, and been commissioned to control its legislation? Does this bill rest upon the conscious and universal assent and desire of the American people? I doubt it. It is because I doubt it that I make bold to dissent from it. I am willing to abide by the verdict, but not until it has been rendered. Let the platforms of parties speak out upon this policy and the people pronounce their wish. The matter is too fundamental to be settled otherwise.

I have no pride of opinion in this question. I am not foolish enough to profess to know the wishes and ideals of America better than the body of her chosen representatives know them. I only want instruction direct from those whose fortunes, with ours and all men's, are involved.

WOODROW WILSON.

THE WHITE HOUSE, *January 28, 1915.*

Mr. President, this bill is vetoed fundamentally upon the proposition that we ought not to require immigrants coming from southern Europe and elsewhere to be able to read a sentence in some language—not in the English language, not in the French language, not in the German language, not in the Russian language, but in some language—their own language. Why, there is not a lad in any country on all this earth who can not qualify himself for that test in three or four months. There is not a young man or an old man in southern Europe to-day who desires to find asylum in the United States who can not qualify himself to read a sentence in his own language in a few weeks. To give that as the reason for the veto of a great bill which is designed to bring so much benefit to the people of the United States, that will so greatly conduce to their benefit and their happiness is, to my mind, a very unfortunate circumstance. But I want to call attention to the mistake President Wilson has made in this veto message.

President Wilson is a historian. He prides himself upon that fact; and while I think the histories he has written have not always been accurate, there is such a glaring mistake in this state paper that I would be doing myself an injustice if I did not call attention to it. Listen to the President:

> Has any political party ever avowed a policy of restriction in this fundamental matter—
>
> That is, as to requiring incoming immigrants to read—
>
> gone to the country on it, and been commissioned to control its legislation?
>
> I respectfully submit that no one can quote their mandate to that effect.

Mr. President, I turn to the platform of the Republican Party in 1896. The platform of the Democratic Party that year, while it is not so pronounced as that of the Republican Party, distinctly utters a note of warning against bringing immigrants into this country to disturb the relations of our workingmen and to affect their welfare; but the platform of the Republican Party went further than that. It says:

> For the protection of the quality of our American citizenship and of the wages of our workingmen against the fatal competition of low-priced labor we demand that the immigration laws be thoroughly enforced and so extended as to exclude from entrance to the United States those who can neither read nor write.

The President said that this mandate, if it is to be heeded, ought to be found in the platform of some political party. It will be seen that it was in the platform of the great Republican Party of 1896, and upon that issue the party went before the country asking for its suffrages. What was the result?

The President evidently wants a referendum on this bill. He says there is no evidence that the people want it. If that be so, the only way to determine that matter directly is to refer it to the people of the United States. But the President of the United States did not contend that there ought to be a referendum on the tariff bill that is now on the statute book—something that affects the welfare of every citizen of the Republic. He did not ask for a referendum on the currency bill or the

trade commission bill, or those other measures which he advocated with so much earnestness and with so much potential force. This bill that he has vetoed was passed through the House of Representatives by a two-thirds vote. That body is made up of men, as we are frequently told, who come fresh from the people. Is it to be supposed that they did not represent the feelings and views of their constituents when they voted? Is it to be suggested that they voted against either their own convictions or the feelings and convictions of the men who sent them to the Congress of the United States?

I do not know any evidence that could be presented to the President of the United States with more force than the fact that that great body of representative men passed the bill by a two-thirds vote; and I hope they will pass it over the veto by a vote equally strong.

The President, as I have said, says that no political party has had this plank in its platform and gone to the country on it and been commissioned to control its legislation, and he says:

I respectfully submit that no one can quote their mandate to that effect.

The President does not say that the declaration must be in a Democratic platform; but in view of the fact that almost every plank in the last Democratic platform has been repudiated by the Democratic Party, why should great stress have been placed on that suggestion even if the President had made it? But he says it has not been in the platform of any political party and indorsed by the people of the United States. Let us reply to the President's challenge.

Mr. O'GORMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from New York?

Mr. GALLINGER. I yield to the Senator, with pleasure.

Mr. O'GORMAN. My distinguished friend from New Hampshire knows I opposed the literacy test.

Mr. GALLINGER. Yes.

Mr. O'GORMAN. And I am, consequently, more than gratified with the veto of the President; but in connection with the statement made by the Senator that in 1896 the Republican Party declared itself in national convention as favorable to an educational test, and the further statement that the party went to the country on that issue and succeeded, I am prompted to inquire why the party at that time, if it succeeded on that issue, did not enact such a law?

Mr. GALLINGER. Mr. President, I expected that that question would be asked. We might ask the same thing about every law that is on the statute books of the Nation—why, it was not passed offhand, the first day or the first month or the first year that it had been suggested. It takes time to enact laws in this country. There was great opposition in both Houses of Congress to legislation of that kind; and the Senator from New York, able and influential as he is, if the attempt had been made at any time from 1896 to the present time to pass a law of that kind, would have opposed it with the same energy that he opposed the bill the President has vetoed.

Mr. O'GORMAN. But the Senator surely will not claim that the Republican Party, during the past 16 years, has not been in a position to enact into law any policy which it seriously advocated and believed in?

Mr. GALLINGER. The Republican Party has been struggling for nearly 16 years to pass a merchant-marine bill. The party has had it in its platform at every national convention, and the party believes in it, but it has not been able to pass a measure of that kind through both Houses of Congress.

Mr. O'GORMAN. But the Republican Party, during most of that period, was in absolute control of both branches of Congress, and in charge of the Executive.

Mr. GALLINGER. So it was; and the Democratic Party was almost unanimously opposed to the legislation, and a few Republicans were opposed to it. Now, there is no concealment about that matter, but the Republican Party as a whole was for it. The Republican Party put it in its platform every four years, and we have been struggling to enact it into law, and the Democratic Party has not allowed us to do so.

I want to call attention to what happened in 1896. This plank was placed in the Republican platform. Mr. McKinley was nominated by the Republican Party, and Mr. Bryan was nominated by the Democratic Party and the Populist Party, and we went to the polls on that, with other issues, and the record shows that the total vote cast was 13,952,179. Mr. McKinley, Republican, received 7,107,304 votes; Mr. Bryan, nominated by the Democratic Party and the Populist Party, received 6,533,080 votes—a Republican plurality of 554,224. The electoral vote was McKinley 271, Bryan 176—a majority in the electoral college of 95; and yet the President tells us that that matter never has received the indorsement of the American people.

Mr. MARTINE of New Jersey. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from New Jersey?

Mr. GALLINGER. I always yield with trepidation when the Senator from New Jersey rises, but I yield for a question; yes.

Mr. MARTINE of New Jersey. I should like to ask the gentle Senator from New Hampshire how it is that he has gotten off on this tack? This is a shipping bill. How has the Senator gotten off on this tack, instead of devoting his skill and ability to the shipping bill? He seems to have launched out into a general lambasting of the President and the Democratic Party, and he says that we were not approved by the people in the matter of the veto of the President.

Mr. GALLINGER. Where will the question end, I will ask the Senator?

Mr. MARTINE of New Jersey. The question is just this: How is it when you are debating a shipping bill that you have gotten off to a general lambasting of the Democratic Party?

Mr. GALLINGER. There are a great many hours between now and sunrise. Our Democratic friends say they are going to keep us here that long, and I will educate the Senator on merchant-marine matters before I get through.

Mr. MARTINE of New Jersey. There is no more——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield further to the Senator from New Jersey?

Mr. GALLINGER. I yield for a question.

Mr. MARTINE of New Jersey. There could be no more agreeable tutor than the Senator from New Hampshire. He says that there has been no evidence that the Democratic Party or the people wanted the veto that has been sent in by the President. I can not see just what connection that subject has with the shipping bill, but still I should like to say to the Senator from New Hampshire that great meetings have been held since that bill, iniquitous as it was in that particular provision, passed the Senate. Meetings have been held all over my Commonwealth and in the city of New York. Monster meetings have been held in protest of the immigration bill, and that particular feature of it—the literacy test—has been denounced most roundly. I feel highly gratified and feel that the President was richly justified in his veto of that particular measure.

Mr. GALLINGER. I believe, Mr. President, they must have been monster meetings—possibly monstrous meetings.

Mr. MARTINE of New Jersey. Yes. I will say further, as to this particular bill—the shipping bill—if a meeting was held in approbation of it it would be a monster meeting in the great metropolis of New York. It is true a meeting might be gathered down at the corner of Broadway and Wall Street, under the shadow of the Holy Trinity Church, that might protest—which with bleared eyes might clog the mind of every man and stifle its reason.

Mr. GALLINGER. Mr. President, I think the allusion to the Holy Trinity Church is unfortunate. It seems to me so. I will try to accommodate the Senator from New Jersey before I get through in discussing the shipping bill. There are a good many angles to it, and I am going to pay attention to some of the angles.

Mr. President, when I was interrupted, much to my regret——

Mr. MARTINE of New Jersey. Well, I am sorry that the Senator regrets it.

Mr. GALLINGER. I do not refer to the interruption of the Senator. The Senator does not understand me. When I was interrupted, much to my regret, on Wednesday evening——

[Laughter on the floor and in the galleries.]

The PRESIDING OFFICER. The Senator from New Hampshire will suspend for a moment. Let there be order in the galleries. Under the rules of the Senate any expression of approval or disapproval of any remark is forbidden by the rules of the Senate.

Mr. GALLINGER. When interrupted at that time I was reading Calendar No. 737 of the Sixty-third Congress, third session, Senate Report No. 841, on a bill for the promotion of foreign commerce of the United States by providing adequate shipping facilities. I had got through that report up to page 30, where a letter from the Secretary of Commerce, dated December 28, 1914, to Senator DUNCAN U. FLETCHER is inserted and made a part of the report. I do not know that I ought to read this letter from the Secretary of Commerce, because he is on the stump advocating this bill. We hear from him every morning, telling the country the great advantages that will result from this legislation, and he is likewise telling the country of the marvelous prosperity that is to come to the com-

mercial and industrial interests of the country because of the tariff law that is on the statute books. If I should take up that subject the Senator from New Jersey would say I was departing from the shipping question, so I will not do it. We will take that up a little later on. I will read the letter of Secretary Redfield:

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, December 28, 1914.

MY DEAR SENATOR: I am drafting this letter to you to convey certain ideas respecting the merchant marine which you may or may not care to introduce into your report, but which you are free to use in any way you see fit.

I knew, Mr. President, that that report was a composite production, and I have no doubt the Secretary of Commerce made a valuable contribution to it.

We have gone along for years with all our ocean shipping facilities in the hands of our competitors.

How often I have said that, Mr. President, in debate in this body. How often I have pictured the fact that we were absolutely at the mercy of the shipping combines of foreign countries, and that our ships had been driven from the seas of the world by unfair competition on the part of England, France, Germany, and other European nations.

As some one has well said, we have been like a department store without a delivery system, except such as our competitors were willing to supply us so long as it was to their interest or advantage to do so.

I wish I had a speech at hand that I made a few years ago in which I made that exact statement. The Secretary of Commerce has been cribbing. He took it from my speech, undoubtedly.

While the thing worked it seemed to do fairly well, particularly so long as we did not enter largely as a competitor with the nations which owned the ships in the markets they were themselves striving to secure.

About 20 years ago, the precise date does not matter, we began to sell abroad the products of our factories, and this process grew till in the largest exports we ever had the sales of manufacturers were the largest item. One did not need to be much of a prophet to see that this, if continued, must mean, could not help but mean, that when our competition became too strong our foreign competitors would hardly continue to help in transporting our goods on terms favorable to us, but to their own discomfiture. If anyone doubts this discomfiture, let him look at our displacing Germany from second place in South Africa and taking it ourselves, or at our sales in recent years in iron and steel abroad in competition with England and Germany.

It has been in the nature of things that sooner or later it would no longer be convenient for our competitors to do our transporting on a basis satisfactory to us. It would be promoting their shipping interests at the expense of their industrial interests, and their shipping interests, though large, are smaller than their industries and are the servants of the latter and can not long be put to the work of serving their competitors. In other words, you can not as a matter of economics imagine Germany or England continuing permanently to transport on favorable terms to us American goods on any such scale as to seriously threaten German or English industrial markets. They would put an end to that in self-defense and in so doing would remove or injure our transit facilities, unless we were prepared to supply them ourselves.

Apart from this, however, we have, like an ostrich with its head in the sand, put our money and our merchandise at the risk of European war and quite outside of our own control while under such risks. To illustrate, American capital invested in ships under European flags can be and has been destroyed by the acts of hostile cruisers. Two vessels on their way to be transferred to our flag were thus sunk.

I will venture to suggest that if this bill passes, there will be a good many other vessels transferred to our flag from the fleets of belligerent nations that will be sunk before they ever reach their port of destination.

American capital in goods transported in vessels under foreign flags which were not owned by American capital has been lost or injured when such vessels have been sunk or held up, and American goods for which Americans long since paid are to-day lying in foreign harbors merely because they are in ships under the flag of a belligerent. Our merchandise being carried chiefly in English ships and in ships of the other belligerent nations is to-day dependent for its security upon the control of the sea by the navies of the powers whose merchant vessels carry our goods; a humiliating and expensive situation for Americans. Cruisers hostile to the belligerents whose vessels we utilize find it their duty to sink those vessels, and we stand helplessly on the shore and watch the process go on. We know now, therefore, that our commerce while ocean-borne is subject to war risks not of our making and not under our control, but by which we suffer. The time has been when war risks shut off the movement of American wheat and delayed the movement of American cotton, and it is quite within the range of possibilities that such a time may recur. Both on basic economic grounds and on grounds of self-insurance against war risks not of our making, an American merchant marine is a necessity and can not be had soon enough to relieve us from the jeopardy in which we have stood and in which in some measure we now stand.

Therefore we can not await the long process of evolution, the patient untangling of the conflicting views of rival interests, which interests in the aggregate are infinitely less than the importance of the subject to the free flow of American commerce. The inclosed statement shows what the flow is within recent weeks. We have paid since September 1 our whole floating indebtedness abroad in goods, and it looks as if the month of December alone, even with cotton moving slowly, would show a favorable balance on merchandise transactions of $100,000,000. Indeed, so vital is the present time to America that it seems as if we were in the very transition from being a debtor to a creditor nation, and the possibility opens to our lending that hand of financial fellowship to our fellow Republics in Latin America which they so much need, for which they so eagerly look, and by which we should tie them to ourselves in commercial bands of steel which would endure to the great gain of all our people.

But one thing more than all others which hampers this evolution now is the absence of ships in which to transport the goods we have to sell and which others want to buy to the markets that eagerly wait for them. This is not all. Not only are these goods hampered by absence of shipping, but they are also hampered by the rates which are out of our control but which are now charged on such shipping as takes place. Our competitors who control our ocean terminal facilities (for such and no more are ocean steamship lines as related to our railways) have seen fit for their own profit to advance their rates from one-half to double or more. There are ports in Europe to-day that eagerly seek our cotton, and we all know our brethren in the South anxiously desire to sell their cotton, and the price abroad is such as our producers would be thankful to receive. Between these two stand the excessive rate and the scarcity of ships. The reasons must be mighty and compelling which would lead anyone at this time to interpose between the flood of American commerce seeking to be free and the needs of foreign buyers seeking for our products the interest of any one or two or more groups of our people. It is time to think of the whole and not of a part.

I do not speak, you will see, of a merchant marine as a thing so much to be desired by itself alone, certainly not as a thing upon whose separate profit or loss we in any large degree depend, but as a servant whose presence now we need quite regardless of the compensation that for the hour can be paid. The work this servant should do is what we now want done, and the question of his compensation is a relatively small affair.

Yours, very truly,

WILLIAM C. REDFIELD, *Secretary.*

Hon DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

Following that letter is a table of imports, duties collected, and exports for the week ending December 19, 1914, at 13 principal customs districts which I ask to have inserted without reading.

The VICE PRESIDENT. Without objection, it is so ordered.

The table referred to is as follows:

DEPARTMENT OF COMMERCE,
Washington, December 22, 1914.

Imports, duties collected, and exports for the week ended Dec. 19, 1914, at 13 principal customs districts.

Districts.	Imports.	Duties collected.	Exports.
Georgia	$538	$304	$2,164,411
Massachusetts (Boston)	1,413,076	224,826	1,532,375
New York	13,955,724	2,525,473	20,092,628
Philadelphia	858,645	158,396	737,302
Maryland (Baltimore)	372,146	42,552	3,938,553
Virginia (Norfolk)	78,749	2,423	1,101,196
New Orleans	1,909,454	27,360	6,593,949
Galveston	161,424	5,372	8,130,728
San Francisco	706,062	63,297	1,517,912
Washington (Seattle)	1,377,838	18,799	781,966
Buffalo	572,729	16,231	1,262,240
Chicago	579,590	176,284	
Michigan (Detroit)	426,004	36,151	1,561,182
Total	22,411,979	3,297,468	49,140,242

The above figures are for 13 principal customs districts, the district of Georgia having been added to the 12 formerly reported. The table shows a favorable balance on merchandise transactions for the third week of December in the 13 districts of $27,028,263. The 13 districts cited ordinarily do about 88 per cent of the import business and about 35 per cent of the export business of the country.

The exports of cotton for the week ended December 19 amounted to 286,315 bales.

The table below shows that for the first three weeks of December, in which is included the last day of November, the excess of exports over imports has amounted to $69,870,091 at the principal customs districts of the United States.

Mr. GALLINGER. I do not propose, Mr. President, to weary the Senate or burden myself with reading many additional editorials from the great newspapers of the country against this bill, because I propose to conclude my remarks before the day ends; but my attention has been particularly directed to an editorial in the Daily Press, of Newport News, Va., a very strong and influential Democratic newspaper, which I feel I ought to put in the CONGRESSIONAL RECORD. It is headed "An un-Democratic measure," and is as follows:

Aside from the danger of international complications, aside from the question as to whether or not it would pay, we regret that the Democratic administration and the Democratic Members of Congress should have committed the Democratic Party to the policy of Government ownership and operation of ships of commerce. It is well enough to plead that this is an emergency project and that the ships will be transferred to private interest after the crisis shall have been safely passed. The party has committed itself to a definite policy and has established a precedent from which it will not easily break away hereafter. It is the biggest sop ever thrown to socialism.

We recognize the urgent need of a merchant marine, and it is no new thought with the Daily Press. There has been no session of Congress in 15 years that this newspaper has not urged the Members to take such action as would induce private capital to invest in American ship lines.

But is it possible that Congress can not devise a plan under which private interest would engage in the over-sea traffic, as they have already engaged in the coastwise trade? Is it not a poor confession that the Government must undertake this work on its own account because our laws and our general policy toward the merchant marine are such as to

preclude private investment? And is it possible that private capital, which is already timid, will be induced to enter in competition with the Government?

"The Democratic platform upon which Mr. Wilson was elected declared: 'We believe in fostering, by constitutional regulation of commerce, the growth of a merchant marine, which shall develop and strengthen the commercial ties which bind us to our sister Republics of the south."

It will be observed, Mr. President, that there is no declaration in that platform for Government ownership. The President vetoed the immigration bill largely on the ground that there has been no declaration in the political platforms in favor of the literacy test, and yet he advocates this bill with great zeal; but we do not find any declaration in the platform or in any platform in favor of Government ownership. The editorial continues:

But what has been done to redeem that pledge? The Underwood law granting discriminating duties in favor of American ships was set aside by the President on the ground that under our treaties with foreign nations the discrimination would be enjoyed equally by foreign ships as well as by domestic ships. But that was not the case with the ships of Great Britain; and if that law has been enforced, there is good reason to believe that large numbers of British ships would have rushed to cover under American registry.

The passage of that bill was in direct line with the declaration of the Baltimore platform. But the platform certainly gave no token that the merchant-marine plank committed the party to Government ownership and operation of ships of commerce.

It is folly to contend that the President's project would build up private ship lines. The best that can be claimed for it is that it would build up Government lines at the expense of the people. But that is not everything it would build up. It would build enormous Government patronage and to increase the power of the centralized Government. That may be all right so long as Wilson and the Democrats are in power, but how would it be with a Roosevelt in the White House?

Opposition to centralization is a Democratic fundamental, and yet the Hearst newspapers, which, strangely enough, are the particular champions of the President's shipping bill, rejoice greatly in the belief and in the bold prediction that this is but the first step toward Government ownership and operation of all the means of transportation, on sea and land—of railroads as well as of ship lines.

How is that for "Democratic simplicity"? Surely the Democratic ship of state has been launched into strange waters, and we believe there are breakers ahead.

A wise prediction.

We denounce this partisan measure as being undemocratic, as a menace to the peace of the Nation, as a bar to private enterprise, and as a measure in conflict with the declaration of "new freedom" which the President has so earnestly invoked in behalf of American business.

We have the highest regard for President Wilson, and we are disappointed that he should have championed a project so inconsistent with the Democracy of Jefferson.

Mr. MARTINE of New Jersey. Mr. President——

Mr. GALLINGER. I yield for a question.

Mr. MARTINE of New Jersey. My question is, how does the Senator reconcile his assertion some days since, that all the great newspapers of the country were condemning this proposition, with a little editorial that appeared on January 27 in the New York World. That certainly is one of the great newspapers of the country. Will the Senator permit me to read it?

Mr. GALLINGER. I can not under the rule, Mr. President.

Mr. MARTINE of New Jersey. May I ask that it go in the RECORD without reading?

Mr. GALLINGER. No; I must object to that.

Mr. MARTINE of New Jersey. I am sorry that my distinguished and universally generous friend seems so cross-grained to-day.

Mr. GALLINGER. Mr. President, there is no more amiable man in the Senate than I am.

Mr. MARTINE of New Jersey. I agree with that.

Mr. GALLINGER. But when I am talking to one lone Democrat I do not want that lone Democrat to give me instructions as to how I shall proceed. [Laughter in the galleries.]

The VICE PRESIDENT. The Chair will have to call the attention of the occupants of the galleries again to the rule of the Senate that they must keep quiet.

Mr. GALLINGER. The Boston Transcript of recent date very pertinently says that we have a bill which hardly anybody but the President wants occupying the attention of Congress to the exclusion of all other business. The peculiarity of the situation is due to two causes—to President Wilson's stubborn conviction that to have a mind of his own he must not consult the minds of others, and to the abdication by Congress of its law-making powers to such an extent that it has become a great registration office for the program of the White House. If Congress would stand up for its constitutional functions, if it would insist that the President as the Executive is primarily to carry out the laws Congress makes, we should be spared such a spectacle as is now presented at the Capitol.

Mr. President, I have read the report of the majority of the Committee on Commerce in favor of this bill. I read it, as I stated the other day, because I felt sure very few of the Senators had read it, and I wanted to acquaint the Senators who were then giving me their attention with the terms of that report. It is a very ably written document and presents the side of the proponents of this bill very vigorously and forcibly. It would be invidious, Mr. President, if I did not read the views of the minority, submitted by a man who is distinguished in public life and who has made a more careful study of matters relating to the rivers and harbors, the commerce of the country, and the shipping interests of the country, than any other man has during the last 25 years—Mr. BURTON, of Ohio. Here it is:

The undersigned present a minority report on Senate bill 6856.

The purpose of the bill, as stated in its title, is to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation, to be organized under the laws of the United States, or of a State thereof, or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes. The following are the essential provisions of the proposed bill:

Section 2 provides that the initial stock of such corporation shall not be over $10,000,000, to be increased as the interests of the corporation may require of which the United States shall subscribe 51 per cent at par, and the remainder shall be offered for public subscription. In contemplation of a probable failure to obtain subscriptions from the public, it is provided that the United States may further subscribe at par for the remaining 49 per cent. By amendment this section also provides that the vessels owned or used by such corporation may be leased to other corporations or individuals to be used for the purposes contemplated by the act.

Section 3 authorizes the sale of the so-called Panama Canal bonds to a total amount not exceeding $30,000,000, for the purpose of purchasing or constructing such vessels.

Section 4 provides for the transfer of boats by the shipping board to the corporation in exchange for 4 per cent gold bonds, constituting a first lien thereon.

Section 5 authorizes American registry for such vessels and limits their trade to foreign countries, excepting the Philippine Islands, the Hawaiian Islands, and the islands of Guam and Tutuila.

Section 6 provides for the voting of stock by the shipping board, composed of the Secretary of the Treasury, the Postmaster General, and the Secretary of Commerce, and section 7 for the sale of same, with the approval of Congress.

Section 8 provides for the charter, lease, or transfer of naval auxiliaries and military transports not needed for military purposes and also vessels now owned and operated by the Panama Railroad Co. to any corporation now or heretofore organized as in this act provided. This section also contains provisions that vessels purchased or constructed by the United States shall be of a type, as far as the commercial requirements of the foreign trade of the United States may permit, suitable for use as naval auxiliaries in the Naval Establishment of the United States.

Section 9 provides that the President may requisition for use as naval auxiliaries or for other purposes any vessels used by such corporation at a reasonable price or rental.

Section 10 provides that a detailed statement of all expenditures and receipts shall be submitted to Congress at the beginning of each regular session.

Section 11 makes an appropriation of $10,000,000.

The bill may be considered either as an emergency measure required to meet an extraordinary situation, and intended to be operative only so long as the exceptional conditions continue, or it may be considered as the initiation of a radical change in the traditional policy of the Government in relation to one, perhaps to a number, of our great industries.

If the bill is designed as an emergency measure, then it can be justified only on conclusive evidence, first, that a real emergency exists, one that threatens seriously the industrial and shipping interests of this country, and one which can be met successfully and adequately in no other way than by Government intervention, and, secondly, that the remedy proposed will be effective and one that can be withdrawn upon the return of normal conditions without the disruption or serious disturbance of the ordinary instrumentalities of trade.

Perhaps there is no error to which we are more prone than to magnify the evils of a sudden disaster and to exaggerate the weakness of our political, social, and industrial institutions when subjected to some unforeseen and unusual strain.

If the courts have rendered an unpopular decision in some case of general interest, there has always been some one to propose that we pull down about our ears the temple of justice, reared at infinite pains by succeeding generations. We have never passed through a financial depression but there have been those who have proclaimed the failure of our monetary system and advocated the adoption of some wild scheme of banking, currency, or coinage. A time of stress is nearly always a poor time to surrender or revolutionize tried institutions and intrust ourselves to the uncertainties of untried schemes.

The shipping trade is an ancient enterprise. It has developed gradually through the centuries, it has adjusted itself to every wind of fortune and misfortune, it has expanded wondrously to meet the constantly increasing demands of international and domestic trade, it has laid hold of every new facility to increase efficiency and followed with unerring compass every new route of trade, it has developed trade where none existed, and has generally outrun in tonnage the reasonable expectation of freight. While rates have sometimes been unduly raised and competition limited or avoided by conference agreements, they have usually been reasonably satisfactory. The sea is an open highway, and an excessive rate or exceptional profits have always afforded an alluring invitation to enter the field.

Such an unprecedented condition as now exists must inevitably cause serious disturbance. It would be easy, however, to overestimate the difficulties and fly to remedies which would eventually prove more disastrous than our present evils.

The facts in regard to the present situation in relation to shipping seem to be about as follows:

According to a report of Mr. E. T. Chamberlain, Commissioner of Navigation, filed with the Committee on Interoceanic Canals on April 20, 1914, the gross tonnage of merchant vessels of the several countries as recorded in Lloyd's Register for the current year amounted to 46,970,113 tons, being the aggregate of a total of 30,591 vessels, including both steam and sailing craft.

I will ask permission to insert that table without reading.

The VICE PRESIDENT. Without objection, it is so ordered.

The table referred to is as follows:

Number and net and gross tons of steam and sailing vessels of over 100 tons of the several countries of the world, as recorded in Lloyd's Register for 1913–1914.

[Report of the Commissioner of Navigation (1913).]

Mr. GALLINGER (reading)—

It will be noticed that this report includes all vessels of over 100 tons burden, and that a considerable percentage of it must naturally be engaged in domestic or coastwise trade.

It is difficult to determine what portion of this total has been withdrawn as the result of the war. A circular issued by the Boston Maritime Association under date of December 15, 1914, gives the following estimate:

	Tons.
German and Austrian steam tonnage, 2,438 vessels	3,507,331
British vessels under Government charter, 500 vessels	1,700,000
British vessels seized	265,000
Vessels lost by mines, etc	330,683
Total	5,803,014

The feature of the shipping situation which has attracted the most attention, as indicated in the estimate quoted above, has been the alleged scarcity of tonnage due to the seizure of numerous German and Austro-Hungarian ships and the withdrawal of the remainder from service, also the chartering by the British and French Governments, especially by the British, of a considerable share of the tonnage of those countries for military and naval purposes.

The per cent of loss in the carrying capacity of ocean trade due to these causes has been variously estimated. Any considerable reduction would, of course, naturally produce serious consequences. It should not, however, be forgotten that the normal results are to a large extent offset by other considerations. No doubt the export of certain classes of commodities from the United States to foreign countries has somewhat increased because of the exceptional demands for munitions of war and other materials, of which an increased supply is needed or which were formerly supplied from other sources. There is also an increased demand for food products. Some commodities which were usually carried directly into such countries as Denmark, Holland, France, and Germany are now sent from the United States, as in the case of tea, coffee, or cocoa. Other countries near to the theater of war are seeking to secure a supply of certain articles with a view to providing against such exigencies as may arise.

On the other hand, there is not merely a decrease in the exports and imports from Germany and Austria, but their foreign trade by sea has practically disappeared. This operates as an offset to the shortage of vessel tonnage. Also in other localities, especially in South America, financial conditions and the withdrawal of credits usually extended have limited buying capacity and consequently exports to those countries, which formerly consisted largely of material for railways and public-service improvements have diminished considerably. It is not improbable that on the whole the world's trade has diminished in a ratio commensurate with the loss of ocean tonnage. So far as the United States is concerned this loss is further compensated by the fact that such vessels as are able to continue in the trade naturally seek the more profitable freight of a neutral country. The number of ships which have entered American registry since the outbreak of the war and the domestic shipping which has engaged in the foreign trade are evidences of this fact.

That there has been a very considerable increase in freight rates along some routes and for certain commodities is not to be denied. It would, however, be easy to draw the incorrect conclusion that this is wholly due to lack of available tonnage. As a matter of fact, at least until very recently, there has been an abundance of unchartered tonnage available at American ports. The same bulletin of the Boston Maritime Association, already quoted, contains the following paragraph:

"Repeated offers of sail tonnage for coal to South American ports at equitable rates have no results, and there are at present tied up in Boston four steel ships for which payable business can not be obtained. This association has given a list of Boston-owned tonnage to the Secretary of Commerce, representing over 200,000 dead-weight capacity, which could be chartered foreign if rates could be obtained that would pay for round."

The actual reason for the increase in freight rates does not seem to be the result of the lack of tonnage. The existing war furnishes other adequate causes for the present situation. The following are the abnormal or exceptional conditions created by it:

1. The derangement caused by the war, which includes the danger of capture or detention and the scattering of mines near to harbors and along navigable routes. All of these greatly increase the risk of navigation and consequently the cost of carrying freight.

2. The probable delay in the handling of boats engaged in trade with countries involved in the war, due to the fact that the harbors of the belligerents are congested by the presence of large fleets of vessels. It is also difficult to obtain men for loading and unloading and for necessary repairs. There is a further difficulty in obtaining access to wharves and dry docks. As illustrations of the congestion and delay in foreign ports the following specific cases may be mentioned: A ship sailed from Baltimore to Havre, the voyage occupying about 14 days. Under normal conditions she would have discharged her outgoing cargo and be ready to return with whatever cargo was obtainable in 7 to 10 days. The boat arrived at Havre at the end of November and was detained there over 20 days. It is not certain that she has left yet, as she was compelled to go to Cardiff for coal, which caused additional delay.

The ship *Missourian* sailed from New York November 29 for a French port. She carried some 1,500 horses and could have carried 8,000 tons of cargo at $8 a ton. It was ascertained that she would be detained in the discharge of her cargo and there would be no profit for the freight carried, even at the unusual price named. Instances have occurred in which boats have been detained in port for almost 60 days in discharge of general cargo.

3. When a boat sails to a foreign port there is no certainty that she can obtain a cargo or supply of coal for the return voyage. It is desirable to carry coal for a round trip from the port of departure, which, to the same extent, reduces cargo capacity.

4. The additional cost of war-risk insurance, ranging from a minimum of three-eighths per cent for the round voyage upon cargo or vessels engaged in trade in the Western Hemisphere to 3 per cent for the round trip to Rotterdam and 5 per cent for the round trip to Bremen, and the limit of the amount to $750,000 which the Government War Risk Bureau will place on both ship and cargo.

5. At the beginning of the war the situation was complicated by the breakdown of exchanges and credits. This condition still exists in some localities. The factor which prevented the carrying of exports abroad was by no means scarcity of boats; the problem was rather a financial one. Indeed, in the early months of the war there was a large amount of shipping in ports of the United States, not only upon

the Atlantic, but even more in Gulf ports. These boats awaited cargoes, chiefly grain and cotton, which under normal conditions would have been sent at that time, but which were withheld for reasons other than lack of tonnage. An important feature of the situation relating to the cotton trade was the determination of the Liverpool Cotton Exchange not to make purchases. It will be particularly noted that none of the causes of increased freight rates will be remedied by an increase in the number of available vessels.

As a matter of fact, except in relation to consignments to ports of belligerents which are regarded as especially dangerous, notably those in the North Sea, and in relation to cargoes of doubtful character—that is, those that might be construed to be contraband—the rates have not increased in as great a degree as seems to be popularly assumed.

A special bulletin regarding the foreign shipping situation issued by R. G. Dun & Co., under date of October 19, 1914, contains the following paragraph:

"Maritime freight rates in general have declined as compared with three weeks ago. To Europe the excess over normal rates does not exceed 25 per cent on the average. To Asia, Africa, Australia, and New Zealand the premium varies from 20 to 25 per cent. * * *"

Special bulletin of R. G. Dun & Co., under date of December 29, 1914, contains the following items:

"The ocean rates to Asia, Africa, Australia, and New Zealand are, as a rule, either no higher or somewhat less than they were last October. To the west coast of South America the rates are very nearly what they were prior to the outbreak of the war.

"Rates of war-risk insurance have, on the whole, declined in the last two months."

Both these bulletins indicate that from all the more important ports of the United States regular sailings have been resumed, and that, generally speaking, there is sufficient tonnage to meet all demands.

The tables at the end of this report indicate in detail changes in freight rates which have occurred for the dates specified. It will be found upon examination of these tables, which display rates between New York and European ports, and between New York and South American ports, that, generally speaking, rates of freight have not increased more than 25 per cent during the war period to any South American port. In many instances the increase is very slight.

While the rates to European ports have, naturally, increased in greater ratio, the increase has not been as exceptional as might have been expected. In fact, the increase has not been disproportionate to increases which have occurred in times of peace. It will be noticed, for example, that the average rates on grain and flour from New York to London for the year 1912 were nearly double those for 1911; also that rates on grain from New York to Liverpool were, at some time during the quarter, quoted as low or lower during the last three months of the year 1914 as the maximum rate for the same period of the year 1912.

In its more important features the above is substantially the situation with respect to which the proposed bill must be considered. In the first place, it is doubtful whether the conditions outlined constitute an emergency calling for a departure from all former policies of the Federal Government in relation to American industries. In the second place, if this be conceded, will the provisions of the proposed measure effect a satisfactory remedy, waiving entirely for the moment all fundamental questions as to the expediency of Government ownership? The advocates of the measure undoubtedly expect to accomplish two main purposes—one to promote the development of trade with Central and South American countries and the other to lower freight rates on American commodities to European ports. It is quite out of the question that the means proposed in this bill will accomplish either. In the first place it would be impossible to build sufficient ships in a short period of time to produce any material effect upon the amount of available tonnage. It is generally agreed that nothing effective could be accomplished by this means in less than 18 months.

To merely transfer ships from private to public ownership would accomplish nothing. The only other course apparently open is to purchase foreign tonnage now interned as the result of the war. It is, of course, open to question whether this could be accomplished without serious complications. Even if we persisted in our right to make such purchase it would be entirely possible for any offended nation to retaliate in a manner which would affect our foreign trade much more seriously than any real or imaginary lack of tonnage. It would therefore seem that the opportunity of materially changing the economic situation by increasing tonnage is quite impracticable. If such an outcome were seriously contemplated by the authors of the bill the initial capitalization proposed is nothing short of absurd. The results that could be produced within the limits contemplated would be insignificant. So far as the difficulty arises from shortage of tonnage, the only really practical suggestion in the bill is to release any unnecessary tonnage now utilized for auxiliary naval purposes. This could be readily accomplished without resorting to the doubtful machinery of the proposed bill. Let any such ships be chartered directly to such private agencies as may require their use.

If the reduction of freight rates is seriously contemplated in the proposed measure this could be much more effectively accomplished by more direct means, two or three of which may be suggested. First, the control of rates might be vested with the Interstate Commerce Commission as proposed in the recent report of the Committee on Interoceanic Canals of the United States Senate and in the majority report on this bill in the House of Representatives. A less mandatory means might be found in chartering public vessels to private concerns with restrictions on freight charges. It has been suggested that if the Government wished to lend financial aid without resorting to direct or indirect subsidies, a provision might be made to loan at a small rate of interest, say 3 to 4 per cent, an amount equal to not more than 50 to 60 per cent of the cost of the ship. This advance would, of course, be adequately secured by first mortgage and suitable insurance. Postal savings funds, it is conceivable, might be used for this purpose. Under present conditions the most serious handicap so far as some of the more important European ports are concerned is the excessive cost of insurance. At any rate much simpler and more direct means can be devised to accomplish the purposes sought than those proposed in this bill.

In so far as it is the purpose of the bill to promote trade in Central and South America, it is again peculiarly ill adapted to the purpose. The history of trade development clearly indicates that it may not be expected to follow the mere opportunities of transportation. A great many other factors enter into its creation. It is a significant fact that quite a number of the more conspicuous transportation companies have developed from trading companies or associations of merchants. For example, one of the more important lines trading with the west coast of South America grew out of a concession by certain South American countries for the production of and exportation of nitrates. Having developed this business and secured a market, it was quite desirable to develop an outgoing traffic, resulting eventually in the establishment of a successful line of merchant vessels. Similarly the United States & Australian Steamship Co. is said to have resulted from a combination of merchants who, having developed certain trade, found it desirable to charter ships for transportation.

No doubt other equally conspicuous examples could be cited to show that merchants' or traders' activities must precede or at least be intimately associated with the development of a successful transportation line. New trade routes are most apt to be built up with countries whose resources are just being developed. Such countries usually lack capital, and not infrequently transportation companies when not the owner of the product must advance capital to those who are developing natural resources and producing merchantable products. It is said that the success of the Germans in developing trade has frequently depended on processes of this sort.

Can it have been contemplated by the proponents of this measure that the United States would embark upon trading enterprises? If so, the details of such a plan should certainly be revealed. It would be interesting to know exactly how this is to be accomplished. If such a course is not contemplated, then the expectation of stimulating our trade relations by the provisions of this bill would prove utterly futile.

Taking up the alternative supposition, namely, that the bill contemplates a permanent policy of the Government, inevitably raises the whole question of the expediency of Government ownership. The general arguments against this policy run with full force against this particular application of it. We may briefly state the principal objections to the general policy of Government ownership as follows:

(a) Subtraction from the field of personal endeavor, (b) destruction of individual initiative and motive for effort, (c) the constant tendency to maximum costs, (d) multiplication of Government employees and officials, (e) increased opportunity for corruption, (f) labor problems, (g) administrative and executive inefficiency, (h) restriction of the motive to invent and improve the facilities of service, etc.; and in general it may be said that industries reach their highest perfection and greatest efficiency when allowed to develop in the free play of economic forces. This is a process of constant change and adaptation calling for high executive ability and the utmost freedom of action, while Government agencies are necessarily sharply limited by absolute law and tend to become stereotyped, cumbersome, and immobile.

It is, however, to the special objections to the scheme of Government ownership proposed in this bill that attention is directed. With the exception of those who favor Government ownership in whatever form because it accords with their belief in a socialistic state, even its most radical advocates have limited its scope to two classes of industries, (a) public-service enterprises which naturally tend to become monopolistic, and (b) certain activities supposed to be closely associated with the moral or social interest of a community. Of the latter class may be mentioned bathhouses and lodging houses in some instances owned by municipalities.

The essence of the argument for public ownership of certain public utilities is that their highest efficiency and minimum costs are attained under monopolistic conditions. With the element of competition removed as a check on charges and deterioration of service the necessity of public control immediately arises. Under such conditions the expediency of public ownership may be argued with considerable plausibility. It is to be noted that such activity is exclusive in the given field and thus eliminates entirely competition with private interests and modifies materially other difficulties, such as labor problems, etc.

The experiment in Government ownership as proposed in this bill can not be justified by any of the arguments which apply to the taking over in its entirety of a naturally monopolistic public enterprise. The field which it invades is as far from naturally monopolistic conditions as could be selected. No public franchises are required, no streets are occupied or torn up or other public property laid under tribute, no special privileges are granted, nor uniformity of service required.

The bill provides merely a plan by which the Government may become a competitor in the shipping business with private shipowners, and at least for a considerable time a comparatively small competitor. Only one of two results could follow: If the Government should go into the business expecting to earn a reasonable profit, such as the minority stockholders, as provided for by the measure, might reasonably anticipate, and should fairly subject itself to all the economic conditions of the trade in buying, maintaining, and operating a fleet of merchant ships, making adequate provision for depreciation and obsolescence and for ordinary and the present extraordinary risks and losses, it would not materially change the existing status.

If, on the other hand, the Government should pursue the policy of operating its boats on a no-profit basis, it would of course have the result of immediately driving private competitors off any route it chose to invade. It would also immediately check or stop the investment of private capital in the shipping trade. In short, instead of increasing tonnage, it would very soon reduce it, eventually doing more harm than good. The testimony of Mr. Huebner before the Committee on Interoceanic Canals of the United States Senate, as recorded in the hearings on H. R. 14385, on pages 100 and 101, indicates that such Government-owned merchant vessels as already exist, in order to promote the general interest of shippers as well as shipping, have been obliged to enter conference agreements or at least tacitly concur in such arrangements.

This by no means exhausts the difficulties to be encountered by the Federal Government in becoming a competitor in the shipping trade. If such vessels were to engage in foreign trade, they would almost surely come in competition with the foreign-owned lines. Should they attempt to establish unprofitable rates in order to promote American trade, it is easy to predict that foreign Governments would devise retaliatory measures, which would more than offset the advantage sought.

One of the provisions contained in the bill for securing ships aggravates the dangers of international complications. Undoubtedly it was one of the inspiring motives for those who framed this bill to release boats which have been interned as a result of the war. Whether such vessels could be purchased without giving offense is a delicate question. One of the policies of the present administration accorded universal approval is that of maintaining the most circumspect neutrality. The President has gone to the almost unprecedented limit of using his utmost endeavor to discourage private loans to belligerents. Is it consistent with so strict an application of the policy to make—at least indirectly—available to one of the belligerents many millions of dollars which had been made unavailable by the incidents of war?

Perhaps a still more perplexing problem would arise out of questions incident to the status of Government-owned merchant vessels.

Determination of questions of this sort would certainly subject international law and international customs to wholly new circumstances. Would such boats have the quality and be subject to the amenities due to war vessels or would they subject the dignity of the United States to the treatment accorded to privately owned merchant craft on the high seas? Undoubtedly the most disturbing element of the present conflict so far as the United States is concerned is the attitude taken by one of the belligerents toward the shipping of neutral nations. This has been the subject of repeated protests and has recently caused the President to file with the Government referred to a note of emphatic disapproval.

It is not necessary to enumerate in detail the difficulties to be encountered. The right of search now maintained would certainly subject a Government-owned vessel to serious embarrassment. Even the fact that such vessels might be expected to maintain exceptional precautions as to their cargo and manifests, yet the constantly changing character of contraband goods, being apparently limited only by the declarations of belligerents, would be a constant source of uncertainty and irritation. In short, every such craft set afloat would add one more risk of our being drawn into the present war, to avoid which is the most united and fervent desire of all American citizens.

Another serious objection to the measure arises from the necessity of experience and expert knowledge in any commercial or industrial enterprise. It is a grave error to suppose that the Government or any other untried agency can enter the shipping business and make a success of it. It is not only necessary that any transportation line should own or control ships, it must own or have the use of necessary wharves; it must also have affiliations with shippers; it must have that familiarity with the course of trade which is acquired by long experience. This includes an acquaintance with shippers and a careful study of the demands of shipping and of the carrying of exports and imports. Established lines have agencies all over the world. Any corporation, such as that contemplated by the bill, would be entering upon a new field and be compelled to act under very great disadvantages, because placed in competition with those who have had long experience and have gained skill in the business contemplated.

In view of the above considerations and other facts and arguments which will no doubt be presented in a more extended discussion of the bill, the undersigned recommend that Senate bill No. 6856 be not enacted into law.

Mr. President, there are certain tables accompanying this report, which I ask to have inserted without reading.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The tables referred to are as follows:

APPENDIX I.

Freight rates from New York to Brazil.

[Furnished by Paul F. Gerhard & Co.]

	1892				1912			
	Pernambuco.	Bahia.	Rio de Janeiro.	Santos (landed).	Pernambuco.	Bahia.	Rio de Janiero.	Santos (landed).

[1] Per 100 pounds.

Mr. GALLINGER. Mr. President, I now propose to turn my attention to a discussion of the merchant-marine question in its larger sense, a question that has engaged the attention of Congress in former years and which is engaging the attention of Congress at the present time. Whether or not what I have to say will interest Senators I do not know, but I feel that it is important that certain facts relating to this great question and to the scheme that is contemplated in the bill now under discussion should be placed in the CONGRESSIONAL RECORD and before the American people.

The proposition that the Government shall purchase or lease vessels and put them in the over-seas trade is, in the first place, a complete reversal of the policy of our Government in matters of that kind. It is a distinct and unqualified recognition of the

principle of Government ownership, and for that reason is, to my mind, utterly objectionable. From my viewpoint there never has been a time when by a reasonable outlay on the part of the Government we might not have had an American merchant marine, the simple method being to somewhat increase the subvention provided for in the ocean-mail act of 1891, for the carrying of our mails to foreign countries, a policy adopted by all maritime nations. Had that policy been adopted, which I have advocated persistently for many years, there would have been no need of legislation such as is now proposed in the bill under consideration. Being opposed in toto to the principle of Government ownership, I oppose the bill on that ground, and on the further ground that I am fully persuaded that if the project is entered into it will prove to be a flat failure financially and may involve us in serious international complications.

In the hearing before the House committee Secretary McAdoo frankly admitted that the ship lines that are in contemplation will probably not be self-sustaining, and it goes without the saying that if the Government engages in business in competition with private enterprise and loses money in the operation the taxpayers of the country will not long submit to a business experiment of that kind.

In every effort that has been made to secure legislation in the interests of the American merchant marine by granting a postal subvention a provision has been inserted in the bills to the effect that the vessels should be constructed according to plans and specifications furnished by the Navy Department, and that they should be so constructed as to be available in time of war. In the present bill no such provisions are made. The proposition is to purchase a fleet of old ships, most of them constructed for transportation purposes, the value of which as auxiliaries in time of war would be, at the best, negligible. It seems to me the part of wisdom for Congress to reject this proposition and to then make adequate appropriations from the Public Treasury, either by increasing the mail subvention or by direct subsidies sufficient to enable private capital to build ships so constructed as to not only serve the purposes of over-seas transportation but to be of real value to the country in time of need. Who can tell the amount of money that will be required to rebuild the ships that it is proposed to purchase, so as to make them available for our purposes? The whole scheme is chimerical, and if this legislation succeeds it will be at best a tremendously expensive and foolish venture.

It should constantly be borne in mind that there is a Government-owned steamship service in existence at the present time, but it is not exactly a favorable precedent for new legislation.

The Panama Railroad steamship service has been operated by the Government in large part as an auxiliary to the work of canal construction. Its vessels have had the preference in the carrying of canal supplies and material, particularly of the cement, of which so many thousands of tons were used in building the locks of the great waterway. This Government line has in every possible way been favored by the Government, and yet it appears from its annual reports that the net result of its operations during the three years 1911, 1912, and 1913 is a deficit for these three years of $12,365.54.

But this deficit does not tell the entire story of Government ownership and management of the New York-Colon line, for this Government line is not run on the ordinary accepted methods of the steamship business. No money is paid out by the Government line for insurance; a commercial company would have to pay about 3 per cent a year. The Government line does not make any allowance for the depreciation of its floating property; a commercial company would make an allowance annually of 5 per cent. Finally, so far as is known, the Government line is not charged up with any interest, but this is a fixed obligation of a commercial company, and the rate paid probably would be 6 per cent.

To be exempt from insurance charges, from depreciation charges, and from interest charges, and yet to show a net deficit for the operations of three years, is not a brilliant record—not a record calculated to encourage the American people to desire to have their Government go into the steamship business on a larger scale. Any commercial company in the place of this Government line and managed in the same way, having to pay insurance and interest, and having to mark off 5 per cent annually for depreciation, would have gone into bankruptcy long ago. But, as a matter of fact, the American steamship companies that have been carrying goods in competition with the Government line between the Atlantic and Pacific coasts via the Isthmus of Panama, or until recently via the Isthmus of Tehuantepec, are supposed to have been doing a reasonably prosperous business, and they have been doing this because commercial steamship companies are in a position to do business very much better than is the Government. There is no suspicion of graft or wrongdoing of any kind in the management of the Government-owned line to Panama. There are trained steamship men at the head of it. But the relative lack of success of this one Government line is believed by those familiar with the shipping trade to be due to causes inherent in Government ownership and management of business enterprises.

A few years ago there were bills before Congress, resulting from the inquiry of the Merchant Marine Commission, that provided for the payment of adequate compensation under the terms of the act of March 3, 1891, in order to create national lines of American-built steamships owned by commercial companies under contract with the Government, from the Atlantic and Pacific coasts of the United States to the principal ports of South America, and across the Pacific to Japan, China, the Philippines, and Australasia. It was the expectation and the estimate of practical merchants, bankers, and shipping men that an expenditure of $2,000,000 a year, in addition to what is now being paid, would suffice to establish and maintain a swift postal service under the American flag to all the countries mentioned, and that this service would require the construction and employment of at least 30 American steamers, ranging in size from 6,000 to 15,000 or 20,000 tons, and costing from $750,000 to $3,000,000 each, or a much larger fleet if the ships were of less tonnage. These ships, it is true, would be owned by commercial companies, but they would be serving the postal and trade needs of the United States and under the terms of the law would be as surely available for naval auxiliary service in time of need as if they had been owned by the Government.

If those bills had been enacted it is probable that Congress would not now be confronted with this proposition to invest $30,000,000 or more of money, to be borrowed by the United States, in order to qualify the Government to embark in the ocean steamship business, and it is conceded that this will be but the beginning of the enterprise.

It is manifestly going to cost a great deal more money now than it would have cost if the other plan had been adopted several years ago. Apparently the Government now is going to buy and own the ships outright. It will be found that $30,000,000 will not go so far in the purchasing of ships as may be imagined. Assuming that the newly acquired vessels will cost each $1,000,000—not an extravagant supposition—it must be remembered that it will not be safe for the Government to put all of the $30,000,000 into ships, as something must be kept in reserve as working capital. Therefore it is probable that no more than 15 or 20 vessels can be added to the merchant marine by this extraordinary expedient of Government ownership, or distinctly fewer than would have resulted from the passage of the ocean mail bill of several years ago.

It was stipulated that those ocean mail ships should be built in American shipyards. They would have provided employment for several years to thousands of skilled American mechanics. But it appears to be contemplated in the present movement to purchase cheap ships of foreign registry—so that American labor will fail to procure any employment in the construction of the proposed fleet for Government ownership. It is quite possible that these vessels may be cheaply bought, but if this is so, it should be borne in mind that it is at the expense primarily of the workers in our shipyards and allied industries, and to the practical destruction of private shipping.

The way will be open for the foreign steamship companies that may sell their ships to the United States to build new, larger, and more economical vessels when the war is ended—vessels with which the older craft of the proposed Government fleet can not compete in international commerce. What would then become of this Government fleet—what use or refuge would there be for it? It has been suggested that the ships could be used as transports, and it is an unfortunate fact that almost any old thing seems to be regarded as good enough for carrying the soldiers of the United States. Thus the old foreign-built transports that were acquired before the outbreak of the Spanish War are still being kept ready for service, though any commercial company compelled to work its way and bear the stress of competition would long since have relegated such old hulks to the scrap heap. Again, what say our Democratic friends to the proposition to buy old ships built in foreign shipyards where the eight-hour day does not prevail, and put them in competition with American ships constructed under the strict terms of the American eight-hour law?

It is stated that the purpose of the bill establishing the Government in the steamship business is to provide facilities for the export of grain, cotton, and other products of the United States to the ports of Europe. Have the champions of the proposed legislation considered the international aspect of that

undertaking? Already it is intimated that the British Government will not look with favor on the purchase of German steamships lying idle in our ports and the operation of them under the American flag in competition with British and French steamers.

Do the promoters of the legislation intend that the Government shall buy the German steamers of the Hamburg-American and North German Lloyd Steamship Cos.? Is it not well known that these two German steamship companies maintain peculiarly close relations with the Imperial Government? Has it not been repeatedly stated that the German Emperor himself is a large stockholder in the Hamburg-American Co.? To whom would the money go if some millions of dollars were taken out of our Treasury and used for the purchase of these German ships? Would not Great Britain and France be in a position to complain that we were replenishing the German war chest and strengthening the resources of their enemy? Would it not be very difficult under these circumstances for us to continue to maintain the correct neutral attitude desired by all Americans?

These Government-owned ships of the United States will have a character before the world entirely unlike that of ordinary merchantmen. They will be regarded as almost a part of the United States Navy—they may perhaps be commanded by naval officers, for the plain warning comes from Europe that if they are brought under our flag they must be officered by Americans and not by the men who now have charge of them.

Assume that these German ships once purchased are loaded at New York with foodstuffs and are sent thus laden to the open ports of the British Isles. Is there not some serious danger of a remonstrance from Germany that we are feeding her enemy, and that the next time the ships should be sent to Bremen, Hamburg, or Trieste? What will the answer of our Government be if a representation of this kind is made to the State Department? It will be a matter of common knowledge all over the world that the United States Government is directing the movements of these ships and is responsible for the service which they may undertake. How can these national vessels be used to feed a nation on one side without great peril of provoking the resentment of all nations on the other side? Is not a Government fleet of steamships a most fruitful source of discord under present conditions between the United States and the belligerents of Europe? The export of some thousands of bales of cotton or bushels of wheat would have been dearly purchased if it involved us in war or risk of war.

The senior Senator from Massachusetts and the senior Senator from New York have discussed the international aspect of the question so ably and unanswerably that nothing further need be said on that ground.

In the Boston Commercial Bulletin of Saturday last, a leading trade journal, was an editorial that will bear reproduction. It is headed: "Shall it be war for us?"

I will say that the editor of that paper has represented the United States Government as an ambassador to one of the present belligerent nations. The editorial reads:

Secretary McAdoo assures the country that there is no ground whatever for the fear that the sovereignty of the United States Government would be involved if one of the ships which are provided for by the shipping bill now before Congress were seized by a belligerent. He admits that if the ships in question were operated outright by the Government, an awkward situation might arise; but where the Government, he declares, is merely a stockholder in a private corporation, no question as to the Government's sovereignty arises in the event of the seizure of the property of the corporation. "The Government," he argues, "would stand in relation to such a corporation exactly as any individual stockholder does to a corporation in which he is interested. A suit against the corporation does not necessarily involve the shareholders."

What arrant nonsense. Does anyone suppose that the seizure by a foreign Government of the Suez Canal, which is owned by a private corporation in which Great Britain has a controlling interest, would not be considered a direct challenge of the sovereignty of England? Would that country calmly consent to have the justice of the seizure thrashed out in some court, or rather would not her answer be a prompt declaration of war?

The Panama Railroad Co. is another private corporation, but its entire capital stock is owned by the United States Government. Is there anyone in this broad land who can demonstrate to his own satisfaction that the forcible acquisition of that property by a foreign country would not be an act of hostility against the American Nation?

The President's shipping bill provides for a corporation to be created by the Government, to be owned by the Government, and to be managed by the Government. Panama Canal bonds, which, of course, are a Government security, are to be issued to the amount of $30,000,000 for the purchase or construction of ships. The affairs of the corporation are to be managed by a shipping board consisting of the Secretary of the Treasury, the Secretary of Commerce, and the Postmaster General. In other words, we are to have nothing less than a Government institution whose every activity will have, and, indeed, must have, the sanction of the Government itself. To aver, therefore, that foreign interference with the affairs of such an enterprise could not possibly involve the sovereignty of the United States Government is worse than fallacy. It is drivel.

The President has declared that those who oppose his shipping bill must answer for the grave economic consequences of the defeat of the bill. But do those who intend to support the bill stop to reflect that they may well have consequences infinitely more appalling to answer for?

That the country's internal and external trade is seriously hampered by the lack of adequate shipping facilities no one will deny. The loss which it spells for the southern cotton grower is especially severe. Yet, viewing the matter broadly, not even the prospect of complete economic relief to all classes in the community would justify the taking of steps which might be calculated sooner or later to plunge us into the hell broth in which European civilization is to-day stewing.

The danger is not exaggerated. Greatly as it is to be deplored, the fact remains that the international peace propaganda of recent years has not appreciably changed human nature. The past 20 years alone have been marked by no fewer than seven wars of the first magnitude, culminating in the bloodiest conflict in human annals. That is to say, nations have sprung at one another's throats on an average of once every three years. When, in addition to this, it is borne in mind that there have been many occasions when other wars have been happily averted by the veriest good luck, it will be seen that for this civilized world of ours the past quarter of a century has been a period of constant war or of danger of war. The world has, indeed, been a veritable powder magazine to which the spark has been applied on more than one occasion while rulers and ministers were still engaged in exchanging with one another assurances of the most pacific intent.

Let us not be too sure, therefore, that we, too, shall not yet be drawn into that circle of fire. Human passions and prejudices and hatreds have been raised to a pitch which renders calm judgment next to impossible. Nations with their backs against the wall, fighting for their very existence and sending the flower of their manhood to inevitable slaughter can not be expected unerringly to discriminate between fancied grievances and real grievances or to have the same finical regard for the proprieties that would characterize them in time of peace. Indeed, under such conditions everything else is subordinated to the requirements of the first law of nature, viz, self-preservation. Let no neutral nation, whether intentionally or otherwise, do aught that collides with that law, for as surely as there is a sun in heaven that neutral will be called upon to choose between a humiliating backdown and the sword.

That, then, is the point toward which this monstrous Wilsonian policy is sweeping us—us who are as pitiably prepared for a death grapple with a first-class power as we were to prevent the collapse of our foreign trade on the outbreak of the present war. That any person who sees the chasm yawning in front of us will be dissuaded from opposing the shipping bill by the violent and wicked maledictions of the President is unbelievable. Now if ever is the time for sound common sense and all the forces of patriotism to assert themselves. If that means to open the floodgates of Mr. Wilson's wrath, so be it. What is either his good will or his ill will when placed on the scales with the country's permanent welfare?

I do not propose to weary the Senate, as I said a moment ago, with making any extended quotations other than I have made from the newspapers of the country; but I have quoted very freely from Republican and from Democratic papers, all of which oppose this bill with great resoluteness. I now feel that I ought to quote at least from one Progressive newspaper. The Boston Evening Record, owned and controlled by Mr. Bird, recently the Progressive candidate for the governorship of Massachusetts, has this to say in an editorial two or three days ago, the caption being the simple but suggestive word "Danger":

Senator ROOT drives home the note of warning—we buy a quarrel with every ship bought under the proposed ship-purchase bill.

While lawmakers are debating the legal points and trying to decide whether one or another party or the independent Member of Congress is the most expert in the technicalities of international law, one fact remains clear as daylight, and as difficult to snuff out or hide. By changing our policy in the midst of the war we shall lay ourselves open to the charge of insincerity and national humbug, and play directly into the hands of anyone who suspects our motives and intentions. Let's keep the country clean. Let's avoid the obvious criticism that we are making a national move for the direct benefit of one of the belligerents.

The point is not that by the passage of the ship-purchase bill we should bring money and relief to Germany, but it is that by passing that bill now we adopt a course which was not considered before the war began, and therefore are, in the midst of the conflict, selecting a new attitude which by no stretch of the powers of logic can be construed as neutral.

President Wilson has been much praised for his attitude in this war. Why? Because it has been the opinion of the country that he has resisted all temptations and dangers of bias and has kept the Nation on an even keel of impartiality and strictest neutrality. Now, what becomes of that attitude? Obsessed by the project of ship purchase, he has abandoned all his groundwork of sane statesmanship and would plunge the United States into a course and undertaking not only practically hazardous but manifestly opposed to our national professions and our national reputation for square dealing.

"We can not," says Senator ROOT, in words that will ring in history, "measure the number of our steps. One unneutral step will lead to further unneutral steps, until we are in the thing."

Every American must heed those words and that thought. Thus far in the grim and portentous history of this bleak year we have walked unscathed and honest. We can not afford to smash that record of sanity and honor. We can not afford to pander to the pocket and sell the soul of this Nation. We can not afford to substitute a plunge into speculative business for the sober investment of the Nation's character in the gold bonds of a people's integrity and good faith.

We have no part in the great quarrel of Europe. Our duty is clear, plain, inevitable. It is to walk straight, mind our own business, protect our incontestable rights, and do no man and no nation injury undeserved. Be honest! Let it be said of this Nation:

His strength was as the strength of ten
Because his heart was pure.

We must keep the faith. We must be neutral not simply in profession but in act, and our acts must be bred in conviction. Our duty is clear. It remains to follow it. Senator ROOT's warning of the consequences of subversion of principle is pertinent and historic.

Very different from the splendid progress of our great coastwise shipping is the story of our overseas shipping in its long and sad decline. As far back as 1810, under the favoring preferential customs duty and tonnage tax laws of Washington, Jefferson, Hamilton, and Madison there were 981,019 tons of American shipping registered for foreign commerce. That fleet gradually increased to 2,496,894 tons in 1861. Now our registered fleet has dwindled to 1,027,776 tons. But that figure, though actually less than the total of our registered tonnage 104 years ago, does not tell the entire story, for it is well known that a large part of our present registered shipping is seldom or never engaged in actual foreign trade. Many vessels plying along the Canadian border sail under registry instead of under coastwise enrollment, from habit or convenience. Many more ships engaged in the longer coastwise voyages, especially in connection with the railroads across the Isthmus of Tehuantepec and the Isthmus of Panama, also sail under registry, because their voyages carry them along the coasts of foreign countries. Other vessels are employed on infrequent voyages in foreign and frequent voyages in coastwise carrying. It is a fair general estimate that the amount of American shipping now actually and constantly engaged in foreign commerce does not far exceed 500,000 tons, or about one-fourteenth of the shipping enrolled and actually employed in our domestic trade; that is, for every ton of shipping engaged in foreign commerce the United States has approximately 14 tons engaged in domestic commerce. In 1861, as has already been said, our overseas shipping and our coastwise shipping were substantially equal in tonnage.

Since 1861, in spite of the wonderful growth of our railroads, the coastwise shipping of the United States has almost trebled in tonnage. Our foreign commerce, our exports and imports, have increased tenfold since 1861. If American shipping in the foreign trade had grown as it ought to have grown in the same proportion we should now have a fleet of 25,000,000 tons, challenging the supremacy of Great Britain on the ocean. Instead, as has been said, our overseas fleet has shrunk to a nominal 1,027,776 and an actual 500,000 tons of shipping engaged in the foreign trade. This is the only great national industry that has declined—the only one that has not grown rapidly and constantly to immense proportions. What are the causes of this economic phenomenon? It is sometimes said that a great cause was the Civil War and the depredations of Anglo-Confederate cruisers. That was a brief, temporary cause. It was ended by the war, and the actual capture and destruction of American ships in that conflict did not exceed 110,000 tons, out of a total registered fleet at the beginning of the war of nearly 2,500,000 tons, though during the war, as an indirect result of the depredations of British-built armed craft under Confederate colors no less than 751,595 tons of American shipping were sold and transferred to foreign flags. Yet when the war ceased American overseas shipping again began to grow, increasing from 1,387,756 tons in 1866 to 1,515,648 in 1867; and then, with some fluctuations, to 1,589,348 tons in 1878. Since that year the decline has been almost constant to the present time.

The Civil War was but a temporary factor; it was not permanent. It is sometimes said that the decline of our ocean shipping and the gradual loss of our carrying trade have been due to a mere change in materials of shipbuilding from wood to iron and steel and in form of propulsion from sail to steam. But American shipowners and builders had begun to launch steamships, both of wood and of iron, before the Civil War, and some of those steamships were among the most efficient and successful in the world. American sailors in the handling of vessels under canvas, be they frigates, merchant ships, or yachts, have always been acknowledged the most capable men of their calling. But the history of mechanics and inventions shows, too, that the American race has a genius for metal working and machinery. The voyage of the American battleship fleet around the world, with a trivial expense for repair to boilers and engines, is well regarded as the most significant triumph of marine engineering in our time—every one of these battleships was built and engined in an American shipyard.

The shipwrights of this country were famous men in the working of oak and pine and hemlock, but their successors are equally famous and successful in the working of steel. For many years the United States has been the world's great steel and iron workshop. The plates, angles, and beams for shipbuilding—the raw material of the completed modern ship—have been, on the whole, for 20 years as cheap and abundant in America as in Europe. Indeed, for a large part of this time American steel for shipbuilding has been quoted at a lower price, and for a quarter of a century this material for ships for the foreign trade has been on the tariff free list, as it is now on the free list for both ocean and coastwise ships.

The explanations sometimes given—very persistently by the attorneys of European steamship companies—that the decline of the American merchant marine in ocean trade has been wholly due to the change from sail to steam and from wood to iron and steel, are superficial explanations. They do not explain at all; they do not reach the real heart of the problem. The advantages of steam over sail were recognized first in the United States as far back as the day of the *Clermont*. In the decade between 1850 and 1860 the swiftest and most popular steamships in the great trans-Atlantic passenger service were American vessels, built and engined in the United States. The records for passages between Europe and America were held then, as they had been held before in the days of the sail packet and clipper ships, under the Stars and Stripes. A high officer of the British Navy, after voyages of observation in both the British and American liners, declared shortly before our Civil War that "there are no ocean steamers in England comparable with the *Baltic* of New York." The historian of British merchant shipping, Lindsay, who had been a sailor as well as a shipowner, and had eulogized the "superior education and more rigorous discipline on board American vessels," frankly acknowledged the superior engineering efficiency of those early American steamers in the trans-Atlantic trade, attributing it to their "effective boilers and ability in their preparation." Dr. David A. Wells says of this critical period in "Our Merchant Marine":

> During the single year 1849–50 we increased our ocean steam tonnage 113 per cent, and the seagoing qualities and performances of our vessels were so admirable that the Cunard Co., which had then been in operation 10 years, was obliged to bring out new ships to compete with them.

In 1849 our deep-sea steam fleet amounted to 20,870 tons. By 1855 it had increased to 115,045, practically equaling the deep-sea steam fleet of Great Britain. Our ship owners and builders were beating their British rivals in steam shipping at that time exactly as they had beaten them in sail shipping. Later on, after the Civil War, American iron for shipbuilding purposes was acknowledged here and abroad to be superior to British iron. The American iron at first bore a higher price, but later, as the records show, American iron and steel for shipbuilding purposes were little, if any, dearer and finally cheaper than the British material.

The pleas so often heard, so often sounded in this Chamber, that the decline of American shipping in foreign trade has been due to "natural causes," the change from sail to steam and from wood to iron and steel, are without historic foundation. The coastwise trade, protected by our national laws, adapted itself to the new conditions. First iron steamships and then steel steamships were constructed in great numbers for the coastwise lines, and in these steamers, as had been done in the sail ships before them, a distinct American type and model were developed combining good carrying capacity, steadiness, and stanchness with a power and speed marking them superior to foreign vessels of the same period and of similar service.

These American merchant steamships were created in the same shipyards, by the same race of men who built the *Oregon*, the *Olympia*, the *Kearsarge*, and the *Kentucky* for the Navy of the United States. It was the coastwise trade that had kept the art of shipbuilding alive and that had made the building of our first steel battle line possible. The delusion sometimes appearing in our newspapers and sometimes heard in the Halls of Congress that the American flag has vanished from the high seas because American workmen could not build ships of iron and steel with boilers and engines is a myth too flimsy to stand serious examination. It may be an easy and plausible theory, very comforting to advocates of a drifting, do-nothing policy and to the foreign steamship companies who carry 92 per cent of our imports and exports and derive from this a revenue of $200,000,000 to $300,000,000 a year. But this theory is pure theory without foundation in fact, and the time has come when it must be abandoned.

And with this must go that other plausible theory that the ocean carrying business is not profitable and not worth the time and labor of Americans. This is another delusion which the foreign steamship corporations and their friends and allies in this country are very solicitous that the American people should accept. It is not true, and no one knows better that it is not true than these foreign steamship corporations themselves. Not only is the ocean shipping business profitable to foreigners who are engaged in it, but there is every reason to believe that it is profitable to some American steamship companies engaged in our West Indian trade, and that it can readily be made profitable to others also.

The Hamburg-American Steamship Co., of Germany, enjoying the favor of the Imperial Government and with the loyal sup-

port of the German people behind it, declared last year a dividend of 10 per cent. The North German Lloyd, another great German corporation, paid 8 per cent. The Peninsular & Oriental, British, paid 15 per cent. The Holland-America Line paid 15 per cent. The Japanese Nippon Yusen Kaisha paid 10 per cent, and like earnings are credited to other great steamship companies of the world. There is reason to believe that in the last two or three years before the war the dividends of most of the prosperous foreign steamship lines have exceeded the dividends of the most prosperous American manufacturing industries. If the ocean shipping business as conducted by our rivals in trade were not profitable to those people the business would not be continued, new ships would not be built, and new steamship lines would not be constantly extended to all quarters of the world. An Englishman or Frenchman or German or Japanese will no more carry on a losing trade than will an American. The notion that the ocean shipping business is not profitable is a delusion equal with that other myth that Americans can not build steel steamships and operate them. These theories are fiction pure and simple, exploited by foreign shipowners or by persons acting in the interests of foreign shipowners to discourage even the making of an effort to build up ocean shipping on the part of the United States.

How hopeless, how absurd, this theory is that Americans can not afford to go into ocean shipping is strikingly demonstrated by the fact that a huge sum, estimated at $200,000,000 of American money, is now and long has been invested in shipping under foreign flags. One company, in which American capital is a large if not a dominant factor, controls a hundred ships in the north Atlantic trade. Another operates 50 ships between our ports and the West Indies and Central and South America. If there is no money to be made in ocean commerce, why do these Americans put their money into it and increase their investments from year to year—in foreign ships, under foreign colors? All we need is sufficient encouragement from the Government to equalize conditions. That is all.

Right at this point it may be well to say that the Merchant Marine Commission asked the principal American shipowners operating vessels under foreign flags, and also leading capitalists in New York and Boston, whether they would bring their ships under the American flag and continue to engage in the foreign trade if we should recommend to Congress a free-ship law that would give them an opportunity. Every one of these shipowners and capitalists in reply to our definite question answered squarely in the negative. That is why the Merchant Marine Commission of 1904–5 did not recommend free ships. Absolute confirmation of our judgment and of the honesty of the replies of these steamship managers is to be found in the fact that, though Congress in the Panama Canal act of August 24, 1912, did pass a free-ship law offering American registry for the foreign trade to modern vessels built or owned by American citizens, little benefit has come from that legislation. The free-ship policy, tested by a year and a half of experience, has proved a failure as an expedient for the restoration of our merchant marine, just as the Merchant Marine Commission of Senators and Representatives predicted, and yet it was confidently asserted by the Democratic side of this Chamber when merchant-marine bills have been under consideration that if our navigation laws were amended and the purchase of ships from abroad permitted the whole problem would be solved. It is well that that Democratic fallacy has been exploded.

This brings us right to the real heart of the problem. American shipowners operating vessels under foreign colors in time of peace would not give up the foreign subsidies which they happened to enjoy—the privileges, favor, and encouragement of foreign Governments. These subsidies are not given to all foreign ships, but all foreign ships, without exception, do possess another important advantage over our American merchant marine; first, in the cheap wage scale on which they are constructed and, second, in the cheap wage scale and maintenance cost on which they are navigated. The recent Tariff Commission, in its careful examination of the woolen manufacture in the United States, disclosed by actual estimates secured in England and in this country that the cost of building a woolen mill and equipping it with the requisite machinery is from 43 to 50 per cent greater in America. The Merchant Marine Commission in 1904–5 learned that the cost of building an ocean ship in the United States was from 40 to 50 per cent greater, on the average, than in the United Kingdom, a difference due almost wholly to labor, for the steel materials were then and are now as cheap here as abroad. At the present time it is estimated that the cost of ship construction in the United States has been so lessened that the difference may range from 25 to 40 per cent, though greater, doubtless, in some special types of vessels.

But even if "free ships" put American and foreign shipowners on an equality, so far as the first cost of their vessels is concerned, our actual experience under the free-ship policy proves that this is not of itself an adequate solution of the problem. A foreign-built steamer naturalized beneath the American flag comes under American laws for officering, manning, and maintenance. Unless the steamer is a high-class craft for service on the national mail lines, under the law of 1891, not one man of her crew below the higher officers need be an American citizen. Our Government requires only that the captain, his mates, the chief engineer, and the assistant engineers in charge of a watch be Americans, and this is in accord with the general practice of the maritime world. Laws recently enacted by Congress and regulations of the Steamboat-Inspection Service under them do, however, require that American vessels, whether native built or foreign built, shall carry more officers than foreign ships. If this is a burden it is one of deliberate making by Congress. A shipowner of New York, Mr. Ernest M. Bull, of the A. H. Bull Co., gives an interesting example of the effect of our American legislation:

> We have eight ships in the Atlantic coast trade. Frequently on one side of a dock in Brooklyn is one of our ships loading an American cargo for Cuba. On the other side is a British ship of the same tonnage and practically the same type also taking on a cargo of American-made goods for the same port. We are forced to carry three more men in the engine room, more seamen, and a third mate than the British vessel is required to ship.

Capt. Robert Dollar, of San Francisco, a shipowner of wide experience, owning and operating vessels both under the American and under the British flag, makes this comparison of the required crew of a 10,000-ton cargo steamer:

	American.	British.
Water tenders	3	
Engineers	4	3
Oilers	3	[1] 2
Firemen, white crew and coal passers	12	9
Storekeepers	1	1
Donkey men	1	1
Total	24	16

[1] Who are shipped as firemen.

In the old days of the sail ships before the Civil War American vessels, as a rule, carried fewer men than their foreign competitors. The laws of the United States then permitted it. Now American laws and regulations require American vessels to carry more officers and men than their foreign competitors. These laws have been enacted under the plea of providing increased safety and efficiency in navigation. Only a few months ago the Senate passed a bill demanded by the sailors' unions which would add still further to the cost of operating American ships and place further burdens on American shipowners.

A large part, therefore, of the responsibility for driving the American flag from the high seas rests upon the Congress of the United States. It has deliberately handicapped American shipping in competition with the fleets of foreign Governments.

Foreign shipowners, who now convey 92 per cent of our imports and exports, have secured this monopoly of our ocean trade in large part through the employment of Lascars and Chinese as sailors and firemen. The wages of these Asiatics are not far from $8 a month, or one-fourth or one-fifth of the wages of white seamen in the ports of the United States. Capt. Dollar, who gave valuable testimony before the Merchant Marine Commission, stated recently that the cost of a Chinese crew of 42 men carried on an 8,000-ton cargo steamer would be about $500 a month, and out of this the Chinamen would board themselves, while an American or white crew would cost $2,630 a month on the Pacific coast and their food would be provided by the ship, making an annual difference in the operating costs of an 8,000-ton steamer of about $25,512. Indeed, Capt. Dollar declares, the difference would be greater than this, for his estimate does not include the extra men required by American regulations.

Now, the question of the merchant marine is intimately involved with the question of how this difference in wages between the Asiatic and the white man is to be met. We exclude Asiatic labor from the United States in order to preserve the standards of our own labor, but we allow foreign ships owned in Europe or Japan to come freely into the ports of the United States manned with this same Asiatic labor and steal the carrying trade of the United States away from American citizens.

But it is not only the Asiatics whose labor on shipboard underbids American labor. The seamen of the maritime coun-

tries of Europe receive wages which compare with the wages of seamen on American ships exactly as the wages of workers in European factories compare with the wages of workers in American factories. This is true of the great, luxurious passenger liners running to and fro across the North Atlantic. It is true also of the typical cargo steamships plying in and out of our North Atlantic ports. A well-known firm of New York shipowners, operating freight vessels under both the American and foreign flags, furnishes the following precise comparison of the wages of the crew of an American and of a British steamer—ships of the same type and of equal dead-weight capacity of about 4,900 tons:

	American—wages per month.	British—wages per month.
Master	$175.00	$100.00
First officer	90.00	63.18
Second officer	70.00	43.74
Third officer	60.00	.....
Carpenter	40.00	31.59
Boatswain	35.00	29.16
Quartermasters (2)	35.00	.....
Sailors (5)	30.00	(9) 24.30
Chief engineer	150.00	97.20
First assistant engineer	100.00	68.04
Second assistant engineer	90.00	48.60
Third assistant engineer	80.00	.....
Oilers (3)	40.00	.....
Donkey men (2)	40.00	(1) 31.59
Firemen (4)	35.00	(6) 29.16
Coal passers (2)	30.00	.....
Steward	60.00	38.88
Cook	45.00	34.02
Mess man	20.00	15.00
Cabin boy	20.00	.....

Total American crew, 32 men.
Total American pay roll per month, $1,655.
Total British crew, 27 men.
Total British pay roll per month, $994.66.

It will be observed that the American steamer carries a total crew of 32 men while the British steamer carries 27. American law and the regulations of our Steamboat-Inspection Service require the American ship to carry a third officer, which the British ship is not compelled to have, and a third assistant engineer, and three oilers, which the British steamer does not carry. To this extent the American ship is deliberately handicapped by the American Government in competition with the foreign vessel. In other words, our Government itself to this extent discriminates against the American flag in overseas competitive trade.

But even if our laws and regulations were so changed as to allow an American steamer to be navigated with the same number of officers and men as a British steamer of like character and tonnage, the American ship would still be handicapped by the far higher rate of wages which prevails in the United States—wages fixed by our American standards of living and by the earnings of other occupations on shore. It will be noted that the master of the American ship is paid $175 a month, as compared with the $100 salary of the British master; that the American chief engineer is paid $150 a month, as compared with the $97.20 of the British chief engineer; and so on in proportion. Remember that these wages are given to ships of exactly the same capacity and character, running side by side in the same competitive trade from New York to the West Indies. The American steamship is handicapped in the wages of her crew alone to the amount of about $660 a month.

It is manifest that the same wage difference exists between the American and the British steamship as exists between American and British factories. But the difference is made up to American factories, or has been in the past, by the American protective tariff, which equalizes conditions and gives fair play to American manufacturers and their employees. There is no such compensation to the American shipowner, who is compelled to carry on his business, if it is over-seas business, on conditions of free trade, or of worse than free trade if his British or other foreign competitor is in receipt of a subsidy from his Government. In this particular case no subsidy is enjoyed by the British steamer, but the advantage of a lower wage rate is decisive and indeed overwhelming.

In the early years of the Republic, when our merchant marine carried 90 per cent or more of our imports and exports and our merchant tonnage was most rapidly increasing, the higher wages of American officers and sailors—not so much higher as they are now, but higher even then than the wages of their foreign competitors—were offset by the 10 per cent preferential customs duty on imports in vessels of American registry. This 10 per cent preferential duty encouraged or required our merchants to employ American ships for their inward cargoes, and thus made it advantageous for them to employ American ships for their outward cargoes also. In other words, the American merchant marine in those days, when its white sails were set on every sea, was a protected industry. Being protected it prospered then, and if protected it will prosper again.

The American merchant marine alone of all our great industries has declined, for the simple reason that alone it has for many years been left unprotected by our Government. Let us remember that the preferential duty, with its beneficent effect upon American shipping, was not wholly abandoned against Great Britain, our chief competitor, until the year 1849. Up to that time American shipping in the grandest branch of our ocean carrying, the East India trade, was protected by preferential customs and tonnage rates which made British competition impossible. In the year 1849 there began the great clipper trade to the gold fields of California, which gave our shipping a temporary stimulus. But the zenith of our ocean trade was really attained in the year 1855. When the California gold trade and the Crimean War that followed had ceased to stimulate American shipbuilding, the total tonnage launched in our ports fell off significantly from its maximum of 583,450 tons in 1855 to 156,602 tons in 1859—the sharpest and most disastrous decline in our maritime history—and this, it is to be marked, under a Democratic administration and through the years of probably the lowest, least protective tariffs in our national existence.

These facts are recalled because in this Chamber and elsewhere we have too often heard the misleading assertion that the decline of the American merchant marine was due to the Civil War or to the Republican protective tariff policy. Neither one nor the other of these familiar assertions has any foundation in historic fact. They are iterated and reiterated either recklessly for political effect or through design by the agents, attorneys, and sympathizers of the European steamship combinations that now control more than nine-tenths of our ocean-carrying trade—a rich prize not to be regained by the American flag without a struggle.

The maritime Governments of Europe and Japan, as reports of our Bureau of Navigation and the British Board of Trade show from year to year, are now paying in mail and other subsidies, bounties, and subventions a total sum of from $45,000,000 to $50,000,000 annually, of which the British expenditure is nearly $10,000,000. These payments, whether ostensibly for mail or admiralty purposes, or for bounties outright, are given to encourage and develop shipbuilding and navigation, exactly as our protective tariff duties have been intended to encourage and develop manufacturing and agriculture in the United States. What is more, these foreign subsidies, bounties, and subventions are year after year achieving their object of giving the nations that bestow them command of the ocean commerce of the world. All the maritime governments of the world without exception now subsidize either their principal national lines of steamships or all their steamships. All alike regard the policy as wise, necessary, and profitable. Away from the shores of the United States there is no more questioning of the value of a policy of steamship subsidies properly bestowed than there is a questioning of the soundness of the gold standard of value.

It is the three factors of foreign subsidies, foreign low wages in shipbuilding, and foreign low wages in ship navigation that have driven the American flag almost wholly off the high seas, and which keep it off the high seas except as borne by our ships of war and the ships of our few national mail lines.

There is in the United States the capital requisite to restore our mercantile marine, the nautical skill and aptitude requisite to restore it, meeting the need of our commerce and the need of auxiliary national defense. But there must one thing more, and that is broad, brave, positive national legislation. We must make up our minds to protect and encourage the national maritime industry exactly as other national industries have been protected and encouraged. The men in American shipyards, the men on the docks and in the engine and fire rooms of American ships are equally deserving of national consideration with the manufacturers of the country, or the men on the farms, who are entitled to adequate protection, whether they are getting it now or not. The restoration of our merchant marine is not a question for the people of the seacoast and the maritime States, though within these maritime States there live more than half of the total population of this Union. This question of American shipping is a national question of as much importance to the Mississippi as to the Hudson, the Delaware, or the Columbia. A subsidy or subvention in some form to ships is as

justifiable and even more necessary than any of the millions given as a subsidy, direct or indirect, to any other industry in the United States.

I commend to the attention of the Senate the brief, specific bill which I have again introduced for national encouragement of national steamship lines carrying the United States mails and constituting a United States naval reserve to South America, Australasia, and the Orient. This bill, which has more than once received the sanction of the Senate, does not wholly solve the problem of an American merchant marine, but it is a long step in that direction and a step in a field where our national needs are first and most urgent.

As already suggested, the bill under consideration embodies an effort to embark the Government of the United States in a commercial business—the carrying of merchandise or of merchandise and passengers overseas—which, in other great mercantile countries and thus far in our own country, has always been left to private capital and personal initiative. The ownership and operation of the Panama Railroad Steamship Co. between New York and Colon has been cited as a precedent, but it is not a precedent. This steamship company was acquired as a part of the property of the old French canal company in 1903. It has been operated as an incident to the construction of the canal, and the bulk of its business has been distinctively Government business—the transportation of machinery, materials, and supplies for the canal and of United States officials and employees connected with the undertaking. No insurance has been paid on these canal ships; there has been no allowance for depreciation, and no charge for interest on capital. From these imperative obligations of commercial shipowning this one Government line has been exempt, and yet its experience, as will be shown further on, has not been such as to encourage a more extended investment in the ocean-steamship business by the United States.

Thus far no political party in America has declared for or favored Government ownership of steamship services. This present proposal has sprung up suddenly in the excitement attending the great European war.

I want renewedly to call attention to the fact that the point the President of the United States made in his veto of the immigration bill—that it never appeared in a party platform and never received the indorsement of the people of the United States—is equally applicable to the bill now under consideration. The fact is that the clause upon which the President vetoed the immigration bill, as I showed a little while ago, did appear in the Republican platform of 1896, and was indorsed by the people of the United States. But the question of Government ownership has neither been in any political platform I have any knowledge of, nor has it ever been submitted to the people of the United States for their consideration.

This bill is described as an emergency measure, but the policy which it outlines is apparently permanent. Once in the steamship business, the Government is committed to that business. There is no probable way in which it can possibly draw out, notwithstanding the suggestion is made that it may do so. Indeed, it is unquestionably the purpose of many of the proponents of this measure to put the Government into the ocean transportation business as a preliminary to general Government ownership of railroads and other public utilities. The question will inevitably be asked: If the Government operates or controls transportation facilities by sea, why should it not control transportation by land also?

This Government-ownership plan is unmistakably a step toward the goal of which some ardent minds have long been dreaming—Government ownership and monopoly of all transportation, both by sea and by land. It involves in its ultimate form a tremendous magnifying of Federal authority. Time was when the Democratic Party was supposed to cherish a fine balancing of the powers of the Nation and the powers of the States as the very palladium of our liberties, but this proposal of Democratic leaders in Congress, sustained by the national administration, would throw that older Democratic dogma to the winds. There are now 1,700,000 employees on the railroad systems of the United States. Put this army on the Federal pay roll, and add under this proposed bill another army of employees on Government steamships, and no administration, once in power, need ever dread a loss of power in this country. With this immense voting force behind it, drilled and led by astute politicians, a Federal Government of either political party would be far more securely intrenched than any Roman absolutism upheld by the spears of the Pretorian Guard.

The one justification urged for this scheme for Government ownership and operation of steamship services is the alleged justification of necessity. We are told that we need ships to convey our cotton, corn, and wheat overseas to foreign customers, that such ships owned under our own flag are not forthcoming, and that foreign ships are insufficient or absent because of the demands or hazards of the European war. Granted that the necessity does exist, who are responsible? Is it not a matter of official record, in the annals of Congress, that the earnest recommendations of three successive Republican Presidents—McKinley, Roosevelt, and Taft—that sane and vigorous steps be taken by patriotic legislation in this and the other House of Congress to create an adequate American merchant marine have been defeated year after year by the lukewarmness or downright opposition of the Democratic Party aided by a few Republicans? On one occasion a bill that in the judgment of the best-informed men in America would have established swift lines of capacious American steamships to the principal South American countries and to the Orient was passed in this Chamber without a dissenting vote, only to meet obstruction and defeat in the House of Representatives.

On another occasion a similar bill had successfully run the gauntlet of opposition and had passed the House, only to be killed by a persistent Democratic filibuster in the Senate in the closing hours of Congress. There are Senators now in this Chamber who remember that event. There are Senators whose faces were wreathed with smiles of satisfaction when the object of the filibuster was accomplished and the ocean mail bill was defeated.

What is their judgment now in the unfolding of subsequent events, in the light of history? What would not the American people now give for the great fleet of American ocean steamships—built, owned, officered, and manned by American citizens—which that measure, filibustered to death, would have constructed? And that bill would have done all this for a fraction of the cost of the radical proposal which we are now expected to approve here—a proposal repugnant to Democratic and Republican traditions alike. In those great debates the very condition that exists now was pointed out, but the warning went unheeded.

Admitting, for sake of argument, that a necessity exists—that we have not enough American ships and that we must have ships to convey our cargoes and extend our trade—is there no other way in which the emergency can be met but by this revolutionary proposal of Government control and operation of steamship services? Let us recall that only a few months ago, at the outbreak of the present war in Europe, an emergency law was passed here greatly broadening the "free-ship" privilege originally extended in the Panama Canal act of 1912, and admitting freely to American registry for participation in the foreign trade all foreign-built ships, regardless of age, owned by American citizens or corporations. This emergency law also empowered the President to suspend the requirement that foreign-built ships thus admitted to registry should be officered by American citizens and be navigated in compliance with the inspection, survey, and measurement laws rigidly enforced upon American-built vessels.

Many Senators viewed that measure with serious misgivings, of which I was one, but refrained from opposing its enactment, resisting only an unnecessary and dangerous effort to extend its provisions to the coastwise trade, unaffected by the war, where American shipping was known to be sufficient. That effort to invade the coastwise trade was decisively beaten in this body by a vote of two to one, and there was then no objection to the passage of the original measure recommended by the President.

That free-ship law has now been several months in operation, and some foreign-built steamships owned by American citizens or corporations have sought the shelter of our flag. Has the time yet come to assume that this legislation has exhausted its anticipated benefits? Has a most liberal free-ship policy applied under most favoring conditions so quickly proved a failure? Are the ardent advocates of that policy in this body prepared so soon to acknowledge that free ships are powerless to solve the problem of rehabilitating our mercantile marine?

Those of us on this side of the Chamber who long ago sounded a note of warning that the free-ship policy would prove a failure, if it should ever be tried, are not disappointed in the result, but I should hope that the advocates of that policy who at any time when an attempt was made to pass a bill which some of us believed would tend to rehabilitate the American merchant marine have met us with the cry that the only reasonable and rational solution of the problem was to give Americans an opportunity to buy ships abroad would now see their error. We have given them that opportunity. In our legislation we have gone further than that, and we have actually discriminated against our own merchant marine by granting them the right of putting those ships into the trade without the restrictions that our laws impose upon American ships, and yet that policy is a failure.

It is true that applications for American registry for foreign-built vessels have become fewer and fewer in recent weeks, but it is significant that this decrease of applications has been contemporaneous with renewed official advocacy of this proposal for Government ownership. What sagacious merchant or capitalist would care to have the Federal administration and its vast powers and resources as a competitor? The prospect of having to face such competition has dismayed prospective shipowners, and will continue to dismay them. If the agitation of this subject is continued in Congress, there can be no doubt that one result will be the virtual nullification of the free-registry law and the complete cessation of efforts to bring more foreign-built ships beneath the American flag. Yet, it was only a few months ago that the Federal administration was urging this free-registry measure as the surest and most effective expedient to provide the country with a great merchant shipping. The President was given the legislation for which he asked; many Senators who questioned the soundness and efficacy of it nevertheless were unwilling to oppose it in the face of an emergency. The law was passed; it ought to have a fair chance to justify itself before being superseded by a new and untried plan, for which there is no demand and no precedent in the experience of nations.

It has always been a maxim of American statesmanship that the Government should do nothing that could be done by private enterprise. There is essentially no more reason why the Federal administration should buy, build, and operate commercial steamships than that it should undertake to grow the wheat of the country or grow and manufacture cotton. Do Senators from the States of the Middle West and Northwest wish to have the United States Government embark on a large scale in the farming business as a competitor of their constituents? Do Senators from the South desire to have the Government undertake to raise next year five or ten million bales of cotton? Is any Senator from any State in favor of authorizing the Federal administration to take over a part or all of any great business in which the labor and capital of his own people are invested?

Why, then, single out the merchant marine in over-seas trade, the industry of all industries that has received the least consideration and encouragement from the Congress of the United States? Of all our great industries exposed to foreign competition this one of ocean shipowning has alone been left unprotected—unprotected alike against the cheap wages, the subsidies, and the bounties of other lands. It is no fault of our shipowners that there are not enough over-seas ships to-day to carry American commerce. It is no fault of our shipbuilders or our seamen. They have appealed in vain for legislation that would put them on an equality with their foreign rivals and give them a fair and even chance to carry the ocean mails, passengers, and freight of the American people. They have given the country an ample warning of the inevitable result of a war like that in which the chief European nations are now engaged—the very nations upon whom we have foolishly depended for our ocean carrying. The shipowners, the shipbuilders, and the seamen of this country can not be blamed—the responsibility for any loss to American farmers, manufacturers, and merchants that may now ensue from the lack of American shipping rests squarely upon the American Congress, upon those Senators and Representatives who have obstructed legislation that was urged by men who knew the shipping business and was sanctioned by the successful experience of all other maritime Governments of the world.

It is significant that there is no complaint of any shortage of American vessels to convey the coastwise commerce of the United States; yet, Mr. President, on this very bill there is a provision which, if it becomes a law, will open the coastwise shipping of the United States to foreign-built ships. It is a vicious provision, so vicious that of itself it ought to be enough to defeat this proposed legislation. That coastwise commerce has been greatly increased by the opening of the Panama Canal, but the American vessels to convey this new coast-to-coast trade have been forthcoming. Five or six separate, competing American lines of freight steamers are now being operated on regular schedules through the canal between American ports on our Atlantic and Gulf coasts and American ports on our Pacific coast and Hawaii. Lumber, grain, fruits, sugar, wines, and other Pacific products are coming eastward and manufactured goods and coal are going westward—an all-American commerce under the American flag. Sailings are so frequent that there are enough American steamers to leave the Atlantic for the Pacific or the Pacific for the Atlantic on every business day. This coastwise traffic has been reserved for American shipowners, and they are "making good" in the carrying of this commerce, furnishing ships enough, and more.

Some of these Atlantic-Pacific coastwise companies have not only taken care of their own trade, but have supplied spare ships to carry cotton, grain, provisions, or animals to Europe. Other coastwise companies on the Atlantic have put into the European or South American export trade all tonnage that was not absolutely required to maintain the regular service—that is their first and imperative obligation. The American people in this European war have had new and convincing proof of the wisdom of the policy initiated by Washington, Jefferson, and Madison of reserving American domestic trade to American ships, on river, lake, and ocean. Unlike the unprotected branch of our merchant marine—that branch engaged in foreign trade—our coastwise shipping has grown steadily since, as before, the Civil War, from 2,752,938 tons in 1860 to 6,726,340 in 1913—an increase all the more notable because the steam vessels of which the present coastwise fleet is chiefly composed mean an even greater advance in carrying power and efficiency.

Week after week coastwise steamers not needed on their regular routes because of the serious depression in domestic business have been chartered for foreign voyages with cargoes of American products. As neutral vessels, least subject to arrest and detention by belligerents, these American ships have commanded the lowest war insurance rates, a preference which in the present emergency has been equivalent to a subsidy, and thus has offset the high wages of officers and crew and the higher cost of maintenance.

If American ships registered for foreign commerce had increased in the same proportion as American ships engaged in coastwise commerce, there would now be no interruption in our export trade; there would be enough American ships to handle all cotton and grain and provisions offering for foreign markets. The entire country, all the American people, have now learned, though at a heavy cost, that an American merchant marine is not of benefit only to New England, New York, Pennsylvania, California—not to the seaboard only, but to the cotton States and the wheat States and the corn States also—to all of the people in all trades and industries throughout the Union.

The magnificent development of American coastwise shipping, which is five times the coastwise shipping of any other nation and larger than the whole merchant fleet of Germany or any other nation except Great Britain, shows of what American shipowners, builders, and seamen are capable when given a fair and equal opportunity. There have been fair and equal conditions in this coastwise trade. American shipowners have been able to construct their ships and employ their crews on an even basis, without the handicap of competition with the low wage scale and meaner living conditions of Europe and Japan. And there has been no further and overwhelming handicap from European and Japanese subsidies and bounties.

American shipowners in the over-seas trade have been confronted by these cheap wages and these bounties and subsidies and have been almost driven from the ocean. Until the present war the only American ocean steamship services that survived were either those in receipt of moderate mail subventions under the ocean mail law of 1891—the one American line to Europe, several lines to the West Indies or Venezuela, and a line to Australia—or the two trans-Pacific lines sustained by the pride or interest of great transcontinental railroads. Other American shipowners, unaided, though the most enterprising men of their vocation in the world, had been forced off the seas and out of business.

This was no fault of theirs; it was the fault of their Government. And if that Government under the pending bill should now embark in the over-seas shipping business, it will find confronting it the same economic conditions that have made private American competition impossible. These Government lines, face to face with cheap-wage foreign lines, or foreign lines with both cheap wages and subsidies, will be forced to conduct their business at a tremendous loss. But there will be this difference, that while the private-owned American lines have pocketed their losses and withdrawn, the losses of the Government lines will be made up out of the Federal Treasury. In other words, the enhanced cost of operation of the Government-owned American ships will be provided by congressional appropriations, to be paid for by the taxpayers of the country.

It will be readily recalled that when an ocean mail bill was under consideration in this Chamber only a few years ago there was violent objection from some Senators to the proposed subventions on the ground that they involved the use of Government funds to make up the cost of a losing business. If that objection was valid then it is valid now, and no Senator who opposed that ocean mail measure as a "subsidy" can con-

sistently support the present proposal, though its foremost sponsor is the President of the United States.

If that ocean mail plan was a "subsidy," then this new plan is even more so. That earlier measure was in form an amendment of existing and well-tried legislation, involving no departure whatever from established national policy. It provided a moderate increase of compensation for the carrying of the United States mails on routes to South America, Australasia, and the Orient, where the existing rate had not sufficed to establish and maintain a service. The ships receiving this postal payment were required to be built by American labor in the United States on designs approved by the Navy Department with reference to their prompt and economical conversion into auxiliary cruisers, transports, or supply ships in time of war. All their officers and an increasing proportion of their crews were to be American citizens, who could be relied on to serve their country's flag in such an emergency. The ships were to be operated by practical shipping merchants under rigid contracts to be awarded to the lowest responsible bidder after due public advertisement. All were to be steamers of more than the usual commercial speed.

That was a carefully guarded, conservative measure, protecting the public interest. The bill now proposed is, by comparison, indefensibly loose and dangerous. It does not stipulate any speed. It does not require that the ships shall be constructed on designs approved by the Navy Department and thus be sure to be of value to the national defense in war. It does not require that the ships shall even be of American construction, so that skilled American labor may derive some advantage from the legislation. As a matter of fact, under the policy of the free-registry law, the ships would certainly be built or bought abroad, and under that law all their officers and crews might be, and presumably would be, foreigners, owning allegiance to belligerent and other foreign Governments. But though foreigners, these men—judging by experience thus far under the free-registry law—would demand the full American wage rate or refuse to sail; so that these ships, though there was not one American citizen on board, would cost as much to maintain or operate as a real, thorough-going American vessel, and, of course, would be under the same handicap against a cheap wage or subsidized vessel of foreign registry.

Therefore, if this bill should become a law, the Government of the United States would be called on to provide just as much money to cover the loss in operation as if the vessel were in receipt of subsidy under private ownership. In fact, there can not be the slightest question that the loss would be greater and the requisite subsidy or compensation greater—much greater—under Government than under private ownership, for all history proves that no Government can run a sharply competitive business as economically as a trained business man or corporation familiar with the business and entirely dependent on it for livelihood or dividends.

An experienced steamship manager of New York, Mr. Daniel Bacon, has lately published—in the Journal of Commerce of November 7, 1914—an analysis of the operation of the one steamship service owned and managed by the United States Government—the Panama Railroad Line from New York to Colon, already mentioned. This Government service, as has been said, was acquired as a part of the assets of the old French Canal Co., and it has been under the control of the War Department. It has been in competition, between New York and Colon, in part with foreign steamers, carrying freight and passengers to and from Central and South America, and in part with American coastwise steamers, carrying freight between Atlantic and Pacific ports of the United States, transshipped across the Isthmus of Tehuantepec or sent through the Straits of Magellan, before the opening of the Panama Canal.

This Government steamship line did not insure its ships, which would have been an annual charge of 4 per cent. It did not make any allowance for depreciation, which would have been 5 per cent. It did not have to pay any interest on capital, which would have been 5 or 6 per cent additional. This Government line was given the carrying of as much as possible of the machinery, supplies, and materials for the canal, and the carrying also of officials and employees of the Canal Commission.

In other words, the Government line was favored in every possible way, and yet Mr. Bacon, in his analysis of its workings, shows that its entire profits from the year 1905 to and including the 11 months of 1914 were $735,723, a fraction over 20 per cent in a period of nearly 10 years on the book value of the fleet—$3,574,713—or a profit of a little over 2 per cent a year. If the Government line had had to bear the charges of 4 per cent for insurance, 5 per cent for depreciation, and 5 or 6 per cent for interest, which would have to be borne by a commercial line, of course there would have been in these 10 years no profit even of 2 per cent, but a great and crushing deficit, which would inevitably have meant bankruptcy and dissolution.

It has been asserted that this accidental Government line to the Isthmus of Panama served to regulate competition and reduce freight rates on cement particularly. But Mr. Bacon, a practical ship manager, citing the figures reported by the Government line itself, declares that the cost of transporting cement was greater instead of less after the Government line steamers undertook it. Mr. Bacon quotes further the testimony of the manager of the Government line, given in the Federal court, that—

> A steamship line has to earn from 12 to 20 per cent to make it equivalent to 6 per cent earned by a railroad.

Not one of the great maritime nations of the world, solicitous for the promotion of the ocean-carrying trade, has chosen the method of Government ownership.

On a former occasion I called attention to the complete failure in Europe of the operation by the Government of the telephone lines, and also in certain parts of our own country of public utilities by municipal ownership. Now, I propose to give an illustration of the failure of a steamship line which was fostered by the Government of Australia.

Mr. OVERMAN. Mr. President, will the Senator yield to me for a moment?

Mr. GALLINGER. With pleasure.

Mr. OVERMAN. My attention has been called to the fact that while I was out of the Chamber the Senator used certain words in his speech, as follows:

> One of the leading generals of Washington's army, a man who distinguished himself on all the battle fields of the Revolution, a man whose name has gone down in history as one of the greatest heroes this country ever produced, is to have a monument erected to his memory at Guilford Court House, N. C., and the President of the United States will not attend the dedication because he is afraid it will be an unneutral act. Unneutral to whom? To England, of course. What other country could find fault?
>
> If that is a proper attitude for the President of the United States to take, we will have the flags on the White House and on this Capitol hauled down on the 4th day of July. They ought to be hauled down.
>
> I shall await with a great deal of interest a denial of this dispatch from Raleigh. It is very specific. The dispatch says that the President's decision, together with the reason he gave, caused surprise and disappointment in North Carolina. I should think it would.

I suppose the Senator did make those remarks; and I want to say, Mr. President, that I do not know how that dispatch happened to come from Raleigh, N. C. I was present, however, when the delegation visited the White House and extended an invitation to the President to attend the exercises in connection with the dedication of the monument to Gen. Nathanael Greene at Guilford Court House and know what was said and the manner in which it was said. What was said in regard to being unneutral was said purely as a joke, in this way: When the invitation was extended the President asked if we would guarantee that the war would be over at that time. He said, "I might go down there and say something unneutral," and he laughed, and we all laughed. It was said in a perfectly joking way. There was nothing serious about it.

I know the Senator would not want to criticize the President unjustly, and yet I think what he said was merited by the dispatch that came from Raleigh. I do not criticize the Senator, but I want to set the matter right, because I was present.

Mr. GALLINGER. I am very happy, indeed, to have the statement of the Senator from North Carolina made. I simply took it from this newspaper dispatch, and inasmuch as one of the gentlemen or perhaps two of the gentlemen who are said to have visited the President are residents of North Carolina—President Graham, of the University of North Carolina, and Prof. George Howe—I assumed that they carried the news back to Raleigh.

Mr. OVERMAN. I do not see how they could have possibly gotten back to Raleigh in time to have given out that dispatch, because it occurred, as I remember, yesterday. How those things are carried I do not know. They may have gotten back to Raleigh, but I do not see how they could.

Mr. GALLINGER. Mr. President, I certainly had no intention——

Mr. OVERMAN. Oh, I do not blame the Senator, because the article in the paper probably justified such criticism; but I want to set the matter straight in the RECORD, and I know the Senator does not want to do an injustice to the President.

Mr. GALLINGER. I have several times said in the discussion of this question—in fact, I said it to-day—that I took newspaper articles *cum grano salis*, that I did not think they ought to be relied upon without confirmation; and yet this dispatch was so specific that I assumed that it was correct. I am very glad to have the Senator state in my time that it was a joke

rather than a serious observation on the part of the President, and I am glad that the disclaimer will go in the RECORD.

I will return to the paragraph I was reading and read it again.

Not one of the great maritime nations of the world, solicitous for the promotion of the ocean carrying freight trade, has chosen the method of Government ownership. Germany and France own railroads, but not commercial ships. They have not found such a radical departure wise or necessary. Only in western Australia has the experiment been attempted, and there the results have proved disastrous. This is a record of that Government-owned steamship line, as described a few months ago in the Liverpool Journal of Commerce:

The Government of western Australia, rudely awakened to a realization of its limitations, is evidently summoning grace and courage to abandon the rôle of shipowner. It dabbled pretty heavily in the State-owned steamer experiment, and that the outcome was disastrous is made clear beyond hope of disproof by the auditor general's financial statement. In 1912–13, according to the official figures, the steamers were run at a loss of $114,065, and it has been admitted that during 1913–14 the receipts were $387,805 and the expenditures $484,085—a deficiency for the 12 months of $96,280.

Mr. MARTINE of New Jersey. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from New Jersey?

Mr. GALLINGER. I yield for a question.

Mr. MARTINE of New Jersey. I would like simply to ask the Senator whether the rates were lower? Has he any knowledge on that point?

Mr. GALLINGER. Not the least in the world. I know that the taxpayers of Australia had to put up $96,280 to make up the deficit of that steamship line.

Mr. MARTINE of New Jersey. True; but in a thousand ways blessings might have accrued that would have been more than equivalent to that.

Mr. GALLINGER. Yes, Mr. President, they might; but they probably did not. The article continues:

Clearly the unfortunate experience of 1912–13 has had no salutary effect in 1913–14, in spite of the fact that the Government of Western Australia, for the sake of its own credit, must have put forth a very strenuous effort considerably to reduce its losses, even if it could not make a profit. As some sort of reply to unceasing hostile criticism, the Government, it is presumable, made attempts at reorganization and retrenchment, but the now too patent futility of this course of action points to the conclusion that the State-owned steamship plan was excessively ambitious and ill considered in conception and woefully managed in operation.

Even if the Government merits the charitable supposition that it tried to put things on a better basis, the force of the moral is not one whit lessened, and the moral is that Western Australia, at any rate, can not hope to run steamships. In two years the undertaking has involved a loss of at least $210,000, which is nearly half the value of the vessels, and a Perth contemporary puts it on record that the premier airily admitted that the good ship *Western Australia*, "the pride of the anfinancial fleet," was continuing to cost more than she was bringing in, a process which will doubtless last until a new government comes along or someone buys her—the vessel is for sale—at a considerable sacrifice for cash.

Mr. President, I said yesterday, or at some time during this debate, that we probably will have a bargain-counter sale of the steamships that we propose to buy or build under this bill, if we ever buy or build any. I have no doubt they will be run at a loss, and they will be for sale to the highest bidder; and the taxpayers of the country will make up the deficit, as they are making up this $100,000,000 war tax that was levied upon them under the pretext that the war made it necessary, when the fact was that it was our tariff laws that made it necessary. In addition, the $80,000,000 deficit that has already accumulated, and which will probably be three times that amount before the fiscal year ends, will have to be paid by the taxpayers. The taxpayers will foot the bills, and the Government will have the glory of running a steamship line.

The Australian experiment has been even less encouraging and successful than the experience of the Panama Railroad steamship line in the United States. That Panama line has probably done as well as could be expected under the conditions of Government ownership. Col. Goethals is the president of the steamship company, and there is every reason to believe that his associates have been upright and industrious men. Yet the fact remains that the company, though favored to an extraordinary degree by the Government that controlled it, has not been profitable in its 10 years of operation and would have had to be abandoned if it had been an independent commercial enterprise. A part of the trade which this Government line served was the coastwise trade between the Atlantic and Pacific seaboards of the United States, where it had no subsidized or cheap-wage foreign competition. Is there any reason to believe that a Government line would be any more successful if extended to foreign ports on the west coast of South America, where it would have to meet the ships of an old-established British steamship line, the Pacific steam navigation service of the Royal Mail, which has been subsidized since 1840, and also the ships of Chile and Peru, both State-aided but not State-owned undertakings?

If we are going to have steam lines of our own to South America, why not adopt a policy that has been tested and approved by all the great maritime nations of the world, instead of a policy that in the two instances where it has been tried has been an acknowledged failure?

Lines of swift mail, passenger, and freight ships from the United States to Brazil, Argentina, Chile, and Peru, comparable with the ships that have long been going out to those countries from Europe, could not be established and maintained without a considerable deficit. Even the ablest practical steamship managers will not undertake it. This is sufficiently demonstrated (first) by the fact that the United States of America, with abundant capital, great shipyards, a vast coastwise and West India fleet, and the most enterprising merchants and manufacturers in the world, has gone for 50 years without such a service to South American ports, and (second) by the fact that those European nations, our competitors in trade, that have enjoyed such a South American service have created it by mail or other subsidies or their equivalent.

Why should not we do the same? There are Senators who have said that they objected to subsidy on principle; that they were opposed to it as a form of protectionism. But can a mail subvention, paid under rigid contract to the lowest responsible bidder, for a service in ships of far more than the usual commercial speed—ships designed and built and held ready, with American officers and crews, for the naval reserve—can such a subvention be rightfully regarded as a subsidy in any obnoxious sense of that term? If it is protectionism, and so to be resisted, why have $400,000,000 in mail subventions been paid by the outright free-trade Government of Great Britain to steamship services to all quarters of the globe? Are there Senators who will confess that in matters of protection and free trade they are more strict constructionists than members of the British ministry or the British Parliament?

This has not always been so with the responsible leaders of the Democratic Party in the United States. When Great Britain in 1840 and afterwards began to create her great mail-subsidized steam lines and to extend them to the West Indies, the East Indies, and South America, it was southern Democratic Senators—Thomas Butler King, of Georgia, and Thomas J. Rusk, of Texas—who were the pioneers in all this country in urging the adoption of a similar policy by the American Government. It was a Democratic President, James Knox Polk, who in a message to Congress declared that "the enlightened policy by which a rapid communication with the various distant parts of the world is established, by means of American-built steamers, would find an ample reward in the increase of our commerce and in making our country and its resources more favorably known abroad"; but another advantage of great importance was "the privilege of taking the ships already equipped for immediate service at a moment's notice, which will be cheaply purchased by the compensation to be paid for the transportation of the mail, over and above the postage received. A just national pride, no less than our commercial interests, would seem to favor the policy of augmenting the number of this description of vessels," said President Polk.

A Democratic Congress granted the compensation, and lines of "American-built steamers" were established to Europe, to the West Indies, and to South America, at the Isthmus of Panama. Our deep-sea steam fleet grew more rapidly than Britain's. As Dr. David A. Wells says of this period in his study of our merchant marine:

During the single year 1849–50 we increased our ocean steam tonnage 113 per cent, and the seagoing qualities and performances of our vessels were so admirable that the Cunard Co., which had then been in operation 10 years, was obliged to bring out new ships to compete with them. The prospect, therefore, at one time was that the United States, although late in the start in this new department of foreign shipping, would soon equal, if not overtake, her great commercial competitor.

Later on, in the unfortunate struggle in Congress over slavery that preceded the Civil War, the policy which Polk had advocated and established was overturned, just as the historic policy of strengthening the Navy was abandoned. But in these years of peace and reunion there is no longer any sectional or partisan quarrel over the Navy, and there should be none over the merchant marine. A policy championed by a Democratic President, established by a Democratic Congress, of mail and naval reserve subventions adequate to create swift lines of American steamships, that was orthodoxy in 1847 ought not to be heterodoxy in 1914, and it ought to be preferred a hundred times to a wild scheme of Government ownership that in all the past has been utterly repugnant to all Democratic principles.

It has been pleaded by those who are advocating this new and strange doctrine that Government steamship lines to South America can not put the Federal power into competition with private American shipowners, because there are no American ships in those distant waters. That was true a few years ago, so far as concerns Brazil, Argentina, Chile, and Peru. It is true to-day in the sense that no swift, regular line of passenger, mail, and freight carrying steamers runs southward of Venezuela on the Atlantic and Panama on the Pacific. But a year or two ago an American freight service, in good though not fast cargo-carrying ships, was established to Rio de Janeiro and Santos—the United States and Brazil line. Later, after the outbreak of the European war and because of that war, freight steamers of American registry were put on the routes, not only to Argentina and Uruguay but to Chile and Peru, by several New York shipping houses. These vessels do not meet the need of a swift postal and passenger service, such as is possessed by the great nations of Europe, but they may be the nucleus of such a service, and they would assuredly be very seriously embarrassed and injured by Government lines operated without regard to expense and without hope of profit by the Government of the United States.

Which is the better way, the fairer way, the more thoroughly effective and American way—to put the Government into this steamship business, and thus make it a Government monopoly by driving all American citizens out of it, or to offer a reasonable compensation, after the example of other nations and the earlier policy of this Nation, for the building of steamships suitable for the naval reserve and the transportation of the United States mails in such steamships to the chief ports of the Southern Hemisphere, to Japan, China, Australasia, and the Philippines? This would recognize the enterprise and enlist the cooperation of the practical merchants who have already ventured into these difficult trades. It would be no dangerous new departure, but an application of sound, approved principles of statesmanship, in harmony with American traditions, without risk to the honor or the solvency of the United States.

This proposed bill authorizes an expenditure of $30,000,000 for the purchase or construction of steamers and of $10,000,000 for working capital—$40,000,000 in all—for an experiment of a kind that has had and can have no ultimate result but disappointment and disaster. The other plan would leave to experienced merchants the providing of all the capital and the building of the ships, and the cost to the United States would be simply an annual compensation for carrying the mails and for the obligation to maintain ships, officers, and men available for the Naval Reserve—a genuine national benefit that, as President Polk well said, would be "cheaply purchased" by the amount of the subvention. This compensation must be paid in any event to a Government steamship service, whose stock individual capitalists are to be permitted to hold to the extent of 49 per cent. Indeed, considering the waste and extravagance that seem inseparable from Government management of business undertakings, it is certain that, aside from the capital of $10,000,000 and the $30,000,000 for ships, the annual cost to the National Treasury of the inevitable deficits would be several times as large as any mail compensation that would have to be paid to experienced and capable steamship men whose life work had been the development of ocean commerce.

This is one of the most complex and absorbing vocations in the world and one of the most difficult and costly for the amateur experiments of a political government. Is the Federal income so redundant, the Federal Treasury so overflowing, that there are $40,000,000 to spend at once and millions more every year, while already overburdened members of the Cabinet, who may change every four years or oftener, are laboriously trying to master the ocean steamship business?

An amendment to the bill gives the President authority to charter, lease, or transfer vessels purchased or constructed, and such naval auxiliaries as are not needed, to shipping corporations for use in the foreign trade. Such ships would still be of Government ownership, but they would be operated by private persons or companies. This provision represents an effort to modify the radical character of the original proposal, but there is every reason to believe that the plan proposed—of leasing or chartering Government-owned ships—will prove impracticable unless, indeed, the ships are taken at a nominal price.

In the first place, no steamship company will charter a Government ship in order to run it on any route in competition with the Government. That would be manifestly hopeless from the outset. In the second place, a company chartering a Government-owned ship will have to operate that ship in a way that will return a reasonable dividend. But it is perfectly well known, from the experience of many years, that an American ship subject to American laws must pay higher wages to its officers and crew and offer a more liberal maintenance than foreign ships, to say nothing of the subsidies or subventions paid by the foreign Governments.

These factors in the situation are not altered by the terms of this Government-ownership proposal. Let us assume that the Government purchases a foreign ship, brings her under the American flag, and offers her for lease or charter to private steamship companies for employment in the foreign trade. That ship will have cost the Government as much as a similar ship would cost a foreign steamship company. But the American naturalized ship will cost an American company a great deal more to operate, and it will receive no subsidy or subvention, which may be, and in many cases is, afforded to the ship of foreign registry.

Therefore a private American company seeking to charter a Government-owned ship must overcome in some way the handicaps of cheap foreign wages and cost of maintenance and liberal foreign subsidies. These double handicaps are so severe that no American steamship company will seek a Government-owned ship on lease or charter unless it can get such a ship for a nominal price. In that case the Government will in effect be paying a subsidy or subvention for the two purposes for which such a subsidy or subvention has always been sought—first, to offset lower foreign wages and cost of maintenance, and, second, to offset foreign subsidies.

If a subsidy or subvention is to be given by our Government, why not pay it outright and be frank about it? Why should the Congress of the United States resort to any such subterfuge as is embodied in this Government-ownership proposal?

The President signally acknowledges the truth of the contention of those of us in Congress who have sought subventions for the encouragement of the American merchant marine when he brings forward this Government-ownership measure. He acknowledges that free ships alone will not suffice; that the favorite expedient of the Democratic Party has been tried and has not proved successful.

But though the President confesses the logic of the situation he will not travel our road; he insists on blazing out another path, untried, difficult, dangerous, and expensive. A well-considered policy of mail subventions would cost the Treasury something, but it will not begin to cost the Treasury so much as a scheme of subsidy or subvention by Government ownership, for the Government of the United States can never manage the steamship business with the enterprise, the efficiency, and the economy of men who have been brought up from youth in the shipowner's calling, and are dependent upon that calling for their livelihood.

Mr. President, in a recent issue of the Washington Star the following practical questions were propounded. I presume some Senators have read them, and I hope all Senators have read them, because they are pertinent to this discussion, and I shall try to answer them in all fairness.

The Star inquires:

(1) When was the United States at the maximum of its sea carrying power?

(2) What caused the decline to the present status, when the American is a stranger to merchant ships except of coastwise tonnage?

(3) What is the difference between that older time of pride for the country and the present time of helplessness and depression as respects sea routes, sea inducements, and sea advantages?

(4) What advantages are there to a country in a large and well-appointed merchant marine in addition to those bearing upon trade?

(5) Which are the greatest of the sea carrying powers, what the extent of their business, and by what means did they establish themselves, and do now maintain themselves, on the water?

(6) And if we are to build ourselves up into their class and maintain ourselves in their company—compete with them for sea traffic—what means should we, will we be obliged to, employ?

The Star continues:

We want and should have a merchant marine. It is a reflection on the country that it pays $300,000,000 a year in freight rates on goods carried in foreign bottoms, when every dollar of the huge sum might be saved and other dollars earned by making ourselves independent on the water. The Stars and Stripes flying over merchandise should be seen in every foreign port where business is a feature of life and other great nations are doing business. This should be achieved as a commercial advantage, aside from the value a merchant fleet is to a nation in time of a war in which that nation is involved.

In the preliminary skirmishes in the Senate Mr. GALLINGER, Mr. LODGE, and Mr. ROOT have shown a lively interest in this subject. All three understand it, and are among the Senate's ablest Members. If, therefore, when they come to speak at length, they give us the information the Star suggests and extended comment on it, they will instruct the public and advance their contentions. The war has made some action on our part imperative; and, of course, the action taken should be without partisan or sectional bias or influence. What is in mind relates to the benefit of all.

Mr. President, these are honest questions, dealing directly with the propositions contained in the bill now under consideration, as well as the broader question relating to the rehabilitation of the American merchant marine.

I will undertake to answer them, going back to the time before the Civil War and tracing the decline of the American merchant marine from that time to the present, treating the matter as briefly as possible.

A reply to these questions will necessitate some repetition of what has been already said, but the importance of the subject warrants it.

The United States was at the maximum of its sea carrying power in the year 1855, six years before the outbreak of the Civil War. In that year our country possessed 2,348,358 tons of shipping registered for over-seas commerce, and carried in its own ships nearly 76 per cent of its combined imports and exports.

In 1855 a huge fleet of 381 ships and barks, adapted especially for foreign commerce, was launched from American shipyards, and the total output of our yards that year was 583,450 tons, the largest in our national history up to that time.

It is true that in earlier years, notably in 1825 and 1826, 92 per cent of our imports and exports were carried in American vessels. But our total commerce was much smaller then. It had grown with the growth of the Republic, and American ships in 1855 were carrying not only 76 per cent of our own trade but a considerable share of the trade of less vigorous maritime nations.

In the year 1855 a series of fortuitous circumstances, beginning with the Irish famine of 1847 and an unusual European demand for our foodstuffs, then the discovery of gold in 1848 in California and the development of a great new carrying trade around Cape Horn, and later the Crimean War of 1854, had given a vast impetus to our shipbuilding and navigation. Another powerful influence was the ocean mail subsidies, first granted in 1845 on the recommendation of a southern Democratic President, Polk, and under the leadership of southern Democratic Senators and Representatives. These ocean mail subsidies, following the British example, rapidly created one line of American-built ocean steamships after another to Europe, to the West Indies, and to the Isthmus of Panama.

In 1847, before our new ocean mail lines were started, at the urging of a Democratic President, by a vote of a Democratic Congress, the United States possessed only 5,631 tons of steamships registered for over-seas carrying. In 1849 our ocean steam shipping had grown to 20,870 tons, and from that point for some years its increase was great and constant, to 95,036 tons in 1854 and to 115,045 tons in 1855. Great Britain had been the pioneer in shipping subsidies, but the United States had made far more effective use of them, and in 1855 was practically equal with her great competitor. American ocean steamships then, like the famous American clipper ships, were the fastest, the most efficient, and the most profitable in the world. A captain of the British Navy, appointed to observe the British Cunard and American Collins liners on the North Atlantic, declared, as a result of his investigation, that "there are no ocean steamers in England comparable with those of the American line."

These great, powerful ocean steamships were all of them built and owned in the Northern States. They sailed out of northern seaports and were manned by northern officers and crews. They were faster than the regular warships of that period. They were a formidable reserve of a fighting Navy. Unfortunately the slavery quarrel had begun to estrange the Southern from the Northern States. The South in Congress looked with concern on the increase of the maritime strength of New England, New York, and Pennsylvania. The Middle West and Southwest demanded more and more Federal money for internal improvements. These sections, uniting, influenced Congress in 1856 to reduce the mail subsidies to our ocean lines, which were then fighting strongly and successfully the competition of the State-aided steam lines of Great Britain.

In other words, the Congress of the United States, under the short-sighted urging of the South and West, took protection away from American steam shipping in the very height of its struggle with British shipping. The result that followed was precisely like the result of the radical tariff reductions of 1894 and 1913. American industry was dismayed and crippled and foreign industry was encouraged and strengthened. The American Government was paying to the Collins Line of steamers a mail subsidy of $858,000 a year. The British Government was paying to the Cunard Line of British steamers $856,871 for a slower service in smaller and weaker steamships. The Collins subsidy amounted to $4.82 a ton of the American steam fleet; the Cunard subsidy to $5.75 a ton. In 1856, when Congress cut down the Collins subsidy by $473,000, it left a sum of $385,000, while the British Cunard Line was receiving, and continued to receive, $856,871.

That is, the British steamship service was adequately protected by its Government; the competing American steamship service was not. Great Britain stood by her shipowners; we deserted ours in that very crisis of the combat; and though the American steamship managers were far more enterprising, far more progressive, and on even terms far more successful, with the better ships and the better educated officers and sailors, our flag was driven from the steam routes of the world by the treasury of the British Government.

A great New York merchant and shipowner of that time—A. A. Low, father of Hon. Seth Low—gave this impressive testimony to a special committee of Congress:

> My own belief is that the policy of England, in subsidizing lines of steamers to the various ports of the world, has given her a prestige which is almost insuperable. * * * My own impression is that large subsidies should be given as an inducement, and that these subsidies, while they would cost the Government something in the beginning, would cost the Government nothing in the end.
>
> I only know the English have always, in peace and war, manifested a determination to hold the supremacy on the ocean, and the supremacy which they acquired by arms in war they have in peace acquired by subsidies. They have deliberately and intentionally driven the Americans from the ocean by paying subsidies which they knew our Congress would not pay. I believe it has been the deliberate purpose on the part of England to maintain her supremacy upon the ocean by paying larger subsidies than any other nation as long as subsidies were necessary to preserve their control.
>
> I believe that when the Collins Line was running the subsidy to the Cunard Line was renewed for the express purpose to enable it to run off the Collins Line. It was renewed several years before the expiration of the subsidy granted, so that the Cunard Line might enter upon contracts for new ships; and a committee of the English Parliament, similar to this committee, was employed to make the most minute investigation into the matter. It was after the most careful inquiry by that committee that the contract with the Cunard was renewed for the express purpose of enabling that line to run the American steamers from the ocean; and they have driven us from the ocean by that policy just as effectually as they ever did drive an enemy from the ocean by their guns.

That was an era when the sail ship in which we had excelled was going out, and when the steamship, in which we were equally excelling, was coming in. The British Government and people were exerting every effort to develop steam shipyards and engine works, and for this purpose large subsidies, ostensibly for the carrying of the mails, but actually for the encouragement of shipbuilding and navigation, were being paid year after year. The result of the sectional overthrow of our ocean mail system was written unmistakably in the records of American shipbuilding in the years from 1855 to 1860.

In 1855, as has been said, 583,450 tons of shipping, sail and steam, were launched. But in 1859 the output of our yards had fallen off to 156,602 tons, and it stood at only 214,791 tons in 1860—as has well been said, the swiftest and most alarming shrinkage in our maritime history.

Those were years of complete Democratic ascendancy in the National Government of the United States. They were years of a low tariff for revenue only. This unprecedented decline in American shipbuilding and navigation occurred before the enactment of the first Morrill tariff law, before the election of President Lincoln. The United States as a maritime power was on the decline before the Civil War. That war and the depredations of the Anglo-Confederate cruisers simply accelerated the tendency that had already begun. When the Civil War broke out, our trans-Atlantic steamship services, deprived of their subsidies while their British competitors retained theirs, wholly disappeared. There was in 1861 not one line of American steamships running regularly throughout the year between our ports and the ports of Europe. In 1855 American ships had carried, as has been said, 76 per cent of our imports and exports. In 1860 they were carrying only 66 per cent, though there was a slight nominal increase in American registered tonnage. Ships were still being built in 1860, but they were chiefly for the coastwise trade of the Atlantic and the Gulf of Mexico, and for the great new trade from the Atlantic coast to California around the Horn or by connection cross the Isthmus of Panama—a trade which Congress had insisted on reserving as coastwise commerce, in which none but American vessels could participate. Many of these vessels in the coast-to-coast trade sailed for convenience as registered ships of the United States, or our tonnage nominally registered for foreign commerce would have been a great deal less than it actually was in 1860.

As already suggested, the decline of our merchant marine in over-seas trade is often attributed to the mere mechanical change from sail to steam, from wood to iron. There is no truth in this assumption. A respectable iron manufacturing industry had been developed in the United States, though it suffered severely under the low tariff for revenue only of 1846–1861. Our builders appreciated the use of iron and had begun to build iron steamships with screw propellers long before 1860. Some of these ships were the best of their type in the world. American

iron was found to be especially adaptable to the hulls of ocean ships; our naval architects pronounced it better than English iron. American mechanical genius devised efficient marine engines and boilers. Lindsay, the historian of the British mercantile marine, attributes the superiority of American ocean steamships in speed to their "effective boilers and ability in their preparation." The spirit of our people was alert and progressive—the same spirit and the same people that had created the packet lines and clipper fleet of the years before.

But the withdrawal of national encouragement by the repeal of the ocean mail subsidies had dealt a mortal blow to American maritime achievement. Our Government, in the years from 1856 to 1861, deserted its shipbuilders, shipowners, and seamen; abandoned American competition in steamship building and iron-ship building; and gave up the ocean to the British, and later to the German, French, and Japanese, who all made persistent and successful use of subsidies to develop their shipyards and maintain their shipping lines. The purpose of British subsidies, as of other subsidies, was frankly protectionist. As the British parliamentary committee on ocean mail contracts, in 1853, declared:

> The objects which have led to the formation of these contracts, and to the large expenditures involved, were to afford us rapid, frequent, and punctual communication with distant ports, which feed the main arteries of British commerce, and with the most important of our foreign possessions, to foster maritime enterprise, and to encourage the production of a superior class of vessels, which would promote the commerce and wealth of the nation in time of peace, and assist in defending its shores against hostile aggression.

From the American standpoint, the British policy is most admirably stated in the celebrated reply of Mr. Blaine to Mr. Gladstone. Mr. Blaine said:

> It will not escape Mr. Gladstone's keen observation that British interests in navigation flourish with less rivalry and have increased in greater proportion than any other of the great interests of the United Kingdom. I ask his candid admission that it is the one interest which England has protected steadily and determinedly, regardless of consistency and regardless of expense. Nor will Mr. Gladstone fail to note that navigation is the weakest of the great interests in the United States, because it is the one which the National Government has consistently refused to protect.

These British subsidies, which amount to not much less than $400,000,000 in the last 60 years, have been given nominally only to 30 or more British lines of mail steamers to all quarters of the globe. As a matter of fact, these subsidies have stimulated the whole body of British shipbuilding and navigation. As the report of the British Tariff Commission for 1909, in volume 4, "The Engineering Industries," says:

> The evidence shows the great stimulus given to the British engineering and shipbuilding industry generally by the system of admiralty contracts. In effect these constitute a rigid system of protection, since builders for the admiralty are expressly excluded from buying any materials except from British firms on the admiralty list. * * * Moreover, engineering and shipbuilding derive other considerable advantages from Government subsidies and Government mail transport and other contracts given to various shipping lines. During the past 10 years the Government money which has passed into the hands of the British steamship services in respect of these and similar services has amounted to nearly £2,000,000—or, in round numbers, $10,000,000—per annum.

Here is an official British acknowledgment confirming Mr. Blaine's famous declaration that on the ocean in maritime industry Great Britain has been the protectionist nation, while the United States, outside of its protected, great, and prosperous coastwise trade, has been a free trader—has practically denied protection to ocean shipbuilding and over-seas enterprise.

The effect of the Civil War upon American ocean shipping was severe, but has been exaggerated. The Anglo-Confederate cruisers from 1861 to 1865 destroyed 110,000 tons of American shipping and drove a much larger amount of shipping under foreign flags. But when the war ended other industries grew. Manufacturing and agriculture flourished, and the American merchant marine for a time advanced. In 1865 it carried only 28 per cent of our exports and imports, but in 1866 it carried 32 per cent; in 1867, 34 per cent; and in 1868, 35 per cent. In the year 1866 no less than 336,146 tons of shipping were built in American yards, and in 1867, 303,521 tons. Our foreign commerce steadily grew, and American shipping would have grown with it and beyond it if it had not been left unprotected, either by subsidy or in any other way—the one great unprotected industry in the United States and the one most sharply exposed to the keen and subsidized competition of foreign Governments.

It is a melancholy story, but there is no mystery about it. After the war, as before the war, the commercial and maritime States of the North strove for a fair recognition of their great industry. They asked Congress to establish a subsidy system after the example of Great Britain—after our own successful subsidy system of 1845–1856. But the South and a part of the Middle West and Southwest resisted this effort after the Civil War, as they had opposed it before. Great sums were spent for the development of transportation facilities, chiefly in the Middle West, for the deepening of the rivers and harbors of all sections of the country. But nothing was done to protect and encourage the American merchant marine in over-seas trade. Every Republican President urged that this should be done, but the South and a part of the inland States interposed a hostile majority.

From 1865 to the present year, 1915, the only important measure for the encouragement of American shipping in the foreign trade was the passage in 1891 of an ocean mail law providing modest compensation for American lines of steamships. Even this tardy and inadequate measure of justice was secured with serious difficulty. The proposed rates of compensation for the carrying of the mails in ships of various speeds, which had been originally set at a rate no more than was deemed necessary for the purpose, were cut down because of opposition in the House of Representatives before the bill became a law. That had all the effect of reducing a proposed protective tariff duty to an inadequate revenue basis. The rate originally proposed for the steamers of 20 knots speed and upward on routes to Europe was $6 a mile outward. This was cut by the House to $4 a mile, utterly crippling the measure in this respect. The rate proposed for second-class steamships of 16 knots and upward, suitable for the routes to South America and the Orient, was cut in the House from $3 to $2 a mile. That is the reason why we have no national lines of mail steamships to the principal countries of South America and no national lines under contract with the Government to Japan, China, and the Philippines. The same short-sighted sectional prejudice that crippled our ocean mail lines and destroyed our maritime supremacy in 1855–1861 was effective in 1891 in almost ruining the one important measure for the relief of the American merchant marine which the American Congress has passed in the past 50 years.

Now, after all these years the Middle West, with its corn and wheat and provisions, and the South, with its raw cotton, are the principal sufferers, sustaining the heaviest losses, because the great war in Europe finds us without an adequate American merchant marine—without the means of delivering our own goods under our own flag to foreign purchasers. This is indeed the irony of fate—a fitting example of long-delayed but inexorable justice.

It has sometimes been said that the progressive loss of our ocean shipping from 1855 onward and after the Civil War was due to the great development of the agricultural Middle West. But this is a fanciful, wholly erroneous assumption. The shipbuilders, shipowners, seamen, and fishermen of New England, New York, and Pennsylvania did not leave their trade for western farms. If they turned westward at all it was to reestablish themselves by the sea again on the shores of the Pacific.

There was money enough and there were men enough to maintain and increase our ocean fleet if conditions had been made propitious instead of adverse.

As a matter of fact, the shipbuilders, shipowners, and seamen made a strong, heroic fight after the Civil War in which they had done a manly part to save the Union. No sooner had peace returned than they tried to start new steamship lines to Europe, to South America, to China. American enterprise failed on most of these great ocean routes because on these routes it found itself confronted by the subsidies of European Governments, while sail ships and "tramp" steamships of American construction found employed against them the tremendous discriminating power of the British Lloyd's. The British Government and people were determined to rule the seas. That was the purpose of their subsidies; that was the motive of Lloyd's warfare, as described by Capt. William W. Bates, once former United States Commissioner of Navigation, in his work, "The American Marine." Capt. Bates has pointed out that in the years from 1882 to 1886 American ships, some of them wood, some of them iron, made their passage in the California grain trade around Cape Horn to Europe in time averaging five days less than that of British vessels, and, moreover, that the American ships met with fewer accidents and landed their cargoes in better order. But because Great Britain controlled the marine insurance of the world it was enabled to make discriminating rates against these American vessels in spite of their safer and superior performance. The result was that, while between 1881 and 1885 an average fleet of 100 American ships had sailed from San Francisco in the grain trade to Europe, in 1889 only 30 American ships remained, as compared with 167 British.

These American ships, because of the merciless power of the British Lloyd's, were forced to receive 15 per cent lower freight rates than European ships, although the American vessels made their passage to Europe in an average of 113 days, as compared with the 131 of their British competitors. As has already

been said, the American ships were the more skillfully and safely navigated, met with fewer accidents, and incurred less damage to their cargoes. In the year 1880 the British Government was paying nearly $4,000,000 annually in subsidies to its steamship lines. The United States was paying less than $200,000 for carrying its ocean mails, and four-fifths of this sum went into the pockets of foreign shipowners.

In 1855 American ships, as has been said, were carrying 76 per cent of our imports and exports; in 1860, 66 per cent; in 1880, 18 per cent. This proportion in 1914 was 9 per cent.

It is now being urged by the advocates of the proposed bill for Government ownership and operation of steamships in the foreign trade that this radical expedient must be resorted to because American capital and enterprise have failed to provide ships for the carrying of our commerce. American capital and enterprise have not failed; they have not for 50 years been given anything like a fair and equal opportunity. Our Government has protected and encouraged manufacturing; it has protected and encouraged agriculture. The Federal power and the Federal funds have been liberally invoked for every industry and every interest within our borders, but all this aid has stopped at the water's edge. Beyond the small sum paid for mail subventions under the act of 1891—a sum of not much more than $1,000,000 annually—the American merchant marine in over-seas trade has been left unaided to fight the cheap wages of foreign lands and the subsidies of foreign Governments. Need any man wonder why the Stars and Stripes have been almost driven from the seas?

The responsibility for the wrecking of the American merchant marine and for the fact that we lack ships to-day to convey our wheat and corn and cotton to Europe rests wholly and absolutely with the American Congress, and directly with those Senators and Representatives who have fought and blocked the constant effort of the maritime States to protect and encourage American ocean shipping as all our other great industries have been protected and encouraged, and thereby to maintain an ocean fleet adequate to carry our trade in peace and to help our fighting Navy to defend our coasts in war.

A merchant marine in over-seas trade, as all the world knows, is an instrumentality of self-protection as well as an agency of commerce. A nation which lacks ships must lack shipyards also, and shipyards in which battleships, cruisers, destroyers, and submarines may be constructed are as essential to the national security as arsenals, gun works, and fortifications. No Government in the world maintains its fighting navy all the time on a war footing. The cost would be impossible. Every Government maintains a certain part of its ships in full commission, with a full complement of officers and men, and others in reserve with a partial complement.

This means that in time of war, to make the full fleet efficient, more officers and men, thousands more than those borne on the regular naval lists, must be forthcoming. But where are they to come from in a nation which has few or no ocean steamships, and therefore few or no ocean officers and sailors of its own, because it has allowed its trade to be conveyed by the ships and men of foreign Governments?

Great Britain, Germany, France, Russia, Austria, Japan—the powers engaged in this great European conflict—all understand the value of a merchant shipping as a means of national defense. Great Britain, Germany, and France particularly have fostered their mercantile marine as solicitously as their regular navy. Each of these nations has hundreds of naval reserve steamships and thousands of naval reserve officers and sailors. Many of these officers and men, because of our own lack of an over-seas marine, have been engaged in carrying American trade. That is, we ourselves, the American people, have been in part maintaining the cost and paying the expense of the naval reserves of Great Britain, France, and Germany, our ocean carriers. British, French, and German ships and the ships of other foreign nations have been receiving every year from $200,000,000 to $300,000,000 for the carrying of our over-seas mails, freight, and passengers. We have been maintaining a naval reserve for these foreign Governments, while, except for our coastwise shipping, we have had almost no naval reserve of our own. Now that the war has come, these foreign carriers—ships, officers, and men—are recalled to their first allegiance, to their own flag and their own country. Many of them have left our waters and our trade altogether, and are no longer available for delivering our goods.

Said the Republican national platform in 1900:

> Our present dependence upon foreign shipping for nine-tenths of our foreign carrying is a great loss to the industry of this country. It is also a serious danger to our trade, for its sudden withdrawal in the event of European war would seriously cripple our expanding foreign commerce. The national defense and naval efficiency of this country, moreover, supply a compelling reason for legislation which will enable us to recover our former place among the trade-carrying fleets of the world.

The war that was foretold has come, and the results are what were then predicted. Of all the great sea carrying powers the United Kingdom is the first. The methods by which it has attained its strength are outlined in what has been said already about the vast, persistent expenditure for steamship subsidies on all the great routes of the world, stimulating shipbuilding and navigation and indirectly encouraging the increase of the slower "tramp" steamers. These subsidies and the vast power of the British insurance agency of Lloyd's, with its historic discrimination in favor of British ships and British yards, explain the predominance to-day of the British flag in over-seas carrying. In natural ability British shipbuilders and seamen are not the superiors of American shipbuilders and seamen. British merchants and manufacturers are no more enterprising than our own. Wherever and whenever conditions have been equal, as in the years before the Civil War, when the United States as well as Great Britain subsidized its ocean mail lines across the Atlantic and elsewhere, it was American ships that ruled the ocean. It is historically true, as the New York Herald said in the height of the struggle for sea mastery before the Civil War, that—

> It must be a matter of sincere satisfaction to every American to know that in both sailing vessels and steam vessels we have surpassed the whole world.

A few years earlier De Tocqueville, struck by the vigor and enterprise of American sea commerce, had said:

> I can not keep from believing that the Americans will one day become the first maritime power on the globe. They are pushed on to master the seas as the Romans were to acquire the world.

Just as after a long period of neglect within a relatively few years we have developed a modern Navy which until lately was the second in size and power in the world and the first, we have a right to believe, in the efficiency of its ships, its officers, and its crews, so we can again develop, if we will, the best and greatest merchant shipping in existence. What Americans can accomplish when they are not harassed by foreign subsidies or the competition of cheap foreign "tramps" with Lascar and Chinese crews is demonstrated in the growth of the protected branch of our mercantile marine, the coastwise shipping of this country, which has advanced steadily, in spite of the formidable competition of our railroad systems, from 2,752,000 tons in 1860 to 6,718,974 in 1914.

The total domestic tonnage of Great Britain employed entirely in the coastwise or home trade, including ports on the Continent of Europe between the Rivers Elbe and Brest, or partly in the home and partly in the foreign trade, is 1,298,972. But in the matter of shipping employed in foreign commerce the advantage is overwhelmingly in favor of the United Kingdom against the United States. Lloyd's credits the United Kingdom in 1914 with a tonnage of 19,256,766, nearly all of it employed in over-seas carrying. Our tonnage registered for foreign commerce in the same year was only 1,076,152 tons, of which probably not more than 500,000 tons was actually employed all the year in foreign voyages.

The German Empire in 1914 had 5,459,296 tons of shipping, most of it employed in foreign voyages. France had a total merchant marine of 2,319,438 tons; Norway, 1,824,762 tons; Japan, 1,708,386 tons; and Italy, 1,549,887 tons.

These six nations are the world's greatest carriers. In every one of these nations the merchant marine for over-seas trade, instead of being almost totally neglected, as in the United States, has been a prime object of national solicitude. The lavish and persistent subsidies by which in large degree British shipbuilding and navigation have been developed have already been referred to. Germany also has made use of subsidies wherever necessary, notably to create her Imperial mail lines to the East Indies and Australia, to the Levant, and on the east coast of Africa. But Germany, through the powerful influence of the Imperial Government, has strengthened the credit of her two great steamship companies and encouraged their progress in many ways not publicly recorded, and has given a most important impetus to her merchant shipping and her over-seas trade by allowing rebates that left only a nominal freight charge on goods produced in Germany and shipped to German ports over the Government railways. The cash value of this encouragement to German shipping and commerce has been estimated from $8,000,000 to $10,000,000 a year.

France long trusted to a free-ship policy and that alone, only to see her shipping dwindle from 1,072,000 in 1870 to 914,000 in 1881. Then, thoroughly discouraged with this expedient, the French Government adopted a liberal bounty and subsidy system under which French mercantile tonnage has more than

doubled, outstripping even the vigorous merchant marine of Norway.

The Norwegian Government, long content to see its shipping built in foreign yards, now grants bounties to encourage native shipbuilding, and out of a slender treasury subsidizes steamship services to New York, to the Gulf of Mexico, and to South America.

Japan as late as 1894 had only 200,000 tons of shipping and almost no shipyards. After the war with China the Japanese Government, realizing its maritime weakness, entered upon a system of bounties to encourage shipbuilding and subsidies to develop steamship lines, so that Japan now ranks among the great maritime nations with a considerably larger tonnage engaged in foreign commerce than that of the United States.

Italy had only 860,000 tons of shipping all told in 1894, but Italy, like other successful maritime Governments, has given generous national aid to her merchant marine, so that her over-seas fleet has steadily grown to a total not far below that of Japan.

All of these foreign Governments permit the registry of foreign-built vessels for foreign trade, as now does the United States. But it is a most significant fact that not one of these successful maritime Governments stops short with a free-ship policy. Every one grants subsidies besides, or encourages its merchant fleet with some equivalent assistance. Even the Dominion of Canada, which has a small fleet of its own, has been expending upward of $2,000,000 for several years in subsidies and bounties to British shipping, about twice the expenditure of the United States under the ocean mail law of 1891.

To sum up the situation, every maritime Government in the world, even though, as in the case of Great Britain, it is nominally a free-trade Government, applies a protective policy to the merchant shipping that serves its trade in peace and helps to protect its coasts in war. The United States, the greatest protectionist Nation of the world, strangely stands alone in this respect. It has protected its land industries—its manufacturing and its agriculture—and has seen them grow with a growth unexampled elsewhere. But the United States has left its ocean shipping, save for the inadequate law of 1891, unprotected and neglected. In these few words can be summed up the main cause why American ships carried 76 per cent of our imports and exports in 1855 and 9 per cent or less in 1914.

If the American people of to-day are to have an ocean fleet commensurate with the magnitude of their Nation and its interests, there is only one way in which they can secure that fleet—they must protect and encourage it as other nations have and as the United States has protected and encouraged all other industries. In the early years of the Republic protection was given to our ocean shipping by preferential customs duties and tonnage taxes. Our merchant marine was the strongest and most prosperous industry which we possessed from 1789 to 1855, and during a large part of that period it was the most highly and faithfully protected. The preferential duties were not given up by commercial agreements against our principal competitor, Great Britain, until the year 1850.

In the present tariff law there is a half-hearted effort to reestablish "the policy of the fathers" toward our mercantile marine. A reduction of 5 per cent of the customs duties is provided on goods imported in American ships. But, as Senators know, this provision has never gone into effect. It was suspended and referred to the Federal courts for decision whether, in view of our treaties with foreign Governments, this encouragement could be given to American ships.

In a speech at Chicago the other day the honorable Secretary of the Treasury declared, doubtless by authority, that a preferential duty system was now "unworkable." This may be interpreted as forecasting the probable decision of the courts, or what the executive department of the Government expects will be the decision.

By the emergency shipping law of August 18, 1914, a very liberal free ship policy was established in the foreign trade of the United States. Previous legislation in the Panama Canal act of August 24, 1912, granting free registry to foreign-built vessels owned by American citizens, had failed to bring so much as one ship beneath the flag. In this emergency legislation additional encouragement was given to the naturalization of foreign-built shipping by a proviso that such vessels, if owned by American citizens and granted American registry for the foreign trade, could be navigated without American officers and without compliance with our inspection and measurement laws. Under this authority and with the war and the value of our neutral flag as a powerful motive somewhat more than 100 foreign-built vessels, of a total tonnage of about 400,000 tons, have received American registry and hoisted the Stars and Stripes.

Nearly all of these ships were owned by American citizens before the war opened, notably by the United Fruit Co., the Standard Oil Co., and the United States Steel Corporation. The result of the free ship legislation of 1914, therefore, means simply a change of flag and not a net addition to the shipping resources of America, for these ships were employed in our commerce before the war began.

The very highest Democratic authorities—the President and the Secretary of the Treasury—regard the fruits of their free ship experiment as wholly disappointing. The Democratic panacea, urged for so many years as the sure remedy for our lack of an ocean shipping, has failed to effect the restoration expected. This fact is given by the President and the Secretary of the Treasury as justifying the heroic expedient of Government ownership.

But Government ownership, if it ever should be adopted, would fail, just as preferential duties have proved futile and free ships inadequate. The American merchant marine in over-seas trade will grow only and when it is a protected industry, as it was under Washington and Adams and Jefferson and Madison and Monroe and Jackson. American mechanics in our shipyards will not work for the same wage rate as mechanics in the yards of Europe and Japan. Nor will American seamen work for the same wages on the decks of the ships and in their boiler and engine rooms.

Moreover, American maritime enterprise unaided, as 70 years of history prove, can not withstand the potent weapon of foreign subsidies and subventions. American shipowners, officers, and seamen of this generation, like their fathers before them, are the most enterprising and efficient men of their calling in the world, but they can not be expected, and they ought not to be expected, to fight the treasuries of foreign Governments. As Senator Bayard, of Delaware, 60 years ago declared in this body, debating the mail subvention to the American Line to Europe:

> I am willing to trust American skill and industry in competition with any people on the globe when they stand nation to nation without government interference. But if the treasury of a foreign nation is poured into the lap of individuals for the purpose of destroying the interests of my country, or for building up a commercial marine at the expense of the commerce and prosperity of the United States, I, for one, will count no cost in countervailing such governmental action on the part of Great Britain or any foreign power.

In this same body during that same discussion another great Democrat, Senator Lewis Cass, of Michigan, declared:

> Well, sir, it is a question of protection—of high and important and holy protection—in the best sense of the term; the protection of our country, of our expatriated seamen, of our commerce, of our interests, of our honor, of our soil, of all that gives dignity and character to nations; protection against defeat, disgrace, and dishonor.

That was when the upholding of the American merchant marine had not yet become a party or a sectional issue in this Republic. If it had not become a party or sectional issue in the unhappy congressional quarrel over slavery that preceded the Civil War, we should be now, as we were then, the foremost maritime power on this planet—first in the progressive spirit of our shipowners and sailors, first in efficiency and success of the great trade of ocean carrying.

If we are to regain our old historic strength and glory on the ocean, we must put party behind us and section behind us and join in the spirit of these great Senators of an earlier time for "the protection of our country, of our expatriated seamen, of our commerce, of our interests, of our honor, of our soil, of all that gives dignity and character to nations." We must protect our merchant marine by subventions if need be, by some better method if it can be found. We must countervail the action of foreign Governments which have driven our flag from the seas, and, then, falling to war with each other, have withdrawn many of their ships and left us to our own devices.

This now proposed plan of Government purchase, ownership, and operation of merchant vessels is not opposed on this side of the Chamber because it is a Democratic plan, for it is not Democratic—there is no precedent whatever for it in Democratic history—it is opposed because it is contrary to all precedent, unsound, impracticable, ineffective—because it would fail to solve the problem though involving an enormous expenditure, and because, after the war is ended, we should be left exactly where we were before.

This side of the Chamber would be willing to have a fair test made of the preferential-duty policy, a fair test of the policy of free ships, as established by Democratic legislation. In doing this we are ready to forget all partisanship for the possible welfare of the Nation. But the proposition of Government ownership, unitedly opposed by the sagacious business men of the country, without an example in the history of other nations, is

a step into the dark which no prudent man, no patriotic man, can take.

Why not frankly abandon this expedient, so untried, so dangerous, and go with us back to the policy of 1845, of 1847, to the policy of a Democratic President, a Democratic Congress, and granting reasonable mail subventions on the long routes where no swift and regular service exists, where no ships but freighters, chiefly foreign, slow and cumbersome, run; establish a fleet of American steamers of the naval reserve to the far great countries of South America and increase the number of American ships plying across the Atlantic to Europe and across the Pacific to Australasia and the Orient? Every consideration urged by President Polk and his comrades in favor of such a national policy is as true to-day as when it was proclaimed; and, more than that, we are now in the midst of a great world-wide war, in which all of the great nations that are our principal carriers are participants.

As President Polk said in an annual message to Congress:

> The enlightened policy by which a rapid communication with the various distant parts of the world is established by means of American-built steamers would find an ample reward in the increase of our commerce and in making our country and its resources more favorably known abroad.

President Polk spoke further of the value of "having the privilege of taking the ships already equipped for immediate service at a moment's notice," an advantage which, he urged, "will be cheaply purchased by the compensation to be paid for the transportation of the mail over and above the postage received. A just national pride no less than our commercial interests would seem to favor the policy of augmenting the number of this description of vessels."

A message of this kind coming from the White House to this Congress, sounding the same note of far-seeing patriotism, would win an instant response. Party feeling and sectional feeling would dissolve before it, and once more the Congress of the United States could vote as it voted nearly 70 years ago for legislation that at the minimum cost would give our country a great, efficient, powerful merchant marine.

Mr. President, after reviewing the entire subject, I am fully persuaded that the most effective legislation is embodied in a brief bill introduced by me, and which is now before the Committee on Commerce, as follows:

Be it enacted, etc., That the Postmaster General is hereby authorized to pay for ocean mail service, under the act of March 3, 1891, in vessels of the second class on routes to South America south of the Equator, to the Philippines, to Japan, to China, and to Australasia at a rate not exceeding $4 per mile on the outward voyage by the shortest practicable routes, and in vessels of the third class on said routes at a rate not exceeding $2 per mile on the outward voyage by the shortest practicable routes: *Provided,* That, subject to the foregoing provisions, every contract hereunder shall be awarded to that responsible bidder who will contract, under penalties prescribed by the Postmaster General, for the highest running speed between the points named in the contract.

Mr. President, that is an amendment to the ocean mail act of March 3, 1891. As I fear Senators generally are not as familiar as they might be with that act, I ask permission, without reading, to insert it in my remarks.

The PRESIDING OFFICER (Mr. SWANSON in the chair). Without objection, the request will be granted.

The matter referred to is as follows:

An act to provide for ocean mail service between the United States and foreign ports and to promote commerce.

Be it enacted, etc., That the Postmaster General is hereby authorized and empowered to enter into contracts for a term not less than 5 nor more than 10 years in duration, with American citizens, for the carrying of mails on American steamships, between ports of the United States and such ports in foreign countries, the Dominion of Canada excepted, as in his judgment will best subserve and promote the postal and commercial interests of the United States, the mail service on such lines to be equitably distributed among the Atlantic, Mexican Gulf, and Pacific ports. Said contracts shall be made with the lowest responsible bidder for the performance of said service on each route, and the Postmaster General shall have the right to reject all bids not in his opinion reasonable for the attaining of the purposes named.

SEC. 2. That before making any contract for carrying ocean mails in accordance with this act the Postmaster General shall give public notice by advertising once a week, for three months, in such daily papers as he shall select in each of the cities of Boston, New York, Philadelphia, Baltimore, New Orleans, St. Louis, Charleston, Norfolk, Savannah, Galveston, and Mobile, and when the proposed service is to be on the Pacific Ocean, then in San Francisco, Tacoma, and Portland. Such notice shall describe the route, the time when such contract will be made, the duration of same, the size of the steamers to be used, the number of trips a year, the times of sailing, and the time when the service shall commence, which shall not be more than three years after the contract shall be let. The details of the mode of advertising and letting such contracts shall be conducted in the manner prescribed in chapter 8 of title 46 of the Revised Statutes for the letting of inland mail contracts, so far as the same shall be applicable to the ocean mail service.

SEC. 3. That the vessels employed in the mail service under the provisions of this act shall be American-built steamships, owned and officered by American citizens, in conformity with the existing laws, or so owned and officered and registered according to law, and upon each departure from the United States the following proportion of the crew shall be citizens of the United States, to wit: During the first two years of such contract for carrying the mails, one-fourth thereof; during the next three succeeding years, one-third thereof; and during the remaining time of the continuance of such contract at least one-half thereof; and shall be constructed after the latest and most approved types, with all the modern improvements and appliances for ocean steamers. They shall be divided into four classes. The first class shall be iron or steel screw steamships, capable of maintaining a speed of 20 knots an hour at sea in ordinary weather, and of a gross registered tonnage of not less than 8,000 tons. No vessel except of said first class shall be accepted for said mail service under the provisions of this act between the United States and Great Britain. The second class shall be iron or steel steamships, capable of maintaining a speed of 16 knots an hour at sea in ordinary weather, and of a gross registered tonnage of not less than 5,000 tons. The third class shall be iron or steel steamships, capable of maintaining a speed of 14 knots an hour at sea in ordinary weather, and of a gross registered tonnage of not less than 2,500 tons. The fourth class shall be iron or steel or wooden steamships, capable of maintaining a speed of 12 knots an hour at sea in ordinary weather, and of a gross registered tonnage of not less than 1,500 tons. It shall be stipulated in the contract or contracts to be entered into for the said mail service that the said vessels may carry passengers with their baggage in addition to said mails and may do all ordinary business done by steamships.

SEC. 4. That all steamships of the first, second, and third classes employed as above and hereafter built shall be constructed with particular reference to prompt and economical conversion into auxiliary naval cruisers, and according to plans and specifications to be agreed upon by and between the owners and the Secretary of the Navy, and they shall be of sufficient strength and stability to carry and sustain the working and operation of at least four effective rifled cannon of a caliber of not less than 6 inches, and shall be of the highest rating known to maritime commerce. And all vessels of said three classes heretofore built and so employed shall, before they are accepted for the mail service herein provided for, be thoroughly inspected by a competent naval officer or constructor detailed for that service by the Secretary of the Navy; and such officer shall report, in writing to the Secretary of the Navy, who shall transmit said report to the Postmaster General; and no such vessel not approved by the Secretary of the Navy as suitable for the service required shall be employed by the Postmaster General as provided for in this act.

SEC. 5. That the rate of compensation to be paid for such ocean mail service of the said first-class ships shall not exceed the sum of $4 a mile, and for the second-class ships $2 a mile, by the shortest practicable route, for each outward voyage; for the third-class ships shall not exceed $1 a mile and for the fourth-class ships two-thirds of a dollar a mile for the actual number of miles required by the Post Office Department to be traveled on each outward-bound voyage: *Provided,* That in the case of failure from any cause to perform the regular voyages stipulated for in said contracts or any of them, a pro rata deduction should be made from compensation on account of such omitted voyage or voyages; and that suitable fines and penalties may be imposed for delays or irregularities in the due performance of service according to the contract, to be determined by the Postmaster General: *Provided further,* That no steamship so employed and so paid for carrying the United States mails shall receive any other bounty or subsidy from the Treasury of the United States.

SEC. 6. That upon each of said vessels the United States shall be entitled to have transported, free of charge, a mail messenger, whose duty it shall be to receive, sort, take in charge and deliver the mails to and from the United States, and who shall be provided with suitable room for the accommodation of himself and mails.

SEC. 7. That officers of the United States Navy may volunteer for service on said mail vessels, and when accepted by the contractor or contractors may be assigned to such duty by the Secretary of the Navy whenever in his opinion such assignment can be made without detriment to the service, and while in said employment they shall receive furlough pay from the Government, and such other compensation from contractor or contractors as may be agreed upon by the parties: *Provided,* That they shall only be required to perform such duties as appertain to the merchant service.

SEC. 8. That said vessels shall take, as cadets or apprentices, one American-born boy under 21 years for each 1,000 tons gross register, and one for each majority fraction thereof, who shall be educated in the duties of seamanship, rank as petty officers, and receive such pay for their services as may be reasonable.

SEC. 9. That such steamers may be taken and used by the United States as transports or cruisers, upon payment to the owners of the fair actual value of the same at the time of the taking, and if there shall be a disagreement as to the fair actual value of the same at the time of the taking, between the United States and the owners, then the same shall be determined by two impartial appraisers, one to be appointed by each of said parties, they at the same time selecting a third, who shall act in said appraisement in case the two shall fail to agree.

Approved, March 3, 1891.

Mr. GALLINGER. The bill I have offered simply proposes to enlarge the payment for mail service beyond that now allowed in the ocean mail act of March 3, 1891. I have already stated that when the original bill passed the Senate the rates of compensation were the same as those contained in the bill which I have just read, but, unfortunately, when the bill went to the other House a large reduction was made, which resulted in preventing the legislation fully accomplishing what was intended. The bill follows the line that all other maritime nations have adopted. Great Britain has been paying about $10,000,000 a year in subventions and subsidies of various kinds, largely for the carrying of the mail. This bill would probably not cost the Government much in excess of $2,000,000 per year for 10 years, and those most familiar with the subject believe that the service would then become self-sustaining. It is a simple, feasible, business proposition containing nothing new beyond the fact that it enlarges an existing statute. It is free from all the dangers of Government ownership, free from the possibility of trouble with foreign nations, and, as a matter of fact, would

prove to be infinitely less expensive to the people of the United States than the legislation now under consideration.

Mr. President, it seems to me that there is but one sane and sensible thing for this body to do under existing conditions. There are 16 appropriation bills, all told, which ought to receive consideration before the 4th day of March. They are the supply bills, which provide for the needs of the Government in all its branches. One small bill, the urgent deficiency bill, has been agreed to, but all the rest are now either in one branch of the Congress or the other under consideration, at least two of them being ready for report. In addition to these bills it is urged that the rural credit bill and the conservation measures ought to have consideration during this session. It is a most extraordinary thing for bills such as the one under consideration to be pressed upon Congress during a short session, and I hope sincerely that those who are in the majority will see the futility of pressing the bill much further, and in that way endanger the passage of the appropriation bills and other needed legislation which could be passed without unusual delay. The country is taking note of what is going on, and the country will not sympathize with an effort such as is now being made to pass a bill that does not receive the support of a majority of the American people to the certain defeat of the great supply bills of the Government, which bills ought to take precedence over other less important subjects of legislation.

Mr. President, it is undeniable that many Senators on the other side of this Chamber do not look favorably upon the bill under consideration. The original bill has been changed three times, and possibly it is to undergo still further modification before it is ready to be acted on. I have reason to believe that not one-half of the Democratic Senators at heart believe in the measure. That most of them will vote for it is probably correct, but they will vote for it with serious misgivings and profound mental reservation. I will not stop to suggest the reason why they will give their assent to a measure that they regard as of doubtful advantage to the best interests of the country.

They know, as well as we, that if foreign ships are purchased from any one of the belligerent nations, and it is conceded that there are comparatively few ships to be bought elsewhere, that serious international complications will probably result. Already things are happening that ought to awaken the keenest possible interest along that line. If that program is carried out we are taking the first step toward a possible involvement of our country in the war that is now devastating Europe. Why should we take any risk of that kind?

I assume that the interview with the junior Senator from Georgia [Mr. HARDWICK] published in the Washington Post of the 22d expresses the honest views of that militant Democrat, and it ought to be a warning not only to his own party but to the country of the dangers that confront us. Senator HARDWICK is quoted as saying:

> The objections to the pending ship-purchase bill continue to multiply and grow in strength day by day. In the first place, where and how will we get the ships if the bill should pass? By purchase? If so, from whom? Certainly not to any considerable amount or at anything like a reasonable figure from Great Britain, whose merchant marine must serve her own great commerce, and is besides now subject to demands made upon it for aid to the military and naval operations as well as an increased demand from the world's carrying trade growing out of the elimination of German competition.
>
> From Germany? If this be the purpose, or one of the purposes, of the bill, it seems certain that it will involve us in serious complications with Great Britain. It is not probable that the Government of that country will permit us to purchase and transfer to our registry the interned ships of Germany that could probably be bought at a most reasonable figure, and then operate them on the high seas.
>
> It seems certain that Great Britain will insist that if the transfer of the ship under the registry of one of her enemies is made to a neutral registry after the declaration of war, that Great Britain is neither bound to recognize nor respect such transfer and does not propose to do so.
>
> Besides, the transfer of these German vessels to a corporation, of which the United States is the principal, if not the sole, stockholder, will greatly add to the gravity of the situation by making this Government a direct party with an immediate interest of its own in the controversy, and will seriously endanger our continued peace.
>
> Therefore this step ought not to be taken lightly, and not at all unless we are prepared for any eventuality. If we can not safely buy these German vessels, then what ships are we to purchase under this bill, and from whom? From other neutral nations or their citizens? We can certainly hope to secure no considerable supply from that source.
>
> Nor can we hope to purchase these ships either from our own citizens or from the citizens of other countries, if it be true, as asserted and urged by the proponents of this measure, that the rates have risen so enormously and the profits of these ships increased so largely since this war began. If that be true, what inducement would be held out to private capital invested in this business to sell its ships just when they are reaping the richest harvest?
>
> Where, then, are we to get the necessary ships? Obviously by construction. And yet this measure is urged as a temporary one—a war measure, as it were, to be promptly abandoned when the war is over and the present emergency past—certainly as soon as it becomes a "profitable" enterprise again, and therefore becomes attractive to capital.
>
> The Congress of the United States in the recent tariff bill adopted a plan that in the past has proved most efficacious and practicable in building up and maintaining an American merchant marine, namely, a discriminating duty in favor of goods carried in American bottoms. The discriminatory rate may not be large enough to accomplish the purpose sought. If not, let us raise it. Certain treaties with foreign powers forbid its enforcement, the Attorney General held. If so, let us give the necessary notice to the powers in question to modify these treaties in this respect, and then proceed to enforce the law we have enacted and so restore our merchant marine.
>
> Long have we Democrats insisted that business and government should be divorced; that the Government should keep out of business and business should keep out of the Government. Were our protestations insincere? Were our principles unsound? I believe not.

Such a warning should not go unheeded, and it would be to the credit of other members of the majority party who hold substantially the same views if they should give unmistakable declarations of their real attitude on the question now under consideration.

Mr. President, I have honestly endeavored to point out the dangers of Government ownership and the perils that will visit us if this bill shall become a law. The country is not indifferent to what is going on here, and those who are pressing this legislation will not escape the responsibilities attaching to it. It is bad legislation, fraught with grave dangers to the peace of our country, and from an economic point of view it is calculated to do immense harm to the industrial interests of our people. I am not without hope that the measure will be defeated, and if that desirable result is attained the rejoicing will not be entirely on the part of those of us who are resisting the passage of the bill. Democrats will rejoice with Republicans, and the country will not fail to give credit to those who are so valiantly fighting to defeat the measure.

For the present, Mr. President, I am done; but later in the discussion I shall take occasion to present other views in opposition to what I regard as unnecessary and exceedingly dangerous legislation.

The PRESIDING OFFICER (Mr. SWANSON in the chair). The pending question is on the amendment offered by the Senator from Massachusetts [Mr. LODGE].

Mr. BRANDEGEE (at 6 o'clock p. m.). Mr. President, I move that the Senate do now adjourn.

Mr. KERN. On that motion I ask for the yeas and nays.

The yeas and nays were ordered and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). Announcing my pair with the Senator from New Mexico [Mr. FALL], which I transfer to the Senator from South Carolina [Mr. SMITH], I vote "nay."

Mr. JAMES (when his name was called). I transfer the general pair I have with the junior Senator from Massachusetts [Mr. WEEKS] to the senior Senator from Nevada [Mr. NEWLANDS] and vote "nay."

Mr. SAULSBURY (when his name was called). I transfer my pair with the junior Senator from Rhode Island [Mr. COLT] to the senior Senator from Virginia [Mr. MARTIN] and vote "nay."

Mr. SMITH of Georgia (when his name was called). I transfer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Georgia [Mr. HARDWICK] and vote. I vote "nay."

Mr. SMITH of Maryland (when his name was called). I transfer my pair with the senior Senator from Vermont [Mr. DILLINGHAM] to the Senator from Illinois [Mr. LEWIS] and vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the junior Senator from Kentucky [Mr. CAMDEN] and vote "nay."

The roll call was concluded.

Mr. MYERS. Has the Senator from Connecticut [Mr. MCLEAN] voted?

The PRESIDING OFFICER. He has not.

Mr. MYERS. I transfer my pair with that Senator to the Senator from Arizona [Mr. ASHURST] and vote "nay."

Mr. HOLLIS. I have a general pair with the junior Senator from Maine [Mr. BURLEIGH], but under the terms of the pair I may vote if my vote is needed to make a quorum. I withhold my vote for the present.

Mr. JAMES. I wish to announce the unavoidable absence of the Senator from New Jersey [Mr. HUGHES], and will state that he is paired with the junior Senator from Illinois [Mr. SHERMAN].

Mr. JOHNSON. I have a pair with the junior Senator from North Dakota [Mr. GRONNA]. Has he voted?

The PRESIDING OFFICER. He has not voted.

Mr. JOHNSON. I withhold my vote.

Mr. STONE (after having voted in the negative). I am informed that the Senator from Wyoming [Mr. CLARK] did not

vote. Having a general pair with that Senator, I withdraw my vote.

Mr. OVERMAN (after having voted in the negative). I observe that my pair, the Senator from California [Mr. PERKINS], is absent. I therefore transfer my pair to the Senator from Tennessee [Mr. SHIELDS] and let my vote stand.

Mr. CRAWFORD. I will transfer my general pair with the senior Senator from Tennessee [Mr. LEA] to my colleague [Mr. STERLING] and vote. I vote "yea."

Mr. HOLLIS. Understanding that a quorum has not voted, I vote "nay."

Mr. JOHNSON. I have a right to vote to make a quorum, and I vote "nay."

Mr. STONE. I transfer the pair which I before announced to the Senator from Indiana [Mr. SHIVELY] and allow my vote in the negative to stand.

The result was announced—yeas 16, nays 38, as follows:

YEAS—16.

Brandegee	Gallinger	Norris	Smoot
Clapp	Kenyon	Oliver	Townsend
Crawford	Lippitt	Page	Warren
Cummins	McCumber	Root	Works

NAYS—38.

Bryan	Lane	Reed	Swanson
Chamberlain	Lee, Md.	Robinson	Thomas
Chilton	Martine, N. J.	Saulsbury	Thompson
Fletcher	Myers	Shafroth	Thornton
Hitchcock	O'Gorman	Sheppard	Vardaman
Hollis	Overman	Simmons	Walsh
James	Owen	Smith, Ariz.	White
Johnson	Pittman	Smith, Ga.	Williams
Kern	Pomerene	Smith, Md.	
La Follette	Ransdell	Stone	

NOT VOTING—42.

Ashurst	Colt	Lea, Tenn.	Shields
Bankhead	Culberson	Lewis	Shively
Borah	Dillingham	Lodge	Smith, Mich.
Brady	du Pont	McLean	Smith, S. C.
Bristow	Fall	Martin, Va.	Stephenson
Burleigh	Goff	Nelson	Sterling
Burton	Gore	Newlands	Sutherland
Camden	Gronna	Penrose	Tillman
Catron	Hardwick	Perkins	Weeks
Clark, Wyo.	Hughes	Poindexter	
Clarke, Ark.	Jones	Sherman	

So the Senate refused to adjourn.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Massachusetts [Mr. LODGE].

Mr. TOWNSEND. Mr. President, inasmuch as there has been so little interest manifested in the matter before the Senate, and it is getting somewhat late, I propose to call the attention of the Senate to another matter and ask for the consideration of another bill. I feel so confident that this bill has the approval of a majority of the Senate, and that its proper discussion would command the attention of the Senate, that I propose to ask for its consideration at this time. In order that there may be no misunderstanding, because it seems to me in my efforts to call this matter up in the past and secure its consideration it must have been because it is not yet properly understood, I desire to read to the Senate the bill.

Mr. STONE. I should like to ask the Senator if he is discussing the unfinished business. I understood him to announce that he did not rise for that purpose.

Mr. TOWNSEND. I am not discussing the unfinished business now; I am making a motion.

Mr. STONE. Then let the motion be made. Nothing else is in order except the unfinished business.

The PRESIDING OFFICER. The Senator from Michigan has a right to make his motion to take up for consideration such measure as he sees proper, and when his motion has been made after 2 o'clock such motions are debatable.

Mr. STONE. But it has not been made. What is it?

The PRESIDING OFFICER. The point is well taken. The motion should be made before it can be debated if the Senator is going to discuss the question which is proposed to displace the unfinished business.

Mr. TOWNSEND. I realize the rule of the Senate. I desire to state what the bill is, in order that the Senate may understand what bill it is that I am asking to take up.

Mr. STONE. I make a point of order. I insist that debate is not in order on another bill until the Senate takes it up.

The PRESIDING OFFICER. The point of order of the Senator from Missouri is well taken. After the motion has been submitted to the Senate to take up for consideration a bill indicated by the Senator from Michigan he will then be in order to discuss the bill.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Until the motion is made it is not in order.

Mr. TOWNSEND. I move to take up for present consideration Senate bill 392——

Mr. STONE. What bill is that?

Mr. TOWNSEND. Being Calendar No. 209.

Mr. STONE. What is it about?

Mr. TOWNSEND. It is the bill which I sought to inform the Senator about before I made the motion. It is known as the Volunteer officers' retirement bill.

Mr. STONE. I move to lay on the table that motion.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. The Chair will first state the proposition. The Senator from Michigan moves to take up Senate bill 392; which motion is now before the Senate. The Secretary will read the bill, for the information of the Senate.

The Secretary read as follows:

A bill (S. 392) to create in the War Department and Navy Department, respectively, a roll designated as "the Civil War Volunteer officers' retired list," to authorize placing thereon with retired pay certain surviving officers who served in the Army, Navy, or Marine Corps of the United States in the Civil War, and for other purposes.

Mr. STONE. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator from Missouri will state his point of order.

Mr. STONE. The Senator from Michigan made a motion to take up a bill by the number of the bill and the number on the calendar, and I move to lay that motion on the table.

The PRESIDING OFFICER. The Senator from Missouri will be recognized as soon as the bill is read for the information of the Senate. The Chair will then recognize the Senator from Missouri.

Mr. STONE. No one has asked for the reading of the bill. Under what rule is it to be read?

Mr. GALLINGER. I ask for the reading of the bill.

Mr. TOWNSEND. I ask that it be read.

Mr. STONE. I make the point of order that the reading of the bill is in the nature of debate, and I move to lay on the table the motion to take it up.

The PRESIDING OFFICER. It has been the custom of the Senate to read a bill if desired for the information of the Senate. As soon as the reading is concluded the Senator from Missouri will be recognized.

Mr. BRYAN. Mr. President, a parliamentary inquiry. Has not the bill been read?

The PRESIDING OFFICER. The bill has been read twice and referred to the Committee on Military Affairs. It is not now in order, no motion being made for its third reading. Consequently, if there is objection to it, the reading of the bill is not in order. It has been read twice.

Mr. STONE. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. TOWNSEND. I rise to a point of order.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. TOWNSEND. Mr. President, I have not yielded the floor. I make the point of order that I have the floor; and I rose to move the consideration of a bill. The Chair made a statement. I first addressed the Chair and was recognized, and I claim I have the floor by having taken it and presented this motion.

The PRESIDING OFFICER. The Chair rules that when a motion is stated by the Chair to the Senate, then it is the province of the Chair to recognize a Senator. If the Senate desires to hear the Senator, it can refuse to vote to lay the motion on the table. The Senator from Missouri was recognized.

Mr. SMOOT. I rise to a point of order.

Mr. GALLINGER. I take an appeal from the decision of the Chair.

Mr. JAMES. I move to lay the appeal on the table.

Mr. SMOOT. Mr. President——

Mr. GALLINGER. I call for the yeas and nays on the appeal.

Mr. SMOOT. I should like to call the attention of the Chair, before the ruling is announced——

Mr. REED. I make the point that the question is not debatable. This is plainly a filibuster, and the Chair ought not to tolerate it.

The PRESIDING OFFICER. The point is well taken—that questions of order to be decided by the Chair are not debatable.

Mr. SMOOT. I have not denied that fact. I have simply tried to ask the Chair——

Mr. ROBINSON and others. Regular order!

Mr. SMOOT. If he would permit——

Mr. STONE. I rise to a point of order.

Mr. SMOOT. Senators will not gain anything by calling for the regular order.

Mr. STONE. I rise to a point of order. The Senator from Kentucky moved to lay the appeal on the table. That is not debatable, even by consent of the Chair.

The PRESIDING OFFICER. The Chair will state that the point of order is not debatable, as the motion of the Senator from Missouri is to lay the matter on the table. A point of order on an appeal is not debatable if the original motion is not debatable.

Mr. SMOOT. Mr. President, I have not asked anyone but the Chair, and if the Chair refuses to hear me, then I have no other recourse.

The PRESIDING OFFICER. The Chair has no authority to permit debate on questions of order to be determined by the Chair, if the regular order is called for because the Chair is obliged to carry out the rules of the Senate, which say that these matters must not be debated.

Mr. SMOOT. I have seen that done by the Chair here not once, but a hundred times.

Mr. ROBINSON. Regular order!

The PRESIDING OFFICER. The Chair will state that when he has not made up his mind as to a question and desires to receive debate to enlighten him, he will permit debate; but where it is proper and just, as in this case, the Chair will exercise his right and recognize the Senator from Missouri. The Senator from Missouri has been recognized, and has moved to lay on the table the motion of the Senator from Michigan [Mr. TOWNSEND].

Mr. SMOOT. Upon that, Mr. President, I rise to a point of order.

Mr. JAMES. Mr. President——

Mr. SMOOT. I say that under the rules that motion is out of order, and I want the Chair to listen to the precedents and also to the rules of the Senate.

Mr. JAMES. Mr. President, I rise to a point of order. I make the point of order that the Senator from New Hampshire [Mr. GALLINGER] appealed from the decision of the Chair, and I moved to lay the appeal on the table, which is nondebatable, even with the consent of the Chair.

Mr. GALLINGER. The Senator moved to lay the appeal on the table when sitting in his seat. He did not have recognition.

Mr. JAMES. I rose to my feet.

Mr. GALLINGER. The Senator did not.

Mr. JAMES. I rose to my feet.

The PRESIDING OFFICER. The Senator from Kentucky has moved to lay the appeal on the table.

Mr. LIPPITT. I rise to a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. LIPPITT. My point of order is that when the Senator from Kentucky [Mr. JAMES] made his appeal he did not address the Chair, and I ask for the reading of the record. My point is that the Senator from Kentucky did not say "Mr. President," and did not address the Chair at all.

The PRESIDING OFFICER. If that is true——

Mr. LIPPITT. I ask for the reading of the record.

The PRESIDING OFFICER. The Senate will be in order. If that is true, since the Senator from Kentucky has addressed the Chair, the motion is in order to lay the appeal on the table.

Mr. LIPPITT. When the Senator from Kentucky addressed the Chair the second time he did not make the motion. He said that he had previously made it. At the time that the motion was made it was not in order, and I ask for the reading of the record to prove what I say.

Mr. MYERS. Regular order!

The PRESIDING OFFICER. The regular order is demanded.

Mr. LIPPITT. I rise to a point of order, Mr. President.

The PRESIDING OFFICER. The Chair has control of recognition, and the Chair has recognized the Senator from Kentucky.

Mr. LIPPITT. I have made a point of order, and the Chair recognized me.

The PRESIDING OFFICER. There is no appeal from the decision of the Chair as to recognition.

Mr. LIPPITT. Does the Chair refuse to have the record read?

The PRESIDING OFFICER. If the Senator will permit the Chair, the pending question is the appeal from the decision of the Chair, which the Senator from Kentucky [Mr. JAMES] has moved to lay on the table.

Mr. ROOT. Mr. President——

Mr. LIPPITT. I made the point of order on that ruling.

Mr. ROOT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from New York will state it.

Mr. ROOT. May I ask what was the ruling of the Chair on the point of order made by the Senator from Rhode Island?

The PRESIDING OFFICER. The point of order made by the Senator from Rhode Island was that the Chair had not recognized the Senator from Kentucky.

Mr. ROOT. I ask for the ruling of the Chair upon that.

The PRESIDING OFFICER. It was the ruling of the Chair that he had recognized the Senator from Kentucky.

Mr. ROOT. I appeal from that decision.

Mr. JAMES. I make the point of order that that is not in order.

Mr. SMITH of Georgia. A second appeal can not be added to a pending appeal.

The PRESIDING OFFICER. An appeal from the decision of the Chair as to recognition is not permissible. The Chair desires to be shown any authority holding that such an appeal is permissible by the rules. If that can be done, the Chair will recognize the admissibility of the appeal.

Mr. ROOT. Mr. President, it is not a question of recognition. The Senator from Rhode Island——

Mr. REED. I make the point of order that this question is not debatable.

Mr. ROOT. If the Chair is unwilling to hear me, I will take my seat; but do not let us get our record tangled up and make trouble for ourselves in the future.

The Senator from Rhode Island [Mr. LIPPITT] raised the point that the Senator from Kentucky [Mr. JAMES] had not risen in his place, addressed the Chair, and secured recognition, and the Senator from Rhode Island asked for a reading of the record as an evidence of that fact. I ask the Chair to state what the ruling of the Chair has been? I understood the Chair to say that the point of order had been overruled.

Mr. KERN. It had not been entertained.

Mr. ROOT. Now, I appeal from the decision of the Chair overruling that point of order.

The PRESIDING OFFICER. The Chair will state to the Senator from New York that recognition in the Senate, as the Chair understands, is left entirely within the province of the Chair, and an appeal from the recognition by the Chair of a Senator making a motion or rising to speak is not in order and can not be entertained.

Mr. JAMES. Regular order!

The PRESIDING OFFICER. The regular order is——

Mr. SMOOT. For information, I ask if the Chair is sustained in the appeal, then will not the question revert to the motion made by the Senator from Missouri [Mr. STONE]?

The PRESIDING OFFICER. The question is on the motion of the Senator from Kentucky [Mr. JAMES] to lay on the table the appeal made by the Senator from New Hampshire [Mr. GALLINGER]. If that motion carries, then the question will again come up on the motion of the Senator from Missouri [Mr. STONE] to lay on the table the motion of the Senator form Michigan [Mr. TOWNSEND].

Mr. LIPPITT. Mr. President——

Mr. JAMES. Regular order!

Mr. STONE. The Chair ought not to permit this kind of cheap nonsense to go on.

Mr. LIPPITT. If the Chair is going to be dictated to by the Senator from Missouri——

Mr. GALLINGER. The Chair ought to suppress the Senator from Missouri.

Mr. LIPPITT. Who is the Chair—the Senator from Missouri or the gentleman occupying the chair?

The PRESIDING OFFICER. The Senate will be in order.

Mr. STONE. I have no time to waste——

Mr. LIPPITT. Mr. President——

Mr. ROBINSON. Regular order!

The PRESIDING OFFICER. For what purpose does the Senator from Rhode Island rise?

Mr. LIPPITT. I rise, Mr. President, to ask if the gentleman in the chair will permit me to read from the CONGRESSIONAL RECORD of August 4, last——

Mr. KERN. Regular order!

Mr. LIPPITT. A ruling of the Chair on precisely the same question as to which the present occupant of the chair has just ruled?

Mr. KERN. The regular order has been demanded, and until that is disposed of no debate is in order.

Mr. LIPPITT. I can only protest, Mr. President, against these rulings by the Chair.

Mr. SMOOT. I ask for the yeas and nays.

The PRESIDING OFFICER. The Senator from Utah asks for the yeas and nays. Is the request seconded?

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BRANDEGEE (when his name was called). Mr. President, I decline to vote.

Mr. WALSH (when Mr. CHAMBERLAIN's name was called). The Senator from Oregon [Mr. CHAMBERLAIN] has been called from the Chamber on official business.

Mr. CHILTON (when has name was called). Making the same announcement as to my pair and its transfer as on the previous vote, I vote "yea."

Mr. JAMES (when his name was called). Making the same transfer as upon the former roll call, I vote "yea."

Mr. JOHNSON (when his name was called). I transfer my pair with the Senator from North Dakota [Mr. GRONNA] to the Senator from Alabama [Mr. BANKHEAD], and vote "yea."

Mr. MYERS (when his name was called). Transferring my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from Arizona [Mr. ASHURST], I vote "yea."

Mr. OLIVER (when his name was called). Mr. President, I decline to vote.

Mr. OVERMAN (when his name was called). Making the same transfer of my pair as previously, I vote "yea."

Mr. SAULSBURY (when his name was called). I make the same transfer of my pair as previously, which I desire to stand until I change it, and vote "yea."

Mr. SMITH of Maryland (when his name was called). I make the same transfer as on the last vote, and vote "yea."

Mr. WILLIAMS (when his name was called). Repeating the statement made by me upon the last roll call with regard to my pair and its transfer, and asking that that statement may stand for the balance of the day, I vote "yea."

The roll call was concluded.

Mr. LIPPITT. Mr. President, I am present, but I ask that I may be excused from voting on this question, with the consent of the Senate.

Mr. REED. I object.

Mr. LIPPITT. Mr. President, I should like to state the reason why I make this request.

Mr. JAMES. Regular order!

The PRESIDING OFFICER. The rule provides that the matter must be decided without debate.

Mr. LIPPITT. The reason is this, that a few moments ago, in the course of the debate——

Mr. REED. I make the point of order that the Senator is out of order.

Mr. LIPPITT. As I understand, the Senator from Kentucky, sitting in his chair, without addressing the Presiding Officer, made a motion——

Mr. REED. I rise to a point of order.

Mr. LIPPITT. Which subsequently was put——

The PRESIDING OFFICER. The point of order is well taken. This matter must be decided without debate. The Senator from Rhode Island is proceeding out of order.

Mr. LIPPITT. Where is the rule under which I am not allowed to make a statement of the reasons why I ask to be excused from voting?

Mr. OWEN. The Senator has no right to make an explanation in the midst of a roll call.

Mr. LIPPITT. I have a right to ask to be excused from voting.

The PRESIDING OFFICER. If the Senator from Rhode Island will listen, the Chair will read Rule XII, which provides:

> The presiding officer shall submit the question to the Senate: "Shall the Senator, for the reasons assigned by him, be excused from voting?" which shall be decided without debate.

Mr. LIPPITT. I was stating my reasons. That is not debate. The rule distinctly says that I can assign my reasons, and I ask the privilege of assigning those reasons.

Mr. JAMES. I object.

Mr. BRANDEGEE. Mr. President, a parliamentary inquiry. Has the roll call been completed?

The PRESIDING OFFICER. The roll call has been completed.

Mr. GALLINGER. The result has not been announced.

Mr. BRANDEGEE. I want, if I may be indulged, to call the attention of the Chair to the rule——

Mr. STONE. Mr. President——

Mr. BRANDEGEE. Which says——

Mr. STONE. Until the result of the roll call is announced I make the point of order that debate is not in order.

The PRESIDING OFFICER. The Senate will be in order.

Mr. BRANDEGEE. I believe I have the floor to make a point of order, which is what I have risen to do, and I am calling attention to a part of the rule for the information of the Chair, which the Chair has not read, with a view of showing that the Senator from Rhode Island has the right, until the result of the roll call has been announced, to assign his reasons.

The PRESIDING OFFICER. The rule provides that the matter must be decided without debate, and the decision has been announced.

Mr. SAULSBURY. Mr. President——

Mr. LIPPITT. I did not understand the statement of the Chair.

The PRESIDING OFFICER. The Chair was under the impression that the roll call had been completed, but he is informed by the Secretary that it has not been.

Mr. POMERENE entered the Chamber and voted in the affirmative.

Mr. LIPPITT. Have I not the floor?

The PRESIDING OFFICER. The Senator has not the floor; the roll call has not been completed.

Mr. SAULSBURY (after having voted in the affirmative). I transferred my pair with the junior Senator from Rhode Island [Mr. COLT] to the senior Senator from Virginia [Mr. MARTIN]. The Senator from Virginia has since entered the Chamber and voted. The understanding I have with my pair is that I may vote for the purpose of making a quorum. As it is manifest that my vote is necessary for such purpose, I allow it to stand.

The Secretary proceeded to recapitulate the vote, and said:

Senators voting in the affirmative are——

Mr. LIPPITT. Mr. President, I ask to be excused from voting on this question for reasons which I should like to explain to the Senate. In doing so I want, first, to call attention to paragraph 2 of Rule XII, found on page 13 of the Standing Rules of the Senate, which says that:

When a Senator——

Mr. REED. Mr. President, I make the point of order——

Mr. LIPPITT (continuing reading)—

> declines to vote on call of his name he shall be required to assign his reasons therefor——

Mr. REED. I desire to make a point of order——

Mr. LIPPITT (continuing reading)—

> and having assigned them, the Presiding Officer shall submit the question to the Senate: "Shall the Senator, for the reasons assigned by him, be excused from voting?" which shall be decided without debate; and these proceedings shall be had after the roll call and before the result is announced; and any further proceedings in reference thereto shall be after such announcement.

Now, the reasons which I want to assign—

Mr. REED. I rise to a point of order.

The PRESIDING OFFICER. The Senator from Missouri will state his point of order.

Mr. REED. The point of order is that the Senator is out of order in discussing this question in the midst of a roll call, and further that the Chair has already ruled that the Senator from Rhode Island is out of order, and it is now the duty of the Chair to compel the Senator to take his seat.

The PRESIDING OFFICER. In order that this question may be determined definitely and for the rest of this session the Chair submits the point of order to the Senate. Is it in order for the Senator from Rhode Island to proceed and make the statement he desires?

Mr. SMOOT. Mr. President——

Mr. GALLINGER and Mr. OLIVER. Let us have the yeas and nays.

Mr. SMOOT. It is not possible——

Mr. BRYAN. I rise to a parliamentary inquiry.

Mr. LIPPITT. Mr. President——

Mr. BRYAN. I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his parliamentary inquiry.

Mr. BRYAN. Mr. President, the call of the roll has been completed, has it not?

The PRESIDING OFFICER. It has been completed.

Mr. BRYAN. If the Chair desires to submit it to the Senate, I presume the question is whether the Senator from Rhode Island shall be allowed to state his reasons for asking the Senate to excuse him from voting. The Senator from Rhode Island has the right to state his reasons, but he has no right to proceed to argue the question or to read the rule or to make a statement.

Mr. GALLINGER. The rule says that he shall be required to assign his reasons.

Mr. BRYAN. That is not assigning his reasons.

Mr. JAMES. That does not mean an argument, Mr. President.

Mr. SMITH of Georgia. Mr. President, undoubtedly the rule makes it his right and his duty, if he desires to be excused, to state his reasons; but that is a matter of personal privilege, and it rests with the Senator certainly not to abuse it by en-

deavoring to make an argument. He states the personal matter that he feels should appeal to the Senate to relieve him from voting, and that is the extent of his right of expression, and that right is an absolute one under the rule.

Mr. LIPPITT. Mr. President, the reason——

The PRESIDING OFFICER. The Chair will state that the Senator from Missouri [Mr. REED] made the point of order that the Senator from Rhode Island was not entitled to proceed, as the Chair understands. Of course, it is for the Senate to determine as to whether or not the Senator from Rhode Island is abusing the privilege extended to him under the rule.

Mr. GALLINGER. The idea of submitting to the Senate the question of whether or not a Senator is abusing a privilege! The rule is obligatory that the Chair shall compel the Senator to assign his reasons. No great progress will be made if the Chair is going to rule in that way.

Mr. WARREN. Mr. President, a point of order. If we are to do away with——

The PRESIDING OFFICER. The Chair rules that the Senator from Rhode Island has a right to state his reasons for not voting. After they have been properly stated, it is for the Senate to decide whether he is abusing or exercising fairly the privilege given under that rule. The Senator from Missouri made a point of order that he was abusing the privilege. The Chair stated that if the point of order was made he would submit it to the Senate for decision. The Senator from Rhode Island evidently has a right to state his reasons.

Mr. OLIVER. Mr. President, the Chair states that the Senator from Rhode Island has a right to state his reasons. It seems to me that the Chair is a little short of the language of the rule, which says that he shall be required to state his reasons.

The PRESIDING OFFICER. The Chair sees no occasion to require him to do so when he is doing so very fully and completely, and requires no compulsion.

Mr. LIPPITT. Mr. President, if I may now be allowed to begin over again and find the starting point from which I was diverted a little bit by the storm that seems to have arisen on the calm seas of our deliberations, I was proceeding to say that the Senator from Kentucky [Mr. JAMES], without addressing the Chair, made a motion to lay on the table a certain motion that was pending before the Senate. I took occasion to call to the attention of the Chair the fact that the Senator from Kentucky had not addressed the Chair, and I asked that the record be read which would demonstrate or disprove the correctness of my position. The Chair declined to have that record read, and a few minutes subsequently, on a new demand on my part that it should be read, said that it was within the power of the Chair to decide whether or not a Senator had asked to be recognized.

Mr. JAMES. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator from Kentucky will state his point of order.

Mr. JAMES. I make the point of order that the Senator is abusing the right of explanation of his vote and making an argument, which the rules do not contemplate, and which is in violation of the very spirit and letter of the rule.

Mr. SMITH of Arizona. And in contempt of the rule.

The PRESIDING OFFICER. The Chair will submit this question for the decision of the Senate. The Senator will read what he has there.

Mr. LIPPITT. Mr. President——

Mr. MARTIN of Virginia. Mr. President, I should like to have the Chair show to the Senate the rule under which he submits this question to the Senate instead of disposing of it himself.

The PRESIDING OFFICER. It is a question of order.

Mr. MARTIN of Virginia. The Presiding Officer is put in the chair, as I understand, to dispose of these questions, and I should like to know the rule by which he can relegate that ruling to the Senate.

The PRESIDING OFFICER. The only thing that causes the Chair to feel a delicacy about it is the fact that the excuse is in connection with the Chair and a criticism of the Chair.

Mr. MARTIN of Virginia. The Chair is expected to stand criticism.

Mr. WARREN. Mr. President, if the Senator will allow me a moment, I entirely agree with that proposition. The Chair has its duty as well as the Senate. The Senate is not the forum to which to submit the question whether or not a man is transgressing the privileges of the floor. It should be decided by the Chair; but it seems to me now most inopportune, because we are in the midst of a roll call, and the result of the roll call has not yet been announced.

The PRESIDING OFFICER. The rule says that it is before the announcement that the excuses must be made. It is after the roll call and before the announcement. The Chair rules that the Senator must give a legitimate and fair excuse to the Senate for asking to be excused from voting. If the point of order is made that the Senator at this time is transgressing that privilege and making a speech, which is not a fair excuse for not voting on this proposition, the Chair will state that the Senator is not proceeding in order, and he must proceed in order.

Mr. LIPPITT. Mr. President, I think, in all fairness, I would have concluded what I had to say 15 minutes ago if I had not been interrupted by the filibusterers on the Democratic side of the Chamber. I am trying to call the attention of the Chair and of this body to an occasion upon which I was turned down in the Senate for doing the very thing that the Senator from Kentucky is being allowed to do. I was simply stating the proposition.

Mr. JAMES. Mr. President, I make the point of order that the Senator shows by his own statement that he is not proceeding in order. Therefore it is the duty of the Chair to rule that he is out of order and to let the result of the roll call be announced.

Mr. WORKS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Rhode Island must proceed in order. He must give his excuses for not voting.

Mr. LIPPITT. Mr. President, I was trying to state the premises on which I wanted to be excused. I can not give the excuse without first stating what it is. Of course I am delighted to listen to the Senators on the other side, who are so anxious to consume time. I spent a whole week here in the Senate when they were not here at all——

Mr. SMITH of Arizona. Mr. President, a point of order.

Mr. MARTIN of Virginia. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senate will be in order.

Mr. MARTIN of Virginia. Such remarks as that are not an excuse for not voting. I insist that the Senator be required to give his excuse for not voting, and confine himself to that. Our rules ought to be respected.

Mr. LIPPITT. I think so, too.

Mr. MARTIN of Virginia. And they ought to be enforced by the Chair. The Senator knows that that is not a reason why he should be excused from voting.

Mr. LIPPITT. Did the Senator from Virginia address the Chair when he rose?

Mr. MARTIN of Virginia. I did.

The PRESIDING OFFICER. Has the Senator stated his reasons for desiring to be excused from voting?

Mr. LIPPITT. No, Mr. President.

The PRESIDING OFFICER. The Senator must proceed in order and give the reasons why he desires to be excused from voting.

Mr. LIPPITT. Then, may I ask the Chair that in doing so I may be protected from interruption?

Mr. WORKS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will not be interrupted; but the Chair must enforce the rule.

Mr. LIPPITT. I quite agree with the Chair.

The PRESIDING OFFICER. The Senator from California submits a parliamentary inquiry; but the Senator from Rhode Island desires not to be interrupted until he concludes his remarks. The Chair can not permit him to be interrupted.

Mr. WORKS. Not to make a parliamentary inquiry?

The PRESIDING OFFICER. The Senator from California may address a parliamentary inquiry to the Chair, if the Senator so desires.

Mr. WORKS. The question, as I understand, is not whether the Senator shall be excused from voting, but whether he is abusing his privilege. My inquiry is whether that question is not debatable?

The PRESIDING OFFICER. The Chair will submit to the Senate the question whether he shall or shall not be excused when the Senator has made his excuses. The question is, Shall the Senator be excused from voting?

Mr. LIPPITT. Mr. President, I have not finished.

The PRESIDING OFFICER. The Senator will proceed in order.

Mr. LIPPITT. Mr. President, when I was interrupted by the Senators on the other side of the Chamber I had advanced to the point at which, as I recollect, I had stated what had occurred this evening on the part of the Senator from Kentucky [Mr. JAMES], the substance of which was that I had made the claim that the Senator from Kentucky had not addressed the Chair in making a motion, and the Chair had subsequently said that it was within his right to decide whether or not a Senator

took the floor without addressing the Chair. On the 14th of last August a controversy arose on account of my having risen and called for a quorum when the Senator from Iowa [Mr. CUMMINS] was occupying the floor. The Presiding Officer——

Mr. REED. Mr. President, I must renew the point of order that the Senator is not stating his excuse. He is plainly abusing the privilege the Chair extended to him. If he can persist in this way, he can persist indefinitely, and I make the point of order that the Senator is out of order.

The PRESIDING OFFICER. The point of order is sustained. The Senator is not proceeding in order. He will proceed in order to give his excuses.

Mr. LIPPITT. Why, Mr. President, I am trying to state this question. I started to do so at 25 minutes past 6. I could have stated——

Mr. REED. Mr. President, when a point of order is sustained a Senator must take his seat and yield the floor.

Mr. LIPPITT. Now, Mr. President, as I was saying——

Mr. REED. Mr. President——

The PRESIDING OFFICER. Undoubtedly the Senator is not proceeding in order. It is in order for the Senator to give a reasonable excuse for desiring the Senate to excuse him from voting.

Mr. GALLINGER. How will the Chair know whether or not it is reasonable until he states it?

The PRESIDING OFFICER. The Chair can rule, from hearing what a speaker is saying, that it is not relevant to the question that is before the Senate. It must be relevant.

Mr. LIPPITT. Mr. President, if I may now go on——

Mr. THOMPSON. Mr. President, I raise the point of order that the Senator is not proceeding in order. Under the rule he must take his seat and can not proceed without the consent of the Senate.

The PRESIDING OFFICER. The Chair has ruled that the Senator is not proceeding in order. His remarks are not in accordance with the spirit or purpose of the rule.

Mr. STONE. Well, then, let us have the announcement of the vote.

Mr. BRANDEGEE. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. BRANDEGEE. I object to Senators rising, as the Senator from Missouri just did, and occupying the floor without being recognized by the Chair.

The PRESIDING OFFICER. The rule requires them to address the Chair.

Mr. REED. Mr. President, the Senator well knows that I did address the Chair——

Mr. OLIVER. Mr. President, I rise to a point of order.

Mr. REED. And the Senator well knows that I was recognized by the Chair.

Mr. BRANDEGEE. I did not refer to the junior Senator from Missouri.

The PRESIDING OFFICER. The Senate will be in order. The Chair has declared that the Senator from Rhode Island is not proceeding in order.

Mr. OLIVER. Mr. President, I appeal from that decision.

Mr. LIPPITT. I will then try to proceed in order.

Mr. WALSH. Mr. President, I move to lay the appeal on the table.

Mr. LIPPITT. What is the appeal?

Mr. GALLINGER. Let us have the yeas and nays on that.

Mr. LIPPITT. Mr. President——

Mr. THOMPSON. Mr. President, I should like to have a ruling on the point of order.

Mr. LIPPITT. I will now, Mr. President, to the best of my ability, try to proceed in order.

Mr. THOMPSON. Mr. President, I rise to a point of order. Under the express rule of the Senate, when a Senator has been declared out of order it is his duty to take his seat, and he can not proceed without the consent of the Senate.

Mr. OVERMAN. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Chair is getting the rule to read to the Senate.

Mr. THOMPSON. I should like to have a ruling upon the point of order.

The PRESIDING OFFICER. Rule XIX, section 4, reads as follows:

> If any Senator, in speaking or otherwise, transgress the rules of the Senate, the presiding officer shall, or any Senator may, call him to order; and when a Senator shall be called to order he shall sit down and not proceed without leave of the Senate, which, if granted, shall be upon motion that he be allowed to proceed in order, which motion shall be determined without debate.

Mr. BRYAN. Mr. President, I move that the Senator be allowed to proceed in order.

Mr. BRANDEGEE. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator from Florida has been recognized.

Mr. BRANDEGEE. I thought he had finished. I should like to know whether I am recognized or not.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, the Senator from Pennsylvania [Mr. OLIVER] appealed from the ruling of the Chair, and the Senator from Montana [Mr. WALSH] moved to lay the appeal on the table. The question of order is that the motion of the Senator from Montana should now be put to the Senate.

Mr. ROOT. Upon that I ask for the yeas and nays.

The PRESIDING OFFICER. The Senator is mistaken. The Senator will permit the Chair again to read the rule:

> If any Senator, in speaking or otherwise, transgress the rules of the Senate, the presiding officer shall, or any Senator may, call him to order; and when a Senator shall be called to order he shall sit down and not proceed without leave of the Senate, which, if granted, shall be upon motion that he be allowed to proceed in order, which motion shall be determined without debate.

Mr. LIPPITT. Mr. President——

The PRESIDING OFFICER. The Chair understands that the Senator from Florida has made a motion that the Senator from Rhode Island be permitted to proceed in order. That motion is the question now before the Senate.

Mr. SMOOT. Upon that I ask for the yeas and nays.

Mr. BRYAN. I hope the Senator will not do that.

Mr. GALLINGER. Why, of course we will.

Mr. BRYAN. I hardly think that is fair. I did it to carry out the rules of the Senate, and as a courtesy to the Senator from Rhode Island. I did not do it to aid a filibuster.

Mr. JAMES. That is what the Senator did, though, when he made the motion.

Mr. BRYAN. I hope the Senator will not do that.

Mr. SMOOT. I ask unanimous consent to withdraw the motion, because I really did not think that was the object of the Senator.

Mr. BRYAN. I think the Senator ought to be allowed to proceed in order; but a call for the yeas and nays is manifestly a filibuster, and I hope that will not be done.

Mr. SMOOT. I ask unanimous consent to withdraw the request. I simply said to the Senator that I had no idea that it was the object of the Senator to engage in a filibuster at all.

Mr. BRYAN. The Chair ruled that the Senator from Rhode Island was out of order.

The PRESIDING OFFICER. The question is upon the motion of the Senator from Florida. [Putting the question.] By the sound the "noes" appear to have it.

Mr. ROOT. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BRANDEGEE (when his name was called). Mr. President, I decline to vote.

Mr. CHILTON (when his name was called). Making the same announcement that I made before, I vote "nay."

Mr. GALLINGER (when his name was called). Mr. President, I decline to vote on this question.

Mr. JAMES (when his name was called). Making the same transfer as on the former roll call, I vote "nay."

Mr. LIPPITT (when his name was called). I do not know whether under the rules of the Senate I can vote, and I wish to make a parliamentary inquiry. I should like to ask whether under the rules of the Senate I am permitted to vote on the question?

The PRESIDING OFFICER. The roll call can not be interrupted. The Secretary will proceed with the roll call.

Mr. OVERMAN (when his name was called). Making the same transfer that I made before, I vote "nay."

Mr. SAULSBURY (when his name was called). My vote evidently will be needed for a quorum, and therefore I vote. I vote "yea."

Mr. SIMMONS (when his name was called). I desire to inquire whether the Senator from Minnesota [Mr. CLAPP] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. SIMMONS. I transfer my pair with that Senator to the Senator from Indiana [Mr. SHIVELY] and vote "nay."

Mr. SMITH of Maryland (when his name was called). Making the same transfer as before, I vote "nay."

Mr. STONE (when his name was called). I transfer my pair with the Senator from Wyoming [Mr. CLARK] to the Senator from Nebraska [Mr. HITCHCOCK], and vote "nay."

The roll call was concluded.

Mr. HOLLIS. As my vote is needed to make a quorum, I vote "nay."

Mr. MYERS. Under the terms of my pair with the Senator from Connecticut [Mr. McLEAN] I am at liberty to vote when my vote is needed to make a quorum. I understand my vote is needed to make a quorum, and I vote "nay."

Mr. GALLINGER. Mr. President, I decline to vote, and I desire to state my reasons for declining.

Mr. REED. Mr. President, I make a point of order.

The PRESIDING OFFICER. The vote has not been recapitulated.

The Secretary recapitulated the vote, as follows:

YEAS—15.

Bristow	Gallinger	Oliver	Smith, Ariz.
Bryan	Gore	Page	Smoot
Catron	Lane	Root	Warren
Fletcher	O'Gorman	Saulsbury	

NAYS—28.

Ashurst	Lee, Md.	Ransdell	Stone
Chamberlain	Martin, Va.	Reed	Swanson
Chilton	Martine, N. J.	Robinson	Thomas
Hollis	Myers	Shafroth	Thompson
James	Overman	Sheppard	Thornton
Johnson	Owen	Simmons	Walsh
Kern	Pittman	Smith, Md.	White

Mr. JOHNSON. Has the junior Senator from North Dakota [Mr. GRONNA] voted?

The PRESIDING OFFICER. He has not.

Mr. JOHNSON. I am paired with that Senator. I transfer my pair to the senior Senator from Alabama [Mr. BANKHEAD] and vote. I vote "nay."

Mr. OLIVER. Mr. President, I rise to a point of order.

Mr. GALLINGER. If the roll call has been completed, I desire to now state my reasons for not voting.

Mr. ROOT. Will the Senator excuse me a minute?

Mr. REED. I make the point of order that the Senator can not voluntarily give his reasons; that that is a matter which rests with the Chair.

Mr. GALLINGER. It does not rest in the Chair.

Mr. ROOT. Mr. President, I desire to vote. I vote "yea."

Mr. OLIVER. Mr. President, I rise to a question of order.

The PRESIDING OFFICER. The Senator from Pennsylvania will state his point of order.

Mr. OLIVER. I call attention to rule——

Mr. GALLINGER. Mr. President, I have been recognized. I have declined to vote, and, under Rule XII, I desire to state my reasons for not voting.

The PRESIDING OFFICER. There has been a question of order raised which might affect the request of the Senator, and until it is stated it is impossible for the Chair to determine whether it does or not. The Senator will state his question of order.

Mr. OLIVER. My question of order is that the rule is imperative that when a Senator declines to vote he shall be permitted to assign his reasons therefor.

Mr. GALLINGER. Certainly. It is for that purpose that I am on my feet.

The PRESIDING OFFICER. The Senator from New Hampshire has been recognized.

Mr. GALLINGER. Mr. President, a little time ago the Chair announced that under the rules of the Senate he was entitled to recognize any Senator he saw fit. I wish to read a rule on that subject, Rule XIX:

> When a Senator desires to speak he shall rise and address the presiding officer, and shall not proceed until he is recognized, and the presiding officer shall recognize the Senator who shall first address him.

Now, Mr. President, if the Chair is to claim that it is within his power to recognize any Senator he pleases, whether it is the Senator first addressing him or not, I decline to vote, and I shall continue to decline to vote until that decision is reversed.

The PRESIDING OFFICER. The Chair stated that the power of recognition is within the Chair, without the right of appeal.

Mr. GALLINGER. But the Chair is wrong.

The PRESIDING OFFICER. The right of the Chair was exercised under that rule.

Mr. GALLINGER. It was wrong, when the rule says the Chair must recognize the Senator who first addressed the Chair.

The PRESIDING OFFICER. The rule is recognized by the Chair. The Senator from Kentucky [Mr. JAMES] was the only Senator who addressed the Chair.

Mr. REED. Mr. President, I make the point of order that the discussion which is going on here is entirely out of order.

The PRESIDING OFFICER. The point of order is sustained.

Mr. OLIVER. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The question is on excusing the Senator from New Hampshire from voting. Those in favor of excusing him will say "aye"; those opposed, "no."

Mr. BRANDEGEE. On that I ask for the yeas and nays.

Mr. OLIVER. I rise to a point of order first. There are other Senators who have declined to vote.

The PRESIDING OFFICER. The Senate can dispose of only one at a time.

Mr. OLIVER. If the Chair will allow me, I rather think the Chair is in error in that, because it says proceedings shall be had as to excusing a Senator after the roll call. If there is more than one Senator, the separate excuses must be received after the roll call is completed.

Mr. MARTIN of Virginia. Mr. President, I rise to a point of order. The Senator from Pennsylvania is absolutely out of order, and he ought to be required to take his seat.

The PRESIDING OFFICER. The point of order is well taken. The question is, Shall the Senator from New Hampshire be excused?

Mr. GALLINGER. I ask for the yeas and nays on that question.

The yeas and nays were ordered.

Mr. BRYAN. Mr. President, a parliamentary inquiry. Has not the Chair announced the result after putting the question?

Mr. GALLINGER. It is most extraordinary if we can not demand the yeas and nays.

The PRESIDING OFFICER. The Constitution permits one-fifth of the Senators present to make the demand.

Mr. JAMES. Mr. President, I make the point of order that the Senator from New Hampshire himself rose and made a very urgent and sympathetic appeal to the Senate to excuse him from voting, and after this side voted that that might be done he turns and takes the other side of the fight and tries to force a yea-and-nay vote.

Mr. GALLINGER. The Senator is out of order.

Mr. JAMES. I am not as much out of order as is the Senator in his present filibuster.

Mr. GALLINGER. If the Senator wants a personal controversy, he is perfectly welcome. He is out of order.

Mr. JAMES. I do not fear a personal controversy. I will say that.

Mr. BRYAN. How is the Senate going to order another roll call when this one has not yet been determined? We were in the midst of a roll call and nothing is in order except for the Senator from New Hampshire to state his reasons for not voting and for the Senate without debate to excuse him or not excuse him after the call of the roll is completed. How can the Senate break in in the midst of a yea-and-nay vote and order another roll call?

Mr. GALLINGER. Certainly. That is what the rule says.

Mr. BRYAN. We can not have two roll calls going on at the same time.

Mr. GALLINGER. The yeas and nays have been ordered.

Mr. ROOT. Mr. President——

Mr. BRYAN. Nothing is in order but to announce the result of the previous vote.

The PRESIDING OFFICER. The Seantor from Florida has the floor.

Mr. BRYAN. The Chair should state the result of the vote on the roll call now pending.

Mr. ROOT. Will the Senator from Florida allow me to make a suggestion? I think the proposition of the Senator from Florida would be perfectly sound if it were the fact that we were in the midst of the roll call, but I understand the fact to be that the roll call——

Mr. REED. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator from Missouri will state it.

Mr. REED. The question is not debatable.

The PRESIDING OFFICER. The Chair is hearing the Senator from New York on the point of order raised by the Senator from Florida as to whether the announcement of the vote must be made before the various votes can be taken on excusing Senators. The Chair would like to hear the Senator from Florida and the Senator from New York on that point of order.

Mr. ROOT. I am speaking in all sincerity with reference to the suggestion of the Senator from Florida. As I was saying, I think the suggestion would be perfectly sound were there not misapprehension in the mind of the Senator from Florida regarding the facts. As I understand it, the roll call had been completed but not announced, and that is the precise situation postulated by the rule. The second paragraph of Rule XII, after saying the President shall submit the question to the Senate, "Shall the Senator, for the reasons assigned by him,

be excused from voting?"—I follow the words—"which shall be decided without debate; and these proceedngs shall be had after the roll call and before the result is announced."

I may be wrong, but I supposed that was the precise situation we have here. It seems to me the ruling of the Chair is clearly right.

Mr. SMOOT. It is perfectly right.

Mr. GALLINGER. I venture to submit to the Chair, if the Chair will allow me——

Mr. BRYAN. I make the point of order——

The PRESIDING OFFICER. The Senator from Florida had been recognized and still has the floor.

Mr. BRYAN. The point of order is that we can not have two roll calls going on at the same time.

Mr. JAMES. I make the point of order that the Senator from New Hampshire made this personal explanation to the Senate for filibustering purposes, for the purpose of delay, and not in good faith, as shown by his own action. He asked the Senate to excuse him, and after the Democratic side had voted to excuse him, and the ayes predominated, then he had sufficient of his own colleagues here to call for the yeas and nays and deny to himself the right to do what he had requested the Senate to allow him to do.

Mr. GALLINGER. I call the Senator to order under the rule.

Mr. JAMES. Therefore the point of order I make is that it is within the discretion of the Chair to decide when a Senator rises for the purpose of making an explanation of his reasons for refusing to vote. If the Chair believes that it is in good faith, it is the duty of the Chair to hear the Senator, but if the Chair believes it is in bad faith and that it is for the purpose of delay and filibuster, the Chair at least must know whenever this is done it is the duty of the Chair to refuse to recognize the Senator for the purpose of trifling with the Senate in such a fashion.

Mr. BRANDEGEE. Mr. President, I rise to a point of order——

Mr. GALLINGER. The Senator is bringing the rules of the House over here.

Mr. JAMES. I am bringing the rules of the Senate here.

The PRESIDING OFFICER. The Chair is ready to rule on this question.

Mr. BRANDEGEE. I rise to a question of privilege, and it is this——

The PRESIDING OFFICER. The Senator will state the question of privilege.

Mr. BRANDEGEE. It is that under the rule of the Senate no Senator has a right to impugn the motives of a fellow Senator, and the Senator from Kentucky [Mr. JAMES] has just violated that rule and ascribed improper and unworthy motives to the Senator from New Hampshire. He has done it claiming to state a question of order when he himself was out of order under the rules of the Senate.

The PRESIDING OFFICER. The question before the Senate——

Mr. SMOOT. I simply want to refer to paragraph 2 of Rule XII in answer to what the Senator from Florida [Mr. BRYAN] said. There are not two roll calls at the same time. One roll call had been completed according to the rules of the Senate, and the Chair, very clearly within his rights, ruled correctly when he stated that the first roll call had been completed and that the next roll call that had been asked for had been granted by one-fifth of the Senators present.

The PRESIDING OFFICER. The Chair will read for the information of the Senate the rule under which we are now operating:

> When a Senator declines to vote on call of his name, he shall be required to assign his reasons therefor, and, having assigned them, the presiding officer shall submit the question to the Senate, "Shall the Senator, for the reasons assigned by him, be excused from voting?" which shall be decided without debate; and these proceedings shall be had after the roll call and before the result is announced; and any further proceedings in reference thereto shall be after such announcement.

Clearly, under the rule the excuse must be heard and the decision reached before the announcement, and the Chair ruled that the present proceeding under that rule is in order. The only time it could be done would be before the final announcement, because the Senator might not be excused and his vote might affect the result. The rule provides that it must be done after the roll call is completed, but before the announcement is made by the Chair. The question is on excusing the Senator from New Hampshire.

Mr. GALLINGER. On which the yeas and nays have been ordered.

Mr. BRANDEGEE. Regular order!

Mr. SMITH of Arizona. I wish to make a parliamentary inquiry of the Chair. Under that decision a vote having been taken by yeas and nays another roll call could be taken before the result of the previous vote was announced.

The PRESIDING OFFICER. The rule provides for this case. The yeas and nays can be ordered by one-fifth of the Senators present, and, having been ordered, the question will be taken by yeas and nays.

Mr. FLETCHER. Mr. President, I raise a point of order. When a motion is made and put to the Senate and the vote has been taken on it and the vote is all one way, practically, and the Chair announces the motion carried, and then further a roll call is demanded on the yeas and nays, when there is no occasion to demand the yeas and nays, if there is no difference in the vote that has been cast, and in this case I do not think there was a negative vote——

The PRESIDING OFFICER. The Chair will state to the Senator from Florida that the Constitution provides that upon all questions, when one-fifth of the Senators present demand it, the vote shall be taken by yeas and nays.

Mr. FLETCHER. Even though there is no vote to the contrary?

The PRESIDING OFFICER. If one-fifth of the Senators demand the call, the Constitution provides that the roll shall be called, and that supercedes all other rules.

Mr. FLETCHER. In that event on every question Senators can demand roll calls whether there is a vote to the contrary or not.

The PRESIDING OFFICER. The Constitution provides that when it is desired by the requisite number that their record shall be made; they are entitled to it. The Secretary will call the roll on the question "Shall the Senator from New Hampshire be excused from voting?"

The Secretary proceeded to call the roll.

Mr. BRANDEGEE (when his name was called). On this question I decline to vote.

Mr. CHILTON (when his name was called). Making the same announcement as before of my pair and its transfer, in deference to the Senator from New Hampshire I vote "nay."

Mr. GALLINGER (when his name was called). Having a personal interest in this matter, I decline to vote.

Mr. JAMES (when his name was called). With the same transfer as on the former roll call, I vote "nay."

Mr. MYERS (when his name was called). Believing that my vote will be necessary to make a quorum, I will vote. I vote "nay."

Mr. SIMMONS (when his name was called). I transfer my pair with the junior Senator from Minnesota [Mr. CLAPP] to the Senator from Indiana [Mr. SHIVELY] and vote "nay."

Mr. SMITH of Maryland (when his name was called). Making the same transfer which I previously announced, I vote "nay."

Mr. STONE (when his name was called). I have a pair with the Senator from Wyoming [Mr. CLARK], and therefore I withhold my vote.

Mr. THOMAS (when his name was called). Has the senior Senator from New York [Mr. ROOT] voted?

The PRESIDING OFFICER. He has not.

Mr. THOMAS. Then, for the present I withhold my vote, as I have a pair with that Senator.

The roll call was concluded.

Mr. JOHNSON. Making the same transfer as before, I vote "nay."

Mr. THOMAS. The senior Senator from New York [Mr. ROOT] having entered the Chamber, I will vote. I vote "nay."

The result was announced—yeas 9, nays 37, as follows:

YEAS—9.

Bristow	Oliver	Root	Warren
Catron	Page	Smoot	Works
McCumber			

NAYS—37.

Ashurst	Lane	Pomerene	Swanson
Bryan	Lee, Md.	Ransdell	Thomas
Chamberlain	Lippitt	Reed	Thompson
Chilton	Martin, Va.	Robinson	Thornton
Fletcher	Martine, N. J.	Shafroth	Walsh
Gore	Myers	Sheppard	White
Hollis	O'Gorman	Simmons	Williams
James	Overman	Smith, Ariz.	
Johnson	Owen	Smith, Ga.	
Kern	Pittman	Smith, Md.	

NOT VOTING—50.

Bankhead	Camden	Culberson	Goff
Borah	Clapp	Cummins	Gronna
Brady	Clark, Wyo.	Dillingham	Hardwick
Brandegee	Clarke, Ark.	du Pont	Hitchcock
Burleigh	Colt	Fall	Hughes
Burton	Crawford	Gallinger	Jones

Kenyon	Newlands	Shields	Sutherland
La Follette	Norris	Shively	Tillman
Lea, Tenn.	Penrose	Smith, Mich.	Townsend
Lewis	Perkins	Smith, S. C.	Vardaman
Lodge	Poindexter	Stephenson	Weeks
McLean	Saulsbury	Sterling	
Nelson	Sherman	Stone	

The PRESIDING OFFICER. Upon this question the yeas are 9, and the nays are 37. The Senate refuses to excuse the Senator from Rhode Island [Mr. LIPPITT] from voting.

Mr. GALLINGER. Not a quorum.

The PRESIDING OFFICER. The Senators present and not voting, are the Senator from Connecticut [Mr. BRANDEGEE], the Senator from New Hampshire [Mr. GALLINGER], the Senator from Missouri [Mr. STONE], and the Senator from Michigan [Mr. TOWNSEND], making a quorum.

Mr. GALLINGER. Mr. President, not having been excused from voting, I desire to know what was the question before the Senate?

The PRESIDING OFFICER. The question was, Shall the Senator from Rhode Island be excused from voting?

Mr. GALLINGER. Oh, no.

Mr. LIPPITT. That was not the question, Mr. President. The question was whether I should be allowed to give an explanation of why I did not want to vote.

Mr. SMITH of Georgia. The question is upon the motion of the Senator from Florida to allow the Senator from Rhode Island to proceed in order; he having been called to order, that he now be allowed to proceed in order.

The PRESIDING OFFICER. The Senate will be in order. The Chair will ascertain definitely what the question is.

Mr. GALLINGER. I desire to vote, but I want to know what the question is.

Mr. BRANDEGEE. I rise to a parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Chair will recognize the Senator from Connecticut as soon as the Senator——

Mr. BRANDEGEE. My parliamentary inquiry is whether the last question before the Senate was not whether the Senator from New Hampshire [Mr. GALLINGER] should be excused from voting?

The PRESIDING OFFICER. The question which the Senator from New Hampshire [Mr. GALLINGER] asks to be excused from voting upon is as to permitting the Senator from Rhode Island [Mr. LIPPITT] to proceed in order, so the Secretary informs the Presiding Officer.

Mr. GALLINGER. On that I vote "yea."

Mr. ROOT. Mr. President, if on that question the Senator from Connecticut declined to vote, he should be required to state his reasons.

The PRESIDING OFFICER. Does the Senator from New York insist that the Senator from Connecticut shall be required to state his reasons for not voting?

Mr. ROOT. Mr. President, the Senator from Connecticut should be required to state his reasons for not voting before the announcement of the vote on the roll call.

The PRESIDING OFFICER. The Senator has not submitted any request.

Mr. BRANDEGEE. I did not submit any request. If the Chair does not see that the rule is mandatory and that it is for the Chair to enforce the rule, I have no suggestion to make about it.

The PRESIDING OFFICER. The Chair is of the opinion that this rule does not require the Presiding Officer to execute it. It simply says "the Senator shall be required." The Chair thinks that it is the Senate that is interested in the matter. The Chair will announce the result of the vote.

Mr. ROOT. Mr. President, I rise to a question of order, that under the second paragraph of Rule XII—

When a Senator declines to vote on call of his name—

As the Senator from Connecticut [Mr. BRANDEGEE] has declined to vote on the call of his name—

he shall be required to assign his reasons therefor, and having assigned them, the Presiding Officer shall submit the question to the Senate: "Shall the Senator, for the reasons assigned by him, be excused from voting?" which shall be decided without debate; and these proceedings shall be had after the roll call and before the result is announced.

I demand that the Senator from Connecticut assign his reasons for declining to vote. The rule apparently requires that the Senator shall be required to assign his reason for not voting.

Mr. GORE. Mr. President, I make the point of order that the result of the roll call has already been announced.

Mr. GALLINGER. No——

Mr. GORE. And the demand of the Senator from New York is out of order.

The PRESIDING OFFICER. The Senator from New York has requested the Senator from Connecticut to assign his reasons. The Senate has taken no action requiring the execution of the rule——

Mr. ROOT. I beg pardon of the Chair.

The PRESIDING OFFICER. Consequently the Chair does not feel called upon to enforce the rule.

Mr. ROOT. I beg pardon of the Chair. I did not request, but I demanded that the Senator from Connecticut be required to state his reasons for not voting.

Mr. GALLINGER. Let the rule be enforced.

Mr. ROOT. I demand that the second paragraph of Rule XII be enforced, and I should be glad of a ruling of the Chair upon that demand.

The PRESIDING OFFICER. The Chair has ruled that that is a rule of the Senate; and if the Senate desires to compel the Senator from Connecticut to give his reasons, it is the duty of the Senate to do so. Now, the Chair——

Mr. ROOT. Mr. President, my understanding is, then, that the Chair declines to enforce the rule to which I have referred?

The PRESIDING OFFICER. The Chair declines, because when the Senate knows that the Senator from Connecticut has not voted and the Senate does not require him to give his reasons, there is nothing in the language of the rule which requires the Chair to do so.

Mr. ROOT. From that decision I appeal; and on the appeal I ask for the yeas and nays.

Mr. JAMES. An appeal is not in order on a question like this.

Mr. GALLINGER and others. Oh!

The PRESIDING OFFICER. The question which has been decided was as to excusing the Senator from Rhode Island. Upon that question the yeas were 15 and the nays were 28, making 43.

Mr. ROOT. Mr. President——

SEVERAL SENATORS. Regular order!

Mr. ROOT. I have appealed from the ruling of the Chair upon the enforcement of the rule, which requires that it be enforced before the announcement of the vote.

Mr. LIPPITT. Mr. President, I resent the fact of the Chair sitting there, with a Senator on his feet time after time, saying "Mr. President," and the Chair deliberately going on without recognizing him.

The PRESIDING OFFICER. The roll call can not be interrupted except by something that arises in connection with the roll call. The Chair has decided that the matter is not subject to a point of order. So the Senate declined to permit the Senator from Rhode Island to proceed in order. The question now is, Shall the Senator from Rhode Island be excused from voting?

Mr. LIPPITT. Mr. President, I rise to a point of order. Will the Presiding Officer state the question as required under Rule XII?

The PRESIDING OFFICER. The question is, Shall the Senator, for the reasons assigned by him, be excused from voting?

Mr. LIPPITT. A point of order, Mr. President. How can the Senate vote that I shall be excused or not excused for the reasons assigned, when I have just been refused an opportunity to give any reasons?

SEVERAL SENATORS. Regular order!

Mr. LIPPITT. I certainly have the right to assign my reasons.

SEVERAL SENATORS. Regular order!

The PRESIDING OFFICER. Without objection, the Senator will be excused from voting. The Chair hears none, and the Senator is excused.

Mr. OLIVER. I object.

Mr. GALLINGER. I ask for the yeas and nays on that.

Mr. JAMES. It is too late.

Mr. GALLINGER. I ask for the yeas and nays.

SEVERAL SENATORS. Regular order!

The PRESIDING OFFICER. The question recurs on the motion of the Senator from Kentucky [Mr. JAMES] to lay on the table the appeal of the Senator from New Hampshire [Mr. GALLINGER].

Mr. GALLINGER. On that the yeas and nays have been ordered.

The PRESIDING OFFICER. Upon that question the yeas were 37 and the nays were 2. The Senator from Kansas [Mr. BRISTOW], the Senator from Connecticut [Mr. BRANDEGEE], the Senator from New Hampshire [Mr. GALLINGER], the Senator from North Dakota [Mr. MCCUMBER], the Senator from Pennsylvania [Mr. OLIVER], the Senator from Minnesota [Mr. CLAPP], the Senator from Iowa [Mr. CUMMINS], the Senator from New York [Mr. ROOT], the Senator from New Mexico [Mr. CATRON], the Senator from Rhode Island [Mr. LIPPITT], the

Senator from Iowa [Mr. KENYON], the Senator from Michigan [Mr. TOWNSEND], and the Senator from Wyoming [Mr. WARREN], so the Secretary states to the Chair, were present when the roll was called.

Mr. GALLINGER. Do they vote "yea" or "nay"?

The PRESIDING OFFICER. On that question they were present, but not voting.

Mr. KENYON. I rise to a point of order. I was not present, Mr. President, although I desired to be on the roll call. The Senator from Wisconsin [Mr. LA FOLLETTE] and I were at luncheon at the time.

The PRESIDING OFFICER. The Chair can not recall definitely, as there have been several roll calls.

Mr. KENYON. I dislike to have the Chair say I was present when I was not present.

The PRESIDING OFFICER. If the Senator says he was not present, the Senator's name will be excluded; but that still leaves a quorum, and the motion of the Senator from Kentucky is adopted.

The result of the roll call last announced was as follows:

YEAS—37.

Bryan	Martin, Va.	Robinson	Swanson
Chilton	Martine, N. J.	Saulsbury	Thomas
Fletcher	Myers	Shafroth	Thompson
Gore	O'Gorman	Sheppard	Thornton
Hollis	Overman	Shively	Walsh
James	Owen	Simmons	White
Johnson	Pittman	Smith, Ariz.	Williams
Kern	Pomerene	Smith, Ga.	
La Follette	Ransdell	Smith, Md.	
Lee, Md.	Reed	Stone	

NAYS—2.

Smoot	Works

NOT VOTING—57.

Ashurst	Crawford	Lea, Tenn.	Sherman
Bankhead	Culberson	Lewis	Shields
Borah	Cummins	Lippitt	Smith, Mich.
Brady	Dillingham	Lodge	Smith, S. C.
Brandegee	du Pont	McCumber	Stephenson
Bristow	Fall	McLean	Sterling
Burleigh	Gallinger	Nelson	Sutherland
Burton	Goff	Newlands	Tillman
Camden	Gronna	Norris	Townsend
Catron	Hardwick	Oliver	Vardaman
Chamberlain	Hitchcock	Page	Warren
Clapp	Hughes	Penrose	Weeks
Clark, Wyo.	Jones	Perkins	
Clarke, Ark.	Kenyon	Poindexter	
Colt	Lane	Root	

The PRESIDING OFFICER. The question now is——

Mr. FLETCHER. I desire to ask, Is there a question now before the Senate?

Mr. WILLIAMS. Read the bill.

Mr. SMOOT. Mr. President, the question now recurs upon the motion of the Senator from Missouri.

The PRESIDING OFFICER. The question recurs on the motion of the Senator from Missouri [Mr. STONE] to lay on the table the motion of the Senator from Michigan [Mr. TOWNSEND].

Mr. OLIVER and Mr. GALLINGER. Let us have the yeas and nays.

Mr. SMOOT. I want to be heard upon that point.

Mr. REED. A motion to lay on the table is not debatable.

Mr. GORE. Regular order!

Mr. SMOOT. I ask the Presiding Officer to allow me to proceed.

The PRESIDING OFFICER. The Chair will hear the Senator for five minutes.

Mr. MARTIN of Virginia. I object.

Mr. REED. I make the point of order that the Chair can not permit debate on the question.

The PRESIDING OFFICER. The Senator from Utah, as the Chair understands, wants to raise the point of order that the motion to lay on the table is not permissible on a motion for consideration.

Mr. SMOOT. That is what I want to speak to, and I think it is of vital interest to this body.

Mr. WILLIAMS. Especially at this time of the night.

Mr. SMOOT. On February 15, 1875——

Mr. REED. That is debate on the main question, and I make the point of order that debate is out of order on the motion to lay on the table.

The PRESIDING OFFICER. If the Senator will permit the Chair to make an observation, the question before the Senate is as to whether a motion to lay on the table the motion made by the Senator from Michigan [Mr. TOWNSEND] for the consideration of the bill named by him is in order.

Mr. SMOOT. That is it.

The PRESIDING OFFICER. The Senator from Utah insists that a motion to lay on the table a motion to take up a bill for consideration after 2 o'clock is not in order.

Mr. SMOOT. That is the question exactly.

The PRESIDING OFFICER. The Chair will hear the Senator for five minutes.

Mr. SMOOT. Now I ask the Chair to turn to page 386 of Precedents, Decisions on Points of Order, in the United States Senate [Gilfry's Precedents]. At the bottom of that page there is, under the heading "Motion to proceed to the consideration of a bill can not be laid on the table," the following:

FEBRUARY 15, 1875.

[43d Cong., 2d sess.; J., pp. 270, 271.]

Decided by the Senate, on a question of order, that it was not in order to lay on the table a motion to proceed to the consideration of a subject. Question: "Is the motion in order?" Yeas 25, nays 29. (See CONGRESSIONAL RECORD, p. 1277.)

Mr. President, I have the RECORD here. The Senate has not given me time to go into it, but I want to say to the Senate that there is not a question that it has been decided time and time again that such a motion can not be laid upon the table.

Mr. SMITH of Arizona. Are there not precedents to the contrary?

Mr. SMOOT. Not that I can find; but I have a great number of precedents, Mr. President, to show that such motions can not be laid on the table. I read from the CONGRESSIONAL RECORD, page 1275, volume 3, part 2, Forty-third Congress, second session, of February 15, 1875:

The PRESIDENT pro tempore. The question is, Is the motion of the Senator from Missouri to lay on the table the motion of the Senator from Indiana in order?

The question, being put, was declared to be decided in the negative.

That was to take up a resolution.

Mr. SHERMAN. What is the question? I did not hear.

The PRESIDENT pro tempore. Whether the motion to lay on the table, the motion of the Senator from Indiana, was in order. The Chair will put the question again.

Mr. SHERMAN. I am quite sure the Chair was right in the first place. Let me put a case to the Senate. Suppose a Senator should move to take up some proposition that would lead to debate. A limited amount of debate is always authorized on a motion to take up a bill or proposition.

Mr. EDMUNDS. Not on its merits.

Mr. SHERMAN. Well, on its demerits, or some other way. It is open to some debate. Suppose a majority——

Mr. EDMUNDS. The rule expressly prohibits debate upon the merits of the subject proposed to be considered—the same eleventh rule.

Now, Mr. President, I want the Chair to turn to page 219 of Gilfry's Precedents. This is the only question involving a decision as announced by me, and this is upon the merits of the question—not as to the proposition of taking it up or considering it or discussing it:

[Thirty-sixth Congress, first session (J., pp. 224, 225), Mar. 6, 1860.]

A motion was made by Mr. Gwin that the Senate proceed to the consideration of the bill (H. R. 5) making appropriations for the support of the Military Academy for the year ending the 30th of June, 1861; and a debate having arisen, and while Mr. Fessenden was addressing the Chair, Mr. Johnson, of Arkansas, raised a question of order: That, on a motion to take up the bill, discussion on the merits of the bill was not in order; and the President (Mr. Bigler in the chair) decided that the discussion was not in order.

The same thing happened on May 22, 1862. A motion was made by Mr. Wade that the Senate proceed to the consideration of the bill (S. 298) donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts, and the same decision was reached. I want to say to the Senate that we ought to——

Mr. SMITH of Georgia. Mr. President, I desire to ask the Senator if at any time in the procedure of the Senate a Senator has been stopped from speaking upon such a motion upon the ground that he was delivering a speech which was out of order?

Mr. SMOOT. I have never heard of it. I can not find it in the precedents.

Mr. SMITH of Georgia. Is it not the practice of the Senate, whenever a subject is debatable, for a Senator to speak on anything on earth that he desires, and is he at any time called to order and stopped by the Chair?

Mr. SMOOT. No, Mr. President. The question involved here is not such a question. The Senator from Michigan [Mr. TOWNSEND] was speaking upon the bill that he had moved to take up. When a Senator moves to take up a bill a motion to lay that motion upon the table is not in order, and it is so held by every decision I can find.

Mr. BRANDEGEE. Mr. President, will the Senator allow me to ask him a question?

The PRESIDING OFFICER. The Chair is ready to rule.

Mr. SMOOT. In five minutes' time I can not go into all these decisions; but I want to say to the Chair now that wherever a motion is made to proceed to the consideration of a bill on the calendar after 2 o'clock it is debatable, and it was so held by the present President of the Senate not two weeks ago.

The PRESIDING OFFICER. If the Senator will permit the Chair, the Chair stated distinctly to the Senator from

Michigan at the time that the motion was debatable as soon as it was presented to the Senate, but a motion to lay on the table was made against the consideration of the bill, and under Rule XXII when any matter is pending before the Senate a motion to adjourn, and so forth, or to lay on the table is in order. The Chair rules that after 2 o'clock the discussion of a motion for consideration of a matter is always in order. Before 2 o'clock it is not, but the discussion has been stopped by the motion of the Senator from Missouri to lay the motion for the consideration of the bill on the table. The motion to lay on the table is not debatable.

Mr. SMOOT. Right there, Mr. President, I wish to call the Presiding Officer's attention to Rule XXII, which says:

When a question is pending no motion shall be received but—
To adjourn.
To adjourn to a day certain or that when the Senate adjourn it shall be to a day certain.

And these are in order:

To take a recess.
To proceed to the consideration of executive business.
To lay on the table.
To postpone indefinitely.
To postpone to a day certain.
To commit.
To amend.

Now, I will read the balance of it:

Which several motions shall have precedence as they stand arranged; and the motions relating to adjournment—

One.
to take a recess—

Two.
to proceed to the consideration of executive business—

Three.
to lay on the table—

Four.
shall be decided without debate.

But the balance of them are not to be decided without debate; and I say to the Chair now that every decision of this body has been that they are debatable.

The PRESIDING OFFICER. The Chair has ruled that the motion made by the Senator from Michigan is subject to debate; but the Senator from Utah does not recognize the fact that the motion now before the Senate is a motion to lay that motion on the table.

Mr. SMOOT. Which is out of order, Mr. President, by every precedent.

The PRESIDING OFFICER. The Chair has ruled that under Rule XXII when any matter is pending, a motion to lay on the table is in order. So many as are in favor of laying——

Mr. OLIVER. I demand the yeas and nays, Mr. President.

The PRESIDING OFFICER. The yeas and nays are demanded. Is there a second? Evidently a sufficient number.

Mr. BRANDEGEE. I appeal from the ruling of the Chair, Mr. President.

The PRESIDING OFFICER. Evidently a sufficient number. The Secretary will call the roll.

Mr. JAMES. What is the question?

The Secretary called the name of Mr. ASHURST, and he voted in the affirmative.

Mr. BRANDEGEE. Mr. President, a parliamentary inquiry. What is the question to be voted on?

The PRESIDING OFFICER. The question is the motion of the Senator from Missouri to lay on the table the motion of the Senator from Michigan to take up Senate bill 392. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BRANDEGEE. Mr. President, I rise to a question of order.

Mr. WILLIAMS. I make the point of order that the Chair has ordered the Secretary to call the roll, and the Secretary has begun to call the roll.

The PRESIDING OFFICER. The Secretary will proceed with the roll call.

Mr. BRANDEGEE. I rise to a point of order. The Senator from Connecticut was on his feet——

The PRESIDING OFFICER. The Secretary will proceed with the calling of the roll.

The Secretary resumed the calling of the roll.

Mr. BRANDEGEE (continuing). Demanding recognition, before the Chair ordered the Secretary to call the roll; and this is equivalent to denying to a Senator his rights under the rules of the Senate.

Mr. JAMES and other Senators. Regular order!

The PRESIDING OFFICER. The roll call has been ordered. The Secretary will proceed with the calling of the roll.

The Secretary resumed the calling of the roll.

Mr. BRANDEGEE (when his name was called). I decline to vote.

Mr. OLIVER. Mr. President, a question of order.

The PRESIDING OFFICER. The question of order will be heard when the roll call is completed.

Mr. OLIVER. The question of order is that——

Mr. JAMES. Regular order!

Mr. OLIVER (continuing). When a Senator declines to vote, he shall be required to state his reasons; and I demand that the Senator shall be required——

The PRESIDING OFFICER. The Senator is out of order. It is not the time now. The Secretary will proceed with the roll call.

The Secretary resumed the calling of the roll.

Mr. CHILTON (when his name was called). Making the same announcement as before, I vote "yea."

Mr. GALLINGER (when his name was called). I decline to vote on this motion.

Mr. JAMES (when his name was called). Making the same transfer as upon the former roll call, I vote "yea."

Mr. JOHNSON (when his name was called). Making the same transfer as before, I vote "yea."

Mr. MYERS (when his name was called). I transfer my pair with the junior Senator from Connecticut [Mr. MCLEAN] to the junior Senator from Mississippi [Mr. VARDAMAN] and will vote. I vote "yea."

Mr. ROOT (when his name was called). Mr. President, I decline to vote; and at the time in the course of the proceedings specified by Rule XII, I will assign my reasons.

Mr. SIMMONS (when his name was called). Making the same transfer as heretofore, I vote "yea."

Mr. SMITH of Maryland (when his name was called). Making the same transfer as before, I vote "yea."

Mr. WALSH (when his name was called). I have a general pair with the junior Senator from Rhode Island [Mr. COLT]. Under the terms of that pair I am at liberty to vote when necessary to make a quorum. That condition appears to exist. I vote "yea."

Mr. WILLIAMS (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. HOLLIS. Making the same announcement as heretofore, I vote "yea."

Mr. TOWNSEND (after having voted in the negative). Has the junior Senator from Florida [Mr. BRYAN] voted?

The PRESIDING OFFICER. He has not voted.

Mr. TOWNSEND. I have a pair with that Senator, and I therefore withdraw my vote.

Mr. BRYAN entered the Chamber and voted "yea."

The Secretary recapitulated the vote, as follows:

YEAS—36.

Ashurst	Kern	Pomerene	Smith, Md.
Bryan	La Follette	Ransdell	Swanson
Chamberlain	Lane	Reed	Thomas
Chilton	Lee, Md.	Robinson	Thompson
Fletcher	Martin, Va.	Shafroth	Thornton
Gore	Martine, N. J.	Sheppard	Vardaman
Hollis	Myers	Simmons	Walsh
James	Owen	Smith, Ariz.	White
Johnson	Pittman	Smith, Ga.	Williams

NAYS—3.

Page	Smoot	Works

Mr. ROOT. Mr. President, I have declined to vote——

Mr. KENYON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa rise for the purpose of voting?

Mr. KENYON. I rose for the purpose of inquiring if a quorum has voted. If not, I desire to vote. Otherwise, I desire to be excused, as I am unable to find out what we are voting on.

The PRESIDING OFFICER. It is impossible for the Chair to determine whether or not there is a quorum until the announcement is made. It is not customary for the Chair to announce whether or not a quorum has voted.

Mr. KENYON. I vote "yea," Mr. President.

Mr. ROOT. Mr. President, I decline to vote, for the reason that I consider that the Chair—I assume, I do not doubt, without intention—has deprived me of my right as a Member of this body by requiring me to vote on a question that is not before the Senate. I decline because the true question before the Senate is upon an appeal which was taken from the ruling of the Chair upon the point of order raised by the Senator from Utah; and I wish to repel the idea that it is in the power of any Presiding Officer to exclude the Senate of the United States from voting upon an appeal from a ruling.

Mr. MARTIN of Virginia and other Senators. Question!

The PRESIDING OFFICER. If there is no objection, the Senator——

Mr. ROOT. I ask that the Senate excuse me from voting.

The PRESIDING OFFICER. The Chair will state the question in the language of the rule. The question is, Shall the Senator from New York be excused from voting for the reason assigned by him?

Mr. ROOT, Mr. BRANDEGEE, and Mr. GALLINGER called for the yeas and nays, and they were ordered.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BRANDEGEE (when his name was called). Mr. President, I decline to vote.

Mr. CHILTON (when his name was called). Making the same announcement, I vote "nay."

Mr. GALLINGER (when his name was called). Mr. President, on this question I decline to vote for reasons which I will hereafter state.

Mr. JAMES (when his name was called). Making the same transfer as heretofore, I vote "nay."

Mr. JOHNSON (when his name was called). Making the same transfer as before, I vote "nay."

Mr. MYERS (when his name was called). Believing my vote will be necessary to make a quorum, I vote "nay."

Mr. SMITH of Maryland (when his name was called). I make the same transfer as before and vote "nay."

Mr. STONE (when his name was called). I transfer the pair I have with the Senator from Wyoming [Mr. CLARK] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. WALSH (when his name was called). I repeat the announcement made by me on a former vote, and I vote "nay."

Mr. WILLIAMS (when his name was called). With the same announcement, I vote "nay."

The roll call was concluded.

Mr. HOLLIS. Understanding that a quorum has not voted, I vote "nay."

The roll call resulted—yeas 6, nays 35, as follows:

YEAS—6.

Kenyon	Root	Thomas	Works
Page	Smoot		

NAYS—35.

Ashurst	Kern	Pittman	Smith, Md.
Bryan	La Follette	Pomerene	Stone
Chamberlain	Lane	Reed	Swanson
Chilton	Lee, Md.	Robinson	Thompson
Fletcher	Martin, Va.	Shafroth	Thornton
Gore	Martine, N. J.	Sheppard	Walsh
Hollis	Myers	Simmons	White
James	Overman	Smith, Ariz.	Williams
Johnson	Owen	Smith, Ga.	

NOT VOTING—55.

Bankhead	Culberson	Lippitt	Sherman
Borah	Cummins	Lodge	Shields
Brady	Dillingham	McCumber	Shively
Brandegee	du Pont	McLean	Smith, Mich.
Bristow	Fall	Nelson	Smith, S. C.
Burleigh	Gallinger	Newlands	Stephenson
Burton	Goff	Norris	Sterling
Camden	Gronna	O'Gorman	Sutherland
Catron	Hardwick	Oliver	Tillman
Clapp	Hitchcock	Penrose	Townsend
Clark, Wyo.	Hughes	Perkins	Vardaman
Clarke, Ark.	Jones	Poindexter	Warren
Colt	Lea, Tenn.	Ransdell	Weeks
Crawford	Lewis	Saulsbury	

The PRESIDING OFFICER. Upon the question of excusing the Senator from New York [Mr. ROOT] from voting the yeas are 6 and the nays are 35. Present and not voting: Senators BRANDEGEE, GALLINGER, MCCUMBER, and NELSON. So, the Senate refuses to excuse the Senator from New York.

Mr. GALLINGER. That is not a quorum.

The PRESIDING OFFICER. The Senator from New Hampshire makes the point that there is no quorum voting?

Mr. GALLINGER. Yes; I do.

The PRESIDING OFFICER. No quorum has voted.

Mr. GALLINGER. Let the roll be called.

The PRESIDING OFFICER. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Lane	Pomerene	Smith, Md.
Bryan	Lee, Md.	Ransdell	Swanson
Chamberlain	Martin, Va.	Reed	Thomas
Fletcher	Martine, N. J.	Robinson	Thompson
Gore	Myers	Root	Thornton
James	Nelson	Shafroth	Vardaman
Johnson	Overman	Sheppard	White
Kenyon	Owen	Simmons	Williams
Kern	Page	Smith, Ariz.	Works
La Follette	Pittman	Smith, Ga.	

Mr. KERN. I desire to announce the absence of the following Senators because of indisposition:

The Senator from South Carolina [Mr. TILLMAN], the Senator from Arkansas [Mr. CLARKE], the Senator from Indiana [Mr. SHIVELY], and the Senator from Tennessee [Mr. SHIELDS].

The Senator from Illinois [Mr. LEWIS] is out of the city.

The Senator from New Jersey [Mr. HUGHES] and the Senator from South Carolina [Mr. SMITH] are unavoidably absent from the city.

This announcement may stand for the evening.

The PRESIDING OFFICER. Thirty-nine Senators have answered to their names. A quorum is not present.

Mr. GALLINGER. Let the absentees be called.

Mr. KERN. I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

Mr. SMOOT. The rule requires that the names of absentees shall be called before that motion is made.

Mr. KERN. I do not understand that the rule so requires.

The PRESIDING OFFICER. The Chair does not know of any rule that requires it. It has only recently been adopted as a custom. The question is on agreeing to the motion of the Senator from Indiana [Mr. KERN] that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms is directed to request the attendance of absent Senators.

Mr. CHILTON entered the Chamber and answered to his name.

Mr. SMITH of Georgia. I desire to state that the junior Senator from Georgia [Mr. HARDWICK] is detained at his home by sickness.

Mr. GALLINGER. I desire to state that the senior Senator from Pennsylvania [Mr. PENROSE] and the senior Senator from Maine [Mr. BURLEIGH] are likewise detained by sickness.

Mr. HOLLIS, Mr. WALSH, Mr. O'GORMAN, Mr. OLIVER, and Mr. CATRON entered the Chamber and answered to their names.

Mr. KERN. I move the adoption of the following order.

The PRESIDING OFFICER. The Secretary will read the order for the information of the Senate.

The Secretary read as follows:

Ordered, That the Sergeant at Arms be directed to compel the attendance of absent Senators; that warrants for the arrests of all Senators not sick nor excused be issued under the signature of the Presiding Officer and attested by the Secretary, and that such warrants be executed without delay.

Mr. SMOOT. Mr. President——

Mr. JAMES. That is not debatable.

The PRESIDING OFFICER. It is not debatable.

Mr. GALLINGER. Under what rule, Mr. President?

The PRESIDING OFFICER. Rule V provides that—

Whenever upon such roll call it shall be ascertained that a quorum is not present, a majority of the Senators present may direct the Sergeant at Arms to request and, when necessary, to compel the attendance of the absent Senators, which order shall be determined without debate; and pending its execution, and until a quorum shall be present, no debate nor motion, except to adjourn, shall be in order.

Mr. SMOOT. That is true, as far as the rule goes, but there are other requirements in the order which are not in the rule itself, and therefore it becomes debatable.

Mr. JAMES. Not at all.

The PRESIDING OFFICER. The Chair is prepared to rule.

Mr. SMOOT. I am perfectly aware that the Chair is prepared to rule, but if the Chair will permit me——

The PRESIDING OFFICER. The Chair will hear the Senator from Utah for a few minutes.

Mr. SMOOT. I know it would not be debatable if it complied with the rule. The provisions of paragraph 3 are not only included in the order, as this is offered, but there are further provisions in the order which are not mentioned in Rule V, paragraph 3. That being the case, it does seem to me that there is no rule which says it is not debatable, and it must be a debatable question.

The PRESIDING OFFICER. The Chair is prepared to rule. The Chair is satisfied that this body has authority to compel the attendance of absent Members, and all that is needed are warrants and the necessary process to enable the Sergeant at Arms to compel the attendance of absent Members. Consequently, the Chair decides that the order is in pursuance of the rule and is not subject to debate.

Mr. SMOOT. Mr. President, all I was going to say in that connection was that I fully agree with the Chair that the Senate can compel the attendance of a quorum.

Mr. JAMES. I ask for the regular order. The Chair has decided that.

The PRESIDING OFFICER. The regular order is on the decision of the question upon the order offered by the Senator from Indiana [Mr. KERN].

Mr. BRANDEGEE. Mr. President——

Mr. SMOOT. We certainly have not had a quorum, Mr. President, and none has yet been developed.

Mr. JAMES. Regular order!

The PRESIDING OFFICER. The rule does not require a quorum.

Mr. BRANDEGEE. I move that the Senate adjourn, Mr. President.

Mr. SMOOT. I am interested, Mr. President, in having at least a shred of the rules left. We are in the midst of calling the roll.

Mr. JAMES. I ask for the regular order.

The PRESIDING OFFICER. The regular order is the question on the motion of the Senator from Connecticut [Mr. BRANDEGEE] that the Senate do now adjourn. That motion takes precedence of all others.

Mr. BRANDEGEE. On that I demand the yeas and nays.

Mr. GALLINGER. Let us have the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. JAMES (when his name was called). Making the same transfer as heretofore announced, I vote "nay."

Mr. JOHNSON (when his name was called). Making the same transfer as before, I vote "nay."

Mr. OVERMAN (when his name was called). I make the same announcement of my pair and its transfer as previously, and will let that stand for the night. I vote "nay."

Mr. SMITH of Maryland (when his name was called). Making the same announcement of my pair and its transfer as before, I vote "nay."

Mr. WALSH (when his name was called). I think it is apparent that my vote is necessary to make a quorum; and I vote, notwithstanding the absence of my pair. I vote "nay."

Mr. WILLIAMS (when his name was called). Making the same announcement as heretofore, I vote "nay."

The roll call was concluded.

Mr. MYERS. Believing that my vote will be necessary to make a quorum, I vote "nay."

Mr. CHILTON. Making the same announcement as on the former ballot, I vote "nay."

Mr. HOLLIS. I understand a quorum has not voted, and I vote "nay."

The result was announced—yeas 15, nays 37, as follows:

YEAS—15.

Brandegee	Kenyon	Page	Townsend
Bristow	McCumber	Root	Warren
Catron	Nelson	Smith, Mich.	Works
Gallinger	Oliver	Smoot	

NAYS—37.

Ashurst	La Follette	Pomerene	Thomas
Bryan	Lane	Ransdell	Thompson
Chamberlain	Lee, Md.	Reed	Thornton
Chilton	Martin, Va.	Robinson	Vardaman
Fletcher	Martine, N. J.	Sheppard	Walsh
Gore	Myers	Simmons	White
Hollis	O'Gorman	Smith, Ariz.	Williams
James	Overman	Smith, Ga.	
Johnson	Owen	Smith, Md.	
Kern	Pittman	Swanson	

NOT VOTING—44.

Bankhead	Culberson	Lea, Tenn.	Shafroth
Borah	Cummins	Lewis	Sherman
Brady	Dillingham	Lippitt	Shields
Burleigh	du Pont	Lodge	Shively
Burton	Fall	McLean	Smith, S. C.
Camden	Goff	Newlands	Stephenson
Clapp	Gronna	Norris	Sterling
Clark, Wyo.	Hardwick	Penrose	Stone
Clarke, Ark.	Hitchcock	Perkins	Sutherland
Colt	Hughes	Poindexter	Tillman
Crawford	Jones	Saulsbury	Weeks

The PRESIDING OFFICER (Mr. JAMES in the chair). The Senate refuses to adjourn. The question is on agreeing to the order of the Senator from Indiana [Mr. KERN] to compel the attendance of absent Senators. Those in favor of it will say "aye," those opposed "no." The "ayes" have it, and the order is agreed to. The Sergeant at Arms will execute the order. Let the writs be issued.

Mr. SMOOT. Mr. President, I may have been mistaken as to the announcement made by the Chair; but as I remember, the result was—yeas 15, nays 37.

The PRESIDING OFFICER. That is correct—yeas 15, nays 37.

Mr. SMOOT. Then, Mr. President, as there is a quorum present, the order instructing the Sergeant at Arms to bring a quorum to the Senate has been executed, and the Senate is ready to proceed to business. I never have yet seen any other procedure in this body.

Mr. OWEN. Mr. President, under Rule V—

No Senator shall absent himself from the service of the Senate without leave.

Certain Senators are absent without leave, and they ought to be required and compelled to be here and to stay here.

Mr. SMOOT. I hope the order, then, Mr. President, will apply to the Senator from Oklahoma in the future. I certainly know if it had been applied to him in the past he would have been arrested a good many times. But that is not the question, Mr. President.

Mr. OWEN. When I am really needed I am always glad to appear.

Mr. SMOOT. That is not the question, Mr. President. There is a quorum of the Senate present; and there being a quorum present, the Senate ought to proceed.

The PRESIDING OFFICER. The Chair overrules the point of order made by the Senator from Utah, because the Senate, after the presence of a quorum had been disclosed, agreed to the order of the Senator from Indiana to compel the attendance of absent Senators.

Mr. SMOOT. What was the statement of the Chair?

The PRESIDING OFFICER. The Chair overrules the point of order made by the Senator from Utah, for the reason that, after the roll call upon the motion to adjourn, the presence of a quorum being disclosed, the Senate thereupon agreed to the order presented by the Senator from Indiana to compel the attendance of absent Senators.

Mr. SMOOT. Mr. President, I want to say there were only 45 Senators who had answered to that roll call; the result was never announced.

The PRESIDING OFFICER. The Senator from Utah will pardon the Chair a moment. The roll call upon the motion made to adjourn resulted—nays 37, yeas 15. Thereafter the Chair said:

The Senate refuses to adjourn. The question is on the order of the Senator from Indiana [Mr. KERN] to compel the attendance of absent Senators. Those in favor of it will say "aye"; those opposed "no"; the ayes have it, and the order is agreed to.

That is all shown by the record. The Senator from Utah has overlooked the proceedings in the Senate following the time the disclosure of a quorum was made by the record vote.

Mr. SMITH of Arizona. The presence of a quorum being disclosed does not exhaust the order anyhow.

Mr. BRANDEGEE. I demand the regular order.

The PRESIDING OFFICER. The Secretary will read the bill.

Mr. FLETCHER. Mr. President, the regular order is to compel the attendance of absent Senators, is it not?

The PRESIDING OFFICER. The Chair will state to the Senator from Florida that——

Mr. FLETCHER. Mr. President, if I am in order, I move that the amendment offered by the Senator from Massachusetts [Mr. LODGE] be laid on the table.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The question is on the motion of the Senator from Florida that the amendment of the Senator from Massachusetts be laid on the table.

Mr. ROOT. Mr. President——

The PRESIDING OFFICER. Those in favor will say "aye"——

Mr. BRANDEGEE. I demand the yeas and nays.

The PRESIDING OFFICER. Those opposed, "no."

Mr. BRANDEGEE. I demand the yeas and nays.

The PRESIDING OFFICER. The Senator from Connecticut demands the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. JAMES (when his name was called). Making the same transfer as heretofore, I vote "yea."

Mr. JOHNSON (when his name was called). Making the same transfer as before, I vote "yea."

Mr. MYERS (when his name was called). Believing my vote is necessary to make a quorum, I vote "yea."

Mr. SAULSBURY (when his name was called). I transfer my pair with the junior Senator from Rhode Island [Mr. COLT] to the senior Senator from Indiana [Mr. SHIVELY], and vote "yea."

Mr. SMITH of Maryland (when his name was called). Making the same transfer as before, I vote "yea."

Mr. WALSH (when his name was called). I have a general pair with the Senator from Rhode Island [Mr. LIPPITT]. That Senator is absent, but, believing my vote to be necessary to make a quorum, I vote "yea."

Mr. WILLIAMS. Repeating the announcement of my pair and its transfer as on a former roll call, I vote "yea."

The roll call was concluded.

Mr. SIMMONS (after having voted in the affirmative). I wish to make the same announcement of the transfer of my pair as heretofore, and will let my vote stand.

Mr. HOLLIS. In order to make a quorum, I will vote. I vote "yea."

Mr. STONE. I transfer the pair I have with the Senator from Wyoming [Mr. CLARK] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. CHILTON. Making the same announcement of my pair and its transfer as on former ballots, I vote "yea."

The result was announced—yeas 38, nays 16, as follows:

YEAS—38.

Ashurst	Lane	Ransdell	Stone
Bryan	Lee, Md.	Reed	Swanson
Chamberlain	Martin, Va.	Robinson	Thomas
Chilton	Martine, N. J.	Saulsbury	Thompson
Fletcher	Myers	Shafroth	Thornton
Gore	O'Gorman	Sheppard	Walsh
Hollis	Overman	Simmons	White
James	Owen	Smith, Ariz.	Williams
Johnson	Pittman	Smith, Ga.	
Kern	Pomerene	Smith, Md.	

NAYS—16.

Brandegee	Cummins	McCumber	Smoot
Bristow	Gallinger	Oliver	Townsend
Catron	Kenyon	Page	Warren
Clapp	La Follette	Root	Works

NOT VOTING—42.

Bankhead	Dillingham	Lippitt	Shively
Borah	du Pont	Lodge	Smith, Mich.
Brady	Fall	McLean	Smith, S. C.
Burleigh	Goff	Nelson	Stephenson
Burton	Gronna	Newlands	Sterling
Camden	Hardwick	Norris	Sutherland
Clark, Wyo.	Hitchcock	Penrose	Tillman
Clarke, Ark.	Hughes	Perkins	Vardaman
Colt	Jones	Poindexter	Weeks
Crawford	Lea, Tenn.	Sherman	
Culberson	Lewis	Shields	

So Mr. LODGE's amendment was laid on the table.

Mr. FLETCHER and Mr. TOWNSEND addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. FLETCHER. I offer and move the adoption of the substitute which I presented the other day, and ask to have it read.

The PRESIDING OFFICER. The Secretary will read the amendment in the nature of a substitute proposed by the Senator from Florida.

The SECRETARY. It is proposed to strike out all after the enacting clause and insert:

That the United States, acting through the shipping board hereinafter created, may subscribe to the capital stock of a corporation of the District of Columbia. Said corporation shall have for its object the purchase, construction, equipment, maintenance, and operation of merchant vessels to meet the requirements of the foreign commerce of the United States, or to charter vessels for such purposes, and to make charters or leases of any vessel or vessels owned by such corporation to any other corporation, organized under the laws of a State, a majority of the stock being owned by citizens of the United States, firm or individual, citizen or citizens of the United States, to be used for such purposes and shall have power to carry out said objects and purposes: *Provided*, That the terms and conditions of such charter parties shall first be approved by the shipping board, the initial capital stock of which corporation shall not be over $10,000,000, of the par value of $100 per share.

The members of said shipping board, as incorporators, may for the purpose of carrying out the provisions of this act, form a corporation of the District of Columbia, by making and filing a certificate of incorporation, as provided in subchapter 4 of chapter 18 of an act entitled "An act to establish a code of laws for the District of Columbia," approved March 3, 1901.

The corporation so formed, its officers and trustees and stockholders shall possess all the powers conferred and perform all the duties imposed by said subchapter 4, except as the same are by this act limited or qualified.

The powers of said corporation shall be limited to the purposes of this act and to such as are necessarily incident thereto.

Said corporation may sue and be sued in any district court of the United States, and may remove to said courts any cause brought against it in any other court.

Said corporation may require any officer or employee to give security for the faithful performance of his duties.

Persons subscribing to the stock of said company shall pay for the same in full at the time of subscription.

The stock owned by the United States shall be voted by the shipping board or its duly selected representative.

The officers and trustees of said corporation shall be citizens of the United States, but need not be citizens of the District of Columbia. Such officers and trustees shall be subject to removal at any time by vote of a majority of the stockholders at any meeting thereof.

Said corporation and its capital stock shall, so long as the United States owns a majority of said stock, be free from all public taxes.

At no time shall less than 51 per cent of the stock of said corporation be held by the United States, unless the United States shall dispose of all of its stock.

Congress reserves the right to alter, amend, or repeal this act.

SEC. 2. That the United States shall subscribe to 51 per cent of the initial capital stock of such corporation at par and the remainder thereof may be offered for public subscription at not less than par, and the United States may then further subscribe at par for any amount of such stock not taken by public subscription, but the shipping board may cause such corporation to begin business as soon as 51 per cent of such stock has been subscribed and paid for by the United States. The shipping board, with the approval of the President, may consent to or may cause an increase of the capital stock from time to time as the interests of the corporation may require, but without authority of Congress the portion of such increase to be paid for by the United States shall not exceed $10,000,000; neither shall the proportion of stock held by the United States at any time be less than 51 per cent: *Provided*, That a sufficient number of the shares of stock of said corporation shall be set apart for holding by the persons for whom the stock of the United States may be voted as trustees, and such shares shall be issued or transferred to such persons to qualify them as trustees of such corporation, and such shares shall be transferred to the successor or successors of any such person or persons.

SEC. 3. That the United States, through the shipping board and with the approval of the President, is authorized to purchase or construct vessels suitable in the judgment of the shipping board for the purposes of such corporation with a view to transferring them to such corporation, and for this purpose the Secretary of the Treasury, upon the request of the shipping board and the approval of the President, may issue and sell or use for such purchases or construction any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $30,000,000 for the purpose of purchasing and constructing such vessels: *Provided*, That any Panama Canal bonds issued and sold or used under the provisions of this section or other existing authority may be made payable at such time after issue as the Secretary of the Treasury, in his discretion, may deem advisable and fix, instead of 50 years after date of issue, as in said act of August 5, 1909, not exceeding 50 years: *Provided further*, That payments for such purchases or construction from proceeds of sales of bonds, or delivery of bonds in payment thereof, shall be made only as ordered and directed by the shipping board.

SEC. 4. That the shipping board is authorized to transfer the vessels purchased or constructed as herein provided to any such corporation in which the United States has become a stockholder as hereinbefore provided, and such corporation shall issue to the United States in payment thereof its gold bonds, bearing interest at not less than 4 per cent per annum, and upon such further terms and conditions as may be prescribed by the shipping board, such bonds to be secured by a first mortgage lien upon such vessels, severally, thus transferred: *Provided*, That the amount of bonds received by the United States in payment for such vessels shall not be less, at the then par value, than the total amount expended by the United States in the purchase or construction of such vessels, and the same may be sold by the Secretary of the Treasury, in his discretion, and with the approval of the President, to reimburse the Treasury for expenditures made in the purchase or construction of vessels. Such corporation shall make suitable provision for sinking fund and for the depreciation charges under the rules and regulations to be prescribed by such shipping board; and all vessels acquired under this act, or in which the United States shall otherwise be interested as owner, in whole or in part, or upon which the United States shall have or hold any mortgage, pledge, lien, or other security, shall, when and while employed solely as merchant vessels, be in all respects subject to all laws, regulations, and liabilities governing merchant vessels, in like manner and to the same extent as merchant vessels in private ownership when duly registered under the laws of the United States.

All rules and regulations relating to or which affect shipping, navigation, or water-borne commerce of the United States heretofore made or published by authority of law shall only be and remain in force until midnight on the 31st day of December, 1915, and by proclamation of the President shall cease to have any force or validity at any prior date when new shipping rules and regulations shall as provided hereby take the place of those now in existence.

The shipping board herein provided for shall propose such rules and regulations applicable to the shipping and water-borne commerce of the United States in lieu of those now in force and covering matters of like character as they may determine suited to the present needs of such shipping and commerce, which, when approved by the President and published, shall apply and become of full force and effect in lieu of such rules and regulations as are now applicable thereto. In the rules and regulations hereby authorized to be adopted and put into force different classes of shipping, navigation, and water-borne commerce may be appropriately and differently treated and provided for. Such rules and regulations when promulgated may be modified, changed, or amended by the shipping board.

SEC. 5. That vessels purchased or constructed by such shipping board and conveyed to such corporation as herein provided shall be entitled to registry under the laws of the United States, and shall be deemed vessels of the United States and entitled to the benefits and privileges appertaining to such vessels, except such vessels shall engage only in trade with foreign countries or with the Philippine Islands, the Hawaiian Islands, and the islands of Porto Rico, Guam, and Tutuila, provided that the above restrictions shall not apply to such of said vessels as are built in the United States. Such vessels shall be subject to the navigation laws of the United States except as herein provided.

SEC. 6. That the Secretary of the Treasury and the Secretary of Commerce, and three additional members, two of whom shall be of practical experience in the management and operation of steamships in the foreign trade, are hereby constituted a board to be known as the shipping board, with full power, subject to the approval of the President, to vote the stock of the United States in said corporation, either as a body or by one or more of its members duly authorized by a majority, and to do all things necessary, whether specifically enumerated or not, to carry out the purposes of this act and protect the interests of the United States, said three additional members to be appointed by the President, by and with the advice and consent of the Senate. The salary of each of the three additional members of said board so appointed shall be $6,000 per annum.

SEC. 7. That, with the approval of the Congress, such shipping board may at any time sell the stock of such corporation owned by the United States.

SEC. 8. That the President of the United States is hereby authorized to charter, lease, or transfer such naval auxiliaries now belonging to the Naval Establishment of the United States as are suitable for commercial use and which are not required for use in the Navy in time of peace, and vessels belonging to the War Department suitable for commercial uses and not required for military transports in time of peace, and to direct or cause to be chartered, leased, or transferred vessels

now owned and operated by the Panama Railroad Co., to any corporation now or hereafter organized as in this act provided upon such terms and conditions as the shipping board, with the approval of the President of the United States, shall prescribe. The vessels purchased or constructed by the United States through the shipping board, with the approval of the President of the United States, shall be of a type, as far as the commercial requirements of the foreign trade of the United States may permit, suitable for use as naval auxiliaries in the Naval Establishment of the United States.

SEC. 9. That the President of the United States, upon giving to any such corporation in which the United States shall be a stockholder, through its president, vice president, secretary, or manager, notice in writing for such reasonable length of time as in his judgment the circumstances require and will permit of his intention so to do, may take possession, absolutely or temporarily for use as naval auxiliaries, of any vessel or vessels owned or leased by or otherwise in the possession of said corporation, and said corporation shall be entitled to a reasonable price or rental therefor, to be fixed by the shipping board, with the approval of the President: *Provided*, That if in the judgment of the President an emergency exists requiring such action he may take possession of any such vessel or vessels without notice.

SEC. 10. That the shipping board shall make to Congress, at the beginning of each regular session, a report of expenditures and receipts under this act and of the operations of any corporation in which the United States may have become a stockholder hereunder.

SEC. 11. That for the purpose of carrying out the provisions of this act there is hereby appropriated, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $10,000,000, or, in lieu of such appropriation, the Secretary of the Treasury may sell Panama Canal bonds to the amount of $10,000,000 in addition to those provided for in section 3, and on the same terms, and set apart and use the proceeds thereof for such purposes.

Mr. GORE. Mr. President——

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. SWANSON in the chair). The Senator from Oklahoma is recognized. The question is on the amendment offered by the Senator from Florida.

Mr. GORE. On that amendment I call for the yeas and nays.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The Senator from Oklahoma demands the yeas and nays on the amendment offered by the Senator from Florida.

Mr. SMOOT. Mr. President, I move to lay the substitute on the table; and upon that I ask for the yeas and nays.

The PRESIDING OFFICER. The Senator from Oklahoma has asked for the yeas and nays upon the adoption of the amendment offered by the Senator from Florida.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. The first question is, Is the demand for——

Mr. OLIVER. I move to lay it on the table.

Mr. GALLINGER. That will not do.

The PRESIDING OFFICER. Evidently a sufficient number have seconded the demand.

Mr. GALLINGER. Mr. President, pending that motion——

The PRESIDING OFFICER. Pending that the Senator from Utah has been recognized and has moved to lay the amendment on the table.

Mr. SMITH of Michigan. Mr. President, a parliamentary inquiry.

SEVERAL SENATORS. The motion is not debatable.

Mr. SMITH of Michigan. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. SMITH of Michigan. I desire to ask the Chair whether it is now in order to move to amend the substitute by striking out all after the figures "$10,000,000," on page 11?

The PRESIDING OFFICER. The Chair will state——

Mr. SMITH of Michigan. Now, if the Chair will hear me a moment——

The PRESIDING OFFICER. The Chair will hear the Senator from Michigan.

Mr. SMITH of Michigan. I realize that this is an experiment; that to commit this Government to——

Mr. GORE. Mr. President——

Mr. MARTIN of Virginia. Mr. President——

Mr. SMITH of Michigan. I am addressing the Chair.

Mr. MARTIN of Virginia. I raise the point of order that a motion to lay on the table is not debatable, and the Senator is not in order.

Mr. SMITH of Michigan. I am confining myself to the parliamentary question.

Mr. MARTIN of Virginia. The parliamentary question is not debatable. There has been a motion to lay the amendment on the table, and it is not debatable.

Mr. SMITH of Michigan. Oh, no, Mr. President; the Chair indicated his willingness to hear me.

Mr. MARTIN of Virginia. I ask the Chair to enforce the rule. The motion is not debatable. The Senator is out of order.

Mr. SMITH of Michigan. One moment.

Mr. MARTIN of Virginia. Not "one moment" at all. I ask that the point of order be disposed of.

Mr. SMITH of Michigan. The Chair indicated his willingness to hear the Senator from Michigan.

Mr. MARTIN of Virginia. I am not willing to countenance a violation of the rules. I ask the Chair to enforce the rule. The Senator is not in order.

Mr. SMITH of Michigan. I think the Chair will hear me make my point.

The PRESIDING OFFICER. The Senate will be in order. Does the Senator wish to make a point of order against the motion to lay on the table?

Mr. SMITH of Michigan. I desire to make a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the parliamentary inquiry.

Mr. SMITH of Michigan. I desire to know whether it is now in order to move to amend the substitute.

The PRESIDING OFFICER. It is not now in order, because a motion to lay on the table has been made by the Senator from Utah. It is not in order until that motion is disposed of.

SEVERAL SENATORS. Question!

The PRESIDING OFFICER. The question is——

Mr. SMITH of Michigan. Mr. President——

Mr. MARTIN of Virginia. The question is not debatable.

The PRESIDING OFFICER. The question is on the motion of the Senator from Utah to lay on the table the substitute offered by the Senator from Florida.

Mr. BRANDEGEE. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). Making the same announcement as to my pair and its transfer, I vote "nay."

Mr. JAMES (when his name was called). I make the same transfer as before, and I vote "nay."

Mr. JOHNSON (when his name was called). Announcing the same transfer, I vote "nay."

Mr. MYERS (when his name was called). Believing that my vote is necessary to make a quorum, I vote "nay."

Mr. SAULSBURY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. SMITH of Maryland (when his name was called). Transferring my pair as before, I vote "nay."

Mr. STONE (when his name was called). I will ask if the Senator from Nebraska [Mr. HITCHCOCK] has voted.

The PRESIDING OFFICER. He has not voted.

Mr. STONE. Announcing the same transfer as on the last roll call, I vote "nay."

Mr. WILLIAMS (when his name was called). I vote "nay," repeating the same announcement.

The roll call was concluded.

Mr. HOLLIS. Understanding that a quorum has not voted, I will vote. I vote "nay."

Mr. STONE. The Senator from Nebraska [Mr. HITCHCOCK] having come in since I voted, or at least being made aware of his presence since, I withdraw my vote, having a pair with the Senator from Wyoming [Mr. CLARK], and ask the Chair to count me present.

Mr. JOHNSON. I withdraw the announcement of my transfer and allow my vote to stand as necessary to make a quorum.

Mr. WALSH. I inquire if a quorum has voted.

The PRESIDING OFFICER. It has not been customary for the Chair to announce whether a quorum has or has not voted. It is impossible for the Chair to ascertain the result until the call has been completed.

Mr. WALSH. I have a general pair with the Senator from Rhode Island [Mr. LIPPITT]. The terms of my pair entitle me to vote when my vote is necessary to make a quorum. I am not advised whether it will be necessary or not. It appears to me that it will be, and so I will vote. If it appears by the result that my vote is not necessary it is my purpose to withdraw it. I vote "nay."

The result was announced—yeas 14, nays 40, as follows:

YEAS—14.

Brandegee	Gallinger	Smith, Mich.	Warren
Bristow	McCumber	Smoot	Works
Clapp	Page	Townsend	
Cummins	Root	Vardaman	

NAYS—40.

Ashurst	Hitchcock	La Follette	O'Gorman
Bryan	Hollis	Lane	Overman
Chamberlain	James	Lee, Md.	Owen
Chilton	Johnson	Martin, Va.	Pittman
Fletcher	Kenyon	Martine, N. J.	Pomerene
Gore	Kern	Myers	Ransdell

Reed	Sheppard	Smith, Md.	Thornton
Robinson	Simmons	Swanson	Walsh
Saulsbury	Smith, Ariz.	Thomas	White
Shafroth	Smith, Ga.	Thompson	Williams

NOT VOTING—42.

Bankhead	Culberson	Lippitt	Shields
Borah	Dillingham	Lodge	Shively
Brady	du Pont	McLean	Smith, S. C.
Burleigh	Fall	Nelson	Stephenson
Burton	Goff	Newlands	Sterling
Camden	Gronna	Norris	Stone
Catron	Hardwick	Oliver	Sutherland
Clark, Wyo.	Hughes	Penrose	Tillman
Clarke, Ark.	Jones	Perkins	Weeks
Colt	Lea, Tenn.	Poindexter	
Crawford	Lewis	Sherman	

So the Senate refused to lay Mr. FLETCHER's substitute on the table.

Mr. WALSH. I ask unanimous consent that leave be granted me to withdraw my vote on the last roll call.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the vote of the Senator from Montana will be withdrawn.

Mr. GALLINGER. In accordance with a proposition on my part to offer an amendment to the original bill, I offer the following.

The PRESIDING OFFICER. Does the Senator from New Hampshire offer it as an amendment to the substitute offered by the Senator from Florida?

Mr. GALLINGER. I offer it under Rule XVIII, as an amendment proposed to perfect the original text, which has precedence over the motion to strike out and insert under Rule XVIII.

The PRESIDING OFFICER. The amendment of the Senator from New Hampshire will be received.

Mr. GALLINGER. Let it be read.

The PRESIDING OFFICER. It will be read.

The SECRETARY. Add a new section at the end of the original bill, as follows:

SEC. —. That all ships purchased, chartered, or leased under the provisions of this act, if not constructed with particular reference to prompt and economical conversion into auxiliary naval cruisers, shall be so changed before being put into the service in accordance with plans and specifications prepared by the Secretary of the Navy, and they shall be made of sufficient strength and stability to carry and sustain the working and operation of at least four effective rifled cannon of a caliber of not less than 6 inches, and shall be of the highest rating known to maritime commerce. Before being accepted for service they shall be thoroughly inspected by a competent naval officer or constructor detailed by the Secretary of the Navy, and such officer shall report in writing to the Secretary of the Navy, who shall transmit said report to the President; and no such vessels not approved by the Secretary of the Navy as suitable for the service required shall be purchased, chartered, or leased by the Government.

Mr. FLETCHER. I move to lay the amendment on the table.

Mr. GALLINGER. I ask for the yeas and nays.

Mr. STONE. Before that is done I desire to make a point of order, and before making the point——

The PRESIDING OFFICER. The Senator from Missouri will state his point of order.

Mr. STONE. I desire to inquire whether the yeas and nays have not been ordered already on the main question.

The PRESIDING OFFICER. The Chair understands that the yeas and nays have been ordered on the substitute offered by the Senator from Florida.

Mr. STONE. On that state of fact, I make the point of order that while the pending question is still open to discussion at this stage an amendment is not in order.

The PRESIDING OFFICER. If the Chair is mistaken, he would be very glad to hear any Senator who dissents from the decision of the Chair, but the Chair is satisfied that no amendment to the substitute offered by the Senator from Florida is in order until the yea-and-nay vote has been taken. However, the Chair understands that the amendment offered by the Senator from New Hampshire is to perfect the original text, which would be voted on prior to the substitute offered by the Senator from Florida, under Rule XVIII, and it being the general parliamentary law that the original text must be perfected before a substitute is voted on. The ordering of the yeas and nays will prevent any amendment being offered to the substitute offered by the Senator from Florida.

Mr. STONE. Then, Mr. President——

The PRESIDING OFFICER. The Chair does not think that precludes perfecting the original text, but the Chair would be glad to hear any authorities contrary to that decision.

Mr. STONE. I propose now, if the Chair will recognize me, to move to lay the amendment on the table.

The PRESIDING OFFICER. The Senator from Florida [Mr. FLETCHER] had previously made that motion.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The yeas and nays have been called for. Is there a second?

The yeas and nays were ordered.

Mr. SMOOT. Mr. President, Rule XVIII——

Mr. MARTIN of Virginia. It is not debatable.

Mr. SMOOT. I wish to call the attention of the Chair to Rule XVIII. Under Rule XVIII not only can we perfect the original bill, but we can perfect the substitute. I hope there will be no decision to set that aside.

The rule is so plain that anyone can understand it. It has been held in this body always that not only can the original bill be perfected, but the substitute can be perfected.

The PRESIDING OFFICER. The Senator will permit the Chair to read the second clause of Rule XXI, which is as follows:

Any motion or resolution may be withdrawn or modified by the mover at any time before a decision, amendment, or ordering of the yeas and nays, except a motion to reconsider, which shall not be withdrawn without leave.

Mr. SMOOT. The mover of this substitute has not asked to withdraw it; he has not asked to perfect it, but under Rule XVIII——

The PRESIDING OFFICER. The Chair is willing to hear any decision to the contrary, but the Chair is of opinion that if the yeas and nays have been ordered on a proposition if it is modified the yeas and nays would have been ordered on a different proposition if an amendment were made. If the mover of a resolution, under the rules of the Senate, can not modify it after the yeas and nays are ordered, it would seem to the Chair that any proposition upon which the yeas and nays have been ordered would be of equal dignity.

Mr. GALLINGER. I think I have a right to ask that the rule be read, which I now do. The rule has been understood and never departed from in 24 years to my knowledge. If we are to have the rules revolutionized, we ought to know what they are.

Mr. FLETCHER. I make the point of order that there is nothing pending here.

The PRESIDING OFFICER. The motion now is simply to lay on the table the amendment of the Senator from New Hampshire. There will be ample time to look at that point of order when raised. Upon that question the yeas and nays have been ordered and the Secretary will call the roll.

Mr. SMOOT. What is the question?

The PRESIDING OFFICER. The question is to lay on the table the amendment offered by the Senator from New Hampshire. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). Making the same announcement as on former votes, I vote "yea."

Mr. JAMES (when his name was called). Making the same transfer as heretofore, I vote "yea."

Mr. SMITH of Maryland (when his name was called). Transferring my pair as heretofore announced, I vote "yea."

Mr. STONE (when his name was called). I have a general pair with the Senator from Wyoming [Mr. CLARK], as I have heretofore announced. Not being able to secure a transfer, I withhold my vote, and ask to be counted for a quorum.

Mr. WILLIAMS (when his name was called). Making the same announcement as heretofore, I vote "yea."

The roll call was concluded.

Mr. JOHNSON. I announce my pair with the junior Senator from North Dakota [Mr. GRONNA]. In his absence I withhold my vote.

Mr. WALSH. I have a general pair with the Senator from Rhode Island [Mr. LIPPITT.] Observing that he is not in the Chamber, I accordingly withhold my vote.

The result was announced—yeas 37, nays 15, as follows:

YEAS—37.

Ashurst	Lane	Ransdell	Swanson
Bryan	Lee, Md.	Reed	Thomas
Chamberlain	Martin, Va.	Robinson	Thompson
Chilton	Martine, N. J.	Saulsbury	Thornton
Fletcher	Myers	Shafroth	Vardaman
Gore	O'Gorman	Sheppard	White
Hitchcock	Overman	Simmons	Williams
James	Owen	Smith, Ariz.	
Kern	Pittman	Smith, Ga.	
La Follette	Pomerene	Smith, Md.	

NAYS—15.

Brandegee	Kenyon	Page	Townsend
Clapp	McCumber	Root	Warren
Cummins	McLean	Smith, Mich.	Works
Gallinger	Oliver	Smoot	

NOT VOTING—44.

Bankhead	Catron	du Pont	Johnson
Borah	Clark, Wyo.	Fall	Jones
Brady	Clarke, Ark.	Goff	Lea, Tenn.
Bristow	Colt	Gronna	Lewis
Burleigh	Crawford	Hardwick	Lippitt
Burton	Culberson	Hollis	Lodge
Camden	Dillingham	Hughes	Nelson

Newlands	Poindexter	Smith, S. C.	Sutherland
Norris	Sherman	Stephenson	Tillman
Penrose	Shields	Sterling	Walsh
Perkins	Shively	Stone	Weeks

So Mr. FLETCHER's motion to lay Mr. GALLINGER's amendment on the table was agreed to.

Mr. GALLINGER. Mr. President, I submit another amendment, for the purpose of perfecting the text of the original bill, and ask that it be read.

The PRESIDING OFFICER. The Senator from New Hampshire submits an amendment, which will be stated by the Secretary.

The SECRETARY. It is proposed to add, at the end of the original bill, the following:

SEC. —. That the ships purchased, chartered, or leased under the provisions of this act shall be officered by American citizens in conformity with existing laws, and the crew shall be composed of at least one-half citizens of the United States.

Mr. FLETCHER. I move to lay the amendment on the table.

Mr. GALLINGER. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I make the same announcement as to my pair and its transfer as heretofore and vote "yea."

Mr. JAMES (when his name was called). Making the same announcement as to the transfer of my pair as heretofore, I vote "yea."

Mr. JOHNSON (when his name was called). I announce my pair with the junior Senator from North Dakota [Mr. GRONNA] and in his absence I withhold my vote.

Mr. SMITH of Maryland (when his name was called). Making the same transfer of my pair as before, I vote "yea."

Mr. STONE (when his name was called). Repeating the announcement made on the last roll call, I withhold my vote, asking, if necessary, to be counted for a quorum.

Mr. WILLIAMS (when his name was called). Making the same announcement as heretofore, I vote "yea."

The roll call was concluded.

Mr. SAULSBURY (after having voted in the affirmative). I voted inadvertently, without announcing the transfer of my pair to the senior Senator from Indiana [Mr. KERN]. I desire to make that announcement and to state that the transfer holds good until changed.

Mr. HOLLIS. In order to make a quorum I vote. I vote "yea."

The result was announced—yeas 35, nays 18, as follows:

YEAS—35.

Ashurst	Lee, Md.	Ransdell	Smith, Md.
Bryan	Martin, Va.	Reed	Swanson
Chamberlain	Martine, N. J.	Robinson	Thomas
Chilton	Myers	Saulsbury	Thompson
Fletcher	O'Gorman	Shafroth	Thornton
Gore	Overman	Sheppard	Walsh
Hollis	Owen	Simmons	White
James	Pittman	Smith, Ariz.	Williams
Kern	Pomerene	Smith, Ga.	

NAYS—18.

Brandegee	Kenyon	Oliver	Vardaman
Bristow	La Follette	Page	Warren
Clapp	Lane	Root	Works
Cummins	Lippitt	Stephenson	
Gallinger	McCumber	Townsend	

NOT VOTING—43.

Bankhead	Culberson	Lea, Tenn.	Shields
Borah	Dillingham	Lewis	Shively
Brady	du Pont	Lodge	Smith, Mich.
Burleigh	Fall	McLean	Smith, S. C.
Burton	Goff	Nelson	Smoot
Camden	Gronna	Newlands	Sterling
Catron	Hardwick	Norris	Stone
Clark, Wyo.	Hitchcock	Penrose	Sutherland
Clarke, Ark.	Hughes	Perkins	Tillman
Colt	Johnson	Poindexter	Weeks
Crawford	Jones	Sherman	

So Mr. FLETCHER's motion to lay Mr. GALLINGER's amendment on the table was agreed to.

Mr. GALLINGER. Mr. President, having made a substantial gain on the last vote, I offer another amendment by way of perfecting the text of the original bill.

The PRESIDING OFFICER. The Secretary will state the amendment for the information of the Senate.

The SECRETARY. It is proposed to add at the end of the text of the original bill the following:

SEC. —. That each said vessel shall take as cadets or apprentices one American-born boy under 21 years of age for each 1,000 tons gross register, and one for each majority fraction thereof, who shall be educated in the duties of seamanship, rank as petty officers, and receive such pay for their services as may be reasonable.

Mr. FLETCHER. I move to lay the amendment on the table.

Mr. GALLINGER. I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. HOLLIS in the chair). The Senator from Florida moves that the amendment of the Senator from New Hampshire be laid on the table, on which motion the Senator from New Hampshire asks for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). Making the same announcement as to my pair and its transfer as I previously made, I vote "yea."

Mr. JAMES (when his name was called). Making the same transfer of my pair as heretofore, I vote "yea."

Mr. JOHNSON (when his name was called). I announce my pair with the junior Senator from North Dakota [Mr. GRONNA] and withhold my vote.

Mr. SMITH of Maryland (when his name was called). Making the same announcement as to the transfer of my pair as heretofore, I vote "yea."

The roll call was concluded.

Mr. HOLLIS. I announce my pair with the junior Senator from Maine [Mr. BURLEIGH] and withhold my vote.

The result was announced—yeas 35, nays 17, as follows:

YEAS—35.

Ashurst	Lee, Md.	Ransdell	Smith, Md.
Bryan	Martin, Va.	Reed	Swanson
Chamberlain	Martine, N. J.	Robinson	Thomas
Chilton	Myers	Saulsbury	Thompson
Fletcher	O'Gorman	Shafroth	Thornton
Gore	Overman	Sheppard	Walsh
Hitchcock	Owen	Simmons	White
James	Pittman	Smith, Ariz.	Williams
Kern	Pomerene	Smith, Ga.	

NAYS—17.

Bristow	La Follette	Page	Warren
Clapp	Lane	Root	Works
Cummins	Lippitt	Smoot	
Gallinger	McCumber	Stephenson	
Kenyon	Oliver	Townsend	

NOT VOTING—44.

Bankhead	Crawford	Jones	Sherman
Borah	Culberson	Lea, Tenn.	Shields
Brady	Dillingham	Lewis	Shively
Brandegee	du Pont	Lodge	Smith, Mich.
Burleigh	Fall	McLean	Smith, S. C.
Burton	Goff	Nelson	Sterling
Camden	Gronna	Newlands	Stone
Catron	Hardwick	Norris	Sutherland
Clark, Wyo.	Hollis	Penrose	Tillman
Clarke, Ark.	Hughes	Perkins	Vardaman
Colt	Johnson	Poindexter	Weeks

So Mr. FLETCHER's motion to lay Mr. GALLINGER's amendment on the table was agreed to.

Mr. GALLINGER. Mr. President, I have been requested to announce that there are certain Senators who have planned to debate this bill, but they are unable to do so to-day, but will be ready to do so to-morrow; and there are likewise some here who are not ready to proceed to-day.

I offer, as a substitute, the amendment to the original text, which I send to the desk.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. It is proposed to strike out all after the enacting clause, and to insert in lieu thereof the following:

That the Postmaster General is hereby authorized to pay for ocean mail service, under the act of March 3, 1891, in vessels of the second class on routes to South America, south of the Equator, to the Philippines, to Japan, to China, and to Australasia, at a rate not exceeding $4 per mile on the outward voyage by the shortest practicable routes, and in vessels of the third class on said routes at a rate not exceeding $2 per mile on the outward voyage by the shortest practicable routes: *Provided*, That, subject to the foregoing provisions, every contract hereunder shall be awarded to that responsible bidder who will contract, under penalties prescribed by the Postmaster General, for the highest running speed between the points named in the contract.

Mr. FLETCHER. Mr. President, I move to lay the amendment on the table.

Mr. GALLINGER. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I make the same announcement as before, and vote "yea."

Mr. HOLLIS (when his name was called). I announce my pair as before.

Mr. JAMES (when his name was called). Making the same transfer as heretofore, I vote "yea."

Mr. SMITH of Maryland (when his name was called). I make the same transfer as before, and vote "yea."

Mr. STONE (when his name was called). Making the same announcement as formerly, I withhold my vote.

The roll call was concluded.

Mr. JOHNSON. I announce my pair with the junior Senator from North Dakota [Mr. GRONNA] and withhold my vote.

The result was announced—yeas 39, nays 15, as follows:

YEAS—39.

Ashurst	Kern	Pittman	Smith, Ga.
Bryan	La Follette	Pomerene	Smith, Md.
Chamberlain	Lane	Ransdell	Swanson
Chilton	Lee, Md.	Reed	Thomas
Cummins	Martin, Va.	Robinson	Thompson
Fletcher	Martine, N. J.	Saulsbury	Thornton
Gore	Myers	Shafroth	Walsh
Hitchcock	O'Gorman	Sheppard	White
James	Overman	Simmons	Williams
Kenyon	Owen	Smith, Ariz.	

NAYS—15.

Brandegee	Lippitt	Page	Townsend
Bristow	Lodge	Root	Warren
Clapp	McCumber	Smoot	Works
Gallinger	McLean	Stephenson	

NOT VOTING—42.

Bankhead	Culberson	Lea, Tenn.	Shively
Borah	Dillingham	Lewis	Smith, Mich.
Brady	du Pont	Nelson	Smith, S. C.
Burleigh	Fall	Newlands	Sterling
Burton	Goff	Norris	Stone
Camden	Gronna	Oliver	Sutherland
Catron	Hardwick	Penrose	Tillman
Clark, Wyo.	Hollis	Perkins	Vardaman
Clarke, Ark.	Hughes	Poindexter	Weeks
Colt	Johnson	Sherman	
Crawford	Jones	Shields	

So Mr. GALLINGER's amendment was laid on the table.

Mr. SMOOT. Mr. President, as a servant of the American people, I feel it my duty to do everything in my power to defeat the pending bill. It is undemocratic, unrepublican, un-American, vicious in its provisions, and will be dangerous and mischievous if it ever becomes a law.

From a political standpoint, Mr. President, and if that were all I had in mind, I would not oppose this measure. I would let the Democratic Party pass it, for I know that if it does become a law scandals will follow, there will be charges of a serious character made against the party responsible for its passage, there will be no doubt acts on the part of certain corporations and individuals that will demand investigation and will bring discredit to the Democratic Party and our country, and perhaps will involve the Nation in foreign complications.

I know what the program is, I think. I have been told by Senators upon that side of the Chamber that no matter what the rules of this body may be, this bill is going to be crowded through and will be in the House of Representatives by to-morrow night. If this statement be true, I want to say to my Democratic friends now that I will, to save the honor and dignity of the Senate, vote to expunge every high-handed ruling that has been made this night contrary to the rules of this body. They are no credit to the majority of the Senate. They are no credit to the Democratic Party. I want to say that the time will come when Senators will, no doubt, reflect most earnestly on their action of to-night, and it will be with no pride, but will be with humiliation.

Mr. JAMES. Mr. President, I should like to ask the Senator a question.

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Kentucky?

Mr. SMOOT. I do; for a question only.

Mr. JAMES. Certainly. While the Senator is engaged in the business of expunging, how would it suit him to expunge the disorderly and unseemly conduct of the Republican side in filibustering to-night?

Mr. SMOOT. Mr. President, we do not have to go very far back to point to a filibuster that was conducted upon that side of the Chamber. I remember two years ago, just about this time of the year, when the President of the United States was sending nominations to the Senate for positions that were vacant in the service of the United States, a Democratic filibuster was organized. The whole country knows what took place in executive sessions. Every day the newspapers of this country gave an account of exactly what transpired behind those closed doors, and there is not a man nor a woman in the United States but knows that there was a filibuster upon the part of the Democratic Party preventing the confirmation of the nominations that were sent to this body.

Why, talk of filibustering! The filibusters have always been upon the Democratic side of the Chamber, and I have no words of denunciation nor words of criticism so bitter as those that have been uttered by men upon that side of the Chamber when legislation was before this body for consideration that the Democratic Party undertook to filibuster against.

Mr. JAMES. Mr. President, I should like to ask the Senator a question.

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Kentucky?

Mr. SMOOT. For a question.

Mr. JAMES. Does the Senator see no difference between a filibuster to prevent a Republican President from appointing officials that were properly subject to appointment by an incoming Democratic President and a filibuster by Republicans in order to prevent the shippers and farmers and manufacturers of this Nation from having bottoms in which to ship their products to people abroad?

Mr. SMOOT. Oh, Mr. President, the Senator forgets that the situation to-day is exactly as it was two years ago. An election has occurred recently. The people of this country have spoken, as the Senator from Kentucky so often said two years ago. The Senators on that side of the Chamber urged two years ago that the people had spoken, and that nothing should be done after the election until a new Congress was in session, and that those who had been elected should have the right to all political positions that might occur after the election and not after March 4, 1912, after the Democratic President's inauguration.

Mr. JAMES. Mr. President, will the Senator yield to me?

Mr. SMOOT. Not only that, Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah further yield to the Senator from Kentucky?

Mr. SMOOT. If the Senator will wait until I get through answering his first question, I will gladly yield to him.

Mr. JAMES. Certainly.

Mr. SMOOT. Mr. President, I say to the Senator from Kentucky now that the people have spoken in the last election. Neither the President of the United States, the Senator from Kentucky, nor any other Senator on that side of the Chamber, if they thought this bill could pass in the next House of Representatives, would be so insistent upon action at this time. I say the reason why they are trying to force action now is because they are fearful that such a wicked measure can not pass through the next House of Representatives, and the program is to jam it through to-night. The rules of this body are to be set aside, the steam roller is to be put in motion, and the precedents of this body are to be thrown aside and trampled under foot for the purpose of passing this measure.

Mr. JAMES. Mr. President, I want to say to the Senator from Utah that being a member of the Democratic Party, I should not undertake——

Mr. SMOOT. I yield to the Senator for a question.

Mr. JAMES. That is all I am asking. This is merely a prelude.

Mr. SMOOT. I do not yield to the Senator from Kentucky to take me off my feet, which I know he would do very gladly.

Mr. JAMES. I will not take the Senator off his feet at all, but I merely——

Mr. SMOOT. I do not propose that the Senator shall.

Mr. JAMES. I wish merely to suggest that it comes with bad grace to talk of steam-roller tactics by the party that steam-rollered out of the nomination for the Presidency, admitted by all men, Theodore Roosevelt at Chicago. I want to suggest further to the Senator from Utah that while he states the people have spoken, that is true, and they have given control to the Democratic Party in both Houses of Congress, and increased our control at this end of the Capitol.

Mr. SMOOT. Yes; and, Mr. President——

Mr. JAMES. The Senator states that we ought to wait. Wait for what? The shippers and the manufacturers and the people of this country who are interested in the sale of their products ought to wait to do what? Wait until next December before they can ship their products abroad that are rotting to-day upon the docks, or they are paying confiscatory charges to a ship monopoly that your party has been willing to give a subsidy to for all these years; and to-night you are filibustering for the purpose of continuing this loot that these men are taking from the wheat growers and the cotton growers and the tobacco growers and the manufacturers of this Nation. Yet you turn upon the Democratic side and say because we want to legislate by the will of the majority we are filibustering.

Mr. GALLINGER. Will the Senator from Utah yield to me?

Mr. JAMES. I am perfectly willing the Senator from New Hampshire should undertake to answer.

Mr. GALLINGER. Will the Senator yield for a question?

Mr. SMOOT. I will yield to the Senator for a question and then, if I can remember what this stump speech and political harangue of the Senator from Kentucky was, after I answer the question of the Senator of New Hampshire, I will try to reply.

Mr. GALLINGER. I simply want to ask the Senator from Utah if he is not frightened? [Laughter.]

The PRESIDING OFFICER. The Senator from Utah has the floor and the Senate will be in order.

Mr. SMOOT. I would perhaps have been frightened if a similar action had not happened so often in this Chamber by

the same Senator. Therefore, there is nothing to frighten me. Since the actions taken already to-night I certainly shall not be alarmed at anything which may take place.

The Senator from Kentucky was asking about the steam roller at Chicago and his solicitude for President Roosevelt. It makes me almost weep to witness his concern in both. I can hardly express in words my admiration for his love for Roosevelt. He ought to love him, because Woodrow Wilson would never have been President of the United States if it had not been for Theodore Roosevelt, and I want to say to the Senator from Kentucky——

Mr. JAMES. Mr. President——

Mr. SMOOT. Just let me answer one question of the Senator at a time, if the Senator please, and then I will yield willingly to him again.

Mr. JAMES. I will be delighted.

Mr. SMOOT. Very graciously I will yield. The Senator may feel that the steam roller was used at Chicago.

Mr. JAMES. Undoubtedly.

Mr. SMOOT. Yes; that is what the Senator said.

Mr. JAMES. That is the conviction of everybody.

Mr. SMOOT. Of everybody the Senator may have in mind.

Mr. JAMES. Roosevelt admits that himself.

Mr. SMOOT. But, Mr. President, I want to say to the Senator, if he will allow me to proceed, that the steam roller at Chicago, if there was such a thing, is a mere toy compared with the steam roller the Senator and his party associates have put in force here to-night. The Senator from Kentucky a few years ago had much to say about the great big stick of Theodore Roosevelt, but——

Mr. JAMES. Mr. President, that I must deny. I have always had genuine affection for Theodore Roosevelt.

Mr. GALLINGER. Mr. President, I rise to a question of order. The Senator from Kentucky is violating the rules of the Senate, and I call him to order.

Mr. JAMES. The Senator from New Hampshire need not be the guardian of the Senator from Utah. He is, I hope, perfectly competent to take care of himself.

Mr. GALLINGER. I make the point of order that the Senator from Kentucky is out of order.

Mr. JAMES. What I was saying——

The PRESIDING OFFICER. The Senator from Utah has the floor. Does the Senator from Utah yield to the Senator from Kentucky?

Mr. SMOOT. I do not yield. I am going to be the peacemaker.

Mr. JAMES. If the Senator from Utah will permit me, I resent the imputation that the Senator has cast upon me.

Mr. SMOOT. No; I am going to be the peacemaker.

The PRESIDING OFFICER. The Senator from Utah has the floor and does not yield the floor.

Mr. JAMES. The point of order I desire to submit is whether the Senator can cast an aspersion upon a Democratic Senator, like myself, by saying I have been the bitter enemy of Theodore Roosevelt when I have always been a warm personal friend of that great citizen and have bitterly resented his being robbed of a nomination at Chicago.

The PRESIDING OFFICER. The Senator rose for a question. The Senator from Utah is entitled to the floor.

Mr. SMOOT. The Senator from Utah has the floor, and the present occupant of the chair can not take me off until I get ready to yield the floor. There are some things which can not be done, and that is one of them.

Mr. REED. Mr. President, the Senator can not accomplish that by merely standing upon the floor. He must speak.

The PRESIDING OFFICER. The Senator from Utah is entitled to the floor and has done nothing to prevent him from occupying the floor. The Senator from Utah will proceed.

Mr. SMOOT. The Senator from Missouri is rather facetious. I remember that not long ago the Senator stood on the floor for hours and he was interrupted and no one made a point of order against him.

Mr. REED. Mr. President——

Mr. SMOOT. I have not the least objection at all to what the Senator from Missouri says, and I have no objection whatever to the Senator interrupting me for a question, but as long as I am allowed to speak here to-night I prefer to go on, because I have mapped out work that may take me at least a half an hour to conclude.

Mr. REED. Mr. President, I will not interrupt the Senator.

Mr. SMOOT. The Senator from Kentucky [Mr. JAMES] was bemoaning the fact that they can not transport the wheat of this country to foreign lands because there are no bottoms to carry it. Mr. President, if only wheat had been involved in this question you would never have had such a bill as this before this body. The only question that brings it here is the question of cotton and tobacco. That is why the bill is here, and that is why the Senator from Kentucky is favoring it. There was just as much wheat and more, too, to transport while we were trying to establish a merchant marine in the year 1901 and on many other occasions when bills have been introduced in the Senate and have passed this body and lacked but a few votes of passing the House. The solicitation of the Senator from Kentucky for wheat is not even secondary.

I was looking over the CONGRESSIONAL RECORD to-day, and what I have heard said in the past so often whenever there was a ship-subsidy bill before this body I call to the attention of the Senate now.

On February 6, 1901, the Republican Members of this body tried to pass a bill creating a merchant marine, and in this debate we have heard Senators upon that side of the Chamber quote remarks made by the Republican Senators in that discussion in support of the present bill, but every Democrat voted against the establishment of a merchant marine in 1901. Cotton was not involved then. What did the then Senator from Arkansas, Mr. Jones, when the Republicans were trying to hold sessions from 12 o'clock until 8 to pass the bill, complain of? He said:

> We believe on this side of the Senate Chamber that it is our duty to stand up for our right of free speech, for our right to discuss important measures, for our right to be heard as against bills that we believe to be iniquitous and outrageous. We are willing to meet here at any hour in the morning.
>
> I believe we meet at an unreasonably early hour now.
>
> Eleven o'clock—
>
> but I am willing to come here in the morning at any reasonable hour and to stay here through all reasonable hours, through unreasonable hours, for the purpose of taking up and passing the appropriation bills, for the purpose of taking up and considering any measure relating to the policy toward the Philippines and to Cuba. I am willing to come here and to give all the time necessary for the discussion of any measure in which the public has a legitimate interest or where the legitimate interest of the public is properly looked after.
>
> But, Mr. President, speaking for myself, and, I believe, speaking for those who sit on this side of the Chamber, I will not, so help me high Heaven, ever be a party, directly or indirectly, to this effort to throttle free speech. And we put you on notice now that if you propose to have these sessions you must furnish the quorum; you must have it here; you must keep it here in the Senate Chamber every minute of the time.
>
> Mr. GORE. Mr. President——
>
> Mr. SMOOT (reading)—
>
> It will not do to have your Senators in the cloakroom or in committee rooms or at their private houses.
>
> The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Oklahoma?
>
> Mr. SMOOT. No; I do not yield.
>
> Mr. GORE. I desire to say——
>
> Mr. SMOOT. No; I do not yield.
>
> Mr. GORE. I wish to ask a question.
>
> The PRESIDING OFFICER. The Senator from Utah refuses to yield.
>
> Mr. GORE. I think the Senator proceeded——
>
> Mr. GALLINGER. I call for the regular order.
>
> Mr. GORE. I wish to ask a question.
>
> The PRESIDING OFFICER. The regular order is called for. The Senator from Utah refuses to yield.
>
> Mr. GORE. The Senator from Utah said he would yield for a question.
>
> Mr. GALLINGER. I ask for the regular order.
>
> The PRESIDING OFFICER. The Senator from Oklahoma is not in order if the Senator from Utah refuses to yield.
>
> Mr. SMOOT (reading)—
>
> It will not do to have your Senators in the cloakroom or in the committee rooms or at their private houses. It will not do to have you come here and answer, now and then, that you are here. You must have a quorum present, and have it all the time, as we do not propose to contribute in any way to bringing about what we believe to be an outrageous, tyrannical effort to suppress free speech by brute force. [Applause in the galleries.]

Mr. President, I have followed that debate all the way through, and the same motions made by the Republican Party to-night were made in that debate by Democrats; but, thank God, the rules of the Senate and the rights of the minority were respected by the Presiding Officer.

Senators, if I did not believe that the passage of this bill would be the entering wedge to further vicious legislation of the same kind, I never would take interest enough in it to discuss the question long before the Senate. But let me warn you, Senators, if you pass this measure and it becomes a law, before it is repealed the people of the United States will have become so disgusted with it and the evil results coming from it that they will rue the day that there was ever a Democratic Party in power.

Mr. SMITH of Arizona. Then let us vote on it.

Mr. SMOOT. I would do as the Senator from Arizona says if politics alone were involved. I would let you vote on it. But I say, Mr. President, that the American people look at this thing not from a political point of view, but they expect, if I am not mistaken, that the Senators who represent ideas contrary to the ideas expressed in this bill to do their utmost to defeat such legislation.

There is no pleasure to the Republican Members of this body in trying to defeat the measure. There is no pleasure, Mr. President, in talking night after night and day after day and being forced by brute force, as referred to by the then Senator from Arkansas in 1901, to discuss this question. But it is of vital interest to the American people. I do not believe that the American people want to adopt socialism yet, and from what I have heard Senators say there is a great majority of this body who do not believe in the measure. The only thing that I am hopeful for is that something will happen that Senators will vote as their judgment dictates in this matter and as they express themselves in private, and not as they are requested to do from the White House.

But, Mr. President, it is not to be debated like other measures are in this body.

You can not require a quorum here as was done in 1901, because if a Senator even suggests the absence of a quorum, Mr. President, it will be said that that is the end of the speech of the Senator on the floor, and he is taken from the floor. Such a thing never happened in this body before.

Suppose there should be a bill introduced in the Congress in 1917, when the Republicans will have the President, the House of Representatives, and the Senate of the United States; suppose that bill should provide for a reapportionment of the South and only allow the South representation in Congress according to the number of votes you allow to vote and not count the negro in your apportionment or representation; and suppose we should force the bill under the same ruling and the same tactics by which this bill is being forced through this body, no man in the South would like it. I want to say to my good Democratic brethren I would not like it, either; but you are to-night making rules and you are piling up precedents to accomplish that very thing. You will be the ones who will suffer for it, because this bill, if enacted into law, is only temporary; this proposed legislation can not help but fail, and you are wrecking the rules of this body to put through a temporary measure. If there were something in it vital to the Democratic Party or vital to the interests of the country there might be a little excuse for it, but there is no excuse whatever for your course.

Mr. President, 24 years ago on the day before yesterday there was a bill before this body known as the Force bill. Suppose the Republicans had adopted the same tactics as you have been pursuing to-night; suppose they had overridden the rules of this body and all of its precedents; suppose they had said, "This bill is going to be put through by to-morrow night, no matter what it takes to put it through," what would you have thought of it?

I say now to Senators upon the other side of the Chamber that if I had been a Member of this body at the time it was pending I would have voted with you on that question. I think it is my duty to call these things to the attention of my Democratic friends. I am a partisan, as you all know, but I shall never be such a partisan as to inflict a wrong upon the people of any section of the country. I am a Republican, but I am an American before I am a Republican. I am going to follow that course through life, and whether my years in this body shall be few or many, I shall not deviate from that course. I say another thing: There will never be a Republican President of the United States, if I am a Member of this body, who shall dictate to me as to how I shall vote.

The American merchant marine, Mr. President, has virtually been driven from the seas; we have little to-day. The Senator from Kentucky [Mr. JAMES] has bewailed the fact that our ships could not transport the wheat and the other products of this country because of the lack of ships. Why, Mr. President, I have official reports from a number of the ports of foreign countries, and I desire to say to Senators here to-night that the difficulty arises not from the lack of boats for transportation but from a lack of facilities to unload cargoes in the ports of foreign countries.

Have you stopped to think of the ports that have been closed on account of the European war? Have you stopped to figure out how few there are to-day to which the commerce of the world may go and be discharged? There have been as high as 45 boats lying outside of some of the ports of foreign countries which have been unable to get berths to unload. Men can not be hired to unload them, for they have been called to this bloody war, and they are now engaged in murdering their fellow men. All Europe is mourning. Instead of the men attending to the commerce of the world, they are fighting. It is impossible to find men to unload the boats laden with the products of this country destined to feed the suffering hordes of people in unhappy Europe.

The American merchant marine in the foreign trade of this country has been in a state of decay for the last half century or more. One redeeming feature of this discussion is that both Democrats and Republicans recognize the necessity of doing something to rehabilitate our foreign carrying trade, so far as American participation in it is concerned; but I could not help but listen with astonishment when the Senator from Florida, in discussing this measure, disclosed his attitude and his position upon this great question.

Mr. President, there is not one particle of difference, so far as principle is concerned, between buying boats at Government expense, manning them with sailors, no matter from where they come, knowing in advance that it is impossible to pay expenses, and that there shall have to be paid out of the Treasury of the United States millions of dollars in order that we may compete with freight rates established by the merchant marine of foreign countries——

Mr. STONE. Mr. President, I rise to a question of order.

The PRESIDING OFFICER (Mr. HOLLIS in the chair). The Senator from Missouri will state his point of order.

Mr. STONE. Under the rules a Senator can not address the Senate sitting unless he is sick.

The PRESIDING OFFICER. The point of order is well taken. The Senator from Utah will either take his feet or take his seat.

Mr. SMOOT. Mr. President, I am not sitting. I well remember sitting upon this side of the Chamber when the Senator from Missouri was engaged in a filibuster——

Mr. STONE. And I did not deny it.

Mr. SMOOT. And he sat not only upon the arm of his seat, resting upon it, but in his seat for hours at a time, and no one ever questioned his doing so.

Mr. STONE. I do not remember that.

Mr. SMOOT. I remember it well.

Mr. STONE. No; it never occurred. The Senator would never have permitted it.

Mr. GALLINGER. Alexander H. Stephens always sat in his chair when addressing the House of Representatives, as did Oliver P. Morton when addressing the Senate.

Mr. SMOOT. Of course this is only another attempt to exert brutal force to stop Senators speaking upon this bill.

Mr. President, I was saying, when my genial and personal friend from Missouri rose to make a point of order, that there was not so much difference, if any, and none in principle, between the paying of a subsidy direct and the paying of the deficit which will be caused through operating boats under this bill. It is a vicious measure. Nobody knows what it will cost, and nobody knows what trouble it will bring to our country.

I heard a prominent ex-Senator say the other night that if this bill passed it would not be 90 days until the United States would be at war. I do not know, Mr. President, whether that is true or not, but he has studied the war situation a great deal more than I have. I do know, however, that there is danger ahead; the signal is out, and representatives of different foreign nations have called attention to it; but we are rushing headlong into it. Mr. President, if this bill shall be enacted into law it may not only cost thirty or forty or fifty million dollars to the American people, but it may cost untold millions, aye, billions, of dollars, with the loss of an untold number of lives. What is the reason for this? Why take such chances? It would be cheaper for the United States to buy all the cotton in the South and make a bonfire of it than to undertake this legislation, and I would not be particular as to what price should be paid for the cotton, either.

We are going headlong into debt. This Government of ours is plunging ahead; appropriations are being made that not only run into the hundreds of millions of dollars at each session of Congress, but over a billion of dollars. Well may the President call his Cabinet around him; well may he ask of them where the end will be reached. Well may he ask the Post Office Department if it is not time to call a halt. The Republican Party has been out of power but two years. When they relinquished the management of the Government the Post Office Department was not only paying its own way but making money for the Government. Well may the President ask what makes this change. Where are you drifting and whether are you going? Is it not time to begin to pare down some of the appropriation bills? Yes; I expect there will be $25 taken off of somebody's salary before we get through with the passage of all the appropriation bills this session, but I expect in return

for that we will appropriate $25,000,000 for other unnecessary items. We are scrutinizing 5-cent pieces, but we are taking little notice of the millions.

I have, Mr. President, the daily statement of the United States Treasury for January 28, 1915. That is only yesterday; and, Senators, do you know that the net excess of all disbursements for the fiscal year 1915 to this date over the net receipts up to this same date a year ago is $90,184,438.74? And Senators, do you know that upon the same day a year ago the net excess of all disbursements over the net receipts for the fiscal year 1914 was $41,835,538.19? Let me go back one year further, Mr. President, and instead of finding a deficit, instead of finding our Treasury being looted and emptied and the Government running in debt, we find a credit balance, a balance upon the right side of the ledger.

Ah, Mr. President, the difference is in the management of the affairs of this Government. The difference is in the laws that the Republican Party put in force. Whenever they are in power our Treasury is full, our institutions are successful, our laboring men are working not only the regular hours but overtime. There are no soup houses. Every man that wants a job can get one. There are no organized charities, such as exist to-day in all parts of this country. There is no appeal for help to keep starving wives and children from death; but here we find that on yesterday there was a shortage of over $90,000,000, and the end is not yet, because this fiscal year has to run until June 30, 1915.

I do not blame the President for getting alarmed. I think it is time that a halt should be called. It seems the President has power to force general legislation through Congress, but I doubt whether he has power to limit appropriations. I have failed, as long as I have been in the Senate of the United States, to see anyone that had that power; and notwithstanding the present situation we have coming before us before long a river and harbor bill carrying nearly $40,000,000. We will have to appropriate to build railroads in Alaska. This bill provides for $50,000,000. If it were a bill appropriating $50,000, there would be hardly a Senator upon the floor but that would be questioning it; but as long as it is $50,000,000 it goes without a question by the Senators upon that side of the Chamber.

All these appropriations are coming, notwithstanding there was a deficit of $90,000,000 yesterday.

I wonder where the Senator from Colorado [Mr. THOMAS] is? I owe him an apology, and I want to make it now.

Mr. THORNTON. I will try to find him.

Mr. SMOOT. When we were discussing a bill during the last Congress, the Senator from Colorado [Mr. THOMAS] asked a question about the Panama bonds. I remember telling the Senator from Colorado how many of those bonds there were that had not been issued, and at that time he expressed the fear that they would be issued for some cause or other at some time in the future.

Mr. THOMAS entered the Chamber.

Mr. SMOOT. I think I said it was a year ago. It was two years ago, because the Republican Party was in power at that time. The Senator from Colorado will remember that at that time I expressed the opinion that nothing would ever happen in this country that would call for the further issue of Panama bonds. I owe the Senator an apology. The thing has happened. It is here upon us. The Democrats are in control of the country. I was mistaken, and I want him to forgive me.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER (Mr. SWANSON in the chair). Does the Senator from Utah yield to the Senator from Colorado?

Mr. SMOOT. Only for a question, Mr. President.

Mr. THOMAS. I cheerfully forgive the Senator, and accept his apology.

Mr. SMOOT. Why, Mr. President, I could go on until to-morrow morning and discuss this question of appropriations and extravagance in Government expenditures, but that would do no good. I think it is an unwise policy for men in high places in this Government to undertake, as has been done in the last year or more, to impress, if possible, upon the people of the United States that there was prosperity on all hands. The claim of being out of work was "psychological." There was nothing in the claim. When a workman goes home and finds his wife and child nearly starving, and nothing with which to buy them bread, their condition is not real; it is "psychological." The mere fact that people are freezing for the want of coal is nothing if they knew it. They are not freezing. It is a mistake. They only think they are. The Secretary of Commerce is proclaiming aloud that prosperity is returning—returning! How could it return if it had always existed, as he has been claiming for the last 18 months. Have you ever thought of that?

I can tell the Senate when it will return, and I can tell the country when it will return. It will never permanently return until the laws that have been passed during the last 18 months, laws that have brought distress upon the American people, are repealed. It will not come under the fiscal policy of this administration. It is an absolute impossibility. The Democratic Party can thank God that the war in Europe came, because if it had not I say that we would have had too many Republicans in the House. The Republican majority there would have been top-heavy. As far as the last election of Senators is concerned, some four or five Republican States went by default.

The Evening Star of January 29, 1915, has an article by Mr. I. A. Fleming on Government finances. In it he says they are subject to scrutiny. The Presiding Officer of this body [Mr. SWANSON in the chair] knows that they ought to be scrutinized. Everybody knows that they ought to be scrutinized. This article says that the deficit for the fiscal year to January 27 was $89,074,148. It has increased in two days from that amount to $90,184,438.74; and if the Evening Star should publish an article on the 1st day of February giving the shortage on the 31st of January it would be an increase over the $90,000,000.

In the article I find this statement:

For the business day of January 27, latest reporting, the receipts of the Government fell short of the expenses by $1,218,866.40, making the deficit for the month of January up to that date $9,653,690.39, and for the fiscal year to that date $89,074,148.55, as compared with $39,749,-124.15, the deficit for the last fiscal year to the corresponding date.

Secretary McAdoo expressed the belief that $75,000,000 to $80,000,000 would be returned on account of income and corporation taxes with the advent of June.

Those who have kept posted on the gross earnings of railroads and other corporations, and on reductions in dividends and cutting off of dividends entirely, predict that there will be a great shrinkage in the corporation tax and the income tax as well, while the returns from internal revenue must also show lessening amounts with each addition of "dry" territory.

The United States Steel Corporation formerly paid $25,000,000 a year to its common shareholders; to-day it pays nothing.

Why, that sounds as familiar as the old cry of want whenever the party is in power. "Poverty" and "Democracy" are synonyms. I suppose the party is a necessary evil. I suppose if it were not for it the Republican Party would grow too arrogant. It is a useful minority party, and that is the only capacity in which it is really a benefit to the country.

The net earnings of this corporation in 1914 were $63,000,000 less than in 1913.

I want Senators to remember that the common stock is held by thousands of people in all parts of this country, and instead of their regular dividends for 20 years past they find themselves with none.

Scores of other big corporations have reduced or eliminated dividend paying entirely; the railroads have not commenced to show the increased earnings incident to higher freight rates, and the reports are showing continued decreases. In the month of December Baltimore & Ohio lost $1,378,401 in gross earnings, as compared with the same month of last year; Chicago & North Western gross earnings decreased in the same month $228,620; Central of Georgia's gross for the same month decreased $313,427.

Notwithstanding the business they have secured in increased freight rates upon the line of steamers that the road owns, still they fall short three hundred and odd thousand dollars in one month. During the time we had our Army down at Vera Cruz, Mexico, the boats belonging to this railroad were tied up at different wharves, the Government of the United States paying every day thousands of dollars to this company, and one of the boats was never used a single day.

Illinois Central lost over $580,000, and the entire railroad system of the United States, with few exceptions, showed more or less severe decreases, and these reports of reductions have been coming in month after month.

With the income tax of 1 per cent on gross earnings, it is not unreasonable to expect a loss of over 10 per cent in the corporation tax, especially when such great corporations as the Steel Co., the International Harvester Co., and other important industrial concerns have made such poor progress that their directors have found it necessary to cut down the incomes of millions of people by reduced and passed dividends.

And each dividend reduction, each passed dividend, makes a cut in the individual income taxes. While efforts are being directed toward bringing out a larger income tax, the chances are that thousands who contributed to the last income-tax payment will make no returns this year.

The next five months of the Government's fiscal year will probably show improvement, and there is some encouragement in that fact, but the improvement is just starting, and has so far made comparatively slow progress. Fortunately the exports far exceed the imports, although lessened imports, while aiding in holding a trade balance, cut heavily into the tariff returns.

It was stated by the Secretary of the Treasury at the time the war began, or shortly thereafter, that the receipts from customs would fall short something over $100,000,000 for the year. I made a statement upon the floor of the Senate questioning those figures. I notice that for January, up until the 28th, 1915, compared with the same number of days in January, 1914, there is a deficit of a little over $5,000,000. For the fiscal

year 1915, to January 28, as compared with the fiscal year 1914 of the same date, I find there is a shortage of some $57,000,000.

The American people have had placed upon them a burden of a war tax in time of peace of over $100,000,000, supposedly to pay for the shortage that would occur in our customs duties. I knew then, Mr. President, as I know now, that no such amount was necessary. I knew then, as I know now, that it was done to meet other extravagant expenditures of the Government. This burden was placed upon the American people with the knowledge, I believe, beforehand that it would more than cover the difference in our customs duties. The corporation tax, the war tax, taxes of all kinds become universal whenever the party now in control of the Government is in power.

STEEL COMMON, 40.

A new minimum of 40 was fixed by the New York Stock Exchange governing committee yesterday afternoon for steel common, and the stock sold there this morning to the minimum and slightly better, while the rest of the market was comparatively firm at about Thursday's figures. There are between 65,000 and 75,000 shareholders of the common stock of the Steel Corporation.

When this army of people have their annual incomes reduced by $25,000,000, it is but natural that they would be inclined to change their investments, even with slightly better prospects in view. When this disposition to liquidate is helped along by the heavy calling of loans secured by steel common as collateral, it produces more or less disregard of prices, selling being the chief desire. Thirty thousand shares sold within the first few minutes of to-day's session.

LOCAL SECURITIES.

There was no special change in the local stock market to-day, the only new feature being a little better demand for bonds. Potomac consolidated 5s at 99½, traction 5s at 106¾ to 106½, and railway 4s at 81 furnished the bulk of the day's business.

Small sales of Washington Railway preferred were made at 85. Bids on the common stock were 86½ and the asking price 90.

Washington Gas was firm at 76.

POSTAL SAVINGS DEPOSITS.

Postal savings deposits have been increasing at the rate of about $3,000,000 a month during the last few months. During the entire fiscal year to June 30, 1914, the deposits increased $9,600,000, or 28 per cent; from July to January 1 the increase was $15,750,000, or about 58 per cent. Total deposits are $59,200,000, with 497,000 depositors and $119 as the average deposit.

This is the result, Mr. President, of conditions throughout the country. Poor people who have saved a few dollars are withdrawing them from the savings banks in the community in which they live, upon which they were drawing 3 or 4 per cent, and placing the money in the postal savings banks at a rate of 2 per cent, in order to be perfectly safe in these Democratic times. It only shows the distrust the people have. It only shows that they know the lack of prosperity in the country, and all the preaching and talking on the part of the Secretary of Commerce or anyone else supporting the administration can not fool all the people. Some of them can be fooled a part of the time, but they can not all be fooled all the time, no matter what the claims may be or what statements may be sent broadcast to the public with an idea of representing conditions that do not actually exist.

SCOUT TALK OF A DEFICIT.

Conservative Democrats in the House to-day are inclined to scoff at the talk of a defict, and go so far as to predict that there will be none. They base their hope on the assumption that the corporation and individual income taxes payable June 30 of this year will bring in $71,000,000 and leave a balance of $8,000,000 on the right side of the Treasury ledger.

Mr. President, yesterday our Treasury was over $90,000,000 short, and if there is collected all the Secretary of the Treasury states there will be, all that he predicts will come from the income tax, even if it were $71,000,000, there would be over $19,000,000 shortage yesterday, and it is piling up every day. Every day when the sun sets in the west we are a million dollars worse off than we were in the morning, and so it goes.

On the other hand, the gloomy ones believe that everybody will take advantage of the 10 days' grace for the payment of these taxes, which will put the collection into the next fiscal year and place a $63,000,000 deficit on the books.

PRESIDENT URGES STRICT ECONOMY.

The necessity for strict economy in all branches of the Government was impressed on the Cabinet again to-day by President Wilson. Although the Cabinet members took an optimistic view of the financial condition of the Government, it was said that the uncertainty about the length of the European war made it necessary to economize to make up for the lowered import duties.

What excuse on earth would the Democratic Party have if it were not for the war? Everything that happens they lay to the war. Their financial condition is on account of the war. Their deficits are on account of the war. The lack of employment of the people is on account of the war. I say to my Democratic friends that if it had not been for the war creating a demand for goods from this country, there would be to-day millions of men more than there are walking the streets without employment. I say millions, and I mean it. Many American people believe that the exportation of munitions of war to a belligerent country is a violation of our position of neutrality. Many American people believe that ammunition and war material of all kind ought to be prohibited from exportation to a belligerent country. Mr. President, if that happened, there would not be 10 per cent of our factories making the class of goods that have been declared contraband of war or conditional contraband of war that are running to-day. They would be closed, as they were being rapidly closed before the war.

I suppose, Mr. President, looking at it from a high moral ground, it would be proper for our Government to take the position that munitions of war and implements of war of all kinds that are used in warfare should not be allowed to be exported, but I believe that under our Constitution that is not permissible. It is generally believed that an individual citizen or a firm manufacturing such articles could under our Constitution export them to any country, whether that country was involved in war or not, without violating our position of neutrality. Be that as it may, Mr. President, the administration will have to lay down the rule on that subject, and I think they have done so. We do not want to make the situation worse than it is at present, and that is exactly what the bill now under consideration will do. That is why we on this side are so earnest in our opposition to it.

Some of the fathers of this Republic in the early days took occasion to encourage and develop the merchant marine with great success. As far back as 1826 American ships carried nearly 93 per cent of our imports and exports. A still larger percentage was carried in the earlier days of the Republic, but under the changes in our laws the percentage of our foreign commerce now carried by American ships has declined to about 8 per cent. America, growing by leaps and bounds in every other line of industry—our America, that has outstripped all other countries on earth in her civilization, in her advancement in the arts and in the sciences—has fallen so low in her shipping interests, in her over-seas trade, that we find even the small Scandinavian countries outstripping us. We have fallen nearly to the foot of the list.

Mr. President, every time that I go abroad, whether by way of the Pacific or the Atlantic, I look in vain for ships flying the Stars and Stripes. I remember upon one occasion traveling up the Rhine, and, as I remember, at Bonn I saw a large, beautiful, green lawn reaching to the river's edge, and within it was standing a small house. I caught sight of the Stars and Stripes flying at the top of a flagpole. It was the first American flag that I had seen aside from the ones at the homes of our foreign representatives during my visit upon the Continent. I do not know how other men feel, but when I saw Old Glory waving in the breeze in a foreign country from the top of a flagpole I could not help crying aloud "There is Old Glory; thank God for the Stars and Stripes. Would that all that that flag represents were the heritage of all mankind." I asked everybody in the party to go down and have dinner with me. They wanted to know why. I said "because I have just seen my country's flag floating in a foreign land, and I want to celebrate it." In every port that I entered, no matter where it was, I could see the flag of every other country except that of America. Boats owned by foreign countries were busy everywhere, but very seldom could we see an American boat carrying the American flag, manned with American crews, and I was humiliated to learn that upon the high seas and in all the ports of the world I could find boats owned by American capital but sailed under foreign flags and manned with foreigners, carrying the commerce of our country to ports in all parts of the world. Mr. President, that experience taught me a lesson, and I resolved that if I ever had a chance to do so I would support a party or a policy that would change those conditions.

We have protected nearly every industry, and we have seen many of those industries grow from nothing until they have become the greatest in all the world. We have seen industries under a protective policy spring into life and grow and grow, and, while increasing and growing, reduce the cost of articles to the consuming public. On the other hand, Mr. President, we have neglected absolutely the over-sea shipping interests of our country; we have placed them not only in competition with cheaper boats, with cheaper men, with cheaper material, with cheaper food to sustain the men, but we have put them in competition with boats which, in addition to all these advantages, have had subventions or subsidies paid by the Government under whose flag they were operating, amounting to millions of dollars annually.

Now it is proposed in this bill to throw the Government of the United States into that business. I was rather surprised to learn this morning from the Senator from Georgia [Mr. SMITH] that it will be the policy of our Government, if this

bill becomes a law, to purchase these boats and lease them. Does any Senator think that American citizens will lease these boats and run them in competition with the boats of the world, paying a rental to the United States for them? I do not believe it is possible. It will be a failure.

If, Mr. President, under this bill the Government is to operate the boats, is it possible, is it thinkable that the United States will operate boats manned by the cheapest labor in all the world—Chinese, Japanese, Lascars, and that class of seamen? If such is contemplated, so far as I am concerned as a taxpayer of this country, I want now to declare that I would rather be taxed by the Government of the United States direct to pay the difference between the wage of a Chinese or a Japanese and a true-born American, and there is no question in my mind that the American people believe as I do on this subject.

Mr. President, I never want to travel upon the high seas, I never want to go to a port anywhere in the world and see the American flag flying at the mast of any ship unless that ship carries American seamen and American officers; and I know that can not be done without some kind of protection. Never should this Government undertake the operation of a line of boats unless it is known what it will cost directly, not indirectly, as this bill provides, but what it will take to make up the difference between the amount paid to the lowest class of labor and the amount paid to that class which lives and works in conformity with American standards.

It is humiliating enough to see a boat run by an American citizen with the lowest class of labor, but God forbid the day to come when our Government would undertake to do it! We are not that poor yet. I recognize the fact that our Treasury is getting lower every day this administration is in power. I wish now we did not have any authorization to sell Panama bonds. I have learned a lesson from the attitude of this administration regarding those bonds, and I hope that lesson will be of advantage to me and of advantage to the American Congress. I have learned the lesson that there is danger in an authorized bond issue beyond immediate requirements. There is danger in the Government of the United States having too much money on hand. That never happens, though, in a Democratic administration; only for a few months following their coming into power.

The mere fact that the American vessels engaged in foreign commerce amount to only 8 per cent of the carrying trade of this country ought to have appealed to my Democratic friends long before this, when we of the North and the West were asking, year in and year out, that a subsidy that amounted to a very little each year should be paid in order that the difference between building, running, and maintaining ships in this country and in foreign countries should be equalized. But every time a "ship subsidy" has been mentioned in this Chamber Democrats have condemned it, fought it, and claimed it was undemocratic.

How often have I heard the Senator from Mississippi [Mr. WILLIAMS] discourse upon the evils of the tariff, upon the evils of ship subsidies, and state that no business should be established in the United State unless it could stand upon its own bottom—no hothouse development, no hothouse production. We all remember how often he spoke of raising bananas in Alaska; and it is just such ideas, Mr. President, that have driven our over-sea trade from 93 per cent down to 8 per cent.

There is one thing I am glad of, and that is that something has happened that will draw attention to this fact. If this bill does not become a law the speeches that have been made upon that side in its favor will be a great help in supporting a true ship-subsidy bill carrying a small subsidy not equal to the subsidy that is granted by some foreign countries. Hereafter I shall look for some help from that side of the Chamber to pass a ship-subsidy bill.

This situation was brought about by the admission of foreign vessels to all of the privileges granted to American ships in the foreign trade. It is the one great industry that has been on a free-trade basis for a long period of time.

Mr. President, after we had spent $400,000,000 for the construction of the Panama Canal, the greatest engineering feat in all the world, built not only to enable this country to send her battleships from one coast to the other in a short period of time, but to assist our own shipping interests, what do we find? The Congress of the United States passed a bill granting exemption from tolls to our ships going through the Panama Canal. That was satisfactory to the American people. Why did we do it? Was there any justice in it? There were but few Senators who did not think it ought to be done. It was done in order that we might control in part the exorbitant freight rates charged by the great continental transportation lines of the country. The law was passed, but some one got busy, and before the shipping interests in this country could take advantage of it, before the canal was opened for business, the order came from the White House that the law must be repealed.

Was it repealed? Of course it was; and we find this situation existing: American boats are not on an equal footing with foreign boats. Under conditions existing they must pay higher wages, the laws of our land require them to carry more men, provide greater space and better food; and these are not all the handicaps, for there is hardly a foreign country in the civilized world that does not pay to her boats that may pass through that canal some sort of subvention or subsidy. Why, some of the countries go so far as to return to them the entire charge, whatever it may be. But every boat carrying the American flag, every boat upon which are found American seamen, every boat that is required by American laws to have a certain space for every employee and to have all the other requirements of the laws complied with must pay into the Treasury of the United States a toll tax for every ton that goes through the canal.

Things are not equal. No, Senators, we have been very solicitous indeed for the railroads of this country and for the foreign shipping interests. I wish we had more interest in our own institutions, in our own shipping interests and less interest in foreign shippers.

Why, Mr. President, there is no protection whatever to our ships in the ocean carrying trade. As a certain result that trade is passed over to foreigners and we are dependent on them to an extent that threatens disaster in the case of a great foreign war, such as the one now being carried on in Europe.

Before I get through with this discussion I hope I will reach the point where I want to call the attention of the Senate to what it has cost the Government of the United States in the past for being unprepared in time of war. Is it not a humiliating spectacle to see the greatest country in this world, the wealthiest in all the world, the most intelligent people of any country in all the world, the most civilized, the greatest in the arts and in the sciences—is it not humiliating when a former President of the United States decided that a few battleships make a tour around the world they could not start from our shores, could not run 24 hours, without hiring auxiliary boats from a foreign country? Without that we could hardly get out of the sight of land, certainly we could not have proceeded after the first cargo of coal was consumed. There was scarcely an auxiliary but what we had to hire from a foreign country. Run by Americans? No. Operated by Americans? No. The operation of the auxiliaries, the life of the battleship and all its precious cargo of lives, was in the hands of a lot of foreigners. Oh, how humiliating!

If we pass this bill and it becomes a law and through it we are drawn into war, when all Europe is mad, when, it seems to me, that the people of the world have lost their reason, where are we going to get our auxiliary ships? We will not have Mr. England to get them from, nor will we have Mr. Germany to get them from. They are in a struggle for their very existence; and God help the people. Some people say that their hearts are bleeding for the men who are in the trenches. Of course; but I want to say to you, Senators, my heart is aching for the wives and the children who are left at home fatherless. Then, think of what it will be before the war is over. Think of the mourning and the homes of those who are left without a provider, without a father, without a protector.

That is not all. I know what is coming to the American workman following the close of the war, and Senators here will realize it, if they do not do so at present. We may be making goods now for exportation, securing a few paltry dollars as profit upon goods that are being sent to the warring nations. It may continue for a year or two; but I want now to warn the American laboring man that when this wicked, unjustifiable war ceases millions of men who are now lined up face to face shooting and murdering one another will be called home. The poor will be poorer. The well-to-do and the rich will have nothing. The first thing will be that they must get to work. They will have to provide something to live on. They are going to make goods for exportation, and cheaper than ever before, and, Senators, their own purchasing power has gone. If those poor souls can make enough to keep body and soul together, they will be well satisfied for some years to come. It will not be a question of wage. It will be a question of doing something, and doing it quickly.

Senators, have you thought where those goods are to be sold? Is there any country in all the world outside of our own America that can purchase them? The warring countries are so burdened—and will be before this war is over—that I predict now there will be a repudiation of many of the present forced obliga-

tions made by them. The people can not stand the present load that is placed upon them. It is out of the question. There is one market, however, for these goods. It is America. We will not be worried very much about carrying goods to them. The question will be with them to get transportation for their goods to us. That will be the situation; and when that time comes I want to say it will not be a question of a 5 per cent reduction in the wage. There will be more than that or our mills will go into bankruptcy.

Senators talk about the farmers having an interest in this bill and in the conditions existing in the world. Of course they have. I say to Senators that the laboring man, the man who works at the forge and in the factory, the man who works in the mill, is just as much interested, if not more so, than any other class of people in the United States. He is going to be hit just about as quickly as any class of people.

I say now that the laws which have been passed by the present administration have got to be repealed or else goods made by the warring nations after the war are going to enter this country and take the place of American goods. This is January 29, 1915.

Mr. CLAPP. It is the 30th.

Mr. SMOOT. Yes; it is after 12; it is the 30th.

Mr. FLETCHER. It is the legislative day of the 26th.

Mr. SMOOT. I am willing to have it recorded upon this day, and if it does not come true I want some Senator on the other side to remind me I am in error. In the discussion of this subject in Congress, Republicans have maintained that we paid foreign shipowners as much as $200,000,000 a year for carrying our imports and exports. How strenuously that has been denied by Members upon the other side of the Chamber! How strange it seemed the other day when the Senator from Mississippi [Mr. WILLIAMS] was telling us how much would be saved to the American people if we had only 30 boats that would carry the products of foreign countries in those boats to America and from America to foreign ports. He tried to impress us that millions would be saved to the American people, and took the ground that every dollar which was paid to a foreign boat was lost to the American people.

Oh, what a different argument from that has been made in the past upon the other side of the Chamber, and how different it has been made by the Senator from Mississippi, for he has always claimed that we ought to buy in the cheapest market in all the world and sell in the dearest. He has always claimed that every dollar which has been given in the way of a protective tariff to a manufacturer in this country has been paid by the American people.

Then, strange to say, he tried to differentiate between the American people and the Government of the United States. If the Government of the United States paid millions and lost it that did not make any difference to the American people. Why, who is the Government if not the American people? Who constitutes the Government if not the American people? How could the Government of the United States pay any money from its Treasury unless it is paid by the American people? The proposition is so absurd upon its face that a person has difficulty in even considering it.

The statement that $200,000,000 was paid foreign shipowners by American importers and American exporters has been vigorously denied by Democrats who have made arguments in both Houses to try to prove the contrary. But now they design to have the Government enter into this industry as a competitor with private-owned ships. The Democrats assert that we pay to foreigners for this purpose from $200,000,000 to $300,000,000 annually.

Is it the month of the year or the year itself that has made such a difference in their judgments? Is it some unforeseen influence, some unforeseen power, working upon their minds and intellects that has changed their former attitude? I leave every Senator upon the other side of the Chamber to answer the question for himself.

That statement has been included in reports in both the Senate and the House and is a part of the report on this bill, the report of the majority making the same statements that Republicans have made in the past, using the same arguments that have been used by the Republicans for over a quarter of a century, quoting from speeches made upon the floor of this Senate in favor of the ship-subsidy bill with a view of bolstering up this proposed legislation. I do not want Senators to think that I question the accuracy of the proposition. I only referred to it to show how our opponents live and learn. The payment of such an enormous sum as $300,000,000 annually is a tremendous tax on the people of the United States and goes far toward overcoming our favorable balance of trade.

Mr. President, the United States Government and its people would be wealthier by billions of dollars if the merchant marine had been established a quarter of a century ago. The pittance carried by any bill offered in either House of Congress as a subsidy would be a mere bagatelle compared with the millions of dollars which would have been saved. The Senator from New Hampshire [Mr. GALLINGER] not only once but many times has introduced bills during his 24 years' service in this body with that object in view. No man could have been more persistent in presenting that question in this body and before the American people than has he; no man has had more patience with the subject. If his policy had been carried out, we would have been absolutely independent of all the world at this critical time in our history; instead of crying for more boats in which to carry our products, we would have had lines of them traversing the Atlantic, traversing the Pacific, and traversing every other sea and ocean in all the world.

Mr. CLAPP. Mr. President——

The PRESIDING OFFICER (Mr. HOLLIS in the chair). Does the Senator from Utah yield to the Senator from Minnesota?

Mr. SMOOT. I yield only for a question.

The PRESIDING OFFICER. The Senator yields only for a question.

Mr. CLAPP. It has been impossible for me to listen to all of the debate, but I ask the Senator from Utah, if I am right in the conclusion which I have drawn from that portion of it which I have heard, that it is claimed by those who are opposing the bill that at this time there are ships to carry so far as carrying can at this time be done?

Mr. SMOOT. There is no question about it, I will say to the Senator.

Mr. CLAPP. I know it is claimed they charge exorbitant prices.

Mr. SMOOT. I want to say to the Senator it is true that the rates have advanced, but that would be the case even if this bill were passed.

Mr. CLAPP. Yes; but that is not what I am discussing. The Senator from Utah has urged that, if certain policies had been pursued, we would have had abundant ships at this time in which to carry all the freight. I have understood that the argument has been made all the time that there are now ships enough.

Mr. SMOOT. Yes; but if we had adopted a subsidy policy in the past the boats would have been ours, rather than belonging to foreign countries as at present. That is what I wanted to impress upon the Senate.

I will say to the Senator that in many foreign countries to-day there are lying outside of their ports 20, 30, or 40 vessels unable to get berths and unable to get men to unload them; that is the present trouble. The men are off to the war; and before I am through I shall call attention to some of the ports and to the official reports showing upon certain days the number of ships that have been lying outside waiting to be unloaded. Of course the owners claim that that has to be paid for in advanced rates; they claim, and rightly so, that it is very expensive.

Not only that, I will say to the Senator, but it is a question now of supply and demand. Heretofore we had tramp steamers enough at every one of our ports begging for trade, offering the lowest prices, taking any kind of freight, in many cases to be used as ballast in return voyages to foreign countries. It is now different. The shipowners now select what they will carry and say what they will charge for carrying it. That is because of the supply and demand and the conditions existing at the different ports of foreign countries. Again, that comes about by so many ports being closed on account of the war, thereby throwing extra burdens upon the remainder of the ports that are open, and the men who used to be engaged in the loading and unloading of these vessels are to-day engaged in war and in murdering as many of their brothers as possible.

The war in Europe, by cutting off imports from Germany, Austria, and other countries engaged in the conflict, has assisted the Democratic administration in preventing some of the loss its laws have inflicted on the country. The effect has not been alone restricted to the countries engaged in the war, but it has extended to South America and to other parts of the world. A demand has been created for our food products by the countries engaged in war; but other industries have not profited to the same extent, although it has helped certain industries, as it has created a demand for the products of American factories making war goods for foreign countries. That demand has given the American workman something to do, and whenever he is a wage earner he is a purchaser to the extent of his wage; and that far, Mr. President, he assists other industries not en-

gaged in the making of goods for the belligerent countries in supplying goods for exportation to other countries which on account of the war can not supply their ordinary requirements as in the past because that great exporting country, Germany, is bottled up. The English fleet has all of her merchant ships and all of her warships bottled up in the different ports of the world, and the immense amount of goods that she has been exporting to foreign countries is now furnished by other countries or by our manufacturers.

It is true we get a part of that trade, but England is getting to-day the larger part. If you should go into England to-day, you would find industrial conditions in that country better than they have been for years and years past—aye, for over two decades. Their manufacturing institutions are running full time and overtime; the wages paid by them are higher than they have been; and while it is true that hundreds of thousands of her men have gone to war, it is also true that there are more men and women working in the industries of England to-day than there have been for many years past.

Howard Bradstreet, chairman of a subcommittee of the mayor's committee on unemployment in New York, of which committee Judge Gary, of the United States Steel Corporation, is chairman, said a few days ago that statisticians, who are ex-officials of the United States Census Bureau, after an investigation in New York City, reported that the increase in unemployment in that city was 200,000 above the total of last year.

Notwithstanding the extra employment that has come through the greater exportation of American goods caused by the war, in one city in this country there are to-day 200,000 more unemployed men than a year ago. The year 1914 was the most disastrous year to business and to laboring men that has happened in this country since the Democratic Party was in power some years ago. He stated that the problem was acute, and that it was unfortunate that city officials quibbled over the matter.

Senators, have you not noticed of late the effort that is being put forth by heads of different departments and bureaus of this Government to counteract the sentiment and the knowledge that is rapidly being realized in the United States—that conditions are not as they should be? I had the other day an analysis made, and I intended at some time when the occasion arose—and I hope that it will yet arise during this session—to call the attention of the Senate to some of the statements that have been put out under the guise of official statements. A half truth, Mr. President, is sometimes worse than an absolute untruth.

Max Heidelberg, another one of those interested in investigating the subject, told of finding more than 200 homeless men in a cellar, entered through a trap door at a Bowery mission. I suppose that Max will be charged by the administration as being a German, and therefore prejudiced against the present administration, and that this statement was made on that account.

No, Mr. President; it will not do to make such claims. I think it is far better that the conditions as they exist should be known rather than be covered up. I think that if they were known there would be a greater effort on the part of the charitable people of this country to take care of the unfortunates. In that cellar there was no ventilation, and he said that Charities Commissioner Kingsbury derided talk about a "cubic-foot-of-air" theory.

According to figures compiled for the public forum of the Church of the Ascension in Fifth Avenue, New York, of which the Rev. Percy Stickney Grant is rector, a partial list of the unemployed in Greater New York totaled 562,700 on January 12 of this year. The number of homeless persons in the city who have not the price of shelter is stated in that report to be 60,000. These figures were obtained by a gentleman employed to make the investigation by a committee of the public forum. I expect, Mr. President—and if what I have heard is true it is already here—there will be a flood of special agents from different departments of the Government going into the cities for the purpose of learning from their point of view whether the poor are really suffering or not and classifying them. Think of people who are in want being classified by a clerk drawing $900 a year! And I expect before long to see some glaring reports made denying in toto the reports that have been made by the charitable institutions formed in the different parts of this country with a view of ascertaining the number that are in want.

It is not only in one line of business, but we find it in all businesses, unless it happens to be a class of business that is exporting goods to a foreign country. You find the clothing manufacturers of this country, in Chicago, in Baltimore, in Cincinnati, in California, all in a deplorable condition. Why? Because the farmer is using his last year's suit. It is not only the farmer; it is all of us. Where men used to have two suits they now have only one. It does not apply only to farmers, but it applies to many, many men who have been considered well off in the past.

That is only an example, Mr. President. You could go through every industry in this country, with the exception, as I stated before, of those industries making war goods to be shipped to a belligerent country, and you would find the same condition of affairs. I expect to hear a wail go up here before long because the farmer is receiving a dollar and a half a bushel for his wheat. I suppose the Democratic Party is the same in every part of the United States. If the farmer gets 50 cents a bushel for his wheat, they appeal to him and say: "You are being discriminated against. The Republican tariff is robbing you. You are not getting what you ought to get." Then, if he gets a dollar and a half a bushel for his wheat, they appeal to the consumer and say: "See what you are paying the farmer for his wheat. The Republican tariff is the cause of the high cost of living." So it does not make a particle of difference whether the price is up or down, there is always a Democratic complaint.

This investigation, Mr. President, proved the truth about one thing that has been often wrongfully charged against employers, for the report shows that 60,000 men and boys are now being kept in employment by firms reluctant to discharge them, despite the fact that business conditions do not warrant their continued employment. Freight yards as well as cellars are used as sleeping apartments to accommodate this army of unemployed.

I do not often think it necessary to quote from Mr. Samuel Gompers, the well-known workmen's leader, but he says:

> From all over this land of ours come reports of need. There are great numbers of unemployed, of unknown men and women, in the bread lines of our cities. These people want work. They have hunted desperately for work, but work has been denied them.
>
> The Associated Charities of New York announced a list recently containing the names of 113 poverty-stricken families which are in dire need. The men and women of these families were willing to do anything to provide the bare necessities of life for their dependents. In Chicago on January 21 it was reported that over 100,000 persons were idle seeking work. Similar reports come from other cities. I have noticed in speeches delivered by Members of the House, as well as representative men outside, that they have placed the number of unemployed at the present time at 4,000,000.

That is the proof of the era of "great prosperity" which the Secretary of Commerce is traveling over the country to inform the people about! He is first down in the South and then in the West trying to impress upon the minds of the American people that there is an era of prosperity at hand.

The railroads of this country, as I called attention to shortly after 9 o'clock, were in a desperate condition, and of course something had to be done for them. I am not going to charge any ulterior motives on the part of any man to bring it about, but I felt positive that it would come, not from any particular testimony that had been given, but because I noticed from statements in the press that the administration was in favor of the increase. I knew what that meant. I suppose the increase was necessary. Be that as it may, they have received the advance, and I think that on account of that advance orders will be placed for railroad material, for extra cars, for extra locomotives, for steel rails, and for other betterments that have become absolutely necessary for the safety of the travel of the American people.

It is true that the freight upon the railroads for the last year decreased in tonnage, and that of course was necessarily so on account of the decrease of the purchasing power of the people in all parts of the United States.

The net revenues for the last fiscal year before the war in Europe began decreased $102,000,000. The freight revenues for May of last year were over $24,000,000 less than for May, 1913. That was long before war was even talked of in Europe, and it was wholly due to the change in the control of our Government and the policies inaugurated by it.

Now that the railroads are allowed to charge consumers and travelers over $100,000,000 more per annum to make up this enormous loss in part, it is heralded by the leaders as an evidence of great prosperity. In the same way, I suppose, the income-tax law and the $105,000,000 to be derived as intended from the alleged war-revenue tax will also be heralded as an evidence of great prosperity. Yet with all that and with all these burdens put upon the American people they will not meet the expenditures of the Government. There will be a shortage of not a few millions, but many, many millions of dollars. I see no immediate relief.

I could go on, Mr. President, and quote from Democratic authority as to conditions existing in certain parts of this country, but I do not care to do so to-night.

Under these circumstances, Mr. President, it is not surprising that many Democrats differ from the administration as to

the policy to be carried out. This bill, like many others, including the tariff bill, is forced on Congress. It is not at all probable that any such measure would have been brought up, particularly at this short session, except it was forced upon Congress. As the senior Senator from New York [Mr. ROOT] remarked in his address on the bill recently, the Democratic Party in Congress merely registers the decrees of the President, in the same way that the French Parliament did under Louis XIV.

The President's recent address at Indianapolis, in which he favored a national employment bureau, shows that he has some realization of the army of unemployed brought by the Democratic administration. His warning to this body, to the effect that if they should dare to break the solidarity of the Democratic team for any purpose or from any motive theirs will be a most unenviable notoriety and responsibility, which will bring deep bitterness to them, is something unheard of in our Government since the days of Andrew Jackson.

I do not care, Mr. President, to take up that speech in detail, because I think that has already been done, and I do not think it would add anything to the questions involved in this bill. Therefore I shall proceed upon another matter entirely.

The record of this pending measure so far in the Senate shows the uncertainty of the majority party in this body in regard to it. The original bill was introduced December 9, and reported by the committee January 6. On January 25 another substitute was offered. What other amendments may be proposed is merely a matter of conjecture. I think we have the fourth edition now. That fourth edition is before the Senate at this time. It is very clear that there were no distinctive ideas on the subject among the Members supporting the measure in this body in the beginning. It has been quite evident that the President has had no business training, as he stated in his Indianapolis speech. I do not know but what the bill will be amended many times more, providing the Democratic caucus agrees to it, and reports it to the Senate as a substitute for the one we are now discussing. I can not help but think, Mr. President, that this is not the last one, and yet it may be. No one can tell what the action of the Democratic caucus will be. The measure was brought to the Senate for discussion with a warning from the Democratic leaders that there was no need of debate, with utterances from the senior Senator from Mississippi [Mr. WILLIAMS] to the effect that Republican discussion of the bill was not worth listening to, although he did not take the trouble to listen before he uttered his disapproval. I therefore feel that I should acknowledge with pleasure the presence of the Senator at this early hour in the morning.

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER (Mr. SWANSON in the chair). Does the Senator from Utah yield to the Senator from Mississippi?

Mr. WILLIAMS. Will the Senator from Utah yield to me for a question?

Mr. SMOOT. Mr. President, I have not gotten very far along with what I have to say, but——

Mr. WILLIAMS. Before the question I should like to ask I will state that what the Senator from Mississippi did say was that no 13-hour speech and no 9-hour speech and no 10-hour speech was ever worth listening to at all. I should like to ask the Senator this question: Has he calculated the amount of money that he is costing the American shippers by his speech?

Mr. SMOOT. No, Mr. President; but——

Mr. WILLIAMS. I think it is $20,800 an hour. The Senator has now talked enough to have cost them a little over $40,000. The Senator from Ohio [Mr. BURTON] talked long enough to cost them $250,000; the Senator from Massachusetts [Mr. WEEKS] long enough to cost them $150,000; the Senator from New Hampshire [Mr. GALLINGER] long enough to cost them $200,000; and the Senator from Utah has thus far got up to $41,600. If it continues much longer, he will very nigh bankrupt them.

Mr. SMOOT. Of course, I have a very poor record in speech making——

Mr. WILLIAMS. Does not the Senator from Utah remember that the Senator from Mississippi did not say that Republican speeches were not worth listening to, but that those particular Republican speeches made by those particular Republicans had not been worth listening to?

Mr. SMOOT. The Senator should not——

Mr. WILLIAMS. One more question.

Mr. SMOOT. No.

Mr. WILLIAMS. Does not the Senator from Utah remember that most of their speeches were read out of things that all of us could have gotten?

Mr. SMOOT. If the Senator will let me answer now, I will be very thankful to him. The Senator evidently was not in the Chamber when I discussed his mathematical calculations as to what would be saved to the American people if this bill passed.

Mr. WILLIAMS. They were not mine. They were those of the Secretary of the Treasury.

Mr. SMOOT. The Senator gave them as his.

Mr. WILLIAMS. Yes.

Mr. SMOOT. I do not think the Secretary of the Treasury would ever take the position the Senator has taken here.

Mr. CLAPP. Mr. President——

Mr. SMOOT. No man who knows anything about business would ever figure the way the Senator from Mississippi is figuring now. It costs the Government no more for a continuous session than if the Senator from Mississippi were at present in bed instead of being engaged in forcing a vote on this bill at 1 o'clock in the morning.

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Minnesota?

Mr. SMOOT. For a question.

Mr. CLAPP. I wish to ask the Senator from Utah if he does not think it is very fortunate for the Senate as a whole and Senators individually that there is no personal liability as to what it will cost the American public from time to time in debate? [Laughter.]

Mr. WILLIAMS. Now, Mr. President——

Mr. SMOOT. No, Mr. President, I do not yield. I do not want the Senator to get any further off now until I answer the question he asked me; nor do I want the Senator at this early hour in the morning——

Mr. WILLIAMS. This is not an early hour. It is a very late hour.

Mr. SMOOT. It is early in the morning. I notice that it is 10 minutes past 1, so that it is early in the morning.

Mr. WILLIAMS. Does not the Senator really think——

Mr. SMOOT. I do not want the Senator from Mississippi and the Senator from Minnesota to get into any discussion that would lead my mind off from the subject we are discussing. Therefore I kindly ask the Senator from Mississippi not to reply to the Senator from Minnesota at this time.

Mr. WILLIAMS. I will not.

Mr. SMOOT. Now, if the Senator will let me go on.

Mr. WILLIAMS. I want to ask the Senator if he does not think his saying I should wait for an answer to the last question until he had answered all the others was substantially saying that he never would answer any of them?

Mr. SMOOT. Of course that may be the result, but I did not have that in mind. If the Senator from Mississippi will be so kind as to call my attention to it before I close, I will assure him now that I will be glad to answer if the Senator from Mississippi is in the Chamber at the time I close. However, if the Senator from Mississippi now desires to ask me a question, I am perfectly willing that he should do so.

Mr. WILLIAMS. I think I have asked quite a number of questions. I merely intended to help you along.

Mr. SMOOT. That is not a question.

Mr. WILLIAMS. You were worrying yourself considerably, and I thought I would ask you a question to give you a starting point.

Mr. SMOOT. If that is the case, I do not yield to the Senator from Mississippi, because, Mr. President, I do not have to yield to him for that purpose.

Mr. SIMMONS. Will the Senator from Utah let me ask him a question?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from North Carolina?

Mr. SMOOT. No, Mr. President.

The PRESIDING OFFICER. The Senator from Utah refuses to yield.

Mr. SMOOT. I refuse because the Senator from Mississippi may think——

Mr. SIMMONS. I wish to ask the Senator from Mississippi a question.

The PRESIDING OFFICER. The Senator from Utah refuses to yield.

Mr. CLARK of Wyoming. Mr. President, I ask for the regular order.

The PRESIDING OFFICER. The regular order is demanded. The Senator from Utah refuses to yield.

Mr. SMOOT. That would take me off the floor and I will not yield for that reason. The Senator from Mississippi need not worry about my running out of material, for this bill is so vicious in its provisions, it is so un-American that there is plenty to say about the bill without anyone interrupting me with questions to take up the time.

The Postmaster General and others have proposed that the Government shall take over the telephone and telegraph lines. That is only another step toward socialism. It is not any worse step, however, than the one that is being taken in this bill. The result will be the same. The Government of the United States can not run business as cheaply as an individual or a corporation. No government on earth does it. Let the Government get into the business of operating ships. The appointments of the officers and men employed, if they were Americans, would be influenced through politics. Can not Senators see the trouble that would come? I believe that they do see it and they know it. If this proposition had been made three years ago by a Republican President, and if he had undertaken to force it through this body when the Republicans were in control, he would have found the Senator from Mississippi [Mr. WILLIAMS], the Senator from Kentucky [Mr. JAMES], particularly the Senator from North Carolina [Mr. SIMMONS], standing upon that side of the Chamber denouncing it with all the force at their command, just the same as they have done in the past whenever the question of building a merchant marine has been under consideration. But the Democratic caucus report a bill that if enacted into law no one in this Chamber or anywhere else in this Government can tell what it is going to cost the Government of the Unted States. No one has ever suggested what it would cost, and they do not know what it would cost.

A measure to provide the way to Government ownership of the merchant marine would be very much better than the provisions of this bill. We are told by one Senator upon the other side that the object of the bill is for the Government to purchase the boats and then to lease them, and that unless the lease provision was in the bill he would not support it. Other Senators take the position that the Government is going to operate the boats, that it is not expected to lease them. And it is not an emergency matter. That the policy is a permanent one; the Government is going into this business.

Mr. President, if the Government is going into the business the Government ought to own the boats outright. They ought to operate them and they ought to be responsible in every way and not try to get under cover with a corporation of the District of Columbia. Some Senators upon the other side say that they do not intend to buy the German boats interned in the different ports of the world. Another Senator says that they have a perfect right to buy them and that no danger will come to this country from the purchase of the same.

No, Senators, there is no concerted thought or understanding as to what the bill is or what it is intended to accomplish. The only thing that they do agree upon is that the President wants the bill and he must have it.

If this bill becomes a law and is put in operation it will paralyze individual effort and increase the number of Government employees and the expense of conducting business so as to lead almost to a revolution.

Government regulation is all right, but Government ownership as a substitute for private business enterprise is a monumental failure. I want to register my protest against the Government of the United States going into the shipping business, the merchandise business, the lumber business, the clothing business, the manufacturing business, or any business other than that for which our Government was organized and which the Constitution of the United States gives it power to undertake.

I made the statement that it costs the Government more to run any business than it costs a private institution; and I think that is very easy of demonstration. I never heard it denied until this bill was under consideration. I never thought there was a Senator who believed otherwise from the experience that he has had with the departments of the Government. The Government, for instance, is conducting a printing office in this city at an expense of nearly a million dollars a year. That is outside of the cost of paper and of all other materials; it is solely for labor. I have no doubt that the actual work required to do that million dollars' worth of printing could be done in private institutions for much less. There are reasons for that which I shall not take time to discuss in this bill, but I hope before the close of this session that we shall pass the printing bill that is now upon the calendar. By passing that bill we should save to the Government every year nearly $800,000; but when it comes to a matter of saving money for the Government, that is a horse of a different color. Bills that take the money from the Treasury can receive consideration, but bills designed to save to the Treasury and for the Government can wait until the new Congress comes in!

The Postmaster General has recently declared that if he were allowed to contract for the parcel-post business and for the rural free delivery, he could save in the latter case alone some $18,000,000 a year. Is there any better testimony to show that the Government can not do business in competition with individuals or individual corporations? In this one item alone we were told that there could be saved $18,000,000. I have not made an investigation to ascertain whether or not it is true; but if the Government were placed upon a business basis, if it were run on business principles, if we had power and authority to direct, to appropriate, and to organize the business of this country, I have not a doubt in my mind that it could be done for 25 per cent less.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from South Dakota?

Mr. SMOOT. I yield for a question only.

Mr. STERLING. Very well. I do not know whether the Senator's attention has been called to a statement made by the Secretary of the Treasury, in a letter of January 27, and which has been on our desks since that date or the date of the 28th of January. I should like to ask the Senator a question concerning one statement which the Secretary of the Treasury makes, although it may be that the Senator has covered the point in his discussion so far. However, on page 17 of his letter I find the Secretary of the Treasury makes this statement:

> Grain, cotton, and other commodities are usually sold "delivered" at the port of destination. When steamship companies raise the cost of delivery of grain from 6 cents to 60 cents per bushel it makes a vast difference in the price the farmer receives for his product and when ocean freight charges on cotton are raised from $1.25 to $15 per bale the price at which the farmer sells his cotton is seriously reduced.

The question I desire to ask is as to whether the Senator from Utah thinks that the farmer has to take any less for his wheat on account of the higher freight rates, or whether the farmer is receiving any less for his wheat on account of the higher freight rates, or whether or not the higher freight rates are not paid by the consumer—the foreigner—who purchases the American wheat?

Mr. SMOOT. Mr. President, in answer to the Senator from South Dakota, I will state that the American farmer gets the same price all over the United States less the freight to some port for exportation. The prices referred to for transportation by the Secretary of the Treasury are prices for cotton from a port in the United States to Germany.

They do not charge any such price to any port of England or France. So it is with the 60 cents a bushel rate upon wheat; they do not charge that rate to Liverpool. If they did, then it would take 60 cents off the farmer's price; but they do not do it. That is merely one of the arguments that is made. I venture to say to the Senator that there has not been one cargo of cotton shipped at $15 a bale, and if it were shipped to Germany and a charge of $15 a bale were made the man who bought the cotton paid for it the same price as that paid for the cotton that goes to Liverpool, and Germany pays that extra $13.75 a bale.

Mr. STERLING. That is what I wanted to ask the Senator—whether or not the cotton producer was obliged to take any less for his cotton per bale because of the transportation charge?

Mr. SMOOT. Not at all.

Mr. JAMES. Mr. President——

Mr. SMOOT. I doubt, Mr. President, whether there has been a cargo of cotton shipped to Bremen, where this rate of $15 a bale has been charged. There is no such rate to Liverpool, and the only reason for advances of freight rates at all is because it is almost impossible to secure men to unload the boats. I will call attention to-night to the number of vessels which have been lying outside of the different ports unable to be unloaded.

Mr. JAMES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Kentucky?

Mr. SMOOT. I want to say, Mr. President, to the Senator from South Dakota——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Kentucky?

Mr. SMOOT. If the Senator will be patient a moment, then I will yield for a question.

I want to say to the Senator from South Dakota, in answer to his question, that if a hundred bales of cotton should go to Liverpool and a hundred bales of cotton should go to Bremen at the $15 a bale rate the cotton grower in the South would receive exactly the same price, and the cotton shipped may come from the same warehouse, bought upon the New York market the same day for the same price. There is no doubt in the world about that.

Mr. JAMES. The Senator tells us that the freight rate makes no difference to the producer——

Mr. SMOOT. No; I do not want the Senator to make a broad assertion of that kind.

Mr. JAMES. That is what I thought the Senator's argument meant.

Mr. SMOOT. Oh, no; I said——

Mr. JAMES. But aside from that——

Mr. SMOOT. If the Senator wants to ask me a question, let him ask it and not make a speech.

Mr. JAMES. That is what I am predicating it on.

Mr. SMOOT. Certainly; the producer does not pay the 60-cent rate on wheat to Bremen or the $15 a bale on cotton.

Mr. JAMES. I am going to take you to another product that is a little closer to our hearts in Kentucky than either cotton or wheat, and that is tobacco.

Mr. SMOOT. I presumed the Senator had in mind tobacco or whisky; I did not know which.

Mr. JAMES. I refer to tobacco. The tobacco farmer formerly paid half a cent a pound freight from the East to Europe, but the freight rate has been increased to 3½ cents a pound. The tobacco buyers for France, Germany, and other foreign countries are telling our farmers that they must reduce the price of their tobacco 3 cents a pound below what they would otherwise get because of the freight rate charged to get their tobacco abroad, and they have consequently depressed the price of our tobacco to our farmers by reason of that fact.

If the Senator's argument is true that the freight rate does not affect the farmers at all, that it is paid by the producer, what would he say if the freight rate on tobacco were 50 cents a pound? Would that not affect the consumption of it, and would that not affect the demand for it; and if you affect the demand for it and the consumption of it, have you not thereby depressed the price?

Mr. SMOOT. Well, Mr. President, as usual, the Senator from Kentucky has built up a straw man and then commences to demolish him. The Senator from Utah has never said that the freight rates made no difference to the producer. It does not, however, make a difference where there are two rates such as are quoted by the Secretary of the Treasury. If there was a rate of 50 cents to Bremen and a rate of 10 cents to Liverpool on Kentucky tobacco, there would not be a difference of 40 cents a pound to the producer, because of the fact that there is a greater war risk to Bremen.

Mr. STERLING. Mr. President——

Mr. JAMES. Well, if the Senator's argument is true, Mr. President, if he will permit me——

Mr. STERLING. Mr. President, who has the floor?

The PRESIDING OFFICER. To whom does the Senator from Utah yield?

Mr. SMOOT. I yield to the Senator from South Dakota for a question.

Mr. STERLING. The question is this: If the expression as used by the Secretary of the Treasury, "sold, delivered"—the word "delivered" being in quotation marks—"at the port of destination," does not mean that the exporter of the product has sold it delivered, taking into consideration the freight rate?

Mr. SMOOT. And whatever risk there may be besides.

Mr. STERLING. Certainly.

Mr. JAMES. Mr. President, if the Senator from Utah will yield, I want to say that if the Senator's argument is true that the freight rate is paid by the consumer, then our farmers in their long and earnest advocacy of a board like the Interstate Commerce Commission to regulate and to lower freight rates have been very foolish in their advocacy for all these years of lowering freight rates and regulating freight rates by authority of a board appointed through governmental action.

Mr. SMOOT. The trouble with the Senator is that he is arguing upon one subject while I have been answering the question submitted by the Senator from South Dakota upon another. We have war times now; there are war risks at present; and they all affect the price of transportation. The risks are not all the same. The risk of shipping to a German port is much greater than the risk of shipping to an English or to a French or to a Russian port. There is not a shipper who does not know that; and nothing goes from America to the ports of any of those countries that the smaller risk is not taken into consideration, and there is not a shipment that goes to Germany on which the risk is not greater, and somebody has got to pay for it; and who pays for it?

Let us take the case of copper. What is Germany offering for copper to-day? It is not a question of price; it is a question of getting copper. The exporter does not have to pay more for his copper that he buys from the smelters of the West if it goes to England or France or Germany, but Germany has to pay more. Why?

Mr. SIMMONS. Mr. President——

Mr. SMOOT. Because the war risks are greater, Mr. President, and Germany pays for the war risk, but England does not. England can buy the copper, and if she does it arrives with scarcely any risk attached. The insurance to-day upon shipments to England or France or Russia is very little more than it is in time of peace, and why should it be?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from North Carolina?

Mr. SMOOT. If the Senator will wait just one moment.

Mr. SIMMONS. Oh, I am patient.

Mr. SMOOT. No; I do not think the Senator from North Carolina has been patient.

Mr. SIMMONS. I want to be patient.

Mr. SMOOT. I think the Senator from Utah is the patient one.

Mr. SIMMONS. We have all been very patient with the Senator from Utah to-night, I am sure.

Mr. SMOOT. I am sure the Senator from Utah has been very, very patient with the Senator from North Carolina and other Senators injecting remarks into his speech.

Mr. SIMMONS. I am in favor of patience.

Mr. SMOOT. You know, I am not in the position of the Senator from Arkansas when you Democrats were filibustering in order to defeat the ship subsidy bill in 1891. He had the rules of the body enforced, and he warned the Republicans that, no matter if they were in the majority, they had to be in their seats, and it would not do to be in the cloakroom, nor would it do for them to go home, and if they did a quorum would be called.

Mr. SIMMONS. I wish we could have a rule of that sort now, Mr. President, so that the Republicans would have to stay in their seats and not stay in the cloakroom.

Mr. SMOOT. Yes; but that rule would apply then to Democrats, as well.

Mr. SIMMONS. It is a mighty good rule.

Mr. SMOOT. That rule then applied to majorities, and it ought to apply now to majorities.

Mr. SIMMONS. I think it ought to apply to minorities, too.

Mr. SMOOT. No; it did not apply to minorities then. Mr. Jones, of Arkansas, could have taken the floor, and all the others, with the exception of one to suggest the absence of a quorum, could have gone home; and it was not held then that a man who, while on the floor delivering a speech, yields to a Senator and does not say in his statement that it is only for a question, is deprived of the floor. No, Mr. President; no such rule as that was ever enforced in this body before.

Mr. SIMMONS. The Senator has been talking so fast to-night that I have no doubt he is tired, and would welcome suggestions.

Mr. SMOOT. Oh, no; I do not welcome them. Therefore I want to say to the Senator that if that is all the object he has in his request, I refuse to yield.

The PRESIDING OFFICER. The Senator from Utah refuses to yield.

Mr. SIMMONS. The Senator has refused to yield twice to-night.

Mr. SMOOT. Certainly I have refused to yield.

Mr. SIMMONS. He has a perfect right to refuse the third time if he wants to; but I want to say to the Senator from Utah——

Mr. SMOOT. Now, Mr. President——

The PRESIDING OFFICER. The Senator from Utah refuses to yield.

Mr. SIMMONS. I have never refused to yield to the Senator from Utah since I have been a Member of the Senate.

The PRESIDING OFFICER. The Chair wishes to state to the Senator from North Carolina that the Senator from Utah refuses to yield.

Mr. SIMMONS. I will desist if the Senator from Utah is not willing to yield to me.

Mr. SMOOT. No; I am not willing to yield to the Senator on the basis on which he puts it, because I am not tired.

Mr. SIMMONS. I thought the Senator was.

Mr. SMOOT. I am not.

The PRESIDING OFFICER. The Senator from Utah will proceed. He is entitled to the floor.

Mr. SMOOT. Why, I want to say to the Senator that it is now only 20 minutes of 2 o'clock.

Mr. JAMES. I ask for a vote, Mr. President.

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Kentucky?

Mr. JAMES. No; I did not ask the Senator to yield. I thought he had yielded the floor. I was asking for a vote.

Mr. SMOOT. That is the way the Senator from Kentucky would force a vote. He asks a question to draw me off, and then, when I am trying to get back to where I was when he started, he calls for a vote.

Mr. JAMES. No, Mr. President; the trouble with the Senator is that he is not quite so easily drawn off from what he is talking about, because he has been rambling around all over everything——

Mr. SMOOT. Mr. President, I will say to the Senator from Kentucky that I have yielded to him when he has asked me to do so, and every time I yield to him he enters upon a long harangue, a political speech of some kind.

Mr. President, I was discussing the cost of the Government running a business as compared with the same business directed, controlled, managed, and operated by an individual or a corporation.

Mr. WHITE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Alabama?

Mr. SMOOT. For a question.

Mr. WHITE. I just wanted to ask the Senator from Utah, when he was speaking about the cost of the Government carrying on business, if he had any reference to the cost of carrying on business in the Senate?

Mr. SMOOT. Mr. President, of course I have heard that question asked very often, when it suits the convenience of Senators upon that side; but I do not think the Senator from Alabama has any advantage over the Senator from Utah in the length of time that is occupied by either one in the Senate of the United States.

Mr. WHITE. I have been here only a very short time, Mr. President. I have hardly been in the Senate as long as the Senator from Utah has been talking. [Laughter.]

Mr. SMOOT. The Senator may not have been in the Senate as long as I will be talking, but I certainly know that he has been in the Senate longer than I have been talking.

Mr. WHITE. I am sure I will not be in the Senate as long as the Senator will be talking, because I go out on the 4th of March.

Mr. SMOOT. I have really forgotten now what the Senator's question was, but I suppose it was of so little importance that the Senator does not care whether I answer it or not.

Mr. President, when the Senators get through with their hilarity, I will proceed; but not until they do.

The PRESIDING OFFICER. The Senator from Utah will proceed. There is no disorder in the Senate at present.

Mr. SHEPPARD. Regular order!

Mr. SMOOT. Mr. President, I was referring to the statement made by the Postmaster General that if he were allowed to contract for the Parcel Post Service and the rural free delivery, he could save to the Government of the United States $18,000,000 a year. This is a confession on his part of the failure of the Government in that line of business, though he wants it to vastly extend its ownership by taking over the telegraph and telephone lines of the country. On the one hand he says that Government control is a failure, and on the other hand he asks for more power. He wants to take over the telegraph and telephone lines of the country, I suppose, to make another failure. If the little business referred to by him loses to the Government, in comparison with the business if maintained and operated by an individual, $18,000,000 a year, for Heaven's sake what would it be in case we took over the telephone and telegraph lines? Nobody could tell, but it would be millions and millions of dollars.

The Government of the United States can not conduct a shipping business without loss. The Government of the United States can not operate the shipping business as cheaply as it can be operated by private parties. This bill offers no hope for any relief to shippers excepting at public expense, and I defy any Democrat in this Chamber to say that these ships will be operated by the Government at a profit.

Mr. OWEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Oklahoma?

Mr. SMOOT. For a question.

Mr. OWEN. The Senator has just made a challenge that I was going to answer; but since he limits it to a question, I will ask him if he is not aware of the fact that every nation in Europe, almost without an exception—I think without a single exception—certainly 14 nations do conduct their public utilities, such as telephones and telegraphs and railroads, more economically than they are conducted in this country?

Mr. SMOOT. The latter part of the question is well put in. Cheaper than in this country! I hope so. Public utilities in Europe! Has the Senator been to Europe and seen how they are operated? Has the Senator been there and seen the class of people that operate them? Does the Senator know what they pay those operatives? I hope it will never happen in my life that the Government owning and controlling the public utilities will undertake to operate them as they are operated in foreign countries.

Mr. OWEN. Mr. President——

Mr. SMOOT. I do not want to live to see the day when my children will have to work for the Government of the United States for the wage that is paid to the employees of public utilities owned by the Government of Germany.

Mr. OWEN. Mr. President, I should like to ask the Senator whether he was asking a question when he addressed various inquiries to the Senator from Oklahoma, or whether he was making his peroration?

Mr. SMOOT. No, Mr. President; I was not asking a question, because I do not want to insult the intelligence of the Senator. He knows that there is a difference, and I know he knows it.

Mr. OWEN. Will the Senator permit a question?

Mr. SMOOT. No; I will proceed, Mr. President.

I make the statement again that this bill offers no hope for any relief to shippers except at public expense. Why, even the Senator from Mississippi acknowledged that; but he undertook to argue that if the people of the United States received cheaper freight, and if the Government of the United States had to pay the difference, that would be clear gain to the people. What a silly position! The people of the United States pay every dollar that goes into the Treasury of the United States in one way or another.

It would be like robbing Paul to pay Peter; like taking a dollar out of one pocket and putting it into another and claiming that you have made a dollar.

Mr. OWEN. The Senator is denying the protective-tariff doctrine.

Mr. SMOOT. No; I am not denying anything relating to the tariff. If you want to enter into a tariff discussion to-night, I am perfectly willing to meet the Senator upon that question. There is no doubt about it; just wait until the American people get one more chance at the Democratic Party, and they will let it know who pays the tariff.

Mr. BRISTOW. Mr. President——

Mr. SMOOT. I yield for a question only.

Mr. BRISTOW. I desire to ask the Senator why it is that the representatives of the present administration are so exceedingly anxious about the freight rates on the ocean while they are increasing the freight rates which the American people have to pay on land?

Mr. SMOOT. That is a question, Mr. President, that is worthy of a speech in itself. I say to the Senator that I would not feel like undertaking it unless I had at least two or three hours to discuss it. It is filled full of serious questions. It goes to the very heart of a number of questions that the people of the United States ought to know; the facts are leaking out little by little, and I think it will not be many years until the people will know the whole truth.

I do not know all that is back of this bill. We will learn after a while. We will learn what influences are pressing it and what they intend to get out of it. Take our experience in the War with Spain. We found ourselves helpless as far as auxiliary ships were concerned.

Mr. OWEN. We licked Spain.

Mr. SMOOT. Yes; we licked Spain, because she was a poorly prepared country; but we had to go to a foreign country to get auxiliary boats, just the same as we would have to do at present if we became involved in war.

If I was going to be extravagant in Government appropriations it would be for our national defense. We should learn by the lesson that was taught us in the purchasing of ships during the War with Spain. In some cases the price that was paid for the ships was such that when they were sold, not two years later, they did not bring 10 cents on the dollar.

Mr. OWEN. That was in a Republican administration.

Mr. SMOOT. Yes, Mr. President; it was; but if the Republican Party had had its way and used such rules as have been used in the consideration of this measure we would have had the merchant marine established, and we would have paid only a small subsidy to have done it. We would not have had to purchase the boats at the time we had trouble with Spain.

Mr. OWEN. You would have paid subsidies to the trusts?

Mr. SMOOT. I do not know how long it will take some Senators to forget the hackneyed word trusts, but there is never any legislation they are opposed to but what they cry "trusts!"

"trusts!" I think the people of the United States will know a little more about what party is fostering trusts after this bill passes than they have in the past. I think if the lobby committee that was appointed by the Democratic majority would get to work now they would find an insidious lobby in Washington, and that it had been here for months.

Mr. OWEN. Certainly the papers of Washington are against the bill.

Mr. GALLINGER. Mr. President, I rise to a point of order. I insist that the rule shall be observed and that a Senator shall not speak when sitting in his chair.

The PRESIDING OFFICER. The rule of the Senate is that a Senator must rise and address the Chair and get permission before he can speak.

Mr. GALLINGER. That is a right rule and it ought to be enforced.

The PRESIDING OFFICER. The Chair hopes that Senators will respect that rule. The Senator from Utah will proceed.

Mr. SMOOT. I would not have thought about trusts or have mentioned them unless it had been brought to my attention by the fertile brain of the Senator from Oklahoma [Mr. OWEN]. When we were considering the bill granting free tolls for American ships through the Panama Canal I could not help, in following that discussion, to observe that my friends on the other side pleaded for free tolls in order that the unjust freight rates would be lowered and prevent the railroad trust from further robbing the people. When they were ordered by the President of the United States to repeal the law the same Senators argued that it ought to be repealed to cripple the shipping trust.

I say, Mr. President, I would like to have the lobby committee get busy. I do not think it would be very hard to find the lobbyists. I do not think it would be very hard to find men deeply interested in selling to the United States German interned boats. I do not think it would be very hard to find men with old painted tubs in different parts of the world here to sell them to this proposed shipping board. If they were first-class boats they would be in service. The owners of boats to-day all over the world are reaping a harvest because of the fact that they are in a position to dictate as to what freight rates they may charge. Mr. Irving T. Bush, president of the Bush Terminal Co., recently pointed out that England has 4,235 ships in the foreign trade.

Mr. KERN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Indiana?

Mr. SMOOT. For a question.

Mr. KERN. What is the name of the gentleman?

Mr. SMOOT. Mr. Bush.

Mr. KERN. Anheuser Busch?

Mr. SMOOT. Oh, no; this Bush is spelt B-u-s-h. I am not a beer drinker, so I do not know how the Busch beer man's name is spelled. However, I do not believe it is B-u-s-h. I think it is B-u-s-c-h, and there may be a letter or two more in it. Mr. Bush points out that England has 4,235 ships in the foreign trade. Under this bill the United States might get 30 to 60 ships by the expenditure contemplated by President Wilson. Suppose you bought them all, suppose you could buy them all, you would have to buy ships that are in the trade to-day, and it would not relieve the situation at all.

What would 30 ships amount to in the commerce of the world?

Mr. President, it is perfectly absurd to think that it is going to have any influence upon rates. If we had 2,000 ships, if we controlled that number, there would no doubt be competition, but to think that 30 ships would influence the trade is absurd. It may, however, be sufficient to carry a part of the cotton, but as far as carrying the commerce of the United States to foreign countries is concerned, as far as taking care of our exportations as a whole is concerned, not for one section of the country but as a whole, it is ridiculous. Practically nothing could be accomplished by the expenditure of the amount provided for in this bill.

The great trouble with our competing in the foreign shipping trade grows out of the much higher wages paid in this country than elsewhere. The cost of constructing a ship is more in this country and the cost of operation is necessarily more. The fact that the Government operates a ship will not relieve that situation in the least. The Democrats have been legislating to meet that situation by admitting foreign-built ships and by allowing them to be manned by foreign crews and foreign officers, a policy, Mr. President, that never should have been allowed. But even with this poor policy, what has been the result? Has it assisted us to any degree in handling our over-sea trade? Let the figures speak.

If such legislation were taken advantage of to any great extent, the shipyards in the United States would necessarily suffer, because foreign ships would be obtained instead of American-built ships. Our shipyards could not compete with those of foreign countries without reducing wages to the foreign level. I have not heard any Democrat in this discussion claim that the wages were not less in foreign countries than in our own. I can take our own Government reports and show the class of employees upon the ships carrying our commerce on the seas, and I venture the statement now that there is not any class of employees on a foreign ship that receives anywhere near the same wage they receive upon an American ship of the same size and the same class of ships. Some countries do not pay more than perhaps 40 per cent. Some pay less than that.

That is only one item in the cost of operating ships. Our shipyards could not compete, as I have stated, with those of foreign countries without reducing wages to the foreign level. Is that what our Democratic friends want? That is what they are seeking to bring about; but so far their efforts have resulted in a miserable failure. Some foreign vessels have been brought under our flag, but in nearly every case they were vessels owned by Americans and manned by foreign crews, not by American crews.

Mr. FLETCHER. May I ask the Senator from Utah a question?

The PRESIDING OFFICER (Mr. OWEN in the chair). Does the Senator from Utah yield to the Senator from Florida?

Mr. SMOOT. I yield for a question.

Mr. FLETCHER. I want to ask the Senator from Utah if he has figured out what percentage of difference there is in the wage cost, the labor cost of operating vessels under the American flag and under foreign flags—if he has arrived at that estimate?

Mr. SMOOT. Mr. President, it would be impossible for me to state the exact percentage, because that is necessarily different in different classes of vessels. It is different in a larger ship as compared with a smaller ship; it is different as to where the ship is built and what class of people man it. I have heard the Senator from Florida say during this discussion that there was only a difference of about from 5 to 10 per cent. On one occasion he did say 15 per cent.

Mr. FLETCHER. That is the estimate of the committee that reported to the New York Chamber of Commerce, and I was arriving at the possible average. The Senator might state the average. I have seen it stated that the average difference would be about 18 per cent between the wages paid on American vessels and those paid on foreign vessels.

Mr. SMOOT. Why, Mr. President, there is not any country which does not pay 18 per cent less than we do, and there are countries that pay from 60 to 75 per cent less—that is, as to the wage of the crew. The difference, of course, is less as to the officers.

Mr. FLETCHER. Then, I will ask the Senator from Utah another question. The Senator has been making some observations with reference to the Democrats apparently favoring lowering the rate of wages paid on American vessels, and he seems to be very much opposed to that. I would ask the Senator if he would favor what is known as the seamen's bill, sometimes called the La Follette bill, which is pending?

Mr. SMOOT. Most of the provisions of that bill meet with my approval, as the Senator from Florida would know if he was present when the bill was being discussed. I think the Senator from Wisconsin [Mr. LA FOLLETTE] knows very well my attitude upon the bill.

Mr. FLETCHER. Does the Senator favor that provision of the bill which authorizes a seaman, shipped on a foreign vessel, arriving in one of our ports, to demand one-half of the wages earned and the privilege to leave the vessel and demand the proportion of the wages earned?

Mr. SMOOT. I do not think that is the vital part of the bill at all. I do not see that there is very much in that, and I never have thought there was very much in that particular point in the bill.

Mr. FLETCHER. I think that is one of the main points insisted upon.

Mr. SMOOT. I think that is one of the main points insisted upon by some of the conferees; I do not doubt that; but in my opinion it is not a vital part of the bill at all.

Mr. FLETCHER. Is not that the main point insisted upon by the people interested in advancing the cause of labor—the working people engaged on the ships?

Mr. SMOOT. That is one of the points; but I do not think it is the main point by any manner of means. They have never led me to believe that it was the main point at any time in any discussion that I ever had with any of them.

Mr. President, a change of the flag floating over the vessel amounts to nothing in the way of helping American business; and I think the Senator having this bill in charge will admit that what few vessels are flying the American flag to-day, and running under it, were before the European war operating under foreign flags and cut very little figure in the transportation of our products across the seas.

Mr. FLETCHER. I will say with reference to that, if the Senator will permit me, that most of the vessels which were transferred to the American flag are owned by people engaged in business, and who are using them for their own business.

Mr. SMOOT. Certainly.

Mr. FLETCHER. Such as the Fruit Co., the Standard Oil Co., and the Steel Corporation.

Mr. SMOOT. The United Fruit Co. and the Standard Oil Co. are the only ones that have come under our flag; and the prediction was made upon the floor of the Senate by those who were opposed to the measure that they would be the only ones to come under the American flag. I make another prediction to the Senator now, and that is, that just as soon as the European war is over and there is no risk, they will go out from under the American flag and will again operate under a foreign flag.

Mr. FLETCHER. In that situation, then, we have no hope that private enterprise will ever develop a merchant marine.

Mr. SMOOT. Not until there is some subsidy offered, which will make up the difference between the cost of operating ships under a foreign flag and operating them under American laws and under American conditions.

A subsidy to our shipping interests, I will say to the Senator, is the same in principle as protection is to any industry in this country; it is the same as protection is to the great product of Louisiana—sugar.

Mr. POMERENE. In other words, the Senator admits that protection is a subsidy?

Mr. SMOOT. Mr. President, I object to Senators sitting in their seats and making side remarks. It has been going on all night. I did not hear what the Senator said. I will yield to the Senator from Ohio if he wants to ask me a question, but I do object to him turning his back to me and also to the Chair and making some side remark that we can not hear.

Mr. POMERENE. Mr. President, I recognize the fact that the Senator from Utah is "monarch of all he surveys," and I do not care to interrupt him when he is in such an amiable mood.

Mr. SMOOT. Then, Mr. President, the Senator was entirely out of order in interrupting me. I am perfectly willing, as I said before, to be interrupted if the Senator wants to ask me a question; but when the Senator turns his back not only to me but to the Chair and says something that I can not for the life of me hear, I do not think it is in order, and I object to its further continuance. It has been going on all the evening.

The PRESIDING OFFICER. The objection is sustained.

Mr. SMOOT. I was saying, Mr. President, the question of a subsidy for the building up of our merchant marine is no different than a protective tariff to build up our industries in this country. The shipping business is in the same identical condition, because of having no protection in the way of a subsidy, that our sugar business will be in just as soon as the war is over.

When that time comes there will not be a sugar factory in the State of Louisiana that can successfully operate; and there will be very few sugar factories in any part of the United States when sugar beets are again raised in foreign countries now at war and sugar produced for themselves and for export.

I know that the beet fields of Belgium are trampled bare. The millions of Belgian people of that stricken country have been driven beyond its borders. The beet fields of Germany are not yielding what they have in the past; nor are those of France. The present price of sugar is due to a shortage in the world's crop, and when the war is over there is no question that, unless the provision of the tariff law placing sugar upon the free list to take effect in 1916 is repealed, the sugar industry of this country is doomed.

I only refer to this because the question was asked whether or not private initiative, private individuals, would build up our merchant marine. I say that they will not do it and they can not do it unless they receive a bounty, a subvention, or some sort of assistance from the Government of the United States. I have said, Mr. President, that the change of the flag floating over a ship amounts to nothing by way of helping American business. The Democrats have tried to get a measure through Congress taking away all the protection for our coastwise shipping. When that amendment was first offered in this body I thought it was done for delay. I did not think there were any Members of the Senate who would vote for such a proposition. Certainly no one who had studied the question would think of such action as that, because he would know that it would be the beginning of the end of our coastwise trade, a trade that has grown until it is the pride of the country, and acknowledged by all the world to be better than that of any other country, and yet we find introduced into the Senate amendments the effect of which would be to take away all protection to our coastwise shipping. A conference report for that purpose was brought before Congress at the last session, but fortunately it was not adopted and the measure did not get on the statute books.

Our coastwise shipping is something the country can well be proud of. We have 7,000,000 tons of coastwise shipping. Senators, would it not be a splendid thing if our over-seas trade had increased as our coastwise trade has increased? Would it not be a splendid thing if we had ships plying the oceans of the world, the fastest and the best in all the world, ships that we could call to the aid of our Navy in time of war, ships that would be at our command? I want to say to Senators that if we had taken the same course in the upbuilding of our over-seas trade that we have taken in building up our coastwise trade we would to-day be in an independent position as far as carrying our products to foreign markets is concerned.

Mr. MARTINE of New Jersey. Mr. President, I can not resist——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from New Jersey?

Mr. SMOOT. I yield for a question.

Mr. MARTINE of New Jersey. I want to ask a question of the Senator. With omnipotent authority in both Houses of Congress, pray God, why have you Republicans not built up such an establishment of ocean carrying trade?

Mr. SMOOT. Well, one reason——

Mr. MARTINE of New Jersey. You have been derelict, then, in your duty, and you can not complain of us, for we have only had the reins of power for a year and a half, or thereabouts.

Mr. SMOOT. Well, Mr. President, if the Senator will look at the records of Congress——

Mr. MARTINE of New Jersey. I do not want any record; I know the fact that you have not built it up, and why have you not done so?

Mr. SMOOT. If the Senator will permit, I will gladly answer him. For one reason, we have not used the rules of this body the same as they have been used to-night. That is one reason. Another reason is that the Democrats have stood upon that side of the Chamber when they were in the minority and have filibustered to death bills providing for a merchant marine. I say to the Senator that we have had a President of the United States who would sign such a bill; we have had Senates that would have passed such a bill; but we have never yet had a bill pass the House and come to the Senate unless there was a filibuster to kill it by the minority.

Mr. MARTINE of New Jersey. Oh, well, it ill becomes the Senator to argue against filibusters when his party, by a method that was infallible in its operation, carried on a filibuster.

Mr. SMOOT. If the Senator will favor me with his presence——

Mr. MARTINE of New Jersey. I have, very assiduously.

Mr. SMOOT (continuing). And be patient for a while longer——

Mr. MARTINE of New Jersey. Oh, yes; I am going to.

Mr. SMOOT (continuing). I might take a little time in reading some of the Democratic filibustering speeches that have been made against establishing an American merchant marine. I want to get in the RECORD a little data on this point.

Why, Mr. President, I know of Senators that have based their claim for reelection on their filibuster record. I remember Senators who went home following a filibuster and told their people how they stood up on the floor of the Senate, and how every power they possessed, mental and physical, had been exerted in behalf of the people of their States to defeat a bill for the establishment of a merchant marine. Oh, the hills of their States rang with their filibustering achievements.

Mr. President, I stated, when I was interrupted, that a conference report for the purpose of depriving our coastwise trade of all vestige of protection had been proposed through an amendment offered in the Senate, and a conference report for that purpose was brought before the Congress at the last session—just the last session.

Mr. MARTINE of New Jersey. Yes; but go back further.

Mr. SMOOT. Fortunately, however, it did not get on the statute books. No Republican Congress has ever suggested the repeal of our coastwise laws. No Republican Senator has ever suggested that that great industry be destroyed; but it would have been destroyed if this conference report had been agreed to a year ago. The Senator objects to conference reports of that kind, and so do I.

Mr. MARTINE of New Jersey. No; I beg pardon, Mr. President, I only want to say——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from New Jersey?

Mr. MARTINE of New Jersey (continuing). That that does not answer my question. I am talking of a time and a season far beyond that conference report.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from New Jersey to the rules.

Mr. MARTINE of New Jersey. Well, I asked the question, and I repeat the question, why, with power omnipotent——

The PRESIDING OFFICER. The Senator from New Jersey must address the Chair and obtain permission before interrupting.

Mr. MARTINE of New Jersey. I realize that, Mr. President. I ask that the Senator will yield for a question, which I will put again.

The PRESIDING OFFICER. Does the Senator from Utah yield for a question to the Senator from New Jersey?

Mr. SMOOT. Yes, Mr. President; but I think it will be the same question that was asked and that I answered before.

Mr. MARTINE of New Jersey. It will be; but I have heard no answer.

Mr. SMOOT. Then the Senator will have to wait until I reach the subject, because I am not going to be diverted at this particular time.

Mr. MARTINE of New Jersey. I thought this was just on that question.

The PRESIDING OFFICER. The Senator from Utah declines to yield.

Mr. SMOOT. I will give the Senator all the evidence he wants before I get through. I assure him of that.

Mr. MARTINE of New Jersey. The Senator will not be able to do it between now and to-morrow morning.

Mr. SMOOT. That is not the only day that is left.

Mr. MARTINE of New Jersey. No; nor next week, nor next year.

Mr. SMOOT. We have until the 4th of March.

Mr. MARTINE of New Jersey. Thirty years of dereliction can not be answered in 10 days.

Mr. NORRIS. Or ten times 10 days.

The PRESIDING OFFICER. The Senator from New Jersey must address the Chair.

Mr. MARTINE of New Jersey. Well, all right—or ten times 10 days.

Mr. SMOOT. Mr. President, I have been diverted so many times.

The PRESIDING OFFICER. The Senator from Utah has the floor, and will proceed.

Mr. SMOOT. I was discussing the question as to the wisdom of withdrawing all protection from our coastwise shipping. We have 7,000,000 tons of coastwise shipping. It has doubled in 23 years. If we had no protection for it, instead of doubling in 23 years we would be carrying about 5 per cent of our coastwise shipping, or not to exceed 8 per cent, as 8 per cent is what we are carrying now of our overseas shipping. Since 1878 the coastwise shipping has increased 4,502,830 tons, but in the same time the shipping in the foreign trade has declined 570,183 tons up to 1913, so that the amount now employed in that trade, the whole of it everywhere, upon every sea, going to all the ports that the few ships we have go to, is only about 1,000,000 tons. Our coastwise trade is seven times the amount of our foreign trade.

The coastwise shipping is absolutely protected from any foreign competition, but the ocean carrying trade, as I stated before, has no protection. That tells the whole story. All the fine-spun arguments, all the speeches that may be made and prepared by interested parties, can not deny it. That is the story, told so plainly that a wayfaring man, though a fool, can understand it. The coastwise fleet is largely composed of steam tonnage, and 1 ton of steam tonnage is usually reckoned as equivalent in efficiency to 3 tons of sail tonnage. Our coastwise fleet, built up under absolute protection, is the greatest in the world. It is not merely a trade of short and sheltered voyages, as we often see stated, and he who states such a thing does not know the true conditions, or at least he is misinformed.

The distance from New York to San Francisco through the Panama Canal is 5,000 miles, or nearly twice the distance from Sandy Hook to Liverpool, and yet that is coastwise trade, taken care of by American ships. Freight rates have decreased; and in fact it will do the Senators an immense amount of good if they will take the time to go and get the rates that were charged from one port to another by our coastwise ships 20 years ago and follow them down to the year 1913. With the single exception of some extraordinary occasion, some unforeseen event, those rates have steadily declined. It is true that at times, as I have noticed and as everybody knows who has studied the question, the rates temporarily have fluctuated, but upon the whole they have been steadily declining, so much that in ordinary times the rates charged are so reasonable that you hear little complaint from the shippers of this country.

The papers of the country have not been filled full of complaints of exorbitant charges in our coastwise shipping. Appeals have not been made as they have been made in the case of the railroads of our country. I live in a State that never expects to enjoy special advantages from water shipments, but the merchants and people of my State have suffered long years from extremely high railroad rates. When we had the long-and-short-haul clause before the Senate of the United States, I showed to the Senate that in the case of a shipment of one carload of structural steel to San Francisco, a thousand miles beyond Salt Lake City, the freight rate upon that car was nearly $240 less than it would be if shipped to Salt Lake City. I showed at that time that certain buildings were being erected in the city of Salt Lake and that the freight charges upon the structural steel that went into one building alone would exceed by $20,000 the freight rates upon the same identical steel if it were shipped to San Francisco.

I have had men say to me, "Why do you take an interest in the shipping business? Your State is not interested in it, why should you be interested in the question?" Mr. President, I am interested in the question from principle, nothing less and nothing more. I have not a cent invested in a ship or a boat of any kind, never have had and never expect to have, but I do know enough about the business to know that unless there is protection given to that trade it can not exist, it is absolutely impossible unless—and I can not think of anything else—we descend to the same level of living, unless we place our laboring men in the same unfortunate condition that they are placed in abroad. It would be impossible for us to compete. No one goes into any business unless there is some chance of success. No one is going to build ships for the transportation of our products from this country to a foreign country unless there is some chance of financial returns. They may be loyal to the country, they may have the interest of the country at heart, but they will not go into business when they know it is absolutely impossible to make ends meet. Therefore, Mr. President, we have got to treat this subject upon the same broad principle that we treat other industries of the country which require protection as against conditions existing in foreign lands.

As I stated, I live away from the coast a thousand miles, but I am just as much interested in an American merchant marine as is the Senator from New Jersey [Mr. MARTINE], who lives right upon the water's edge. I am not a spotted protectionist. There is not an industry in the South that needs protection but what I would vote for it just as soon as I would vote for anything in which my State is interested. I do not care where the industry may be located, if it is an American industry I am for it.

Mr. MARTINE of New Jersey. I thoroughly believe, Mr. President, that the Senator is utterly sincere in that sentiment, and I do not disagree with him in it.

Mr. SMOOT. Therefore, Mr. President, I am sorry to see this bill before the Senate. I am sorry to see the question drifting into politics. It is something of more vital interest than politics. As I stated in my opening, if it were politics I would allow the bill to pass.

Some people have asked me, "Do you believe in a tariff commission? Are you afraid of an unbiased examination of the principles of protection?" No; Mr. President, I am not, and I would like to see a commission composed of men not biased politically, not a commission that can be dictated to. I would like to see a commission composed of men with the ideals of the men who composed the Interstate Commerce Commission when it was first organized. If we could have such a commission, I would not doubt, and I feel like saying I know, what the result would be. I am not partisan enough to wish to see that question continued in politics. I would like to see it settled, and I would like to see the future political battles between the great parties fought upon questions that involve the fundamentals of our Government. I believe, Mr. President, if that time ever comes, and I believe it will, there never will be a scene like the present.

Senators, this is the first time in my life that I have ever stood on the floor of this Chamber and discussed a question that I thought in my soul it was my duty to go to any length in fair and honorable debate to defeat. If I did not think that my country was in danger by the passage of this bill I never would say another word upon it. But it is filled full of risks, and if it ever enters upon the high sea of commercial life I hope that the overruling Providence that has held this land so long in the hollow of His hand and made it the cradle of liberty will guide it from the shoals and the rocks that lie in its course.

Mr. President, there are 24,756 vessels in our coastwise trade, and fully seven-eighths of our American officers and sailors are engaged in the coastwise trade.

Mr. SHEPPARD. May I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Texas?

Mr. SMOOT. I yield for a question.

Mr. SHEPPARD. Does the number the Senator gave include the vessels on the Great Lakes?

Mr. SMOOT. They are included in the number I gave.

Mr. SHEPPARD. Does the Senator know how many are on the Great Lakes and how many are on the coasts?

Mr. SMOOT. I have not looked up the question with a view of ascertaining just how many. The rates have been greatly reduced in that trade and are more stable than in the foreign trade. That is natural. It is very natural, indeed, because in the foreign trade we have conditions affecting rates not only in this country but in every country in the world, whereas our coastwise trade is affected only by our local conditions. There always have been great fluctuations in the rates of our over-seas traffic. Sometimes there is a sudden increase of 100, 200, or 300 per cent, and under the present condition of war between all the great countries of Europe it has even increased more than that, particularly to points where boats have to pass through mined waters, and particularly where the product goes to a country the allies think is friendly in any way to their opponents.

In fact the only way we can obtain sailors and officers for ships of any sort in this country is from our coastwise trade. Our sailors are educated there. Our officers find employment there. You do not find any American officers on foreign ships. Germany never grants a subsidy to the owners of any particular line, but what she puts into the contract is a provision that all the boats shall be built in Germany. It was through that principle, and that only, that she has established her great shipping yards, and it was through that policy that she became one of the great carriers over the ocean to all parts of the world.

England, of course, has led her. In fact, the very existence of England depends to a large degree upon her shipping interests, and it necessarily must be so, Mr. President, for with those people, living as they do in that little island, not much larger than some of our States, compact, crowded, all struggling for an existence, as they expand there is not much else for them to do except to go upon the water; and they reach out for foreign business. They obtain it anywhere. They are the builders of cheap boats. They have cheap men to man the boats. They do not impose the restrictions upon their boats that we do. I believe in the restrictions that we impose, and I think they ought to be increased. Senators, I think that we all ought to feel that way.

I do not know whether I will ever want for anything in the world or not; I can not tell. I might lose all I have within a year. I and my family might be dependent upon a daily wage within that time. I am for the man who labors for a daily wage. I want my children to live in America and feel as I do. I never want to see the time come when the standard of citizenship, the standard of living is less than it is to-day; when the love of country will be less in the hearts of the people than it is to-day. Rather would I see it increase. Rather would I see the time come when every man and woman living under the Stars and Stripes shall be independent, so much so that not one of them will ever want for the necessaries of life. I believe, Mr. President, that that time will come, but it will never come unless the laws of our country are such as to equalize the higher cost of maintaining such standards as compared with foreign countries. I will support immigration laws that will raise the standard of American citizenship.

Mr. President, it has been stated that other countries do not assist their shipping by subsidies. A rose by any other name is just as sweet. I say now that there is not a civilized country on earth that controls any considerable part of the over-seas trade of the world that does not directly or indirectly pay a subsidy to its shipping interests. Great Britain followed that course for a great many years. After she got her merchant marine thoroughly established, far ahead of any other nation, subsidies were, to a limited extent, abandoned, but only to a limited extent. She has always paid subsidies, and is paying them to-day.

Oh, Senators, instead of throwing away by this bill $50,000,000 to begin with, why do you not pay a million or two million dollars in subsidies, and reach the same results without all of the dangers that this bill will involve us in? Is it because of the word "subsidy"? If it is, let us invent some other word that will accomplish the same results. Is it because of the platforms of the Democratic Party in the past? If it is because of the speeches that you have made in the past against subsidies, let us change the word and see if we can not get rid of the dangers involved in the pending measure.

England even loaned money to the Cunard Co. with which to build great steamships at a less rate of interest than the British Government had to pay to get the money. She also pays subsidies to that line and to other lines. She has been compelled of late to increase them. England is not afraid of the word "subsidy." England knows that that class of trade to which she pays subsidies is dependent upon subsidies. If she did not pay them, the shipping trade now enjoyed by her would be taken away from her by Germany, by Japan, by Austria, and a part of it by the little Scandinavian countries of the north.

We find ourselves, great America, with less shipping upon the ocean than has many of the smallest countries of the world. It is a shame. We would be in that same position, however, even if we did buy 30 ships, as is provided for under this bill. The trouble with this bill is that we would not only be liable to lose the most of the $50,000,000 to be invested in whatever second-class boats or tubs are purchased, but we do not know how much we are going to lose every year in operating them; we do not know, Mr. President, what trouble they may bring to us; they may cost us billions of dollars and an untold number of lives.

Germany built up her shipping interests under subsidies. She began them under Bismarck. She also adopted the protective tariff. The great prosperity that followed that policy is well known.

Mr. President, I remember well when France controlled the fine woolen trade of the world; I remember well when all of the patterns and all of the styles in woolens were made in France. We did not think we could get out a line of samples for the coming year without first securing from France the patterns of the coming season's styles. I have watched the transformation. That is not so to-day. To-day, or at least up to the time this war began, that work was done by Germany. The German people are the most methodical, the most systematic, and careful manufacturers in all the world. Why, Mr. President, they do not consider 25 years a long time in which to establish some new industry or discover some new article of commerce that will be of benefit to the world, and from which, of course, they expect to derive a profit.

The first time I visited one of the great chemical plants in Germany I saw a chemist in the employment of that great institution who had been set apart for one purpose—namely, to discover a dye that would take the place of indigo blue. It took 25 years to fully develop a substitute. The company did not give up the search in 10 or 15 or 20 years. It continued until success came, and when it did come it revolutionized the whole system of dyeing a fast blue. The Army of our country and of many of the old countries of Europe have adopted it in place of indigo blue, a color the world thought could not be duplicated.

Mr. SHEPPARD. Mr. President, I should like to ask the Senator a question about that. What color is that? I am very much interested in knowing.

Mr. SMOOT. Alazarin blue. So, Mr. President, that is only an instance to show the constant attention the German people give to everything they undertake to accomplish. They are a marvelous people and they stand high in all great industrial developments. For years past they have been reaching out and controlling the trade in many parts of the world. They spend a great deal of money every year in sending out representatives to all parts of the world, commercial attachés, with instructions to look up business conditions in the various countries and ascertain how the merchants of different countries desire their goods packed, in what shape they want them put up, to learn the customs of the people of the different countries, and Mr. President, they worked that system of extending their business just as perfectly and just as systematically as they did in working out the problem of making a synthetic dye to take the place of indigo.

Japan has built up a large shipping trade in a comparatively few years by the payment of subsidies and with the advantage

of her cheap labor. I do not believe that the proponents of this bill will claim that the seamen employed upon Japanese ships receive anything near the wages that the American seamen receive. Japan in the last few years has built up a merchant marine, which, if it continues to develop for another 10 or 15 years at the same rate, will be a marvel to the world. She does not confine herself to the Pacific Ocean. Her shipping trade now reaches all over the globe, and you hardly ever go into a port anywhere in the world without seeing, flying at the masthead of a number of vessels, a Japanese flag.

Mr. STONE. But you do not see the American flag.

Mr. SMOOT. We do not very often, and I am sorry to say it.

Mr. STONE. You ought to be, as you are very much to blame for it.

Mr. SMOOT. I have answered that suggestion already. This bill will never change that situation. There is only one way to change that, Mr. President, and that is to allow individual initiative, individual enterprise, coupled with a subsidy or protection that will make up the difference between the building and operation of boats manned and built by the Japanese and those that are built and maintained and operated by and under the American laws.

Germany even went so far as to use her railroads to help her shipping trade, by allowing goods shipped in German bottoms a lower rate to interior points of Germany. We could not do that, of course, under our laws, and the Government does not own the railroads as they are owned by the German Government. There are many things that are done in Germany that we can not do under our Constitution. The principle of the thing, however, is clearly shown, and the intent of the Government itself is clearly demonstrated by the results. She also gave favored rates on exports to her manufacturers that manufacture for home consumption, and she allows combinations and trusts to control the prices and distribution of goods made in Germany.

Mr. STONE. Do I understand the Senator to say that Germany gave a subsidy to manufacturers who manufactured solely for home consumption?

Mr. SMOOT. No; I said that Germany used her railroads to help her shipping trade by giving lower rates for export than for home consumption. If I did not express it in that way before, that is what I intended to say.

Mr. STONE. The Senator is becoming very weary and tired.

Mr. SMOOT. Mr. President, I am not going to yield for a speech, of course, because I do not want to be taken off the floor. France, Italy, and Russia and other countries pay subsidies, particulars of which were given in the speech of the junior Senator from Massachusetts [Mr. WEEKS], delivered on the pending bill. I shall not take time to go over the subject again. They are already in the RECORD.

Mr. STONE. Oh, put them in.

Mr. SMOOT. But I say that they are worthy of the consideration of the Senators upon that side of the Chamber. There is an untold amount of information contained in them—information that would be of service, and great service, to every Senator in this Chamber in arriving at what he ought to do in voting upon this measure. Moreover, those countries pay the tolls for their ships going through the Suez Canal, and some of them have already provided to pay whatever Panama Canal tolls are imposed. They did not hesitate to state what the appropriations were for. They make it known to the world. They never try to cover up anything; and, mind you, that was done before the bill repealing the free tolls for American ships passing through the canal was enacted into law. We knew at the time not only that these Governments had made provision that the tolls charged upon their boats going through the Suez Canal should be paid by the Government but we knew that they had also made provision to pay whatever tolls should be levied upon their ships going through the Panama Canal.

That is one reason why the act repealing that law was so unjust to our American shipping interests. American ships not only have to pay the tolls imposed by our Government but they come in direct competition with freight rates made by foreign shippers upon goods destined to the same ports that our own boats ship to. Their competitors have cheaper boats, cheaper men manning the boats, and cheaper provisions. Notwithstanding all these handicaps the party now in power, by a law passed at the last session of Congress, a law to which that party pledged its support in regard to passing coastwise vessels through the Panama Canal free of tolls, was repealed.

That is one of the most extraordinary and shameless acts ever perpetrated by a political party in this country. American vessels now pay tolls, while foreign vessels have their tolls paid for them by their respective Governments or receive equivalent subsidies. We have thus built the canal, at the expense of over $400,000,000, largely for the benefit of foreign shipping. The British Government exercises absolute control over the Suez Canal, and will not allow vessels belonging to friendly or unfriendly powers to pass through that canal. But Great Britain claims that we have no right of that kind at Panama, although we built the canal and own it; and the Democratic Party agrees with that contention.

Our coastwise shipping would have received a great impetus had the Democratic Party adhered to its declaration in favor of the maintenance of the law providing free tolls for such vessels in the canal. I hope that I shall never be found in the same position that my Democratic friends placed themselves in. Just take the RECORD and look at it—Senators voting for free tolls at one session, speaking for it with all the enthusiasm and power they were capable of exercising, raking the poor railroads fore and aft, appealing to the people's prejudices against the railroads, and claiming that they were voting for free tolls to American ships passing through the Panama Canal in order to protect the people from excessive freight rates charged by the railroads. I agreed with them. I voted for free tolls for American ships through the Panama Canal; but within a very few months a change came over the President and his party. The law was not satisfactory to certain interests who evidently directly or indirectly secured a hearing at the White House. Influences were put to work. I do not know where they came from, but it has been charged upon the floor of the Senate and in the public press that they came from Wall Street circles. But be that as it may, we do know that it was only a few months after the passage of the law until it was repealed, and Senators who stood upon the floor denouncing the railroads and their oppression turned completely around, reversing their vote and argument, and denouncing those who were opposed to the repeal as favoring the Shipping Trust instead of the railroads of the country, which they denounced a few months before as the railroad combination or trust. It did not make any difference which side of the question they took; they had the same old cry, "Trust! Trust!"

If we are made dependent upon foreign shipyards for our shipping as well as our sailors, we will be in a despicable condition in case of trouble with a foreign nation. Shipyards can not be constructed in a day, and if shut out from foreign yards without proper accommodations at home we would be practically helpless. Germany, under the Bismarck policy, provided herself with her own shipping facilities—yards and all necessary requirements attached thereto.

What if Germany had relied upon a foreign country for her implements of war; what if she had relied upon foreign countries for her shipping.

Mr. STONE. What do we rely upon?

Mr. SMOOT. We rely upon foreign countries, I am sorry to say. We could not enter into war to-day without securing auxiliary ships from some foreign country. That has been demonstrated so many times, and has been so demonstrated within a year. We have been humiliated in the past by such a condition of affairs, and I believe it should be changed.

Mr. STONE. That is what we want to do now.

Mr. SMOOT. Mr. President, that is not what this bill will do. Thirty ships——

Mr. STONE. I wish you would tell us how to do it.

Mr. SMOOT. I have told how to do it. The Senator has not been in the Chamber to listen to me, but I will repeat to the Senator in just a few words by way of repetition——

Mr. STONE. I will excuse the Senator.

Mr. SMOOT. The only way to do it is to do it like other countries, and that is by a subsidy, a subsidy that we know just what it will cost the Government. A plan, Mr. President, where politics will not be the first consideration, and where the question of what ships shall be purchased will cut no figure; a plan that will not fill the city of Washington with lobbyists for the purpose of selling to the Government beforehand, even before the bill was reported to the Senate or handed to the Senator from Missouri to introduce, boats, as provided for in this measure. I want a straight subsidy, and I would want to know exactly the amount of the subsidy and terms of the grant, and leave to personal initiation and the individual American how to work out the problem of operation.

Mr. ASHURST. Mr. President, will the Senator yield?

Mr. SMOOT. I yield only for a question.

Mr. ASHURST. For a suggestion?

Mr. SMOOT. No; just for a question.

Mr. ASHURST. The Senator states that he is in favor of subsidies, I believe?

Mr. SMOOT. Yes. I yield for a question.

Mr. ASHURST. I say the Senator, I believe, states he is in favor of subsidies?

Mr. SMOOT. I am in favor of building an American merchant marine by granting of subsidies.

Mr. ASHURST. The Senator is a very distinguished member of his party, but, in favoring subsidies, he does not agree with some other very distinguished members of his party.

Mr. SMOOT. Mr. President, it is impossible for every man in a party to agree upon every principle; but I want to say to the Senator from Arizona that the Senator from Utah never hesitates to let all the world know his position on any question, I do not care what it might be. My views, of course, may not coincide with the views of all members of the Republican Party.

Mr. ASHURST. If the Senator will pardon me just a moment——

Mr. SMOOT. Yes; for a question.

Mr. ASHURST. A very distinguished man, Hon. Joseph G. Cannon, Speaker of the House for some time, in denouncing subsidies, said:

> And these subsidy seekers came into this House, or rather, into Washington——

Mr. SMOOT. Mr. President, I want it distinctly understood that what the Senator has so far stated is not in the form of a question. It is not a question; and I do not want to be taken off the floor by the reading of any speech made by Joseph G. Cannon.

Mr. ASHURST. It is just a line, and it will not take the Senator off the floor.

Mr. SMOOT. I am not quite sure about that; the stage is all set for that to happen to-night. The Senator can not speak here for the Presiding Officer, and the course intended to be pursued has been demonstrated pretty thoroughly to-night, and I would very much rather the Senator would not go on. He can read it in his own time.

Mr. ASHURST. I am very certain if I should continue the Senator would be sorry I read it.

Mr. SMOOT. Not at all, Mr. President. That is not the point. It would make no difference what Joseph G. Cannon said upon the question of subsidy; that is his opinion. The Senator knows what my opinion is; and neither Joseph G. Cannon nor any other man living can dictate to me and make me change what I believe to be right.

Mr. ASHURST. It may be that it would not require dictation; it might be that a suggestion would be sufficient.

Mr. CLARK of Wyoming. Mr. President, I ask for order.

Mr. SMOOT. The vessels to be purchased under this pending measure, if it becomes a law, are principally German vessels. I know that has been contradicted here, but about the only man who has made a speech upon this question on the other side was the Senator from Montana [Mr. WALSH], and the Senator from Montana spent nearly his whole time in trying to show not only to the Senate but to the country that we have a perfect right to buy the German interned ships. A day or two before it was stated upon the floor that they were going to buy English ships and French ships and Italian ships, and had no intention of buying German ships. They did not say how they were going to do it. Every ship of the first three named countries is in use to-day. It is true if they had the men to unload the cargoes upon their arrival at the ports they could do more, but that condition exists. War exists in Europe, and the men who ought to be on the docks and attending to the commerce of the world have been called away from their vocations to the bloody conflict. As was shown by the speech of the senior Senator from Massachusetts [Mr. LODGE], there are very few of them who would be available for trade purposes. Germany would probably be very glad to get rid of her ships as long as they are interned. I have no doubt about it. If they are purchased, even if it be through Kuhn, Loeb & Co. or Max Warburg, they will never be sold for anything near what this Government will pay for them. That has been demonstrated a good many times in the history of our country.

I am going to tell the Senate of some of the purchases that have been made and what the sales were of those same ships. Interned ships are very expensive to their owners. One of the German companies owning interned ships—the Hamburg-American Line—if reports are true, has a man now in this country negotiating for their sale; and if the reports are true, they had him here before ever this bill was introduced into this body. This is the line that at the time of the Spanish War sold two of its best vessels to Spain to prey upon our commerce, and after it was found that nothing could be accomplished in that way the manager of the line took one of the vessels back. He afterwards came to this country to oppose a bill pending in Congress to give preferential duties to American shipping. To aid a company dominated by such a man would be in keeping with much of the other things that, if reports are true, have been done by the party now in power.

The Underwood tariff-law provision was made for preferential duties for American shipping, but that law was nullified by the Secretary of the Treasury with the approval of the President. The nullification of that provision and the repeal of the law providing for free tolls for coastwise vessels in the Panama Canal and the law admitting to American registry foreign-built ships with Lascars or Chinese crews and officers comprise the legislative acts of the party since it came into power in behalf of American shipping. Senators may believe that those acts are for the best interests of the American people. They may believe it just as firmly as I believe that they are not, and no doubt they do; but I am content, Mr. President, to leave that question for the future to decide.

As far as the first law mentioned is concerned, I think it is the almost universal opinion that it will have to be modified. If the Democratic Party does not do it, the American people will see that it is done. As to the other laws mentioned, it will not take very long until they demonstrate their wisdom or unwisdom. But take the second law mentioned, the law admitting to American registry foreign-built ships. What has the result been? Has it helped the American people? Has it given more ships to the commerce of the world? Mr. President, as soon as the war came on and there was a risk to run, the United Fruit Co. and the Standard Oil Co. took their ships and transferred them to American registry, flying the American flag. There is not a ton greater capacity for the transportation of the products of our country than there was before. The routes have not been changed. The boats are owned by the companies, run for their own business. Therefore, Mr. President, the second law has done no good for the body of the American people. It has been of no advantage whatever. But, I say, they are not so mischievous, they are not so dangerous, and they can not hurt the American people so much as this bill if it becomes a law can and, I say, will.

By the pending measure it is proposed to strike another blow even more powerful for destruction by having the Government go into competition with private owners in the shipping business. The war in Europe has caused the people of this country to realize the truth of what the great majority of the Republican Party has been preaching for so many years as to the danger of dependence on foreign shipping to do our carrying trade on the ocean.

This situation has been seized upon by our friends to bring forward this bill. It could not possibly remedy, within any reasonable time, the lack of shipping facilities. The great danger to which we will be subjected by the purchase of interned ships has been well pointed out by the senior Senator from New York [Mr. ROOT] and by other Senators on this side of the Chamber.

I do not believe that the American people yet realize what the provisions of this bill are. Our proceedings get very little notice in the press; but I am quite sure that if the people knew what the bill is and what the results of its passage would be they would be more eager than they are to-day to protest through their chambers of commerce and through the leading newspapers of the country against its passage.

Mr. STONE. Mr. President, will the Senator from Utah yield to me for a question?

The PRESIDING OFFICER. Will the Senator from Utah yield to the Senator from Missouri for a question?

Mr. SMOOT. If the Senator does not really desire to ask the question, I should prefer to go on.

Mr. STONE. I should like to ask it, but I do not press it. I simply wish to know if the Senator can inform me whether he is filibustering or making this speech for circulation for campaign purposes?

Mr. SMOOT. The Senator can form his own opinion. Mr. President, I desire to proceed.

The PRESIDING OFFICER. The Senator from Utah declines to yield further.

Mr. SMOOT. I have taken some little pains, Mr. President, to collect newspaper articles upon this question from every State in the Union. If the editorials of the great newspapers of this country—and I do not mean those published only in large cities or those published where ports of entry are found, but I mean newspapers in every State of the Union—if their editorials are to be taken as expressing the opinion on the subject in the localities in which the papers are published, then the great majority of the people of this country are opposed to this measure. I think that that should have some weight in the consideration of the measure.

I think also that the position taken by the organizations in all the different States, expressing their fear of this measure, should be considered for what it is worth in determining what

is right and what is wrong to do in the passage of this bill or its rejection.
